Shiloh was one of the earliest and most sacred of the Hebrew sanctuaries. The ark of the covenant, which had been kept at Gilgal during the progress of the Conquest (Josh. xviii. 1 f.), was removed thence on the subjugation of the country, and kept at Shiloh from the last days of Joshua to the time of Samuel (Josh. xviii. 10; Judg. xviii. 31; 1 Sam. iv. 3). It was here the Hebrew conqueror divided among the tribes the portion of the west Jordan-region, which had not been already allotted (Josh. xviii. 10, xix. 51). In this distribution, or an earlier one, Shiloh fell within the limits of Ephraim (Josh. xvi. 5). After the victory of the other tribes over Benjamin, the national camp, which appears to have been temporarily at Bethel, was transferred again to Shiloh (Judg. xxi. 12). [HOUSE OF GOD, Amer. ed.] The notice in that connection that Shiloh was in Canaan marks its situation on the west of the Jordan as opposed to Jabesh-Gilead on the east side (Bertheau, Keil, Cassel). The seizure here of the "daughters of Shiloh" by the Benjamites is recorded as an event which preserved one of the tribes from extinction (Judg. xxi. 19–23). The annual "feast of the Lord" was observed at Shiloh, and on one of these occasions, the men lay in wait in the vineyards, and when the women went forth "to dance in dances," the men took them captive and carried them home as wives. Here Eli judged Israel, and at last died of grief on hearing that the ark of the Lord was taken by the enemy (1 Sam. iv. 12–18). The story of Hannah and her vow, which belongs to our recollections of Shiloh, transmits to us a characteristic incident in

Digitized by Google

the life of the Hebrews (1 Sam. i. 1, etc.). Samuel, the child of her prayers and hopes, was here brought up in the sanctuary, and called to the prophetic office (1 Sam. ii. 26, iii. 1). The ungodly conduct of the sons of Eli occasioned the loss of the ark of the covenant, which had been carried into battle against the Philistines, and Shiloh from that time sank into insignificance. It stands forth in the Jewish history as a striking example of the Divine indignation. "Go ye now," says the prophet, "unto my place which was in Shiloh, where I set my name at the first, and see what I did to it, for the wickedness of my people Israel" (Jer. vii. 12). Not a single Jewish relic remains there at the present day. A few broken Corinthian columns of the Roman age are the only antiquities now to be found on the site of Shiloh.

Some have inferred from Judg. xviii. 31 (comp. Ps. lxxviii. 60 f.) that a permanent structure or temple had been built for the Tabernacle at Shiloh, and that it continued there (as it were *sine numine*) for a long time after the Tabernacle was removed to other places.[a] But the language in 2 Sam. vii. 6 is too explicit to admit of that conclusion. God says there to David through the mouth of Nathan the prophet, "I have not dwelt in any house since the time that I brought up the children of Israel out of Egypt, even to this day, but have walked in a tent and in a tabernacle." So in 1 K. iii. 2, it is said expressly that no "house" had been built for the worship of God till the erection of Solomon's Temple at Jerusalem. It must be in a spiritual sense, therefore, that the Tabernacle is called a "house" or "temple" in those passages which refer to Shiloh. God is said to dwell where He is pleased to manifest his presence or is worshipped; and the place thus honored becomes his abode or temple, whether it be a tent or a structure of wood or stone, or even the sanctuary of the heart alone. Ahijah the prophet had his abode at Shiloh in the time of Jeroboam I., and was visited there by the messengers of Jeroboam's wife to ascertain the issue of the sickness of their child (1 K. xi. 29, xii. 15, xiv. 1, etc.). The people there after the time of the exile (Jer. xli. 5) appear to have been Cuthites (2 K. xvii. 30) who had adopted some of the forms of Jewish worship. (See Hitzig, *Zu Jerem.* p. 331.) Jerome, who surveyed the ruins in the 4th century, says: "Vix ruinarum parva vestigia, vix altaris fundamenta monstrantur."

The contour of the region, as the traveller views it on the ground, indicates very clearly where the ancient town must have stood. A Tell, or moderate hill, rises from an uneven plain, surrounded by other higher hills, except a narrow valley on the south, which hill would naturally be chosen as the principal site of the town. The Tabernacle may have been pitched on this eminence, where it would be a conspicuous object on every side. The ruins found there at present are very inconsiderable. They consist chiefly of the remains of a comparatively modern village, with which some large stones and fragments of columns are intermixed, evidently from much earlier times. Near a ruined mosque flourishes an immense oak, or terebinth-tree, the branches of which the winds of centuries have swayed. Just beyond the precincts of the hill stands a dilapidated edifice, which combines some of the architectural properties of a fortress and a church. Three columns with Corinthian capitals lie prostrate on the floor. An amphora between two chaplets, perhaps a work of Roman sculpture, adorns a stone over the doorway. The natives call this ruin the "Mosque of *Seilûn*."[b] At the distance of about fifteen minutes from the main site is a fountain, which is approached through a narrow dale. Its water is abundant, and according to a practice very common in the East, flows first into a pool or well, and thence into a larger reservoir, from which flocks and herds are watered. This fountain, which would be so natural a resort for a festal party, may have been the place where the "daughters of Shiloh" were dancing, when they were surprised and borne off by their captors. In this vicinity are rock-hewn sepulchres, in which the bodies of some of the unfortunate house of Eli may have been laid to rest. There was a Jewish tradition (Asher's *Benj. of Tud.* ii. 435) that Eli and his sons were buried here.[c]

It is certainly true, as some travellers remark, that the scenery of Shiloh is not specially attractive; it presents no feature of grandeur or beauty adapted to impress the mind and awaken thoughts in harmony with the memories of the place. At the same time, it deserves to be mentioned that, for the objects to which Shiloh was devoted, it was not unwisely chosen. It was secluded, and therefore favorable to acts of worship and religious study, in which the youth of scholars and devotees, like Samuel, was to be spent. Yearly festivals were celebrated there, and brought together assemblages which would need the supplies of water and pasturage so easily obtained in such a place. Terraces are still visible on the sides of the rocky hills, which show that every foot and inch of the soil once teemed with verdure and fertility. The ceremonies of such occasions consisted largely of processions and dances, and the place afforded ample scope for such movements. The surrounding hills served as an amphitheatre, whence the spectators could look, and have the entire scene under their eyes. The position, too, in times of sudden danger, admitted of an easy defense, as it was a hill itself, and the neighboring hills could be turned into bulwarks. To its other advantages we should add that of its central position for the Hebrews on the west of the Jordan. "It was equidistant," says Tristram, "from north and south, and easily accessible to the trans-Jordanic tribes." An air of oppressive stillness hangs now over all the scene, and adds force to the reflection that truly the "oracles" so long consulted there "are dumb;" they had fulfilled their purpose, and given place to "a more sure word of prophecy."

A visit to Shiloh requires a *détour* of several miles from the ordinary track, and it has been less

---

[a] * The A. V. speaks of "the temple of the Lord" at Shiloh, in 1 Sam. i. 9, but erroneously, for according to the Hebrew it should be "palace of the Lord." That term (הֵיכָל) was applied to the "tabernacle" as well as the "temple." The Vulg. has in like manner, *templum domini*. H.

[b] This is on the authority of Dr. Robinson. Dr. Wilson understood it was called "Mosque of the Sixty" (*Sittîn*) (*Lands of the Bible*, ii. 294). [This latter is the name given also by Sepp, *Jerus. und das heil Land*, ii. 25. — H.]

[c] * The Palestine Exploration Fund have had photographic views taken of the ruins of the mosque at *Seilûn*, of the rock-hewn tombs near the fountain and of various ruins, from the northwest. H.

**SHILO'NI** (הַשִּׁלֹנִי, *i. e.* "the Shilonite:" [Vat.] τον Δηλωνι; [Rom. Σηλωνι; Alex. Ηλωνι; FA. Δηλωνει:] *Silonites*). This word occurs in the A. V. only in Neh. xi. 5, where it should be rendered — as it is in other cases — "the Shilonite," that is, the descendant of Shelah the youngest son of Judah. The passage is giving an account (like 1 Chr. ix. 3–6) of the families of Judah who lived in Jerusalem at the date to which it refers, and (like that) it divides them into the great houses of Pharez and Shelah.

The change of Shelani to Shiloni is the same which seems to have occurred in the name of Siloam — Shelach in Nehemiah, and Shiloach in Isaiah.
G.

**SHI'LONITE, THE** (הַשִּׁילֹנִי [see above]; in Chron., הַשִּׁלוֹנִי and הַשִּׁלוֹנִי: [Vat.] ο Σηλωνειτης; [Rom.] Alex. Σηλωνίτης: *Silmites*, [*Silonitis*]); that is, the native or resident of Shiloh, — a title ascribed only to Ahijah, the prophet who foretold to Jeroboam the disruption of the northern and southern kingdoms (1 K. xi. 29, xii. 15, xv. 29; 2 Chr. ix. 29, x. 15). Its connection with Shiloh is fixed by 1 K. xiv. 2, 4, which shows that that sacred spot was still the residence of the prophet. The word is therefore entirely distinct from that examined in the following article and under SHILONI.
G.

**SHI'LONITES, THE** (הַשִּׁילֹנִי [see below]: [Vat.] των Σηλωνει: [Rom. Alex. Σηλωνι:] *Silmi*) are mentioned among the descendants of Judah dwelling in Jerusalem at a date difficult to fix (1 Chr. ix. 5). They are doubtless the members of the house of SHELAH, who in the Pentateuch are more accurately designated SHELANITES. This is supported by the reading of the Targum Joseph on the passage — "the tribe of Shelah," and is allowed by Gesenius. The word occurs again in Neh. xi., a document which exhibits a certain correspondence with 1 Chr. ix. It is identical in the original except a slight contraction, but in the A. V. it is given as SHILONI.

**SHIL'SHAH** (שִׁלְשָׁה [*triad*, Ges.]: Σαλισα: *Salusa*). Son of Zophah of the tribe of Asher (1 Chr. vii. 37).

**SHIM'EA** (שִׁמְעָא [*rumor*]: Σαμαα: [Vat. Σαμαν:] *Simmea*). 1. Son of David by Bathsheba (1 Chr. iii. 5). Called also SHAMMUA, and SHAMMUAH.

2. ([Vat. Σομεα:] Alex Σαμα: [*Samaa.*]) A Merarite Levite (1 Chr. vi. 30 [15]).

3. ([Σαμαα:] *Samaa.*) A Gershonite Levite, ancestor of Asaph the minstrel (1 Chr. vi. 39 [24]).

4. (Alex. Σαμαας.) The brother of David (1 Chr. xx. 7), elsewhere called SHAMMAH, SHIMMA, and SHIMEAH.

**SHIM'EAH** (שִׁמְעִי [*rumor, fame*]; *Keri*, שִׁמְעָא: Σεμεϊ; [Vat.] Alex. Σεμεει: *Samaa*). 1. Brother of David, and father of Jonathan and Jonadab (2 Sam. xxi. 21 [where A. V. ed. 1611 reads Shimea]): called also SHAMMAH, SHIMEA, and SHIMMA. In 2 Sam. xiii. 3, 32, his name is written שִׁמְעָה (Σαμαδ; [Vat.] Alex. Σαμα in ver. 32: *Samma*).

2. (שִׁמְאָה: Σαμαδ; [Vat. Σεμαα;] Alex. Σαμεα: *Samaa.*) A descendant of Jehiel the father or founder of Gibeon (1 Chr. viii. 32).

**SHIM'EAM** (שִׁמְאָם [*fame, name*]: Σαμαδ; Alex. Σαμα: *Samaan*). A descendant of Jehiel, the founder or prince of Gibeon (1 Chr. ix. 38). Called SHIMKAH in 1 Chr. viii. 32.

**SHIM'EATH** (שִׁמְעָת [fem. = SHIMEAH]: Ιεμουθ, Σαμαδθ; [Vat. Σαμα,] Alex. Σαμαθ in Chr.: *Semiath*, *Semmath*). An Ammonitess, mother of Jozachar, or Zabad, one of the murderers of King Joash (2 K. xii. 21 [22]; 2 Chr. xxiv. 26).

• **SHIM'EATHITES** (שִׁמְעָתִים, patron.: Σαμαθιμ; Vat. Alex. Σαμαθειμ: *remmanites*), one of the three families of scribes residing at Jabez (1 Chr. ii 55), probably descendants of a certain Shimea. See TIRATHITES.
A.

**SHIM'EI** (שִׁמְעִי [*renowned*]: Σεμεϊ; [in Zech., Συμεών; Vat. also Σεμεει, Σομεει:] *Semei*). 1. Son of Gershom the son of Levi (Num. iii. 18; 1 Chr. vi 17, 29, xxiii. 7, 9, 10; Zech. xii. 13); called SHIMI in Ex. vi 17. In 1 Chr. vi. 29, according to the present text, he is called the son of Libni, and both are reckoned as sons of Merari, but there is reason to suppose that there is something omitted in this verse. [See LIBNI 2: MAHLI 1.]
W. A. W.

2. ([Vat.] Alex. Σεμεει.) Shimei the son of Gera, a Benjamite of the house of Saul, who lived at Bahurim. His residence there agrees with the other notices of the place, as if a marked spot on the way to and from the Jordan Valley to Jerusalem, and just within the border of Benjamin [BAHURIM.] He may have received the unfortunate Phaltiel after his separation from Michal (2 Sam. iii. 16).

When David and his suite were seen descending the long defile, on his flight from Absalom (2 Sam. xvi. 5–13), the whole feeling of the clan of Benjamin burst forth without restraint in the person of Shimei. His house apparently was separated from the road by a deep valley, yet not so far as that anything that he did or said could not be distinctly heard. He ran along the ridge, cursing, throwing stones at the king and his companions, and when he came to a patch of dust on the dry hill side, taking it up, and throwing it over them. Abishai was so irritated, that, but for David's remonstrance, he would have darted across the ravine (2 Sam. xvi. 9) and torn or cut off his head. The whole conversation is remarkable, as showing what may almost be called the slang terms of abuse prevalent in the two rival courts. The cant name for David in Shimei's mouth is "the man of blood," twice emphatically repeated: "Come out, come out, thou man of blood" — "A man of blood art thou" (2 Sam. xvi. 7, 8). It seems to have been derived from the slaughter of the sons of Saul (2

Digitized by Google

Sam. xxi.), or generally perhaps from David's predatory, warlike life (comp. 1 Chr. xxii. 8). The taunt name for a Benjamite in Abishai's mouth was "a dead dog" (2 Sam. xvi. 9; compare Abner's expression, "Am I a dog's head," 2 Sam. iii. 8). "Man of Belial" also appears to have been a favorite term on both sides (2 Sam. xvi. 7, xx. 1). The royal party passed on; Shimei following them with his stones and curses as long as they were in sight.

The next meeting was very different. The king was now returning from his successful campaign. Just as he was crossing the Jordan, in the ferry-boat or on the bridge (2 Sam. xix. 18; LXX. διαβαίνοντος, Jos. *Ant.* vii. 2, § 4, ἐπὶ τὴν γεφύραν), the first person to welcome him on the western, or perhaps even on the eastern side, was Shimei, who may have seen him approaching from the heights above. He threw himself at David's feet in abject penitence. "He was the first," he said, "of all the house of *Joseph*," thus indicating the close political alliance between Benjamin and Ephraim. Another altercation ensued between David and Abishai, which ended in David's guaranteeing Shimei's life with an oath (2 Sam. xix. 18–23), in consideration of the general jubilee and amnesty of the return.

But the king's suspicions were not set to rest by this submission; and on his death-bed he recalls the whole scene to the recollection of his son Solomon. Shimei's head was now white with age (1 K. ii. 9), and he was living in the favor of the court at Jerusalem (*ibid.* 8). Solomon gave him notice that from henceforth he must consider himself confined to the walls of Jerusalem on pain of death. The Kidron, which divided him from the road to his old residence at Bahurim, was not to be crossed. He was to build a house in Jerusalem (1 K. ii. 36, 37). For three years the engagement was kept. At the end of that time, for the purpose of capturing two slaves who had escaped to Gath, he went out on his ass, and made his journey successfully (*ibid.* ii. 40). On his return, the king took him at his word, and he was slain by Benaiah (*ibid.* ii. 41–46). In the sacred historian, and still more in Josephus (*Ant.* viii. 1, § 5), great stress is laid on Shimei's having broken his oath to remain at home; so that his death is regarded as a judgment, not only for his previous treason, but for his recent sacrilege. A. P. S.

3. [Vat. Alex. Σεμεει.] One of the adherents of Solomon at the time of Adonijah's usurpation 1 K. i. 8). Unless he is the same as Shimei the son of Elah (1 K. iv. 18), Solomon's commissariat officer, or with Shimeah, or Shammah, David's brother, as Ewald (*Gesch.* iii. 266) suggests, it is impossible to identify him. From the mention which is made of "the mighty men" in the same verse, one might be tempted to conclude that Shimei is the same with Shammah the Hararite (2 Sam. xxiii. 11); for the difference in the Hebrew names of Shimei and Shammah is not greater than that between those of Shimeah and Shammah, which are both applied to David's brother.

4. [Vat. A; Alex. Σεμεει.] Solomon's commissariat officer in Benjamin (1 K. iv. 18); son of Elah.

5. [Vat. omits; Rom. Σεμεΐ; Alex. Σεμει.] Son of Pedaiah, and brother of Zerubbabel (1 Chr. iii. 19).

6. [Vat Σεμεει.] A Simeonite, son of Zacchur (1 Chr. iv. 26, 27). He had sixteen sons and six daughters. Perhaps the same as SHEMAIAH 3.

7. [Vat. Alex. Σεμεει.] Son of Gog, a Reubenite (1 Chr. v. 4). Perhaps the same as SHEMA 1.

8. [Vat. Σεμεει; Alex. Σεμει.] A Gershonite Levite, son of Jahath (1 Chr. vi. 42).

9. (Σεμεία; [Vat. Εμεει;] Alex. Σεμεΐ: *Semeias.*) Son of Jeduthun, and chief of the tenth division of the singers (1 Chr. xxv. 17). His name is omitted from the list of the sons of Jeduthun in ver. 3, but is evidently wanted there.

10. (Σεμεΐ; [Vat. Σεμεει:] *Semeias.*) The Ramathite who was over David's vineyards (1 Chr. xxvii. 27). In the Vat. MS. of the LXX. he is described as ὁ ἐκ Ῥαήλ.

11. (Alex. Σαμειας: *Semei.*) A Levite of the sons of Heman, who took part in the purification of the Temple under Hezekiah (2 Chr. xxix. 14).

12. [Alex. Σεμει, Σεμεΐ.] The brother of Conaniah the Levite in the reign of Hezekiah, who had charge of the offerings, the tithes, and the dedicated things (2 Chr. xxxi. 12, 13). Perhaps the same as the preceding.

13. (Σαμου: FA. Σαμουδ.) A Levite in the time of Ezra who had married a foreign wife (Ezr. x. 23). Called also SEMIS.

14. (Σεμεΐ; [Vat.] FA. Σεμεει.) One of the family of Hashum, who put away his foreign wife at Ezra's command (Ezr. x. 33). Called SEMEI in 1 Esdr. ix. 33.

15. A son of Bani, who had also married a foreign wife and put her away (Ezr. x. 38). Called SAMIS in 1 Esdr. ix. 34.

16. (Σεμειας; [Vat. FA.] Σεμεειας.) Son of Kish a Benjamite, and ancestor of Mordecai (Esth. ii. 5). W. A. W.

**SHIM'EON** (שִׁמְעוֹן [*a hearing*, or *famous one*]: Σεμεών: *Simeon*). A layman of Israel, of the family of Harim, who had married a foreign wife and divorced her in the time of Ezra (Ezr. x. 31). The name is the same as SIMEON.

**SHIM'HI** (שִׁמְעִי: Σαμαΐθ; [Vat. Σαμαειθ;] Alex. Σαμαΐ: *Semei*). A Benjamite, apparently the same as SHEMA the son of Elpaal (1 Chr. viii 21). The name is the same as SHIMEI.

**SHIM'I** (שִׁמְעִי: Σεμεΐ; [Vat. Σεμεει; Alex Σεμει:] *Semei* = SHIMEI 1, Ex. vi. 17).

**SHIM'ITES, THE** (הַשִּׁמְעִי [*renowned*, Ges.]: ὁ Σεμεΐ; [Alex. Σεμει:] *Semeïtica*, sc. *familia*). The descendants of SHIMEI the son of Gershom (Num. iii. 21). They are again mentioned in Zech. xii. 13, where the LXX. have Συμεών.

**SHIM'MA** (שִׁמְעָא: Σαμαά; Alex. Σαμαια: *Simmaa*). The third son of Jesse, and brother of David (1 Chr. ii. 13). He is called also SHAMMAH, SHIMEA, and SHIMEAH. Josephus calls him Σάμαος (*Ant.* vi. 8, § 1), and Σαμᾶ (*Ant.* vii 12, § 2).

**SHIM'ON** (שִׁימוֹן [*desert*]: Σεμών; [Vat. Σεμιων:] Alex. Σεμειων: *Simon*). The four sons of Shimon are enumerated in an obscure genealogy of the tribe of Judah (1 Chr. iv. 20). There is no trace of the name elsewhere in the Hebrew, but in the Alex. MS. of the LXX. there is mention made of "Someion the father of Joman" in 1 Chr. iv 19, which was possibly the same as Shimon.

**SHIM'RATH** (שִׁמְרָת [*watch, guard*]

Digitized by Google

Σαμαρίθ· *Samarith*). A Benjamite, of the sons of Shimhi (1 Chr. viii. 21).

**SHIM'RI** (שִׁמְרִי [*vigilant*]: Σεμρί; [Vat. Σαμαρ;] Alex. Σαμαρίας: *Semri*). 1. A Simeonite, son of Shemaiah (1 Chr. iv. 37).

2. (Σαμερί; [Vat. FA. Σαμερει;] Alex. Σαμαρι: *Semri*.) The father of Jediael, one of David's guard (1 Chr. xi. 45).

3. (Ζαμβρί; [Vat. Ζαμβρει;] Alex. Ζαμβρι.) A Kohathite Levite in the reign of Hezekiah, of the sons of Elizaphan (2 Chr. xxix. 13). He assisted in the purification of the Temple.

**SHIM'RITH** (שִׁמְרִית [fem. *vigilant*]: Σαμαρίθ; [Vat. Σομαιωθ;] Alex. Σαμαριθ: *Semrith*). A Moabitess, mother of Jehozabad, one of the assassins of King Joash (2 Chr. xxiv. 26). In 2 K. xii. 21, she is called SHOMER. The Peshito-Syriac gives *Neturuth*, which appears to be a kind of attempt to translate the name.

**SHIM'ROM** (שִׁמְרֹן [*watch-height*]: Σεμερών: Alex. Σαμραμ: *Simeron*). SHIMRON the son of Issachar (1 Chr. vii. 1). The name is correctly given "Shimron" in the A. V. of 1611.

**SHIM'RON** (שִׁמְרֹן [*watch-height*]: Σαμαών; Alex. Σομερων, Σεμρων: *Semeron, Semron*). A city of Zebulun (Josh. xix. 15). It is previously named in the list of the places whose kings were called by Jabin, king of Hazor, to his assistance against Joshua (xi. 1). Its full appellation was perhaps SHIMRON-MERON. Schwarz (p. 172) proposes to identify it with the Simonias of Josephus (*Vita*, § 24), now *Simúniyeh*, a village a few miles W. of Nazareth, which is mentioned in the well-known list of the Talmud (*Jerus. Megillah*, cap. 1) as the ancient Shimron. This has in its favor its proximity to Bethlehem (comp. xix. 15). The Vat. LXX., like the Talmud, omits the ר in the name. G.

**SHIM'RON** (שִׁמְרֹן [see above]: in Gen. [Rom. Σαμβρών, Alex.] Ζαμβραμ; in Num. [Vat.] Σαμαραμ: [Rom. Ζαμβράμ;] Alex. Αμβραν: *Semron*, [*Semron*]). The fourth son of Issachar according to the lists of Genesis (xlvi. 13) and Numbers (xxvi. 24), and the head of the family of the SHIMRONITES. In the catalogues of Chronicles his name is given [in later eds. of the A. V.] as SHIMROM. G.

**SHIM'RONITES, THE** (הַשִּׁמְרֹנִי [patr., see above]: [Vat.] ο Σαμαρανει; [Rom. ὁ Σαμραμί;] Alex. ο Αμβραμει: *Semronita*). The family of SHIMRON, son of Issachar (Num. xxvi. 24).

**SHIMRON-MERON** (שִׁמְרֹן מְרֹאן [*watch-height of M.*, Ges.]; the *Keri* omits the ן: Σαμρων . . . [Μαμβρόθ, Vat.] Μαμρωθ; Alex. Σαμρων . . [a] Φασγα . . Μαρων: *Semeron*). The king of Shimron-meron is mentioned as one of the thirty-one kings vanquished by Joshua (Josh. xii. 20). It is probably (though not certainly) the complete name of the place elsewhere called SHIMRON. Both are mentioned in proximity to Achshaph in 1, xii. 20). It will be observed that the LXX. treat the two words as belonging to two distinct places, and it is certainly worth notice that Maldon — in Hebrew so easily substituted for Meron, and in fact so read by the LXX., Peshito, and Arabic — occurs next to Shimron in Josh. xi. 1.

There are two claimants to identity with Shimron-meron. The old Jewish traveller hap-Parchi fixes it at two hours east of En-gannim (*Jenin*), south of the mountains of Gilboa, at a village called in his day *Dar Meron* (Asher's *Benjamin*, ii. 434). No modern traveller appears to have explored that district, and it is consequently a blank on the maps. The other is the village of *Simuniyeh*, west of Nazareth, which the Talmud asserts to be the same with Shimron. G.

**SHIM'SHAI** [2 syl.] (שִׁמְשַׁי [*sunny*]: Σαμψά: [Vat. Σαμασα, Σαμεε, etc.;] Alex. Σαμσαι: *Samsai*). The scribe or secretary of Rehum, who was a kind of satrap of the conquered province of Judæa, and of the colony at Samaria, supported by the Persian court (Ezr. iv. 8, 9, 17, 23). He was apparently an Aramæan, for the letter which he wrote to Artaxerxes was in Syriac (Ezr. iv. 7), and the form of his name is in favor of this supposition. In 1 Esdr. ii. he is called SEMELLIUS, and by Josephus Σεμέλλιος (*Ant.* xi. 2, § 1). The Samaritans were jealous of the return of the Jews, and for a long time plotted against them without effect. They appear ultimately, however, to have prejudiced the royal officers, and to have prevailed upon them to address to the king a letter which set forth the turbulent character of the Jews and the dangerous character of their undertaking, the effect of which was that the rebuilding of the Temple ceased for a time.

**SHI'NAB** (שִׁנְאָב [*father's tooth*]: Σενναάβ: *Sennaab*). The king of Admah in the time of Abraham: one of the five kings attacked by the invading army of Chedorlaomer (Gen. xiv 2). Josephus (*Ant.* i. 9) calls him Σεναβάρης.

**SHI'NAR** (שִׁנְעָר [see below]: Σενααρ, Σεννααρ; [Alex. Σενναρ: see also below:] *Sennaar*) seems to have been the ancient name of the great alluvial tract through which the Tigris and Euphrates pass before reaching the sea — the tract known in later times as Chaldæa or Babylonia. It was a plain country, where brick had to be used for stone, and slime (mud?) for mortar (Gen. xi. 3). Among its cities were Babel (Babylon), Erech or Oreeh (Orchoë), Calneh or Calno (probably *Niffer*), and Accad, the site of which is unknown. These notices are quite enough to fix the situation. It may, however, be remarked further, that the LXX. render the word by "Babylonia" (Βαβυλωνία) in one place (Is. xi. 11), and by "the land of Babylon" (γῆ Βαβυλῶνος) in another (Zech. v. 11). [The word also occurs (Josh. vii. 21) in the phrase rendered in the A. V. BABYLONISH GARMENT. — A.]

The native inscriptions contain no trace of the term, which seems to be purely Jewish, and unknown to any other people. At least it is extremely doubtful whether there is really any connection between Shinár and Singara or *Sinjar*. Singara was the name of a town in Central Mesopotamia, well known to the Romans (Dion Cass. lxviii. 22; Amm. Marc. xviii. 5, &c.), and still existing (Layard, *Nin. and Bab.* p. 249). It is from this place that the mountains which run across Mesopotamia from Mosul to Rakken receive their title of "the Sinjar range" (Σιγγάρας ὄρος, Ptol. v. 18). As this name first appears in *central* Mesopotamia, to

[a] This addition, especially in the Alex. MS. — usually so close to the Hebrew — is remarkable. There is nothing in the original text to suggest it.

Digitized by Google

which the term Shinar is never applied, about the time of the Antonines, it is very unlikely that it can represent the old Shinar, which ceased practically to be a geographic title soon after the death of Moses.[a]

It may be suspected that Shinar was the name by which the Hebrews originally knew the lower Mesopotamian country where they so long dwelt, and which Abraham brought with him from "Ur of the Chaldees" (*Mugheir*). Possibly it means "the country of the Two Rivers," being derived from שְׁנַי, "two" and *'ar*, which was used in Babylonia, as well as *nahr* or *nâhâr* (נָהָר), for "a river." (Compare the "Ar-malchar" of Pliny, *H. N.* vi. 26, and "Ar-macales" of Abydenus, *Fr.* 9, with the Naar-malcha of Ammianus, xxiv. 6, called Ναρμάχα, by Isidore, p 5, which is translated as "the Royal River;" and compare again the "Narragam" of Pliny, *H. N.* vi. 30, with the "Aracanus" of Abydenus, *l. s. c.*) G. R.

**SHIP.** No one writer in the whole range of Greek and Roman literature has supplied us (it may be doubted whether all put together have supplied us) with so much information concerning the merchant-ships of the ancients as St. Luke in the narrative of St. Paul's voyage to Rome (Acts xxvii., xxviii.). In illustrating the Biblical side of this question, it will be best to arrange in order the various particulars which we learn from this narrative, and to use them as a basis for elucidating whatever else occurs, in reference to the subject, in the Gospels and other parts of the N. T., in the O. T. and the Apocrypha. As regards the earlier Scriptures, the Septuagintal thread will be followed. This will be the easiest way to secure the mutual illustration of the Old and New Testaments in regard to this subject. The merchant-ships of various dates in the Levant did not differ in any essential principle; and the Greek of Alexandria contains the nautical phraseology which supplies our best linguistic information. Two preliminary remarks may be made at the outset.

As regards St. Paul's voyage, it is important to remember that he accomplished it in three ships: first the Adramyttian vessel [ADRAMYTTIUM] which took him from CÆSAREA to MYRA, and which was probably a coasting vessel of no great size (xxvii. 1–6); secondly, the large Alexandrian corn-ship, in which he was wrecked on the coast of Malta (xxvii. 6–xxviii. 1) [MELITA]; and thirdly, another large Alexandrian corn-ship, in which he sailed from Malta by SYRACUSE and RHEGIUM to PUTEOLI (xxviii. 11–13).

Again, the word employed by St. Luke, of each of these ships, is, with one single exception, when he uses *ναῦς* (xxvii. 41), the generic term πλοῖον (xxvii. 2, 6, 10, 15, 22, 30, 37, 38, 39, 44, xxviii. 11). The same general usage prevails throughout. Elsewhere in the Acts xx. 13, 38, xxi. 2, 3, 6) we have πλοῖον. So in St. James (iii. 4), and in the Revelation (viii. 9, xviii. 17, 19). In the Gospels we have πλοῖον (*passim*) or πλοιάριον (Mark iv. 36; John xxi. 8). In the LXX. we find πλοῖον one hundred and twenty-eight times, and *ναῦς* nine times. Both words generally correspond to the Hebrew אֳנִי or אֳנִיָּה. In Jon. i. 5, πλοῖον is used to represent the Hebrew סְפִינָה, *sephînâh*, which, from its etymology, appears to mean a vessel covered with a deck or with hatches, in opposition to an open boat. The senses in which σκάφος (2 Macc. xii. 3, 6) and σκάφη (Acts xxvii. 16, 32, are employed we shall notice as we proceed. The use of τριήρης is limited to a single passage in the Apocrypha (2 Macc. iv. 20).

(1.) *Size of Ancient Ships.* — The narrative which we take as our chief guide affords a good standard for estimating this. The ship in which St. Paul was wrecked had 276 persons on board (Acts xxvii. 37), besides a cargo (φορτίον) of wheat, (*ib.* 10, 28); and all these passengers seem to have been taken on to Puteoli in another ship (xxviii. 11) which had its own crew and its own cargo; nor is there a trace of any difficulty in the matter, though the emergency was unexpected. Now in English transport-ships, prepared for carrying troops, it is a common estimate to allow a ton and a half per man; thus we see that it would be a mistake to suppose that these Alexandrian corn-ships were very much smaller than modern trading vessels. What is here stated is quite in harmony with other instances. The ship in which Josephus was wrecked (*Vit.* c. 3), in the same part of the Levant, had 600 souls on board. The Alexandrian corn-ship described by Lucian (*Navig. s. vota*) as driven into the Piræus by stress of weather, and as exciting general attention from its great size, would appear (from a consideration of the measurements, which are explicitly given) to have measured 1,000 or 1,200 tons. As to the ship of Ptolemy Philadelphus, described by Athenæus (v. 204), this must have been much larger; but it would be no more fair to take that as a standard than to take the "Great Eastern" as a type of a modern steamer. On the whole, if we say that an ancient merchant-ship might range from 500 to 1,000 tons, we are clearly within the mark.

(2.) *Steering Apparatus.* — Some commentators have fallen into strange perplexities from observing that in Acts xxvii. 40 (τὰς ζευκτηρίας τῶν πηδαλίων "the fastenings of the rudders"), St. Luke uses πηδάλιον in the plural. One even suggests that the ship had one rudder fastened at the bow and another fastened at the stern. We may say of him, as a modern writer says in reference to a similar comment on a passage of Cicero, "It is hardly possible that he can have seen a ship." The sacred writer's use of πηδάλια is just like Pliny's use of *gubernacula* (*H. N.* xi. 37, 88), or Lucretius's of *gubernia* (iv. 440). Ancient ships were in truth not steered at all by rudders fastened or hinged to the stern, but by means of two paddle-rudders, one on each quarter, acting in a rowlock or through a port-hole, as the vessel might be small or large.[b] This fact is made familiar to us in classical works of art, as on coins, and the sculptures of Trajan's Column. The same thing is true, not only of the Mediterranean, but of the early ships of the Northmen, as may be seen in the Bayeux tapestry. Traces of the "two rudders" are found in the time of Louis IX. The hinged rudder first

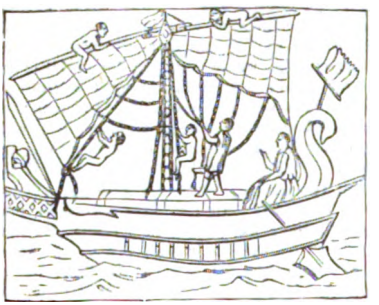
[a] In Isaiah and Zechariah, Shinar, *once* used by each writer, is an *archaism*.

[b] Dr. Wordsworth gives a very interesting illustration from Hippolytus, bishop of Portus (*de Antichr.* 59), where, in a detailed allegorical comparison of "the Church to a ship, he says "her two rudders are the two Testaments by which she steers her course."

Digitized by Google

appears on the coins of our King Edward III. There is nothing out of harmony with this early system of steering in Jam. iii. 4, where πηδάλιον occurs in the singular; for 'the governor" or steersman (ὁ εὐθύνων) would only use one paddle-rudder at a time. In a case like that described in Acts xxvii. 40, where four anchors were let go at the stern, it would of course be necessary to lash or trice up both paddles, lest they should interfere with the ground tackle. When it became necessary to steer the ship again, and the anchor-ropes were cut, the lashings of the paddles would of course be unfastened.

(3.) *Build and Ornaments of the Hull.* — It is probable, from what has been said about the mode of steering (and indeed it is nearly evident from ancient works of art), that there was no very marked difference between the bow (πρῷρα, "fore-ship," ver. 30, "fore part," ver. 41) and the stern (πρύμνα, "hinder part," ver. 41; see Mark iv. 38). The "hold" (κοίλη, "the *sides* of the ship," Jonah i. 5) would present no special peculiarities. One characteristic ornament (the χηνίσκος, or *aplustre*), rising in a lofty curve at the stern or the bow, is familiar to us in works of art, but no allusion to it occurs in Scripture. Of two other customary ornaments, however, one is probably implied, and the second is distinctly mentioned in the account of St. Paul's voyage. That personification of ships, which seems to be instinctive, led the ancients to paint an eye on each side of the bow. Such is the custom still in the Mediterranean, and indeed our own sailors speak of "the eyes" of a ship. This gives vividness to the word ἀντοφθαλμεῖν, which is used (Acts xxvii. 15) where it is said that the vessel could not "bear up into" (literally "look at") the wind. This was the vessel in which St. Paul was wrecked. An ornament of that which took him on from Malta to Puzzuoli is more explicitly referred to. The "sign" of that ship (παράσημον, Acts xxviii. 11) was CASTOR AND POLLUX; and the symbols of these heroes (probably in the form represented in the coin engraved under that article) were doubtless painted or sculptured on each side of the bow, as was the case with the goddess Isis on Lucian's ship (ἡ πρῷρα τὴν ἐπώνυμον τῆς νεὼς θεὸν ἔχουσα τὴν Ἶσιν ἑκατέρωθεν, *Navig.* c. 5).



(4.) *Undergirders.* — The imperfection of the hull, and still more (see below, 6) the peculiarity of the rig, in ancient ships, resulted in a greater tendency than in our times to the starting of the planks, and consequently to leaking and foundering. We see this taking place alike in the voyages of Jonah, St. Paul, and Josephus; and the loss of the fleet of Æneas in Virgil ("laxis laterum compagibus omnes," *Æn.* i. 122) may be adduced in illustration. Hence it was customary to take on board peculiar contrivances, suitably called "helps" (βοηθείαις, Acts xxvii. 17), as precautions against such dangers. These were simply cables or chains, which in case of necessity could be passed round the frame of the ship, at right angles to its length, and made tight. The process is in the English navy called *frapping*, and many instances could be given where it has been found necessary in modern experience. Ptolemy's great ship, in Athenæus (*l. c.*), carried twelve of these undergirders (ὑποζώματα). Various allusions to the practice are to be found in the ordinary classical writers. See, for instance, Thucyd. i. 29; Plat. *Rep.* x. 3, 616; Hor. *Od.* i. 14, 6. But it is most to our purpose to refer to the inscriptions, containing a complete inventory of the Athenian navy, as published by Boeckh (*Urkunden über das Seewesen des Attischen Staates*, Berl. 1840). The editor, however, is quite mistaken in supposing (pp. 133–138) that these undergirders were passed round the body of the ship from stem to stern.

(5.) *Anchors.* — It is probable that the ground tackle of Greek and Roman sailors was quite as good as our own. (On the taking of soundings, see below, 12.) Ancient anchors were similar in form (as may be seen on coins) to those which we use now, except that they were without flukes. Two allusions to anchoring are found in the N. T., one in a very impressive metaphor concerning Christian hope (Heb. vi. 19). A saying of Socrates, quoted here by Kypke (οὔτε ναῦν ἐξ ἐνὸς ἀγκυρίου οὔτε βίον ἐκ μιᾶς ἐλπίδος ὁρμίσασθαι), may serve to carry our thoughts to the other passage, which is part of the literal narrative of St. Paul's voyage at its most critical point. The ship in which he was sailing had four anchors on board, and these were all employed in the night, when the danger of falling on breakers was imminent. The sailors on this occasion anchored by the stern (ἐκ πρύμνης ῥίψαντες ἀγκύρας τέσσαρας, Acts xxvii. 29). In this there is nothing remarkable, if there has been time for due preparation. Our own ships of war anchored by the stern at Copenhagen and Algiers. It is clear, too, that this was the right course for the sailors with whom St. Paul was concerned, for their plan was to run the ship aground at daybreak. The only motives for surprise are that they should have been able so to anchor without preparation in a gale of wind, and that the anchors should have held on such a night. The answer to the first question thus suggested is that ancient ships, like their modern successors, the small craft among the Greek islands, were in the habit of anchoring by the stern, and therefore prepared for doing so. We have a proof of this in one of the paintings of Herculaneum, which illustrates another point already mentioned, namely, the necessity of tricing up the movable rudders in case of anchoring by the stern (see ver 40). The other question, which we have supposed to arise, relates rather to the holding-ground than to the mode of anchoring; and it is very interesting here to quote what an English sailing book says of St. Paul's Bay in Malta: "While the cables hold, there is no danger, as the anchors will never start" (Purdy's *Sailing Directions*, p 180).

(6.) *Masts, Sails, Ropes, and Yards.* — These were collectively called σκευή or σκευή, or *gear* (τὰ δὲ σύμπαντα σκευὴ καλεῖται, Jul. Poll.). We find this word twice used for parts of the rigging in the narrative of the Acts (xxvii. 17, 19). The rig of an ancient ship was more simple and clumsy than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. Such was the rig also of the ships of the Northmen at a later period. Hence the strain upon the hull, and the danger of starting the planks, were greater than under the present system, which distributes the mechanical pressure more evenly over the whole ship. Not that there were never more masts than one, or more sails than one on the same mast, in an ancient merchantman. But these were repetitions, so to speak, of the same general unit of rig. In the account of St. Paul's shipwreck very explicit

Digitized by Google

mention is made of the ἀρτεμών (xxvii. 40), which is undoubtedly the "foresail" (not "mainsail," as in the A. V.). Such a sail would be almost necessary in putting a large ship about. On that occasion it was used in the process of running the vessel aground. Nor is it out of place here to quote a Crimean letter in the *Times* (Dec. 5, 1855): "The 'Lord Raglan' (merchant-ship) is on shore, but taken there in a most sailorlike manner. Directly her captain found he could not save her, he cut away his mainmast and mizen, and *setting a topsail* on her foremast, *ran her ashore stem on*." Such a mast may be seen, raking over the bow, in representations of ships in Roman coins. In the O. T. the mast (ἱστός) is mentioned (Is. xxxiii. 23); and from another prophet (Ez. xxvii. 5) we

Ancient ship. From a painting at Pompeii.

learn that cedar-wood from Lebanon was sometimes used for this part of ships. There is a third passage (Prov. xxiii. 34, רֹאשׁ חִבָּל) where the top of a ship's mast is probably intended, though there is some slight doubt on the subject, and the LXX. take the phrase differently. Both ropes (σχοινία, Acts xxvii. 32) and sails (ἱστία) are mentioned in the above-quoted passage of Isaiah; and from Ezekiel (xxvii. 7) we learn that the latter were often made of Egyptian linen (if such is the meaning of στρωμνή). There the word χαλάω (which we find also in Acts xxvii. 17, 30) is used for lowering the sail from the yard. It is interesting here to notice that the word ὑποστέλλομαι, the technical term for furling a sail, is twice used by St. Paul, and that in an address delivered in a seaport in the course of a voyage (Acts xx. 20, 27). It is one of the very few cases in which the Apostle employs a nautical metaphor.

This seems the best place for noticing two other points of detail. Though we must not suppose that merchant-ships were habitually propelled by rowing, yet sweeps must sometimes have been employed. In Ez. xxvii. 23, oars (מַשּׁוֹט) are distinctly mentioned; and it seems that oak-wood from Bashan was used in making them (ἐκ τῆς Βασανίτιδος ἐποίησαν τὰς κώπας σου, *ibid.* 6). Again, in Is. xxxiii. 21 אֳנִי שַׂיִט literally means "a ship of oar," *i. e.* an oared vessel. Rowing, too, is probably implied in Jon. i. 13, where the LXX. have simply παρεβιάζοντο. The other feature of the ancient, as of the modern ship, is the flag or σημεῖον at the top of the mast (Is. *l. c.*, and xxx. 17). Here perhaps, as in some other respects, the early Egyptian paintings supply our best illustration.

(7.) *Rate of Sailing.* — St. Paul's voyages furnish excellent data for approximately estimating this; and they are quite in harmony with what we learn from other sources. We must notice here, however (what commentators sometimes curiously forget), that winds are variable. Thus the voyage between TROAS and PHILIPPI, accomplished on one occasion (Acts xvi. 11, 12) in two days, occupied on another occasion (Acts xx. 6) five days. Such a variation might be illustrated by what took place almost any week between Dublin and Holyhead before the application of steam to seafaring. With a fair wind an ancient ship would sail fully seven knots an hour. Two very good instances are again supplied by St. Paul's experience: in the voyages from Cæsarea to Sidon (Acts xxvii 2, 3) and from Rhegium to Puteoli (Acts xxviii. 13). The result given by comparing in these cases the measurements of time and distance corresponds with what we gather from Greek and Latin authors generally; *e. g.*, from Pliny's story of the fresh fig produced by Cato in the Roman Senate before the third Punic war: "This fruit was gathered fresh at Carthage three days ago: that is the distance of the enemy from your walls" (Plin. *H. N.* xv. 20).

(8.) *Sailing before the wind, and near the wind.* — The rig which has been described is, like the rig of Chinese junks, peculiarly favorable to a quick run before the wind. We have in the N. T. (Acts xvi. 11, xxvii. 16) the technical term εὐθυδρομέω for voyages made under such advantageous conditions.[a] It would, however, be a great mistake to suppose that ancient ships could not work to windward. Pliny distinctly says: "Iisdem ventis in contrarium navigatur prolatis pedibus" (*H. N.* ii. 48). The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. At one very critical point of St. Paul's voyage to Rome (Acts xxvii. 7) we are told that the ship could not hold on her course (which was W. by S., from Cnidus by the north side of Crete) against a violent wind (μὴ προσεῶντος ἡμᾶς τοῦ ἀνέμου) blowing from the N. W., and that consequently she ran down to the east end of CRETE [SALMONE], and worked up under the shelter of the south side of the island (vv. 7, 8). [FAIR HAVENS.] Here the technical terms of our sailors have been employed, whose custom is to divide the whole circle of the compass-card into thirty-two equal parts, called points. A modern ship, if the weather is not very boisterous, will sail within six points of the wind. To an ancient vessel, of which the hull was more clumsy, and the yards could not be braced so tight, it would be safe to assign seven points as the limit. This will enable us, so far as we know the direction of the wind (and we can really ascertain it in each case very exactly), to lay down the tacks of the ships in which St. Paul sailed, beating against the wind, on the voyages from Philippi to Troas (ἄχρις ἡμερῶν πέντε, Acts xx. 6), from Sidon to Myra (διὰ τὸ τοὺς ἀνέμους εἶναι ἐναντίους, xxvii. 3–5), from Myra to Cnidus (ἐν ἱκαναῖς ἡμέραις βραδυπλοοῦντες, xxvii. 6, 7), from Salmone to Fair Havens (μόλις παραλεγόμενοι, xxvii. 7, 8), and from Syracuse to Rhegium (περιελθόντες, xxviii. 12, 13).

(9.) *Lying-to.* — This topic arises naturally out

[a] With this compare τὸν ἐπ' εὐθείας δρόμον in an interesting passage of Philo concerning the Alexandrian ships (*in Flacc.* p. 968, ed Frankf 1691).

Digitized by Google

of what has preceded, and it is so important in reference to the main questions connected with the shipwreck at Malta, that it is here made the subject of a separate section. A ship that could make progress on her proper course, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is, not to make progress at all hazards, but to ride out a gale in safety; and this is what was done in St. Paul's ship when she was undergirded and the boat taken on board (Acts xxvii. 14–17) under the lee of CLAUDA. It is here that St. Luke uses the vivid term ἀνταφθαλμεῖν, mentioned above. Had the gale been less violent, the ship could easily have held on her course. To anchor was out of the question; and to have drifted before the wind would have been to run into the fatal Syrtis on the African coast. [QUICKSANDS.] Hence the vessel was *laid-to* ("close-hauled," as the sailors say) "on the starboard tack," *i. e.* with her right side towards the storm. The wind was E. N. E. [EUROCLYDON], the ship's bow would point N. by W., the direction of drift (six points being added for "lee-way") would be W. by N., and the rate of drift about a mile and a half an hour. It is from these materials that we easily come to the conclusion that the shipwreck must have taken place on the coast of Malta. [ADRIA.]

(10.) *Ship's Boat.* — This is perhaps the best place for noticing separately the σκάφη, which appears prominently in the narrative of the voyage (Acts xxvii. 16, 32). Every large merchant-ship must have had one or more boats. It is evident that the Alexandrian corn-ship in which St. Paul was sailing from Fair Havens, and in which the sailors, apprehending no danger, hoped to reach PHENICE, had her boat towing behind. When the gale came, one of their first desires must have been to take the boat on board, and this was done under the lee of Clauda, when the ship was undergirded, and brought round to the wind for the purpose of lying-to; but it was done with difficulty, and it would seem that the passengers gave assistance in the task (μόλις ἰσχύσαμεν περικρατεῖς γενέσθαι τῆς σκάφης, Acts xxvii. 16). The sea by this time must have been furiously rough, and the boat must have been filled with water. It is with this very boat that one of the most lively passages of the whole narrative is connected. When the ship was at anchor in the night before she was run aground, the sailors lowered the boat from the davits with the selfish desire of escaping, on which St. Paul spoke to the soldiers, and they cut the ropes (τὰ σχοινία) and the boat fell off (Acts xxvii. 30–32).

(11.) *Officers and Crew.* — In Acts xxvii. 11 we have both κυβερνήτης and ναύκληρος. The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. The same word occurs also in Rev. xviii. 17; Prov. xxiii. 34; Ez. xxvii. 8, and is equivalent to τροπεύς in Ez. xxvii. 29; Jon. i. 6. In James iii. 4 ὁ εὐθύνων, "the governor," is simply the steersman for the moment. The word for "shipmen" (Acts xxvii. 27, 30) and "sailors" (Rev. xviii. 17) is simply the usual term ναῦται. In the latter passage ὅμιλος occurs for the crew, but the text is doubtful. In Ez. xxvii. 8, 9, 26, 27, 29, 34, we have κωπηλάται for "those who handle the oar," and in the same chapter (ver. 29) ἐμβάται, which may mean either passengers or mariners. The only other passages which need be noticed here are 1 K. ix. 27, and 2 Chr. viii. 18, in the account of Solomon's ships. The former has τῶν παίδων αὐτοῦ ἄνδρες ναυτικοὶ ἐλαύνειν εἰδότες θάλασσαν; the latter, παῖδες εἰδότες θάλασσαν.[a]

(12.) *Storms and Shipwrecks.* — The first century of the Christian era was a time of immense traffic in the Mediterranean; and there must have been many vessels lost there every year by shipwreck, and (perhaps) as many by foundering. This last danger would be much increased by the form of rig described above. Besides this, we must remember that the ancients had no compass, and very imperfect charts and instruments, if any at all; and though it would be a great mistake to suppose that they never ventured out of sight of land, yet, dependent as they were on the heavenly bodies, the danger was much greater than now in bad weather, when the sky was overcast, and "neither sun nor stars in many days appeared" (Acts xxvii. 20). Hence also the winter season was considered dangerous, and, if possible, avoided (ὄντος ἤδη ἐπισφαλοῦς τοῦ πλοός, διὰ τὸ καὶ τὴν νηστείαν ἤδη παρεληλυθέναι, *ibid.* 9). Certain coasts too were much dreaded, especially the African Syrtis (*ibid.* 17). The danger indicated by breakers (*ibid.* 29), and the fear of falling on rocks (τραχεῖς τόποι), are matters of course. St. Paul's experience seems to have been full of illustrations of all these perils. We learn from 2 Cor. xi. 25 that, *before* the voyage described in detail by St. Luke, he had been "three times wrecked," and further, that he had once been "a night and a day in the deep" probably floating on a spar, as was the case with Josephus. These circumstances give peculiar force to his using the metaphor of a shipwreck (ἐναυάγησαν, 1 Tim. i. 19) in speaking of those who had apostatized from the faith. In connection with this general subject we may notice the caution with which, on the voyage from Troas to Patara (Acts xx. 13–16, xxi. 1), the sailors anchored for the night during the period of dark moon, in the intricate passages between the islands and the main [MITYLENE; SAMOS; TROGYLLIUM], the evident acquaintance which, on the voyage to Rome, the sailors of the Adramyttian ship had with the currents on the coasts of Syria and Asia Minor (Acts xxvii. 2–5) [ADRAMYTTIUM], and the provision for taking soundings in case of danger, as clearly indicated in the narrative of the shipwreck at Malta, the measurements being apparently the same as those which are customary with us (βολίσαντες εὗρον ὀργυιὰς εἴκοσι· βραχὺ δὲ διαστήσαντες, καὶ πάλιν βολίσαντες, εὗρον ὀργυιὰς δεκαπέντε, Acts xxvii. 28).

(13.) *Boats on the Sea of Galilee.* — There is a melancholy interest in that passage of Dr. Robinson's *Researches* (iii. 253), in which he says, that on his approach to the Sea of Tiberias, he saw a single white sail. This was the sail of the one rickety boat which, as we learn from other travellers (see especially Thomson, *Land and Book*, pp. 401–404), alone remains on a scene represented to us in the Gospels and in Josephus as full of life from the

---

[a] The "mariners" (A. V.) in Jon. i. 5 (מַלָּחִים ναυτικοί) are simply those who follow the sea, whether officers or crew. H

multitude of its fishing-boats.[a] In the narratives of the call of the disciples to be "fishers of men" (Matt. iv. 18–22; Mark i. 16–20; Luke v. 1–11), there is no special information concerning the characteristics of these boats. In the account of the storm and the miracle on the lake (Matt. viii. 23–27; Mark iv. 35–41; Luke viii. 22–25), it is for every reason instructive to compare the three narratives; and we should observe that Luke is more technical in his language than Matthew, and Mark than Luke. Thus instead of σεισμὸς μέγας ἐγένετο ἐν τῇ θαλάσσῃ (Matt. viii. 24), we have κατέβη λαῖλαψ ἀνέμου εἰς τὴν λίμνην (Luke viii. 23), and again τῷ κλύδωνι τοῦ ὕδατος (ver. 24); and instead of ὥστε τὸ πλοῖον καλύπτεσθαι we have συνεπληροῦντο. In Mark (iv. 37) we have τὰ κύματα ἐπέβαλλεν εἰς τὸ πλοῖον, ὥστε αὐτὸ ἤδη γεμίζεσθαι. This Evangelist also mentions the προσκεφάλαιον, or boatman's cushion,[b] on which our Blessed Saviour was sleeping ἐν τῇ πρύμνῃ, and he uses the technical term ἐκόπασεν for the lulling of the storm. [PILLOW, Amer. ed.] See more on this subject in Smith, *Dissertation on the Gospels* (Lond. 1853). We may turn now to St. John. In the account he gives of what followed the miracle of walking on the sea (vi. 16–25), πλοῖον and πλοιάριον seem to be used indifferently, and we have mention of other πλοιάρια. There would of course be boats of various sizes on the lake. The reading, however, is doubtful.[c] Finally, in the solemn scene after the resurrection (John xxi. 1–8), we have the terms αἰγιαλός and τὰ δεξιὰ μέρη τοῦ πλοίου, which should be noticed as technical. Here again πλοῖον and πλοιάριον appear to be synonymous. If we compare all these passages with Josephus, we easily come to the conclusion that, with the large population round the Lake of Tiberias, there must have been a vast number both of fishing-boats and pleasure-boats, and that boat-building must have been an active trade on its shores (see Stanley, *Sin. and Pal.* p. 367). The term used by Josephus is sometimes πλοῖον, sometimes σκάφος. There are two passages in the Jewish historian to which we should carefully refer, one in which he describes his own taking of Tiberias by an expedition of boats from Tarichæa (*Vit.* 32, 33, *B. J.* ii. 21, §§ 8–10). Here he says that he collected all the boats on the lake, amounting to 230 in number, with four men in each. He states also incidentally that each boat had a "pilot" and an "anchor." The other passage describes the operations of Vespasian at a later period in the same neighborhood (*B. J.* iii. 10, §§ 1, 5, 6, 9). These operations amounted to a regular Roman sea-fight: and large rafts (σχεδίαι) are mentioned besides the boats or σκάφη.

(14.) *Merchant-Ships in the Old Testament.* — The earliest passages where seafaring is alluded to in the O. T. are the following in order, Gen. xlix. 13, in the prophecy of Jacob concerning Zebulun (κατοικήσει παρ' ὅρμον πλοίων); Num. xxiv. 24, in Balaam's prophecy (where, however, ships are not mentioned in the LXX.[d]); Deut. xxviii. 68, in one of the warnings of Moses (ἀποστρέψει σε Κύριος εἰς Αἴγυπτον ἐν πλοίοις); Judg. v. 17, in Deborah's Song (Δὰν εἰς τί παροικεῖ πλοίοις;) Next after these it is natural to mention the illustrations and descriptions connected with this subject in Job (ix. 26, ἢ καὶ ἐστι ναυσὶν ἴχνος ὁδοῦ) and in the Psalms (xlvii. [xlviii.] 7, ἐν πνεύματι βιαίῳ[e] συντρίψεις πλοῖα Θαρσίς, ciii. [civ.] 26 ἐκεῖ πλοῖα διαπορεύονται, cvi. [cvii.] 23, οἱ καταβαίνοντες εἰς θάλασσαν ἐν πλοίοις). Prov. xxiii. 34 has already been quoted. To this add xxx. 19 (τρίβους νηὸς πλωτοπορούσης), xxxi. 14 (ναῦς ἐμπορευομένη μακρόθεν). Solomon's own ships, which may have suggested some of these illustrations (1 K. ix. 26; 2 Chr. viii. 18, ix. 21), have previously been mentioned. We must notice the disastrous expedition of Jehoshaphat's ships from the same port of Ezion-geber (1 K. xxii. 48, 49; 2 Chr. xx. 36, 37). The passages which remain are in the prophets. Some have been already adduced from Isaiah and Ezekiel. In the former prophet the general term "ships of Tarshish" is variously given in the LXX., πλοῖον θαλάσσης[f] (ii. 16), πλοῖα Καρχηδόνος (xxiii. 1, 14), πλοῖα Θαρσίς (lx. 9). For another allusion to seafaring, see xliii. 14. The celebrated 27th chapter of Ezekiel ought to be carefully studied in all its detail; and in Jonah i. 3–16, the following technical phrases (besides what has been already adduced) should be noticed: ναῦλον (3), συντριβῆναι (4), ἐκβολὴν ἐποιήσαντο τῶν σκευῶν, τοῦ κουφισθῆναι (5), κοπάσει ἡ θάλασσα (11, 12). In Dan. xi. 40 (συναχθήσεται βασιλεὺς τοῦ Βορρᾶ ἐν ἅρμασι καὶ ἐν ἱππεῦσι καὶ ἐν ναυσὶ πολλαῖς) we touch the subject of ships of war.

(15.) *Ships of War in the Apocrypha.* — Military operations both by land and water (ἐν τῇ θαλάσσῃ καὶ ἐπὶ τῆς ξηρᾶς, 1 Macc. viii. 23, 32) are prominent subjects in the books of Maccabees. Thus in the contract between Judas Maccabæus and the Romans it is agreed (*ibid.* 26, 28) that no supplies are to be afforded to the enemies of either, whether σῖτος, ὅπλα, ἀργύριον, or πλοῖα. In a later passage (xv. 3) we have more explicitly, in the letter of King Antiochus, πλοῖα πολεμικά (see v. 14), while in 2 Macc. iv. 20 (as observed above) the word τριήρεις, "galleys," occurs in the account of the proceedings of the infamous Jason. Here we must not forget the monument erected by Simon Maccabæus on his father's grave, on which, with other ornaments and military symbols, were πλοῖα ἐπιγεγλυμμένα, εἰς τὸ θεωρεῖσθαι ὑπὸ πάντων τῶν πλεόντων τὴν θάλασσαν (1 Macc. xiii. 29). Finally must be mentioned the *noyale* at Joppa, when the resident Jews, with wives and children, 200 in number, were induced to go into boats and were drowned (2 Macc. xii. 3, 4), with the venge-

---

[a] Some recent travellers speak of two and three, or more, boats on this lake. The number, at present, varies at different times, or else they are not all seen or heard of by the same traveller. H.

[b] The word in Pollux is ὑπηρέσιον, but Hesychius gives προσκεφάλαιον as the equivalent. See Kühn's note on Jul. Poll. *Onom.* i. p. 59. (Ed. Amstel. 1706.)

[c] So in Mark iv. 36, "little ships," the true reading appears to be πλοῖα, not πλοιάρια.

[d] So in Dan. xi. 30, where the same phrase "ships of Chittim" occurs there is no strictly corresponding phrase in the LXX. The translators appear to have read וַיָּצָא and יְצִיאֵי for וְצִים and צִיִּים in these passages respectively.

[e] The LXX. here read קָטֹן, *kâtôn*, "small," for קָדִים, *kâdîm*, "east."

[f] This is perhaps a mistake of the copyist, who transcribed from dictation, and mistook Θαρσίς for Θαλάσσης.

Digitized by Google

ance taken by Julius (τὸν μὲν λιμένα νύκτωρ ἐνέτρησε καὶ τὰ σκάφη κατέφλεξε, ver. 6). It seems sufficient simply to enumerate the other passages in the Apocrypha where some allusion to sea-faring is made. They are the following: Wisd. v. 10, xiv. 1; Ecclus. xxxiii. 2, xliii. 24; 1 Esdr. iv. 23.

(16.) *Nautical Terms.* — The great repertory of such terms, as used by those who spoke the Greek language, is the *Onomasticon* of Julius Pollux; and it may be useful to conclude this article by mentioning a few out of many which are found there, and also in the N. T. or LXX. First, to quote some which have been mentioned above. We find the following both in Pollux and the Scriptures: σχοῖνα, σπεῦσι, κλυδών, χειμών, φόρτιον, ἐκβολή, σωτία, οὐδὲν ὑποστέλλεσθαι, οὐκ ἦν τὸν ἥλιον ἰδεῖν, σκάφη, σκάφος, ναῦλον, συντριβῆναι, ὀφθαλμὸς ἅπου καὶ τοὔνομα τῆς νεὼς ἐπιγράφουσι (compared with Acts xxvii. 15, xxviii. 11), ταχεῖς ἀγγελοί (compared with Acts xvii. 29, 40). The following are some which have not been mentioned in this article: ἀνάγεσθαι and κατάγεσθαι (*e. g.* Acts xxviii. 11, 12), σανίδες (Ez. xxvii. 5), τρόπις Wisd. v. 10), ἀναβαίνω (Jon. i. 3; Mark vi. 51), γαλήνη (Matt. viii. 26), ἀμφίβληστρον (Matt. iv. 18, Mark i. 16), ἀποφορτίσασθαι (Acts xxi. 4), ὑποπνέω (xxvii. 13), τυφών (ἄνεμος τυφωνικός, xxvii. 14), ἀγκύρας κατατείνειν (ἀγκύρας ἐκτείνειν, *ibid.* 30), ὑβριστὴς ἄνεμος (ὄβρεως, 10, ὄβριν, 21), προσοκέλλω (ἐποκέλλω, *ibid.* 41), ἐλυμβᾶν (*ibid.* 42), διαλυθείσης τῆς νεώς (ἡ τρύπα ἐλύετο, *ibid.* 41). This is an imperfect list of the whole number; but it may serve to show how rich the N. T. and LXX. are in the nautical phraseology of the Greek Levant. To this must be added a notice of the peculiar variety and accuracy of St. Luke's ordinary phrases for sailing under different circumstances, πλέω, ἀποπλέω, βραδυπλοέω, διαπλέω, ἐκπλέω, κατάπλέω, ὑποπλέω, παραπλέω, εὐθυδρομέω, ὑποτρέχω, παραλέγομαι, φέρομαι, διαφέρομαι, διαπερῶ.

(17.) *Authorities.* — The preceding list of St. Luke's nautical verbs is from Mr. Smith's work on the *Voyage and Shipwreck of St. Paul* (London, 1st ed. 1848, 2d ed. 1856). No other book need be mentioned here, since it has for some time been recognized, both in England and on the Continent, as the standard work on ancient ships, and it contains a complete list of previous books on the subject. Reference, however, may be made to the memoranda of Admiral Penrose, incorporated in the notes to the 27th chapter of Conybeare and Howson's *The Life and Epistles of St. Paul* (London, 2d ed. 1856). J. S. H.

* Many of the identical sea-phrases pointed out above are still in use among the modern Greeks. The Ονοματολογιον Ναυτικον (issued from the Admiralty office at Athens, 1858) prescribes the nautical terms to be used on board the national vessels. The object, of course, is not to invent or arbitrarily impose such terms, but taking them from actual life to guard them against extrusion by foreign words. We subjoin some examples with the English and French definitions as given in the Catalogue, together with references to the Scripture places where the same words occur in the same sense: ἐκτείνω ἄγκυραν, *clonger, to lay out anchor*, Acts xxvii. 30; αἴρω, *enlever, to hoist*, Acts xxvii. 40; ἀνίημι, *laisser aller, to let go*, Acts xxvii. 40; καλάω, *amener tout bas, to lower* and *to strike sail*, Acts xxvii. 17, 30; ἑκτείνω ἱστίον, *hisser une voile, to hoist sail*, ibid.; ἀ ναφαίνω γῆν, *découvrir la terre, to sight land*, Acts xxi. 3, and cf. ἀποκρύπτω γῆν, a classical phrase; ὑποπλέω, *pass to leeward*, cf. Acts xxvii. 4, 7, and xxviii. 7; προσορμίζομαι, *relacher, put into port*, Mark vi. 53; παραβάλλω, *accoster, to go alongside, to coast*, Acts xx. 15; ἐλαύνω, *nager, to pull in rowing*, Mark vi. 48; ζευκτηρίαι, *les suavegardes, rudder-pendants*, Acts xxvii. 40; βολίζω, *sonder, to sound*, Acts xxvii. 28; ἡ ἀποβολή, *la perte, loss by sea*, or, *throwing overboard*; ἐποκέλλω, *faire échouer, to strand a ship*, Acts xxvii. 41; διασώζω, *faire le sauvetage, to rescue*, i. e. from shipwreck, Acts xxviii. 1; ἐμβιβάζω, *débarquer, to ship, embark*, Acts xxviii. 1; κουφίζω, *alléger, to lighten*, Acts xxviii. 18; ἐπιδίδω, *laisser porter, to bear away*, Acts xxvii. 15; χαλάω, *amener un canot, to lower a boat*, Acts xxvii. 17, 30. To these we might add others. Thus it appears that the sea-phrases which Luke heard on board the "Castor and Pollux" may be heard now among the seamen who navigate the same waters.

The processes and instruments of steam-navigation render a new terminology necessary to some extent in that sphere; but for this exigency the Greek language, so wonderfully plastic, is able to provide within itself by the use of compounds. H.

**SHI'PHI** (שִׁפְעִי [*abundant*]: Σαφαΐ; [Vat. Σαφαλ;] Alex. Σεφειν: *Sephei*). A Simeonite, father of Ziza, a prince of the tribe in the time of Hezekiah (1 Chr. iv. 37).

**SHIPH'MITE, THE** (הַשִּׁפְמִי: [Vat.] ὁ του Σεφνει; [Rom.] Alex. ὁ τ. Σεφνί: *Saphonites*). Probably, though not certainly, the native of SHEPHAM. Zabdi, the officer in David's household who had charge of the wine-making (1 Chr. xxvii. 27), is the only person so distinguished G.

**SHIPH'RAH** (שִׁפְרָה [see below]: Σεφφώρα: *Sephora*, Ex. i. 15). The name of one of the two midwives of the Hebrews who disobeyed the command of Pharaoh, the first oppressor, to kill the male children, and were therefore blessed (vv. 15–21). It is not certain that they were Hebrews: if they were, the name Shiphrah would signify "brightness" or "beauty." It has also an Egyptian sound, the last syllable resembling that of Potiphar, Poti-phra, and Hophra, in all which we recognize the word PH-RA, P-RA, "the sun," or "Pharaoh," in composition, when alone written in Heb. פַּרְעֹה: in these cases, however, the ע is usual, as we should expect from the Egyptian spelling. [PUAH.] R. S. P.

**SHIPH'TAN** (שִׁפְטָן [*judicial*]: Σαβαθάν, [Vat. -θα; Comp. Ald. Σαφτάν:] *Sephthan*). Father of Kemuel, a prince of the tribe of Ephraim (Num. xxxiv. 24).

**SHI'SHA** (שִׁישָׁא [see *Seraiah*]: Σηβά: [Vat. Σαβα;] Alex. Σεισα: *Sisa*). Father of Elihoreph and Ahiah, the royal secretaries in the reign of Solomon (1 K. iv. 3). He is apparently the same as SHAVSHA, who held the same position under David.

**SHI'SHAK** (שִׁישַׁק[a]: Σουσακίμ; [Vat.

Alex. -κειμ:] *Sesac*), king of Egypt, the Sheshenk I. of the monuments, first sovereign of the Bubastite XXIId dynasty. His name is thus written in hieroglyphics.

*Chronology.* — The reign of Shishak offers the first determined synchronisms of Egyptian and Hebrew history. Its chronology must therefore be examined. We first give a table with the Egyptian and Hebrew data for the chronology of the dynasty, continued as far as the time of Zerah, who was probably a successor of Shishak, in order to avoid repetition in treating of the latter. [ZERAH.]

Respecting the Egyptian columns of this table, it is only necessary to observe that, as a date of the 23d year of Usarken II. occurs on the monuments, it is reasonable to suppose that the sum of the third, fourth, and fifth reigns should be 29 years instead of 25, ΚΘ being easily changed to ΚΕ (Lepsius, *Königsbuch*, p. 85). We follow Lepsius' arrangement, our Tekerut I., for instance, being the same as his.

The synchronism of Shishak and Solomon, and that of Shishak and Rehoboam, may be nearly fixed, as shown in article CHRONOLOGY, where a slight correction should be made in one of the data. We there mentioned, on the authority of Champollion, that an inscription bore the date of the 22d year of Shishak (vol. i. p. 448 *b*). Lepsius, however, states that it is of the 21st year, correcting Champollion, who had been followed by Bunsen and others (xxii *Aeg. Königsdyn.* p. 272 and note 1). It must, therefore, be supposed that the invasion of

Judah took place in the 20th, and not in the 21st year of Shishak. The first year of Shishak would thus about correspond to the 26th of Solomon, and the 20th to the 5th of Rehoboam.

The synchronism of Zerah and Asa is more difficult to determine. It seems, from the narrative in Chronicles, that the battle between Asa and Zerah took place early in the reign of the king of Judah. It is mentioned before an event of the 15th year of his reign, and afterwards we read that there was no [more] war unto the five and thirtieth year of the reign of Asa" (2 Chr. xv. 19). This is immediately followed by the account of Baasha's coming up against Judah "in the six and thirtieth year of the reign of Asa" (xvi. 1). The latter two dates may perhaps be reckoned from the division of the kingdom, unless we can read the 15th and 16th,[a] for Baasha began to reign in the 3d year of Asa, and died, after a reign of 24 years, and was succeeded by Elah, in the 26th year of Asa. It seems, therefore, most probable that the war with Zerah took place early in Asa's reign, before his 15th year, and thus also early in the reign of Usarken II. The probable identification of Zerah is considered under that name [ZERAH].

The chronological place of these synchronisms may be calculated on the Egyptian as well as the Biblical side. The Egyptian data enable us to calculate the accession of Shishak approximatively, reckoning downwards from the XIXth dynasty, and upwards from the XXVIth. The first 60 years of the Sothic Cycle, commencing B. C. 1322,[b] appear to have extended from the latter part of the reign of Rameses II. to a year after the 12th of Rameses III. The intervening reigns are Menptah 19, Sethee II. *x*, Seth-nekht *x*, which, added to Rameses II. *x* and Rameses III. 12, probably represent little less than 50 years. The second 60 years of the same Cycle extended from the reign of one of the sons of Rameses III., Rameses VI., separated from his father by two reigns, certainly short, one of at least 5 years, to the reign of Rameses XI., the reigns intervening between Rameses VI. and XI. giving two dates, which make a sum of 18 years. We can thus very nearly fix the

[a] The 25th and 26th are out of the question, unless the cessation of war referred to relate to that with Zerah, for it is said that Asa and Baasha warred against each other "all their days" (1 K. xv. 16, 32).

[b] We prefer the date B. C. 1322 to M. Biot's B. C. circ. 1300, for reasons we cannot here explain.

The commencement of the XXth dynasty would, on this evidence, fall about B. C. 1280. The duration of the dynasty, according to Manetho, was 178 (Eus.) or 135 (Afr.) years. The highest dates found give us a sum of 99 years, and the Sothic data, and the circumstance that there were five if not six kings after Rameses XI., show that the length cannot have been less than 120 years. Manetho's numbers would bring us to B. C. 1102 or 1145, for the end of this dynasty. The monuments do not throw any clear light upon the chronology of the succeeding dynasty, the XXIst: the only indications upon which we can found a conjecture are those of Manetho's lists, according to which it ruled for 130 years. This number, supposing that the dynasty overlapped neither the XXth nor the XXIId, would bring the commencement of the XXIId and accession of Shishak to B. C. 972 or 1015.

Reckoning upwards, the highest certain date is that of the accession of Psammitichus I., B. C. 664. He was preceded, probably with a short interval, by Tirhakah, whose accession was B. C. cir. 695.[a] The beginning of Tirhakah's dynasty, the XXVth, was probably 719. For the XXIVth and XXIIId dynasties we have only the authority of Manetho's lists, in which they are allowed a sum of 95 (Afr. 6 + 89) or 88 (Eus. 44 + 44) years. This carries us up to B. C. 814 or 807, supposing that the dynasties, as here stated, were wholly consecutive. To the XXIId dynasty the lists allow 120 (Afr.) or 49 (Eus.) years. The latter sum may be disregarded at once as merely that of the three reigns mentioned. The monuments show that the former needs correction, for the highest dates of the individual kings, and the length of the reign of one of them, Sheshenk III., determined by the Apis tablets, oblige us to raise its sum to at least 166 years. This may be thus shown: 1. Sesônchis 21. (1. Sheshenk I. 21.) 2. Osorthôn 15. (2. Usarken I.) 3, 4, 5. Three others, 25 (29?). (3. Tekerut I. 4. Usarken II. 23. 5. Sheshenk II.) 6. Takelôthis 13. (6. Tekerut II. 14.) 7, 8, 9. Three others, 42. (7. Sheshenk III. date 28 reign 51. 8. Peahee 2. 9. Sheshenk IV. 37). (21 + 15 + 29 + 13 + 51 + 1 + 36 = 166.) It seems impossible to trace the mistake that has occasioned the difference. The most reasonable conjectures seem to be either that the first letter of the sum of the reign of Sheshenk III. fell out in some copy of Manetho, and 51 thus was changed to 1, or that his reign fell out altogether, and that there was another king not mentioned on the monuments. The sum would thus be 166 + *x*, or 169, which, added to our last number, place the accession of Sheshenk I. B. C. 980 or 983, or else seven years later than each of these dates.

The results thus obtained from approximative data are sufficiently near the Biblical date to make it certain that Sheshenk I. is the Shishak of Solomon and Rehoboam, and to confirm the Bible chronology.

The Biblical date of Sheshenk's conquest of Judah has been computed in a previous article to be B. C. cir. 969 [CHRONOLOGY, i. 448 *b*], and this having taken place in his 20th year, his accession would have been B. C. cir. 988. The progress of Assyrian discovery has, however, induced some writers to propose to shorten the chronology by taking 35 years as the length of Manasseh's reign, in which case all earlier dates would have to be lowered 20 years. It would be premature to express a positive opinion on this matter, but it must be remarked that, save only the taking of Samaria by Sargon, although this is a most important exception, the Assyrian chronology appears rather to favor the reduction, and that the Egyptian chronology, as it is found, does not seem readily reconcilable with the received dates, but to require some small reduction. The proposed reduction would place the accession of Sheshenk I. B. C. cir. 968, and this date is certainly more in accordance with those derived from the Egyptian data than the higher date, but these data are too approximative for us to lay any stress upon minute results from them. Dr. Hincks has drawn attention to what appears to be the record, already noticed by Brugsch, in an inscription of Lepsius' Tekerut II., of an eclipse of the moon on the 24th Mesori (4th April) B. C. 945, in the 15th year of his father. The latter king must be Usarken I., if these data be correct, and the date of Sheshenk I.'s accession would be B. C. 980 or 981. But it does not seem certain that the king of the record must be Tekerut I. Nor, indeed, are we convinced that the eclipse was lunar. (See *Journ. Sac. Lit.* January, 1863; Lepsius, *Denkmäler*, iii. bl. 256, a.)

*History.* — In order to render the following observations clear, it will be necessary to say a few words on the history of Egypt before the accession of Sheshenk I. On the decline of the Theban line or Rameses family (the XXth dynasty), two royal houses appear to have arisen. At Thebes, the high-priests of Amen, after a virtual usurpation, at last took the regal title, and in Lower Egypt a Tanite dynasty (Manetho's XXIst) seems to have gained royal power. But it is possible that there was but one line between the XXth and XXIId dynasties, and that the high-priest kings belonged to the XXIst. The origin of the royal line of which Sheshenk I. was the head is extremely obscure. Mr. Birch's discovery that several of the names of the family are Shemitic has led to the supposition that it was of Assyrian or Babylonian origin. Shishak, שִׁישַׁק, may be compared with Sheshak, שֵׁשַׁךְ, a name of Babylon (rashly thought to be for Babel by Atbash), Usarken has been compared with Sargon, and Tekerut, with Tiglath in Tiglath-

[a] In a previous article (CHRONOLOGY, i. 447 *b*) we stated the first year of Tirhakah's reign over Egypt B. C. 689. This date is founded upon an interpretation of an Apis-tablet, which is not certain. It concludes with the words "done" or "made in year 21?" which we formerly read, as had been previously done, "completing 21 years," referring the number to the life of the bull, not to the year of the king in which the tablet was executed or completed. (See the text in Lepsius, *Königsbuch*, p. 95.)

Pleser. If there were any doubt as to these identifications, some of which, as the second and third cited, are certainly conjectural, the name Namuret, Nimrod, which occurs as that of princes of this line, would afford conclusive evidence, and it is needless here to compare other names, though those occurring in the genealogies of the dynasty given by Lepsius, well merit the attention of Semitic students (*xxii. Aeg. Königsdyn.* and *Königsbuch*). It is worthy of notice that the name Nimrod, and the designation of Zerah (perhaps a king of this line, otherwise a general in its service) as "the Cushite," seem to indicate that the family sprang from a Cushite origin. They may possibly have been connected with the MASHUWASHA, a Shemitic nation, apparently of Libyans, for Tekarut II. as Prince is called "great chief of the MASHUWASHA," and also "great chief of the MATU," or mercenaries; but they can scarcely have been of this people. Whether eastern or western Cushites, there does not seem to be any evidence in favor of their having been Nigritians, and as there is no trace of any connection between them and the XXVth dynasty of Ethiopians, they must rather be supposed to be of the eastern branch. Their names, when not Egyptian, are traceable to Shemitic roots, which is not the case, as far as we know, with the ancient kings of Ethiopia, whose civilization is the same as that of Egypt. We find these foreign Shemitic names in the family of the high-priest king Her-har, three of whose sons are called respectively, MASAHARATA, MASAKAHARATA, and MATEN-NEB, although the names of most of his other sons and those of his line appear to be Egyptian. This is not a parallel case to the preponderance of Shemitic names in the line of the XXIId dynasty, but it warns us against too positive a conclusion. M. de Rougé, instead of seeing in those names of the XXIId dynasty a Shemitic or Asiatic origin, is disposed to trace the line to that of the high-priest kings. Manetho calls the XXIId a dynasty of Bubastites, and an ancestor of the priest-king dynasty bears the name Meree-bast, "beloved of Bubastis." Both lines used Shemitic names, and both held the high-priesthood of Amen (comp. *Étude sur une Stèle Égyptienne*, 203, 204). This evidence does not seem to us conclusive, for policy may have induced the line of the XXIId dynasty to effect intermarriages with the family of the priest-kings, and to assume their functions. The occurrence of Shemitic names at an earlier time may indicate nothing more than Shemitic alliances, but those alliances might not improbably end in usurpation. Lepsius gives a genealogy of Sheshenk I. from the tablet of Har-psen from the Serapeum, which, if correct, decides the question (*xxii. Königsdyn.* pp. 267–269). In this, Sheshenk I. is the son of a chief Namuret, whose ancestors, excepting his mother, who is called "royal mother," not as Lepsius gives it, "royal daughter" (*Étude*, etc., p. 203, note 2), are all untitled persons, and, all but the princess, bear foreign, apparently Shemitic, names. But, as M. de Rougé observes, this genealogy cannot be conclusively made out from the tablet, though we think it more probable than he does (*Étude*, p. 203, and note 2).

Sheshenk I. on his accession, must have found the state weakened by internal strife, and deprived of much of its foreign influence. In the time of the later kings of the Rameses family, two, if not three, sovereigns had a real or titular authority; but before the accession of Sheshenk it is probable that their lines had been united: certainly towards the close of the XXIst dynasty a Pharaoh was powerful enough to lead an expedition into Palestine and capture Gezer (1 K. ix. 16). Sheshenk took as the title of his standard, "He who attains royalty by uniting the two regions [of Egypt]." (De Rougé, *Étude*, etc., p. 204; Lepsius, *Königsbuch*, xliv. 567 A, a.) He himself probably married the heiress of the Rameses family, while his son and successor Usarken appears to have taken to wife the daughter, and perhaps heiress, of the Tanite XXIst dynasty. Probably it was not until late in his reign that he was able to carry on the foreign wars of the earlier king who captured Gezer It is observable that we trace a change of dynasty in the policy that induced Sheshenk at the beginning of his reign to receive the fugitive Jeroboam (1 K. xi. 40). Although it was probably a constant practice for the kings of Egypt to show hospitality to fugitives of importance, Jeroboam would scarcely have been included in their class. Probably, it is expressly related that he fled to Shishak because he was well received as an enemy of Solomon.

We do not venture to lay any stress upon the LXX. additional portion of 1 K. xii., as the narrative there given seems irreconcilable with that of the previous chapter, which agrees with the Mas. text. In the latter chapter Hadad (LXX. Ader) the Edomite flees from the slaughter of his people by Joab and David to Egypt, and marries the elder sister of Tahpenes (LXX. Thekemina), Pharaoh's queen, returning to Idumæa after the death of David and Joab. In the additional portion of the former chapter, Jeroboam — already said to have fled to Shishak (LXX. Susacim) — is married after Solomon's death to Anô, elder sister of Thekemina the queen. Between Hadad's return and Solomon's death, probably more than thirty years elapsed, certainly twenty. Besides, how are we to account for the two elder sisters? Moreover, Shishak's queen, his only or principal wife, is called KARAÄMA, which is more remote from Tahpenes or Thekemina. [TAHPENES.]

The king of Egypt does not seem to have commenced hostilities during the powerful reign of Solomon. It was not until the division of the tribes, that, probably at the instigation of Jeroboam, he attacked Rehoboam. The following particulars of the war are related in the Bible: "In the fifth year of king Rehoboam, Shishak king of Egypt came up against Jerusalem, because they had transgressed against the Lord, with twelve hundred chariots, and threescore thousand horsemen: and the people [were] without number that came with him out of Egypt; the Lubim, the Sukkiim, and the Cushim. And he took the fenced cities which [pertained] to Judah, and came to Jerusalem" (2 Chr. xii. 2–4). Shishak did not pillage Jerusalem, but exacted all the treasures of his city from Rehoboam, and apparently made him tributary (5, 9–12, esp. 8). The narrative in Kings mentions only the invasion and the exaction (1 K. xiv 25, 26). The strong cities of Rehoboam are thus enumerated in an earlier passage: "And Rehoboam dwelt in Jerusalem, and built cities for defense in Judah. He built even Beth-lehem, and Etam, and Tekoa, and Beth-zur, and Shoco, and Adullam, and Gath, and Mareshah, and Ziph, and Adoraim, and Lachish, and Azekah, and Zorah, and Aijalon, and Hebron, which [are] in Judah and in Benjamin fenced cities" (2 Chr. xi. 5–10).

Shishak has left a record of this expedition, sculptured on the wall of the great Temple of El-Karnak. It is a list of the countries, cities, and tribes, conquered or ruled by him, or tributary to him. In this list Champollion recognized a name which he translated, as we shall see, incorrectly, "the kingdom of Judah," and was thus led to trace the names of certain cities of Palestine. The document has since been more carefully studied by Dr. Brugsch, and with less success by Dr. Blau. On account of its great importance as a geographical record, we give a full transcription of it.

There are two modes of transcribing Hebrew or cognate names written in hieroglyphics. They can either be rendered by the English letters to which the hieroglyphics correspond, or by the Hebrew letters for which they are known from other instances to be used. The former mode is perhaps more scientific; the latter is more useful for the present investigation. It is certain that the Egyptians employed one sign in preference for ת, and another for ת, but we cannot prove that these signs had any difference when used for native words, though in other cases it seems clear that there was such a difference. We give the list transcribed by both methods, the first as a check upon the second, for which we are indebted to M. de Rougé's comparative alphabet, by far the most satisfactory yet published, though in some parts it may be questioned (*Revue Archéologique*, N. S. xi. 351-354). These transcriptions occupy the first two columns of the table, the third contains Dr. Brugsch's identification, and the fourth, our own.[a]

The following identifications are so evident that it is not necessary to discuss them, and they may be made the basis of our whole investigation: Nos. 14, 22, 24, 26, 27, 38, 39. It might appear at first sight that there was some geographical order, but a closer examination of these few names shows that this is not the case, and all that we can infer is, that the cities of each kingdom or nation are in general grouped together. The forms of the names show that irregularity of the vowels that characterizes the Egyptian language, as may be seen in the different modes in which a repeated name is written (Nos. 68, 71, 77, 87, 94, 96, 101). The consonants are used very nearly in accordance with the system upon which we have transcribed in the second column, save in the case of the Egyptian R, which seems to be indifferently used for ר and ל.

There are several similar geographical lists, dating for the most part during the period of the Empire, but they differ from this in presenting few, if any, repetitions, and only one of them contains names certainly the same as some in the present. They are lists of countries, cities, and tribes, forming the Egyptian Empire, and so far records of conquest that any cities previously taken by the Pharaoh to whose reign they belong are mentioned. The list which contains some of the names in Sheshenk's is of Thothmes III., sixth sovereign of the XVIIIth dynasty, and comprises many names of cities of Palestine mainly in the outskirts of the Israelite territory. It is important, in reference to this list, to state that Thothmes III., in his 23d year, had fought a battle with confederate nations near Megiddo, whose territories the list enumerates. The narrative of the expedition fully establishes the identity of this and other towns in the list of Shishak. It is given in the document known as the Statistical Tablet of El-Karnak (Birch, "Annals of Thothmes III.," *Archæologia*, 1853; De Rougé, *Rev. Arch.* N. S. xi. 347 ff.; Brugsch, *Geogr. Inschr.* ii. p. 32 ff.). The only general result of the comparison of the two lists is, that in the later one the Egyptian article is in two cases prefixed to foreign names, No. 56, NEKBU, of the list of Thothmes III., being the same as Nos. 84, 90, 92, PeNAKBU of the list of Shishak; and No. 105, AÄMeKU, of the former, being the same as No. 65, PeÄAMAK, of the latter.

We may now commence a detailed examination of the list of Shishak. No. 13 may correspond to Rabbith in Issachar. No. 14 is certainly Taanach, a Levitical city in the same tribe, noticed in the inscription of Thothmes commemorating the campaign above mentioned, in some connection with the route to Megiddo: it is there written TA·ANAKA. No. 15 is probably Shunem, a town of Issachar: the form of the hieroglyphic name seems to indicate a dual (comp. Nos. 18, 19, 22), and it is remarkable that Shunem has been thought to be originally a dual, שׁוּנַם for שׁוּנָיִם (Ges. *Thes.* s. v.). No. 16 is supposed by Dr. Brugsch to be Beth-shan; but the final letter of the Egyptian name is wanting in the Hebrew. It was a city of Manasseh, but in the tribe of Issachar. No. 17 is evidently Rehob, a Levitical city in Asher; and No. 18 Haphraim, a town in Issachar. No. 19 seems to be Adoraim, one of Rehoboam's strong cities, in the tribe of Judah: Adullam is out of the question, as it commences with ע, and is not a dual. No. 21 we cannot explain. No. 22 is Mahanaim, a Levitical city in Gad. No. 23 is Gibeon, a Levitical city in Benjamin. No. 24 is Beth-horon, which, though counted to Ephraim was on the boundary of Benjamin. It was assigned to the Levites. The place consisted of two towns or villages, both of which we may suppose are here intended. No. 25 is evidently the Levitical city Kedemoth in Reuben, and No. 26, Aijalon, also Levitical, in Dan. No. 27 is the

Digitized by Google

famous Megiddo, which in the Statistical Tablet of Thothmes III. is written MAKeTA, and in the same king's list MAKeTEE, but in the introductory title MAKeTA. It was a city of the western division of Manasseh. No. 28 may perhaps be Edrei, in trans-Jordanite Manasseh, though the sign usually employed for ע is wanting. No. 29 is the famous name which Champollion read "the kingdom of Judah." To this Dr. Brugsch objects, (1) that the name is out of place as following some names of towns in the kingdom of Judah as well as in that of Israel, and preceding others of both kingdoms; (2) that the supposed equivalent of kingdom (MARK, מעלך) does not satisfactorily represent the Hebrew מַלְכוּת, but corresponds to מֶלֶךְ; and (3) that the supposed construction is inadmissible. He proposes to read יחוד המלך as the name of a town, which he does not find in ancient Palestine. The position does not seem to us of much consequence, as the list is evidently irregular in its order, and the form might not be Hebrew, and neither Arabic nor Syriac requires the final letter. The kingdom of Judah cannot be discovered in the name without disregard of grammar; but if we are to read "Judah the king," to which Judah does the name point? There was no Jewish king of that name before Judas-Aristobulus. It seems useless to look for a city, although there was a place called Jehud in the tribe of Dan. The only suggestion we can propose is, that the second word is "kingdom," and was placed after the first in the manner of an Egyptian determinative. No. 31 may be compared with Anem in Issachar (עָנֵם), occurring, however, only in 1 Chr. vi. 73 (Heb. 58), but it is not certain that the Egyptian H ever represents ע. No. 32 has been identified by Dr. Brugsch with Eglon, but evidence as to its position shows that he is in error. In the Statistical Tablet of El-Karnak it is placed in a mountain-district apparently southward of Megiddo, a half-day's march from the plain of that city. There can be little doubt that M. de Rougé is correct in supposing that the Hebrew original signified an ascent (comp. עֲלִיָּה; *Rev. Arch.* p. 350). This name also occurs in the list of Thothmes (*Id.* p. 360); there differing only in having another character for the second letter. No. 33 has been identified by Dr. Brugsch with Bileam or Ibleam, a Levitical city in the western division of Manasseh. For No. 34 we can make no suggestion, and No. 35 is too much effaced for any conjecture to be hazarded. No. 36 Dr. Brugsch identifies with Alemeth, a Levitical city in Benjamin, also called Almon, the first being probably either the later or a correct form. [ALEMETH; ALMON.] No. 37 we think may be the Circle of Jordan, in the A. V. Plain of Jordan. No. 38 is Shoco, one of Rehoboam's strong cities, and 39, Beth-Tappuah, in the mountainous part of Judah. No. 40 has been supposed by Dr. Brugsch to be an Abel, and of the towns of that name he chooses Abel-shittim, the Abila of Josephus, in the Bible generally called Shittim. No. 45, though greatly effaced, is sufficiently preserved for us to conclude that it does not correspond to any known name in ancient Palestine beginning with Beth: the second part of the name commences with זאב, as though it were "the house of the wolf or Zeeb," which would agree with the southeastern part of Palestine, or indicate, which is far less likely, a place named after the Midianitish prince Zeeb, or some chief of that name. No. 53 is uncertain in its third letter, which is indistinct, and we offer no conjecture. No. 54 commences with an erased sign, followed by one that is indistinct. No. 55 is doubtful as to reading: probably it is Pe-KETET. Pe can be the Egyptian article, as in the name of the Hagarites, the second sign in Egyptian signifies "little," and the remaining part corresponds to the Hebrew קַטָּת, Kattath, "small," the name of a town in Zebulun (Josh. xix. 15), apparently the same as Kitron (Judg. i. 30). The word KET is found in ancient Egyptian with the sense "little" (comp. Copt. ⲕⲟⲧⲥ, De Rougé, *Étude*, p. 66). It seems, however, rare, and may be Shemitic. No. 56 is held by Dr. Brugsch to be Edom, and there is no objection to this identification but that we have no other names positively Edomite in the list. No. 57 Dr. Brugsch compares with Zalmonah, a station of the Israelites in the desert. If it be admissible to read the first letter as a Hebrew מ, this name does not seem remote from Telem and Telaim, which are probably the names of one place in the tribe of Judah. Nos. 58, 59, and 64 are not sufficiently preserved for us to venture upon any conjecture. No. 65 has been well supposed by Dr. Brugsch to be the Hebrew עֵמֶק, "a valley," with the Egyptian article prefixed, but what valley is intended it seems hopeless to conjecture: it may be a town named after a valley, like the Beth-emek mentioned in the account of the border of Asher (Josh. xix. 27). No. 66 has been reasonably identified by Dr. Brugsch with Azem, which was in the southernmost part of Judah, and is supposed to have been afterwards allotted to Simeon, in whose list an Ezem occurs. No. 85 reads ATeM-*KET*-HeT? the second part being the sign for "little" (comp. No. 55). This suggests that the use of the sign for "great" as the first character of the present name is not without significance, and that there was a great and little Azem or Ezem, perhaps distinguished in the Hebrew text by different orthography. No. 67 we cannot explain. No. 68 is unquestionably "the Hagarites," the Egyptian article being prefixed. The same name recurs Nos. 71, 77, 87, 94, 96, and 101. In the Bible we find the Hagarites to the east of Palestine, and in the classical writers they are placed along the north of Arabia. The Hagaranu or Hagar are mentioned as conquered by Sennacherib (Rawlinson's *Hdt.* i. 476; Oppert, *Sargonides*, p. 42). No. 69, FeTYUSHAÄ, seems, from the termination, to be a gentile name, and in form resembles Letushim, a Keturahite tribe. But this resemblance seems to be more than superficial, for Letushim, "the hammered or sharpened," comes from לָטַשׁ, "he hammered, forged," and פָּטַשׁ (unused) signifies "he bent or hammered." From the occurrence of this name near that of the Hagarites, this identification seems deserving of attention. No. 70 may perhaps be Aroer, but the correspondence of Hebrew and Egyptian scarcely allows this supposition. No. 72 commences with a sign that is frequently an initial in the rest of the list. If here syllabic, it must read MEB; if alphabetic, and its

Digitized by Google

alphabetic use is possible at this period, M. In the terms used for Egyptian towns we find MER, written with the same sign, as the designation of the second town in a nome, therefore not a capital, but a town of importance. That this sign is here similarly employed seems certain from its being once followed by a geographical determinative (No. 122). We therefore read this name SARAMA, or, according to Lepsius, BARAMA. The final syllable seems to indicate a dual. We may compare the name Salma, which occurs in Ptolemy's list of the towns of Arabia Deserta, and his list of those of the interior.[a] No. 73, repeated at 75, has been compared by Dr. Brugsch with the Shephelah, or maritime plain of the Philistines. The word seems nearer to Shibboleth, "a stream," but it is unlikely that two places should have been so called, and the names among which it occurs favor the other explanation. No. 74 seems cognate to No. 87, though it is too different for us to venture upon supposing it to be another form of the same name. No. 76 has been compared by Dr. Brugsch with Berecah, "a pool," but it seems more probably the name of a tribe. No. 78 reads NAÄBAYT, and is unquestionably Nebaioth. There was a people or tribe of Nebaioth in Isaiah's time (Is. lx. 7), and this second occurrence of the name in the form of that of Ishmael's son is to be considered in reference to the supposed Chaldæan origin of the Nabathæans. In Lepsius's copy the name is N. TAYT, the second character being unknown, and no doubt, as well as the third, incorrectly copied. The occurrence of the name immediately after that of the Hagarites is sufficient evidence in favor of Dr. Brugsch's reading, which in most cases of difference in this list is to be preferred to Lepsius's.[b] No. 79, AÄTeTMAÄ, may perhaps be compared with Tema the son of Ishmael, if we may read AATTeMAA. No. 80 we cannot explain. Nos. 81 and 82 are too much effaced for any conjecture. No. 83 we compare with the Kenites: here it is a tribe. No. 84 is also found in the list of Thothmes: here it has the Egyptian article, PeNAKBU, there it is written NeKBU (*Rev. Arch.* pp. 364, 365). It evidently corresponds to the Hebrew נֶגֶב, "the south," sometimes specially applied to the southern district of Palestine. No. 85 reads ATeM-*KeT*-HeT? The second part of the name is "little" (comp. No. 55). We have already shown that it is probably a "little" town, corresponding to the "great" town No. 66. But the final part of No. 85 remains unexplained. No. 86 we cannot explain. No. 87 differs from the other occurrences of the name of the Hagarites in being followed by the sign for MER: we therefore suppose it to be a city of this nation. No. 88 may be compared with Shen (1 Sam. vii. 12), which, however, may not be the name of a town or village, or with the two Ashnahs (Josh. xv. 33, 43). Nos. 89, 91, and 93, we cannot explain. No. 95 presents a name, repeated with slight variation in No. 99, which is evidently that of a tribe, but we cannot recognize it. No. 97 equally baffles us. No. 98 is a town TeMAM, possibly the town of Dumah in the north of Arabia or that in Judah. No. 100 is a town TRA-AÄ, which we may compare with Eddara in Arabia Deserta. No. 102 may mean a resting-place, from the root לוּן. No. 103, repeated at 105, is apparently the name of a tribe. It may be Adbeel, the name of a son of Ishmael, but the form is not close enough for us to offer this as more than a conjecture. Nos. 104 and 106 we cannot explain. No. 107 is either HAKeRMA or HAReKMA. It may be compared with Rekem or Arekeme, the old name of Petra according to Josephus (*A. J.* iv. 7), but the form is probably dual. No. 108 has been compared with Arad by Dr. Brugsch: it is a country or place, and the variation in No. 110 appears to be the name of the people. No. 109 may be Beth-lebaoth in Simeon, evidently the same as Lebaoth originally in Judah, or else Rabbah in Judah. No. 111 we cannot explain. No. 112 is most like the Jerahmeelites in the south of Judah. No. 116 is partly effaced. No. 117 is the same name as No. 100. No. 118 is probably the name of an unknown tribe. No. 119 may be Maachah, if the geographical direction is changed. No. 120 is partly effaced. No. 121 we cannot explain. No. 122 appears to be a town of BARA or BALA. No. 123 seems to read BAR-RATA (בעל ראתא), but we know no place of that name. No. 124 reads BAT-AÄT, but there can be little doubt that it is really BAT-ANAT. In this case it might be either Beth-anath in Naphtali or Beth-anoth in Judah. No. 125 we cannot explain. No. 126 appears to commence with Aram, but the rest does not correspond to any distinctive word known to follow this name. No. 127 has been identified by Dr. Brugsch with Golan, a Levitical city in Bashan. The remaining names are more or less effaced.

It will be perceived that the list contains three classes of names mainly grouped together — (1) Levitical and Canaanite cities of Israel; (2) cities of Judah; and (3) Arab tribes to the south of Palestine. The occurrence together of Levitical cities was observed by Dr. Brugsch. It is evident that Jeroboam was not at once firmly established, and that the Levites especially held to Rehoboam. Therefore it may have been the policy of Jeroboam to employ Shishak to capture their cities. Other cities in his territory were perhaps still garrisoned by Rehoboam's forces, or held by the Canaanites, who may have somewhat recovered their independence at this period. The small number of cities identified in the actual territory of Rehoboam is explained by the erasure of fourteen names of the part of the list where they occur. The identification of some names of Arab tribes is of great interest and historical value, though it is to be feared that further progress can scarcely be made in their part of the list.

The Pharaohs of the Empire passed through northern Palestine to push their conquests to the Euphrates and Mesopotamia. Shishak, probably unable to attack the Assyrians, attempted the subjugation of Palestine and the tracts of Arabia which border Egypt, knowing that the Arabs would in-

[a] We were disposed to think that this might be Jerusalem, especially on account of the dual termination; but the impossibility of reading the first character ATUR or AUR (אור), as an ideographic sign for "fire," to say nothing of the doubt as to the second character, makes us reject this reading; and the position in the list is unsuitable. The Rev. D. Haigh has learnedly supported this view, at which he independently arrived, in a correspondence.

[b] Lepsius's copy presents many errors of careless ness.

Digitized by Google

terpose an effectual resistance to any invader of Egypt. He seems to have succeeded in consolidating his power in Arabia, and we accordingly find Zerah in alliance with the people of Gerar, if we may infer this from their sharing his overthrow.

R. S. P.

* Bunsen in his *Bibelwerk*, i. p. ccxxvi., gives an elaborate table of synchronisms between the early Biblical history and the history of Egypt, of Assyria, and of Babylon. He professes to have found several points of contact between Israelitish and Egyptian history before the reigns of Solomon and Shishak; such as the exodus, the era of Joseph, etc. Though his argument is marked by the arbitrary conjecture and the dogmatic assertion so frequent in his writings, it is deserving of careful study. The reign of Solomon he fixes at 39 years, from 1007 to 969 B. C., that of Sheshonk from 979 to 956 B. C.

The geographical identifications of the lists of Shishak's victories, will be considered more at length in comparison with the lists of Thothmes III. under THEBES. J. P. T.

**SHITRAI** [2 syl.] (שִׁטְרַי; *Keri*, שִׁתְרַי: Σατραί; [Vat. Ασαρταις:] *Setraï*). A Sharonite who was over David's herds that fed in Sharon (1 Chr. xxvii. 29).

**SHITTAH-TREE, SHITTIM** (שִׁטָּה, *shittâh*: ξύλον ἄσηπτον: *ligna setim, spina*) is without doubt correctly referred to some species of *acacia*, of which three or four kinds occur in the

Acacia Seyal.

Bible lands. The wood of this tree — perhaps the *A. seyal* is more definitely signified — was extensively employed in the construction of the Tabernacle, the boards and pillars of which were made of it; the ark of the covenant and the staves for carrying it, the table of shew bread with its staves, the altar of burnt-offerings and the altar of incense with their respective staves were also constructed out of this wood (see Ex. xxv., xxvi., xxxvi., xxxvii., xxxviii.). In Is. xli. 19 the acacia-tree is mentioned with the "cedar, the myrtle, and the oil-tree," as one which God would plant in the wilderness. The Egyptian name of the *acacia* is *sont*, *sant*, or *santh*: see Jablonski, *Opusc.* i. p. 261; Rossius, *Etymol. Ægypt.* p. 273; and Prosper Alpinus (*Plant. Ægypt.* p. 6), who thus speaks of this tree: "The acacia, which the Egyptians call *sant*, grows in localities in Egypt remote from the sea; and large quantities of this tree are produced on the mountains of Sinai, overhanging the Red Sea. That this tree is, without doubt, the true acacia of the ancients, or the Egyptian thorn, is clear from several indications, especially from the fact that no other spinous tree occurs in Egypt which so well answers to the required characters. These trees grow to the size of a mulberry-tree, and spread their branches aloft." "The wild acacia (*Mimosa Nilotica*), under the name of *sûnt*," says Prof. Stanley (*Syr. & Pal.* p. 20), "everywhere represents the 'seneh' or 'senna' of the Burning Bush." The Heb. term (שִׁטָּה) is, by Jablonski, Celsius, and many other authors, derived from the Egyptian word, the ת being dropped; and from an Arabic MS. cited by Celsius, it appears that the Arabic term also comes from the Egyptian, the true Arabic name for the acacia being *karadh* (*Hierob.* i. p. 508).

The *shittâh-tree* of Scripture is by some writers thought to refer more especially to the *Acacia Seyal*, though perhaps the *Acacia Nilotica* and *A. Arabica* may be included under the term. The *A. Seyal* is very common in some parts of the peninsula of Sinai (M. Bové, *Voyage du Caire au Mont Sinaï*, *Ann. des Scienc. Nat.* 1834, i., sec. ser. p. 166; Stanley, *Syr. & Pal.* pp. 20, 69, 298). These trees are more common in Arabia than in Palestine, though there is a valley on the west side of the Dead Sea, the *Wady Seyâl*, which derives its name from a few acacia-trees there. The *Acacia Seyal*, like the *A. Arabica*, yields the well-known substance called gum arabic which is obtained by incisions in the bark, but it is impossible to say whether the ancient Jews were acquainted with its use. From the tangled thickets into which the stem of this tree expands, Stanley well remarks that hence is to be traced the use of the plural form of the Hebrew noun, *shittim*, the sing. number occurring but once only in the Bible.[a] Besides the *Acacia Seyal*, there is another species, the *A. tortilis*, common on Mount Sinai. Although none of the above named trees are sufficiently large to yield plants 10 cubits long by 1½ cubit wide, which we are told was the size of the boards that formed the tabernacle (Ex. xxxvi. 21), yet there is an acacia that grows near Cairo, namely the *A. Serissa*, which would supply boards of the required size. There is, however, no evidence to show that this tree ever grew in the peninsula of Sinai. And though it would be unfair to draw any conclusion from such negative evidence, still it is probable that "the

[a] Livingstone (*Trav. in S. Africa*, abridged ed., p. 77) thinks the *Acacia giraffa* (camel-thorn) supplied the wood for the Tabernacle, etc. "It is," he adds, "an imperishable wood, while that which is usually supposed to be the Shittim (*Acacia Nilotica*) wants beauty and soon decays."

Digitized by Google

boards" (הַקְּרָשִׁים) were supplied by one of the other acacias. There is, however, no necessity to limit the meaning of the Hebrew קֶרֶשׁ (*keresh*) to "a *single* plank." In Ex. xxvii. 6, the same word in the singular number is applied in a collective sense to "the deck" of a ship (comp. our "a board"). The *keresh* of the Tabernacle, therefore, may denote "two or more boards joined together," which, from being thus united, may have been expressed by a singular noun. These acacias, which are for the most part tropical plants, must not be confounded with the tree (*Robinia pseudo-acacia*), popularly known by this name in England, which is a North American plant, and belongs to a different genus and sub-order. The true acacias, most of which possess hard and durable wood (comp. Pliny, *H. N.* xiii. 19; Josephus, *Ant.* iii. 6, § 1), belong to the order *Leguminosæ*, sub-order *Mimoseæ*. W. H.

SHITTIM (הַשִּׁטִּים, with the def. article: [Vat.] Σαττείν; [Rom. in Josh., Σαττίν; Alex. in Josh. ii. 1, Σαττει;] in the Prophets, *οἱ σχοῖνοι*: *Setim*, [*Setim*]). The place of Israel's encampment between the conquest of the Transjordanic highlands and the passage of the Jordan (Num. xxxiii. 49, xxv. 1; Josh. ii. 1, iii. 1; Mic. vi. 5). Its full name appears to be given in the first of these passages — Abel ha-Shittim — "the meadow, or moist place of the acacias." It was "in the Arboth-Moab, by Jordan-Jericho:" such is the ancient formula repeated over and over again (Num. xxii. 1, xxvi. 3, xxxi. 12, xxxiii. 48, 49). That is to say, it was in the Arabah or Jordan Valley opposite Jericho, at that part of the Arabah which belonged to and bore the name of Moab, where the streams which descend from the eastern mountains and force their winding way through the sandy soil of the plain, nourished a vast growth of the *seyal*, *sunt*, and *sidr* trees, such as is nourished by the streams of the *Wady Kelt* and the *Ain Sultán* on the opposite side of the river.

It was in the shade and the tropical heat of these acacia-groves that the people were seduced to the licentious rites of Baal-Peor by the Midianites; but it was from the same spot that Moses sent forth the army, under the fierce Phinehas, which worked so fearful a retribution for that license (xxxi. 1-12). It was from the camp at Shittim that Joshua sent out the spies across the river to Jericho (Josh. ii. 1).

The Nachal-Shittim, or *Wady-Sunt*, as it would now be called, of Joel (iii. 18), can hardly be the same spot as that described above, but there is nothing to give a clew to its position.[a] G.

[a] Tristram identifies the plain of Shittim with the *Ghôr es-Seisabân*, extending in unbroken verdure from *Keferein* on its northern margin (which he identifies as the site of Abel-Shittim, Num. xxxiii. 49), to the northeast end of the Dead Sea, and which he pronounces "by far the largest and richest oasis in the whole *Ghôr*." It was in the midst of its gardens and groves that Israel encamped, and the irrigated luxuriance around them explains some of the allusions in the prophetic "parable" of Balaam, as he looked down upon them from the heights of Peor (*Land of Israel*, 2d ed. p. 528). S. W.

SHI'ZA (שִׁיזָא [*splendor*, Fürst]: Σαιζά; Alex. [Σεχα; FA.] Εζα; [Comp. Σιζά:] *Siza*). A Reubenite, father of Adina, one of David's mighty men (1 Chr. xi. 42).

SHO'A (שׁוֹעַ [*rich, liberal*]: Σουέ; Alex. Σουδ: *tyranni*). A proper name which occurs only in Ez. xxiii. 23, in connection with Pekod and Koa. The three apparently designate districts of Assyria with which the southern kingdom of Judah had been intimately connected, and which were to be arrayed against it for punishment. The Peshito-Syriac has *Lûd*, that is Lydia; while the Arabic of the London Polyglott has *Sût*, and *Lûd* occupies the place of Koa. Rashi remarks on the three words, "the interpreters say that they signify officers, princes, and rulers." This rendering must have been traditional at the time of Aquila (*ἐπισκέπτης καὶ τύραννος καὶ κορυφαῖος*) and Jerome (*nobiles tyranni et principes*). Gesenius (*Thes.* p. 1208 *a*) maintains that the context requires the words to be taken as appellatives, and not as proper names; and Fürst, on the same ground, maintains the contrary (*Handwb.* s. v. קוֹעַ). Those who take Shoa as an appellative refer to the usage of the word in Job xxxiv. 19 (A. V. "rich") and Is. xxxii. 5 (A. V. "bountiful"), where it signifies rich, liberal, and stands in the latter passage in parallelism with נָדִיב, *nâdîb*, by which Kimchi explains it, and which is elsewhere rendered in the A. V. "prince" (Prov. xvii. 7) and "noble" (Prov. viii. 16). But a consideration of the latter part of the verse Ez. xxiii. 23, where the captains and rulers of the Assyrians are distinctly mentioned, and the fondness which Ezekiel elsewhere shows for playing upon the sound of proper names (as in xxvii. 10, xxx. 5), lead to the conclusion that in this case Pekod, Shoa, and Koa are proper names also; but nothing further can be said. The only name which has been found at all resembling Shoa is that of a town in Asayria mentioned by Pliny, "*Sue* in ruribus," near Gangamela, and west of the Orontes mountain chain. Bochart (*Phaleg*, iv. 9) derives Sue from the Chaldee שׁוּעָא, *shu'á*, a rock. W. A. W.

SHO'BAB (שׁוֹבָב [*rebellious, erring*]: Σωβάβ; Alex. Σωβαδαν in Sam.; [1 Chr. iii., Vat. Σωβαν; xiv., Vat. Ισοβοαμ, FA. Σοβααμ:] *Sobab*, [*Sobad*]). 1. Son of David by Bathsheba (2 Sam. v. 14; 1 Chr. iii. 5, xiv. 4).

2. (Σουβάβ; [Vat. Ιασουβ:] Alex. Σωβαβ.) Apparently the son of Caleb the son of Hezron by his wife Azubah (1 Chr. ii. 18). But the passage is corrupt.

SHO'BACH (שׁוֹבַךְ [*a free one*, Fürst]: Σωβάκ, Alex. Σαβαχ, 2 Sam. x. 16: *Sobach*) The general of Hadarezer, king of the Syrians of Zoba, who was in command of the army which was summoned from beyond the Euphrates against the Hebrews, after the defeat of the combined forces of

[a] Joel in the above passage may refer to an ideal, not an actual place. He is foretelling the triumphs of a purer and more effective religion in the latter times. The places where the acacias grow are generally arid and otherwise unproductive. From the truth yet to break forth from Judaism a new form was to arise which should transform and bless the nations that hitherto have presented only a scene of the wildest moral desolation. Compare BACA; JEHOSHAPHAT, VALLEY OF [Amer ed.].

Digitized by Google

Syria and the Ammonites before the gates of Rabbah. He was met by David in person, who crossed the Jordan and attacked him at Helam. The battle resulted in the total defeat of the Syrians. Shobach was wounded, and died on the field (2 Sam. x. 15–18). In 1 Chr. xix. 16, 18, he is called SHOPHACH, and by Josephus (*Ant.* vii. 6, § 3) Σάβεκος.

**SHO'BAI** [2 syl.] (שֹׁבָי [*taking captive*]: Σωβαΐ, Σαβί: [Vat. Αβαου, Σαβει:] Alex. Σαβαΐ [FA. Σαβει] in Neh.: *Sobai*). The children of Shobai were a family of the doorkeepers of the Temple, who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45). Called SAMI in 1 Esdr. v. 28.

**SHO'BAL** (שׁוֹבָל [*flowing*, or a *shoot*]: Σωβάλ: *Sobal*). 1. The second son of Seir the Horite (Gen. xxxvi. 20; 1 Chr. i. 38), and one of the "dukes" or phylarchs of the Horites (Gen. xxxvi. 29). E. S. P.

2. [Vat. in ver. 50, Σωβαρ.] Son of Caleb, the son of Hur, and founder or prince of Kirjath-jearim (1 Chr. ii. 50, 52).

3. (Σουβάλ.) In 1 Chr. iv. 1, 2, Shobal appears with Hur, among the sons of Judah, and as the father of Reaiah. He is possibly the same as the preceding, in which case Reaiah may be identical with Haroeh, the two names in Hebrew being not very unlike.

**SHO'BEK** (שׁוֹבֵק [perh. *forsaking*]: Σωβήκ: [Vat. Εισσωβηκ; FA. Ωβηκ:] *Sobec*). One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 24).

**SHO'BI** (שֹׁבִי [*one who captures*]: Ουεσβί; [Vat.] Alex. Ουεσβει: *Sobi*). Son of Nahash of Rabbah of the children of Ammon (2 Sam. xvii. 27). He was one of the first to meet David at Mahanaim on his flight from Absalom, and to offer him the hospitality of a powerful and wealthy chief, for he was the son of David's old friend Nahash, and the bond between them was strong enough to survive on the one hand the insults of Hanun, and on the other the conquest and destruction of Rabbah. Josephus calls him Siphar (*Ant.* vii. 9, § 3), "chief (δυνάστης) of the Ammonite country."

**SHO'CO** (שׂוֹכוֹ [*branches*]: [Vat.] την Σοκχώθ; and so Alex.; [Rom. Σοχόθ; Comp. Σοκχό:] *Socho*), 2 Chr. xi. 7. A variation of the name SOCOH, unnecessarily increased in the A. V. by the substitution of *Sh* for the *S* of the original.

**SHO'CHO** (שׂוֹכוֹ [as above]: την Σοχώ: *Socho*), 2 Chr. xxviii. 18. One of the four [six] varieties of the name SOCOH. In this case also the discrepancies in the A. V. are needlessly multiplied by *Sh* being substituted for *S* and *ch* for *c* of the original.

**SHO'CHOH** (שׂוֹכֹה [*branches*]: Σοκχόθ; Alex. Οκχω and Σοκχω; [Comp. Σοχό:] *Socho*), 1 Sam. xvii. 1. This, like SHOCHO, SOCHOH, [SOCHO,] and SHOCO, is an incorrect variation of the name SOCOH.

**SHO'HAM** (שֹׁהָם [*onyx*]: Ἰσοδμ; Alex. Ισραμ; [Comp. Σοδμ:] *Soam*). A Merarite Levite, son of Jaaziah (1 Chr. xxiv. 27).

**SHOE.** [SANDAL.]

**SHO'MER** (שׁוֹמֵר [*keeper*]: [Rom. Vat. Σαμήρ; Alex.] Σομηρ: *Somer*). 1. A man of the tribe of Asher (1 Chr. vii. 32), who is also called Shamer (ver. 34).

2. [Σαμήρ; Alex. Ασσωμηρ.] The father of Jehozabad, who slew king Joash (2 K. xii. 21): in the parallel passage in 2 Chr. xxiv. 26, the name is converted into the feminine form Shimrith, who is further described as a Moabitess. This variation may have originated in the dubious gender of the preceding name Shimeath, which is also made feminine by the Chronicler. W. L. B.

**SHO'PHACH** (שׁוֹפָךְ [*extension*, Fürst]: Σωφάθ: [Vat. Σωφαρ, Σαφαθ; FA.[1] in ver. 16, Εσωφαρ;] Alex. Σωφαχ, Σωβαχ: *Sophach*). SHOBACH, the general of Hadarezer (1 Chr. xix. 16, 18).

**SHO'PHAN** (שׁוֹפָן; Samar. שפים [perh. *naked*, *barren*]: την Σοφάρ: *Sophan*). One of the fortified towns on the east of Jordan which were taken possession of and rebuilt by the tribe of Gad (Num. xxxii. 35). It is probably an affix to the second Atroth, to distinguish it from the former one, not an independent place. No name resembling it has yet been met with in that locality. G.

**SHOSHAN'NIM.** "To the chief musician upon Shoshannim" is a musical direction to the leader of the Temple choir which occurs in Pss. xlv., lxix., and most probably indicates the melody "after" or "in the manner of" (עַל, *'al*, A. V "upon") which the psalms were to be sung. As "Shoshannim" literally signifies "lilies," it has been suggested that the word denotes lily-shaped instruments of music (Simonis, *Lex.* s. v.), perhaps cymbals, and this view appears to be adopted by De Wette (*Die Psalmen*, p. 84). Hengstenberg gives to it an enigmatical interpretation, as indicating "the subject or subjects treated, as *lilies* figuratively for *bride* in xlv.; the delightful consolations and deliverances experienced in lxix., etc." (Davidson, *Introd.* ii. 246); which Dr. Davidson very truly characterizes as "a most improbable fancy." The LXX. and Vulgate have in both psalms ὑπὲρ τῶν ἀλλοιωθησομένων and *pro iis qui immutabuntur* respectively, reading apparently עַל מְשַׁנִּים for עַל שֹׁשַׁנִּים. Ben Zeb (*Otsar Hashshor.* s. v.) regards it as an instrument of psalmody, and Junius and Tremellius, after Kimchi, render it "hexachorda," an instrument with six strings, referring it to the root *shésh*, "six," and this is approved by Eichhorn in his edition of Simonis. W. A. W.

**SHOSHAN'NIM-E'DUTH.** In the title of Ps. lxxx. is found the direction "to the chief musician upon Shoshannim-eduth" (שֹׁשַׁנִּים עֵדוּת), which appears, according to the most probable conjecture, to denote the melody or air "after" or "in the manner of" which the psalm was to be sung. As the words now stand they signify "lilies, a testimony," and the two are separated by a large distinctive accent. In themselves they have no meaning in the present text, and must therefore be regarded as probably a fragment of the beginning of an older psalm with which the choir were familiar. Ewald gives what he considers the original meaning — "'lilies,' that is, pure, innocent, is 'the Law;'" but the words will not bear this interpretation, nor is it possible in their present position to assign to them any intelligible

Digitized by Google

sense. For the conjectures of those who regard the words as the names of musical instruments, see the articles SHOSHANNIM, SHUSHAN-EDUTH.
W. A. W.

• **SHOULDER-PIECE.** [EPHOD; HIGH-PRIEST.]

• **SHOVEL.** [AGRICULTURE, vol. i. p. 44 *a*.]

• **SHROUD,** Ezek. xxxi. 3, has its older sense of "cover," "shelter." H.

**SHU'A** (שׁוּעַ [*rich, noble*]: Σαβά; [Comp. Σουέ:] *Sue*). A Canaanite of Adullam, father of Judah's wife (1 Chr. ii. 3), who was hence called Bath-Shua. In the LXX. of Gen. xxxviii. 2, Shua is wrongly made to be the name of the daughter. [BATH-SHUA.]

**SHU'AH** (שׁוּחַ [*pit*]: Σουέ, Σωέ; Alex. Σαυε: *Sue*). 1. Son of Abraham by Keturah (Gen. xxv. 2; 1 Chr. i. 32).

2. (שׁוּחָה: Ἀσχά: *Sua*.) Properly "Shuhah." The name Shuah occurs among the descendants of Judah as that of the brother of Chelub (1 Chr. iv. 11). For "Chelub the brother of Shuah," the LXX. read "Caleb the father of Achsah [Ascha]." In ten of Kennicott's and De Rossi's MSS., Shuah is made the son of Chelub.

3. (שׁוּעַ: Σαυέ: *Sue*.) The father of Judah's wife, the Canaanitess (Gen. xxxviii. 2, 12); also called SHUA in the A. V. The LXX. make Shuah the name of the woman in both instances.

**SHU'AL** (שׁוּעָל [*jackal*]: Σουβάλ: [Vat. Σουλα:] Alex. Σουαλ: *Sual*). Son of Zophah, an Asherite (1 Chr. vii. 36).

**SHU'AL, THE LAND OF** (אֶרֶץ שׁוּעָל [*land of the jackal*]: γῆ Σωγάλ; Alex. is lost: *terra Sual*). A district named only in 1 Sam. xiii. 17, to denote the direction taken by one of the three parties of marauders who issued from the Philistine camp at Michmash. Its connection with Ophrah (probably *Taiyibeh*) and the direction of the two other routes named in the passage make it pretty certain that the land of Shual lay north of Michmash. If therefore it be identical with the "land of Shalim" (1 Sam. ix. 4) — as is not impossible — we obtain the first and only clew yet obtained to Saul's journey in quest of the asses. The name *Shual* has not yet been identified in the neighborhood of *Taiyibeh* or elsewhere. It may have originated in the Hebrew signification of the word — "jackal"; in which case it would be appropriate enough to the wild, desolate region east of *Taiyibeh*; a region containing a valley or ravine at no great distance from *Taiyibeh* which bore and perhaps still bears the name of "Hyænas." [ZEBOIM, VALLEY OF.] Others (as Thenius in *Exeg. Handb.*) derive the name from a different root, and interpret it as "hollow land." G.

**SHU'BAEL** (שׁוּבָאֵל [*captive of God*]: Σωβαήλ; [Vat. Ιωβαηλ:] Alex. Σουβαηλ: *Subaël*). 1. SHEBUEL the son of Gershom (1 Chr. xxiv. 20).

2. (Σουβαήλ.) SHEBUEL the son of Heman the minstrel (1 Chr. xxv. 20).

**SHU'HAM** (שׁוּחָם [perh. *pit-digger*, Ges.]: Σωμέ; [Vat. Σαμει:] Alex. Σαμειδη: *Suham*). Son of Dan, and ancestor of the SHUHAMITES (Num. xxvi. 42). In Gen. xlvi. 23 he is called HUSHIM.

**SHU'HAMITES, THE** (הַשֻּׁחָמִי [patr., see above]: ὁ Σαμεί; [Vat. Σαμει:] Alex. Σαμειδηι, Σαμει: *Suhamitæ, Suamitæ*). The descendants of Shuham, or Hushim, the son of Dan (Num. xxvi. 42, 43). In the census taken in the plains of Moab they numbered 4,460.

**SHU'HITE** (שׁוּחִי: [Job ii. 11, ὁ Σαυχέων (Vat. Sin. -χαι-, Alex. Αυχαιων) τύραννος; elsewhere, Σαυχίτης, exc. Vat. -χει- viii. 1, Sin. -χει- xlii. 9, and Alex. Αυχιτης, xviii. 1:] *Shuhites*), Job viii. 1. This ethnic appellative "Shuhite" is frequent [occurs 5 times] in the book of Job, but only as the epithet of one person, Bildad. The local indications of the book of Job point to a region on the western side of Chaldæa, bordering on Arabia; and exactly in this locality, above Hit and on both sides of the Euphrates, are found, in the Assyrian inscriptions, the *Tsukhi*, a powerful people. It is probable that these were the Shuhites, and that, having been conquered by the Babylonian kings, they were counted by Ezekiel among the tribes of the Chaldæans. Having lost their independence, they ceased to be noticed; but it was no doubt from them that the country on the Euphrates immediately above Babylonia came to be designated as *Sohene*, a term applied to it in the Peutingerian Tables. The Shuhites appear to have been descendants of Abraham by Keturah. [SHUAH, 1.] G. R.

**SHU'LAMITE, THE** (הַשּׁוּלַמִּית, *i. e.* the Shulammite [see below]: [Vat.] η Σουμανεσιτις; [Rom. Σουναμιτις:] Alex. [FA.] η Σουλαμιτις: *Sulamitis* and *Sunamitis*). One of the personages in the poem of Solomon's Song, who, although named only in one passage (vi. 13), is, according to some interpreters, the most prominent of all the characters. The name — after the analogy of Shunammite — denotes a woman belonging to a place called Shulem. The only place bearing that name, of which we have any knowledge, is Shunem itself, which, as far back as the 4th century, was so called (Eusebius, quoted under SHUNEM). In fact, there is good ground for believing that the two were identical. Since, then, Shulammite and Shunammite are equivalent, there is nothing surely extravagant in supposing that the Shunammite who was the object of Solomon's passion was Abishag, — the most lovely girl of her day, and at the time of David's death one of the most prominent persons at the court of Jerusalem. This would be equally appropriate, whether Solomon was himself the author of the Song, or it were written by another person whose object was to personate him accurately. For the light which it throws on the circumstances of Solomon's accession, see SOLOMON. [WEDDING, Amer. ed.] G.

**SHU'MATHITES, THE** (הַשֻּׁמָתִי, *i. e.* the Shumathite [patr.]: [Vat.] Ησαμαθειμ [Rom. -θιμ, Alex. -θειν]: *Semathei*). One of the four families who sprang from Kirjath-jearim (1 Chr. ii. 53). They probably colonized a village named Shumah somewhere in that neighborhood. But no trace of such a name has been discovered. G.

**SHU'NAMMITE, THE** (הַשּׁוּנַמִּית*.

* In 1 K. ii. 21, 22, the shorter form of הַשֻּׁנַמִּית is used.

Digitized by Google

[Vat.] ἡ Σωμανειτις [Rom. -νι-]; Alex. [Σωμανιτης,] Σουμανιτις: *Sunamitis*), i. e. the native of Shunem, as is plain from 2 K. iv. 8. It is applied to two persons: Abishag, the nurse of King David (1 K. i. 3,[a] 15, ii. 17, 21, 22), and the nameless hostess of Elisha (2 K. iv. 12, 25, 36).

The modern representative of Shunem being *Solam*, some have suggested (as Gesenius, *Thes.* p. 1379 *b*), or positively affirmed (as Fürst, *Handwb.* ii. 422), that Shunammite is identical with Shulammite (Cant. vi. 13). Of this all that can be said is, that, though highly probable, it is not absolutely certain. G.

**SHU'NEM** (שׁוּנֵם[b] [*two resting-places*]: Σουναμ[c]: *Sunem, Sunam*). One of the cities allotted to the tribe of Issachar (Josh. xix. 18). It occurs in the list between Chesulloth and Haphraim. It is mentioned on two occasions. First, as the place of the Philistines' first encampment before the battle of Gilboa (1 Sam. xxviii. 4). Here it occurs in connection with Mount Gilboa and En-dor, and also probably with Jezreel (xxix. 1). [GILBOA, Amer. ed.] Secondly, as the scene of Elisha's intercourse with the Shunammite woman and her son (2 K. iv. 8). Here it is connected with adjacent cornfields, and, more remotely, with Mount Carmel. It was besides the native place of Abishag, the attendant on King David (1 K. i. 3), and possibly the heroine of the poem or drama of "Solomon's Song."

By Eusebius and Jerome (*Onom.*) it is mentioned twice: under Σουβήμ and "Sunem," as 5 miles south of Mount Tabor, and then known as Sulem: and under "Sonam," as a village in Acrabattine, in the territory of Sebaste called Sanim. The latter of these two identifications probably refers to *Sanûr*, a well-known fortress some 7 miles from *Sebastiyeh* and 4 from *Arrabeh* — a spot completely out of the circle of the associations which connect themselves with Shunem. The other has more in its favor, since — except for the distance from Mount Tabor, which is nearer 8 Roman miles than 5 — it agrees with the position of the present *Solam*, a village on the S. W. flank of *Jebel Duhy* (the so-called "Little Hermon"), 3 miles N. of Jezreel, 5 from Gilboa (*J. Fukua*), full in view of the sacred spot on Mount Carmel, and situated in the midst of the finest cornfields in the world.

It is named, as Salem, by the Jewish traveller, hap-Parchi (Asher's *Benjamin*, ii. 431). It had then its spring, without which the Philistines would certainly not have chosen it for their encampment. Now, according to the notice of Dr. Robinson (ii. 324), the spring of the village is but a poor one.

The change of the *n* in the ancient name to *l* in the modern one, is the reverse of that which has taken place in *Zerin* (Jezreel) and *Beitin* (Bethel). G.

**SHU'NI** (שׁוּנִי [*quiet*]: Σαυνις, Σουνι [Vat. -νει]; Alex. Σαυνις in Gen.: *Suni*). Son of Gad, and founder of the family of the Shunites (Gen. xlvi. 16; Num. xxvi. 15).

**SHU'NITES, THE** (הַשּׁוּנִי [patr. from the above]: ὁ Σουν; [Vat. -νει]: *Sunita*). Descendants of Shuni the son of Gad (Num. xxvi. 15).

**SHU'PHAM.** [SHUPPIM.]

**SHU'PHAMITES, THE** (הַשֻּׁפָמִי [patr.]: ὁ Σαφαμ[ι] [Vat. -νει]: *Suphamita*). The descendants of Shupham, or Shephupham, the Benjamite (Num. xxvi. 39).

**SHUPPIM** (שֻׁפִּם, שֻׁפִּים [perh. *serpents*, Ges.]: Σαφιν; [Vat. Σαφειν, Μαμφειν;] Alex. Σαφειμ, Σεφφειμ: *Sepham, Saphan*). 1. In the genealogy of Benjamin, "Shuppim and Huppim, the children of Ir," are reckoned in 1 Chr. vii. 12. Ir is the same as Iri the son of Bela the son of Benjamin, so that Shuppim was the great-grandson of Benjamin. In Num. xxvi. 39, he and his brother are called Shupham, and Hupham, while in 1 Chr. viii. 5 they appear as Shephuphan and Huram, sons of Bela, and in Gen. xlvi. 21 as Muppim and Huppim, sons of Benjamin. To avoid the difficulty of supposing that Benjamin had a great-grandson at the time he went down to Egypt, Lord A. Hervey conjectures that Shuppim or Shephuphan was a son of Benjamin, whose family was reckoned with that of Ir or Iri. [MUPPIM.]

* 2. (Rom. Vat. omit; Alex. Σεφιειμ: *Sephim.*) A Levite who, with Hosah, had charge of the gate Shallecheth (1 Chron. xxvi. 16). A.

**SHUR** (שׁוּר [*wall*][d]: Σουρ, Γελαμψούρ; [Alex. in Gen. xxv. 18 Σουηλ, 1 Chr. xxvii. 8, Γελαμσουρ:] *Sur*), a place just without the eastern border of Egypt. Its name, if Hebrew or Arabic, signifies "a wall," and there can be little doubt that it is of Shemitic origin from the position of the place. The LXX. seems to have thus interpreted it, if we may judge from the obscure rendering of 1 Sam. xxvii. 8, where it must be remarked the extraordinary form Γελαμψούρ is found. This word is evidently a transcription of the words שׁוּר . . . . מֵעוֹלָם, the former, save the initial particle, not being translated.

Shur is first mentioned in the narrative of Hagar's flight from Sarah. Abraham was then in southernmost Palestine, and when Hagar fled she was found by an angel "by the fountain in the way to Shur" (Gen. xvi. 7). Probably she was endeavoring to return to Egypt, the country of her birth — she may not have been a pure Egyptian — and had reached a well in the inland caravan route. Abraham afterwards "dwelled between Kadesh and Shur, and sojourned in Gerar" (xx. 1). From this it would seem either that Shur lay in the territory of the Philistines of Gerar, or that this pastoral tribe wandered in a region extending from Kadesh to Shur. [GERAR.] In neither case can we ascertain the position of Shur. The first clear indication of this occurs in the account of Ishmael's posterity. "And they dwelt from Havilah unto Shur, that [is] before Egypt, as thou goest toward Assyria" (xxv. 18). With this should be compared

---

[a] The A. V. is here incorrect in omitting the definite article.

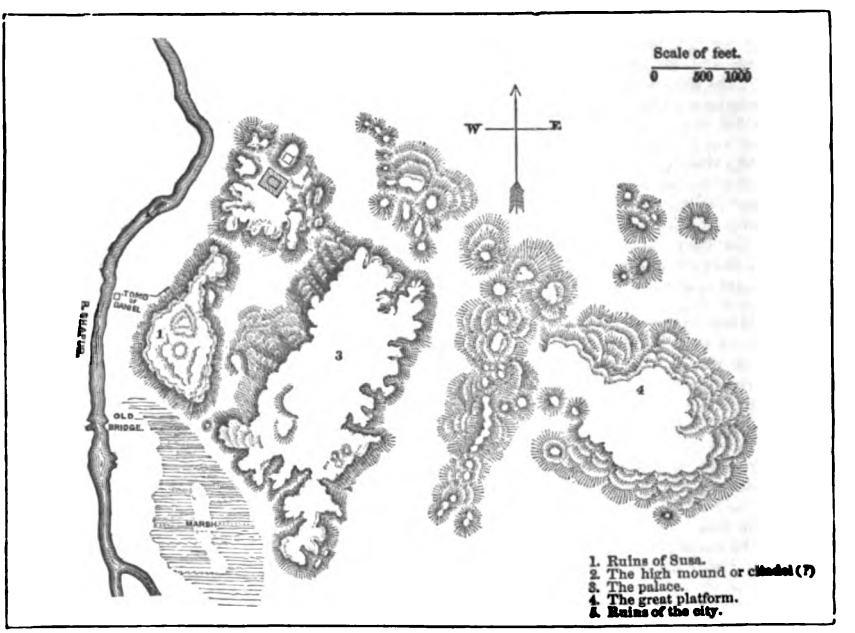
[b] Perhaps contracted from שׁוּנִים (Gesenius, *Thes.* p. 1379 *b*).

[c] It is given differently on each occurrence in each of the two great Codices: Vat. (Mai), Σουνάν, Σωμαν Σουμάν; Alex. Σουναμ, Γωναμαν, Σωμαμ; [Rom Σουνάμ, Σωνάμ, Σωμάν.]

[d] The ancient name, says Dietrich, still exists in th *Jebel es-Sur* which stretches from the southwest o the desert *et-Tih* towards Egypt (Ges. *Hebr. Handw* p. 857). R

the mention of the extent of the Amalekite territory, given in this passage, "And Saul smote the Amalekites from Havilah [until] thou comest to Shur, that [is] over against Egypt" (1 Sam. xv. 7). It is also important to notice that the Geshurites, Gezrites, and Amalekites, whom David smote, are described as "from an ancient period the inhabitants of the land, as thou comest to Shur, even unto the land of Egypt" (xxvii. 8). The Wilderness of Shur was entered by the Israelites after they had crossed the Red Sea (Ex. xv. 22, 23). It was also called the Wilderness of Etham (Num. xxxiii. 8). The first passage presents one difficulty, upon which the LXX. and Vulg. throw no light, in the mention of Assyria. If, however, we compare it with later places, we find בֹּאֲכָה אַשּׁוּרָה here, remarkably like שׁוּרָה בּוֹאֲךָ in 1 Sam. xxvii. 8, and בּוֹאֲךָ שִׁיחוֹר in xv. 7, as though the same phrase had been originally found in the first as a gloss, but it may have been there transposed, and have originally followed the mention of Havilah. In the notices of the Amalekite and Ishmaelite region, in which the latter succeeded the former, there can be no question that a strip of northern Arabia is intended, stretching from the Isthmus of Suez towards and probably to the Persian Gulf. The name of the wilderness may perhaps indicate a somewhat southern position. Shur may thus have been a fortified town east of the ancient head of the Red Sea, but in the hands of the Arabs, or at one time the Philistines, not of the Egyptians. From its being spoken of as a limit, it was probably the last Arabian town before entering Egypt. The hieroglyphic inscriptions have not been found to throw any light upon this question. The SHARA or SHALA mentioned in them is an important country, perhaps Syria. R. S. P.

**SHUSHAN** (שׁוּשַׁן: Σοῦσα, [Σουσάν:] *Susa*) is said to have received its name from the abundance of the lily (*Shûshan* or *Shûshanah*) in its neighborhood (Athen. xii. 513). It was one of the most important towns in the whole East, and requires to be described at some length.



1. *History.* — Susa was originally the capital of the country called in Scripture Elam, and by the classical writers, sometimes Cissia (Κισσία), sometimes Susis or Susiana. [ELAM.] Its foundation is thought to date from a time anterior to Chedorlaomer, as the remains found on the site have often a character of very high antiquity. The first distinct mention of the town that has been as yet found is in the inscriptions of *Asshur-bani-pal*, the son and successor of Esar-Haddon, who states that he took the place, and exhibits a ground-plan of it upon his sculptures (Layard, *Nin. and Bab.* pp. 452, 453). The date of this monument is about B. C. 660. We next find Susa in the possession of the Babylonians, to whom Elam had probably passed at the division of the Assyrian empire made by Cyaxares and Nabopolassar. In the last year of Belshazzar (B. C. 538), Daniel, while still a Babylonian subject, is there on the king's business, and "at Shushan in the palace" sees his famous vision of the ram and he-goat (Dan. viii. 2). The conquest of Babylon by Cyrus transferred Susa to the Persian dominion; and it was not long before the Achæmenian princes determined to make it the capital of their whole empire, and the chief place of their own residence. According to some writers (Xen. *Cyrop.* viii. 6, § 22; Strab. xv. 3, § 2), the change was made by Cyrus; according to others (Ctes. *Exc. Pers.* § 9; Herod. iii. 30, 65, 70), it had at any rate taken place before the death of Cambyses; but, according to the evidence of the place itself and of the other Achæmenian monuments, it would seem most probable that the transfer was really the work of Darius Hystaspis, who is found to have been (as Pliny said, *H. N.* vi. 27) the founder of the great palace there — the building so graphically described in the book of Esther (i. 5, 6). The reasons which induced the change are tolerably apparent. After the conquest of Babylonia and Egypt, the western provinces of the empire were become by far the most important, and the court could no longer be conveniently fixed east of Zagros, either at Ecbatana (*Hamadan*) or at Pasargadæ (*Murgaub*), which were cut off from the Mesopotamian plain by the difficulty of the passes for fully one half of the year.[a] It was necessary to find a capital west of the mountains, and here Babylon and Susa presented themselves, each with its peculiar advantages. Darius probably preferred Susa, first, on account of its vicinity to Persia (Strab. xv. 3, § 2); secondly, because it was cooler than Babylon, being nearer the mountain-chain; and thirdly, because of the excellence of the water there (*Geograph. Journ.* ix. 70). Susa accordingly became the metropolis of Persia, and is recognized as such by Æschylus (*Pers.* 16, 124, &c.), Herodotus (v. 25, 49, &c.) Ctesias (*Pers. Exc.* passim), Strabo (xv. 3, § 2), and almost all the best writers. The court must have resided there during the greater part of the year, only quitting it regularly for Ecbatana or Persepolis in the height of summer, and perhaps sometimes leaving it for Babylon in the depth of winter (see Rawlinson's *Herodotus*, iii. 256). Susa retained its preëminence to the period of the Macedonian conquest, when Alexander found there above twelve millions sterling, and all the regalia of the Great King (Arrian, *Exp. Alex.* iii. 16). After this it declined. The preference of Alexander for Babylon caused the neglect of Susa by his successors, none of whom ever made it their capital city. We hear of it once only in their wars, when it falls into the power of Antigonus (B. C. 315), who obtains treasure there to the amount of three millions and a half of our money (Diod. Sic. xix. 48, § 7). Nearly a century later (B. C. 221) Susa was attacked by Molo in his rebellion against Antiochus the Great; he took the town, but failed in his attempt upon the citadel (Polyb. v. 48, § 14). We hear of it again at the time of the Arabian conquest of Persia, when it was bravely defended by Hormuzan (Loftus, *Chaldæa and Susiana*, p. 344).

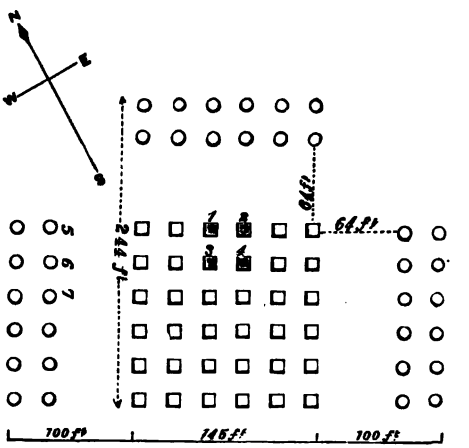
2. *Position, etc.* — A good deal of uncertainty has existed concerning the position of Susa. While most historians and comparative geographers have inclined to identify it with the modern *Sus* or *Shush*, which is in lat. 32° 10′, long. 48° 26′ E. from Greenwich, between the Shapur and the river of Dizful, there have not been wanting some to maintain the rival claims of *Shuster*, which is situated on the left bank of the Kuran, more than half a

[a] Not only were the passes difficult, but they were in the possession of semi-independent tribes, who levied a toll on all passengers, even the Persian kings themselves (Strab. xv. 3, § 4).

Digitized by Google

degree further to the eastward. A third candidate for the honor has even been started, and it has been maintained with much learning and ingenuity that *Susan*, on the right bank of the same stream, 50 or 60 miles above *Shuster*, is, if not the Susa of the Greeks and Romans, at any rate the Shushan of Scripture (*Geogr. Journ.* ix. 85). But a careful examination of these several spots has finally caused a general acquiescence in the belief that *Sus* alone is entitled to the honor of representing at once the Scriptural Shushan and the Susa of the classical writers (see Loftus, *Chaldæa and Susiana*, p. 338; Smith, *Dictionary of Geography*, sub voc.; Rawlinson, *Herodotus*, iii. 254). The difficulties caused by the seemingly confused accounts of the ancient writers, of whom some place Susa on the Choaspes (Herod. v. 49, 52; Strab. xv. 3, § 4; Q. Curt. v. 2), some on the Eulæus (Arr. *Exp. Al.* vii. 7; Ptol. vi. 3; Plin. *H. N.* vi. 27), have been removed by a careful survey of the ground, from which it appears that the Choaspes (*Kerkhah*) originally bifurcated at *Pai Pul*, 20 miles above Susa, the right arm keeping its present course, while the left flowed a little to the *east* of Sus, and, absorbing the Shapur about 12 miles below the ruins, flowed on somewhat east of south, and joined the *Karun* (Pasitigris) at *Ahwaz*. The left branch of the Choaspes was sometimes called by that name, but more properly bore the appellation of Eulæus (Ulai of Daniel). Susa thus lay between the two streams of the Eulæus and the Shapur, the latter of which, being probably joined to the Eulæus by canals, was reckoned a part of it; and hence Pliny said that the Eulæus *surrounded* the citadel of Susa (*l. s. c.*). At the distance of a few miles east and west of the city were two other streams — the Coprates or river of Dizful, and the right arm of the Choaspes (the modern *Kerkhah*). Thus the country about Susa was most abundantly watered; and hence the luxuriance and fertility remarked alike by ancient and modern authors (Athen. xii. 513; *Geograph. Journ.* ix. 71). The *Kerkhah* water was moreover regarded as of peculiar excellence; it was the only water drunk by the Great King, and was always carried with him on his journeys and foreign expeditions (Herod. i. 188; Plut. *de Exil.* ii. 601, D; Athen. *Deipn.* ii. 171, &c.). Even at the present day it is celebrated for

No. 1. Plan of the Ruins of Susa.



sightness and purity, and the natives prize it above that of almost all other streams (*Geogr. Journ.* ix. 70, 89).

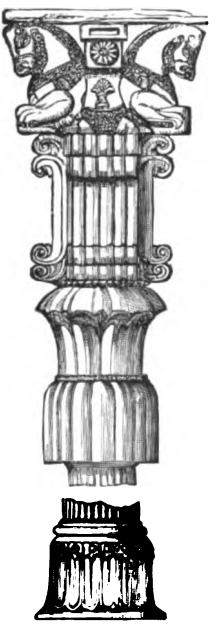
3. *General Description of the Ruins.* — The ruins of Susa cover a space about 6,000 feet long from east to west, by 4,500 feet broad from north to south. The circumference of the whole, exclusive of outlying and comparatively insignificant mounds, is about three miles. According to Mr. Loftus, "the principal existing remains consist of four spacious artificial platforms, distinctly separate from each other. Of these the western mound is the smallest in superficial extent, but considerably the most lofty and important. . . . . Its highest point is 119 feet above the level of the Shaour (Shapur). In form it is an irregular, obtuse-angled triangle, with its corners rounded off, and its base facing nearly due east. It is apparently constructed of earth, gravel, and sun-dried brick, sections being exposed in numerous ravines produced by the rains of winter. The sides are so perpendicular as to be inaccessible to a horseman except at three places. The measurement round the summit is about 2,850 feet. In the centre is a deep, circular depression, probably a large court, surrounded by elevated piles of buildings, the fall of which has given the present configuration to the surface. Here and there are exposed in the ravines

Digitized by Google

traces of brick walls, which show that the present elevation of the mound has been attained by much subsequent superposition" (*Chaldæa and Susiana*, p. 343). Mr. Loftus regards this mound as indubitably the remains of the famous citadel (ἄκρα or ἀκρόπολις) of Susa, so frequently mentioned by the ancient writers (Herod. iii. 68; Polyb. v. 48, § 14; Strab. xv. 3, § 2; Arr. *Exp. Al.* iii. 16, &c.). "Separated from the citadel on the west by a channel or ravine, the bottom of which is on a level with the external desert, is the great central platform, covering upwards of sixty acres (No. 3 on the Plan). The highest point is on the south side, where it presents generally a perpendicular escarpment to the plain, and rises to an elevation of about 70 feet; on the east and north it does not exceed 40 or 50 feet. The east face measures 3,000 feet in length. Enormous ravines penetrate to the very heart of the mound" (Loftus, p. 345). The third platform (No. 2 on the Plan) lies towards the north, and is "a considerable square mass," about a thousand feet each way. It abuts on the central platform at its northwestern extremity, but is separated from it by "a slight hollow," which "was perhaps an ancient roadway" (Loftus, *ibid.*). These three mounds form together a lozenge-shaped mass, 4,500 feet long and nearly 3,000 feet broad, pointing in its longer direction a little west of north. East of them is the fourth platform, which is very extensive but of much lower elevation than the rest (No. 4 on the Plan). Its plan is very irregular: in its dimensions it about equals all the rest of the ruins put together. Beyond this eastern platform a number of low mounds are traceable, extending nearly to the Dizful river; but there are no remains of walls in any direction, and no marks of any buildings west of the Shapur. All the ruins are contained within a circumference of about seven miles (*Geograph. Journ.* ix. 71)

G. R.

No. 2. Plan of the Great Palace at Susa.



ARCHITECTURE. — The explorations undertaken by General, now Sir Fenwick Williams of Kars, in the mounds at Susa, in the year 1851, resulted in the discovery of the bases of three columns, marked 5, 6, and 7 on the accompanying plan (wood-cut No. 2). These were found to be 27 feet 6 inches apart from centre to centre, and as they were very similar to the bases of the great hall known popularly as the Chel Minar at Persepolis, it was assumed that another row would be found at a like distance inwards. Holes were accordingly dug, and afterwards trenches driven, without any successful result, as it happened to be on the spot where the walls originally stood, and where no columns, consequently, could have existed. Had any trustworthy restoration of the Persepolitan hall been published at that time, the mistake would have been avoided, but as none then existed the opportunity was nearly lost for our becoming acquainted with one of the most interesting ruins connected with Bible history which now exist out of Syria. Fortunately in the following year Mr. Loftus resumed the excavations with more success, and ascertained the position of all the 72 columns of which the original building was composed. Only one base had been entirely removed, and as that was in the midst of the central phalanx, its absence threw no doubt on any part of the arrangement. On the bases of four of the columns thus uncovered (shaded darker on the plan, and numbered 1, 2, 3, 4) were found trilingual inscriptions in the languages adopted by the Achæmenian kings at Behistun and elsewhere, but all were so much injured by the fall of the superincumbent mass that not one was complete, and unfortunately the Persian text, which could have been read with most certainty, was the least perfect of any. Notwithstanding this, Mr. Edwin Norris, with his usual ingenuity, by a careful comparison of the whole, made out the meaning of the first part certainly, of the latter half with very tolerable precision. As this inscription contains nearly all we know of the history of this building, we quote it entire from *Journ. As. Soc.*, vol. xv. 162: "Says Artaxerxes (Mnemon), the Great King, the King of Kings, the King of the Country, the King of the Earth, the son of King Darius — Darius was the son of King Artaxerxes — Artaxerxes was the son of Xerxes — Xerxes was the son of King Darius — Darius was the son of Hystaspes the Achæmenian — Darius my ancestor anciently built this temple, and afterwards it was repaired by Artaxerxes my grandfather. By the aid of Ormazd I placed the effigies of Tanaites and Mithra in this temple. May Ormazd, Tanaites, and Mithra protect me, with the other Gods, and all that I have done . . . . "

The bases uncovered by Mr. Loftus were arranged as on the wood-cut No. 2, reduced from that given at page 366 of his *Chaldæa and Susiana*, and most fortunately it is found on examination that the building was an exact counterpart of the celebrated Chel Minar at Persepolis. They are in fact more like one another than almost any other two buildings of antiquity, and consequently what is wanting in the one may safely be supplied from the other, if it exists there.

Their age is nearly the same, that at Susa having been commenced by Darius Hystaspis, that at Persepolis — if one may trust the inscription on its staircase (*J. A. S.* x. 326) — was built entirely by Xerxes. Their dimensions are practically identical, the width of that at Susa, according to Mr. Loftus, being 345 feet, the depth N. and S. 244. The corresponding dimensions at Persepolis, according to Flandin and Coste's survey, are 357.6 by 254.6, or from 10 to 12 feet in excess; but the difference

may arise as much from imperfect surveying as from any real discrepancy.

The number of columns and their arrangement are identical in the two buildings, and the details of the architecture are practically the same so far as they can be made out. But as no pillar is standing at Susa, and no capital was found entire or nearly so, it is not easy to feel quite sure that the annexed restoration (wood-cut No. 3) is in all respects correct. It is reduced from one made by Mr. Churchill, who accompanied Mr. Loftus in his explorations. If it is so, it appears that the great difference between the two buildings was that double bull capitals were used in the interior of the central square hall at Susa, while their use was appropriately confined to the porticoes at Persepolis. In other respects the height of the capital, which measures 28 feet, is very nearly the same, but it is fuller, and looks somewhat too heavy for the shaft that supports it. This defect was to a great extent corrected at Persepolis, and may have arisen from those at Susa being the first translation of the Ninevite wooden original into stone architecture.

No. 3. Restored elevation of capital at Susa.

The pillars at Persepolis vary from 60 to 67 feet in height, and we may therefore assume that those at Susa were nearly the same. No trace of the walls which enclosed these pillars was detected at Susa, from which Mr. Loftus assumes, somewhat too hastily, that none existed. As, however, he could not make out the traces of the walls of any other of the numerous buildings which he admits once existed in these mounds, we ought not to be surprised at his not finding them in this instance.

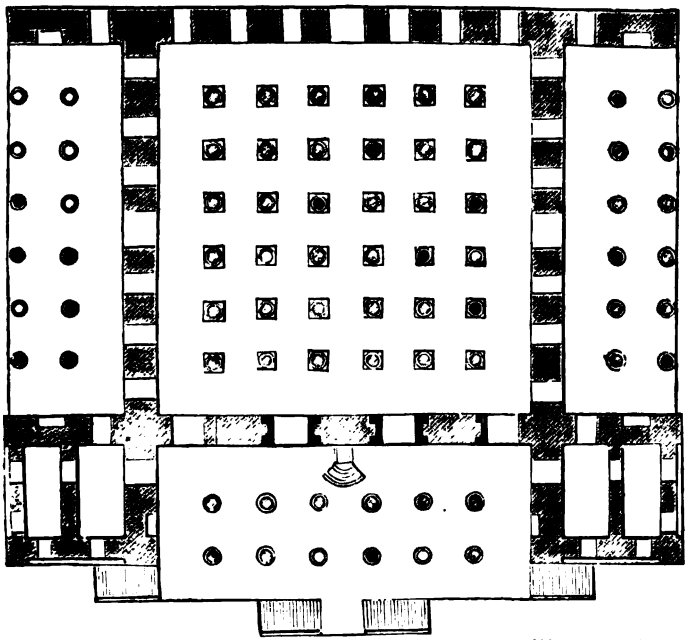
Fortunately at Persepolis sufficient remains still exist to enable us to supply this hiatus, though there also sun-burnt brick was too much used for the walls, and if it were not that the jambs of the doors and windows were generally of stone, we should be as much at a loss there as at Susa. The annexed wood-cut (No. 4), representing the plan of the hall at Persepolis, is restored from data so complete as scarcely to admit of doubt with regard to any part, and will suffice to explain the arrangement of both.[a]

Both buildings consisted of a central hall, as nearly as may be 200 feet square, and consequently, so far as we know, the largest interior of the ancient world, with the single exception of the great hall at Karnac, which covers 58,300 square feet, while this only extends to 40,000. Both the Persian halls are supported by 36 columns, upwards of 60 feet in height, and spaced equidistant from one another at about 27 feet 6 inches from centre to centre.

On the exterior of this, separated from it by walls 18 feet in thickness, were three great porches, each measuring 200 feet in width by 65 in depth, and supported by 12 columns whose axes were coincident with those of the interior. These were beyond doubt the great audience halls of the palace, and served the same purposes as the House of the Forest of Lebanon in Solomon's palace, though its dimensions were somewhat different, 150 feet by 75. These porches were also identical, as far as use and arrangement go, with the throne-rooms in the palaces of Delhi or Agra, or those which are used at this day in the palace at Ispahan.

The western porch would be appropriate to morning ceremonials, the eastern to those of the afternoon. There was no porch, as we might expect in that climate, to the south, but the principal one, both at Susa and Persepolis, was that which faced the north with a slight inclination towards the east. It was the throne-room, *par excellence*, of the palace, and an inspection of the Plan will show how easily, by the arrangement of the stairs, a whole army of courtiers or of tribute-bearers could file before the king without confusion or inconvenience. The bassi relievi in the stairs at Persepolis in fact represent permanently the procession that on great festivals took place upon their steps; and a similar arrangement of stairs was no doubt to be found at Susa when the palace was entire.

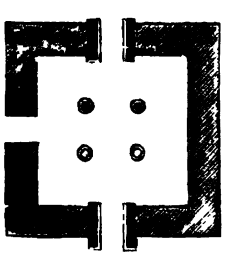
It is by no means so clear to what use the central hall was appropriated. The inscription quoted above would lead us to suppose that it was a temple, properly so called, but the sacred and the secular functions of the Persian kings were so intimately blended together that it is impossible for us to draw a line anywhere, or say how far "temple cella" or "palace hall" would be a correct designation for this part of the building. It probably was used for all great semi-religious ceremonies, such as the coronation or enthronization of the king — at such ceremonies as returning thanks or making offerings to the gods for victories — for any purpose in fact requiring more than usual state or solemnity; but there seems no reason to suppose it ever was used for purely festal or convivial purposes, for which it is singularly ill suited.



From what we know of the buildings at Persepolis, we may assert, almost with certainty, that the "King's Gate," where Mordecai sat (Esth. ii. 21), and where so many of the transactions of the book of Esther took place, was a square hall (wood-cut No. 5), measuring probably a little more than 100 feet each way, and with its roof supported by four pillars in the centre, and that this stood at a distance of about 150 or 200 feet from the front of the northern portico, where its remains will probably now be found when looked for. We may also be tolerably certain that the inner court, where Esther appeared to implore the king's favor (Esth. v. 1), was the space between the northern portico and this square building, the outer court being the space between the "King's Gate" and the northern terrace wall. We may also predicate with tolerable certainty that the "Royal House" (i. 9) and the "House of the Women" (ii. 9, 11) were situated behind this great hall to the southward, or between it and the citadel, and having a direct

[a] For details of this restoration, see *The Palaces of Nineveh and Persepolis Restored*. By Jas. Fergusson Published in 1851.

Digitized by Google



communication with it either by means of a bridge over the ravine, or a covered way under ground, most probably the former.

There seems also no reasonable doubt but that it was in front of one of the lateral porticoes of this building that King Ahasuerus (Xerxes) "made a feast unto all the people that were present in Shushan the palace, both unto great and small, seven days in the *court of the garden of the king's palace;* where were white, green, and blue hangings, fastened with cords of fine linen and purple to silver rings and pillars of marble: the beds were of gold

No. 4. Restored plan of Great Hall of Xerxes at Persepolis. Scale 100 feet to an inch.

and silver upon a pavement of red and blue and white and black marble" (Esth. i. 5, 6). From this it is evident that the feast took place, not in the interior of any hall, but out of doors, in tents erected in one of the courts of the palace, such as we may easily fancy existed in front of either the eastern or western porches of the great central building.

No 5. Restored plan of the 'King's Gate" at palace of Persepolis. Scale 100 feet to an inch.

The whole of this great group of buildings was raised on an artificial mound, nearly square in plan, measuring about 1,000 feet each way, and rising to a height apparently of 50 or 60 feet above the plain. As the principal building must, like those at Persepolis, have had a *talar* or raised platform [TEMPLE] above its roof, its height could not have been less than 100 or 120 feet, and its elevation above the plain must consequently have been 170 or 200 feet.

It would be difficult to conceive anything much grander in an architectural point of view than such a building, rising to such a height out of a group of subordinate palace-buildings, interspersed with trees and shrubs, and the whole based on such a terrace, rising from the flat but fertile plains that are watered by the Eulæus at its base. J. F

**SHU'SHAN-E'DUTH.** "To the chief musician upon Shushan-Eduth" (שֹׁשַׁן עֵדוּת) is plainly a musical direction, whatever else may be obscure about it (Ps. lx.). In Ps. lxxx. we have the fuller phrase "Shoshannim-eduth," of which Roediger regards Shushan-eduth as an abbreviation (Gesen. *Thes.* p. 1385). As it now stands it denotes "the lily of testimony," and possibly contains the first words of some Psalm to the melody of which that to which it was prefixed was sung; and the preposition עַל, *'al* (A. V. "upon") would then signify "after, in the manner of," indicating to the conductor of the Temple-choir the air which he was to follow. If, however, Roediger is correct in his conjecture that Shushan-eduth is merely an abbreviation for Shoshannim-eduth, the translation of the words above given would be incorrect. The LXX. and Vulgate appear to have read עַל־שְׁשַׁנִּים, for they render *τοῖς ἀλλοιουθησομένοις* and *pro his qui immutabuntur* respectively. In the LXX., עֵדוּת, *'édûth*, becomes עוֹד, *'ód*, *ἔτι*. There does not appear to be much support for the view taken by some (as by Joel Bril) that Shushan-eduth is a musical instrument, so called from its resemblance to a lily in shape

Digitized by Google

(Simonis), or from having lily-shaped ornaments upon it, or from its six (*shésh*) strings. Fürst, in consistency with his theory with respect to the titles of the Psalms, regards Shushan-eduth as the name of one of the twenty-four divisions of singers appointed by David, so called after a band-master, Shushan, and having its headquarters at Eduth, which he conjectures may be the same as Adithaim in Josh. xv. 36 (*Handwb.* s. v.). As a conjecture this is certainly ingenious, but it has the disadvantage of introducing as many difficulties as it removes. Simonis (*Lex.* s. v.) connects *'édúth* with the Arabic عُود, *'ód*, a lute,[a] or kind of guitar played with a plectrum, and considers it to be the melody produced by this instrument; so that in his view Shushan-eduth indicates that the lily-shaped cymbals were to be accompanied with playing on the lute. Gesenius proposes to render *'édúth* a "revelation," and hence a psalm or song revealed; but there seems no reason why we should depart from the usual meaning as above given, and we may therefore regard the words in question as a fragment of an old psalm or melody, the same in character as Aijeleth Shahar and others, which contained a direction to the leader of the choir.

**SHU'THALHITES, THE** (הַשֻּׁתַלְחִי) [patr., see below]: ὁ Σουθαλαί; [Vat. Σουταλαει; Alex. Θουσαλαΐ:] *Suthalhitæ*). The descendants of Shuthelah the son of Ephraim (Num. xxvi. 35).

**SHUTHE'LAH** (שֻׁתֶלַח [*noise of breaking*, Ges.]: [in Num.,] Σουθαλά, [Vat. Σουταλα,] Alex. [Θασουσαλα,] Θουσαλα; [in Chr., Σωθαλάθ (Alex. Σωθαλα), Σωθελέ:] *Suthala*). Head of an Ephraimite family, called after him Shuthalhites (Num xxvi. 35), and lineal ancestor of Joshua the son of Nun (1 Chr. vii. 20–27). Shuthelah appears from the former passage to be a son of Ephraim, and the father of Eran, from whom sprung a family of Eranites (ver. 36). He appears also to have had two brothers, Becher, father of the Bachrites, and Tahan, father of the Tahanites. But in 1 Chr. vii. we have a further notice of Shuthelah, where he appears first of all, as in Num., as the son of Ephraim; but in ver. 21 he is placed six generations later. Instead, too, of Becher and Tahan, as Shuthelah's brothers, we find Bered and Tahath, and the latter twice over; and instead of Eran, we find Eladah; and there is this strange anomaly, that Ephraim appears to be alive, and to mourn for the destruction of his descendants in the eighth generation, and to have other children born after their death. And then again at ver. 25, the genealogy is resumed with two personages, Rephah and Resheph, whose parentage is not distinctly stated, and is conducted through Telah, and another Tahan, and Laadan, to Joshua the son of Nun, who thus appears to be placed in the twelfth generation from Joseph, or, as some reckon, in the eighteenth. Obviously, therefore, the text in 1 Chr. vii. is corrupt. The following observations will perhaps assist us to restore it.

1. The names that are repeated over and over again, either in identical or in slightly varied forms, represent probably only ONE person. Hence, *Eladah*, ver. 20; *Elead*, ver. 21; and *Laadan*, ver. 26 are the names of one and the same person. And a comparison of the last name with Num. xxvi. 36, where we have "of Eran," will further show that Eran is also the same person, whether Eran[b] or Laadan be the true form of the name. So again, the two *Tahaths* in ver. 20, and *Tahan* in ver. 25, are the same person as *Tahan* in Num. xxvi. 35; and *Shuthelah* in vv. 20 and 21, and Telah in ver 25, are the same as the Shuthelah of Num. xxvi 35, 36; and the *Bered* of ver. 20, and Zabad of ver. 21, are the same as the Becher of Num. xxvi. 35. The names written in Hebrew are subjoined to make this clearer.

| אֶלְעָד, Elead. | וּבֶרֶד, and Bered. |
| שׁוּתֶלַח, Shuthelah. | זָבָד, Zabad. |
| וְתֶלַח, and Telah. | |

2. The words "his son" are improperly added after Bered and Tahath in 1 Chr. vii. 20.

3. Tahan is improperly inserted in 1 Chr. vii. 25 as a son of Shuthelah, as appears from Num. xxvi. 35, 36. The result is that Shuthelah's line may be thus restored: (1) Joseph. (2) Ephraim. (3) Shuthelah. (4) Eran, or Laadan. (5) Ammihud. (6) Elishama, captain of the host of Ephraim (Num. i. 10, li. 18, vii. 48). (7) Nun. (8) Joshua; a number which agrees well with all the genealogies in which we can identify individuals who were living at the entrance into Canaan; as Phinehas, who was sixth from Levi; Salmon, who was seventh from Judah; Bezaleel, who was seventh; Achan, who was sixth; Zelophehad's daughter seventh, etc.

As regards the interesting story of the destruction of Ephraim's sons by the men of Gath, which Ewald (*Gesch.* i. 491), Bunsen (*Egypt*, vol. i. p. 177), Lepsius (*Letters from Egypt*, p. 460), and others, have variously explained [EPHRAIM; BERIAH], it is impossible in the confused state of the text to speak positively as to the part borne in it by the house of Shuthelah. But it seems not unlikely that the repetition of the names in 1 Chr. vii. 20, 21, if it was not merely caused by vitiated MSS. like 2 Sam. v. 14–16 (LXX.), arose from their having been really repeated in the MS., not as additional links in the genealogy, but as having borne part, either personally or in the persons of their descendants, in the transaction with the men of Gath. If so, we have mention first in ver. 20 of the four families of Ephraim reckoned in Num. xxvi., namely Shuthelah, Bered or Becher, Tahath or Tahan, and Eladah or Eran, the son of Shuthelah: and we are then, perhaps, told how Tahath, Bered, and Shuthelah, or the clans called after them, went to help (עֶזֶר) Laadan (or Eran), Shuthelah's son, and were killed by the men of Gath, and how their father mourned them. This leads to an account of another branch of the tribe of Ephraim, of which Beriah was the head, and whose daughter or sister (for it is not clear which was meant) was Sherah

[a] With the article, *el 'ud* is the origin of the Ital. *uto*, Fr. *luth*, and English *lute*.

[b] The Samaritan text, followed by the LXX. and the Syriac, and two or three Heb. MSS., read *Edan* and one Heb. MS. reads *Edan* for Laadan at 1 Ch. vii. 26 (Purrington, *Geneal. Tables*).

Digitized by Google

(שֵׁאֵרָה),[a] who built the upper and lower Beth-horon (on the border of Benjamin and Ephraim), and Uzzen-Sherah, a town evidently so called from her (Sherah's) ear-ring. The writer then returns to his genealogy, beginning, according to the LXX., with Laadan. But the fragment of Shuthelah's name in ver. 25, clearly shows that the genealogy of Joshua which is here given, is taken up from that name in ver. 20.[b] The clause probably began, "the sons of Shuthelah, Laadan (or, of Eran) his son," etc. But the question remains whether the transaction which was so fatal to the Ephraimites occurred really in Ephraim's lifetime, and that of his sons and grandson, or whether it belongs to the times after the entrance into Canaan; or, in other words, whether we are to understand, by Ephraim, Shuthelah, etc., the individuals who bore those names, or the tribe and the families which sprung from them. Ewald and Bunsen, understanding the names personally, of course refer the transaction to the time of the sojourn of the Israelites in Goshen, while Lepsius merely points out the confusion and inconsistencies in the narrative, though he apparently suspects that the event occurred in Palestine after the Exodus. In the *General of our Lord Jesus Christ*, p. 365, the writer of this article had suggested that it was the men of Gath who had *come down* into Goshen to steal the cattle of the Israelites, in order to obviate the objection from the word "came down." [See too EPHRATAH.] But subsequent consideration has suggested another possible way of understanding the passage, which is also advocated by Bertheau, in the *Kurzg. exeget. Handb. z. A. T.* According to this view, the slaughter of the Ephraimites took place after the settlement in Canaan, and the event related in 1 Chr. viii. 13, in which Beriah also took part, had a close connection with it. The names therefore of the patriarch, and fathers of families, must be understood of the families which sprung from them [NEHEMIAH, iii. 2095 *a*], and Bertheau well compares Judg. xxi. 6. By Ephraim (1 Chr. vii. 22, 23), we must in this case understand the then head of the tribe, who was probably Joshua,[c] and this would go far to justify the conjecture in *Genealog.* p. 364, that Sherah (=שֵׁרַח) was the daughter of Joshua, arrived at by comparison of Josh. xix. 49, 50; 1 Chr. vii. 30, and by observing that the latter passage is Joshua's genealogy. Beriah would seem, from 1 Chr. viii. 13, to have obtained an inheritance in Benjamin, and also in Asher, where we find him and "his sister Serah" (עֶרַח) in 1 Chr. vii. 30. It is, however, impossible to speak with certainty where we have such scanty information. Bertheau's suggestion that Beriah was adopted into the family of the Ephraimites, is inconsistent with the precision of the statement (1 Chr. vii. 23), and therefore inadmissible. Still, putting together the insuperable difficulties in understanding the passage of the literal Ephraim, and his literal sons and daughter, with the fact that the settlements of the Ephraimites in the mountainous district, where Beth-horon, Gezer, Timnath-Serah, etc., lay, were exactly suited for a *descent* upon the plains of the Philistine country where the men of Gath fed their cattle, and with the further facts that the Ephraimites encountered a successful opposition from the Canaanites in Gezer (Josh. xvi. 10; Judg. i. 29), and that they apparently called in later the Benjamites to help them in driving away the men of Gath (1 Chr. viii. 13), it seems best to understand the narrative as of the times after the entrance into Canaan.

A. C. H.

* **SHUTTLE.** [HANDICRAFT; WEAVING.]

**SI'A** (סִיעָא: Ἀσουΐα; [FA. Ιασουια;] Alex. Σιαΐα: *Siaa*). "The children of Sia" were a family of Nethinim who returned with Zerubbabel (Neh. vii. 47). The name is written SIAHA in Ezr. ii. 44, and SUD in 1 Esdr. v. 29.

**SI'AHA** (סִיעֲהָא: Σιαδ; [Vat. Ιεηλ;] Alex. Ασαα: *Siaa*) = SIA (Ezr. ii. 44).

**SIB'BECAI** [3 syl.] (סִבְּכָי: Σεβοχδ [Vat. Οεβοχα] in Sam., Σοβοχαι in Chr.; Alex. Σεβοχαει, Σοβοχαΐ: *Sobochaï*). SIBBECHAI the Hushathite (2 Sam. xxi. 18; 1 Chr. xxvii. 11).

**SIB'BECHAI** [3 syl.] (סִבְּכַי: Σοβοχαί; [FA. in 1 Chr. ix., Σοβοχε;] Alex. Σοβββοχαι in 1 Chr. xx. 4: *Sobbochaï, Sobochaï*). One of David's guard, and eighth captain for the eighth month of 24,000 men of the king's army (1 Chr. xi. 29, xxvii. 11). He belonged to one of the principal families of Judah, the Zarhites, or descendants of Zerah, and is called "the Hushathite," probably from the place of his birth. Josephus (*Ant.* vii. 12, § 2) calls him "the Hittite," but this is no doubt an error. Sibbechai's great exploit, which gave him a place among the mighty men of David's army, was his single combat with Saph, or Sippai, the Philistine giant, in the battle at Gezer, or Gob (2 Sam. xxi. 18; 1 Chr. xx. 4). In 2 Sam. xxiii. 27 his name is written MEBUNNAI by a mistake of the copyist. Josephus says that he slew "many" who boasted that they were of the descent of the giants, apparently reading רבים for סבי in 1 Chr. xx. 4. [SIBBECAI.]

**SIB'BOLETH** (סִבֹּלֶת: *Sibboleth*). The Ephraimite (or, according to the text, the Ephrathite) pronunciation of the word Shibboleth (Judg. xii. 6). The LXX. do not represent Sibboleth at all. [See SHIBBOLETH.] G.

**SIB'MAH** (שִׂבְמָה [*balsam-place*, Fürst]: Σεβαμά; in Jer. [Rom. Ἀσερμά, FA.[1] Ωσερμος, Vat. FA.[2]] ωσερμα: *Sabama*). A town on the east of the Jordan, one of those which were taken and occupied by the tribe of Reuben (Josh. xiii. 19). In the original catalogue of those places it appears as SHEBAM and SHIBMAH (the latter merely an inaccurate variation of the A. V.). Like most of the Transjordanic places, Sibmah disappears from view during the main part of the Jewish history. We, however, gain a parting glimpse of it in the lament over Moab pronounced by Isaiah and by Jeremiah (Is. xvi. 8, 9; Jer. xlviii.

---

[a] It seems highly improbable, not to say impossible, that a literal daughter or granddaughter of Ephraim should have built these cities, which must have been built after the entrance into Canaan.

[b] It does not appear who Rephah and Resheph are. Eleasa seems to be repeated out of its place, as in the Alex. LXX. It is after Laadan, there corrupted into Galaada.

[c] There is no mention elsewhere of any posterity of Joshua. The Jewish tradition assigned him a wife and children. [RAHAB.]

Digitized by Google

32). It was then a Moabite place, famed for the abundance and excellence of its grapes. They must have been remarkably good to have been thought worthy of notice by those who, like Isaiah and Jeremiah, lived close to and were familiar with the renowned vineyards of Sorek (Is. v. 2, where "choicest vine" is "vine of Sorek"). Its vineyards were devastated, and the town doubtless destroyed by the "lords of the heathen," who at some time unknown appear to have laid waste the whole of that once smiling and fertile district.

Sibmah seems to have been known to Eusebius (*Onomasticon*, "Sabama"),[a] and Jerome (*Comment. in Isaiam*, lib. v.) states that it was hardly 500 paces distant from Heshbon. He also speaks of it as one of the very strong cities (*Urbes validissimæ*) of that region. No trace of the name has been discovered more recently, and nothing resembling it is found in the excellent lists of Dr. Eli Smith (Robinson, *Bibl. Res.* ed. 1, App. 169, 170). G.

**SIBRAIM** (סִבְרַיִם [*a twofold hope*]: -θηρά)ς Ἐβραιμ(λιδμ; [Alex. -θηρα)ς Εφραμ-η(λειαμ; Comp. Σαβαρ(μ:] *Sabarim*). One of the landmarks on the northern boundary of the Holy Land as stated by Ezekiel (xlvii. 16). It occurs between Berothah and Hazarhatticon, and is described in the same passage as lying between the boundary of Damascus and that of Hamath. It has not been identified — and in the great obscurity of the specification of this boundary it is impossible to say where it should be sought. G.

**SICHEM** (שְׁכֶם, *i. e.* Shechem [*shoulder, ridge*]: Συχέμ: *Sichem*). 1. The same well-known name — identical in the Hebrew — with that which in all other places in the O. T. is accurately rendered by our translators SHECHEM. Here (Gen. xii. 6) its present form arises from a too close adherence to the Vulgate, or rather perhaps from its non-correspondence with the Hebrew having been overlooked in the revision of 1611.

The unusual expression "the place of Sichem" may perhaps indicate that at that early age the city did not exist. The "oaks of Moreh" were there, but the town of Shechem as yet was not, its "place" only was visited by the great patriarch.

2. (ἐν Συκίμοις: *in Sichimis.*) Ecclus. l. 26. The Greek original here is in the form which is occasionally found in the O. T. as the equivalent of SHECHEM. If there could be any doubt that the son of Sirach was alluding in this passage to the Samaritans, who lived as they still live at Shechem, it would be disproved by the characteristic pun which he has perpetrated on the word Moreh, the ancient name of Shechem: "that foolish people (λαὸς μωρός) that dwell in Sichem." G.

**SICKLE.** [AGRICULTURE, vol. i. p. 43.]

**SICYON** (Σικυών). A city mentioned with several others [see PHASELIS] in 1 Macc. xv. 23. The name is derived from a Punic root (*sak, sik,* or *sok*), which always implies a periodical market; and the original settlement was probably one to which the inhabitants of the narrow strip of highly fertile soil between the mountains and the southern shore of the Corinthian Gulf brought their produce for exportation. The oldest name of the town on the coast (the Sicyon of the times before Alexander) was said to have been Αἰγιάλη, or Αἰγιαλοί. This was perhaps the common native name, and Sicyon that given to it by the Phœnician traders, which would not unnaturally extrude the other as the place acquired commercial importance. It is this Sicyon, on the shore, which was the seat of the government of the Orthagorids, to which the Cleisthenes celebrated by Herodotus (v. 67) belonged.[b] But the Sicyon referred to in the book of Maccabees is a more recent city, built on the site which served as an acropolis to the old one, and distant from the shore from twelve to twenty stades. Demetrius Poliorcetes, in the year 303 B. C., surprised the garrison which Ptolemy had five years before placed there, and made himself master of the harbor and the lower town. The acropolis was surrendered to him, and he then persuaded the population, whom he restored to independence, to destroy the whole of the buildings adjacent to the harbor, and remove thither; the site being one much more easily defensible, especially against any enemy who might attack from the sea. Diodorus describes the new town as including a large space so surrounded on every side by precipices as to be unapproachable by the machines which at that time were employed in sieges, and as possessing the great advantage of a plentiful supply of water within its circuit. Modern travellers completely confirm his account. Mr. Clark, who, in 1857, descended upon Sicyon from "a ridge of hills running east and west, and commanding a splendid prospect of both the [Corinthian and Saronic] gulfs and the isthmus between," after two hours and a half of riding from the highest point, came to a ruined bridge, probably ancient, at the bottom of a ravine, and then ascended the right bank by a steep path. Along the crest of this hill he traced fragments of the western wall of Sicyon. The mountain which he had descended did not fall towards the sea in a continuous slope, but presented a succession of abrupt descents and level terraces, severed at intervals by deep rents and gorges, down which the mountain-torrents make their way to the sea, spreading alluvium over the plain, about two miles in breadth, which lies between the lowest cliffs and the shore. "Between two such gorges, on a smooth expanse of tableland overlooking the plain," stood the city of Demetrius. "On every side are abrupt cliffs, and even at the southern extremity there is a lucky transverse rent separating this from the next plateau. The ancient walls may be seen at intervals along the edge of the cliff on all sides." It is easy to conceive how these advantages of position must at once have fixed the attention of the great engineer of antiquity — the besieger.

Demetrius established the forms of republican government in his new city; but republican government had by that time become an impossibility in Hellas. In the next half-century a number of

[a] The statement of this passage that Sibmah was "in Gilead," coupled with its distance from Heshbon as given by Jerome, supports the local tradition which places Mount Gilead south of the Jabbok, if the *Wady Zerka* be the Jabbok.

[b] The commercial connection of the Sicyon of the Orthagorids with Phœnicia is shown by the quantity of *Tartessian* brass in the treasury of the Orthagorid Myron at Olympia. The Phœnician (Carthaginian) treasury was next to it (Pausanias, vi. 19, § 1).

Digitized by Google

tyrants succeeded one another, maintaining themselves by the aid of mercenaries, and by temporizing with the rival sovereigns, who each endeavored to secure the hegemony of the Grecian race. This state of things received a temporary check by the efforts of Aratus, himself a native of Sicyon, of which his father Cleinias for a time became dynast. In his twentieth year, being at the time in exile, he contrived to recover possession of the city and to unite it with the Achæan league. This was in the year 251 B. C., and it appears that at this time the Dorian population was so preponderant as to make the addition of the town to a confederation of Achæans a matter of remark. For the half-century before the foundation of the new city, Sicyon had favored the anti-Lacedæmonian party in Peloponnese, taking active part with the Messenians and Argives in support of Megalopolis, which Epaminondas had founded as a counter-check to Sparta.

The Sicyonian territory is described as one of singular fertility, which was probably increased by artificial irrigation. In the changeful times which preceded the final absorption of European Hellas by the Romans it was subject to plunder by whoever had the command of the sea; and in the year 208 B. C. the Roman general Sulpicius, who had a squadron at Naupactus, landed between Sicyon and Corinth (probably at the mouth of the little river Nemea, which was the boundary of the two states), and was proceeding to harass the neighborhood, when Philip king of Macedonia, who was then at Corinth, attacked him and drove him back to his ships. But very soon after this, Roman influence began to prevail in the cities of the Achæan league, which were instigated by dread of Nabis the dynast of Lacedæmon to seek Roman protection. One congress of the league was held at Sicyon under the presidency of the Romans in 198 B. C., and another at the same place six years later. From this time Sicyon always appears to have adhered to the Roman side, and on the destruction of Corinth by Mummius (B. C. 146) was rewarded by the victors not only with a large portion of the Corinthian domain, but with the management of the Isthmian games. This distinction was again lost when Julius Cæsar refounded Corinth and made it a Roman colony; but in the mean while Sicyon enjoyed for a century all the advantages of an entrepôt which had before accrued to Corinth from her position between the two seas. Even in the days of the Antonines the pleasure-grounds (*τέμενος*) of the Sicyonian tyrant Cleon continued appropriated to the Roman governors of Achaia; and at the time to which reference is made in the Maccabees, it was probably the most important position of all over which the Romans exercised influence in Greece.

(Diodorus Siculus, xv. 70, xx. 37, 102; Polybius, ii. 43; Strabo, viii. 7, § 25; Livy, xxxii. 15, 19, xxxv. 25; Pausanias, ii. 8, v. 14, 9, vi. 19, §§ 1-6, x. 11, § 1; Clark, *Peloponnesus*, pp. 338 ff.)

**SIDDIM, THE VALE OF** (עֵמֶק הַשִּׂדִּים [see below]: ἡ φάραγξ ἡ ἁλυσή and ἡ κοιλὰς ἡ ἁλυσή: *Vallis Silvestris*). A place named only in one passage of Genesis (xiv. 3, 8, 10); a document pronounced by Ewald and other eminent Hebrew scholars to be one of the oldest, if not the oldest, of the fragments of historical record of which the early portion of the book is composed.

The meaning of the name is very doubtful. Gesenius says truly (*Thes.* p. 1321 *a*) that every one of the ancient interpreters has tried his hand at it, and the results are so various as to compel the belief, that nothing is really known of it, certainly not enough to allow of any trustworthy inferences being drawn therefrom as to the nature of the spot. Gesenius expresses his conviction (by inference from the Arabic سهل, an obstacle) that the real meaning of the words *Êmek has-Siddîm* is "a plain cut up by stony channels which render it difficult of transit;" and with this agree Fürst (*Handwb.* ii 411 *b*) and Kalisch (*Genesis*, p. 355).

Prof. Stanley conjectures (*S. & P.*) that Siddim is connected with *Sâdeh*,[b] and thus that the signification of the name was the "valley of the fields," so called from the high state of cultivation in which it was maintained before the destruction of Sodom and the other cities. This, however, is to identify it with the *Ciccar*, the "circle (A. V. 'plain') of Jordan," which there does not appear to be any warrant for doing.

As to the spot itself: —

1. It was one of that class of valleys which the Hebrews designated by the word *emek*. This term appears to have been assigned to a broad flattish tract, sometimes of considerable width, enclosed on each side by a definite range of hills. [VALLEY.]

The only *emek* which we can identify with any approach to certainty is that of Jezreel, namely, the valley or plain which lies between Gilboa and Little Hermon.

2. It was so far a suitable spot for the combat between the four and five kings (ver. 8); but,

3. It contained a multitude of bitumen-pits, sufficient materially to affect the issue of the battle.

4. In this valley the kings of the five allied cities of Sodom, Gomorrah, Admah, Zeboiim, and Bela, seem to have awaited the approach of the invaders. It is therefore probable that it was in the neighborhood of the "plain, or circle, of Jordan" in which those cities stood. But this we can only infer; it is not stated, and scarcely implied.

5. So much may be gathered from the passage as it appears originally to have stood. But the words which more especially bear on the subject of this article (ver. 3) do not form part of the original document. That venerable record has — with a care which shows how greatly it was valued at a very early date — been annotated throughout by a later, though still very ancient, chronicler, who has added what in his day were believed to be the equivalents for names of places that had become obsolete. Bela is explained to be Zoar; En-Mishpat to be Kadesh; the Emek-Shaveh to be the Valley of the King; the Emek has-Siddim to be the Salt Sea, that is, in modern phraseology, the Dead Sea. And when we remember how persistently the no-

[a] The following are the equivalents of the name given in the ancient versions: Sam. Vers., מישר הזלקר; Onkelos, מֵישַׁר דַּיְקְלָיָא; Arabic, *marj n Assâd*; Peshitto, ܡܝܫܪ ܕܣܝܛܐ; Aquila, Κ. τῶν παρεισδύνων; Symm. and Theod., Κ. τῶν ἁλσῶν (= אשרות); Josephus, φρέατα ἀσφάλτου: Jerome (*Quæst. in Gen.*) *Vallis Salinarum*.

[b] Perhaps more accurately with *Shâdad*, "to harrow." See Kalisch (*Gen.* p. 355 *a*,), who, however, disapproves of such a derivation, and adheres to that of Gesenius.

Digitized by Google

tion has been entertained for the last eighteen centuries,[a] that the Dead Sea covers a district which before its submersion was not only the Valley of Siddim but also the Plain of the Jordan, and what an elaborate account of the catastrophe of its submersion has been constructed even very recently by one of the most able scholars of our day, we can hardly be surprised that a chronicler in an age far less able to interpret natural phenomena, and at the same time long subsequent to the date of the actual event, should have shared in the belief. Recent investigation, however, of the geological evidence furnished by the aspect of the spot itself, has not hitherto lent any support to this view. On the contrary, it seems to contradict it. The northern and deeper portion of the lake unquestionably belongs to a geological era of very much older date than the time of Abraham; and as to even the southern and shallower portion, if it has undergone any material change in historic times, such change would seem to be one rather of gradual elevation than of submersion.[b]

If we could venture, as some have done, to interpret the latter clause of verse 3, "which is near," or "which is at, or by, the Salt Sea," then we might agree with Dr. Robinson and others in identifying the Valley of Siddim with the inclosed plain which intervenes between the south end of the lake and the range of heights which terminate the *Ghôr* and commence the *Wady Arabah*. This is a district in many respects suitable. In the ditches and drains of the *Sabkhah* are the impassable channels of Gesenius. In the thickly wooded *Ghôr es-Safieh* are ample conditions for the fertility of Prof. Stanley. The general aspect and formation of the plain answers fully to the idea of an *emek*.[c] But the original of the passage will not bear even this slight accommodation, and it is evident that in the mind of the author of the words, no less than of the learned and eloquent divine and historian of our own time already alluded to, the Salt Sea covers the actual space formerly occupied by the Vale of Siddim. It should be remembered that if the cities of the plain were, as there is much reason to believe they were, at the north end of the Dead Sea, it is hardly probable that the five kings would have gone so far from home as to the other end of the lake, a distance of more than forty miles, especially as on their road they must have passed Hazezon-Tamar, the modern *Ain Jidy*, where the Assyrians were then actually encamped (ver. 7). The course of the invaders at this time was apparently northwards, and it seems most probable — though after all nothing but conjecture on such a point is possible — that the scene of the engagement was somewhere to the north of the lake, perhaps on the plain at its northwest corner. This plain is in many of its characteristics not unlike the *Sabkhah* already mentioned, and it is a proper and natural spot for the inhabitants of the plain of Jericho to attack a hostile force descending from the passes of *Ain Jidy*. G.

* The discussion of this site is so interwoven with the question of the basin of the Salt Sea, and the submersion of a portion of the valley, that they cannot be separated. We dissent from the writer's positions as presented in the article, SALT SEA, and repeated in this. But instead of repeating our argument in reply, we refer the reader to the former article (Amer. ed.), for our reasons so far as they relate to the submersion of the plain and the site of the Vale of Siddim. And for an examination of his theory respecting the site of the cities of the plain, as north of the Sea, which Mr. Grove also introduces here, we refer the reader to the articles SODOM and ZOAR (Amer. ed.). See also *Bib. Sacra*, XXV. 112–149.

Relative to the inroad of Chedorlaomer and his allies, we remark that the northern invaders, after making the distant circuit of the valley on the east and south, came up on the west and smote En-gedi and secured that pass. The cities and their kings were in the deep valley below, whether north or south, or opposite, is wholly immaterial, so far as we can discover, in relation either to the previous route of conquest or to the subsequent course of the victors. Between the cities, wherever situated, and En-gedi, lay the Vale of Siddim, in which the battle was fought. Neither the narrative of the invasion, nor that of the conflagration of the cities and the plain, as viewed by the patriarch Abraham from a hill near Hebron, appears to us to throw decisive light on any disputed theory respecting their site.

If the eminence about three miles east of Hebron, the highest in that part of the country, now known as *Beni Na'im*, and where, according to Muslim tradition, is the tomb of Lot, was the spot where Abraham stood before the Lord, as claimed by Jerome, it would clearly favor the received theory. Robinson speaks of the southern sand-banks of the sea as visible from it "through gaps in the western mountains, by which the eye could penetrate into its deep bosom" (*Bibl. Res.* ii. 188).

With reference to the view expressed in the article above, respecting the bed of the sea, that "if it has undergone any material change in historic times, such change would seem to be one rather of gradual elevation than of submersion," we commend to the reader the pertinent suggestion of Mr. Warington, that *the elevation* of the salt mountain within the historic period would account both for the present saltness of the waters, and the rise of their level more than fifty feet, through the salt which they hold in solution. The occurrence of *river shells*, not marine, such as are now found in the Jordan, along the ancient beaches of the sea, he regards as proof that "the sea was at one time *fresh* water, not salt;" and he says, "if the salt were removed, the water would be found to occupy only nine-tenths of its present bulk" (*Journal of Sacred Literature*, April 1866, p. 47). This would leave the southern portion of the present bed dry, with ample room on the side for the passage of the patriarch and his flocks, north and south. In a letter to the writer of this (March 7, 1868), Mr. Tristram says, "My belief is that the *Jebel Usdum* has been recently elevated. This I judge from the layers of stratified marl corresponding with the adjacent deposits on its top. Mr. Warington suggests that the influx of salt has so in-

[a] Josephus states it emphatically. His words (*Ant.* 9) are, "They encamped in the valley called the Vells of Asphalt; for at that time there were wells in that spot; but now that the city of the Sodomites has disappeared, that valley has become a lake which is called Asphaltites." See also Strabo, xvi. 764.

[b] The grounds of this conclusion are stated under SEA, THE SALT.

[c] This is the plain which Dr. Robinson and others would identify with the Valley of Salt, *ge melach*. It is hardly possible that it can be both an *emek* and a *ge*

Digitized by Google

creased the volume of water, by the introduction of solid matter, that it must have raised its level at least 15 feet [' some 56 feet']. This would admit of the overflow over the southern lagoon, and would admit generally of an easy passage by the margin of the lake on the west side. I must say the explanation is satisfactory to my own mind." [SEA, THE SALT, Amer. ed.] S. W.

SI'DÈ (Σίδη: *Side*). A city on the coast of Pamphylia, in lat. 36° 46′, long. 31° 27′, ten or twelve miles to the east of the river Eurymedon. It is mentioned in 1 Macc. xv. 23, among the list of places to which the Roman senate sent letters in favor of the Jews [see PHASELIS]. It was a colony of Cumæans. In the time of Strabo a temple of Athenè stood there, and the name of that goddess associated with Apollo appears in an inscription of undoubtedly late times found on the spot by Admiral Beaufort. Sidè was closely connected with Aradus in Phœnicia by commerce, even if there was not a considerable Phœnician element in the population; for not only are the towns placed in juxtaposition in the passage of the Maccabees quoted above, but Antiochus's ambassador to the Achæan league (Livy, xxxv. 48), when boasting of his master's navy, told his hearers that the left division was made up of men of *Side* and of *Aradus*, as the right was of those of Tyre and of Sidon, *quas gentes nullæ unquam nec arte nec virtute navali æquassent*. It is possible that the name has the same root as that of Sidon, and that it (as well as the Sidè on the southern coast of the Euxine, Strabo, xii. 3) was originally a Phœnician settlement, and that the Cumæan colony was something subsequent. In the times in which Sidè appears in history it had become a place of considerable importance. It was the station of Antiochus's navy on the eve of the battle with the Rhodian fleet described by Livy (xxxvii. 23, 24). The remains, too, which still exist are an evidence of its former wealth. They stand on a low peninsula running from N. E. to S. W., and the maritime character of the former inhabitants appears from the circumstance that the walls towards the sea were but slightly built, while the one which faces the land is of excellent workmanship, and remains, in a considerable portion, perfect even to this time. A theatre (belonging apparently to the Roman times) is one of the largest and best preserved in Asia Minor, and is calculated to have been capable of containing more than 15,000 spectators. This is so prominent an object that, to persons approaching the shore, it appears like an acropolis of the city, and in fact, during the Middle Ages, was actually occupied as a fort. The suburbs of Sidè extend to some distance, but the greatest length within the walls does not exceed 1300 yards. Three gates led into the town from the sea, and one, on the northeastern side, into the country. From this last a paved street with high curbstones conducts to an agora, 180 feet in diameter, and formerly surrounded with a double row of columns, of which only the bases remain. In the centre is a large ruined pedestal, as if for a colossal statue, and on the southern side the ruins of a temple, probably the one spoken of by Strabo. Opposite to this a street ran to the principal water-gate, and on the fourth side of the agora the avenue from the land-gate was continued to the front of the theatre. Of this last the lower half is, after the manner of Roman architects whenever the site permitted, excavated from the native rock, the upper half built up of excellent masonry. The seats for the spectators, most of which remain, are of white marble beautifully wrought.

The two principal harbors, which at first seem to have been united in one, were at the extremity of the peninsula: they were closed, and together contained a surface of nearly 500 yards by 200. Besides these, the principal water-gate on the N. W. side was connected with two small piers of 150 feet long, so that it is plain that vessels used to lie here to discharge their cargoes. And the account which Livy gives of the sea-fight with Antiochus above referred to, shows that shelter could also be found on the other (or S. E.) side of the peninsula whenever a strong west wind was blowing.

The country by which Sidè is backed is a broad, swampy plain, stretching out for some miles beyond the belt of sand-hills which fringe the sea-shore. Low hills succeed, and behind these, far inland, are the mountains which, at Mount Climax 40 miles to the west, and again about the same distance to the east, come down to the coast. These mountains were the habitation of the Pisidians, against whom Antiochus, in the spring of the year 192 B. C., made an expedition; and as Sidè was in the interest of Antiochus, until, at the conclusion of the war, it passed into the hands of the Romans, it is reasonable to presume that hostility was the normal relation between its inhabitants and the highlanders, to whom they were probably objects of the same jealousy that the Spanish settlements on the African seaboard inspire in the Kabyles round about them. This would not prevent a large amount of traffic, to the mutual interest of both parties, but would hinder the people of Sidè from extending their sway into the interior, and also render the construction of effective fortifications on the land side a necessity. (Strabo, xii., xiv.; Livy, xxxv., xxxvii.; Beaufort, *Karamania*; Cicero, *Epp. ad Fam.* iii. 6.) J. W. B

SI'DON. The Greek form of the Phœnician name Zidon, or (more accurately) Tsidon. As such it occurs naturally in the N. T. and Apocrypha of the A. V. (Σιδών; [Sin. in 1 Macc. Σειδων:] *Sidon*: 2 Esdr. i. 11; Jud. ii. 28; 1 Macc. v. 15; Matt. xi. 21, 22, xv. 21; Mark iii. 8, vii. 24, 31; Luke iv.[a] 26, vi. 17, x. 13, 14; Acts xii. 20.[b] xxviii. 3). It is thus a parallel to SION.

But we also find it in the O. T., where it imperfectly represents the Hebrew word elsewhere presented as ZIDON (Gen. x. 15, 19; צִידוֹן: Σιδών *Sidon*). [ZIDON.] G.

SIDO'NIANS (צִידֹנִים; in Judg. צִידֹנִי [*inhabitants of Zidon*]: Σιδώνιος; in Deut. *Sidonians*: in Judg. Σιδώνιος: *Sidonii, Sidonius*) The Greek form of the word ZIDONIANS, usually so exhibited in the A. V. of the O. T. It occurs Deut. iii. 9; Josh. xiii. 4, 6; Judg. iii. 3; 1 K. v. 6. G

*sweeps away*, Gen.]: Samar. כיחון: Σηών; [in Josh. xiii. 21, Alex. Σηωρ, and in last part of verse, Rom. Σιών, Vat. Σειων;] Joseph. Σιχών: *Sehon*, [*Seon*]). King of the Amorites when Israel arrived on the borders of the Promised Land (Num. xxi. 21). He was evidently a man of great courage and audacity. Shortly before the time of Israel's arrival he had dispossessed the Moabites of a splendid territory, driving them south of the natural bulwark of the Arnon with great slaughter, and the loss of a great number of captives (xxi. 26–29). When the Israelite host appears, he does not hesitate or temporize like Balak, but at once gathers his people together and attacks them. But the battle was his last. He and all his host were destroyed, and their district from Arnon to Jabbok became at once the possession of the conqueror.

Josephus (*Ant.* iv. 5, § 2) has preserved some singular details of the battle, which have not survived in the text either of the Hebrew or LXX. He represents the Amorite army as containing every man in the nation fit to bear arms. He states that they were unable to fight when away from the shelter of their cities, and that being especially galled by the slings and arrows of the Hebrews, and at last suffering severely from thirst, they rushed to the stream and to the shelter of the recesses of the ravine of the Arnon. Into these recesses they were pursued by their active enemy and slaughtered in vast numbers.

Whether we accept these details or not, it is plain, from the manner in which the name of Sihon [a] fixed itself in the national mind, and the space which his image occupies in the official records, and in the later poetry of Israel, that he was a truly formidable chieftain. G.

**SI'HOR**, accurately **SHI'HOR**, once **THE SHIHOR** (שִׁיחוֹר, שִׁחוֹר, שׁחר [*black, turbid*]: ἡ ἀολίκτος ἡ κατὰ πρόσωπον Αἰγύπτου, Γηών: *fluvius turbidus, Nilus*, (*aqua*) *turbida*): or **SHIHOR OF EGYPT** (שִׁיחוֹר מִצְרַיִם: ὑρια Αἰγύπτου: *Sihor Ægypti*), when unqualified, a name of the Nile. It is held to signify "the black" or "turbid," from שָׁחַר, "he or it was or became black;" a word used in a wide sense for different degrees of dark color, as of hair, a face tanned by the sun, a skin black through disease, and extreme blackness. [NILE, vol. iii. p. 2149.] Several names of the Nile may be compared. Νεῖλος itself, if it be, as is generally supposed [?], of Iranian origin, signifies "the blue," that is, "the dark" rather than the turbid; for we must then compare the Sanskrit *nîla*, "blue," probably especially "dark blue," also even "black," as *nîlavanka*, "black mud." The Arabic *azrak*, "blue," signifies "dark" in the name *Bahr el-Azrak*, or Blue River, applied to the eastern of the two great confluents of the Nile. Still nearer is the Latin *Melo*, from μέλας, a name of the Nile, according to Festus and Servius (*Georg.* iv. 291; *Æn.* i. 745, iv. 246); but little stress can be laid upon such a word resting on no better authority. With the classical writers, it is the soil of Egypt that is black, rather than its river. So too in hieroglyphics, the name of the country, KEM, means "the black;" but there is no name of the Nile of like signification. In the ancient painted sculptures, however, the figure of the Nile-god is colored differently according as it represents the river during the time of the inundation, and during the rest of the year, in the former case red, in the latter blue.

There are but three occurrences of Shihor in the Bible, and but one of Shihor of Egypt, or Shihor-Mizraim. It is spoken of as one of the limits of territory which was still unconquered when Joshua was old. "This [is] the land that yet remaineth: all the regions of the Philistines, and all Geshuri, from the Shihor (הַשִּׁיחוֹר), which [is] before Egypt, even unto the borders of Ekron northward, is counted to the Canaanite" (Josh. xiii. 2, 3). The enumeration of the Philistines follows. Here, therefore, a district lying between Egypt and the most northern Philistine city seems to be intended. With this passage must be compared that in which Shihor-Mizraim occurs. David is related to have "gathered all Israel together, from Shihor of Egypt even unto the entering of Hamath" (1 Chr. xiii. 5). There is no other evidence that the Israelites ever spread westward beyond Gaza; it may seem strange that the actual territory dwelt in by them in David's time should thus appear to be spoken of as extending as far as the easternmost branch of the Nile, but it must be recollected that more than one tribe at a later time had spread beyond even its first boundaries, and also that the limits may be those of David's dominion rather than of the land actually fully inhabited by the Israelites. The stream may therefore be that of the *Wâdi-l-'Areesh*. That the stream intended by Shihor unqualified was a navigable river is evident from a passage in Isaiah, where it is said of Tyre, "And by great waters, the sowing of Shihor, the harvest of the river (*Yeôr*, יְאֹר), [is] her revenue" (xxiii. 3). Here Shihor is either the same as, or compared with, *Yeôr*, generally thought to be the Nile [NILE], but in this work suggested to be the extension of the Red Sea. [RED SEA.] In Jeremiah the identity of Shihor with the Nile seems distinctly stated where it is said of Israel, "And now what hast thou to do in the way of Egypt, to drink the waters of Shihor? or what hast thou to do in the way of Assyria, to drink the waters of the river?" *i. e.* Euphrates (ii. 18). In considering these passages it is important to distinguish between "the Shihor which [is] before Egypt," and Shihor of Egypt, on the one hand, and Shihor alone, on the other. In articles NILE and RIVER OF EGYPT it is maintained too strongly that Shihor, however qualified, is always the Nile. The later opinion of the writer is expressed here under SHIHOR OF EGYPT. The latter is, he thinks, unquestionably the Nile, the former two probably, but not certainly, the same. R. S. P.

**SI'LAS** (Σίλας: *Silas*). An eminent member of the early Christian Church, described under that name in the Acts, but as Silvanus [b] in St. Paul's Epistles. He first appears as one of the leaders (ἡγούμενοι) of the Church at Jerusalem (Acts xv. 22), holding the office of an inspired teacher (προφ-

the Pent. itself it occurs four times, two of which are in the song, Num. xxi. 27, 29.

[a] It is possible that a trace of the name may still remain in the *Jebel Shikhan*, a lofty and conspicuous mountain just to the south of the *Wady Mojeb*.

[b] The Alexandrine writers adopted somewhat bold abbreviations of proper names, such as Zenas for Zenodorus, Apollos for Apollonius, Hermas for Hermodorus. The method by which they arrived at these forms is not very apparent.

(יְרִיעָה, xv. 32). His name, derived from the Latin *silva*, "wood," betokens him a Hellenistic Jew, and he appears to have been a Roman citizen (Acts xvi. 37). He was appointed as a delegate to accompany Paul and Barnabas on their return to Antioch with the decrees of the Council of Jerusalem (Acts xv. 22, 32). Having accomplished this mission, he returned to Jerusalem (Acts xv. 33; the following verse, ἔδοξε δὲ τῷ Σίλᾳ ἐπιμεῖναι αὐτοῦ, is decidedly an interpolation introduced to harmonize the passage with xv. 40). He must, however, have immediately revisited Antioch, for we find him selected by St. Paul as the companion of his second missionary journey (Acts xv. 40–xxi. 17). At Berœa he was left behind with Timothy while St. Paul proceeded to Athens (Acts xvii. 14), and we hear nothing more of his movements until he rejoined the Apostle at Corinth (Acts xviii. 5). Whether he had followed Paul to Athens in obedience to the injunction to do so (Acts xvii. 15), and had been sent thence with Timothy to Thessalonica (1 Thess. iii. 2), or whether his movements were wholly independent of Timothy's, is uncertain (Conyb. and Hows. *St. Paul*, i. 458, note 3). His presence at Corinth is several times noticed (2 Cor. i. 19; 1 Thess. i. 1; 2 Thess. i. 1). He probably returned to Jerusalem with St. Paul, and from that time the connection between them appears to have terminated. Whether he was the Silvanus who conveyed St. Peter's First Epistle to Asia Minor (1 Pet. v. 12) is doubtful; the probabilities are in favor of the identity; the question is chiefly interesting as bearing upon the Pauline character of St. Peter's epistles (De Wette, *Einleit.* § 4). A tradition of very slight authority represents Silas to have become bishop of Corinth. We have finally to notice, for the purpose of rejecting, the theories which identify Silas with Tertius (Rom. xvi. 22) through a Hebrew explanation of the name (שָׁלִישׁ), and again with Luke, or at all events with the author of the Acts (Alford's *Prolegom.* in *Acts*, i. § 1). W. L. B.

SILK (σηρικόν). The only *undoubted* notice of silk in the Bible occurs in Rev. xviii. 12, where it is mentioned among the treasures of the typical Babylon. It is, however, in the highest degree probable that the texture was known to the Hebrews from the time that their commercial relations were extended by Solomon. For, though we have no historical evidence of the importation of the raw material to the shores of the Mediterranean earlier than that of Aristotle (*H. A.* v. 19) in the 4th century B. C., yet that notice, referring as it does to the island of Cos, would justify the assumption that it had been known at a far earlier period in Western Asia. The commercial routes of that continent are of the highest antiquity, and an indirect testimony to the existence of a trade with China in the age of Isaiah is probably afforded us in his reference to the Sinim. [SINIM.] The well-known classical name of the substance (σηρικόν, *sericum*) does not occur in the Hebrew language,[a] but this may be accounted for, partly on the ground that the Hebrews were acquainted only with the texture and not with the raw material, and partly on the supposition that the name *sericum* reached the Greeks by another channel, namely, through Armenia. The Hebrew terms which have been supposed to refer to silk are *meshi*[b] and *demeshek*.[c] The former occurs only in Ex. xvi. 10, 13 (A. V. "silk") and is probably connected with the root *mâshâh*, "to draw out," as though it were made of the finest *drawn* silk in the manner described by Pliny (vi. 20, xi. 26): the equivalent term in the LXX. (τρίχαπτον), though connected in point of etymology with *hair* as its material, is nevertheless explained by Hesychius and Suidas as referring to silk, which may well have been described as resembling hair. The other term *demeshek* occurs in Am. iii. 12 (A. V. "Damascus"), and has been supposed to refer to silk from the resemblance of the word to our "damask," and of this again to "Damascus," as the place where the manufacture of silken textures was carried on. It appears, however, that "damask" is a corruption of *dimakso*, a term applied by the Arabs to the raw material alone, and not to the manufactured article (Pusey's *Min. Proph.* p. 183). We must, therefore, consider the reference to silk as extremely dubious.[d] We have notice of silk under its classical name in the Mishna (*Kil.* 9, § 2), where Chinese silk is distinguished from floss-silk. The value set upon silk by the Romans, as implied in Rev. xviii. 12, is noticed by Josephus (*B. J.* vii. 5, § 4), as well as by classical writers (*e. g.* Sueton. *Calig.* 52; Mart. xi. 9). W. L. B.

SILLA (סִלָּא [*twig, basket*]: [Rom. Σελά; Vat.] Γααλλα; Alex. Γαλααδ; [Comp. Σελλά:] *Sella*). "The house of Millo, which goeth down to Silla," was the scene of the murder of king Joash (2 K. xii. 20). What or where Silla was is entirely matter of conjecture. Millo seems most probably to have been the citadel of the town, and situated on Mount Zion. [See iii. 1937 *a*.] Silla must have been in the valley below, overlooked by that part of the citadel which was used as a residence. The situation of the present so-called Pool of Siloam would be appropriate, and the agreement between the two names is tempting; but the likeness exists in the Greek and English versions only, and in the original is too slight to admit of any inference. Gesenius, with less than his usual caution, affirms Silla to be a town in the neighborhood of Jerusalem. Others (as Thenius, in *Kurzg. Exeg. Handb.* on the passage) refer it to a place on or connected with the causeway or flight of steps (מְסִלָּה) which led from the central valley of the city up to the court of the Temple. To indulge in such confident statements on either side is an entire mistake. Neither in the parallel passage of Chronicles,[e] in the lists of Nehemiah iii. and xii., the Jewish Commentator,[f] the LXX., in Josephus

---

[a] Celsius conjectured that שְׁרִיקוֹת (Is. xix 9, A. V. "fine") was connected with *sericum*.

[b] מֶשִׁי. [c] דַּמֶּשֶׂק.

[d] The A. V. confounds שֵׁשׁ with silk in Prov. xxi. 22.

[e] 2 Chr. xxiv. 25, a passage tinged with the usual tinge of the narrative of Chronicles, and containing some curious variations from that of the Kings, but passing over the place of the murder *sub silentio*.

[f] The reading of the two great MSS. of the LXX. — agreeing in the Γ as the commencement of the name — is remarkable, and prompts the suggestion that the Hebrew name may originally have begun with גַּיְא, a ravine (as Ge-hinnom). The καταφύγετα of the Alex. is doubtless a corruption of καταβάσεται

nor in Jerome, do we find the smallest clew; and here is therefore no alternative but to remain for the present in ignorance. G.

**SILO'AH, THE POOL OF** (בְּרֵכַת הַשֶּׁלַח [see below]: κολυμβήθρα τῶν κωδίων; FA.[1] κ. των θετου Σιλωαμ; [Comp. κ. τοῦ Σιλωάδ:] *Piscina Silve*). This name is not accurately represented in the A. V. of Neh. iii. 15 — the only passage in which this particular form occurs. It should be Shelach, or rather has-Shelach, since it is given with the definite article. This was possibly a corrupt form of the name which is first presented as Shiloach, then as Siloam, and is now *Selwân*. The meaning of *Shelach*, taken as Hebrew, is "dart." This cannot be a name given to the stream on account of its swiftness, because it is not now, nor was it in the days of Isaiah, anything but a very soft and gentle stream (Is. viii. 6). It is probably an accommodation to the popular mouth, of the same nature as that exemplified in the name Dart which is now borne by more than one river in England, and which has nothing whatever to do with swiftness, but is merely a corruption of the ancient word which also appears in the various forms of Derwent,[a] Darent, Trent. The last of these was at one time supposed to mean "thirty;" and the river Trent was believed to have 30 tributaries, 30 sorts of fish, 30 convents on its banks, etc.: a notion preserved from oblivion by Milton in his lines: —

> "And Trent, that like some earth-born giant spreads
> His thirty arms along the indented meads."

For the fountain and pool, see SILOAM. G.

**SILO'AM** (הַשִּׁלֹחַ, *Shiloach*, Is. viii. 6; הַשִּׁלֹחַ, *Shelach*, Neh. iii. 15 [see above]; the change in the Masoretic punctuation indicating merely perhaps a change in the pronunciation or in the *spelling* of the word, sometime during the three centuries between Isaiah and Nehemiah. Rabbinical writers, and, following them, Jewish travellers, both ancient and modern, from Benjamin of Tudela to Schwarz, retain the earlier *Shiloach* in preference to the later *Shelach*. The Rabbis give it with the article, as in the Bible (השילוח, Dachs's *Codex Talmudicus*, p. 367). The LXX. gives Σιλωάμ [Vat. Sin. Σειλωαμ] in Isaiah; but in Nehemiah κολυμβήθρα τῶν κωδίων, the pool of the sheepskins, or "fleece-pool;" perhaps because, in their day, it was used for washing the fleeces of the victims.[b] The Vulgate has uniformly, both in Old and New Testaments, *Silve*; in the Old calling it *piscina*, and in the New *natatoria*. The Latin Fathers, led by the Vulgate, have always *Siloe*; the old pilgrims, who knew nothing but the Vulgate, *Siloe* or *Sylve*. The Greek Fathers, adhering to the LXX., have *Siloam*. The word does not occur in the Apocrypha. Josephus gives both *Siloam* and *Siloas*, generally the former.)

Siloam is one of the few undisputed localities (though Reland and some others misplaced it) in the topography of Jerusalem; still retaining its old name (with Arabic modification, *Silwân*), while every other pool has lost its Bible-designation. This is the more remarkable as it is a mere suburban tank of no great size, and for many an age not particularly good or plentiful in its waters, though Josephus tells us that in his day they were both "sweet and abundant" (*B. J.* v. 4. § 1). Apart from the identity of *name*, there is an unbroken chain of exterior testimony, during eighteen centuries, connecting the present *Birket Silwân* with the *Shiloah* of Isaiah and the *Siloam* of St. John. There are difficulties in identifying the *Bir Eyub* (the well of Salah-ed-din, *Ibn Eyub*, the great digger of wells, Jalal-Addin, p. 239), but none in fixing Siloam. Josephus mentions it frequently in his *Jewish War*, and his references indicate that it was a somewhat noted place, a sort of city landmark. From him we learn that it was without the city (ἔξω τοῦ ἄστεως, *B. J.* v. 9, § 4); that it was at this pool that the "old wall took a bend and shot out eastward" (ἀνακάμπτον εἰς ἀνατολήν, *ib.* v. 6, § 1); that there was a valley *under* it (τὴν ὑπὸ Σιλωάμ φάραγγα, *ibid.* vi. 8, § 5), and one *beside* it (τῇ κατὰ τὴν Σιλωάμ φάραγγι, *ibid.* v. 12, § 2); a hill (λόφος) right opposite, apparently on the other side of the Kedron, hard by a cliff or rock called Peristereon (*ibid.*); that it was at the termination or mouth of the Tyropœon (*ibid.* v. 4, § 1); that close beside it, apparently eastward, was another pool, called Solomon's pool, to which the "old wall" came after leaving Siloam, and past which it went on to *Ophlas*, where, bending northward, it was united to the eastern arcade of the Temple. In the Antonine Itinerary (A. D. 333) it is set down in the same locality, but it is said to be "juxta murum," as Josephus implies; whereas now it is a considerable distance — upwards of 1200 feet — from the nearest angle of the present wall, and nearly 1,900 feet from the southern wall of the Haràm. Jerome, towards the beginning of the 5th century, describes it as "ad radices montis Moriah" (*in Matt.* x.), and tells (though without indorsing the fable) that the stones sprinkled with the blood (rubra saxa) of the prophet Zechariah were still pointed out (*in Matt.* xxiii.) He speaks of it as being in the Valley of the Son of Hinnom, as Josephus does of its being at the mouth of the Tyropœon (*in Jer.* ii.); and it is noticeable that he (like the Rabbis) never mentions the Tyropœon, while he, times without number, speaks of the Valley of the Son of Hinnom. He speaks of Hinnom, Tophet, with their groves and gardens, as watered by Siloam (*in Jer.* xix. 6, and xxxii. 35). "Tophet, quæ est in valle filii Ennom, illum locum significat qui Siloe fontibus irrigatur, et est amœnus atque nemorosus, hodieque hortorum præbet delicias" (*in Jer.* viii). He speaks of Siloam as dependent on the rains, and as the only fountain used in his day: "Una fonte Siloe et hoc non perpetuo utitur civitas; et

---

[a] Derwent appears to be the oldest of these forms, and to be derived from *derwyn*, an ancient British word, meaning "to wind about." On the Continent the name is found in the following forms: Fr. *Durance*; Germ. *Drewenz*; It. *Trento*; Russ. *Duna* (Ferguson's *River Names*, etc.).

[b] In Talmudical Hebrew *Shelach* signifies "a skin" (Levi's *Isagoge Sacra*); and the Alexandrian translators attached this meaning to it; they and the earlier Rabbis considering Nehemiah's Shelach as a different pool from Siloam; probably the same as Bethesda, by the Sheep Gate (John v. 2), the προβατικὴ κολυμβήθρα of Eusebius, the *probatica piscina* of Jerome. If so then it is Bethesda, and not Siloam, that is mentioned by Nehemiah.

Digitized by Google

aquæ in præsentem diem sterilitas pluviarum, non solum frugum sed et bibendi inopiam facit" (*in Jer.* xiv.). Now, though Jerome ought to have known well the water-supplies of Jerusalem, seeing he lived the greater part of his life within six miles of it, yet other authorities, and the modern water-provision of the city, show us that it never could have been wholly dependent on its *pools*. Its innumerable bottle-necked private cisterns kept up a supply at all times, and hence it often happened that it was the *besiegers*, not the *besieged*, that suffered most; though Josephus records a memorable instance to the contrary, when — relating a speech he made to the Jews, standing, beyond their darts, on a part of the southeastern wall which the Romans had carried — he speaks of Siloam as overflowing since the Romans had got access to it, whereas before, when the Jews held it, it was dry (*B. J.* v. 9, § 4). And we may here notice, in passing, that Jerusalem is, except perhaps in the very heat of the year, a well-watered city. Dr. Barclay says that "within a circuit swept by a radius of seven or eight miles there are no less than thirty or forty natural springs" (*City of the Great King*, p. 295); and a letter from Consul Finn to the writer adds, "This I believe to be under the truth; but they are almost all found to the S. and S. W.: in those directions there does not appear to be a village without springs." [a]

In the 7th century, Antoninus Martyr mentions Siloam as both fountain and pool. Bernhard the monk speaks of it in the 9th, and the annalists of the Crusades mention its site in the fork of two valleys, as we find it. Benjamin of Tudela (A. D. 1173) speaks of "the great spring of Shiloach which runs into the brook Kedron" (Asher's ed. vol. i. p. 71); and he mentions "a large building upon it" (עֵלִי), which he says was erected in the days of his fathers. Is it of this building that the present ruined pillars are the relics? Caumont (A. D. 1418) speaks of the *Valley of Siloah*, "ou est le fonteyne ou le (*sic*) vierge Marie lavoit les drapellez de son enfant," and of the fountain of Siloam as close at hand (*Voyage d'outremer en Jherusalem*, etc., Paris edition, p. 68). Felix Fabri (A. D. 1484) describes Siloam at some length, and seems to have attempted to enter the subterraneous passage; but failed, and retreated in dismay after filling his flasks with its eye-healing water. Arnold von Harff (A. D. 1496) also identifies the spot (*Die Pilgerfahrt*, p. 186, Col. ed.). After this, the references to Siloam are innumerable; nor do they, with one or two exceptions, vary in their location of it. We hardly needed these testimonies to enable us to fix the site, though some topographers have rested on these entirely. Scripture, if it does not actually set it down in the mouth of the Tyropœon as Josephus does, brings us very near it, both in Nehemiah and St. John. The reader who compares Neh. iii. 15 with Neh. xii. 37, will find that the pool of Siloah, the Fountain Gate, the stairs of the city of David, the wall above the house of David, the Water Gate, and the king's gardens, were all near each other. The Evangelist's narrative regarding the blind man, whose eyes the Lord miraculously opened, when carefully examined, leads us to the conclusion that Siloam was somewhere in the neighborhood of the Temple. The Rabbinical traditions, or *histories*, as they doubtless are in many cases, frequently refer to Siloam in connection with the Temple service. It was to Siloam that the Levite was sent with the golden pitcher on the "last and great day of the feast" of Tabernacles; it was from Siloam that he brought the water which was then poured over the sacrifice, in memory of the water from the rock of Rephidim; and it was to this Siloam water that the Lord pointed when He stood in the Temple on that day and cried, "If any man thirst, let him come unto me and drink."

The Lord sent the blind man to wash, not *in*, as our version has it, but *at* (εἰς) the pool of Siloam; [b] for it was the clay from his eyes that was to be washed off; and the Evangelist is careful to throw in a remark, not for the purpose of telling us that Siloam meant an "aqueduct," as some think, but to give higher significance to the miracle. "Go wash at Siloam," was the command; the Evangelist adds, "which is by interpretation SENT." On the inner meaning here — the parallelism between "the Sent One" (Luke iv. 18: John x. 36) and "the Sent water," the missioned One and the missioned pool, we say nothing farther than what St. Basil said well, in his exposition of the 8th of Isaiah, τίς οὖν ὁ ἀπεσταλμένος καὶ ἀψοφητὶ ῥέων; ἢ περὶ οὗ εἴρηται, κύριος ἀπέστειλέ με· καὶ πάλιν, οὐκ ἐρίσει οὐδὲ κραυγάσει; That "Sent" is the natural interpretation is evident, not simply from the word itself, but from other passages where שָׁלַח is used in connection with water, as Job v. 10, "he *sendeth waters* upon the fields;" and Ez. xxxi. 4, "she *sent out* her little rivers unto all the trees of the field." The Talmudists coincide with the Evangelist, and say that Shiloach was so called because it sent forth its waters to water the gardens (Levi's *Lingua Sacra*). We may add Homer's line: —

Ἐννῆμαο δ' ἐκ τείχος ἴει ῥόον (*Il.* xii. 25).

A little way below the Jewish burying-ground, but on the opposite side of the valley, where the Kedron turns slightly westward, and widens itself considerably, is the fountain of the Virgin, or *Um ed-Deraj*, near the beginning of that saddle-shaped projection of the Temple-hill supposed to be the OPHEL of the Bible, and the *Ophlas* of Josephus. [EN-ROGEL.] At the back part of this fountain a subterraneous passage begins, through which the water flows, and through which a man may make his way, as did Robinson and Barclay, sometimes walking erect, sometimes stooping, sometimes kneeling, and sometimes crawling, to Siloam. This rocky conduit, which twists considerably, but keeps, in general, a southwesterly direction, is, according to Robinson, 1,750 feet long, while the direct distance between *Silwân* and *Um ed-Deraj* is only a little above 1,200 feet. In former days this passage was evidently deeper, as its bed is sand of some depth, which has been accumulating for ages. This conduit has had tributaries, which have formerly sent their waters down from the city pools or Temple-wells to swell Siloam. Barclay writes, "In exploring the subterraneous channel

[a] Strabo's statement is that Jerusalem itself was rocky but well watered (εὔυδρον), but all the region around was barren and waterless (ἄυυδρον καὶ ἄνυδρον), b. xvi. ch. 2, sect. 36.

[b] See *Wolfii Cura*, etc. Or εἰς gets its force from ὕπαγε, νίψαι coming between the verb and its preposition parenthetically, "Go to the pool and wash thine eyes there."

conveying the water from the Virgin's Fount to Siloam. I discovered a similar channel entering from the north, a few yards from its commencement; and on tracing it up near the Mugrabin Gate, where it became so choked with rubbish that it could be traversed no farther, I there found it turn to the west, in the direction of the south end of the cleft or saddle of Zion; and if this channel was not constructed for the purpose of conveying to Siloam the surplus waters of Hezekiah's aqueduct, I am unable to suggest any purpose to which it could have been applied" (*City of the Great King*, p. 309). In another place he tells us something more: "Having loitered in the pool [Virgin's Fount] till the coming down of the waters, I soon found several widely separated places where it gained admittance, besides the opening under the steps, where alone it had formerly been supposed to enter. I then observed a large opening entering the rock-hewn channel, just below the pool, which, though once a copious tributary, is now dry. Being too much choked with tesseræ and rubbish to be penetrated far, I carefully noted its position and bearing, and, on searching for it above, soon identified it on the exterior, where it assumed an upward direction towards the Temple, and, entering through a breach, traversed it for nearly a thousand feet sometimes erect, sometimes bending, sometimes

Pool of Siloam, looking north. From a sketch by Rev. S. C. Malan.

inching my way snake-fashion, till at last I reached a point near the wall where I heard the donkeys tripping along over my head. I was satisfied, on subsequently locating our course above ground with the theodolite, that this canal derived its former supply of water, not from Moriah, but from Zion" (*City*, p. 523).

This conduit enters Siloam at the northwest angle; or rather enters a small rock-cut chamber which forms the *vestibule* of Siloam, about five or

a * Lieut. Warren's researches have shown that Dr. Barclay was singularly mistaken in the statements here quoted. The subterranean passage connected with the aqueduct and pool, which the latter supposed he had "identified on the exterior," was ascertained by the latter to be about 40 feet below the surface of the *rock*. The passage which Barclay mistook for this, and entering from the exterior, "traversed it for nearly a thousand feet," is, according to Warren, "the main drain of the town, which is built of masonry, and generally only a few feet below the surface of the made earth." The subterranean passage, moreover, was not as Barclay supposed, a tributary to the fountain, but a conduit to a shaft, of which, as explored by Warren, some account is given at the end of this article (Amer. ed.).

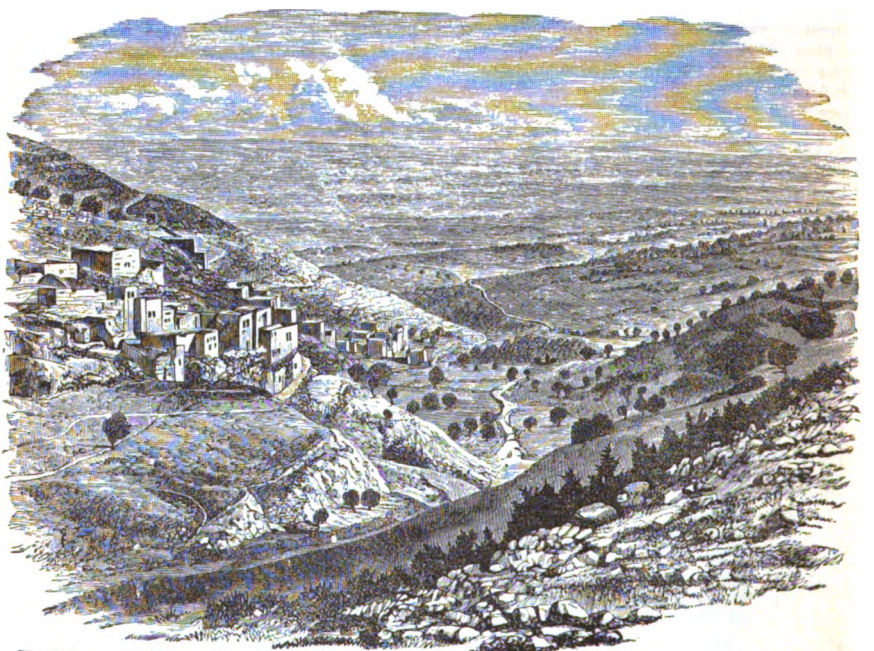
six feet broad. To this you descend by a few rude steps, under which the water pours itself into the main pool (*Narrative of Mission to the Jews*, vol. i. p. 207). This pool is oblong; eighteen paces in length according to Laffi (*Viaggio al Santo Sepolcro*, A. D. 1678); fifty feet according to Barclay; and fifty-three according to Robinson. It is eighteen feet broad, and nineteen feet deep, according to Robinson; but Barclay gives a more minute measurement, "fourteen and a half at the lower (eastern) end, and seventeen at the upper; its western end side being somewhat bent; it is eighteen and a half in depth, but never filled, the water either passing directly through, or being maintained at a depth of three or four feet; this is effected by leaving open or closing (with a few handfuls of weeds at the present day, but formerly by a flood-gate) an aperture at the bottom; at a height of three or four feet from the bottom, its dimensions become enlarged a few feet, and the water, attaining this level, falls through an aperture at its lower end, into an *educt*, subterranean at first, but soon appearing in a deep ditch under the perpendicular cliff of Ophel, and is received into a few small reservoirs and troughs" (*City*, p. 524).

The small basin at the west end, which we have described, is what some old travellers call "the fountain of Siloe" (*F. Fabri*, vol. i. p. 420). "In front of this," Fabri goes on, "there is a bath surrounded by walls and buttresses, like a cloister, and the arches of these buttresses are supported by marble pillars," which pillars he affirms to be the remains of a monastery built above the pool. The present pool is a ruin, with no moss or ivy to make it romantic; its sides falling in; its pillars broken; its stair a fragment; its walls giving way; the edge of every stone worn round or sharp by time; in some parts mere *débris*; once Siloam, now, like the city which overhung it, a heap; though around its edges, "wild flowers, and, among other plants, the caper-tree, grow luxuriantly" (*Narrative of Mission*, vol. i. p. 207). The gray crumbling limestone of the stone (as well as of the surrounding rocks, which are almost verdureless) gives a poor and worn-out aspect to this venerable relic. The present pool is not the original building; the work of crusaders it may be; perhaps even improved by Saladin, whose affection for wells and pools led him to care for all these things; perhaps the work of later days. Yet the spot is the same. Above it rises the high rock, and beyond it the city wall; while eastward and southward the verdure of gardens relieves the gray monotony of the scene, and beyond these the Kedron vale, overshadowed by the third of the three heights of Olivet, "the mount of corruption" (1 K. xi. 7; 2 K. xxiii. 13), with the village of *Silwân* jutting out over its lower slope, and looking into the pool from which it takes its name and draws its water.

This pool, which we may call the *second*, seems anciently to have poured its waters into a *third*, before it proceeded to water the royal gardens. This *third* is perhaps that which Josephus calls "Solomon's pool" (*B. J.* v. 4, § 2), and which Nehemiah calls "the King's pool" (ii 14); for this must have been somewhere about "the king's garden" (Josephus's βασιλικὸς παράδεισος, *Ant.* vii. 14, § 4); and we know that this was by "the wall of the pool of Siloah" (iii. 15). The Antonine Itinerary speaks of it in connection with *Siloa*, as "alia piscina grandis forma." It is now known as the *Birket el-Hamra*, and may be perhaps some five times the size of *Birket es-Silwân*. Barclay speaks of it merely as a "depressed fig-yard;" but one would like to see it cleared out.

Siloam is in Scripture always called a *pool*. It is not an אֲגַם, that is, a marsh-pool (Is. xxxv. 7); nor a גֵּבִא, a natural hollow or pit (Is. xxx. 14); nor a מִקְוֶה, a natural gathering of water (Gen. i. 10; Is. xxii. 11); nor a בְּאֵר, a well (Gen. xvi. 14); nor a בּוֹר, a pit (Lev. xi. 36); nor an עַיִן, a spring (Gen. xvi. 7); but a בְּרֵכָה, a regularly-built pool or tank (2 K. xx. 20; Neh. iii. 15; Eccl. ii. 6). This last word is still retained in the Arabic, as any traveller or reader of travels knows. While Nehemiah calls it a *pool*, Isaiah merely speaks of it as "the waters of Shiloah;" while the New Testament gives κολυμβήθρα, and Josephus πηγή. The Rabbis and Jewish travellers call it a fountain; in which they are sometimes followed by the European travellers of all ages, though more generally they give us piscina, natatoria, and stagnum.

It is the least of all the Jerusalem pools; hardly the sixth part of the *Birket el-Mamilla*; hardly the tenth of the *Birket es-Sultân*, or of the lowest of the three pools of Solomon at *el-Burak*. Yet it is a sacred spot, even to the Moslem; much more to the Jew; for not only from it was the water taken at the Feast of Tabernacles, but the water for the ashes of the red heifer (Dachs's *Talm. Babyl.* p. 380). Jewish tradition makes Gihon and Siloam one (Lightfoot, *Cent. Chor. in Matt.* p. 51; Schwarz, p. 265), as if Gihon were "the bursting forth" (גִּיחַ, to break out), and Siloam the receptacle of the waters "sent.' If this were the case, it might be into Siloam, through one of the many subterranean aqueducts with which Jerusalem abounds, and one of which probably went down the Tyropœon, that Hezekiah turned the waters on the other side of the city, when he "stopped the upper watercourse of Gihon, and brought it straight down to the west side of the city of David" (2 Chr. xxxii. 30).



The rush of water down these conduits is referred to by Jerome ("per terrarum concava et antra saxi durissimi cum magno sonitu venit," *In Is.* viii. 6), as heard in his day, showing that the water was more abundant then than now. The intermittent character of Siloam is also noticed by him; but in a locality perforated by so many aqueducts, and supplied by so many large wells and secret springs (not to speak of the discharge of the great city-baths), this irregular flow is easily accounted for, both by the direct and the siphonic action of the water. How this *natural* intermittency of Siloam could be made identical with the *miraculous* troubling of Bethesda (John v. 4) one does not see. The lack of water in the pool now is no proof that there was not the great abundance of which Josephus speaks (*B. J.* v. 4, § 1): and as to the "sweetness" he speaks of, like the "aquæ dulces" of Virgil (*Georg.* iv. 61), or the Old Testament מָתוֹק (Ex. xv. 25), which is used both in reference to the sweetness of the Marah waters (Ex. xv. 25), and of the "stolen waters" of the foolish woman (Prov. ix. 17), it simply means

Digitized by Google

fresh or pleasant in opposition to bitter (מַיִם: ὑγρός).

The expression in Isaiah, "waters of Shiloah that go softly," seems to point to the slender rivulet, flowing gently, though once very profusely, out of Siloam into the lower breadth of level, where the king's gardens, or "royal paradise," stood, and which is still the greenest spot about the Holy City, reclaimed from sterility into a fair oasis of olive-groves, fig-trees, pomegranates, etc., by the tiny rill which flows out of Siloam. A winter-torrent, like the Kedron, or a swelling river like the Euphrates, carries havoc with it, by sweeping off soil, trees, and terraces; but this Siloam-fed rill flows softly, fertilizing and beautifying the region through which it passes. As the Euphrates is used by the prophet as the symbol of the wasting sweep of the Assyrian king, so Siloam is taken as the type of the calm prosperity of Israel under Messianic rule, when "the desert rejoices and blossoms as the rose." The word softly or secretly (לָאַט) does not seem to refer to the secret transmission of the waters through the tributary viaducts, but, like Ovid's "molles aquæ," "blandæ aquæ," and Catullus' "molle flumen," to the quiet gentleness with which the rivulet steals on its mission of beneficence, through the gardens of the king. Thus "Siloah's brook" of Milton, and "cool Siloam's shady rill," are not mere poetical fancies. The "fountain" and the "pool," and the "rill" of Siloam, are all visible to this day, each doing its old work beneath the high rock of Moriah, and almost beneath the shadow of the Temple wall.

East of the Kedron, right opposite the rough gray slope extending between *Deraj* and *Silwân*, above the kitchen-gardens watered by Siloam which

The Village of *Silwân* (Siloam), and the lower part of the Valley of the Kedron, showing the "King's Gardens," which are watered by the Pool. The background is the highlands of Judah. The view is from a photograph by James Graham, Esq., taken from beneath the S. wall of the Haram.

supply Jerusalem with vegetables, is the village which takes its name from the pool, — *Kefr-Silwân*. At *Deraj* the Kedron is narrow, and the village is very near the fountain. Hence it is to it rather than to the pool that the villagers generally betake themselves for water. For as the Kedron widens considerably in its progress southward, the *Kefr* is at some little distance from the *Birkeh*. This village is unmentioned in ancient times: perhaps it did not exist. It is a wretched place for filth and irregularity; its square hovels all huddled together like the lairs of wild beasts, or rather like the tombs and caves in which savages or demoniacs may be supposed to dwell. It lies near the foot of the third or southern height of Olivet; and in all likelihood marks the spot of the idol-shrines which Solomon built to Chemosh, and Ashtoreth and Milcom. This was "the mount of corruption" (2 K. xxiii. 13), the hill that is before (east; *before* in Hebrew geography means *east*) Jerusalem (1 K. xi. 7); and these "abominations of the Moabites, Zidonians, and Ammonites" were built on "the right hand of the mount," that is, the *southern* part of it. This is the "opprobrious hill" of Milton (*Par. L.* b. i. 403); the "mons offensionis" of the Vulgate and of early travellers, the Μοσθάθ of the Sept. (see Keil *On Kings*); and the Berg des Ærgernisses of German maps. In Ramboux' singular volume of lithographs (Col. 1858) of *Jerusalem and its Holy Places*, in imitation of the antique, there is a sketch of an old monolith tomb in the village of *Silwân*, which few travellers have noticed, but of which De Saulcy has given us both a cut and a description (vol. ii. p 215); setting it down as a relic of Jebusite workmanship. One would like to know more about

his village and about the pedigree of its inhabitants.[a] H. B.

* The rock-cut passage between the Fountain of the Virgin and Siloam was traversed and carefully surveyed by Lieut. Warren. He found two passages leading into it from the northwest, the largest being about 50 feet from the entrance to the pool. It was filled with hard mud, the deposit of centuries, which with much difficulty was dug out and carried through the passage and pool, and up the steps to the outside. At the end of 17 feet he reached a shaft leading upwards for more than 40 feet, with smooth sides, cut out of the solid rock, and averaging 6 feet in length and 4 in width. By constructing a scaffolding with three landings he mounted to the top. In the masonry overhanging it he found an iron ring, through which a rope might have passed, and from this he inferred that the shaft was "the ancient draw-well of Ophel." Connected with it, near the top, he discovered and explored extended passages and chambers cut in the rock, and found glass lamps of curious construction and water-vessels of red pottery, showing that the place had "evidently been used as a refuge." The other passage, 40 feet from the entrance, extended but 9 feet. Lieut. W. also excavated 4 feet under the lowest step of the Virgin's Fount, to ascertain the source of supply, and reached a hard substance, "either masonry or rock," but in that depth of water could proceed no further. "The other point of entrance of the water is a deep hole in the middle of the pool, at which nothing can be done." Warren is inclined to the belief, contrary to Barclay, that there is a connection between the *Hammâm esh-Shefa* and the Virgin's Fount; but the point is not yet ascertained. S. W.

**SILO'AM, TOWER IN.** ('Ο πύργος ἐν τῷ Σιλωάμ, Luke xiii. 4.) Of this we know nothing definitely beyond these words of the Lord. Of the tower or its fall no historian gives us any account; and whether it was a tower in connection with the pool, or whether "in Siloam" refers to the valley near, we cannot say. There were fortifications hard by, for of Jotham we read, "on the wall of Ophel he built much" (2 Chr. xxvii. 3); and of Manasseh that "he compassed about Ophel" (*ibid.* xxxiii. 14); and, in connection with Ophel, there is mention made of "a tower *that lieth out*" (Neh. iii. 26); and there is no unlikelihood in connecting this *projecting* tower with the tower in Siloam, while one may be almost excused for the conjecture that its *projection* was the cause of its ultimate *fall*. H. B.

**SILVA'NUS.** [SILAS.]

**SILVER** (כֶּסֶף, *ceseph*). In very early times, according to the Bible, silver was used for ornaments (Gen. xxiv. 53), for cups (Gen. xliv. 2), for the sockets of the pillars of the Tabernacle (Ex. xxvi. 19, &c.), their hooks and fillets, or rods (Ex. xxvii. 10), and their capitals (Ex. xxxviii. 17); for dishes, or chargers, and bowls (Num. vii. 13), trumpets (Num. x. 2), candlesticks (1 Chr. xxviii. 15), tables (1 Chr. xxviii. 16), basins (1 Chr. xxviii. 17), chains (Is. xl. 19), the settings of ornaments (Prov. xxv. 11), studs (Cant. i. 11), and crowns (Zech. vi. 11). Images for idolatrous worship were made of silver or overlaid with it (Ex. xx. 23; Hos. xiii. 2; Hab. ii. 19; Bar. vi. 39 [or Epist. of Jer. 39]), and the manufacture of silver shrines for Diana was a trade in Ephesus (Acts xix. 24) [DEMETRIUS.] But its chief use was as a medium of exchange, and throughout the O. T. we find *ceseph*, "silver," used for money, like the Fr. *argent*. To this general usage there is but one exception. (See METALS, iii. 1910.) Vessels and ornaments of gold and silver were common in Egypt in the times of Osirtasen I. and Thothmes III., the contemporaries of Joseph and Moses (Wilkinson, *Anc. Eg.* iii. 225). In the Homeric poems we find indications of the constant application of silver to purposes of ornament and luxury. It was used for basins (*Od.* i. 137, iv. 53), goblets (*Il.* xxiii. 741), baskets (*Od.* iv. 125), coffers (*Il.* xviii. 413), sword-hilts (*Il.* i. 219; *Od.* viii. 404), door-handles (*Od.* i. 442), and clasps for the greaves (*Il.* iii. 331). Door-posts (*Od.* vii. 89) and lintels (*Od.* vii. 90) glittered with silver ornaments; baths (*Od.* iv. 128), tables (*Od.* x. 355), bows (*Il.* i. 49, xxiv. 605), scabbards (*Il.* xi. 31), sword-belts (*Il.* xviii. 598), belts for the shield (*Il.* xviii. 480), chariot-poles (*Il.* v. 729) and the naves of wheels (*Il.* v. 729) were adorned with silver; women braided their hair with silver-thread (*Il.* xvii. 52), and cords appear to have been made of it (*Od.* x. 24); while we constantly find that swords (*Il.* ii. 45, xxiii. 807) and sword-belts (*Il.* xi. 237), thrones, or chairs of state (*Od.* viii. 65), and bedsteads (*Od.* xxiii. 200) were studded with silver. Thetis of the silver feet was probably so called from the silver ornaments on her sandals (*Il.* i. 538). The practice of overlaying silver with gold, referred to in Homer (*Od.* vi. 232, xxiii. 159), is nowhere mentioned in the Bible, though inferior materials were covered with silver (Prov. xxvi. 23).

Silver was brought to Solomon from Arabia (2 Chr. ix. 14) and from Tarshish (2 Chr. ix. 21), which supplied the markets of Tyre (Ez. xxvii. 12). From Tarshish it came in the form of plates (Jer.

---

[a] * The later publication of the *Ordnance Survey of Jerusalem* (Lond. 1865) enables us to satisfy in part this curiosity. "Entering Siloam on the north, there is on the left a high cliff, which bears evident signs of having been worked as a quarry; on the right hand side is the curious monolith with the heavy Egyptian cornice; the exterior of the cliff is quite flat, but the interior is sloping like a tent; in front is a small cistern. The present village of Siloam occupies the site of an old quarry; the houses are often made simply by the walling up of the excavation, and sometimes they cling on the scarped face of the rock: one excavation was of considerable extent, and similar in character to that near the Damascus gate, though not nearly so large; several pillars were left to sustain the roof. The stone from this quarry is 'malaki' of a very soft kind; higher up, by the monolith, a 'missal,' and the upper bed of 'malaki' are found. A large portion of the quarrying at Siloam has been in the 'missal' beds, and throughout the village the deep vertical cuts made by the quarrymen may be seen exactly corresponding to those found in all the quarries; steps cut in the rock lead to different parts of the village; first made for the convenience of the workmen, they have now been made to serve as streets. There are a few tombs in the village, but not as many as has generally been supposed. The state of the houses and streets was worse than anything seen about Jerusalem, and they were swarming with vermin; still the village is highly interesting, and deserves more notice from travellers than has generally been bestowed upon it" (p. 64 f.).

For some very recent discoveries which seem to connect Siloam with ZOHELETH see in the latter name (Amer. ed.). H

v. 9), like those on which the sacred books of the Singhalese are written to this day (Tennent's *Ceylon*, ii. 102). The silver bowl given as a prize by Achilles was the work of Sidonian artists (*Il.* xxiii. 743; comp. *Od.* iv. 618). In Homer (*Il.* ii. 857), Alybe is called the birthplace of silver, and was probably celebrated for its mines. But Spain appears to have been the chief source whence silver was obtained by the ancients. [MINES, iii. 1939 *b.*] Possibly the hills of Palestine may have afforded some supply of this metal. "When Volney was among the Druses, it was mentioned to him that an ore affording silver and lead had been discovered on the declivity of a hill in Lebanon" (Kitto, *Phys. Hist. of Palestine*, p. 73).

For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews, see the articles LEAD and MINES. The whole operation of mining is vividly depicted in Job xxviii. 1–11; and the process of purifying metals is frequently alluded to (Ps. xii. 6; Prov xxv. 4), while it is described with some minuteness in Ez. xxii. 20–22. Silver mixed with alloy is referred to in Jer. vi. 30, and a finer kind, either purer in itself, or more thoroughly purified, is mentioned in Prov. viii. 19. W. A. W.

**SILVERLINGS** (כֶּסֶף: *σίκλος*: *argenteus, sicus* understood), a word used once only in the A. V. (Is. vii. 23), as a translation of the Hebrew word *ceseph*, elsewhere rendered "silver" or "money." [PIECE OF SILVER.] R. S. P.

**SIMALCUE** ([Rom.] Εἰμαλκουαί; [Sin. Ιμαλκουε: Alex.] Σιμαλκουη; [Comp. Σιμαλκουέ:] *Emalchuel, Malchus*: Μάλχος, Joseph.), an Arabian chief who had charge of Antiochus, the young son of Alexander Balas, before he was put forward by Tryphon as a claimant to the Syrian throne (1 Macc. xi. 39). [ANTIOCHUS VI., vol. i. p. 117.] According to Diodorus (*Eclog.* xxxii. 1) the name of the chief was Diocles, though in another place (*Frag.* xxi. Müller) he calls him Jamblichus. The name evidently contains the element *Melek*, "king," but the original form is uncertain comp. Grotius and Grimm on 1 Macc. *l. c.*).

B. F. W.

**SIMEON** (שִׁמְעוֹן [*a hearing, listening*]: Συμεών; [in 1 Chr. iv. 24, Rom. Σεμεών (misprint?) Vat. Alex. here as elsewhere Συμεων):] *Simeon*). The second of Jacob's sons by Leah. His birth is recorded in Gen. xxix. 33, and in the explanation there given of the name, it is derived from the root *shamá'*, to hear[a] — "'Jehovah hath heard (*shâma'*) that I was hated.' . . . . and she called his name Shime'on."[b] This metaphor is not carried on (as in the case of some of the other names) in Jacob's Blessing; and in that of Moses all mention of Simeon is omitted.

The first group of Jacob's children consists, besides Simeon, of the three other sons of Leah — Reuben, Levi, Judah. With each of these Simeon is mentioned in some connection. "As Reuben and Simeon are mine," says Jacob, "so shall Joseph's sons Ephraim and Manasseh be mine" (Gen xlviii. 5). With Levi, Simeon was associated in the massacre of the Shechemites (xxxiv. 25) — a deed which drew on them the remonstrance of their father (ver. 30), and perhaps[c] also his dying curse (xlix. 5–7). With Judah the connection was drawn still closer. He and Simeon not only "went up" together, side by side, in the forefront of the nation, to the conquest of the south of the Holy Land (Judg. i. 3, 17), but their allotments lay together in a more special manner than those of the other tribes, something in the same manner as Benjamin and Ephraim. Besides the massacre of Shechem — a deed not to be judged of by the standards of a more civilized and less violent age, and, when fairly estimated, not altogether discreditable to its perpetrators — the only personal incident related of Simeon is the fact of his being selected by Joseph, without any reason given or implied, as the hostage for the appearance of Benjamin (Gen. xlii. 19, 24, 36; xliii. 23).

These slight traits are characteristically amplified in the Jewish traditions. In the Targum Pseudo-jonathan it is Simeon and Levi who are the enemies of the lad Joseph. It is they who counsel his being killed, and Simeon binds him before he is lowered into the well at Dothan. (See further details in Fabricius, *Cod. Pseud.* i. 535.) Hence Joseph's selection of him as the hostage, his binding and incarceration. In the Midrash the strength of Simeon is so prodigious that the Egyptians are unable to cope with him, and his binding is only accomplished at length by the intervention of Manasseh, who acts as the house-steward and interpreter of Joseph. His powers are so great that at the mere roar of his voice 70 valiant Egyptians fall at his feet and break their teeth (Weil, *Bib. Leg.* 88). In the "Testament of Simeon" his fierceness and implacability are put prominently forward, and he dies warning his children against the indulgence of such passions (Fabricius, *Cod. Pseudep.* i. 533–543).

The chief families of the tribe are mentioned in the lists of Gen. xlvi. (10), in which one of them, bearing the name of Shaul (Saul), is specified as "the son of the Canaanitess" — Num. xxvi. (12–14), and 1 Chr. iv. (24–43). In the latter passage (ver. 27) it is mentioned that the family of one of the heads of the tribe "had not many children, neither did they multiply like to the children of Judah." This appears to have been the case not only with one family but with the whole tribe. At the census at Sinai Simeon numbered 59,300 fighting men (Num. i. 23). It was then the most numerous but two, Judah and Dan alone exceeding it; but when the second census was taken, at Shittim, the numbers had fallen to 22,200, and it was the weakest of all the tribes. This was no doubt partly due to the recent mortality following the idolatry of Peor, in which the tribe of Simeon appears to have taken a prominent share, but there must have been other causes which have escaped mention.

The connection between Simeon and Levi im-

[a] Fürst (*Handwb.* ii. 472) inclines to the interpretation "famous" (*ruhmreicher*). Redslob (*Alttest. Namen*, 93), on the other hand, adopting the Arabic root سمع, considers the name to mean "sons of bondage" or "bondmen."

[b] The name is given in this its more correct form in the A. V. in connection with a later Israelite in Ezr. x. 31.

[c] It is by no means certain that Jacob's words allude to the transaction at Shechem. They appear rather to refer to some other act of the brothers which has escaped direct record.

Digitized by Google

sled in the Blessing of Jacob (Gen. xlix. 5–7), has been already adverted to. The passage relating to them is thus rendered: —

Shimeon and Levi are brethren,[a]
Instruments of violence are their machinations (or their[b] swords).
Into their secret council come not my soul!
Unto their assembly join not mine honor!
For in their wrath they slew a man,
And in their self-will they houghed an[c] ox.
Cursed be their wrath, for it is fierce,
And their anger, for it is cruel!
I will divide them in Jacob,
And scatter them in Israel.

The terms of this denunciation seem to imply a closer bond of union between Simeon and Levi, and more violent and continued exploits performed under that bond, than now remain on record. The expressions of the closing lines also seem to necessitate a more advanced condition of the nation of Israel than it could have attained at the time of the death of the father of the individual patriarchs. Taking it however to be what it purports, an actual prediction by the individual Jacob (and, in the present state of our knowledge, however doubtful this may be, no other conclusion can be safely arrived at), it has been often pointed out how differently the same sentence was accomplished in the cases of the two tribes. Both were "divided" and "scattered." But how differently! The dispersion of the Levites arose from their holding the post of honor in the nation, and being spread, for the purposes of education and worship, broadcast over the face of the country. In the case of Simeon the dispersion seems to have arisen from some corrupting element in the tribe itself, which first reduced its numbers, and at last drove it from its allotted seat in the country — not, as Dan, because it could not, but because it would not stay — and thus in the end caused it to dwindle and disappear entirely.

The non-appearance of Simeon's name in the Blessing of Moses (Deut. xxxiii. 6[d]) may be explained in two ways. On the assumption that the Blessing was actually pronounced in its present form by Moses, the omission may be due to his displeasure at the misbehavior of the tribe at Shittim. On the assumption that the Blessing, or this portion of it, is a composition of later date, then it may be due to the fact of the tribe having by that time vanished from the Holy Land. The latter of these is the explanation commonly adopted.

During the journey through the wilderness Simeon was a member of the camp which marched on the south side of the Sacred Tent. His associates were Reuben and Gad — not his whole brothers, but the sons of Zilpah, Leah's maid. The head of the tribe at the time of the Exodus, was Shelumiel, son of Zurishaddai (Num. i. 6), ancestor of its one heroine, the intrepid Judith. [SALASADAI.] Among the spies Simeon was represented by Shaphat son of Hori, *i. e.* Horite, a name which perhaps, like the "Canaanitess" of the earlier list, reveals a trace of the lax tendencies which made the Simeonites an easy prey to the licentious rites of Peor, and ultimately destroyed the permanence of the tribe. At the division of the land his representative was Shemuel,[e] son of Ammihud.

The connection between Judah and Simeon already mentioned seems to have begun with the Conquest. Judah and the two Joseph-brethren were first served with the lion's share of the land; and then, the Canaanites having been sufficiently subdued to allow the Sacred Tent to be established without risk in the heart of the country, the work of dividing the remainder amongst the seven inferior tribes was proceeded with (Josh. xviii. 1–6). Benjamin had the first turn, then Simeon (xix. 1). By this time Judah had discovered that the tract allotted to him was too large (xix. 9), and also too much exposed on the west and south for even his great powers.[f] To Simeon accordingly was allotted a district out of the territory of his kinsman, on its southern frontier,[g] which contained eighteen or nineteen cities, with their villages, spread round the venerable well of Beer-sheba (Josh. xix. 1–8; 1 Chr. iv. 28–33). Of these places, with the help of Judah, the Simeonites possessed themselves (Judg. i. 3, 17); and here they were found, doubtless by Joab, residing in the reign of David (1 Chr. iv. 31). During his wandering life David must have been much amongst the Simeonites. In fact three of their cities are named in the list of those to which he sent presents of the spoil of the Amalekites, and one (Ziklag) was his own private[h] property. It is therefore remarkable that the numbers of Simeon and Judah who attended his installation as king at Hebron should have been so much below those of the other tribes (1 Chr. xii. 23–37). Possibly it is due to the fact that the event was taking place in the heart of their own territory, at Hebron. This, however, will not account for the curious fact that the warriors of Simeon (7,100) were more[i] numerous than those of Judah (6,800). After David's removal to Jerusalem, the head of the tribe was Shephatiah son of Maachah (1 Chr. xxvii. 16).

What part Simeon took at the time of the divis-

---

[a] The word is אַחִים, meaning "brothers" in the fullest, strictest sense. In the Targ. Pseudojon. it is rendered *achin telamin*, "brothers of the womb."

[b] Identified by some (Jerome, Talmud, etc.) with the Greek μάχαιρα. The "habitations" of the A. V. is derived from Kimchi, but is not countenanced by later scholars.

[c] A. V. "digged down a wall;" following Onkelos, who reads שׁוּרָא = חוֹרָא, "a town, a wall."

[d] The Alexandrine MS. of the LXX. adds Simeon's name in this passage — "Let Reuben live and not die, and let Simeon be few in number." In so doing it suffers not only from the Vatican MS. but also from the Hebrew text, to which this MS. usually adheres more closely than the Vatican does. The insertion is adopted in the Complutensian and Aldine editions of the LXX but does not appear in any of the other versions.

[e] It is a curious coincidence, though of course nothing more, that the scanty records of Simeon should disclose two names so illustrious in Israelite history as Saul and Samuel.

[f] This is a different account to that supplied in Judg. i. The two are entirely distinct documents. That of Judges, from its fragmentary and abrupt character, has the appearance of being the more ancient of the two.

[g] "The parts of Idumæa which border on Arabia and Egypt" (Joseph. *Ant.* v. 1, § 22).

[h] It had been first taken from Simeon by the Philistines (1 Sam. xxvii. 6), if indeed he ever got possession of it.

[i] Possibly because the Simeonites were warriors and nothing else, instead of husbandmen, etc., like the men of Judah.

.on of the kingdom we are not told. The tribe was probably not in a sufficiently strong or compact condition to have shown any northern tendencies, even had it entertained them. The only thing which can be interpreted into a trace of its having taken any part with the northern kingdom are the two casual notices of 2 Chr. xv. 9 and xxxiv. 6, which appear to imply the presence of Simeonites there in the reigns of Asa and Josiah. But this may have been merely a manifestation of that vagrant spirit which was a cause or a consequence of the prediction ascribed to Jacob. And on the other hand the definite statement of 1 Chr. iv. 41–43 (the date of which by Hezekiah's reign seems to show conclusively its southern origin) proves that at that time there were still some of them remaining in the original seat of the tribe, and actuated by all the warlike lawless spirit of their progenitor. This fragment of ancient chronicle relates two expeditions in search of more eligible territory. The first, under thirteen chieftains, leading doubtless a large body of followers, was made against the Hamites and the Mehunim,[a] a powerful tribe of Bedouins, "at the entrance of Gedor at the east side of the ravine." The second was smaller, but more adventurous. Under the guidance of four chiefs a band of 500 undertook an expedition against the remnant of Amalek, who had taken refuge from the attacks of Saul or David, or some later pursuers, in the distant fastnesses of Mount Seir. The expedition was successful. They smote the Amalekites and took possession of their quarters; and they were still living there after the return of the Jews from Captivity, or whenever the First Book of Chronicles was edited in its present form.

The audacity and intrepidity which seem to have characterized the founder of the tribe of Simeon are seen in their fullest force in the last of his descendants of whom there is any express mention in the Sacred Record. Whether the book which bears her name be a history or a historic romance, JUDITH will always remain one of the most prominent figures among the deliverers of her nation. Bethulia would almost seem to have been a Simeonite colony. Ozias, the chief man of the city, was a Simeonite (Jud. vi. 15), and so was Manasses the husband of Judith (viii. 2). She herself had the purest blood of the tribe in her veins. Her genealogy is traced up to Zurishaddai (in the Greek form of the present text Salasadai, viii. 1), the head of the Simeonites at the time of their greatest power. She nerves herself for her tremendous exploit by a prayer to "the Lord God of her father Simeon" and by recalling in the most characteristic manner and in all their details the incidents of the massacre of Shechem (ix. 2).

Simeon is named by Ezekiel (xlviii. 25) and the uthor of the Book of the Revelation (vii. 7) in their atalogues of the restoration of Israel. The former removes the tribe from Judah and places it by the side of Benjamin.

2. (Συμεών: *Simeon.*) A priest of the family of Joarib — or in its full form JEHOIARIB — one of the ancestors of the Maccabees (1 Macc. ii. 1).

3. Son of Juda and father of Levi in the genealogy of our Lord (Luke iii. 30). The Vat. MS. gives the name Σιμεών. [This is an error. — A.]

4. [*Simon.*] That is, Simon Peter (Acts xv. 14). The use of the Hebrew form of the name in this place is very characteristic of the speaker in whose mouth it occurs. It is found once again (2 Pet. i. 1), though here there is not the same unanimity in the MSS. Lachmann, with B, here adopts "Simon." G.

5. [*Simeon.*] A devout Jew inspired by the Holy Ghost, who met the parents of our Lord in the Temple, took Him in his arms, and gave thanks for what he saw and knew of Jesus (Luke ii. 25–35). In the apocryphal Gospel of Nicodemus, Simeon is called a high-priest, and the narrative of our Lord's descent into Hell is put into the mouths of Charinus and Lenthius, who are described as two sons of Simeon, who rose from the grave after Christ's resurrection (Matt. xxvii. 53) and related their story to Annas, Caiaphas, Nicodemus, Joseph, and Gamaliel.

Rabban Simeon, whose grandmother was of the family of David, succeeded his father Hillel as president of the Sanhedrim about A. D. 13 (Otho, *Lexicon Rabb.* p. 697), and his son Gamaliel was the Pharisee at whose feet St. Paul was brought up (Acts xxii. 3). A Jewish writer specially notes that no record of this Simeon is preserved in the Mishna (Lightfoot, *Horæ Heb.* Luke ii. 25). It has been conjectured that he (Prideaux, *Connection*, anno 37, Michaelis) or his grandson (Schöttgen, *Horæ Heb.* Luke ii. 25) of the same name, may be the Simeon of St. Luke. In favor of the identity it is alleged that the name, residence, time of life, and general character are the same in both cases; that the remarkable silence of the Mishna, and the counsel given by Gamaliel (Acts v. 38), countenance a suspicion of an inclination on the part of the family of the Rabban towards Christianity. On the other hand, it is argued that these facts fall far short of historical proof; and that Simeon was a very common name among the Jews, that St. Luke would never have introduced so celebrated a character as the President of the Sanhedrim merely as "a man in Jerusalem," and that his son Gamaliel, after all, was educated as a Pharisee. The question is discussed in Witsius, *Miscellanea Sacra*, i. 21, §§ 14–16. See also Wolf, *Curæ Philologica*, Luke ii. 25, and *Bibl. Hebr.* ii. 682. W. T. B.

* It is customary to speak of Simeon (Συμεών) as aged; he may have been so, though the proof of this is by no means so explicit (Luke ii. 25, 29) as in the case of Zacharias (Luke i. 18) and of Anna the prophetess (ii. 36). Simeon's language, "Now lettest thou thy servant depart in peace" (νῦν ἀπολύεις τὸν δοῦλόν σου), is simply declarative, and not a prayer as some mistake it to be. The words which the Spirit prompted Simeon to utter, as he blessed the child Jesus and the parents, are remarkable for the breadth of Messianic view which they disclose. In his announcement of the universality of Christ's mission as destined to bless Gentiles as well as Jews, he seems to have gone forward as by a single step to the full teaching of the apostolic period (ii. 31, 32). There is a noticeable difference between his degree of illumination and that apparent in the songs of Elizabeth, Mary, and Zacharias. It has been justly remarked that they evince a rhetorical and psychological diversity which stamps as authentic this preliminary history of Christ in which they are found Luke only records these discourses. H

**SIMON.** [Σιμών: *Simon.*] A name of frequent occurrence in Jewish history in the post-Babylonian period. It is doubtful whether it was borrowed from the Greeks, with whom it was not uncommon, or whether it was a contraction of the Hebrew Shimeon. That the two names were regarded as identical appears from 1 Macc. ii. 65. Perhaps the Hebrew name was thus slightly altered in order to render it identical with the Greek.

1. Son of Mattathias. [MACCABEES, § 4, vol. ii. p. 1711.]

2. Son of Onias the high-priest (*ἱερεὺς ὁ μέγας*), whose eulogy closes the "praise of famous men" in the book of Ecclesiasticus (ch. l.). [ECCLESIASTICUS, vol. i. p. 651.] Fritzsche, whose edition of Ecclesiasticus (*Exeg. Handb.*) has appeared (1860) since the article referred to was written, maintains the common view that the reference is to Simon II., but without bringing forward any new arguments to support it, though he strangely underrates the importance of Simon I. (the Just). Without laying undue stress upon the traditions which attached to this name (Herzfeld, *Gesch. Isr.* i. 195), it is evident that Simon the Just was popularly regarded as closing a period in Jewish history, as the last teacher of "the Great Synagogue." Yet there is in fact a doubt to which Simon the title "the Just" was given. Herzfeld (i. 377, 378) has endeavored to prove that it belongs to Simon II., and not to Simon I., and in this he is followed by Jost (*Gesch. d. Judenth.* i. 95). The later Hebrew authorities, by whose help the question should be settled, are extremely unsatisfactory and confused (Jost, 110, &c.); and it appears better to adhere to the express testimony of Josephus, who identifies Simon I. with Simon the Just (*Ant.* xii. 2, § 4, &c.), than to follow the Talmudic traditions, which are notoriously untrustworthy in chronology. The legends are connected with the title, and Herzfeld and Jost both agree in supposing that the reference in Ecclesiasticus is to Simon known as "the Just," though they believe this to be Simon II. (compare, for the Jewish anecdotes, Raphall's *Hist. of Jews*, i. 115–124; Prideaux, *Connection*, ii. 1).

3. "A governor of the Temple" in the time of Seleucus Philopator, whose information as to the treasures of the Temple led to the sacrilegious attempt of Heliodorus (2 Macc. iii. 4, &c.). After this attempt failed, through the interference of the high-priest Onias, Simon accused Onias of conspiracy (iv. 1, 2), and a bloody feud arose between their two parties (iv. 3). Onias appealed to the king, but nothing is known as to the result or the later history of Simon. Considerable doubt exists as to the exact nature of the office which he held (*προστάτης τοῦ ἱεροῦ*, 2 Macc. iii. 4). Various interpretations are given by Grimm (*Exeg. Handb.* ad loc.). The chief difficulty lies in the fact that Simon is said to have been of "the tribe of Benjamin" (2 Macc. iii. 4), while the earlier "ruler of the house of God" (*ὁ ἡγούμενος οἴκου τοῦ θεοῦ* (*κυρίου*), 1 Chr. ix. 11; 2 Chr. xxxi. 13; Jer. xx. 1) seems to have been always a priest, and the "captain of the Temple" (*στρατηγὸς τοῦ ἱεροῦ*, Luke xxii. 4, with Lightfoot's note; Acts iv. 1, v. 24, 26) and the keeper of the treasures (1 Chr. xxvi. 24; 2 Chr. xxxi. 12) must have been at least Levites. Herzfeld (*Gesch. Isr.* i. 218) conjectures that *Benjamin* is an error for *Minjamin*, the head of a priestly house (Neh. xii. 5, 17). In support of this view it may be observed that Menelaus, the usurping high-priest, is said to have been a brother of Simon (2 Macc. iv. 23), and no intimation is anywhere given that he was not of priestly descent. At the same time the corruption (if it exist) dates from an earlier period than the present Greek text, for "tribe" (*φυλή*) could not be used for "family" (*οἶκος*). The various reading *ἀγορανομίας* ("regulation of the market") for *παρανομίας* ("disorder," 2 Macc. iii. 4), which seems to be certainly correct, points to some office in connection with the supply of the sacrifices; and probably Simon was appointed to carry out the design of Seleucus, who (as is stated in the context) had undertaken to defray the cost of them (2 Macc. iii. 3). In this case there would be less difficulty in a Benjamite acting as the agent of a foreign king, even in a matter which concerned the Temple-service. B. F. W.

4. SIMON THE BROTHER OF JESUS. — The only undoubted notice of this Simon occurs in Matt. xiii. 55, Mark vi. 3, where, in common with James, Joses, and Judas, he is mentioned as one of the "brethren" of Jesus. He has been identified by some writers with Simon the Canaanite, and still more generally with Symeon who became bishop of Jerusalem after the death of James, A. D. 62 (Euseb. *H. E.* iii. 11, iv. 22), and who suffered martyrdom in the reign of Trajan at the extreme age of 120 years (Hegesippus, ap. Euseb. *H. E.* iii. 32), in the year 107, or according to Burton (*Lectures*, ii. 17, *note*) in 104. The former of these opinions rests on no evidence whatever, nor is the latter without its difficulties. For in whatever sense the term "brother," is accepted — a vexed question which has been already amply discussed under BROTHER and JAMES, — it is clear that neither Eusebius nor the author of the so-called *Apostolical Constitutions* understood Symeon to be the brother of James, nor consequently the "brother" of the Lord. Eusebius invariably describes James as "the brother" of Jesus (*H. E.* i. 12, ii. 1, *al.*), but Symeon as the son of Clopas, and the cousin of Jesus (iii. 11, iv. 22), and the same distinction is made by the other author (*Const. Apost.* vii. 46).

5. SIMON THE CANAANITE, one of the Twelve Apostles (Matt. x. 4; Mark iii. 18), otherwise described as Simon Zelotes (Luke vi. 15; Acts i. 13). The latter term (*ζηλώτης*), which is peculiar to Luke, is the Greek equivalent for the Chaldee term[a] preserved by Matthew and Mark (*καναναίτης*, as in *text. recept.*, or *κανανίτης*, as in the Vulg., *Cananæus*, and in the best modern editions). Each of these equally points out Simon as belonging to the faction of the Zealots, who were conspicuous for their fierce advocacy of the Mosaic ritual. The supposed references to Canaan (A. V.) or to Cana (Luther's version) are equally erroneous. [CANAANITE.] The term *κανανίτης* appears to have survived the other as the distinctive surname of Simon (*Const. Apost.* vi. 14, viii. 27). He has been frequently identified with Simon the brother of Jesus: but Eusebius (*H. E.* iii. 11) clearly distinguishes between the Apostles and the relations of Jesus. Still less likely is it that he was identical with Symeon, the second bishop of Jerusalem, as stated by Sophronius (*App. ad Hieron. Catal.*). Simon the Canaanite is reported, on the doubtful authority of the Pseudo-Dorotheus and of Nicephorus Callistus, to have preached in Egypt, Cyrene, and Mauritania (Burton's *Lectures*, i. 333, *note*), and,

[a] קַנָּאִי.

Digitized by Google

on the equally doubtful authority of an annotation preserved in an original copy of the *Apostolical Constitutions* (viii. 27), to have been crucified in Judæa in the reign of Domitian.

6. SIMON OF CYRENE. — A Hellenistic Jew, born at Cyrene on the north coast of Africa, who was present at Jerusalem at the time of the crucifixion of Jesus, either as an attendant at the feast (Acts ii. 10), or as one of the numerous settlers at Jerusalem from that place (Acts vi. 9). Meeting the procession that conducted Jesus to Golgotha, as he was returning from the country, he was pressed into the service (ἠγγάρευσαν, a military term) to bear the cross (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26), when Jesus himself was unable to bear it any longer (comp. John xix. 17). Mark describes him as the father of Alexander and Rufus, perhaps because this was the Rufus known to the Roman Christians (Rom. xvi. 13), for whom he more especially wrote. The Basilidian Gnostics believed that Simon suffered in lieu of Jesus (Burton's *Lectures*, ii. 64).

7. SIMON THE LEPER. — A resident at Bethany, distinguished as "the leper," not from his having leprosy at the time when he is mentioned, but at some previous period. It is not improbable that he had been miraculously cured by Jesus. In his house Mary anointed Jesus preparatory to his death and burial (Matt. xxvi. 6, &c.; Mark xiv. 3, &c.; John xii. 1, &c.).[a] Lazarus was also present as one of the guests, while Martha served (John xii. 2): the presence of the brother and his two sisters, together with the active part the latter took in the proceedings, leads to the inference that Simon was related to them: but there is no evidence of this, and we can attach no credit to the statement that he was their father, as reported on apocryphal authority by Nicephorus (*H. E.* i. 27), and still less to the idea that he was the husband of Mary. Simon the Leper must not be confounded with Simon the Pharisee mentioned in Luke vii. 40.

8. SIMON MAGUS. — A Samaritan living in the Apostolic age, distinguished as a sorcerer or "magician," from his practice of magical arts (μαγεύων, Acts viii. 9). His history is a remarkable one: he was born at Gitton,[b] a village of Samaria (Justin Mart. *Apol.* i. 26), identified with the modern *Kuryet Jit*, near *Nâbulus* (Robinson's *Bibl. Res.* ii. 308, *note*). He was probably educated at Alexandria (as stated in *Clement. Hom.* ii. 22), and there became acquainted with the eclectic tenets of the Gnostic school. Either then or subsequently he was a pupil of Dositheus, who preceded him as a teacher of Gnosticism in Samaria, and whom he supplanted with the aid of Cleobius (*Constit. Apostol.* vi. 8). He is first introduced to us in the Bible as practicing magical arts in a city of Samaria, perhaps Sychar (Acts viii. 5; comp. John iv. 5), and with such success, that he was pronounced to be "the power of God which is called great"[c] (Acts viii. 10). The preaching and miracles of Philip having excited his observation, he became one of his disciples, and received baptism at his hands. Subsequently he witnessed the effect produced by the imposition of hands, as practiced by the Apostles Peter and John, and, being desirous of acquiring a similar power for himself, he offered a sum of money for it. His object evidently was to apply the power to the prosecution of magical arts. The motive and the means were equally to be reprobated; and his proposition met with a severe denunciation from Peter, followed by a petition on the part of Simon, the tenor of which bespeaks terror but not penitence (Acts viii. 9–24). The memory of his peculiar guilt has been perpetuated in the word *simony*, as applied to all traffic in spiritual offices. Simon's history, subsequently to his meeting with Peter, is involved in difficulties. Early Church historians depict him as the pertinacious foe of the Apostle Peter, whose movements he followed for the purpose of seeking encounters, in which he was signally defeated. In his journeys he was accompanied by a female named Helena, who had previously been a prostitute at Tyre, but who was now elevated to the position of his ἔννοια[d] or divine intelligence (Justin Mart. *Apol.* i. 26; Euseb. *H. E.* ii. 13). His first encounter with Peter took place at Cæsarea Stratonis (according to the *Constitutiones Apostolicæ*, vi. 8), whence he followed the Apostle to Rome. Eusebius makes no mention of this first encounter, but represents Simon's journey to Rome as following immediately after the interview recorded in Scripture (*H. E.* ii. 14); but his chronological statements are evidently confused; for in the very same chapter he states that the meeting between the two at Rome took place in the reign of Claudius, some ten years after the events in Samaria. Justin Martyr, with greater consistency, represents Simon as having visited Rome in the reign of Claudius, and omits all notice of an encounter with Peter. His success there was so great that he was deified, and a statue was erected in his honor, with the inscription "Simoni Deo Sancto"[e] (*Apol.* i. 26, 56)

---

[a] On the chronological difficulty relating to the time of the feast in Simon's house see vol. ii. p. 1372, note a (Amer. ed.). H.

[b] Some doubt has been thrown on Justin's statement from the fact that Josephus (*Ant.* xx. 7, § 2) mentions a reputed magician of the same name and about the same date, who was born in Cyprus. It has been suggested that Justin borrowed his information from this source, and mistook Citium, a town of Cyprus, for Gitton. If the writers had respectively used the gentile forms Κιτιεύς and Γιττιεύς, the similarity would have favored such an idea. But neither does Josephus mention Citium, nor yet does Justin use the gentile form. It is far more probable that Josephus would be wrong than Justin, in any point respecting Samaria.

[c] The A. V. omits the word καλουμένη, and renders the words "the great power of God." But this is to lose the whole point of the designation. The Samaritans described the angels as δυνάμεις, גבורים, *i. e.* uncreated influences proceeding from God (Gieseler, *Eccl. Hist.* i. 48, note 6). They intended to distinguish Simon from such an order of beings by adding the words "which is called great," meaning thereby the source of all power, in other words, the Supreme Deity. Simon was recognized as the incarnation of this power. He announced himself as in a special sense "some great one" (Acts viii. 9); or to use his own words (as reported by Jerome, on Matt. xxiv. 5), "Ego sum sermo Dei, ego sum speciosus, ego Paracletus, ego Omnipotens, ego omnia Dei."

[d] In the ἔννοια, as embodied in Helena's person, we recognize the dualistic element of Gnosticism, derived from the Manichean system. The Gnostics appear to have recognized the δύναμις and the ἔννοια, as the two original principles from whose junction all beings emanated. Simon and Helena were the incarnations in which these principles resided.

[e] Justin's authority has been impugned in respect to this statement, on the ground that a tablet was discovered in 1574 on the *Tiberina insula*, which answers

Digitized by Google

The above statements can be reconciled only by assuming that Simon made two expeditions to Rome, the first in the reign of Claudius, the second, in which he encountered Peter, in the reign of Nero,[a] about the year 68 (Burton's *Lectures*, i. 233, 318): and even this takes for granted the disputed fact of St. Peter's visit to Rome. [PETER.] His death is associated with the meeting in question: according to Hippolytus, the earliest authority on the subject, Simon was buried alive at his own request, in the confident assurance that he would rise again on the third day (*Adv. Hær.* vi. 20). According to another account, he attempted to fly in proof of his supernatural power; in answer to the prayers of Peter, he fell and sustained a fracture of his thigh and ankle-bones (*Constitut. Apostol.* ii. 14, vi. 9); overcome with vexation, he committed suicide (Arnob. *Adv. Gent.* ii. 7). Whether this statement is confirmed, or, on the other hand weakened, by the account of a similar attempt to fly recorded by heathen writers (Sueton. *Ner.* 12; Juv. *Sat.* iii. 79), is uncertain. Simon's attempt may have supplied the basis for this report, or this report may have been erroneously placed to his credit. Burton (*Lectures*, i. 235) rather favors the former alternative. Simon is generally pronounced by early writers to have been the founder of heresy. It is difficult to understand how he was guilty of heresy in the proper sense of the term, inasmuch as he was not a Christian: perhaps it refers to his attempt to combine Christianity with Gnosticism. He is also reported to have forged works professing to emanate from Christ and his disciples (*Constitut. Apostol.* vi. 16).

9. SIMON PETER. [PETER.]

10. SIMON, a Pharisee, in whose house a penitent woman anointed the head and feet of Jesus (Luke vii. 40).

11. SIMON THE TANNER. — A Christian convert living at Joppa, at whose house Peter lodged (Acts ix. 43). The profession of a tanner was regarded with considerable contempt, and even as approaching to uncleanness, by the rigid Jews. [TANNER.] That Peter selected such an abode, showed the diminished hold which Judaism had on him. The house was near the sea-side (Acts x. 6. 32), for the convenience of the water.

12. SIMON, the father of Judas Iscariot (John vi 71, xiii. 2, 26). W. L. B.

**SIMON CHOSAMÆUS** (Σίμων Χοσαμαῖος: *Simon*). SHIMEON, and the three following names in Ezr. x. 31, 32, are thus written in the LXX. (1 Esdr. ix. 32). The Vulgate has correctly "Simon, Benjamin, et Malchus, et Marras." "Chosamæus" is apparently formed by combining the last letter of Malluch with the first part of the following name, Shemariah.

**SIM'RI** (שִׁמְרִי [*watchful*] = Φυλάσσοντες: *Semri*). Properly "Shimri," son of Hosah, a Merarite Levite in the reign of David (1 Chr. xxvi. 10). Though not the first-born, his father made him the head of the family. The LXX. read שֹׁמְרֵי, *shômrê*, "guards."

**SIN** (סִין [*mire*]: Σάϊς, Συήνη; [in ver. 15, Alex. Τανις:] *Pelusium*), a city of Egypt, mentioned only by Ezekiel (xxx. 15, 16). The name is Hebrew, or, at least, Shemitic. Gesenius supposes it to signify "clay," from the unused root סִין, probably "he or it was muddy, clayey." It is identified in the Vulg. with Pelusium, Πηλούσιον, "the clayey or muddy" town, from πηλός; and seems to be preserved in the Arab's *Et-Teeneh*, الطينة, which forms part of the names of *Fum et-Teeneh*, the Mouth of *Et-Teeneh*, the supposed Pelusiac mouth of the Nile, and *Burg* or *Kal'at et-Teeneh*, the Tower or Castle of *Et-Teeneh*, in the immediate neighborhood, "teen" signifying "mud," etc., in Arabic. This evidence is sufficient to show that Sin is Pelusium. The ancient Egyptian name is still to be sought for: it has been supposed that Pelusium preserves traces of it, but this is very improbable. Champollion identifies Pelusium with the Перомпи, Перемпи (the second being a variation held by Quatremère to be incorrect), and Ⲃⲁⲣⲉⲙⲟⲩⲛ, of the Copts, El-Farmà, الفرما, of the Arabs, which was in the time of the former a boundary-city, the limits of a governor's authority being stated to have extended from Alexandria to Pilak-h, or Philæ, and Peremoun (Acts of St. Sarapamon MS. Copt. Vat. 67, fol. 90, ap. Quatremère, *Mémoires Géog. et Hist. sur l'Égypte*, i. 259). Champollion ingeniously derives this name from the article ⲫ, ⲉⲣ, "to be," and ⲟⲙⲏ, "mud" (*L'Égypte*, ii. 82-87; comp. Brugsch, *Geogr. Inschr.* i. p. 297). Brugsch compares the ancient Egyptian HA-REM, which he reads Pe-rema, on our system, PE-REM, "the abode of the tear," or "of the fish rem" (*Geogr. Inschr.* i. *l. c.*, pl. lv. r°. 1679). Pelusium, he would make the city SAMHAT (or, as he reads it Sâm-hud), remarking that "the nome of the city Sânhud" is the only one which has the determinative of a city, and, comparing the evidence of the Roman nome-coins, on which the place is apparently treated as a nome; but this is not certain, for there may have been a Pelusiac nome, and the etymology

to the locality described by Justin (ἐν τῷ Τίβερι ποταμῷ μεταξὺ τῶν δύο γεφυρῶν), and bearing an inscription, the first words of which are "Semoni sanco deo fidio." This inscription, which really applies to the Sabine Hercules *Saneus Semo*, is supposed to have been mistaken by Justin, in his ignorance of Latin, for one in honor of Simon. If the inscription had been confined to the words quoted by Justin, such a mistake might have been conceivable; but it goes on to state the name of the giver and other particulars: "Semoni Sanco Deo Fidio sacrum Sex. Pompeius, Sp. f. Col. Musianus Quinquennalis decus Bidentalis dorum dedit." That Justin, a man of literary acquirements, should be unable to translate such an inscription that he should misquote it in an Apology duly prepared at Rome for the eye of a Roman emperor; and that the mistake should be repeated by other early writers whose knowledge of Latin is unquestioned (Irenæus, *Adv. Hæres.* i. 20; Tertullian, *Apol.* 13), — these assumptions form a series of improbabilities amounting almost to an impossibility. [See Norton's *Evidences of the Gen. of the Gospels*, 2d ed., vol. ii pp. iii.–xxiii. (Addl. Notes).]

[a] This later date is to a certain extent confirmed by the account of Simon's death preserved by Hippolytus (*Adv. Hær.* vi. 20); for the event is stated to have occurred while Peter and Paul (the term ἀπόστολοι evidently implying the presence of the latter) were together at Rome.

of the name SAMHAT is unknown (*Id.* p. 128; Pl. xxviii. 17).

The site of Pelusium is as yet undetermined. It has been thought to be marked by mounds near *Burg et-Teeneh*, now called *el-Farmà* and not *et-Teeneh*. This is disputed by Captain Spratt, who supposes that the mound of *Aboo-Kheeyár* indicates where it stood. This is further inland, and apparently on the west of the old Pelusiac branch, as was Pelusium. It is situate between *Farmà* and *Tel-Defenneh*.[a] Whatever may have been its exact position, Pelusium must have owed its strength not to any great elevation, but to its being placed in the midst of a plain of marsh-land and mud, never easy to traverse. The ancient sites in such alluvial tracts of Egypt are in general only sufficiently raised above the level of the plain to preserve them from being injured by the inundation.

The antiquity of the town of Sin may perhaps be inferred from the mention of "the wilderness of Sin" in the journeys of the Israelites (Ex. xvi. 1; Num. xxxiii. 11). It is remarkable, however, that the Israelites did not immediately enter this tract on leaving the cultivated part of Egypt, so that it is held to have been within the Sinaitic peninsula, and therefore it may take its name from some other place or country than the Egyptian Sin. [SIN, WILDERNESS OF.]

Pelusium is mentioned by Ezekiel, in one of the prophecies relating to the invasion of Egypt by Nebuchadnezzar, as one of the cities which should then suffer calamities, with, probably, reference to their later history. The others spoken of are Noph (Memphis), Zoan (Tanis), No (Thebes), Aven (Heliopolis), Pi-beseth (Bubastis), and Tehaphnehes (Daphnæ). All these, excepting the two ancient capitals, Thebes and Memphis, lay on or near the eastern boundary; and, in the approach to Memphis, an invader could scarcely advance, after capturing Pelusium and Daphnæ, without taking Tanis, Bubastis, and Heliopolis. In the most ancient times Tanis, as afterwards Pelusium, seems to have been the key of Egypt on the east. Bubastis was an important position from its lofty mounds, and Heliopolis as securing the approach to Memphis. The prophet speaks of Sin as "Sin the stronghold of Egypt" (ver. 15). This place it held from that time until the period of the Romans. Herodotus relates that Sennacherib advanced against Pelusium, and that near Pelusium Cambyses defeated Psammenitus. In like manner the decisive battle in which Ochus defeated the last native king, Nectanebos, NEKHT-NEBF, was fought near this city. It is perhaps worthy of note that Ezekiel twice mentions Pelusium in the prophecy which contains the remarkable and signally-fulfilled sentence: "There shall be no more a prince of the land of Egypt" (ver. 13). As he saw the long train of calamities that were to fall upon the country, Pelusium may well have stood out as the chief place of her successive humiliations. Two Persian conquests, and two submissions to strangers, first to Alexander, and then to Augustus, may explain the especial misery foretold of this city: "Sin shall suffer great anguish" (ver. 16).

We find in the Bible a geographical name, which has the form of a gent. noun derived from Sin, and is usually held to apply to two different nations, neither connected with the city Sin. In the list of the descendants of Noah, the Sinite, סִינִי, occurs among the sons of Canaan (Gen. x. 17; 1 Chr. i. 15). This people, from its place between the Arkite and the Arvadite has been supposed to have settled in Syria north of Palestine, where similar names occur in classical geography and have been alleged in confirmation. This theory would not, however, necessarily imply that the whole tribe was there settled, and the supposed traces of the name are by no means conclusive. On the other hand, it must be observed that some of the eastern towns of Lower Egypt have Hebrew as well as Egyptian names, as Heliopolis and Tanis; that those very near the border seem to have borne only Hebrew names, as Migdol; so that we have an indication of a Shemitic influence in this part of Egypt, diminishing in degree according to the distance from the border. It is difficult to account for this influence by the single circumstance of the Shepherd invasion of Egypt, especially as it is shown yet more strikingly by the remarkably strong characteristics which have distinguished the inhabitants of northeastern Egypt from their fellow-countrymen from the days of Herodotus and Achilles Tatius to our own. And we must not pass by the statement of the former of these writers, that the Palestine Syrians dwelt westward of the Arabians to the eastern boundary of Egypt (iii. 5, and above p. 2736, note *a*). Therefore, it does not seem a violent hypothesis that the Sinites were connected with Pelusium, though their main body may perhaps have settled much further to the north. The distance is not greater than that between the Hittites of southern Palestine and those of the valley of the Orontes, although the separation of the less powerful Hivites into those dwelling beneath Mount Hermon and the inhabitants of the small confederacy of which Gibeon was apparently the head, is perhaps nearer to our supposed case. If the Wilderness of Sin owed its name to Pelusium, this is an evidence of the very early importance of the town and its connection with Arabia, which would perhaps be strange in the case of a purely Egyptian town. The conjecture we have put forth suggests a recurrence to the old explanation of the famous mention of "the land of Sinim," אֶרֶץ סִינִים, in Isaiah (xlix. 12), supposed by some to refer to China. This would appear from the context to be a very remote region. It is mentioned after the north and the west, and would seem to be in a southern or eastern direction. Sin is certainly not remote, nor is the supposed place of the Sinites to the north of Palestine; but the expression may be proverbial. The people of Pelusium, if of Canaanite origin, were certainly remote compared to most of the other Canaanites, and were separated by alien peoples, and it is also noticeable that they were to the northeast of Palestine. As the sea bordering Palestine came to designate the west, as in this passage, so the land of Sinim may have passed into a proverbial expression for a distant and separated country. See, however, SINITE, SINIM.

R. S. P.

**SIN, WILDERNESS OF** (מִדְבַּר־סִין: ἔρημος Σίν [Vat. Σειν]: *desertum Sin*). The

[a] Capt. Spratt's reports have unfortunately been printed only in abstract ("Delta of the Nile," etc.; Return, House of Commons, 9th Feb. 1860), with a very insufficient map. In M. Linant's map we cannot discover *Aboo-Kheeyár* (*Percement de l'Isthme de Suez. Atlas, Carte Topographique*).

Digitized by Google

name of a tract of the wilderness which the Israelites reached after leaving the encampment by the Red Sea (Num. xxxiii. 11, 12). Their next halting-place (Ex. xvi. 1, xvii. 1) was Rephidim, probably the *Wady Feirân* [REPHIDIM]; on which supposition it would follow that Sin must lie between that wady and the coast of the Gulf of Suez, and of course west of Sinai. Since they were by this time gone more than a month from Egypt, the locality must be too far towards the S. E. to receive its name from the Egyptian Sin of Ez. xxx. 15, called Σάϊς by the LXX., and identified with Pelusium (see previous article). In the wilderness of Sin the MANNA was first gathered, and those who adopt the supposition that this was merely the natural product of the *tarfa* bush, find from the abundance of that shrub in *Wady es-Sheikh*, S. E. of *W. Ghûrundel*, a proof of local identity. [ELIM.] At all events, that wady is as probable as any other.[a] H. H.

**SIN-OFFERING** (חַטָּאת: ἁμαρτία, τὸ τῆς ἁμαρτίας, περὶ ἁμαρτίας: *pro peccato*). The sin-offering among the Jews was the sacrifice in which the ideas of propitiation and of atonement for sin were most distinctly marked. It is first directly enjoined in Lev. iv., whereas in cc. i.–iii. the burnt-offering, meat-offering, and peace-offering are taken for granted, and the object of the Law is to regulate, not to enjoin the presentation of them to the Lord. Nor is the word *chattâth* applied to any sacrifice in ante-Mosaic times.[b] It is therefore peculiarly a sacrifice of the Law, agreeing with the clear definition of good and evil, and the stress laid on the "sinfulness of sin," which were the main objects of the Law in itself. The idea of propitiation was no doubt latent in earlier sacrifices, but it was taught clearly and distinctly in the Levitical sin-offering.

The ceremonial of the sin-offering is described in Lev. iv. and vi. The animal, a young bullock for the priest or the congregation, a male kid or lamb for a ruler, a female kid or lamb for a private person, in all cases without blemish, was brought by the sacrificer to the altar of sacrifice; his hand was laid upon its head (with, as we learn from later Jewish authorities, a confession of sin, and a prayer that the victim might be its expiation); of the blood of the slain victim, some was then sprinkled seven times before the veil of the sanctuary, some put on the horns of the altar of incense, and the rest poured at the foot of the altar of sacrifice; the fat (as the choicest part of the flesh) was then burnt on the altar as a burnt-offering; the remainder of the body, if the sin-offering were that of the priest himself or of the whole congregation, was carried out of the camp or city to a "clean place" and there burnt; but if the offering were that of an individual, the flesh might be eaten by the priests alone in the holy place, as being "most holy."

The TRESPASS-OFFERING (אָשָׁם: πλημμέλεια, τὸ τῆς πλημμελείας: *pro delicto*) is closely connected with the sin-offering in Leviticus, but at the same time clearly distinguished from it, being in some cases offered with it as a distinct part of the same sacrifice: as, for example, in the cleansing of the leper (Lev. xiv.). The victim was in each case to be a ram. At the time of offering, in all cases of damage done to any holy thing, or to any man, restitution was made with the addition of a fifth part to the principal; the blood was sprinkled round about upon the altar, as in the burnt-offering; the fat burnt, and flesh disposed of as in the sin-offering. The distinction of ceremonial clearly indicates a difference in the idea of the two sacrifices.

The nature of that difference is still a subject of great controversy. Looking first to the derivation of the two words, we find that חַטָּאת is derived from חָטָא, which is, properly, to "miss" a mark, or to "err" from a way, and secondarily to "sin," or to incur "penalty;" that אָשָׁם is derived from the root אָשַׁם, which is properly to "fail," having for its "primary idea *negligence*, especially in gait" (Ges.). It is clear that, so far as derivation goes, there appears to be more of reference to general and actual sin in the former, to special cases of negligence in the latter.

Turning next to the description, in the book of Leviticus, of the circumstances under which each should be offered, we find one important passage (Lev. v. 1–13) in which the sacrifice is called first a "trespass-offering" (ver. 6), and then a "sin-offering" (vv. 7, 9, 11, 12). But the nature of the victims in ver. 6 agrees with the ceremonial of the latter, not of the former; the application of the latter name is more emphatic and reiterated; and there is at ver. 14 a formal introduction of the law of the trespass-offering, exactly as of the law of the sin-offering in iv. 1. It is therefore safe to conclude that the word אָשָׁם is not here used in its technical sense, and that the passage is to be referred to the sin-offering only

We find, then, that the sin-offerings were —

A. REGULAR.

1. *For the whole people*, at the New Moon, Passover, Pentecost, Feast of Trumpets, and Feast of Tabernacles (Num. xxviii. 15–xxix. 38), besides the solemn offering of the two goats on the Great Day of Atonement (Lev. xvi.).

2. *For the Priests and Levites* at their consecration (Ex. xxix. 10–14, 36); besides the yearly sin-offering (a bullock) for the high-priest on the Great Day of Atonement (Lev. xvi.).[c]

B. SPECIAL.

1. *For any sin of "ignorance"* against the

[a] Rev. F. W. Holland (*Journal of the Roy. Geogr. Society*, vol. xxxviii. p. 256) proposes to identify the Wilderness of Sin with the plain of *es-Seyâ*, which lies beneath the Tîh range. It is rather a succession of large basins than one plain, and after rain its fertility is great and its water-supply abundant. For an abstract of this important article (*On the Peninsula of Sinai*) see the addition to SINAI (Amer. ed.). H.

[b] Its technical use in Gen. iv. 7 is asserted, and supported by high authority. But the word here probably means (as in the Vulg. and A. V.) "sin." The fact that it is never used in application to any other sacrifice in Genesis or Exodus, alone makes the translation "sin-offering" here very improbable.

[c] To these may be added the sacrifice of the red heifer (conducted with the ceremonial of a sin-offering), from the ashes of which was made the "water of separation," used in certain cases of ceremonial pollution. See Num. xix.

Digitized by Google

commandment of the Lord, on the part of priest, people, ruler, or private man (Lev. iv.).

2. *For refusal to bear witness* under adjuration (Lev. v. 1).

3. *For ceremonial defilement* not willfully contracted (Lev. v. 2, 3), under which may be classed the offerings at the purification of women (xii. 6–8), at the cleansing of leprosy (xiv. 19, 31), or the uncleanness of men or women (xv. 15, 30), on the defilement of a Nazarite (Num. vi. 6–11) or the expiration of his vow (ver. 16).

4. *For the breach of a rash oath*, the keeping of which would involve sin (Lev. v. 4).

The trespass-offerings, on the other hand, were always special, as —

1. *For sacrilege "in ignorance,"* with compensation for the harm done, and the gift of a fifth part of the value besides to the priest (Lev. v. 15, 16).

2. *For ignorant transgression* against some definite prohibition of the Law (v. 17–19).

3. *For fraud, suppression of the truth, or perjury* against man, with compensation, and with the addition of a fifth part of the value of the property in question to the person wronged (vi. 1–6).

4. *For rape of a betrothed slave* (Lev. xix. 20, 21).

5. *At the purification of the leper* (Lev. xiv. 12), and the *polluted Nazarite* (Num. vi. 12), offered with the sin-offering.

From this enumeration it will be clear that the two classes of sacrifices, although distinct, touch closely upon each other, as especially in B. (1) of the sin-offering, and (2) of the trespass-offering. It is also evident that the sin-offering was the only regular and general recognition of sin in the abstract, and accordingly was far more solemn and symbolical in its ceremonial; the trespass-offering was confined to special cases, most of which related to the doing of some material damage, either to the holy things or to man, except in (5), where the trespass-offering is united with the sin-offering. Josephus (*Ant.* iii. 9, § 3) declares that the sin-offering is presented by those "who fall into sin in ignorance" (κατ' ἀγνοίαν), and the trespass-offering by "one who has sinned and is conscious of his sin, but has no one to convict him thereof." From this it may be inferred (as by Winer and others) that the former was used in cases of known sin against some definite law, the latter in the case of secret sin, unknown, or, if known, not liable to judicial cognizance. Other opinions have been entertained, widely different from, and even opposed to one another. Many of them are given in Winer's *Realw.* "Schuldopfer." The opinions which suppose one offering due for sins of omission, and the other for sins of commission, have no foundation in the language of the Law. Others, with more plausibility, refer the sin-offering to sins of pure ignorance, the trespass-offering to those of a more sinful and deliberate character; but this does not agree with Lev. v. 17–19, and is contradicted by the solemn contrast between sins of ignorance, which might be atoned for, and "sins of presumption," against which death without mercy is denounced in Num. xv. 30. A third opinion supposes the sin-offering to refer to sins for which no material and earthly atonement could be made, the trespass-offering to those for which material compensation was possible. This theory has something to support it in the fact that in some cases (see Lev. v. 15, 16, vi. 1–6) compensation was prescribed as accessory to the sacrifice. Others seek more recondite distinctions, supposing (*e. g.*) that the sin-offering had for its object the cleansing of the sanctuary or the commonwealth, and the trespass-offering the cleansing of the individual; or that the former referred to the effect of sin upon the soul itself, the latter to the effect of sin as the breach of an external law. Without attempting to decide so difficult and so controverted a question, we may draw the following conclusions: —

First, that the sin-offering was far the more solemn and comprehensive of the two sacrifices.

Secondly, that the sin-offering looked more to the guilt of the sin done, irrespective of its consequences, while the trespass-offering looked to the evil consequences of sin, either against the service of God, or against man, and to the duty of atonement, as far as atonement was possible. Hence the two might with propriety be offered together.

Thirdly, that in the sin-offering especially we find symbolized the acknowledgment of sinfulness as inherent in man, and of the need of expiation by sacrifice to renew the broken covenant between man and God.

There is one other question of some interest, as to the nature of the sins for which either sacrifice could be offered. It is seen at once that in the Law of Leviticus, most of them, which are not purely ceremonial, are called sins of "ignorance" (see Heb. ix. 7); and in Num. xv. 30, it is expressly said that while such sins can be atoned for by offerings, "the soul that doeth aught *presumptuously*" (Heb. *with a high hand*) "shall be cut off from among his people." . . . . "His iniquity shall be upon him" (comp. Heb. x. 26). But there are sufficient indications that the sins here called "of ignorance" are more strictly those of "negligence" or "frailty,"[a] repented of by the unpunished offender, as opposed to those of deliberate and unrepentant sin. The Hebrew word itself and its derivations are so used in Ps. cxix. 67 (ἐπλημμέλησα, LXX.); 1 Sam. xxvi. 21 (ἠγνόηκα); Ps. xix. 13 (παραπτώματα); Job xix. 4 (πλάνος). The words ἀγνόημα and ἄγνοια have a corresponding extent of meaning in the N. T.; as when, in Acts iii. 17, the Jews, in their crucifixion of our Lord, are said to have acted κατ' ἀγνοίαν; and in Eph. iv. 18; 1 Pet. i. 14, the vices of heathenism, done against the light of conscience, are still referred to ἄγνοια. The use of the word (like that of ἀγνωμονεῖν in classical Greek) is found in all languages, and depends on the idea that goodness is man's true wisdom, and that sin is the failing to recognize this truth. If from the word we turn to the sins actually referred to in Lev. iv., v., we find some which certainly are not sins of pure ignorance: they are indeed few out of the whole range of sinfulness, but they are real sins. The later Jews (see Outram, *De Sacrificiis*) limited the application of the sin-offering to negative sins, sins in ignorance, and sins in action, not in thought, evidently conceiving it to apply to actual sins, but to sins of a secondary order.

In considering this subject, it must be remembered that the sacrifices of the Law had a temporal,

---

[a] From the root שָׁגַג, or שָׁגָה, signifying to "err" or "wander out of the way," cognate in sense to the root of the word *shattâth* itself.

Digitized by Google

as well as a spiritual significance and effect. They restored an offender to his place in the commonwealth of Israel; they were therefore an atonement to the king of Israel for the infringement of his law. It is clear that this must have limited the extent of their legal application; for there are crimes for which the interest and very existence of a society demand that there should be no pardon. But so far as the sacrifices had a spiritual and typical meaning, so far as they were sought by a repentant spirit as a sign and means of reconcilement with God, it can hardly be doubted that they had a wider scope and a real spiritual effect so long as their typical character remained. [See SACRIFICE.]

For the more solemn sin-offerings, see DAY OF ATONEMENT; LEPROSY, etc. A. B.

**SINA, MOUNT** (τὸ ὄρος Σινᾶ; [Vat. Sin. Alex. in Jud., Σεινα:] *mons Sina*). The Greek form of the well-known name which in the O. T. universally, and as often as not in the Apocr. and N. T., is given in the A. V. SINAI. Sina occurs Jud. v. 14;[a] Acts vii. 30, 38. G.

**SI'NAI** [2 syl.] (סִינַי [*jagged, full of clefts*, Fürst]: Σινᾶ; [Vat.[1] Σεινα:] *Sinaï*). Nearly in the centre of the peninsula which stretches between the horns of the Red Sea lies a wedge of granite, grünstein, and porphyry rocks, rising to between 8,000 and 9,000 feet above the sea. Its shape resembles a scalene triangle, with a crescent cut from its northern or longer side, on which border Russegger's map gives a broad, skirting tract of old red sandstone, reaching nearly from gulf to gulf, and traversed by a few ridges, chiefly of a tertiary formation, running nearly N. W. and S. E. On the S. W. side of this triangle, a wide alluvial plain — narrowing, however, towards the N. — lines the coast of the Gulf of Suez, whilst that on the eastern or Akabah coast is so narrow as almost to disappear. Between these alluvial edges and the granitic mass a strip of the same sandstone is interposed, the two strips converging at *Rûs Mohammed*, the southern promontory of the whole. This nucleus of plutonic rocks is said to bear no trace of volcanic action since the original upheaval of its masses (Stanley, pp. 21, 22). Laborde (*Travels*, p. 105) thought he detected some, but does not affirm it. Its general configuration runs into neither ranges nor peaks, but is that of a plateau cut across with intersecting wadies,[b] whence spring the cliffs and mountain peaks, beginning with a very gradual and terminating in a very steep ascent. It has been arranged (Stanley, *S. & P.* p. 11) in three chief masses as follows: —

1. The N. W. cluster above *Wady Feirân*; its greatest relief found in the five-peaked ridge of *Serbâl*, at a height of 6,342 feet above the sea. (For an account of the singular natural basin into which the waters of this portion of the mountain mass are received, and its probable connection with Scriptural topography, see REPHIDIM.)

2. The eastern and central one; its highest point the *Jebel Kutherin*, at a height of 8,063 (Rüppell) to 8,168 (Russegger) feet, and including the *Jebel Mûsa*, the height of which is variously set (by Schubert, Rüppell, and Russegger) at 6,796, 7,033, and 7,097 feet.

3. The S. E. one, closely connected, however, with 2; its highest point, *Um Shaumer*, being that also of the whole.

The three last-named peaks all lie very nearly in a line of about 9 miles drawn from the most northerly of them, *Mûsa*, a little to the W. of S.; and a perpendicular to this line, traced on the map westwards for about 20 miles, nearly traverses the whole length of the range of *Serbâl*. These lines show the area of greatest relief for the peninsula,[c] nearly equidistant from each of its embracing gulfs, and also from its northern base, the range of *et-Tîh*, and its southern apex, the *Rûs Mohammed*.

Before considering the claims of the individual mountains to Scriptural notice, there occurs a question regarding the relation of the names Horeb and Sinai. The latter name first occurs as that of the limit on the further side from Egypt of the wilderness of Sin (Ex. xvi. 1), and again (xix. 1, 2) as the "wilderness" or "desert of Sinai," before *Mount* Sinai is actually spoken of, as in ver. 11 soon after we find it. But the name "Horeb"[d] is, in the case of the rebuke of the people by God for their sin in making the golden calf, reintroduced into the Sinaitic narrative (xxxiii. 6), having been previously most recently used in the story of the murmuring at Rephidim (xvii. 6, "I will stand before thee there upon the rock in Horeb"), and earlier as the name of the scene of the appearance of God in the "burning bush" (iii. 1). Now, since Rephidim seems to be a desert stage apart from the place where Israel "camped before the mount" (Sinai, xix. 2), it is not easy to account for a Horeb at Rephidim, apparently as the specific spot of a particular transaction (so that the refuge of a "general" name Horeb, contrasted with Sinai as a special one, is cut off), and a Horeb in the Sinaitic region, apparently a synonym of the mountain which, since the scene of the narrative is fixed at it, had been called Sinai. Lepsius removes the difficulty by making *Serbâl* Sinai, but against this it will be seen that there are even stronger objections. But a proper name given from a natural feature may recur with that feature. Such is "Horeb," properly signifying "ground left dry by water draining off." Now both at Rephidim and at Kadesh Meribah, where was the "fountain of judgment" (Gen. xiv. 7), it is expressly mentioned that "there was no water;" and the inference is that some ordinary supply, expected to be found there, had failed, possibly owing to drought. "The rock in Horeb" was (Ex. xvii. 6) what Moses

[a] In this passage the present Greek text of both MSS., reads εἰς ὄδὸν, not ὄρος, τοῦ Σεινᾶ. But the note in the margin of the A. V. of 1611 is, notwithstanding, wrong, — "Greek, into the way of the wilderness of Sina;" that being nearer to the Vulg. *deserta Sina montis occuparerunt*.

[b] See Robinson's "Memoir on the Maps" (vol. iii Appendix 1, pp. 83–89), a most important comment on the different sources of authority for different portions of the region, and the weight due to each, and containing a just caution regarding the indications of various aspect given by Laborde.

[c] Dr. Stanley (p. 77) notices another "very high mountain S. W. of *Um-Shâm'r*, apparently calculated by Rüppell to be the highest in the peninsula . . . possibly that called by Burckhardt *Thommar*, or *el-Koly*.' But this seems only to effect an extension of the area of the relief in the direction indicated.

[d] Dr. Stanley has spoken of two of the three passages in Exodus in which Horeb occurs (iii. 1, xvii. 6) as "doubtful," and of the third (xxxiii. 6) as "ambiguous;" but he does not say on what grounds (*S. & P.* p. 23, note).

smote. It probably stood on the exact spot where the water was expected to be, but was not. Now Lepsius (*Tour*, April 22, transl. by Cottrell, p. 74) found in *Wady Feirân*, which he identifies with Rephidim, singular alluvial banks of earth which may have once formed the bottom of a lake since dried.[a] If this was the scene of the miracle [see REPHIDIM], the propriety of the name Horeb, as applied to it, becomes clear. Further, in all the places of Deut. where Horeb is found [see HOREB], it seems to be used in reference to the people as the place where they stood to receive, rather than whence God appeared to give the Law, which is apparently in the same book of Deut. indicated by Sinai (xxxiii. 2); and in the one remaining passage of Exod., where Horeb occurs in the narrative of the same events, it is used also in reference to the people (xxxiii. 6), and probably refers to what they had previously done in the matter of the golden calf (xxxii. 2, 3). If this be accepted, there remains in the Pentateuch only Ex. iii. 1, where Moses led the flocks of Jethro "to the mountain of God, to Horeb;" but this form of speech, which seems to identify two local names, is sometimes not a strict apposition, but denotes an extension, especially where the places are so close together that the writer tacitly recognizes them as one.[b] Thus Horeb, strictly taken, may probably be a dry plain, valley, or bed of a wady near the mountain; and yet *Mount* Horeb, on the "vast green plain" of which was doubtless excellent pasture, may mean the mountain viewed in reference thereto,[c] or its side abutting thereon. The mention of Horeb in later books (*e. g.* 1 K. viii. 9, xix. 8) seems to show that it had then become the designation of the mountain and region generally. The spot where the people themselves took part in the greatest event of their history would naturally become the popular name in later designations of that event. "Thou stoodest before the Lord thy God *in Horeb*" was a literal fact, and became the great basis of all traditions of it. By this they recognized that they had been brought into covenant with God. On the contrary, in Neh. ix. 13, we read, "*Thou* camest down upon *Mount Sinai*."

But beyond the question of the relation which these names mutually bear, there remains that of site. Sinai is clearly a summit distinctly marked. Where are we to look for it? There are three principal views in answer to this question:—

I. That of Lepsius, above mentioned, favored also by Burckhardt (*Trav.* p. 609), that *Serbâl* is Sinai, some 30 miles distant westward from the *Jebel Mûsa*, but close to the *Wady Feirân* and *el-Heesue*, which he identifies, as do most authorities, with Rephidim (Lepsius, p. 74), just a mile from the old convent of *Farân*. On this view Israel would have reached Sinai the same day that they fought with Amalek: "the decampment occurred during the battle" (*ibid.* p. 86)—an unlikely thing since the contest was evidently fierce and close, and lasted till sunset. *Serbâl* is the most magnificent mountain of the peninsula, rising with a crown of five peaks from the maritime plain on one side, and from the *Wady Feirân* on the other, and showing its full height at once to the eye; and Ritter (*Geogr.* xiv. 734–736) has suggested[d] that it might have been, before the actual Exodus, known as "the mount of God" to the Amalekite Arabs, and even to the Egyptians.[e] The earliest traditions are in its favor. "It is undoubtedly identified with Sinai by Eusebius, Jerome, and Cosmas that is, by all known writers to the time of Justinian," as confirmed by the position "of the episcopal city of Paran at its foot" (Stanley, *S. & P.* p. 40).

But there are two main objections to this: (1.) It is clear, from Ex. xix. 2 (comp. xvii. 1), that the interval between Rephidim and Sinai was that of a regular stage of the march. The expressions in the Hebrew are those constantly used for decamping and encamping in the books of Ex., Num., and Deut.; and thus a Sinai within a mile of Rephidim is unsuitable. (2.) There is no plain or wady of any sufficient size near *Serbâl* to offer camping ground to so large a host, or perhaps the tenth part of them. Dr. Stewart (*The Tent and the Khan*, p. 146) contends for *Serbâl* as the real Sinai, seeking to obviate objection (1), by making Rephidim "no higher up than *Heshuth*" [REPHIDIM], and (2), by regarding *Wady Aleiat* and *Wady Rimm* as capacious enough for the host to camp in (*ibid.* p. 145); a very doubtful assertion.

II. The second is that of Ritter,[f] that, allowing *Serbâl* the reverence of an early sanctuary, the *Jebel Mûsa* is Sinai, and that the *Wady es-Sebayeh*, which its S. E. or highest summit overhangs, is the spot where the people camped before the mount; but the second objection to *Serbâl* applies almost in equal force to this — the want of space below. The wady is "rough, uneven, and narrow" (Stanley, *S. & P.* p. 76); and there seems no possibility of the people's "removing (Ex. xx. 18) and standing afar off," and yet preserving any connection with the scene. Further, this site offers no such feature as a "brook that descended out of the mount" (Deut. ix. 21).

III. The third is that of Robinson, that the modern Horeb of the monks — namely, the N. W. and lower face of the *Jebel Mûsa*, crowned with a range of magnificent cliffs, the highest point called *Ras Sasâfeh*, or *Sûfsâfeh*, as spelled by Robinson — overlooking the plain *er-Rahah*, is the scene of the giving of the Law, and that peak the mountain into which Moses ascended. In this view, also, Strauss appears to coincide (*Sinai and Golgotha*, p. 116). Lepsius objects, but without much force (since he himself climbed it), that the peak *Sasâfeh*

[a] "Alluvial mounds" are visible at the foot of the modern Horeb cliffs in the plain *er-Raheh*; just as Lepsius noticed others at the *Wady Feirân*. (Comp. Stanley, *S. & P.* p. 40, Lepsius, p. 84.)

[b] So in Gen. xiii. 3, Abram goes "to Bethel, unto the place where his tent had been at the beginning, between Bethel and Hai;" *i. e.* really to Bethel, and somewhat further.

[c] It ought not to be left unnoticed that different tribes of the desert often seem to give different names to the same mountain, valley, etc., or the same names to different mountains, etc., because, perhaps, they judge of them by the way in which leading features group themselves to the eye, and which varies with the habitual point of view (Lepsius, p. 64).

[d] Robinson, on the other hand (i. 78, 79), suggests that *Sîrâbît el-Khadim* (or *Chadem*), lying north of *Serbâl*, was a place of pilgrimage to the ancient Egyptians, and a supposable object of Moses' proposed "three days' journey into the wilderness." But the pilgrimage was an element in the religion of ancient Egypt seems at least doubtful.

[e] So Dr. Stewart (*The Tent and the Khan*, p. 147 says, "that it was a place of idolatrous worship before the passage of the children of Israel is extremely probable." He renders the name by "Lord Baal."

[f] *Geogr.* xiv. 892.

e nearly inaccessible. It is more to the purpose to observe that the whole *Jebel Músa* is, comparatively with adjacent mountains, insignificant; "its prospect limited in the east, south, and west, by higher mountains" (Rüppell,[a] quoted by Robinson, i. 105, note; comp. Seetzen, *Reisen*, vol. ii. p. 93); that it is "remote and almost concealed." But the high ground of *Serbál* being rejected for the above reasons, and no voice having ever been raised in favor of the *Um Shaumer*,[b] the highest point in the peninsula, lying S. W. of the *Músa*, some such secondary and overshadowed peak must be assumed. The conjunction of mountain with plain is the greatest feature of this site; in choosing it, we lose in the mountain, as compared with *Serbál*, but we gain in the plain, of which *Serbál* has nothing. Yet the view from the plain appears by no means wanting in features of majesty and awe (*S. & P.* pp. 42, 43). Dr. Stanley remarked (*S. & P.* p. 43) some alluvial mounds at the foot of the cliff "which exactly answered to the bounds" set to restrain the people. In this long retiring sweep of *er-Rahah*, the people could "remove and stand afar off;" for it "extends into the lateral valleys," and so joins the *Wady es-Sheykh* (*ibid.* p. 74). Here too Moses, if he came down through one of the oblique gullies which flank the *Ras Sasâfeh* on the N and S., might not see the camp, although he might catch its noise, till he emerged from the *Wady ed-Deir*, or the *Wady Lejâ*, on the plain itself. In the latter, also, is found a brook in close connection with the mountain.

Still there is the name of the *Jebel Músa* belonging to the opposite or S. E. peak or precipice, overhanging *es-Sebayeh*. Lepsius treats this as a monkish legend unknown before the convent; but there is the name *Wady Shoaib* (valley of Hobab or Jethro, *S. & P.* p. 32), the *Wady Lejâ* and *Jebel Fureid* (perhaps from the forms in Arabic legend of the names of his two daughters *Lija* and *Safurin* = *Zipporah*), forming a group of Mosaic tradition. Is it not possible that the *Jebel Músa*, or loftiest southeastern peak of that block of which the modern Horeb is the lower and opposite end, may have been the spot to which Moses retired, leaving the people encamped in *er-Rahah* below, from which its distance is not above three miles? That the spot is out of sight from that plain is hardly a difficulty, for "the mountain burning with fire to the midst of heaven" was what the people saw (Deut. iv. 11); and this would give a reasonable distance for the spot, somewhere midway, whence the elders enjoyed a partial vision of God (Ex. xxiv 9, 10).

Tradition, no doubt in this case purely monkish, has fixed on a spot for Elijah's visit — "*the* cave, to which he repaired; but one at *Serbál* would equally suit (*S. & P.* p. 49). That on the *Jebel Músa* is called the chapel of St. Elias. It has been thought possible that St. Paul may have visited Sinai (Gal. i. 17), and been familiar with the name *Hajar* (حجر) as given commonly to it, signifying "a rock." (Ewald, *Sendschreiben*, p. 493.)

It may be added that, supposing *Wady Tayibeh* to have been the encampment "by the sea," as stated in Num. xxxiii. 10, three routes opened there before the Israelites: the most southerly one (taken by Shawe and Pococke) down the plain *el-Kâa* to *Tûr*; the most northerly (Robinson's) by the *Sarbût el-Khadem* (either of which would have left Serbal out of their line of march); and the middle one by *Wady Feirân*, by which they would pass the foot of *Serbál*, which therefore in this case alone could possibly be Sinai (Stanley, *S. & P.* pp. 36, 37). Just east of the *Jebel Músa*, across the narrow ravine named *Shoaib*, lies *ed-Deir*, or the convent mountain, called also, from a local legend (Stanley, p. 46; Robinson, i. 98), "the Mount of the Burning Bush." Tradition has also fixed on a hollow rock in the plain of the *Wady es-Sheykh*, on which the modern Horeb looks, as "the (mould of the) head of the cow," *i. e.* in which the golden calf was shaped by Aaron. In the ravine called *Lejâ*, parallel to *Shoaib* on the western side of the *Jebel Músa*, lies what is called the rock of Moses (see REPHIDIM); and a hole in the ground near, in the plain, is called, by manifest error, the "pit of Korah," whose catastrophe took place far away (Robinson, i. 113; Lepsius, p. 19).

The middle route aforesaid from *W. Tayibeh* reaches the *W. Feirân* through what is called the *W. Mokatteb*, or "written valley," from the inscriptions on the rocks which line it,[c] generally considered to have been the work of Christian hands, but whether those of a Christian people localized there at an unknown period, as Lepsius[d] (p. 90) thinks, or of passing pilgrims, as is the more general opinion, is likely to continue doubtful.

It is remarkable that the names of the chief peaks seem all borrowed from their peculiarities of vegetation: thus *Um Shómr* (أم شمر) means "mother of fennel;" *Râs Sasâfeh* (properly *Sâfsafeh*, صفصفة) is "willow-head," a group of two or three of which trees grow in the recesses of the adjacent wady; so *Serbâl* is perhaps from سربال; and, from analogy, the name "Sinai," now unknown amongst the Arabs (unless *Sena*, given to the point of the *Jebel Fureid*, opposite to the modern Horeb (Stanley, p. 42), contain a trace of it), may be supposed derived from the سَنَا and سَنَا, the tree of the Burning Bush. The

[a] It should be added that Rüppell (Lepsius, p. 12) took *Jebel Katherin* for Horeb, but that there are fewer features in its favor, as compared with the history, than almost any other site (Robinson, i. 110).

[b] Though Dr. Stanley (*S. & P.* p. 39, note) states that it has been "explored by Mr. Hogg, who tells me that it meets none of the special requirements."

[c] See the work of Professor Beer of Leipsic on this curious question. Mr. Forster's attempt (*Voice of Israel from the Rocks of Sinai*) to regard them as a contemporary record of the Exodus by the Israelites involves this anachronism: the events of the fortieth year — *e. g.* the plague of fiery serpents — are represented as recorded close on the same spot with what took place before the people reached Sinai; and although the route which they took cannot be traced in all its parts, yet all the evidence and all the probability of the question is clearly against their ever having returned from Kadesh and the Arabah to the valleys west of Sinai.

[d] Arguing from the fact that these inscriptions occur not only on roads leading out of Egypt, but in the most secluded spots, and on rocks lying quite out of the main roads.

Digitized by Google

vegetation * of the peninsula is most copious at *el-Wady*, near *Tûr*, on the coast of the Gulf of Suez, in the *Wady Feirân* [see REPHIDIM], the two oases of its waste, and "in the nucleus of springs in the Gebel Mousa" (Stanley, p. 19). For a fuller account of its flora, see WILDERNESS OF THE WANDERING. As regards its fauna, Seetzen (iii. 20) mentions the following animals as found at *er-Ramleh*, near Sinai: the wild goat, the wubber, hyena, fox, hare, gazelle, panther (rare), field-mouse (*el-Dschürdy*, like a jerboa), and a lizard called *el-Dsob*, which is eaten. H. H.

* The names Horeb and Sinai are used interchangeably. At the first Horeb had precedence, being "the mountain of God" to Moses prior to the giving of the Law (Ex. iii. 1, 12, iv. 27, xvii. 6, xviii. 5). Sinai is first mentioned after the battle of Rephidim (Ex. xix. 1, 2); and this name is thenceforth prominent until the breaking up of the encampment in that wilderness, as recorded in Num. x. 12. But in the recapitulation of this journey by Moses, Horeb is spoken of as the point of departure (Deut. i. 2, 6, 19). Horeb is named as the mountain from which "the Lord spake out of the midst of the fire," and upon which He wrote the ten commandments (Deut. iv. 10, 15). Horeb also was the scene of the transgression in the golden calf (Deut. ix. 8). The covenant was made at Horeb (Deut. xxix. 1). In the books of Kings and Chronicles (1 K. viii. 9, xix. 8; 2 Chr. v. 10), Horeb is named as the scene of the Law; while in the Psalms both names are used for the same place; Sinai in Ps. lxviii. 8, 17, and Horeb Ps. cvi. 19. Mountains thus closely identified with the same series of events could not have been far apart; and the best solution of the Biblical usage in respect of these names appears to be that which makes Horeb the central mass or ridge, of which Sinai was a prominent peak. See Ritter, xiv. 743; Hengstenberg, *Pentateuch*, ii. 325; Robinson, i. 591; Kurtz, iii. 79; Kalisch, *Comm. on Exodus*. Bunsen, *Bibelwerk*, gives the name Horeb to the group of which *Sufsafeh* and *Jebel Musa* are peaks, and places Sinai opposite to *Sufsafeh*, on the northern side of the plain.

The Rev. F. W. Holland, Fellow of the Royal Geographical Society, in a paper read before the Society in 1868, gave an interesting account of his minute and careful exploration of the Sinaitic region. A compendium of his results will shed light upon several points hitherto somewhat in doubt or dispute.

*Fertility of the Desert.* — "The lower portion of *Wady Ghurundel* is one of the most fertile in the whole peninsula. It is nearly 300 yards broad in many places, and thickets of tamarisks, palms, and beds of bulrushes and reeds abound, and wild ducks, with many kinds of smaller birds, frequent the pools, formed here and there by a clear stream of running water, which never fails.

"Manna and gum Arabic appear to be found in very small quantities. The latter exudes from the boughs of the mimosa, or shittim-tree, after the young shoots have been lopped off in spring to feed the goats.

"Water is not nearly so scarce in the granitic district as most travellers have supposed. There is also a far larger amount of vegetation than usually described. [This was in October and November.] The basins on the summits of the mountains generally afford good pasturage, and even the mountain sides, which look so barren from the wadies below, are often covered with numerous plants on which the goats delight to feed. Many of the smaller wadies, too, are astonishingly fertile, and in former days, when fairly cultivated by the monks, must have yielded abundance of fruit, vegetables, and even corn, for I found traces in several spots of terraced plots evidently laid out for growing corn. I can readily believe that at one time 6,000 or 7,000 monks and hermits lived, as we are told, in these mountains, and were enabled in great measure, perhaps altogether, to support themselves by the cultivation of the soil. In *W. Ilâk* alone, in addition to a fine grove of olives near the ruins of an old monastery, there is for *three miles* a constant succession of gardens, each garden having in it two good wells which never fail, and producing olives, pears, apples, vines, figs, palms, nebk, carroub, apricot, mulberry, pomegranate, and poplar trees; while above and below these gardens runs a stream of water which affords here and there a pool large and deep enough to swim in."

All this confirms the view that the sustentation of the Israelites in the desert was not exclusively miraculous, but the resources of nature were supplemented by special intervention, from time to time.

*The Amalekites.* — Mr. Holland discovered in the neighborhood of *Jebel Hadêd*, "the Iron Mountain," remarkable ruins of buildings and tombs. These were constructed of undressed stones, of large size, laid together without mortar. The buildings were apparently designed for storehouses, having no windows; the tombs contained human bones. From the extent of these structures, and their massive workmanship, Mr. Holland concludes that they must have been built by a large and powerful people; and he is disposed to refer them to the Amalekites.

*The True Sinai.* — After a careful exploration of each point, Mr. Holland rejects *Serbal* and *Odjmeh* as the Biblical Sinai, since "in the neighborhood of the former there is *no plain*, in the latter range there is *no one distinct mountain*." He suggests as a possible competitor to *Jebel Musa*, *Jebel Um Alowee*, "the Mother of Heights." The road to the two is the same up to the last five or six miles; both rise almost precipitously from the plains beneath them; but *J. Um Alowee* has the advantage of much the larger plain — *Sennad*, which contains about *thirty* square miles of good camping ground.

*Route of the Israelites.* — Mr. Holland is of opinion that *Ain Hutherah*, commonly identified as Haseroth, could not have been one of the stations of the Israelites, since it lies in a cul-de-sac, and can be approached only by a steep narrow pass. "After crossing the Red Sea somewhere in the neighborhood of Suez, the Israelites took the lower road down the plain along the coast as far as *Ain Soouweira*, which may possibly mark the locality of Marah. They then turned inland to Elim, which I would place at *Ain Howara*. Their next encampment was by the sea, possibly near the mouth of *W. Ghurundel*, where was abundance of water." The wilderness of Sin is the plain of *es-Seyh*. Dofhkah was in the neighborhood of *W. Kenek*, near *Lib-el-cheir*. Alush, at *W. el Ash*, a broad wady uniting with *W. Berah*, no

* For a full account of the climate and vegetation, Schubert (*Reise*, ii. 251) may be consulted.

Digitized by Google

ir from *W. es-Sheikh*. Rephidim, Mr. Holland fixes at a point in *W. es-Sheikh* about 10 miles from *Jebel Musa*, at the gorge of the "*Mokad Nebi Musa*," the "seat of the Prophet Moses." This would have given the Amalekites strategic advantages for surprising the Israelites on their march.

It was mainly at the instance of Mr. Holland, and under the stimulus of his energetic example, that a scientific corps was sent out in 1869, to explore the peninsula of Arabia Petræa. The report of this expedition must give light upon many disputed points, but it cannot be obtained in time for use in this article. J. P. T.

SINIM (סִינִים: [Πέρσαι: *terra australis*]), a people noticed in Is. xlix. 12, as living at the extremity of the known world, either in the south or east. The majority of the early interpreters adopted the former view, but the LXX. in giving Πέρσαι favors the latter, and the weight of modern authority is thrown into the same scale, the name being identified by Gesenius, Hitzig, Knobel, and others, with the classical *Sinæ*, the inhabitants of the southern part of *China*. No locality in the south equally commends itself to the judgment: Sin, the classical Pelusium, which Bochart (*Phaleg*, iv. 27) suggests, is too near, and Syene (Michaelis, *Spicil.* ii. 32) would have been given in its well-known Hebrew form. There is no *à priori* improbability in the name of the Sinæ being known to the inhabitants of Western Asia in the age of Isaiah; for though it is not mentioned by the Greek geographers until the age of Ptolemy, it is certain that an inland commercial route connected the extreme East with the West at a very early period, and that a traffic was maintained on the frontier of China between the Sinæ and the Scythians, in the manner still followed by the Chinese and the Russians at *Kiachta*. If any name for these Chinese traders travelled westward, it would probably be that of the Sinæ, whose town Thinæ (another form of the Sinæ) was one of the great emporiums in the western part of China, and is represented by the modern *Thsin* or *Tsin*, in the province of *Schensi*. The Sinæ attained an independent position in Western China as early as the 8th century B. C., and in the 3d century B. C. established their sway under the dynasty of Tsin over the whole of the empire. The Rabbinical name of China, *Tsin*, as well as "China" itself, was derived from this dynasty (Gesen. *Thes.* s. v.). W. L. B.

SI'NITE (סִינִי: Ἀσενναῖος; [in Chr., Rom. Vat. omit:] *Zinaeus*). A tribe of Canaanites (Gen. x. 17; 1 Chr. i. 15), whose position is to be sought for in the northern part of the Lebanon district. Various localities in that district bear a certain amount of resemblance to the name, particularly Sinna, a mountain fortress mentioned by Strabo (xvi. p. 755); Sinum or Sinl, the ruins of which existed in the time of Jerome (*Quæst. in Gen.* l. c.); *Syn*, a village mentioned in the 15th century as near the river Arca (Gesen. *Thes.* p. 948); and *Dunnyeh*, a district near *Tripoli* (Robinson's *Researches*, ii. 494). The Targums of Onkelos and Jonathan give Orthosia, a town on the coast to the northeast of Tripolis. W. L. B.

SI'ON, MOUNT. 1. (הַר שִׂיאֹן [*lofty mount*]: Samar. הר שיאון: τὸ ὄρος τοῦ Σηε-: *mons Sion*). One of the various names of Mount Hermon which are fortunately preserved, all not improbably more ancient than "Hermon" itself. It occurs in Deut. iv. 48 only, and is interpreted by the lexicographers to mean "lofty." Fürst conjectures that these various appellations were the names of separate peaks or portions of the mountain. Some have supposed that Zion in Ps. cxxxiii. 3 is a variation of this Sion; but there is no warrant for this beyond the fact that so doing overcomes a difficulty of interpretation in that passage.[a]

2. (τὸ ὄρος Σιών; in Heb. Σιὼν ὄρος: *mons Sion.*) The Greek form of the Hebrew name ZION (Tsion), the famous Mount of the Temple (1 Macc. iv. 37, 60, v. 54, vi. 48, 62, vii. 33, x. 11, xiv. 27; Heb. xii. 22; Rev. xiv. 1). In the books of Maccabees the expression is always Mount Sion. In the other Apocryphal Books the name Sion is alone employed. Further, in the Maccabees the name unmistakably denotes the mount on which the Temple was built; on which the mosque of the *Aksa*, with its attendant mosques of Omar and the Mogrebbins, now stands. The first of the passages just quoted is enough to decide this. If it can be established that Zion in the Old Testament means the same locality with Sion in the books of Maccabees, one of the greatest puzzles of Jerusalem topography will be solved. This will be examined under ZION. G.

* There can be scarcely a question that in the passages above quoted from Maccabees, Sion is synonymous with Jerusalem — as in Isa. ii. 3: "for out of *Zion* shall go forth the law, and the word of the Lord from *Jerusalem*," and in Ps. cxlvii. 12: "Praise the Lord, O *Jerusalem*, praise thy God, O *Zion*" — where the words are *parallel*, and each clause has the same meaning. Accepting Sion in the books of Maccabees, as the same locality with Zion in the Old Testament used in this general sense, we have no great puzzle of Jerusalem topography to be solved. The examination proposed in the last line was for some reason not instituted. S. W.

SIPH'MOTH (שִׁפְמוֹת [*fruitful places*, Fürst]: [Rom. Σαφί; Vat. Σαφει; Alex. Σαφαμως: *Sephamoth*). One of the places in the south of Judah which David frequented during his free-booting life, and to his friends in which he sent a portion of the spoil taken from the Amalekites. It is named only in 1 Sam. xxx. 28. It is not named by Eusebius or Jerome. No one appears yet to have discovered or even suggested an identification of it. G.

* In 1 Chr. xxvii. 27, Zabdi, one of David's purveyors, is called the Shiphmite, not improbably because he belonged to Siphmoth. The commutation of *sh* and *s* is easily made, and a few MSS. actually read Shipmoth instead of Siphmoth in 1 Sam. xxx. 28. Thenius suggests on this last passage (*Bücher Samuels*), that Siphmoth may be the same as Shepham (Num. xxxiv. 10, 11) in the east part of Judah. This is a mere conjecture, though it agrees with 1 Chr. xxvii. 27, for Zabdi's office would require him to be at no great distance from David's court. H.

SIP'PAI [2 syl.] (סִפַּי [*thr shold, bowl*]: Σαφ-ι; Alex. Σεφφι: *Saphai*). One of the sons

---

a * This suppretion, instead of overcoming a difficulty, only adds another and greater. See HERMON, vol. ii. p. 1047, note *a* (Amer. ed.). S. W

of the Rephaim, or "the giants," slain by Sibbechai the Hushathite at Gezer (1 Chr. xx. 4). In 2 Sam. xxi. 18 he is called SAPH.

**SIRACH** (Σειράχ, Σιράχ: *Sirach*: in Rabbinic writers, סִירָא), the father of Jesus (Joshua), the writer of the Hebrew original of the Book of Ecclesiasticus. [ECCLESIASTICUS; JESUS, THE SON OF SIRACH.] B. F. W.

**SIRAH** [*departure, apostasy*], **THE WELL OF** (בְּאֵר הַסִּרָה: τὸ φρέαρ τοῦ Σειρά, in both MSS.: *cisterna Sira*). The spot from which Abner was recalled by Joab to his death at Hebron (2 Sam. iii. 26 only). It was apparently on the northern road from Hebron — that by which Abner would naturally return through Bahurim (ver. 16) to Mahanaim. There is a spring and reservoir on the western side of the ancient northern road, about one mile out of Hebron, which is called *Ain Sara*, and gives its name to the little valley in which it lies (see Dr. Rozen's paper on Hebron, in the *Zeitschrift der D. M. G.* xii. 486, and the excellent map accompanying it). This may be a relic of the well of Sirah. It is mentioned as far back as the 12th century by Rabbi Petachia, but the correspondence of the name with that of Sirah seems to have escaped notice. G.

**SIRION** (שִׂרְיֹן,[a] *i. e.* Siryon, in Deut., but in Ps. xxix. שִׂרְיוֹן, Shiryôn [see below]: Samar. שריין; Sam. Vers. רבן: Σανιήρ; [Comp. Σαριών:] *Sarion*). One of the various names of Mount Hermon, that by which it was known to the Zidonians (Deut. iii. 9). The word is almost identical with that (סְרִיָן) which in Hebrew denotes a "breastplate" or "cuirass," and Gesenius therefore expresses his belief that it was applied in this sense to the mountain, just as the name Thorax (which has the same meaning) was given to a mountain in Magnesia. This is not supported by the Samaritan Version, the rendering in which — *Rabban* — seems to be equivalent to *Jebel esh-Sheykh*, the ordinary, though not the only modern name of the mountain. [HERMON, vol. ii. p 1048.]

The use of the name in Ps. xxix. 6 (slightly altered in the original — Shirion instead of Sirion) is remarkable, though, bearing in mind the occurrence of Shenir in Solomon's Song, it can hardly be used as an argument for the antiquity of the psalm.[b] G.

**SISAMAI** [3 syl.] (סִסְמַי [*distinguished*, Fürst]: Σουσαί: *Sisamoi*). A descendant of Sheshan in the line of Jerahmeel (1 Chr. ii. 40).

**SISERA** (סִיסְרָא[c] [perh. *battle-array*, Ges.]: Σεισάρα, Σισάρα; Joseph. ὁ Σισάρης: *Sisara*). Captain (שַׂר) of the army of Jabin king of Canaan who reigned in Hazor. He himself resided in Harosheth[d] of the Gentiles. The particulars of the rout of Megiddo and of Sisera's flight and death are drawn out under the heads of BARAK, DEBORAH, JAEL, KENITES, KISHON, MANTLE, TENT. They have been recently elaborated, and combined into a living whole, with great attention to detail, yet without any sacrifice of force, by Professor Stanley, in his *Lectures on the Hist. of the Jewish Church*, Lect. xiv. To that accurate and masterly picture we refer our readers.

The army was mustered at the Kishon on the plain at the foot of the slopes of *Lejjûn*. Partly owing to the furious attack of Barak, partly to the impassable condition of the plain, and partly to the unwieldy nature of the host itself, which, amongst other impediments, contained 900[e] iron chariots — a horrible confusion and rout took place. Sisera deserted his troops and fled off on foot. He took

---

[a] No variation from שׂ to שׁ, or the reverse, is noticed in Döderlein and Meisner, on either occurrence of the name. [It exists, however; see Michaelis's *Bibl. Hebr.* on Deut. iii. 9. — A.]

[b] Capt. Warren reports some later observations respecting Sirion or HERMON, and corrects several minor inaccuracies of previous travellers. He makes the height of Hermon 9,000 feet above the level of the Mediterranean, and not 10,000 as in Murray's *Handbook*, ii. 455. The curious line of stones around the southern peak of the three summits is oval and not *circular*, and may have been for the same purpose as the *Kaaba* at Mecca. The existing temples on Hermon probably were *not* devoted to the older sun-worship (standing in fact where the sun is not visible until hours after it has risen), and the entrances are *not* on the west so as to bring the worshipper's face toward the sun-rising as to a *kiblah*, but all of them open toward the east. The inscriptions on the temples about Hermon are mostly Grecian, nearly all of them so defaced that only a few letters in each line can be deciphered. (*Athenæum*, Feb. 12, 1870, and *Quarterly Report of the Pal. Expl. Fund*, No. iv., 1869.) H.

[c] Gesenius (*Lex.* s. v.), by comparison with the Syriac, interprets the name as "battle-array." Fürst, on the other hand (*Handwb.* ii. 279), gives as its equivalent *Vermittelung*, the nearest approach to which is perhaps "lieutenant." As a Canaanite word its real signification is probably equally wide of either.

[d] The site of HAROSHETH has not yet been identified with certainty. But since the publication of vol. i. the writer observes that Dr. Thomson (*Land and Book*, ch. xxix.) has suggested a site which seems possible, and invites further examination. This is a Tell or mound on the north side of the Kishon, in the S. E. corner of the plain of Akka, just behind the hills which separate it from the larger plain of Jezreel. The Tell advances close to the foot of Carmel, and allows only room for the passage of the river between them. Its name is variously given as *Harothieh* (Thomson), *Harthijjeh* (Schuls), *Hurshiyeh* (Robinson), *Harti* (Van de Velde), and *el-Hartiyeh*. The latter is the form given in the official list made for the writer in 1861 by Consul Rogers, and is probably accurate. Dr. Thomson — apparently the only traveller who has examined the spot — speaks of the Tell as "covered with the remains of old walls and buildings," in which he sees the relics of the ancient castle of Sisera. [HAROSHETH, Amer. ed.]

[e] The number of Jabin's standing army is given by Josephus (*Ant.* v. 5, § 1) as 300,000 footmen, 10,000 horsemen, and 3,000 chariots. These numbers are large, but they are nothing to those of the Jewish legends. Sisera "had 40,000 generals, every one of whom had 100,000 men under him. He was thirty years old, and had conquered the whole world: and there was not a place the walls of which did not fall down at his voice. When he shouted the very beasts of the field were riveted to their places. 900 horses went in his chariot" (*Jalkut* ad loc.). "Thirty-one kings (comp. Josh. xii. 24) went with Sisera and were killed with him. They thirsted after the waters of the land of Israel, and they asked and prayed Sisera to take them with him without further reward" (comp. Judg. v. 19). (*Ber. Rab.* ch. 23.) The writer is indebted to the kindness of Mr. Deutsch for these extracts.

a northeast direction, possibly through Nazareth and Safed, or, if that direct road was closed to him, stole along by more circuitous routes till he found himself before the tents of Heber the Kenite, near Kedesh, on the high ground overlooking the upper basin of the Jordan Valley. Here he met his death from the hands of Jael, Heber's wife, who, although "at peace" with him, was under a much more stringent relation with the house of Israel (Judg. iv 2–22, v. 20, 26, 28, 30). [KENITES, vol. ii. p. 1530.] His name long survived as a word of fear and of exultation in the mouths of prophets and psalmists (1 Sam. xii. 9; Ps. lxxxiii. 9).

It is remarkable that from this enemy of the Jews should have sprung one of their most eminent characters. The great Rabbi Akiba, whose father was a Syrian proselyte of justice, was descended from Sisera of Harosheth (Bartolocci, iv. 272). The part which he took in the Jewish war of independence, when he was standard-bearer to Barcocba (Otho, *Hist. doct. Mish.* 134 note), shows that the warlike force still remained in the blood of Sisera.

**2.** (Σισάρα, Σισαρδθ; Alex. Σισαραα, Σεισαραθ; [in Ezr., Vat. omits; in Neh., Vat. FA. Σεσειραθ].) After a long interval the name reappears in the lists of the Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 53; Neh. vii. 55). The number of foreign, non-Israelite names[a] which occur in these invaluable lists has been already noticed under MEHUNIMS (iii. 1875). Sisera is another example, and doubtless tells of Canaanite captives devoted to the lowest offices of the Temple, even though the Sisera from whom the family derived its name were not actually the same person as the defeated general of Jabin. It is curious that it should occur in close companionship with the name Haraha (ver. 52) which irresistibly recalls Harosheth.

In the parallel list of 1 Esdr. v. 32 Sisera is given as ASERER. G.

**SISIN'NES** (Σισίννης: *Sisennes*). A governor of Syria and Phœnicia under Darius, and a contemporary of Zerubbabel (1 Esdr. vi. 3). He attempted to stop the rebuilding of the Temple, but was ordered by Darius, after consulting the archives of Cyrus's reign, to adopt the opposite course, and to forward the plans of Zerubbabel (*ibid.* vi. 7, vii. 1). In Ezra he is called TATNAI.

* **SISTER'S SON.** Ἀνέψιος, so translated Col. iv. 10 (A. V.), should be rendered "cousin" in accordance with its use both in the LXX. and in classic Greek. See Num. xxxvi. 11, and LXX. (Heb. בְּנֵי דֹדִים).

It has been suggested (Ellicott, Col. iv. 10, *Transl.*) that the term "sister's son" in the A. V. may be an archaism, as having been formerly used like the German *Geschwisterkind*, in the sense of "cousin." Similarly the word *nephew* wherever it occurs in the A. V. (Judg. xii. 14; Job xviii. 19; Is. xiv. 22; 1 Tim. v. 4), is used in the now obsolete sense of *grandchild, descendant*.

D. S. T.

**SIT'NAH** (שִׂטְנָה [*accusation, strife*]: ἐχθρία; Joseph. Σιτεννά: *Inimicitiæ*). The second of the two wells dug by Isaac in the valley of Gerar, and the possession of which the herdmen of the valley disputed with him (Gen. xxvi. 21). Like the first one, ESEK, it received its name from the disputes which took place over it, *Sitnah* meaning, as is stated in the margin, "hatred," or more accurately "accusation," but the play of expression has not been in this instance preserved in the Hebrew.[b] The LXX., however, have attempted it: ἐκρίνοντο . . . . ἐχθρία. The root of the name is the same as that of Satan, and this has been taken advantage of by Aquila and Symmachus, who render it respectively ἀντικειμένη and ἀναντίωσις. Of the situation of Esek and Sitnah nothing whatever is known. [GERAR.] G.

**SIVAN.** [MONTH.]

* **SKIN.** [BADGER SKINS; BOTTLE; LEATHER.]

* **SKIRTS,** Ps. cxxxiii. 2. See OINTMENT, vol. iii. p. 2214 *b*.

**SLAVE.**[c] The institution of slavery was recognized, though not established, by the Mosaic Law with a view to mitigate its hardships and to secure to every man his ordinary rights. Repugnant as the notion of slavery is to our minds, it is difficult to see how it can be dispensed with in certain phases of society without, at all events, entailing severer evils than those which it produces. Exclusiveness of race is an instinct that gains strength in proportion as social order is weak, and the rights of citizenship are regarded with peculiar jealousy in communities which are exposed to contact with aliens. In the case of war, carried on for conquest or revenge, there were but two modes of dealing with the captives, namely, putting them to death or reducing them to slavery. The same may be said in regard to such acts and outrages as disqualified a person for the society of his fellow-citizens. Again, as citizenship involved the condition of freedom and independence, it was almost necessary to offer the alternative of disfranchisement to all who through poverty or any other contingency were unable to support themselves in independence. In all these cases slavery was the mildest of the alternatives that offered, and may hence be regarded as a blessing rather than a curse. It should further be noticed that a laboring class, in our sense of the term, was almost unknown to the nations of antiquity: hired service was regarded as incompatible with freedom; and hence the slave in many cases occupied the same social position as the servant or laborer of modern times, though differing from him in regard to political status. The Hebrew designation of the slave shows that service was the salient feature of his condition; for the term *ebed*,[d] usually applied to him, is derived

---

[a] MEHUNIM, NEPHUSIM, HARSHA, REKEM.

[b] In the A. V. of vv. 20, 21, two entirely distinct Hebrew words are each rendered "strive."

[c] * The word "slave" occurs in the English Bible only in Jer. ii. 14, and Rev. xviii. 13, and four times in the Apocrypha. As the word was not uncommon in writers of the epoch to which our version belongs, there seems to have been a special reason for this exception. Trench suggests (*Authorized Version*, p. 104) that the translators may have felt that the modern term conveys an idea of degradation and contempt which the Hebrew and Greek equivalents do not convey as applied to the ancient system of servitude. *Slave* (softened from *sklave*) was originally a national appellation, *Sklavonic* or *Sclavonic*. On the etymology of the word see Schmitthenner's *Wörterb. für Nymcologie*, etc., p. 447, and Gibbon's *Decline and Fall of the Roman Empire*, ch. lx. H.

[d] עֶבֶד.

Digitized by Google

from a verb signifying "to work," and the very same term is used in reference to offices of high trust held by free men. In short, service and slavery would have been to the ear of the Hebrew equivalent terms, though he fully recognized grades of servitude, according as the servant was a Hebrew or a non-Hebrew, and, if the latter, according as he was bought with money (Gen. xvii. 12; Ex. xii. 44) or born in the house (Gen. xiv. 14, xv. 3, xvii. 23). We shall proceed to describe the condition of these classes, as regards their original reduction to slavery, the methods by which it might be terminated, and their treatment while in that state.

I. *Hebrew Slaves.*

1. The circumstances under which a Hebrew might be reduced to servitude were — (1) poverty; (2) the commission of theft; and (3) the exercise of paternal authority. In the first case, a man who had mortgaged his property, and was unable to support his family, might sell himself to another Hebrew, with a view both to obtain maintenance, and perchance a surplus sufficient to redeem his property (Lev. xxv. 25, 39). It has been debated whether under this law a creditor could seize his debtor and sell him as a slave:[a] the words do not warrant such an inference, for the poor man is said in Lev. xxv. 39 to *sell himself* (not as in the A. V., "be sold;" see Gesen. *Thes.* p. 787), in other words, to enter into *voluntary* servitude, and this under the pressure not of debt, but of *poverty*. The instances of seizing the children of debtors in 2 K. iv. 1 and Neh. v. 5 were not warranted by law, and must be regarded as the outrages of lawless times, while the case depicted in the parable of the unmerciful servant is probably borrowed from Roman usages (Matt. xviii. 25). The words in Is. l. 1, "Which of my creditors is it to whom I have sold you?" have a *primâ facie* bearing upon the question, but in reality apply to one already in the condition of slavery. (2.) The commission of theft rendered a person liable to servitude, whenever restitution could not be made on the scale prescribed by the Law (Ex. xxii. 1, 3). The thief was bound to work out the value of his restitution money in the service of him on whom the theft had been committed (for, according to Josephus, *Ant.* xvi. 1, § 1, there was no power of selling the person of a thief to a foreigner); when this had been effected he would be free, as implied in the expression "sold for his theft," *i. e. for the amount of* his theft. This law contrasts favorably with that of the Romans, under which a thief became the actual property of his master. (3.) The exercise of paternal authority was limited to the sale of a daughter of tender age to be a maid-servant, with the ulterior view of her becoming a concubine of the purchaser (Ex. xxi. 7). Such a case can perhaps hardly be regarded as implying servitude in the ordinary sense of the term.

2. The servitude of a Hebrew might be terminated in three ways: (1) by the satisfaction or the remission of all claims against him;[b] (2) by the recurrence of the year of Jubilee (Lev. xxv. 40), which might arrive at any period of his servitude and (3), failing either of these, the expiration of six years from the time that his servitude commenced (Ex. xxi. 2; Deut. xv. 12). There can be no doubt that this last regulation applied equally to the cases of poverty and theft, though Rabbinical writers have endeavored to restrict it to the former. The period of seven years has reference to the Sabbatical principle in general, but not to the Sabbatical year, for no regulation is laid down in reference to the manumission of servants in that year (Lev. xxv. 1 ff.; Deut. xv. 1 ff.). We have a single instance, indeed, of the Sabbatical year being celebrated by a general manumission of Hebrew slaves, but this was in consequence of the neglect of the law relating to such cases (Jer. xxxiv. 14[c]). (4.) To the above modes of obtaining liberty the Rabbinists added as a fourth, the death of the master without leaving a son, there being no power of claiming the slave on the part of any heir except a son (Maimon. *Abad.* 2, § 12).

If a servant did not desire to avail himself of the opportunity of leaving his service, he was to signify his intention in a formal manner before the judges (or more exactly *at the place of judgment*[d]), and then the master was to take him to the door-post, and to bore his ear through with an awl (Ex. xxi. 6), driving the awl into or "unto the door," as stated in Deut. xv. 17, and thus fixing the servant to it. Whether the door was that of the master's house or the door of the sanctuary, as Ewald (*Alterth.* p. 245) infers from the expression *el hâelohim*, to which attention is drawn above, is not stated; but the significance of the action is enhanced by the former view; for thus a connection is established between the servant and the house in which he was to serve. The boring of the ear was probably a token of subjection, the ear being the organ through which commands were received (Ps. xl. 6). A similar custom prevailed among the Mesopotamians (Juv. i. 104), the Lydians (Xen. *Anab.* iii. 1, § 31), and other ancient nations. A servant who had submitted to this operation remained according to the words of the Law, a servant "for ever" (Ex. xxi. 6). These words are, however, interpreted by Josephus (*Ant.* iv. 8, § 28) and by the Rabbinists as meaning until the year of Jubilee, partly from the universality of the freedom that was then proclaimed, and partly perhaps because it was necessary for the servant then to resume the cultivation of his recovered inheritance. The latter point no doubt presents a difficulty, but the interpretation of the words "for ever" in any other than their obvious sense presents still greater difficulties.

3. The condition of a Hebrew servant was by no means intolerable. His master was admonished to treat him, not "as a bond-servant, but as an hired servant and as a sojourner," and, again, "not to rule over him with rigor" (Lev. xxv. 39, 40, 43). The Rabbinists specified a variety of duties as coming under these general precepts; for instance, compensation for personal injury, exemption from menial duties, such as unbinding the master's sandals

---

[a] Michaelis (*Comment.* iii. 9, § 123) decides in the affirmative.

[b] This is implied in the statement of the cases which gave rise to the servitude: indeed without such an assumption the words "for his theft" (Ex. xxii. 3) would be unmeaning. The Rabbinists gave their sanction to such a view (Maimon. *Abad.* 2, §§ 8, 11).

[c] The rendering of the A. V. "*at the end* of seven years" in this passage is not wholly correct. The meaning rather is "at the end of a Sabbatical period of years," the whole of the seventh year being regarded as the end of the period.

[d] אֶל־הָאֱלֹהִים; πρὸς τὸ κριτήριον, LXX.

Digitized by Google

or carrying him in a litter, the use of gentle language on the part of the master, and the maintenance of the servant's wife and children, though the master was not allowed to exact work from them (Mielziner, *Sklaven bei den Hebr.* p. 31). At the termination of his servitude the master was enjoined not to "let him go away empty," but to remunerate him liberally out of his flock, his floor, and his wine-press (Deut. xv. 13, 14). Such a custom would stimulate the servant to faithful service, inasmuch as the amount of the gift was left to the master's discretion; and it would also provide him with means wherewith to start in the world afresh.

In the event of a Hebrew becoming the servant of a "stranger," meaning a non-Hebrew, the servitude could be terminated only in two ways, namely, by the arrival of the year of Jubilee, or by the repayment to the master of the purchase-money paid for the servant, after deducting a sum for the value of his services proportioned to the length of his servitude (Lev. xxv. 47–55). The servant might be redeemed either by himself or by one of his relations, and the object of this regulation appears to have been to impose upon relations the obligation [a] of effecting the redemption, and thus putting an end to a state which must have been peculiarly galling to the Hebrew.

A Hebrew woman might enter into voluntary servitude on the score of poverty, and in this case she was entitled to her freedom after six years' service, together with the usual gratuity at leaving, just as in the case of a man (Deut. xv. 12, 13). According to Rabbinical tradition a woman could not be condemned to servitude for theft; neither could she bind herself to perpetual servitude by having her ear bored (Mielziner, p. 43).

Thus far we have seen little that is objectionable in the condition of Hebrew servants. In respect to marriage there were some peculiarities which, to our ideas, would be regarded as hardships. A master might, for instance, give a wife to a Hebrew servant for the time of his servitude, the wife being in this case, it must be remarked, not only a slave but a non-Hebrew. Should he leave when his term has expired, his wife and children would remain the absolute property of the master (Ex. xxi. 4, 5). The reason for this regulation is, evidently, that the children of a female heathen slave were slaves: they inherited the mother's disqualification. Such a condition of marrying a slave would be regarded as an axiom by a Hebrew, and the case is only incidentally noticed. Again, a father might sell his young daughter [b] to a Hebrew, with a view either of [his] marrying her himself, or of [his] giving her to his son (Ex. xxi. 7–9). It diminishes the apparent harshness of this proceeding if we look on the purchase-money as in the light of a dowry given, as was not unusual, to the parents of the bride; still more, if we accept the Rabbinical view (which, however, we consider very doubtful) that the consent of the maid was required before the marriage could take place. But even if this consent were not obtained, the paternal authority would not appear to be violently strained; for among ancient nations that authority was generally held to extend even to the life of a child, much more to the giving of a daughter in marriage. The position of a maiden thus sold by her father was subject to the following regulations: (1.) She could not "go out as the men-servants do," *i. e.* she could not leave at the termination of six years, or in the year of Jubilee, if (as the regulation assumes) her master was willing to fulfill the object for which he had purchased her. (2.) Should he not wish to marry her, he should call upon her friends to procure her release by the repayment of the purchase-money (perhaps, as in other cases, with a deduction for the value of her services). (3.) If he betrothed her to his son, he was bound to make such provision for her as he would for one of his own daughters. (4.) If either he or his son, having married her, took a second wife, it should not be to the prejudice of the first. (5.) If neither of the three first specified alternatives took place, the maid was entitled to immediate and gratuitous liberty (Ex. xxi. 7–11).

The custom of reducing Hebrews to servitude appears to have fallen into disuse subsequently to the Babylonish Captivity. The attempt to enforce it in Nehemiah's time met with decided resistance (Neh. v. 5), and Herod's enactment that thieves should be sold to foreigners, roused the greatest animosity (Joseph. *Ant.* xvi. 1, § 1). Vast numbers of Hebrews were reduced to slavery as war-captives at different periods by the Phœnicians (Joel iii. 6), the Philistines (Joel iii. 6; Am. i. 6), the Syrians (1 Macc. iii. 41; 2 Macc. viii. 11), the Egyptians (Joseph. *Ant.* xii. 2, § 3), and, above all, by the Romans (Joseph. *B. J.* vi. 9, § 3). We may form some idea of the numbers reduced to slavery by war from the single fact that Nicanor calculated on realizing 2,000 talents in one campaign, by the sale of captives at the rate of 90 for a talent (2 Macc. viii. 10, 11), the number required to fetch the sum being 180,000. The Phœnicians were the most active slave-dealers of ancient times, purchasing of the Philistines (Am. i. 9), of the Syrians (2 Macc. viii. 11), and even of the Scythians on the shores of the Euxine Sea (Ez. xxvii. 13), and selling them wherever they could find a market about the shores of the Mediterranean, and particularly in Joel's time to the people of Javan (Joel iii. 6), it being uncertain whether that name represents a place in South Arabia or the Greeks of Asia Minor and the peninsula. It was probably through the Tyrians that Jews were transported in Obadiah's time to Sepharad or Sardis (Ob. 20). At Rome vast numbers of Jews emerged from the state of slavery and became freedmen. The price at which the slaves were offered by Nicanor was considerably below the ordinary value either in Palestine or Greece. In the former country it stood at 30 shekels (= about £3 8*s.*), as stated below, in the latter at about 1¼ minas (= about £5 1*s.* 6*d.*), this being the mean between the extremes stated by Xenophon (*Mem.* ii. 5, § 2) as the ordinary price at Athens. The price at which Nicanor offered them was only £2 15*s.* 2*d.* a head.

---

[a] In the A. V the sense of *obligation* is not conveyed; instead of "may" in vv. 48 49, *shall* ought to be substituted.

[b] The female slave was in this case termed אָמָה, distinct from שִׁפְחָה, applied to the ordinary household slave. The distinction is marked in regard to Hagar, who is described by the latter term before the birth of Ishmael, and by the former after that event (comp. Gen. xvi. 1, xxi. 10). The relative value of the terms is expressed in Abigail's address, "Let thine handmaid (*amâh*) be a servant (*shiphchâh*) to wash," etc. (1 Sam. xxv. 41).

Occasionally slaves were sold as high as a talent (£243 15s.) each (Xen. *l. c.*; Joseph. *Ant.* xii. 1, § 9).

II. *Non-Hebrew Slaves.*

1. The majority of non-Hebrew slaves were war-captives, either the Canaanites who had survived the general extermination of their race under Joshua, or such as were conquered from the other surrounding nations (Num. xxxi. 26 ff.). Besides these, many were obtained by purchase from foreign slave-dealers (Lev. xxv. 44, 45); and others may have been resident foreigners who were reduced to this state either by poverty or crime. The Rabbinists further deemed that any person who performed the services of a slave became *ipso facto* a slave (Mishn. *Kedush.* 1, § 3). The children of slaves remained slaves, being the class described as "born in the house" (Gen. xiv. 14, xvii. 12; Eccl. ii. 7), and hence the number was likely to increase as time went on. The only statement as to their number applies to the post-Babylonian period, when they amounted to 7,337, or about 1 to 6 of the free population (Ezr. ii. 65). We have reason to believe that the number diminished subsequently to this period, the Pharisees in particular being opposed to the system. The average value of a slave appears to have been thirty shekels (Ex. xxi. 32), varying of course according to age, sex, and capabilities. The estimation of persons given in Lev. xxvii. 2–8 probably applies to war-captives who had been dedicated to the Lord, and the price of their redemption would in this case represent the ordinary value of such slaves.

2. That the slave might be manumitted, appears from Ex. xxi. 26, 27; Lev. xix. 20. As to the methods by which this might be effected, we are told nothing in the Bible; but the Rabbinists specify the following four methods: (1) redemption by a money payment, (2) a bill or ticket of freedom, (3) testamentary disposition, or, (4) any act that implied manumission, such as making a slave one's heir (Mielziner, pp. 65, 66).

3. The slave is described as the "possession" of his master, apparently with a special reference to the power which the latter had of disposing of him to his heirs as he would any other article of personal property (Lev. xxv. 45, 46); the slave is also described as his master's "money" (Ex. xxi. 21), *i. e.* as representing a certain money value. Such expressions show that he was regarded very much in the light of a *mancipium* or chattel. But on the other hand, provision was made for the protection of his person: willful murder of a slave entailed the same punishment as in the case of a free man (Lev. xxiv. 17, 22). So again, if a master inflicted so severe a punishment as to cause the death of his servant, he was liable to a penalty, the amount of which probably depended on the circumstances of the case, for the Rabbinical view that the words "he shall be surely punished," or, more correctly, "it is to be avenged," imply a sentence of death, is wholly untenable (Ex. xxi. 20). No punishment at all was imposed if the slave survived the punishment by a day or two (Ex. xxi. 21), the loss of the slave[a] being regarded as a sufficient punishment in this case. A minor personal injury, such as the loss of an eye or a tooth was to be recompensed by giving the servant his liberty (Ex. xxi. 26, 27). The general treatment of slaves appears to have been gentle — occasionally too gentle, as we infer from Solomon's advice (Prov. xxix. 19, 21), nor do we hear more than twice of a slave running away from his master (1 Sam. xxv. 10; 1 K. ii. 39). The slave was considered by a conscientious master as entitled to justice (Job xxxi. 13–15) and honorable treatment (Prov. xxx. 10). A slave, according to the Rabbinists, had no power of acquiring property for himself; whatever he might become entitled to, even by way of compensation for personal injury, reverted to his master (Mielziner, p. 55). On the other hand, the master might constitute him his heir either wholly (Gen. xv. 3), or jointly with his children (Prov. xvii. 2); or again, he might give him his daughter in marriage (1 Chr. ii. 35).

The position of the slave in regard to religious privileges was favorable. He was to be circumcised (Gen. xvii. 12), and hence was entitled to partake of the Paschal sacrifice (Ex. xii. 44), as well as of the other religious festivals (Deut. xii. 12, 18, xvi. 11, 14). It is implied that every slave must have been previously brought to the knowledge of the true God, and to a willing acceptance of the tenets of Judaism. This would naturally be the case with regard to all who were "born in the house," and who were to be circumcised at the usual age of eight days; but it is difficult to understand how those who were "bought with money," as adults, could be always induced to change their creed, or how they could be circumcised without having changed it. The Mosaic Law certainly presupposes an universal acknowledgment of Jehovah within the limits of the Promised Land, and would therefore enforce the dismissal or extermination of slaves who persisted in heathenism.

The occupations of slaves were of a menial character, as implied in Lev. xxv. 39, consisting partly in the work of the house, and partly in personal attendance on the master. Female slaves, for instance, ground the corn in the handmill (Ex. xi. 5; Job xxxi. 10; Is. xlvii. 2), or gleaned in the harvest field (Ruth ii. 8). They also baked, washed, cooked, and nursed the children (Mishn. *Cethub.* 5, § 5). The occupations of the men are not specified; the most trustworthy held confidential posts, such as that of steward or major-domo (Gen. xv. 2, xxiv. 2), of tutors to sons (Prov. xvii. 2), and of tenants to persons of large estate, for such appears to have been the position of Ziba (2 Sam ix. 2, 10). W. L. B.

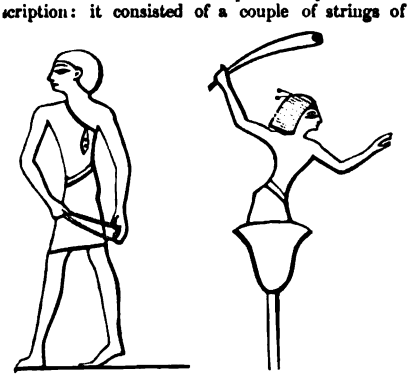
Arabs, translated ἄσφαλτος by the LXX., and bitumen in the Vulgate. That our translators understood by this word the substance now known as bitumen, is evident from the following passages in Holland's Pliny (ed. 1634): "The very clammy slime Bitumen, which at certaine times of the yere floteth and swimmeth upon the lake of Sodom, called Asphaltites in Jury" (vii. 15, vol. i. p. 163). "The Bitumen whereof I speake, is in some places in manner of a muddy *slime;* in others, very earth or minerall" (xxxv. 15, vol. ii. p. 557).

The three instances in which it is mentioned in the O. T. are abundantly illustrated by travellers and historians, ancient and modern. It is first spoken of as used for cement by the builders in the plain of Shinar, or Babylonia (Gen. xi. 3). The bitumen pits in the vale of Siddim are mentioned in the ancient fragment of Canaanitish history (Gen. xiv. 10); and the ark of papyrus in which Moses was placed was made impervious to water by a coating of bitumen and pitch (Ex. ii. 3).

Herodotus (i. 179) tells us of the bitumen found at Is, a town of Babylonia, eight days' journey from Babylon. The captive Eretrians (Her. vi. 119) were sent by Darius to collect asphaltum, salt, and oil at Ardericca, a place two hundred and ten stadia from Susa, in the district of Cissia. The town of Is was situated on a river, or small stream, of the same name, which flowed into the Euphrates, and carried down with it the lumps of bitumen, which was used in the building of Babylon. It is probably the bitumen springs of Is which are described in Strabo (xvi. 743). Eratosthenes, whom he quotes, says that the liquid bitumen, which is called naphtha, is found in Susiana, and the dry in Babylonia. Of the latter there is a spring near the Euphrates, and when the river is flooded by the melting of the snow, the spring also is filled and overflows into the river. The masses of bitumen thus produced are fit for buildings which are made of baked brick. Diodorus Siculus (ii. 12) speaks of the abundance of bitumen in Babylonia. It proceeds from a spring, and is gathered by the people of the country, not only for building, but when dry for fuel, instead of wood. Ammianus Marcellinus (xxiii. 6, § 23) tells us that Babylon was built with bitumen by Semiramis (comp. Plin. xxv. 51; Berosus, quoted by Jos. *Ant.* x. 11, § 1, *c. Apion.* i. 19; Arrian, *Exp. Al.* vii. 17, § 1, &c.). The town of Is, mentioned by Herodotus, is without doubt the modern *Hit* or *Heet*, on the west or right bank of the Euphrates, and four days' journey, N. W., or rather W. N. W., of Bagdad (Sir R. Ker Porter's *Trav.* ii. 361, ed. 1822). The principal bitumen pit at Heet, says Mr. Rich (*Memoir on the Ruins of Babylon*, p. 63, ed. 1815), has two sources, and is divided by a wall in the centre, on one side of which the bitumen bubbles up, and on the other the oil of naphtha. Sir R. K. Porter (ii. 315) observed "that bitumen was chiefly confined by the Chaldæan builders, to the foundations and lower parts of their edifices; for the purpose of preventing the ill effects of water." "With regard to the use of bitumen," he adds, "I saw no vestige of it whatever on any remnant of building on the higher ascents, and therefore drier regions." This view is indirectly confirmed by Mr. Rich, who says that the tenacity of bitumen bears no proportion to that of mortar. The use of bitumen appears to have been confined to the Babylonians, for at Nineveh, Mr. Layard observes (*Nin.* ii. 278), "bitumen and reeds were not employed to cement the layers of bricks, as at Babylon; although both materials are to be found in abundance in the immediate vicinity of the city." At Nimroud bitumen was found under a pavement (*Nin.* i. 29), and "the sculpture rested simply upon the platform of sun-dried bricks without any other substructure, a mere layer of bitumen, about an inch thick, having been placed under the plinth" (*Nin. & Bab.* p. 208). In his description of the firing of the bitumen pits at Nimroud by his Arabs, Mr. Layard falls into the language of our translators. "Tongues of flame and jets of gas, driven from the burning pit, shot through the murky canopy. As the fire brightened, a thousand fantastic forms of light played amid the smoke. To break the cindered crust, and to bring fresh *slime* to the surface, the Arabs threw large stones into the spring. . . . . In an hour the bitumen was exhausted for the time, the dense smoke gradually died away, and the pale light of the moon again shone over the black *slime pits*" (*Nin. & Bab.* p. 202).

The bitumen of the Dead Sea is described by Strabo, Josephus, and Pliny. Strabo (xvi. 763) gives an account of the volcanic action by which the bottom of the sea was disturbed, and the bitumen thrown to the surface. It was at first liquefied by the heat, and then changed into a thick viscous substance by the cold water of the sea, on the surface of which it floated in lumps (βῶλοι). These lumps are described by Josephus (*B. J.* iv. 8, § 4) as of the size and shape of a headless ox (comp. Plin. vii. 13). The semi-liquid kind of bitumen is that which Pliny says is found in the Dead Sea, the earthy in Syria about Sidon. Liquid bitumen, such as the Zacynthian, the Babylonian, and the Apolloniatic, he adds, is known by the Greeks by the name of pis-asphaltum (comp. Ex. ii. 3, LXX.). He tells us moreover that it was used for cement, and that bronze vessels and statues and the heads of nails were covered with it (Plin. xxxv. 51). The bitumen pits by the Dead Sea are described by the monk Brocardus (*Descr. Terr. Sanct.* c. 7, in Ugolini, vi. 1044). The Arabs of the neighborhood have perpetuated the story of its formation as given by Strabo. "They say that it forms on the rocks in the depths of the sea, and by earthquakes or other submarine concussions is broken off in large masses, and rises to the surface" (Thomson, *Land and Book*, p. 223). They told Burckhardt a similar tale. "The asphaltum (حمر), *Hommar*, which is collected by the Arabs of the western shore, is said to come from a mountain which blocks up the passage along the eastern *Ghor*, and which is situated at about two hours south of *Wady Mojeb*. The Arabs pretend that it oozes up from fissures in the cliff, and collects in large pieces on the rock below, where the mass gradually increases and hardens, until it is rent asunder by the heat of the sun, with a loud explosion, and, falling into the sea, is carried by the waves in considerable quantities to the opposite shores" (*Trav. in Syria*, p. 394). Dr. Thomson tells us that the Arabs still call these pits by the name *bidrat hämmar*, which strikingly resembles the Heb. *bĕêróth chêmâr* of Gen. xiv. 10 (*Land and Book*, p. 224).



Strabo says that in Babylonia boats were made of wicker-work, and then covered with bitumen to

Digitized by Google

keep out the water (xvi. p. 743). In the same way the ark of rushes or papyrus in which Moses was placed was plastered over with a mixture of bitumen and pitch or tar. Dr. Thomson remarks (p. 224): "This is doubly interesting, as it reveals the process by which they prepared the bitumen. The mineral, as found in this country, melts readily enough by itself; but then, when cold, it is as brittle as glass. It must be mixed with *tar* while melting, and in that way forms a hard, glossy wax, perfectly impervious to water." We know from Strabo (xvi. p. 764) that the Egyptians used the bitumen of the Dead Sea in the process of embalming, and Pliny (vi. 35) mentions a spring of the same mineral at Corambis in Ethiopia.

W. A. W.

**SLING** (קֶלַע: *σφενδόνη*: *funda*). The sling has been in all ages the favorite weapon of the shepherds of Syria (1 Sam. xvii. 40; Burckhardt's *Notes*, i. 57), and hence was adopted by the Israelitish army, as the most effective weapon for light-armed troops. The Benjamites were particularly expert in their use of it: even the left-handed could "sling stones at an hair and not miss" (Judg. xx. 16; comp. 1 Chr. xii. 2). According to the Targum of Jonathan and the Syriac, it was the weapon of the Cherethites and Pelethites. It was advantageously used in attacking and defending towns (2 K. iii. 25; Joseph. *B. J.* iv. 1, § 3), and in skirmishing (*B. J.* ii. 17, § 5). Other eastern nations availed themselves of it, as the Syrians (1 Macc. ix. 11), who also invented a kind of artificial sling (1 Macc. vi. 51); the Assyrians (Jud. ix. 7; Layard's *Nin.* ii. 344); the Egyptians (Wilkinson, i. 357); and the Persians (Xen. *Anab.* iii. 3, § 18). The construction of the weapon hardly needs description: it consisted of a couple of strings of

Egyptian Slingers. (Wilkinson.)

wool or some fibrous substance, attached to a leathern receptacle for the stone in the centre, which was termed the *caph*,[a] i. e. pan (1 Sam. xxv. 29): the sling was swung once or twice round the head, and the stone was then discharged by letting go one of the strings. Sling-stones[b] were selected for their smoothness (1 Sam. xvii. 40), and were recognized as one of the ordinary munitions of war (2 Chr. xxvi. 14). In action the stones were either carried in a bag round the neck (1 Sam. xvii. 40) or were heaped up at the feet of the combatant (Layard's *Nin.* ii. 344). The violence with which the stone was projected supplied a vivid image of sudden and forcible removal (Jer. x. 18). The rapidity of the whirling motion of the sling round the head, was emblematic of inquietude (1 Sam. xxv. 29, "the souls of thine enemies shall he *whirl round* in the midst of the pan of a sling"); while the sling-stones represented the enemies of God (Zech. ix. 15, "they shall tread under foot the sling-stones"). The term *margêmâh*[c] in Prov. xxvi. 8 is of doubtful meaning; Gesenius (*Thes.* p. 1263) explains of "a heap of stones," as in the margin of the A. V., the LXX.; Ewald, and Hitzig, of "a sling," as in the text. W. L. B.

* **SLUICES.** The word so translated (שְׂכָרָה, in Is. xix 10 seems to have been entirely misapprehended by our English translators, after the example of some of the ancient versions. It means *hire, wages*, and the last clause of the verse should be rendered, "and all those who work for wages shall be of a sad heart." On the origin of the error and the true meaning, see Gesenius (*Comm. ü. den Jesaia*, in loc.). R. D. C. R.

**SMITH.**[d] The work of the smith, together with an account of his tools, is explained in HANDICRAFT, vol. ii. p. 992 f. A description of a smith's workshop is given in Ecclus. xxxviii. 28

H. W. P.

**SMYRNA** [Σμύρνα, *myrrh*: *Smyrna*]. The city to which allusion is made in Revelation ii. 8–11, was founded, or at least the design of founding it was entertained, by Alexander the Great soon after the battle of the Granicus, in consequence of a dream when he had lain down to sleep after the fatigue of hunting. A temple in which two goddesses were worshipped under the name of Nemeses stood on the hill, on the sides of which the new town was built under the auspices of Antigonus and Lysimachus, who carried out the design of the conqueror after his death. It was situated twenty stades from the city of the same name, which after a long series of wars with the Lydians had been finally taken and sacked by Halyattes. The rich lands in the neighborhood were cultivated by the inhabitants, scattered in villages about the country (like the Jewish population between the times of Zedekiah and Ezra), for a period which Strabo, speaking roundly, calls 400 years. The descendants of this population were reunited in the new Smyrna, which soon became a wealthy and important city. Not only was the soil in the neighborhood eminently productive — so that the vines were even said to have two crops of grapes — but its position was such as to render it the natural outlet for the produce of the whole valley of the Hermus. The Pramnean wine (which Nestor in the Iliad, and Circe in the Odyssey, are represented as mixing with honey, cheese, and meal, to make a

sind of salad dressing) grew even down to the time of Pliny in the immediate neighborhood of the temple of the Mother of the gods at Smyrna, and doubtless played its part in the orgiastic rites both of that deity and of Dionysus, each of whom in the times of Imperial Rome possessed a guild of worshippers frequently mentioned in the inscriptions as the ἱερὰ σύνοδος μυστῶν μητρὸς Σιπυλήνης and the ἱερὰ σύνοδος μυστῶν καὶ τεχνίτων Διονύσου. One of the most remarkable of the *chefs d'œuvre* of Myron which stood at Smyrna, representing an old woman intoxicated, illustrates the prevalent habits of the population.

The inhabitants of New Smyrna appear to have possessed the talent of successfully divining the course of events in the troublous times through which it was their destiny to pass, and of habitually securing for themselves the favor of the victor for the time being. Their adulation of Seleucus and his son Antiochus was excessive. The title ὁ θεὸς καὶ σωτήρ is given to the latter in an extant inscription; and a temple dedicated to his mother Stratonice, under the title of Ἀφροδίτη Στρατονίκις, was not only constituted a sanctuary itself, but the same right was extended in virtue of it to the whole city. Yet when the tide turned, a temple was erected to the city Rome as a divinity in time to save the credit of the Smyrnæans as zealous friends of the Roman people. Indeed, though history is silent as to the particulars, the existence of a coin of Smyrna with the head of Mithridates upon it, indicates that this energetic prince also, for a time at least, must have included Smyrna within the circle of his dependencies. However, during the reign of Tiberius, the reputation of the Smyrnæans for an ardent loyalty was so unsullied, that on this account alone they obtained permission to erect a temple, in behalf of all the Asiatic cities, to the emperor and senate, the question having been for some time doubtful as to whether their city or Sardis [SARDIS] — the two selected out of a crowd of competitors — should receive this distinction. The honor which had been obtained with such difficulty, was requited with a proportionate adulation. Nero appears in the inscriptions as σωτὴρ καὶ σύμπαντος ἀνθρωπείου γένους.

The Castle and Port of Smyrna. (Laborde.)

It seems not impossible, that just as St. Paul's illustrations in the Epistle to the Corinthians are derived from the Isthmian games, so the message to the Church in Smyrna contains allusions to the ritual of the pagan mysteries which prevailed in that city. The story of the violent death and reviviscence of Dionysus entered into these to such an extent, that Origen, in his argument against Celsus, does not scruple to quote it as generally accepted by the Greeks, although by them interpreted metaphysically (iv. 171, ed. Spencer). In this view, the words ὁ πρῶτος καὶ ὁ ἔσχατος, ὃς ἐγένετο νεκρὸς καὶ ἔζησεν (Rev. ii. 8) would come with peculiar force to ears perhaps accustomed to hear them in a very different application.[a] The same may be said of δώσω σοι τὸν στέφανον τῆς ζωῆς, it having been a usual practice at Smyrna to present a crown to the priest who superintended the religious ceremonial at the end of his year of office. Several persons of both sexes have the title of στεφανηφόροι in the inscriptions; and the context shows that they possessed great social consideration.

In the time of Strabo the ruins of the Old Smyrna still existed, and were partially inhabited, but the new city was one of the most beautiful in all Asia. The streets were laid out as near as might be at right angles; but an unfortunate oversight of the architect, who forgot to make underground drains to carry off the storm rains, occasioned the flooding of the town with the filth and refuse of the streets. There was a large public library there, and also a handsome building surrounded with porticoes which served as a museum. It was consecrated as a heroüm to Homer, whom the Smyrnæans claimed as a countryman. There was also an Odeum, and a temple of the Olympian Zeus, with whose cult that of the Roman emperors was associated. Olympian games were celebrated here, and excited great interest. On one of these

[a] This is the more likely from the superstitious regard in which the Smyrnæans held chance phrases (ἀληδόνες) as a material for augury. They had a ἀληδόνιον ἱερόν just above the city outside the walls, in which this mode of divination was the ordinary one (Pausanias, ix. 11, § 7).

Digitized by Google

occasions (in the year A. D. 68) a Rhodian youth of the name of Artemidorus obtained greater distinctions than any on record, under peculiar circumstances, which Pausanias relates. He was a pancratiast, and not long before had been beaten at Elis from deficiency in growth. But when the Smyrnæan Olympia next came round, his bodily strength had so developed that he was victor in three trials on the same day, the first against his former competitors at the Peloponnesian Olympia, the second with the youths, and the third with the men; the last contest having been provoked by a taunt (Pausanias, v. 14, § 4). The extreme interest excited by the games at Smyrna may perhaps account for the remarkable ferocity exhibited by the population against the aged bishop Polycarp. It was exactly on such occasions that what the pagans regarded as the unpatriotic and anti-social spirit of the early Christians became most apparent; and it was to the violent demands of the people assembled in the stadium that the Roman proconsul yielded up the martyr. The letter of the Smyrnæans, in which the account of his martyrdom is contained, represents the Jews as taking part with the Gentiles in accusing him as an enemy to the state religion, — conduct which would be inconceivable in a sincere Jew, but which was quite natural in those whom the sacred writer characterizes as "a synagogue of Satan" (Rev. ii. 9).

Smyrna under the Romans was the seat of a *conventus juridicus*, whither law cases were brought from the citizens of Magnesia on the Sipylus, and also from a Macedonian colony settled in the same country under the name of Hyrcani. The last are probably the descendants of a military body in the service of Seleucus, to whom lands were given soon after the building of New Smyrna, and who, together with the Magnesians, seem to have had the Smyrnæan citizenship then bestowed upon them. The decree containing the particulars of this arrangement is among the marbles in the University of Oxford. The Romans continued the system which they found existing when the country passed over into their hands.

(Strabo, xiv. 183 ff.; Herodotus, i. 16; Tacitus, *Annal.* iii. 63, iv. 56; Pliny, *H. N.* v. 29; Boeckh, *Inscript. Græc.* "Smyrnæan Inscriptions," especially Nos. 3163–3176; Pausanias, *loca cit.*, and iv. 21, § 5; Macrobius, *Saturnalia*, i. 18; [Prof. G. M. Lane, art. *Smyrna*, in *Bibl. Sacra* for Jan. 1858.]) J. W. B.

* Smyrna is about 40 miles from Ephesus, and now connected with it by a railroad. [EPHESUS, Amer. ed.] The Apostle John must often have passed between the two places during his long life at Ephesus. Paul's ministry at Ephesus (Acts xx. 31) belongs no doubt to an earlier period, before the gospel had taken root in the other city. The spot where Polycarp is supposed to have been burnt at the stake is near the ruins of a *stadium* on the hill behind the present town. It may be the exact spot or certainly near there, for it is the place where the people were accustomed to meet for public spectacles. Ignatius, bishop of Antioch, touched at Smyrna on his voyage to Rome, where he was thrown to wild beasts in the amphitheatre, about A. D. 108. Two of his extant letters were addressed to Polycarp and to the Smyrnæans. Smyrna is the only one of the cities of the seven churches which retains any importance at the present day. Its population is stated to be 150,000, nearly one half of whom are Mohammedans. On the import of the Revelator's message to the Church at Smyrna may be mentioned Stier's *Supplement* to his *Reden Jesu*, pp. 129–137, and Archbishop Trench's *Commentary on the Epistles to the Seven Churches*, pp. 132–152 (Amer. ed.). H.

**SNAIL.** The representative in the A. V. of the Hebrew words *shablûl* and *chômet*.

1. *Shablûl* (שַׁבְלוּל: κηρός; ὕπερον, Aq.: χόριον, Sym.: *cera*) occurs only in Ps. lviii. 9 (8, A. V.): "As a *shablûl* which melteth let (the wicked) pass away." There are various opinions as to the meaning of this word, the most curious perhaps, being that of Symmachus. The LXX read "melted wax," similarly the Vulg. The rendering of the A. V. ("snail") is supported by the authority of many of the Jewish Doctors, and is probably correct. The Chaldee Paraphr. explains *shablûl* by *thiblala* (תִּיבְלָלָא), *i. e.* "a snail or a slug," which was supposed by the Jews to consume away and die by reason of its constantly emitting slime as it crawls along. See *Schol. ad Gem. Moëd Katon*, 1, fol. 6 B, as quoted by Bochart (*Hieroz.* iii. 560) and Gesenius (*Thes.* p 212). It is needless to observe that this is not a zoölogical fact, though perhaps generally believed by the Orientals. The term *shablûl* would denote either a *limax* or a *helix*, which are particularly noticeable for the slimy track they leave behind them.

2. *Chômet* (חֹמֶט: σαυρα: *lacerta*) occurs only as the name of some unclean animal in Lev. xi. 30. The LXX. and Vulg. understand some kind of *lizard* by the term; the Arabic versions of Erpenius and Saadias give the *chameleon* as the animal intended. The Veneto-Greek and the Rabbins, with whom agrees the A. V., render the Heb. term by "snail." Bochart (*Hieroz.* ii. 500) has endeavored to show that a species of small sand lizard, called *chulaca* by the Arabs, is denoted; but his argument rests entirely upon some supposed etymological foundation, and proves nothing at all. The truth of the matter is that there is no evidence to lead us to any conclusion, perhaps some kind of lizard may be intended, as the two most important old versions conjecture. W. H.

* **SNARES OF DEATH.** The rendering of the A. V. in 2 Sam. xxii. 6; Ps. xviii. 5, "The sorrows of hell compassed me about, the snares of death prevented me," needs correction and explanation. The passage may be thus translated: —

> "The cords of the underworld (*Sheol*) were cast around me;
> The snares of death had caught me."

The psalmist describes himself, in metaphors borrowed from hunting, as caught in the toils of his enemies, and in imminent danger of his life. A.

**SNOW** (שֶׁלֶג: χιών; ὄρόσος in Prov. xxvi.: *nix*). The historical books of the Bible contain only two notices of snow actually falling (2 Sam. xxiii. 20; 1 Macc. xiii. 22), but the allusions in the poetical books are so numerous that there can be no doubt as to its being an ordinary occurrence in the winter months. Thus, for instance, the snow-storm is mentioned among the ordinary operations of nature which are illustrative of the Creator's power (Ps. cxlvii. 16, cxlviii. 8). We have again, notice of the beneficial effect of snow on the soil (Is. lv. 10). Its color is adduced as an image

Digitized by Google

of brilliancy (Dan. vii. 9; Matt. xxviii. 3; Rev. i. 14), of purity (Is. i. 18; Lam. iv. 7, in reference to the white robes of the princes), and of the blanching effects of leprosy (Ex. iv. 6; Num. xii. 10; 2 K. v. 27). In the book of Job we have references to the supposed cleansing effects of snow-water (ix. 30), to the rapid melting of snow under the sun's rays (xxiv. 19), and the consequent flooding of the brooks (vi. 16). The thick falling of the flakes forms the point of comparison in the obscure passage in Ps. lxviii. 14. The snow lies deep in the ravines of the highest ridge of Lebanon until the summer is far advanced, and indeed never wholly disappears (Robinson, iii. 531); the summit of Hermon also perpetually glistens with frozen snow (Robinson, ii. 437). From these sources probably the Jews obtained their supplies of ice for the purpose of cooling their beverages in summer (Prov. xxv. 13). The "snow of Lebanon" is also used as an expression for the refreshing coolness of spring water, probably in reference to the stream of Siloam (Jer. xviii. 14). Lastly, in Prov. xxxi. 21, snow appears to be used as a synonym for winter or cold weather. The liability to snow must of course vary considerably in a country of such varying altitude as Palestine. Josephus notes it as a peculiarity of the low plain of Jericho that it was warm there even when snow was prevalent in the rest of the country (*B. J.* iv. 8, § 3). At Jerusalem snow often falls to the depth of a foot or more in January and February, but it seldom lies (Robinson, i. 429). At Nazareth it falls more frequently and deeply, and it has been observed to fall even in the maritime plain at Joppa and about Carmel (Kitto, *Phys. Hist.* p. 210). A comparison of the notices of snow contained in Scripture and in the works of modern travellers would, however, lead to the conclusion that more fell in ancient times than at the present day. At Damascus, snow falls to the depth of nearly a foot, and lies at all events for a few days (Wortabet's *Syria*, i. 215, 236). At Aleppo it falls, but never lies for more than a day (Russell, i. 69). W. L. B.

* The "time of harvest" (Prov. xxv. 13) answers to our summer rather than the autumn. At Damascus snow procured from Anti-Lebanon is kept for sale in the bazaars during the hot months, and being mixed with the juice of pomegranates, with sherbet and other drinks, forms a favorite beverage. "In the heat of the day," says Dr. Wilson, "the Jews at *Hasbeeá*, in northern Galilee, offered us water cooled with snow from *Jebel esh-Sheikh*, the modern Hermon" (*Lands of the Bible*, ii. 186). "Countless loads of snow," says Dr. Schulz (*Jerusalem, eine Vorlesung*, p. 10), "are brought down to *Beirut* from the sides of *Sannin*, one of the highest peaks of Lebanon, to freshen the water, otherwise hardly fit to drink." (See also Volney, *Voyage en Égypte et en Syrie*, p. 262.) The practice of using snow in this manner existed also among the Greeks and the Romans. The comparison in the proverb therefore is very significant. The prompt return of the messenger with good tidings refreshes the heart of the anxiously expectant like a cooling draught in the heat of summer. H.

* SNUFF-DISH. [CENSER; FIRE-PAN.]

SO (סוֹא [Egypt. *Serech* or *Serec*, an Egyptian deity, Furst]: Σηγώρ; [Alex. Σωα; Comp. Σουά: *Sua*). "So king of Egypt" is once mentioned in the Bible. Hoshea, the last king of Israel, evidently intending to become the vassal of Egypt, sent messengers to him, and made no present, as had been the yearly custom, to the king of Assyria (2 K. xvii. 4). The consequence of this step, which seems to have been forbidden by the prophets, who about this period are constantly warning the people against trusting in Egypt and Ethiopia, was the imprisonment of Hoshea, the taking of Samaria, and the carrying captive of the ten tribes.

So has been identified by different writers with the first and second kings of the Ethiopian XXVth dynasty, called by Manetho, Sabakôn and Sebichôs. It will be necessary to examine the chronology of the period in order to ascertain which of these identifications is the more probable. We therefore give a table of the dynasty (see below), including the third and last reign, that of Tirhakah, for the illustration of a later article. [TIRHAKAH.]

TABLE OF DYNASTY XXV.

| Egyptian Data. | | | | | Hebrew Data. | | |
|---|---|---|---|---|---|---|---|
| B. C. | *Manetho.* | | *Monuments.* | | Correct reigns? | B. C. | *Events.* |
| | Africanus. | Eusebius. | Order. | Highest Yr. | | | |
| | | Yrs. | | | | | |
| 719 | 1 Sabakôn 8 | 1. Sabakôn 12 | 1. SHEBEK . | XII. | 12 | cir. 723 or 703. | Hoshea's treaty with So |
| 707 | 2. Sebichôs 14 | 2. Sebichôs 12 | 2. SHEBETEK | | 12 | | |
| 695 | 3. Tarkos 18 | 3. Tarakos 20 | 3. TEHARKA | XXVI. | 26 | cir. 703 or 683? | War with Sennacherib. |

The accession of Teharka, the Tirhakah of Scripture, may be nearly fixed on the evidence of an Apis-tablet, which states that one of the bulls Apis was born in his 26th year, and died at the end of the 20th of Psammetichus I. This bull lived more than 20 years, and the longest age of any Apis stated is 26. Supposing the latter duration, which would allow a short interval between Teharka and Psammetichus II., as seems necessary, the accession of Teharka would be B. C. 695. If we assign 24 years to the two predecessors, the commencement of the dynasty would be B. C. 719. But it is not certain that their reigns were continuous. The account which Herodotus gives of the war of Sennacherib and Sethos suggests that Tirhakah was not ruling in Egypt at the time of the destruc-

Digitized by Google

tion of the Assyrian army, so that we may either conjecture, as Dr. Hincks has done, that the reign of Sethos followed that of Shebetek and preceded that of Tirhakah over Egypt (*Journ. Sac. Lit.*, January, 1853), or else that Tirhakah was king of Ethiopia while Shebetek, not the same as Sethos, ruled in Egypt, the former hypothesis being far the more probable. It seems impossible to arrive at any positive conclusion as to the dates to which the mentions in the Bible of So and Tirhakah refer, but it must be remarked that it is difficult to overthrow the date of B. C. 721, for the taking of Samaria.

If we adopt the earlier dates So must correspond to Shebek, if the later, perhaps to Shebetek; but if it should be found that the reign of Tirhakah is dated too high, the former identification might still be held. The name Shebek is nearer to the Hebrew name than Shebetek, and if the Masoretic points do not faithfully represent the original pronunciation, as we might almost infer from the consonants, and the name was Sewa or Seva, it is not very remote from Shebek. We cannot account for the transcription of the LXX.

From Egyptian sources we know nothing more of Shebek than that he conquered and put to death Bocchoris, the sole king of the XXIVth dynasty, as we learn from Manetho's list, and that he continued the monumental works of the Egyptian kings. There is a long inscription at El Karnak in which Shebek speaks of tributes from "the king of the land of KHALA (SHARA)," supposed to be Syria. (Brugsch, *Histoire d'Égypte*, i. 244.) This gives some slight confirmation to the identification of this king with So, and it is likely that the founder of a new dynasty would have endeavored, like Shishak and Psammetichus I., the latter virtually the founder of the XXVIth, to restore the Egyptian supremacy in the neighboring Asiatic countries.

The standard inscription of Sargon in his palace at Khursabád states, according to M. Oppert, that after the capture of Samaria, Hanon king of Gaza, and Sebech sultán of Egypt, met the king of Assyria in battle at Rapih, Raphia, and were defeated. Sebech disappeared, but Hanon was captured. Pharaoh king of Egypt was then put to tribute. (*Les Inscriptions Assyriennes des Sargonides*, etc. p. 22.) This statement would appear to indicate that either Shebek or Shebetek, for we cannot lay great stress upon the seeming identity of name with the former, advanced to the support of Hoshea and his party, and being defeated fled into Ethiopia, leaving the kingdom of Egypt to a native prince. This evidence favors the idea that the Ethiopian kings were not successive. R. S. P.

**SOAP** (בֹּר, בְּרִית: πόα: *herba*, *h. borith*). The Hebrew term *bórith* does not in itself bear the specific sense of soap, but is a general term for any substance of *cleansing* qualities. As, however, it appears in Jer. ii. 22, in contradistinction to *nether*, which undoubtedly means "nitre," or mineral alkali, it is fair to infer that *bórith* refers to vegetable alkali, or some kind of potash, which forms one of the usual ingredients in our soap. Numerous plants, capable of yielding alkalies, exist in Palestine and the surrounding countries; we may notice one named *Hubeibeh* (the *salsola kali* of botanists), found near the Dead Sea, with glass-like leaves, the ashes of which are called *el-Kali* from their strong alkaline properties (Robinson, *Bibl. Researches*, i. 505); the *Ajram*, found near Sinai, which when pounded serves as a substitute for soap (Robinson, i. 84); the *gilloo*, or "soap plant" of Egypt (Wilkinson, ii. 106); and the heaths in the neighborhood of Joppa (Kitto's *Phys. Hist.* p. 207). Modern travellers have also noticed the *Saponaria officinalis* and the *Mesembryanthemum nodiflorum*, both possessing alkaline properties, as growing in Palestine. From these sources large quantities of alkali have been extracted in past ages, as the heaps of ashes outside Jerusalem and *Nablús* testify (Robinson, iii. 201, 299), and an active trade in the article is still prosecuted with Aleppo in one direction (Russell, i 79), and Arabia in another (Burckhardt, i. 66). We need not assume that the ashes were worked up in the form familiar to us; for no such article was known to the Egyptians (Wilkinson, i. 186). The uses of soap among the Hebrews were twofold: (1) for cleansing either the person (Jer. ii. 22; Job. ix. 30, where for "never so clean," read "with alkali") or the clothes; (2) for purifying metals (Is. i. 25, where for "purely," read "as through alkali"). Hitzig suggests that *bórith* should be substituted for *berith*, "covenant," in Ez. xx. 37, and Mal. iii. 1.

W. L. B.

**SO'CHO** (שׂוֹכֹה [*branches*]: Σωχώ: *Socho*), 1 Chr. iv. 18. Probably the town of Socoh in Judah, though which of the two cannot be ascertained. It appears from its mention in this list, that it was colonized by a man or a place named Heber. The Targum, playing on the passage after the custom of Hebrew writers, interprets it as referring to Moses, and takes the names Jered, Soco, Jekuthiel, as titles of him. He was "the Rabba of Soco, because he sheltered (סכך) the house of Israel with his virtue." G.

**SO'CHOH** (שׂוֹכֹה [*branches*]: [Rom. Σωχώ;] [a] Alex. Σοχλω: *Soccho*). Another form of the name which is more correctly given in the A. V. as SOCOH, but which appears therein under no less than six forms. The present one occurs in the list of King Solomon's commissariat districts (1 K. iv 10), and is therefore probably, though not certainly, the town in the *Shefelah*, that being the great corn-growing district of the country. [SOCOH, 1.]

**SO'COH** (שׂוֹכֹה [see above]). The name of two towns in the tribe of Judah.

1. (Σοωχώ: Alex. Σωχω: *Socho*.) In the district of the *Shefelah* (Josh. xv. 35). It is a member of the same group with Jarmuth, Azekah, Shaaraim, etc. The same relative situation is implied in the other passages in which the place (under slight variations of form) is mentioned. At Ephes-dammim, between Socoh and Azekah (1 Sam. xvii. 1), the Philistines took up their position for the memorable engagement in which their champion was slain, and the wounded fell down in the road to Shaarnim (ver. 52). Socho, Adullam, Azekah, were among the cities in Judah which Rehoboam fortified after the revolt of the northern tribes (2 Chr. xi. 7), and it is mentioned with others of the original list as being taken by the Philistines in the reign of Ahaz (2 Chr. xxviii. 18).

In the time of Eusebius and Jerome (*Onomast.* "Soccho") it bore the name of Soccoth, and lay

[a] The text of the Vat. MS. is so corrupt as to prevent any name being recognised.

Digitized by Google

between 8 and 9 Roman miles from Eleutheropolis, on the road to Jerusalem. Paula passed through it on her road from Bethlehem (?) to Egypt (Jerome, *Ep. Paulæ*, § 14). As is not unfrequently the case in this locality, there were then two villages, an upper and a lower (*Onomast.*). Dr. Robinson's identification of Socoh with *esh-Shuweikeh*[a] in the western part of the mountains of Judah is very probable (*Bibl. Res.* ii. 21). It lies about 1 mile to the north of the track from *Beit Jibrîn* to Jerusalem, between 7 and 8 English miles from the former. To the north of it within a couple of miles is *Yarmuk*, the ancient Jarmuth. *Damun*, perhaps Ephes-dammim, is about the same distance to the east, and although Azekah and Shaaraim have not been identified, there is no doubt that they were in this neighborhood. To complete the catalogue, the ruins — which must be those of the upper one of Eusebius's two villages — stand on the southern slope of the *Wady es-Sumt*, which with great probability is the Valley of Elah, the scene of Goliath's death. (See Tobler, *3te Wanderung*, p. 122.)

No traveller appears to have actually visited the spot, but one of the few who have approached it describes it as "nearly half a mile above the bed of the Wady, a kind of natural terrace covered with green fields (in spring), and dotted with gray ruins" (Porter, *Handbk.* p. 249 *a*).

From this village probably came "Antigonus of Soco," who lived about the commencement of the 3d century B. C. He was remarkable for being the earliest Jew who is known to have had a Greek name; for being the disciple of the great Simon, surnamed the Just, whom he succeeded as president of the Sanhedrim; for being the master of Sadok the reputed founder of the Sadducees; but most truly remarkable as the author of the following saying which is given in the Mishna (*Pirke Aboth*, i. 3) as the substance of his teaching, "Be not ye like servants who serve their lord that they may receive a reward. But be ye like servants who serve their lord without hope of receiving a reward, but in the fear of Heaven."

Socoh appears to be mentioned, under the name of *Sochus*, in the Acts of the Council of Nice, though its distance from Jerusalem as there given is not sufficient for the identification proposed above (Reland, *Pal.* p. 1019).

**2.** (Σοχά; Alex. Σοχώ: *Socoth.*) Also a town of Judah, but in the mountain district (Josh. xv. 48).[b] It is one of the first group, and is named in company with Anab, Jattir, Eshtemoh, and others. It has been discovered by Dr. Robinson (*Bibl. Res.* i. 494) in the *Wady el-Khalîl*, about 10 miles S. W. of Hebron; bearing, like the other Socoh, the name of *esh-Shuweikeh*, and with *Anab*, *Semoa*, *'Attir*, within easy distance of it. G.

• **SOD**, the preterite of *seethe*; "And Jacob sod pottage," Gen. xxv. 29; and see also 2 Chr. xxxv. 13. H.

• **SODDEN**, past participle of "seethe" (Ex. xii. 19). [SOD.] H.

**SO'DI** (סוֹדִי [*a confidant, favorite*]: Σουδί; [Vat. Σουδει:] *Sodi*). The father of Gad'iel, the spy selected from the tribe of Zebulun (Num. xiii. 10).

**SOD'OM** (סְדֹם,[c] *i. e.* Sedôm [see note below]: [τὰ] Σόδομα; Joseph. ἡ πόλις Σοδομιτῶν: *Sodoma*. Jerome vacillates between singular and plural, noun and adjective. He employs all the following forms, *Sodomam, in Sodomis, Sodomor am, Sodomæ, Sodomitæ*). One of the most ancient cities of Syria, whose name is now a synonym for the most disgusting and opprobrious of vices. It is commonly mentioned in connection with Gomorrah, but also with Admah and Zeboim, and on one occasion (Gen. xiv.) with Bela or Zoar. Sodom was evidently the chief town in the settlement. Its king takes the lead and the city is always named first in the list, and appears to be the most important. The four are first named in the ethnological records of Gen. x. 19, as belonging to the Canaanites: "The border of the Canaanite was from Zidon towards Gerar unto Azzah: towards Sedom and Amorah and Admah and Tseboim unto Lasha." The meaning of which appears to be that the district in the hands of the Canaanites formed a kind of triangle — the apex at Zidon, the southwest extremity at Gaza, the southeastern at Lasha. Lasha, it may be remarked in passing, seems most probably located on the *Wady Zurka Main*, which enters the east side of the Dead Sea, about nine miles from its northern end.

The next mention of the name of Sodom (Gen xiii. 10–13) gives more certain indication of the position of the city. Abram and Lot are standing together between Bethel and Ai (ver. 3), taking, as any spectator from that spot may still do, a survey of the land around and below them. Eastward of them, and absolutely at their feet, lay the "circle of Jordan." It was in all its verdant glory, that glory of which the traces are still to be seen, and which is so strangely and irresistibly attractive to a spectator from any of the heights in the neighborhood of Bethel — watered by the copious supplies of the *Wady Kelt*, the *Ain Sultân*, the *Ain Duk*, and the other springs which gush out from the foot of the mountains. These abundant waters even now support a mass of verdure before they are lost in the light, loamy soil of the region. But at the time when Abram and Lot beheld them, they were husbanded and directed by irrigation, after the manner of Egypt, till the whole circle was one great oasis — "a garden of Jehovah" (ver. 10). In the midst of the garden the four cities of Sodom, Gomorrah, Admah, and Zeboim appear to have been situated. To these cities Lot descended, and retaining his nomad habits amongst the more civilized manners of the Canaanite settlement "pitched his tent" by[d] the chief of the four. At a later period he seems to have been living within the walls of Sodom. It is necessary to notice how absolutely the cities are identified with the district. In the subsequent account of their destruction (Gen. xix.), the topographical terms are employed with all the precision which is characteristic of such early times. "The *Ciccâr*," the "land of the

---

[a] *Shuweikeh* is a diminutive of *Shauba*, as *Mureikby* of *Murkhah*, etc.

[b] The *Keri* to this passage reads שׂוֹכֹה, *i. e.* Socco.

[c] It is perhaps doubtful whether the name had not also the form סְדֹמָה, Sedômah, which appears in Gen. x 19. The suffix may in this case be only the ה of motion, but the forms adopted by LXX. and Vulg. favor the belief that it may be part of the name.

[d] The word is עַד, "at," not "towards," as in the A. V. Luzzatto, *vicino a*; LXX. ἐκτίσεν ἐν Σοδόμοις.

Digitized by Google

*Ciccâr*," "*Ciccâr* of Jordan," recurs again and again both in chaps. xiii. and xix., and "the cities of the *Ciccâr*" is the almost technical designation of the towns which were destroyed in the catastrophe related in the latter chapter. The mention of the Jordan is conclusive as to the situation of the district, for the Jordan ceases where it enters the Dead Sea, and can have no existence south of that point. But, in addition, there is the mention of the eastward direction from Bethel, and the fact of the perfect manner in which the district north of the Lake can be seen from the central highlands of the country on which Abram and Lot were standing. And there is still further corroboration in Deut. xxxiv. 3, where "the *Ciccâr*" is directly connected with Jericho and Zoar, coupled with the statement of Gen. x. already quoted, which appears to place Zoar to the north of Lasha. It may be well to remark here, with reference to what will be named further on, that the southern half of the Dead Sea is invisible from this point; not merely too distant, but shut out by intervening heights.

We have seen what evidence the earliest records afford of the situation of the five cities. Let us now see what they say of the nature of that catastrophe by which they are related to have been destroyed. It is described in Gen. xix. as a shower of brimstone and fire from Jehovah, from the skies — "The Lord rained upon Sodom, and upon Gomorrah, brimstone and fire from the Lord out of heaven; and he overthrew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground" . . . . "and lo! the smoke of the land went up like the smoke of a furnace." "It rained fire and brimstone from heaven" (Luke xvii. 29). However we may interpret the words of the earliest narrative one thing is certain, that the lake was not one of the agents in the catastrophe. Further, two words are used in Gen. xix. to describe what happened: הַשְׁחִית, to throw down, to destroy (vv. 13, 14), and הָפַךְ, to overturn (21, 25, 29). In neither of these is the presence of water — the submergence of the cities or of the district in which they stood — either mentioned, or implied. Nor is it implied in any of the later passages in which the destruction of the cities is referred to throughout the Scriptures. Quite the contrary. Those passages always speak of the district on which the cities once stood, not as submerged, but as still visible, though desolate and uninhabitable. "Brimstone, and salt, and burning . . . . not sown, nor beareth, nor any grass groweth therein" (Deut. xxix. 23). "Never to be inhabited, nor dwelt in from generation to generation; where neither Arab should pitch tent nor shepherd make fold" (Is. xiii. 20). "No man abiding there, nor son of man dwelling in it" (Jer. xlix. 18; l. 40). "A fruitful land turned into saltness" (Ps. cvii. 34). "Overthrown and burnt" (Amos iv. 11). "The breeding of nettles, and saltpits, and a perpetual desolation" (Zeph. ii. 9). "A waste land that smoketh, and plants bearing fruit which never cometh to ripeness" (Wisd. x. 7). "Land lying in clods of pitch and heaps of ashes" (2 Esdr. ii. 9). "The cities turned into ashes" (2 Pet. ii. 6, where their destruction by fire is contrasted with the Deluge).

In agreement with this is the statement of Josephus (*B. J.*[a] iv. 8, § 4). After describing the lake, he proceeds: "Adjoining it is Sodomitis, once a blessed region abounding in produce and in cities, but now entirely burnt up. They say that it was destroyed by lightning for the impiety of its inhabitants. And even to this day the relics of the Divine fire, and the traces of five cities are to be seen there, and moreover the ashes reappear even in the fruit." In another passage (*B. J.* v. 13, § 6) he alludes incidentally to the destruction of Sodom, contrasting it, like St. Peter, with a destruction by water. By comparing these passages with *Ant.* i. 9, it appears that Josephus believed the vale of Siddim to have been submerged, and to have been a distinct district from that of Sodom in which the cities stood, which latter was still to be seen.

With this agree the accounts of heathen writers, as Strabo and Tacitus; who, however vague their statements, are evidently under the belief that the district was not under water, and that the remains of the towns were still to be seen.[b]

From all these passages, though much is obscure, two things seem clear.

1. That Sodom and the rest of the cities of the plain of Jordan stood on the north of the Dead Sea.

2. That neither the cities nor the district were submerged by the lake, but that the cities were overthrown and the land spoiled, and that it may still be seen in its desolate condition.

When, however, we turn to more modern views, we discover a remarkable variance from these conclusions.

1. The opinion long current, that the five cities were submerged in the lake, and that their remains — walls, columns, and capitals — might be still discerned below the water, hardly needs refutation after the distinct statement and the constant implication of Scripture. Reland (*Pal.* p. 257) showed more than two centuries ago how baseless was such a hypothesis, and how completely it is contradicted by the terms of the original narrative. It has since been assaulted with great energy by De Saulcy. Professor Stanley (*S. & P.* p. 289) has lent his powerful aid in the same direction,[c] and the theory, which probably arose from a confusion between the Vale of Siddim and the plain of the Jordan, will doubtless never again be listened to. But

2. A more serious departure from the terms of the ancient history is exhibited in the prevalent opinion that the cities stood at the south end of the Lake. This appears to have been the belief of Josephus and Jerome (to judge by their statements on the subject of Zoar). It seems to have been universally held by the mediæval historians and pilgrims, and it is adopted by modern topog-

---

[a] Josephus regarded this passage as his main statement of the event See *Ant.* i. 11, § 4.

[b] These passages are given at length by De Saulcy (*Narr.* i. 448).

[c] "The only expression which seems to imply that the Vale of the Dead Sea was within historical times, is that contained in Gen. xiv. 3 — 'the Vale of Siddim, which is the Salt Sea.' But this phrase may merely mean that the region in question bore both names; as in the similar expressions (vv. 7 and 17) — 'En Mishpat, which is Kadesh;' 'Shaveh, which is the King's Dale.' It should, however, be observed that the word 'Emek,' translated 'vale,' is usually employed for a long broad valley, such as in this connection would naturally mean the whole length of the Dead Sea" (Stanley, *S. & P.* p. 289 note).

Digitized by Google

sphere, probably without exception. In the words of one of the most able and careful of modern travellers, Dr. Robinson, "The cities which were destroyed must have been situated on the south end of the lake as it then existed" (*Bibl. Res.* ii. 188). This is also the belief of M. De Saulcy, except with regard to Gomorrah; and, in fact, is generally accepted. There are several grounds for this belief; but the main point on which Dr. Robinson rests his argument is the situation of Zoar.

(*a.*) "Lot," says he, in continuing the passage just quoted, "fled to Zoar, which was *near* to Sodom; and Zoar lay almost at the southern end of the present sea, probably in the mouth of the *Wady Kerak*, where it opens upon the isthmus of the peninsula. The fertile plain, therefore, which Lot chose for himself, where Sodom was situated . . . lay also south of the lake 'as thou comest unto Zoar'" (*Bibl. Res.* ibid.).

Zoar is said by Jerome to have been "the key of Moab." It is certainly the key of the position which we are now examining. Its situation is more properly investigated under its own head. [ZOAR.] It will there be shown that grounds exist for believing that the Zoar of Josephus, Jerome, and the Crusaders, which probably lay where Dr. Robinson places it, was not the Zoar of Lot. On such a point, however, where the evidence is so fragmentary and so obscure, it is impossible to speak otherwise than with extreme diffidence.

In the mean time, however, it may be observed that the statement of Gen. xix. hardly supports the inference relative to the position of these two places, which is attempted to be extorted from it. For, assuming that Sodom was where all topographers seem to concur in placing it, at the salt ridge of *Usdum*, it will be found that the distance between that spot and the mouth of the *Wady Kerak*, where Dr. Robinson proposes to place Zoar, a distance which, according to the narrative, was traversed by Lot and his party in the short twilight of an eastern morning (Gen. xix. 15, 23), is no less than 16 miles.[a]

Without questioning that the narrative of Gen. xix. is strictly historical throughout, we are not at present in possession of sufficient knowledge of the topography and of the names attached to the sites of this remarkable region, to enable any profitable conclusions to be arrived at on this and the other kindred questions connected with the destruction of the five cities.

(*b.*) Another consideration in favor of placing the cities at the southern end of the lake is the existence of similar names in that direction. Thus, the name *Usdum*, attached to the remarkable ridge of salt which lies at the southwestern corner of the lake, is usually accepted as the representative of Sodom (Robinson, Van de Velde, De Saulcy, etc., etc.). But there is a considerable difference between the two words סְדֹם and أُسْدُم, and at any rate the point deserves further investigation. The name *'Amrah* (عمرة), which is attached to a valley among the mountains south of Masada (Van de Velde, ii. 99, and Map), is an almost exact equivalent to the Hebrew of Gomorrah[b] ('Amorah). The name *Dra'a* (ذرعة), and much more strongly that of *Zoghal* (زوغل), recall Zoar.

(*c.*) A third argument, and perhaps the weightiest of the three, is the existence of the salt mountain at the south of the lake, and its tendency to split off in columnar masses, presenting a rude resemblance to the human form. But with reference to this it may be remarked that it is by no means certain that salt does not exist at other spots round the lake. In fact, as we shall see under the head of Zoar, Thietmar (A. D. 1217) states that he saw the pillar of Lot's wife on the east of Jordan at about a mile from the ordinary ford: and wherever such salt exists, since it doubtless belongs to the same formation as the *Khashm Usdum*, it will possess the habit of splitting into the same shapes as that does.

It thus appears that on the situation of Sodom no satisfactory conclusion can at present be come to. On the one hand the narrative of Genesis seems to state positively that it lay at the *northern* end of the Dead Sea. On the other hand the long-continued tradition and the names of existing spots seem to pronounce with almost equal positiveness that it was at its *southern* end. How the geological argument may affect either side of the proposition cannot be decided in the present condition of our knowledge.

Of the catastrophe which destroyed the city and the district of Sodom we can hardly hope ever to form a satisfactory conception. Some catastrophe there undoubtedly was. Not only does the narrative of Gen. xix. expressly state that the cities were miraculously destroyed, but all the references to the event in subsequent writers in the Old and New Testaments bear witness to the same fact. But what secondary agencies, besides fire, were employed in the accomplishment of the punishment, cannot be safely determined in the almost total absence of exact scientific description of the natural features of the ground round the lake. It is possible that when the ground has been thoroughly examined by competent observers, something may be discovered which may throw light on the narrative. Until then, it is useless, however tempting, to speculate. But even this is almost too much to hope for; because, as we shall presently see, there is no warrant for imagining that the catastrophe was a geological one, and in any other case all traces of action must at this distance of time have vanished.

It was formerly supposed that the overthrow of Sodom was caused by the convulsion which formed

---

[a] M. De Saulcy has not overlooked this consideration (*Narrative*, i. 442). His own proposal to place Zoar at *Zuweirah* is however inadmissible, for reasons stated under the head of Zoar. If *Usdum* be Sodom, then the site which has most claim to be identified with the site of Zoar is the *Tell um-Zoghal*, which stands between the north end of *Khashm Usdum* and the Lake. But Zoar, the cradle of Moab and Ammon, must surely have been on the east side of the Lake.

[b] It "surely" was for other reasons than that it was "the cradle" of these tribes. [ZOAR, Amended.] S. W.

[b] The ע here is employed by the Greeks for the difficult guttural *ain* of the Hebrews, which they were unable to pronounce (comp. Gothaliah for Athaliah, etc.). This, however, would not be the case in Arabic where the *ain* is very common, and therefore De Saulcy's identification of *Goumran* with Gomorrah falls to the ground, as far at least, as etymology is concerned.

Digitized by Google

the Dead Sea. This theory is stated by Dean Milman in his *History of the Jews* (i. 15, 16) with great spirit and clearness.[a] "The valley of the Jordan, in which the cities of Sodom, Gomorrah, Adma, and Tseboim were situated, was rich and highly cultivated. It is most probable that the river then flowed in a deep and uninterrupted channel down a regular descent, and discharged itself into the eastern gulf of the Red Sea. The cities stood on a soil broken and undermined with veins of bitumen and sulphur. These inflammable substances, set on fire by lightning, caused a tremendous convulsion: the water-courses, both the river and the canals by which the land was extensively irrigated, burst their banks; the cities, the walls of which were perhaps built from the combustible materials of the soil, were entirely swallowed up by the fiery inundation; and the whole valley, which had been compared to Paradise, and to the well-watered cornfields of the Nile, became a dead and fetid lake." But nothing was then known of the lake, and the recent discovery of the extraordinary depression of its surface below the ocean level, and its no less extraordinary depth, has rendered it impossible any longer to hold such a theory. The changes which occurred when the limestone strata of Syria were split by that vast fissure which forms the Jordan Valley and the basin of the Salt Lake, must not only have taken place at a time long anterior to the period of Abraham, but must have been of such a nature and on such a scale as to destroy all animal life far and near (Dr. Buist, in *Trans. of Bombay Geogr. Soc.* xii. p. xvi.).

Since the knowledge of these facts has rendered the old theory untenable, a new one has been broached by Dr. Robinson. He admits that "a lake must have existed where the Dead Sea now lies, into which the Jordan poured its waters long before the catastrophe of Sodom. The great depression of the whole broad Jordan Valley and of the northern part of the *Arabah*, the direction of its lateral valleys, as well as the slope of the high western district towards the north, all go to show that the configuration of this region in its main features is coëval with the present condition of the surface of the earth in general, and not the effect of any local catastrophe at a subsequent period. . . . . In view of the fact of the necessary existence of a lake before the catastrophe of Sodom; the well-watered plain toward the south, in which were the cities of Sodom and Gomorrah, and not far off the sources of bitumen; as also the peculiar character of this part of the lake, where alone asphaltum at the present day makes its appearance — I say, in view of all these facts, there is but a step to the obvious hypothesis, that the fertile plain is now in part occupied by the southern bay lying south of the peninsula; and that, by some convulsion or catastrophe of nature connected with the miraculous destruction of the cities, either the surface of this plain was scooped out, or the bottom of the lake heaved up so as to cause the waters to overflow and cover permanently a larger tract than formerly" (*Bibl. Res.* ii. 188, 189).

To this very ingenious theory two objections may be taken. (1.) The "plain of the Jordan," in which the cities stood (as has been stated) can hardly have been at the south end of the lake, and (2.) The geological portion of the theory does not appear to agree with the facts. The whole of the lower end of the lake, including the plain which borders it on the south, has every appearance not of having been lowered since the formation of the valley, but of undergoing a gradual process of filling up. This region is in fact the delta of the very large, though irregular, streams which drain the highlands on its east, west, and south, and have drained them ever since the valley was a valley. No report by any observer at all competent to read the geological features of the district will be found to give countenance to the notion that any disturbance has taken place within the historical period, or that anything occurred there since the country assumed its present general conformation beyond the quiet, gradual change due to the regular operation of the ordinary agents of nature, which is slowly filling up the chasm of the valley and the lake with the washings brought down by the torrents from the highlands on all sides. The volcanic appearances and marks of fire, so often mentioned, are, so far as we have any trustworthy means of judging, entirely illusory, and due to ordinary, natural causes.

But in fact the narrative of Gen. xix. neither states nor implies that any convulsion of the earth occurred. The word *haphac*, rendered in the A. V "overthrow," is the only expression which suggests such a thing. Considering the character of the whole passage, it may be inferred with almost absolute certainty that, had an earthquake or convulsion of a geological nature been a main agent in the destruction of the cities, it would have been far more clearly reflected in the narrative than it is. Compare it, for example, with the forcible language and the crowded images of Amos and the Psalmist in reference to such a visitation. If it were possible to speculate on materials at once so slender and so obscure as are furnished by that narrative, it would be more consistent to suppose that the actual agent in the ignition and destruction of the cities had been of the nature of a tremendous thunderstorm accompanied by a discharge of meteoric stones.[b]

The name Sedôm has been interpreted to mean "burning" (Gesenius, *Thes.*[c] p. 939 *a*). This is possible, though it is not at all certain, since Gesenius himself hesitates between that interpretation and one which identifies it with a similar Hebrew word meaning "vineyard," and Fürst (*Handwb.* ii. 72), with equal if not greater plausibility, connects it with a root meaning to inclose or fortify. Simonis again (*Onomast.* p. 363) renders it "abundance of dew, or water," Hiller (*Onomas.* p. 176) "fruitful land," and Chytræus "mystery." In fact, like most archaic names, it may, by a little ingenuity, be made to mean almost anything. Professor Stanley (*S. & P.* p. 289) notices the first of these interpretations, and comparing it with the

Phlegræan fields" in the Campagna at Rome says that "the name, if not derived from the subsequent catastrophe, shows that the marks of fire had already passed over the doomed valley." Apparent "marks of fire" there are all over the neighborhood of the Dead Sea. They have misled many travellers into believing them to be the tokens of conflagration and volcanic action; and in the same manner it is quite possible that they originated the name *Sedom*, for they undoubtedly abounded on the shores of the lake long before even Sodom was founded. But there is no warrant for treating those appearances as the tokens of actual conflagration or volcanic action. They are produced by the gradual and ordinary action of the atmosphere on the rocks. They are familiar to geologists in many other places, and they are found in other parts of Palestine where no fire has ever been suspected.

The miserable fate of Sodom and Gomorrah is held up as a warning in numerous passages of the Old and New Testaments. By St. Peter and St. Jude it is made "an ensample to those that after should live ungodly," and to those "denying the only Lord God, and our Lord Jesus Christ" (2 Pet. ii. 6; Jude, 4–7). And our Lord himself, when describing the fearful punishment that will befall those that reject his disciples, says that "it shall be more tolerable for Sodom and Gomorrah in the day of judgment than for that city" (Mark vi. 11: comp. Matt. x. 15).

The name of the Bishop of Sodom,—"Severus Sodomorum"—appears amongst the Arabian prelates who signed the acts of the first Council of Nicæa. Reland remonstrates against the idea of the Sodom of the Bible being intended, and suggests that it is a mistake for Zuzumaon or Zoraima, a see under the metropolitan of Bostra (*Pal.* p. 1020). This M. De Saulcy (*Narr.* i. 454) refuses to admit. He explains it by the fact that many seas still bear the names of places which have vanished, and exist only in name and memory, such as Troy The Coptic version to which he refers, in the edition of M. Lenormant, does not throw any light on the point. G.

* The theory which is propounded in this article respecting the catastrophe of the cities and the submergence of the district, is examined in the articles, SEA, THE SALT (p. 2897 f.) and SIDDIM, THE VALE OF (p. 3032 f., Amer. ed.). The argument which would locate the cities north of the sea, is refuted, so far as it relates to Zoar, in the article ZOAR (Amer. ed.). For the reason above named, that Zoar is "the key of the position," its site determines that of Sodom, which was so near it that it could be reached by flight between the early dawn and the broad daylight after the sun had risen over the mountains, and it was exposed to the same catastrophe, being saved by special interposition. If Zoar was in the district in which we have placed it, Sodom was south, and not north, of the sea. But on this point we offer further and cumulative evidence relating especially to Sodom.

The etymological import of the word כִּכָּר is not settled. In an able article on "The Site of Sodom and Gomorrah," published in the *Journal of Sacred Literature*, April, 1866 (pp. 36–57), George Warington, Esq., offers forcible reasons for translating the term, "hollow," and for applying it to the entire crevasse, of which the valley of the Jordan and the Dead Sea are but a part. In this view he is supported by the analogous facts that *the entire valley* was designated by Jerome and Eusebius as the *Aulon* = the ravine, and that it is now called by the Arabs the *Ghor* = the depression.

The argument from the Scripture narrative (Gen xiii.) given in this article is, in substance, this: that Abraham and Lot, standing on some eminence between Bethel and Ai, surveyed the fruitful plain of the Jordan on the east—the region north of the sea being visible from that point, while what is now the southern end of the sea would be invisible; and that Lot selected the plain thus visible below him as his residence, and descending to it pitched his tent near Sodom, one of the cities planted amid its verdure.

The scene of the conference between Abraham and Lot is not stated by the sacred writer, but would seem to have been near the spot above named. The inference stated is also natural, and if there were no special reason to question it, it would pass unchallenged. But the location of the cities is not so definitely given as to compel us to accept the inference. Nor is it fairly implied in the narrative that Lot's view took in the whole valley: he surveyed a section of it, which in its fruitfulness represented the whole. The argument assumes that there has been no essential change in the plain and the sea since that day, except what would result in the former from disuse of the artificial irrigation which then made it so fruitful. But the phrase "before the Lord destroyed," etc., plainly indicates a marked change in consequence of the event; and there certainly is nothing in the Scripture narrative inconsistent with the general belief that the catastrophe of the cities, which destroyed also "the country," wrought a great and general change in "the land of Sodom and Gomorrah," thus turned "into ashes." If the cultivated plain or valley, with or without a lake of fresh water in a part of the present bed of the sea, then extended as far as the present southern limit of the sea and adjacent plain, and the cities were in that section of it, the fact would not conflict with the sacred record. If the passage cited (Gen. xiii.) does not countenance this view, neither does it contradict it. The host of writers, ancient and modern, who have firmly held it, have never felt that this passage offered any objection to it.

Of the reasons which we now offer additional to the site of Zoar, which in itself is conclusive, the first two are conceded above.

1. The names suggestive of identity with the original sites which adhere to the localities around the southern end of the sea, and of which we have no certain traces around the northern end.

2. The existence and peculiar features of the salt mountain south of the sea, with no corresponding object north of it, which is certainly remarkable in connection with the sacred narrative, and irresistibly associates the flight of Lot and the fate of his wife, with this locality.

3. The living fountains and streams of fresh water which flow into the plain south of the sea, correspondent with its original features, if it was the southern extremity of the plain of Jordan which Lot surveyed, "well-watered everywhere, before the Lord destroyed Sodom and Gomorrah, even as the garden of the Lord, like the land of Egypt, as thou comest unto Zoar" (Gen. xiii. 10). This is a feature which Dr. Robinson specially noted: "Even to the present day more living streams flow into

Digitized by Google

the *Ghôr*, at the south end of the sea, from wadies of the eastern mountains, than are found so near together in all Palestine besides" (*Phys. Geog.* p. 234). Mr. Tristram's observations of the soil below the surface, both at the foot of *Jebel Usdum* and in the salt marsh, confirm the theory that the whole region was once fruitful. He says: "We collected specimens of the soil at the depth of two feet from the surface, where it is a rich greasy loam, but strongly impregnated with salt." "At the depth of eighteen inches in the plain, the soil was a fat, greasy loam" (*Land of Israel*, pp. 322, 335). Before this rich alluvial soil was covered with the saline incrustation of the marsh and water of the lagoon, we have an image of the fertility and beauty of the whole expanse, in Mr. Tristram's description of the present luxuriance of the oasis on the eastern border: "All teemed with a prodigality of life. It was, in fact, a reproduction of the oasis of Jericho, in a far more tropical climate, and with yet more lavish supply of water. . . . . For three miles we rode through these rich groves, revelling in the tropical verdure and swarming ornithology of its labyrinths" (*Ibid.* p. 336).

4. The testimony of unbroken tradition, ancient and modern. Strabo, Josephus, Tacitus, Galen, Jerome, Eusebius, "mediæval historians and pilgrims, and modern topographers, without exception," — is the formidable array which Mr. Grove proposes to turn aside by an interpretation, plausible in itself, of a single passage of Scripture, which offers no bar to their unanimous verdict, and which seems to us even to require it. (The reader will find these cited in the *Bibl. Sacra*, xxv. 147.) The whole series, of course, does not amount to positive proof, but it is so universal and unvarying that it has not a little value as corroborative evidence.

5. There remains a combined topographical and historical argument which to us appears conclusive. No event has perhaps occurred on the globe more fitted to leave a permanent scar on its surface than the conflagration of the cities of the plain and the plain together. Of no recorded occurrence except perhaps the Deluge, might we reasonably look for clearer traces. It was a catastrophe so dire that it became a standing comparison for signal and overwhelming destruction, and would naturally leave a perpetual mark on the valley which bore it. This impression, which every reader would receive from the original narrative, is confirmed by every succeeding notice of it and of the locality. The event occurred about nineteen centuries before Christ, and the fertile and populous plain was at once made desolate and tenantless. This is the record: "Then the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven; and he overthew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground" (Gen. xix. 24, 25). About four and a half centuries later, Moses, warning the Israelites against apostasy, admonishes them that the judgments of God for idolatry would make their country so desolate that a visitor would find its condition portrayed in these words: "And the whole land thereof is brimstone and salt and burning, that it is not sown, nor beareth, nor any grass groweth therein; like the overthrow of Sodom and Gomorrah, Admah and Zeboim, which the Lord overthrew in his anger and in his wrath" (Deut. xxix. 23). The above is a picture of the site of Sodom as it appeared at that period. The testimony which exhibits it still deserted and desolate in the subsequent centuries, as furnished by the prophecies of Isaiah, Jeremiah, and Zephaniah, by the apocryphal books of Esdras and the Wisdom of Solomon, and by the ancient authors, Strabo, Josephus, and Tacitus, together with the New Testament allusions, are partially quoted above, and more fully in *Bibl. Sacra*, xxv. 146–148. No historic proof can be more clear and complete, than that the site of Sodom, from the time of its destruction to the Christian era and subsequently, was a blasted region, an utter desolation.

With these historical and physical delineations before us, it is only necessary to call attention to the aspect of the two sites to settle the question of identity. The south end of the sea and its surroundings present at this day such an appearance as the Scriptural statements would lead us to expect. The entire southwest coast and adjacent territory from above *Sebbeh* round to the fertile border of the *Ghôr es-Sâfieh* on the extreme southeast, relieved at a single point by the verdure of the small oasis of *Zuweirah*, is, and has been, from the time of Sodom's destruction, the image of enthroned desolation. The sombre wildness and desolateness of the whole scene: the tokens of volcanic action, or of some similar natural convulsion; the Sodom mountain, a mass of crystallized salt, furrowed into fantastic ridges and pillars; the craggy sunburnt precipices and ravines on the west; the valley below *Usdum*, with the mingled sand, sulphur, and bitumen, which have been washed down the gorges; the marshy plain of the adjacent *Sabkah*, with its briny drainings, "destitute of every species of vegetation;" the stagnant sea, with its border of dead driftwood; the sulphurous odors; "the sterility and death-like solitude" (Robinson); "desolation, elsewhere partial, here supreme;" "nothing in the Sahara more desolate" (Tristram); "the unmitigated desolation" (Lynch); "scorched and desolate tract" (W.); "desolation which, perhaps, cannot be exceeded anywhere upon the face of the earth" (Grove); "utter and stern desolation, such as the mind can scarcely conceive" (Porter); these and the like features impress all visitors as a fit memorial of such a catastrophe as the sacred writers have recorded. Whether we accept or not certain localities as particular sites, the *tout ensemble* is a most striking confirmation of the narrative.

The more detailed explorations of the region confirm the impression which its general appearance conveys. Mr. Tristram, who bestowed upon the whole locality a careful scientific examination, thinks that he discovered in the deposits of the *Wady Mahawat*, a broad deep ravine at the north end of *Jebel Usdum*, traces of the agency which destroyed the cities. He says: —

"There are exposed on the sides of the wady, and chiefly on the south, large masses of bitumen mingled with gravel. These overlie a thin stratum of sulphur, which again overlies a thick stratum of sand, so strongly impregnated with sulphur that it yields powerful fumes on being sprinkled over a hot coal. Many great blocks of the bitumen have been washed down the gorge, and lie scattered on the plain below, along with huge boulders and other traces of tremendous floods. The phenomenon commences about half a mile from where the wady opens up on the plain, and may be traced at irregular intervals for nearly a

Digitized by Google

side further up. The bitumen has many small water-worn stones and pebbles embedded in it." "Again, the bitumen, unlike that which we pick up on the shore, is strongly impregnated with sulphur, and yields an overpowering sulphurous odor; above all, it is calcined, and bears the marks of having been subjected to extreme heat."

"I have a great dread of seeking forced corroborations of Scriptural statements from questionable physical evidence, for the skeptic is apt to imagine that when he has refuted the wrong argument adduced in support of a Scriptural statement, he has refuted the Scriptural statement itself; but, so far as I can understand this deposit, if there be any physical evidence left of the catastrophe which destroyed Sodom and Gomorrah, or of similar occurrences, we have it here. The whole appearance points to a shower of hot sulphur and an irruption of bitumen upon it, which would naturally be calcined and impregnated by its fumes; and this at a geologic period quite subsequent to all the diluvial and alluvial action of which we have such abundant evidence. The vestiges remain exactly as the last relics of a snow-drift remain in spring — an atmospheric deposit. The catastrophe must have been since the formation of the wady, since the deposition of the marl, and while the water was at its present level; therefore probably during the historic period" (*Land of Israel*, pp. 354–357).

Our only surprise is, that the intelligent observer who finds these probable tokens "of the catastrophe which destroyed Sodom and Gomorrah" in the very locality near which on other grounds we think these cities must have stood, should himself place them full fifty miles distant. He has proved to his own satisfaction that the smoke which Abraham saw ascended from the northern end of the sea; but if his interesting discovery is reliable, there must have been some "smoke," as well as "extreme heat," at the southern end. If in these and similar features we have not physical evidence of the visitation which destroyed Sodom, we have just such material phenomena as we should naturally look for in a territory which had been the theatre of such a catastrophe, and whose subsequent condition had been described in the passages which have been cited.[a]

We turn now to the other proposed site, the country north of the sea, and we find neither names of the places nor traces of the events embraced in the Scriptural record. Instead of a territory scathed as by hot thunderbolts, we find a district teeming with all the elements of fruitfulness. In the very year that Moses describes the site of the destroyed cities as brimstone and salt and burning, Joshua brings the hosts of Israel to the territory which Mr. Grove proposes as the site of these cities, and finds there forests of palm and fields of barley, "old corn and parched corn," supplies of grain and fruit for the multitude, which enable them to dispense with the manna. Through the succeeding centuries important cities stood on this territory. It was here that the assembled nation, with sacrificial offerings and rejoicings, invested Saul with the kingdom (1 Sam. xi. 15); and here were gathered schools of the prophets (2 K. ii. 5, iv. 38). Josephus gives glowing descriptions of the exuberant productiveness of this very district, speaks of the variety of its trees and herbs, and refers to the revenue which it yielded (*Ant.* xv 4, § 2), describes it as the garden of Palestine, and even calls it a "divine region" (*B. J.* iv. 8, § 3). This plain or valley is now marked by a belt of luxuriant vegetation along the sweet waters of the river, while the interval between it and the highlands on each side, though arid in the dry season from the great heat, and presenting from this cause broad, desolate strips, is yet susceptible of irrigation and high cultivation. Not a token do we find here either of the awful catastrophe in which the guilty cities, with the plain on which they stood, were consumed, or of the perpetual desolation which subsequently brooded over the scene. We find the opposite; and in contrast with the descriptions which we have given of travellers who have visited the district south of the sea we quote the expression of the latest visitor to the district north of it who refers to "the verdant meadows on each side" (Porter, *Bashan*, p. 112).

Can there be a question which of these two sites is, and which is not, that of the historic Sodom? This combined topographical and historical argument against the pretensions of the new site, and in favor of the identity of the old, appears to us as conclusive as it well could be with reference to an event which occurred nearly four thousand years ago, decisive in itself, and jointly with other proofs potent enough to silence discussion. S. W.

SOD'OMA (Σόδομα: *Sodoma*). Rom. ix. 29. In this place alone the Authorized Version has followed the Greek and Vulgate form of the well-known name SODOM, which forms the subject of the preceding article. The passage is a quotation from Is. i. 9. The form employed in the Pentateuch, and occasionally in the other books of the A. V. of 1611 is Sodome, but the name is now universally reduced to Sodom, except in the one passage quoted above. G.

SOD'OMITES (קְדֵשִׁים; [see below]: *scortator effeminatus*). This word does not denote the inhabitants of Sodom (except only in 2 Esdr. vii. 36) nor their descendants; but is employed in the A. V. of the Old Testament for those who practiced as a religious rite the abominable and unnatural vice from which the inhabitants of Sodom and Gomorrah have derived their lasting infamy. It occurs in Deut. xxiii. 17; 1 K. xiv. 24, xv. 12, xxii. 46; 2 K. xxiii. 7; and Job xxxvi. 14 (margin). The Hebrew word *Kadesh* is said to be derived from a root *kadash*, which (strange as it may appear) means "pure," and thence "holy." The words *sacer* in Latin, and "devoted" in our language, have also a double meaning, though the subordinate signification is not so absolutely contrary to the principal one as it is in the case of *kadesh*. "This dreadful 'consecration,' or rather desecration, was spread in different forms over Phœnicia, Syria, Phrygia, Assyria, Babylonia. Ashtaroth, the Greek Astarte, was its chief object." It appears also to have been established at Rome, where its victims were called Galli (not from Gallia, but from the river Gallus in Bithynia). There is an instructive note on the subject in Jerome's *Comm.* on Hos. iv. 14.

[a] We have private advices that Mr. Tristram has relinquished the theory respecting the site of the cities to which he had published his assent, and now accepts the other view. S. W.

The translators of the Septuagint, with that anxiety to soften and conceal obnoxious expressions, which has been often noticed as a characteristic of their version, have, in all cases but one, avoided rendering *Kadesh* by its ostensible meaning. In the first of the passages cited above they give a double translation, πορνεύων and τελισκόμενος (initiated). In the second σύνδεσμος (a conspiracy, perhaps reading קֶשֶׁר). In the third τὰς τελετάς (sacrifices). In the fourth the Vat. MS. omits it, and the Alex. has τοῦ ἐνδιηλλαγμένου. In the fifth τῶν Καδησίμ: and in the sixth ὑπὸ ἀγγέλων.

There is a feminine equivalent to *Kadesh*, namely, *Kadeshah*. This is found in Gen. xxxviii. 21, 22; Deut. xxiii. 17, and Hos. iv. 14. In each of these cases it throws a new light on the passage to remember that these women were (if the expression may be allowed) the priestesses of a religion, not plying for hire, or merely instruments for gratifying passing lust. Such ordinary prostitutes are called by the name *zonah*.[a] The "strange women" of Prov. ii. 16, &c., were foreigners. *zaroth*. G.

**SOD'OMITISH SEA, THE** (*Mare Sodomiticum*), 2 Esdr. v. 7; meaning the Dead Sea. It is the only instance in the books of the Old Testament, New Testament, or Apocrypha, of an approach to the inaccurate modern opinion which connects the salt lake with the destruction of Sodom. The name may, however, arise here simply from Sodom having been situated near the lake. G.

* **SOLDIER.** [ARMS; ARMY.]

**SOL'OMON** (שְׁלֹמֹה, *Shĕlōmōh* [*peaceful, pacific*]: Σαλωμών, LXX.; Σολομών, N. T. and Joseph.: *Salomo*).

I. *Name.* — The changes of pronunciation are worth noticing. We lose something of the dignity of the name when it passes from the measured stateliness of the Hebrew to the anapest of the N. T., or the tribrach of our common speech. Such changes are perhaps inevitable wherever a name becomes a household word in successive generations, just as that of Friedereich (identical in meaning with Solomon) passes into Frederick. The feminine form of the word (Σαλώμη) retains the long vowel in the N. T. It appears, though with an altered sound, in the Arabic *Suleimaun*.

II. *Materials.* — (1.) The comparative scantiness of historical *data* for a life of Solomon is itself significant. While that of David occupies 1 Sam. xvi.–xxxi.; 2 Sam. i.–xxiv.; 1 K. i., ii.; 1 Chr. x.–xxix.; that of Solomon fills only the eleven chapters 1 K. i.–xi., and the nine 2 Chr. i.–ix. The compilers of those books felt, as by a true inspiration, that the wanderings, wars, and sufferings of David were better fitted for the instruction of after ages than the magnificence of his son.[b] They manifestly give extracts only from larger works which were before them, "The book of the Acts of Solomon" (1 K. xi. 41); "The book of Nathan the prophet, the book of Ahijah the Shilonite, the visions of Iddo the seer" (2 Chr. ix 29). Those which they do give, bear, with what for the historian is a disproportionate fullness, on the early glories of his reign, and speak but little (those in 2 Chr. not at all) of its later sins and misfortunes, and we are consequently unable to follow the annals of Solomon step by step.

(2.) Ewald, with his usual fondness for assigning different portions of each book of the O. T. to a series of successive editors, goes through the process here with much ingenuity, but without any very satisfactory result (*Geschichte*, iii. 259–263). A more interesting inquiry would be, to which of the books above named we may refer the sections which the compilers have put together. We shall probably not be far wrong in thinking of Nathan, far advanced in life at the commencement of the reign, David's chief adviser during the years in which he was absorbed in the details of the Temple and its ritual, himself a priest (1 K. iv. 5 in *Heb.*, comp. Ewald, iii. 116), as having written the account of the accession of Solomon and the dedication of the Temple (1 K. i.–viii. 66; 2 Chr. i.–viii. 15). The prayer of Solomon, so fully reproduced, and so obviously precomposed, may have been written under his guidance. To Ahijah the Shilonite, active at the close of the reign, alive some time after Jeroboam's accession, we may ascribe the short record of the sin of Solomon, and of the revolution to which he himself had so largely contributed (1 K. xi.). From the book of the Acts of Solomon came probably the miscellaneous facts as to the commerce and splendor of his reign (1 K. ix. 10–x. 29).

(3.) Besides the direct history of the O. T. we may find some materials for the life of Solomon in the books that bear his name, and in the psalms which are referred, on good grounds, to his time, Ps. ii., xlv., lxxii., cxxvii. Whatever doubts may hang over the date and authorship of Ecclesiastes and the Song of Songs, we may at least see in them the reflection of the thoughts and feelings of his reign. If we accept the latest date which recent criticism has assigned to them, they elaborately work up materials which were accessible to the writers, and are not accessible to us. If we refer them in their substance, following the judgment of the most advanced Shemitic scholars, to the Solomonic period itself, they then come before us with all the freshness and vividness of contemporary evidence (Renan, *Hist. des Langues Sémit.* p. 131).[c]

(4.) Other materials are but very scanty. The history of Josephus is, for the most part, only a loose and inaccurate paraphrase of the O. T. narrative. In him, and in the more erudite among early Christian writers, we find some fragments of older history not without their value, extracts from archives alleged to exist at Tyre in the first century of the Christian era, and from the Phœnician histories of Menander and Dius (Jos. *Ant.* viii. 2, § 6 5, § 3), from Eupolemos (Euseb. *Præp. Evang.* ix

---

[a] In 1 K. xxii. 38 the word *zonoth* is rendered armour." It should be "harlots" — "and the harlots washed themselves there" (early in the morning, as was their custom, adds Procopius of Gaza). The LXX. have rendered this correctly.

[b] The contrast presented by the Apocryphal literature of Jews, Christians, Mohammedans, abounding in pseudonymous works and legends gathering round the name of Solomon (*infra*), but having hardly any connection with David, is at once striking and instructive.

[c] The weight of Renan's judgment is however diminished by the fact that he had previously assigned Ecclesiastes to the time of Alexander the Great (*Cant. des Cant.* p. 103)

Digitized by Google

30), from Alexander Polyhistor, Menander, and Laitus (Clem. Al. *Strom.* i. 21). Writers such as these were of course only compilers at second-hand, but they probably had access to some earlier documents which have now perished.

(5.) The legends of later oriental literature will claim a distinct notice. All that they contribute to history is the help they give us in realizing the impression made by the colossal greatness of Solomon, as in earlier and later times by that of Nimrod and Alexander, on the minds of men of many countries and through many ages.

III. *Education.* — (1.) The student of the life of Solomon must take as his starting-point the circumstances of his birth. He was the child of David's old age, the last-born of all his sons (1 Chr. iii. 5).[a] His mother had gained over David a two-fold power: first, as the object of a passionate, though guilty love; and next, as the one person to whom, in his repentance, he could make something like restitution. The months that preceded his birth were for the conscience-stricken king a time of self-abasement. The birth itself of the child who was to replace the one that had been smitten must have been looked for as a pledge of pardon and a sign of hope. The feelings of the king and of his prophet-guide expressed themselves in the names with which they welcomed it. The yearnings of the "man of war," who "had shed much blood," for a time of peace — yearnings which had shown themselves before, when he gave to his third son the name of Ab-salom (= father of peace), now led him to give to the new-born infant the name of Solomon (Shĕlōmōh = the peaceful one). Nathan, with a marked reference to the meaning of the king's own name (= the darling, the beloved one), takes another form of the same word, and joins it, after the growing custom of the time, with the name of Jehovah. David had been the darling of his people. Jedid-jah (the name was coined for the purpose) should be the darling of the Lord. (2 Sam. xii. 24, 25.[b] See JEDIDIAH; and Ewald, iii. 215.)

(2.) The influences to which the childhood of Solomon was thus exposed must have contributed largely to determine the character of his after years. The inquiry, what was the education which ended in such wonderful contrasts, — a wisdom then, and perhaps since, unparalleled, — a sensuality like that of Louis[c] XV., cannot but be instructive. The three influences which must have entered most largely into that education were those of his father, his mother, and the teacher under whose charge he was placed from his earliest infancy (2 Sam. xii. 25).

(3.) The fact just stated, that a prophet-priest was made the special instructor, indicates the king's earnest wish that this child at least should be protected against the evils which, then and afterwards, showed themselves in his elder sons, and be worthy of the name he bore. At first, apparently, there was no distinct purpose to make him his heir. Absalom is still the king's favorite son (2 Sam. xiii. 37, xviii. 33) — is looked on by the people as the destined successor (2 Sam. xiv. 13, xv. 1–6). The death of Absalom, when Solomon was about ten years old, left the place vacant, and David, passing over the claims of all his elder sons, those by Bathsheba included, guided by the influence of Nathan, or by his own discernment of the gifts and graces which were tokens of the love of Jehovah, pledged his word in secret to Bathsheba that he, and no other, should be the heir (1 K. i. 13). The words which were spoken somewhat later, express, doubtless, the purpose which guided him throughout (1 Chr. xxviii. 9, 20). His son's life should not be as his own had been, one of hardships and wars, dark crimes and passionate repentance, but, from first to last, be pure, blameless, peaceful, fulfilling the ideal of glory and of righteousness, after which he himself had vainly striven. The glorious visions of Ps lxxii. may be looked on as the prophetic expansion of those hopes of his old age. So far, all was well. But we may not ignore the fact, that the later years of David's life presented a change for the worse, as well as for the better. His sin, though forgiven, left behind it the Nemesis of an enfeebled will and a less generous activity. The liturgical element of religion becomes, after the first passionate outpouring of Ps. li., unduly predominant. He lives to amass treasures and materials for the Temple which he may not build (1 Chr. xxii. 5, 14). He plans with his own hands all the details of its architecture (1 Chr. xxviii. 19). He organizes on a scale of elaborate magnificence all the attendance of the priesthood and the choral services of the Levites (1 Chr xxiv., xxv.). But, meanwhile, his duties as a king are neglected. He no longer sits in the gate to do judgment (2 Sam. xv. 2, 4). He leaves the sin of Amnon unpunished, "because he loved him, for he was his first-born" (LXX. of 2 Sam. xiii. 21) The hearts of the people fall away from him. First Absalom, and then Sheba, become formidable rivals (2 Sam. xv. 6, xx. 2). The history of the numbering of the people (2 Sam. xxiv., 1 Chr. xxi.) implies the purpose of some act of despotism, a poll-tax, or a conscription (2 Sam. xxiv. 9 makes the latter the more probable), such as startled all his older and more experienced counsellors. If, in "the last words of David" belonging to this period, there is the old devotion, the old hungering after righteousness (2 Sam. xxiii. 2–5), there is also — first generally (*ibid.* 6, 7), and afterwards resting on individual offenders (1 K. ii. 5–8) — a more passionate desire to punish those who had wronged him, a painful recurrence of vindictive thoughts for offenses which he had once freely forgiven, and which were not greater than his own. We cannot rest in the belief that his influence over his son's character was one exclusively for good.

(4.) In eastern countries, and under a system of polygamy, the son is more dependent, even than elsewhere, on the character of the mother. The history of the Jewish monarchy furnishes many instances of that dependence. It recognises it in

---

[a] The narrative of 2 Sam. xii. leaves, it is true, a different impression. On the other hand, the order of the names in 1 Chr. iii. 5, is otherwise unaccountable. Josephus distinctly states it (*Ant.* vii. 14, § 2).

[b] According to the received interpretation of Prov. xxi. 1, his mother also contributed an ideal name, Lemuel (= to God, Decdatus), the dedicated one (comp. Ewald. *Post Bücb.* iv 173). On this hypothesis the reproof was drawn forth by the king's intemperance and sensuality. In contrast to what his wives were, she draws the picture of what a pattern wife ought to be (Pineda, i. 4).

[c] Here also the epithet "le bien-aimé" reminds us, no less than Jedidiah, of the terrible irony of History for those who abuse gifts and forfeit a vocation

Digitized by Google

the care with which it records the name of each sovereign's mother. Nothing that we know of Bathsheba leads us to think of her as likely to mould her son's mind and heart to the higher forms of goodness. She offers no resistance to the king's passion (Ewald, iii. 211). She makes it a stepping-stone to power. She is a ready accomplice in the scheme by which her shame was to have been concealed. Doubtless she too was sorrowful and penitent when the rebuke of Nathan was followed by her child's death (2 Sam. xii. 24), but the after-history shows that the grand-daughter of Ahithophel [BATHSHEBA] had inherited not a little of his character. A willing adulteress, who had become devout, but had not ceased to be ambitious, could hardly be more, at the best, than the Madame de Maintenon of a king, whose contrition and piety were rendering him unlike his former self, unduly passive in the hands of others.

(5.) What was likely to be the influence of the prophet to whose care the education of Solomon was confided? (*Heb.* of 2 Sam. xii. 25.) We know, beyond all doubt, that he could speak bold and faithful words when they were needed (2 Sam. vii. 1–17, xii. 1–14). But this power, belonging to moments or messages of special inspiration, does not involve the permanent possession of a clear-sighted wisdom, or of aims uniformly high; and we in vain search the later years of David's reign for any proof of Nathan's activity for good. He gives himself to the work of writing the annals of David's reign (1 Chr. xxix. 29). He places his own sons in the way of being the companions and counsellors of the future king (1 K. iv. 5). The absence of his name from the history of the "numbering," and the fact that the census was followed early in the reign of Solomon by heavy burdens and a forced service, almost lead us to the conclusion that the prophet had acquiesced[a] in a measure which had in view the magnificence of the Temple, and that it was left to David's own heart, returning to its better impulses (2 Sam. xxiv. 10), and to an older and less courtly prophet, to protest against an act which began in pride and tended to oppression.[b]

(6.) Under these influences the boy grew up. At the age of ten or eleven he must have passed through the revolt of Absalom, and shared his father's exile (2 Sam. xv. 16). He would be taught all that priests, or Levites, or prophets had to teach: music and song: the Book of the Law of the Lord, in such portions and in such forms as were then current; the "proverbs of the ancients," which his father had been wont to quote (1 Sam. xxiv. 13); probably also a literature which has survived only in fragments; the Book of Jasher, the upright ones, the heroes of the people; the Book of the Wars of the Lord; the wisdom, oral or written, of the sages of his own tribe, Heman, and Ethan, and Calcol, and Darda (1 Chr. ii. 6), who contributed so largely to the noble hymns of this period (Ps. lxxviii., lxxxix.), and were incorporated, probably, into the choir of the Tabernacle (Ewald, iii. 355). The growing intercourse of Israel with the Phœnicians would lead naturally to a wider knowledge of the outlying world and its wonders than had fallen to his father's lot. And mirable, however, as all this was, a shepherd-life like his father's, furnished, we may believe, a better education for the kingly calling (Ps. lxxviii. 70, 71). Born to the purple, there was the inevitable risk of a selfish luxury. Cradled in liturgies, trained to think chiefly of the magnificent "palace" of Jehovah (1 Chr. xxix. 19) of which he was to be the builder, there was the danger, first, of an æsthetic formalism, and then of ultimate indifference.

IV. *Accession.* — (1.) The feebleness of David's old age led to an attempt which might have deprived Solomon of the throne his father destined for him. Adonijah, next in order of birth to Absalom, like Absalom "was a goodly man" (1 K. i. 6), in full maturity of years, backed by the oldest of the king's friends and counsellors, Joab and Abiathar, and by all the sons of David, who looked with jealousy, the latter on the obvious though not as yet declared preference of the latest-born, and the former on the growing influence of the rival counsellors who were most in the king's favor, Nathan, Zadok, and Benaiah. Following in the steps of Absalom, he assumed the kingly state of a chariot and a body-guard; and David, more passive than ever, looked on in silence. At last a time was chosen for openly proclaiming him as king. A solemn feast at EN-ROGEL was to inaugurate the new reign. All were invited to it but those whom it was intended to displace. It was necessary for those whose interests were endangered, backed apparently by two of David's surviving elder brothers (Ewald, iii. 266; 1 Chr. ii. 13, 14), to take prompt measures. Bathsheba and Nathan took counsel together. The king was reminded of his oath. A virtual abdication was pressed upon him as the only means by which the succession of his favorite son could be secured. The whole thing was completed with wonderful rapidity. Riding on the mule, well-known as belonging to the king, attended by Nathan the prophet, and Zadok the priest, and more important still, by the king's special company of the thirty Gibborim, or mighty men (1 K. i. 10, 33), and the body-guard of the Cherethites and Pelethites (mercenaries, and therefore not liable to the contagion of popular feeling) under the command of Benaiah (himself, like Nathan and Zadok, of the sons of Aaron), he went down to GIHON, and was proclaimed and anointed king.[c] The shouts of his followers fell on the startled ears of the guests at Adonijah's banquet. Happily they were as yet committed to no overt act, and they did not venture on one now. One by one they rose and departed. The plot had failed. The counter *coup d'état* of Nathan and Bathsheba had been successful. Such incidents are common enough in the history of eastern monarchies. They are usually followed by a massacre of the defeated party. Adonijah expected such an issue, and took refuge at the horns of the altar. In this instance, however, the young conqueror used his triumph generously. The lives both of Adonijah and his partisans were spared, at least for a time. What had been done hurriedly was done afterwards in more solemn form. Solomon was presented to a great gathering of all the notables of Israel, with a set speech, in

---

[a] Josephus, with his usual inaccuracy, substitutes Nathan for Gad in his narrative (*Ant.* vii. 13, § 2).

[b] We regret to find ourselves unable to follow Ewald in his high estimate of the old age of David, and, consequently, of Solomon's education.

[c] According to later Jewish teaching a king was not anointed when he succeeded his father, except in the case of a previous usurpation or a disputed succession (Otho, *Lexic. Rabbin* s. v. "Rex").

Digitized by Google

which the old king announced what was, to his mind, the programme of the new reign, a time of peace and plenty, of a stately worship, of devotion to Jehovah. A few months more, and Solomon found himself, by his father's death, the sole occupant of the throne.

(2.) The position to which he succeeded was unique. Never before, and never after, did the kingdom of Israel take its place among the great monarchies of the East, able to ally itself, or to contend on equal terms with Egypt or Assyria, stretching from the River (Euphrates) to the border of Egypt, from the Mediterranean to the Gulf of Akaba, receiving annual tributes from many subject princes. Large treasures accumulated through many years were at his disposal.[a] The people, with the exception of the tolerated worship in high places, were true servants of Jehovah. Knowledge, art, music, poetry, had received a new impulse, and were moving on with rapid steps, to such perfection as the age and the race were capable of attaining. We may rightly ask — what manner of man he was, outwardly and inwardly, who at the age of nineteen or twenty, was called to this glorious sovereignty? We have, it is true, no direct description in this case as we have of the earlier kings. There are, however, materials for filling up the gap. The wonderful impression which Solomon made upon all who came near him may well lead us to believe that with him, as with Saul and David, Absalom and Adonijah, as with most other favorite princes of eastern peoples, there must have been the fascination and the grace of a noble presence. Whatever higher mystic meaning may be latent in Ps. xlv., or the Song of Songs, we are all but compelled to think of them as having had, at least, a historical starting-point. They tell us of one who was, in the eyes of the men of his own time, "fairer than the children of men," the face "bright and ruddy" as his father's (Cant. v. 10; 1 Sam. xvii. 42), bushy locks, dark as the raven's wing, yet not without a golden glow,[b] the eyes soft as "the eyes of doves," the "countenance as Lebanon, excellent as the cedars," "the chiefest among ten thousand, the altogether lovely" (Cant. 9–16). Add to this all gifts of a noble, far-reaching intellect, large and ready sympathies, a playful and genial humor, the lips "full of grace," the soul "anointed" as "with the oil of gladness" (Ps. xlv.), and we may form some notion of what the king was like in that dawn of his golden prime.[c]

(3.) The historical starting-point of the Song of Songs just spoken of connects itself, in all probability, with the earliest facts in the history of the new reign. The narrative, as told in 1 K. ii. is not a little perplexing. Bathsheba, who had before stirred up David against Adonijah, now appears as interceding for him, begging that Abishag the Shunamite, the virgin concubine of David, might be given him as a wife. Solomon, who till then had professed the profoundest reverence for his mother, his willingness to grant her anything, suddenly flashes into fiercest wrath at this. The petition is treated as part of a conspiracy in which Joab and Abiathar are sharers. Benaiah is once more called in. Adonijah is put to death at once. Joab is slain even within the precincts of the Tabernacle, to which he had fled as an asylum. Abiathar is deposed, and exiled, sent to a life of poverty and shame (1 K. ii. 31–36), and the high priesthood transferred to another family more ready than he had been to pass from the old order to the new, and to accept the voices of the prophets as greater than the oracles which had belonged exclusively to the priesthood [comp. URIM AND THUMMIM]. The facts have, however, an explanation. Mr. Grove's ingenious theory[d] identifying Abishag with the heroine of the Song of Songs [SHULAMITE], resting, as it must do, on its own evidence, has this further merit, that it explains the phenomena here. The passionate love of Solomon for "the fairest among women," might well lead the queen-mother hitherto supreme, to fear a rival influence, and to join in any scheme for its removal. The king's vehement abruptness is, in like manner, accounted for. He sees in the request at once an attempt to deprive him of the woman he loves, and a plot to keep him still in the tutelage of childhood, to entrap him into admitting his elder brother's right to the choicest treasure of his father's harem, and therefore virtually to the throne, or at least to a regency in which he would have his own partisans as counsellors. With a keen-sighted promptness he crushes the whole scheme. He gets rid of a rival, fulfills David's dying counsels as to Joab, and asserts his own independence. Soon afterwards an opportunity is thrown in his way of getting rid of one [SHIMEI], who had been troublesome before, and might be troublesome again. He presses the letter of a compact against a man who by his infatuated disregard of it seemed given over to destruction[e] (1 K. ii. 36–46). There is, however, no needless slaughter. The other "sons of David" are still spared, and

---

[a] The sums mentioned are (1) the public funds for building the Temple, 100,000 talents (kikarim) of gold and 1,000,000 of silver; (2) David's private offerings, 3,000 talents of gold and 7,000 of silver. Besides these, large sums of unknown amount were believed to have been stored up in the sepulchre of David. 3,000 talents were taken from it by Hyrcanus (Jos. *Ant.* vii. 15, § 3, xiii. 8, § 4, xvi. 7, § 1), treasured up by the Jews of the Captivity, and received by the Scribes of the Great Synagogue as by, or at least, in honor of Solomon (comp. Renan, *La Cantique des Cantiques*, pp. 91, 95). We follow the Jesuit Pineda (*De rebus Salom.* iv. 3) in applying the language of the Shulamite to Solomon's personal appearance, but not in his extreme minuteness

[b] Possibly sprinkled with gold dust, as was the hair of the youths who waited on him (Jos. *Ant.* viii. 7, § 3), or dyed with henna (Michaelis, *Not. in* Lowth, *Prael.* xxxi.)

[c] It will be seen that we adopt the scheme of the older literalist school, Bossuet, Lowth, Michaelis, rather than that of the more recent critics, Ewald, Renan, Ginsburg. Ingeniously as the idea is worked out we cannot bring ourselves to believe the) a drama, belonging to the literature of the northern kingdom, not to that of Judah, holding up Solomon to ridicule as at once licentious and unsuccessful, would have been

[d] The hypothesis is, however, not altogether new It was held by some of the literalist historical school of Theodore of Mopsuestia (not by Theodore himself; comp. his fragments in Migne, lxvi. 699), and as such is anathematised by Theodoret of Cyrus (*Praef. in Cant. Cantic.*). The latter, believing the Song of Solomon to have been supernaturally dictated to Ezra, could admit no interpretation but the mystical (comp Ginsburg, *Song of Sol.* p. 66).

[e] An elaborate vindication of Solomon's conduct in this matter may be found in Menthen's *Thesaurus*, i. Sliseer, *Inss. de Salom. processu contra Shimei.*

one of them, Nathan, becomes the head of a distinct family (Zech. xii. 12), which ultimately fills up the failure of the direct succession (Luke iii. 31). As he punishes his father's enemies, he also shows kindness to the friends who had been faithful to him. Chimham, the son of Barzillai, apparently receives an inheritance near the city of David, and probably in the reign of Solomon, displays his inherited hospitality by building a caravanserai for the strangers whom the fame and wealth of Solomon drew to Jerusalem (2 Sam. xix. 31–40; 1 K. ii. 7; Jer. xli. 17; Ewald, *Gesch.* iii. 274; *Proph.* ii. 191).

V. *Foreign Policy.* — (1.) The want of sufficient *data* for a continuous history has been already noticed. All that we have are — (*a.*) The duration of the reign, 40 years[a] (1 K. xi. 42). (*b.*) The commencement of the Temple in the 4th, its completion in the 11th year of his reign (1 K. vi. 1, 37, 38). (*c.*) The commencement of his own palace in the 7th, its completion in the 20th year (1 K. vii. 1; 2 Chr. viii. 1). (*d.*) The conquest of Hamath-Zobah, and the consequent foundation of cities in the region north of Palestine after the 20th year (2 Chr. viii. 1–6). With materials so scanty as these, it will be better to group the chief facts in an order which will best enable us to appreciate their significance.

(2.) *Egypt.* — The first act of the foreign policy of the new reign must have been to most Israelites a very startling one. He made affinity with Pharaoh, king of Egypt. He married Pharaoh's daughter (1 K. iii. 1).[b] Since the time of the Exodus there had been no intercourse between the two countries. David and his counsellors had taken no steps to promote it. Egypt had probably taken part in assisting Edom in its resistance to David (1 Chr. xi. 23; Ewald, iii. 182), and had received Hadad, the prince of Edom, with royal honors. The king had given him his wife's sister in marriage, and adopted his son into his own family (1 K. xi. 14–20). These steps indicated a purpose to support him at some future time more actively, and Solomon's proposal of marriage was probably intended to counteract it. It was at the time so far successful, that when Hadad, on hearing of the death of the dreaded leaders of the armies of Israel, David and Joab, wished to seize the opportunity of attacking the new king, the court of Egypt rendered him no assistance (1 K. xi. 21, 22). The disturbances thus caused, and not less those in the North, coming from the foundation of a new Syrian kingdom at Damascus by Rezon and other fugitives from Zobah (1 K. xi. 23–25), might well lead Solomon to look out for a powerful support,[c] to obtain for a new dynasty and a new kingdom a recognition by one of older fame and greater power. The immediate results were probably favorable enough.[d] The new queen brought with her as a dowry the frontier-city of Gezer, against which, as threatening the tranquillity of Israel, and as still possessed by a remnant of the old Canaanites,[e] Pharaoh had led his armies.[f] She was received with all honor, the queen-mother herself attending to place the diadem on her son's brow on the day of his espousals (Cant. iii. 11). Gifts from the nobles of Israel and from Tyre (the latter offered perhaps by a Tyrian princess) were lavished at her feet (Ps. xlv. 12). A separate and stately palace was built for her before long, outside the city of David (2 Chr. viii 11).[g] She dwelt there apparently with attendants of her own race, "the virgins that he her fellows," probably conforming in some degree to the religion of her adopted country. According to a tradition which may have some foundation in spite of its exaggerated numbers, Pharaoh (Psusennes, or as in the story Vaphres) sent with her workmen to help in building the Temple, to the number of 80,000 (Eupolemos, in Euseb. *Præp. Evang.* ii. 30–35). The "chariots of Pharaoh," at any rate, appeared in royal procession with a splendor hitherto unknown (Cant. i. 9).

(3.) The ultimate issue of the alliance showed that it was hollow and impolitic. There may have been a revolution in Egypt, changing the dynasty and transferring the seat of power to Bubastis (Ewald, iii. 389).[h] There was at any rate a change of policy. The court of Egypt welcomes the fugitive Jeroboam when he is known to have aspirations after kingly power. There, we may believe, by some kind of compact, expressed or understood, was planned the scheme which led first to the rebellion of the Ten Tribes, and then to the attack of Shishak on the weakened and dismantled kingdom of the son of Solomon. Evils such as these were hardly counterbalanced by the trade opened by Solomon in the fine linen of Egypt, or the supply of chariots and horses, which, as belonging to aggressive rather than defensive warfare, a wiser policy would have led him to avoid (1 K. x. 28, 29).

(4.) *Tyre.* — The alliance with the Phœnician king rested on a somewhat different footing. It had been part of David's policy from the beginning of his reign. Hiram had been "ever a lover of David." He, or his grandfather,[i] had helped him

---

[a] Josephus, again inaccurate, lengthens the reign to 80 years, and makes the age at accession 14 (*Ant.* viii. 7, § 8).

[b] This Pharaoh is identified by Ewald (iii. 279) with Psusennes, the last king of the XXIXth dynasty of Manetho, which had its seat in Lower Egypt at Tanis (but see PHARAOH, iii. 2466 f.). Josephus (*Ant.* viii. 6, § 2) only notes the fact that he was the last king of Egypt who was known simply by the *title* Pharaoh.

[c] Josephus (*Ant.* viii. 7, § 6), misled by the position of these statements, refers the disturbances to the close of Solomon's reign, and is followed by most later writers. The dates given, however, in one case after the death of Joab, in the other after David's conquest of Zobah, show that we must think of them as continuing "all the days of Solomon," surmounted at the commencement of his reign, becoming more formidable at its conclusion.

[d] Ewald sees in Ps. ii. a great hymn of thanksgiving for deliverance from these dangers. The evidence in favor of David's authorship seems, however, to preponderate.

[e] Philistines, according to Josephus (*Ant.* viii. 6, § 1).

[f] If, with Ewald (iii. 277), we identify Gezer with Geshur, we may see in this attack a desire to weaken a royal house which was connected by marriage with Absalom (2 Sam. xiii. 37), and therefore likely to be hostile to Solomon. But comp. GEZER.

[g] We may see in this fact a sign of popular dissatisfaction at least on the part of the Priests and Levites represented by the compiler of 2 Chr.

[h] The singular addition of the LXX. to the history of Jeroboam in 1 K. xi. makes this improbable. Jeroboam, as well as Hadad, is received into the king's family by marriage with his wife's sister, and, in each case, the wife's name is given as Thekemina.

[i] Comp. the *data* given in 2 Sam. v. 11; Josephus

by supplying materials and workmen for his palace. As soon as he heard of Solomon's accession he sent ambassadors to salute him. A correspondence passed between the two kings, which ended in a treaty of commerce.[a] Israel was to be supplied from Tyre with the materials which were wanted for the Temple that was to be the glory of the new reign. Gold from Ophir, cedar-wood from Lebanon, probably also copper from Cyprus and tin from Spain or Cornwall (Niebuhr, *Lect. on Anc. Hist.* i. 79) for the brass which was so highly valued, purple from Tyre itself, workmen from among the Zidonians, all these were wanted and were given. The opening of Joppa as a port created a new coasting-trade, and the materials from Tyre were conveyed to it on floats, and thence to Jerusalem (2 Chr ii. 16). The chief architect of the Temple, though an Israelite on his mother's side, belonging to the tribe of Dan or Naphtali [HIRAM], was yet by birth a Tyrian, a namesake of the king. In return for these exports the Phœnicians were only too glad to receive the corn and oil of Solomon's territory. Their narrow strip of coast did not produce enough for the population of their cities, and then, as at a later period, "their country was nourished" by the broad valleys and plains of Samaria and Galilee (Acts xii. 20).

(5.) The results of the alliance did not end here. Now, for the first time in the history of Israel, they entered on a career as a commercial people. They joined the Phœnicians in their Mediterranean voyages to the coasts of Spain [TARSHISH].[b] Solomon's possession of the Edomite coast enabled him to open to his ally a new world of commerce. The ports of Elath and Ezion-geber were filled with ships of Tarshish, merchant-ships, *i. e.* for the long voyages, manned chiefly by Phœnicians, but built at Solomon's expense, which sailed down the Ælanitic Gulf of the Red Sea, on to the Indian Ocean, to lands which had before been hardly known even by name, to OPHIR and SHEBA, to Arabia Felix, or India, or Ceylon, and brought back, after an absence of nearly three years, treasures almost or altogether new, gold and silver and precious stones, nard, aloes, sandal-wood, almug-trees, and ivory; and, last but not least in the eyes of the historian, new forms of animal life, on which the inhabitants of Palestine gazed with wondering eyes, "apes and peacocks." The interest of Solomon in these enterprises was shown by his leaving his palaces at Jerusalem and elsewhere, and travelling to Elath and Ezion-geber to superintend the construction of the fleet (2 Chr. viii. 17), perhaps also to Sidon for a like purpose.[c] To the knowledge thus gained, we may ascribe the wider thoughts which appear in the Psalms of this and the following periods, as of those who "see the wonders of the deep and occupy their business in great waters" (Ps. cvii. 23–30), perhaps also an experience of the more humiliating accidents of sea-travel (Prov. xxiii. 34, 35).

(6.) According to the statement of the Phœnician writers quoted by Josephus (*Ant.* viii. 5, § 3), the intercourse of the two kings had in it also something of the sportiveness and freedom of friends. They delighted to perplex each other with hard questions, and laid wagers as to their power of answering them. Hiram was at first the loser and paid his forfeits; but afterwards, through the help of a sharp-witted Tyrian boy, Abdemon, solved the hard problems, and was in the end the winner.[d] The singular fragment of history inserted in 1 K. ix. 11–14, recording the cession by Solomon of sixteen [twenty] cities, and Hiram's dissatisfaction with them, is perhaps connected with these imperial wagers. The king of Tyre revenges himself by a Phœnician bon-mot [CABUL]. He fulfills his part of the contract, and pays the stipulated price.

(7.) These were the two most important alliances. The absence of any reference to Babylon and Assyria, and the fact that the Euphrates was recognized as the boundary of Solomon's kingdom (2 Chr. ix. 26), suggest the inference that the Mesopotamian monarchies were, at this time, comparatively feeble. Other neighboring nations were content to pay annual tribute in the form of gifts (2 Chr. ix. 24). The kings of the Hittites and of Syria welcomed the opening of a new line of commerce which enabled them to find in Jerusalem an emporium where they might get the chariots and horses of Egypt (1 K. ix. 28). This, however, was obviously but a small part of the traffic organized by Solomon. The foundation of cities like Tadmor in the wilderness, and Tiphsah (Thapsacus) on the Euphrates; of others on the route, each with its own special market for chariots, or horses, or stores (2 Chr. viii. 3–6); the erection of lofty towers on Lebanon (2 Chr. *l. c.*; Cant. vii. 4) pointed to a more distant commerce, opening out the resources of central Asia, reaching, — as that of Tyre did afterwards, availing itself of this very route, — to the nomad tribes of the Caspian and the Black Seas, to Togarmah and Meshech and Tubal (Ez. xxvii. 13, 14; comp. Milman, *Hist. of the Jews*, i. 270).

(8.) The survey of the influence exercised by Solomon on surrounding nations would be incomplete if we were to pass over that which was more directly personal — the fame of his glory and his wisdom. The legends which pervade the East are probably not merely the expansion of the scanty notices of the O. T.; but (as suggested above), like those which gather round the names of Nimrod and Alexander, the result of the impression made by the personal presence of one of the mighty ones of the

---

*Ant.* vii. 3, § 2, viii. 5, § 3, *c. Ap.* i. 18, and Ewald, iii. 287.

[a] The letters are given at length by Josephus (*Ant.* viii. 2, § 3) and Eupolemus (Euseb. *Præp. Ev.* i. 9.).

[b] Ewald disputes this (iii. 345), but the statement in 2 Chr ix. 21, is explicit enough, and there are no grounds for arbitrarily setting it aside as a blunder.

[c] The statement of Justin Mart. (*Dial. c. Tryph.* c. 78), ἐν Σιδῶνι αἰθυιολάτραι, receives by the accompanying διὰ γυναῖκα the character of an extract from some history then extant. The marriage of Solomon with a daughter of the king of Tyre is mentioned by Eusebius (*Præp. Evang.* x. 11).

[d] The narrative of Josephus implies the existence of some story, more or less humorous, in Tyrian literature, in which the wisest of the kings of earth was baffled by a boy's cleverness. A singular pendant to this is found in the popular mediæval story of Solomon and Morolf, in which the latter (an ugly, deformed dwarf) outwits the former. A modernized version of this work may be found in the Walhalla (Leipzig, 1844). Older copies, in Latin and German, of the 15th century, are in the Brit. Mus. Library. The Anglo-Saxon Dialogue of Solomon and Saturn is a mere catechism of Scriptural knowledge.

Digitized by Google

earth.[a] Wherever the ships of Tarshish went, they carried with them the report, losing nothing in its passage, of what their crews had seen and heard. The impression made on the Incas of Peru by the power and knowledge of the Spaniards, offers perhaps the nearest approach to what falls so little within the limits of our experience, though there was there no personal centre round which the admiration could gather itself. The journey of the queen of Sheba, though from its circumstances the most conspicuous, did not stand alone. The inhabitants of Jerusalem, of the whole line of country between it and the Gulf of Akaba, saw with amazement the "great train" — the men with their swarthy faces, the camels bearing spices and gold and gems — of a queen who had come from the far South,[b] because she had heard of the wisdom of Solomon, and connected with it "the name of Jehovah" (1 K. x. 1). She came with hard questions to test that wisdom, and the words just quoted may throw light upon their nature. Not riddles and enigmas only, such as the sportive fancy of the East delights in, but the ever-old, ever-new problems of life, such as, even in that age and country, were vexing the hearts of the speakers in the book of Job,[c] were stirring in her mind when she communed with Solomon of "all that was in her heart" (2 Chr. ix. 1). She meets us as the representative of a body whom the dedication-prayer shows to have been numerous, the strangers "coming from a far country" because of the "great name" of Jehovah (1 K. viii. 41), many of them princes themselves, or the messengers of kings (2 Chr. ix. 23). The historians of Israel delighted to dwell on her confession that the reality surpassed the fame, "the one half of the greatness of thy wisdom was not told me" (2 Chr. ix. 6; Ewald, iii. 353).

VI. *Internal History.* — (1.) We can now enter upon the reign of Solomon, in its bearing upon the history of Israel, without the necessity of a digression. The first prominent scene is one which presents his character in its noblest aspect. There were two holy places which divided the reverence of the people, the ark and its provisional tabernacle at Jerusalem, and the original Tabernacle of the congregation, which, after many wanderings, was now pitched at Gibeon. It was thought right that the new king should offer solemn sacrifices at both. After those at Gibeon[d] there came that vision of the night which has in all ages borne its noble witness to the hearts of rulers. Not for riches, or long life, or victory over enemies, would the son of David, then at least true to his high calling, feeling himself as "a little child" in comparison with the vastness of his work, offer his supplications, but for a "wise and understanding heart," that he might judge the people. The "speech pleased the Lord." There came in answer the promise of a wisdom "like which there had been none before, like which there should be none after" (1 K. iii. 5–15). So far all was well. The prayer was a right and noble one. Yet there is also a contrast between it and the prayers of David which accounts for many other contrasts. The desire of David's heart is not chiefly for wisdom, but for holiness. He is conscious of an oppressing evil, and seeks to be delivered from it. He repents, and falls, and repents again. Solomon asks only for wisdom. He has a lofty ideal before him, and seeks to accomplish it, but he is as yet haunted by no deeper yearnings, and speaks as one who has "no need of repentance."

(2.) The wisdom asked for was given in large measure, and took a varied range. The wide world of nature, animate and inanimate, which the enterprises of his subjects were throwing open to him the lives and characters of men, in all their surface-weaknesses, in all their inner depths, lay before him, and he took cognizance of all.[e] But the highest wisdom was that wanted for the highest work, for governing and guiding, and the historian hastens to give an illustration of it. The pattern-instance is, in all its circumstances, thoroughly oriental. The king sits in the gate of the city, at the early dawn, to settle any disputes, however strange, between any litigants, however humble. In the rough and ready test which turns the scales of evidence, before so evenly balanced, there is a kind of rough humor as well as sagacity, specially attractive to the eastern mind, then and at all times (1 K. iii. 16–28).

(3.) But the power to rule showed itself not in judging only, but in organizing. The system of government which he inherited from David received a fuller expansion. Prominent among the "princes" of his kingdom, *i. e.* officers of his own appointment, were members of the priestly order: *f* Azariah the son of Zadok, Zadok himself the high-priest, Benaiah the son of Jehoiada as captain of the host, another Azariah and Zabud, the sons of Nathan, one over the officers (*Nitsabim*) who acted as purveyors to the king's household (1 K. iv. 2–5), the other in the more confidential character of "king's friend." In addition to these there were the two scribes (*Sophérim*), the king's secretaries, drawing up his edicts and the like [SCRIBES], Elihoreph and Ahiah, the recorder or annalist of the king's reign (*Mazcir*), the superintendent of the king's house, and house-

---

[a] Cities like Tadmor and Tiphsah were not likely to have been founded by a king who had never seen and chosen the sites. 2 Chr. viii. 3, 4, implies the journey which Josephus speaks of (*Ant.* viii. 6, § 1), and at Tadmor Solomon was within one day's journey of the Euphrates, and six of Babylon. (So Josephus, *l. c.*, but the day's journey must have been a long one.)

[b] Josephus, again careless about authorities, makes her a queen of Egypt (!) and Ethiopia (*Ant.* viii. 6, 5).

[c] Is it possible that the book itself came into the literature of Israel by the intercourse thus opened? Its Arabic character, both in language and thought, and the obvious traces of its influence in the book of Proverbs, have been noticed by all critics worthy of the name [comp. JOB].

[d] Hebron, in Josephus, once more blundering (*Ant.* viii. 2, § 1)

[e] Ewald sees in the words of 1 K. iv. 33, the record of books more or less descriptive of natural history, the *catalogue raisonnée* of the king's collections, botanic and zoölogical (iii. 358); to Renan, however (following Josephus), it seems more in harmony with the unscientific character of all Shemitic minds, to think of them as looking on the moral side of nature, drawing parables or allegories from the things he saw (*Hist. des Langues Sémitiques*, p. 127). The multiplied allusions of this kind in Prov. xxx. make that, perhaps, a fair representative of this form of Solomon's wisdom, though not by Solomon himself.

[f] We cannot bring ourselves, with Keil (*Comm. in loc.*) and others, to play fast and loose with the word *Cohen*, and to give it different meanings in alternate verses. [COMP PRIESTS.]

Digitized by Google

gold expenses (Is. xxii. 15), including probably the *harém*. The last in order, at once the most indispensable and the most hated, was Adoniram, who presided "over the tribute," that word including probably the personal service of forced labor (comp. Keil, *Comm.* in loc., and Ewald, *Gesch.* iii. 334).

(4.) The last name leads us to the king's finances. The first impression of the facts given us is that of abounding plenty. That all the drinking vessels of the two palaces should be of pure gold was a small thing, "nothing accounted of in the days of Solomon" (1 K. x. 21).[a] "Silver was in Jerusalem as stones, and cedars as the sycamore-trees in the vale" (1 K. x. 27). The people were "eating and drinking and making merry" (1 K. iv. 20). The treasures left by David for building the Temple might well seem almost inexhaustible[b] (1 Chr. xxix. 1 7). The large quantities of the precious metals imported from Ophir and Tarshish would speak, to a people who had not learnt the lessons of a long experience, of a boundless source of wealth (1 K. ix. 28). All the kings and princes of the subject-provinces paid tribute in the form of gifts, in money and in kind, "at a fixed rate year by year" (1 K. x. 25). Monopolies of trade, then, as at all times in the East, contributed to the king's treasury, and the trade in the fine linen, and chariots, and horses of Egypt, must have brought in large profits (1 K. x. 28, 29). The king's domain-lands were apparently let out, as vineyards or for other purposes, at a fixed annual rental (Cant. viii. 11) Upon the Israelites (probably not till the later period of his reign) there was levied a tax of ten per cent. on their produce (1 Sam. viii. 15). All the provinces of his own kingdom, grouped apparently in a special order for this purpose, were bound each in turn to supply the king's enormous household with provisions (1 K. iv. 21–23). [Comp. TAXES.] The total amount thus brought into the treasury in gold, exclusive of all payments in kind, amounted to 666 talents (1 K. x. 14).[c]

(5.) It was hardly possible, however, that any financial system could bear the strain of the king's passion for magnificence. The cost of the Temple was, it is true, provided for by David's savings and the offerings of the people; but even while that was building, yet more when it was finished, one structure followed on another with ruinous rapidity. A palace for himself, grander than that which Hiram had built for his father, another for Pharaoh's daughter, the house of the forest of Lebanon, in which he sat in his court of judgment, the pillars all of cedar, seated on a throne of ivory and gold, in which six lions on either side, the symbols of the tribe of Judah, appeared (as in the thrones of Assyria, Layard's *Nineveh*, ii. 30) standing on the steps and supporting the arms of the chair (1 K. vii. 1-12, x. 18–20), ivory palaces and ivory towers, used apparently for the king's armory (Ps. xlv. 8; Cant. iv. 4, vii. 4); the ascent from his own palace to the house or palace of Jehovah (1 K. x. 5), a summer palace in Lebanon (1 K. ix. 19; Cant. vii. 4), stately gardens at Etham, *paradises* like those of the great eastern kings (Eccl. ii. 5. 6; Joseph. *Ant.* viii. 7, § 3; comp. PARADISE), the foundation of something like a stately school or college,[d] costly aqueducts bringing water, it may be, from the well of Bethlehem, dear to David's heart, to supply the king's palace in Jerusalem (Ewald, iii. 323), the fortifications of Jerusalem completed, those of other cities begun (1 K. ix. 15–19), and, above all, the harêm, with all the expenditure which it involved on slaves and slave-dealers, on concubines and eunuchs (1 Sam. viii. 15; 1 Chr. xxviii. 1), on men-singers and women-singers (Eccl. ii. 8) — these rose before the wondering eyes of his people and dazzled them with their magnificence. All the equipment of his court, the "apparel" of his servants, was on the same scale. If he went from his hall of judgment to the Temple he marched between two lines of soldiers, each with a burnished shield of gold (1 K. x. 16, 17; Ewald, iii. 320). If he went on a royal progress to his paradise at Etham, he went in snow-white raiment, riding in a stately chariot of cedar, decked with silver and gold and purple, carpeted with the costliest tapestry, worked by the daughters of Jerusalem (Cant. iii. 9, 10). A body-guard attended him, "threescore valiant men," tallest and handsomest of the sons of Israel, in the freshness of their youth, arrayed in Tyrian purple, their long black hair sprinkled freshly every day with gold-dust (*ib.* iii. 7, 8; Joseph. *Ant.* viii. 7, § 3). Forty thousand stalls of horses for his chariots, and twelve

[a] A reminiscence of this form of splendor is seen in the fact that the mediæval goldsmiths described their earliest plate as "œuvre de Salomon." It was wrought in high relief, was eastern in its origin, and was known also as Saracenic (*Liber Custumarius*, i. 61, 759).

[b] We labor, however, under a twofold uncertainty, (1) as to the accuracy of the numbers, (2) as to the value of the terms. Prideaux, followed by Lewis, estimates the amount at £883,000,000, yet the savings of the later years of David's life, for one special purpose, could hardly have surpassed the national debt of England (comp. Milman's *Hist. of Jews*, i. 267).

[c] 666. There is something startling in thus finding in a simple historical statement a number which has since become invested with such a mysterious and terrible significance (Rev. xiii. 18). The coincidence can hardly, it is believed, be looked on as casual. "The Seer of the Apocalypse," it has been well said, "lives entirely in Holy Scripture. On this territory, therefore, is the solution of the sacred riddle to be sought" (Hengstenberg, *Comm. in Rev.* in loc.). If, therefore, we find the number occurring in the O. T., with any special significance, we may well think that that furnishes the starting-point of the enigma. And there is such a significance here. (1.) As the glory and the wisdom of Solomon were the representatives of all earthly wisdom and glory, so the wealth of Solomon would be the representative of all earthly wealth. (2.) The purpose of the visions of St. John is to oppose the heavenly to the earthly Jerusalem; the true "offspring of David," "the lion of the tribe of Judah," to all counterfeits; the true riches to the false. (3.) The worship of the beast is the worship of the world's mammon. It may seem to reproduce the glory and the wealth of the old Jerusalem in its golden days, but it is of evil, not of God; a Babylon, not a Jerusalem. (4.) This reference does not of course exclude either the mystical meaning of the number six, so well brought out by Hengstenberg (*l. c.*) and Mr. Maurice (on the *Apocalypse*, p. 251), or even names like Lateinos and Nero Cæsar. The greater the variety of thoughts that could be connected with a single number, the more would it commend itself to one at all familiar with the method of the *Gematria* of the Jewish cabbalists.

[d] Pineda's conjecture (iii. 28) that "the house with seven pillars," "the highest places of the city," of Prov. ix. 1–3, had originally a local reference is, at least, plausible enough to be worth mentioning. It is curious to think that there may have been a historical "Solomon's house," like that of the *New Atlantis*

Digitized by Google

thousand horsemen made up the measure of his magnificence (1 K. iv. 26). If some of the public works had the plea of utility, the fortification of some cities for purposes of defense — Millo (the suburb of Jerusalem), Hazor, Megiddo, the two Beth-horons, the foundation of others, Tadmor and Tiphsah, for purposes of commerce — these were simply the pomps of a selfish luxury, and the people, after the first dazzle was over, felt that they were so. As the treasury became empty, taxes multiplied and monopolies became more irksome. Even Israelites, besides the conscription which brought them into the king's armies (1 K. ix. 22), were subject, though for a part only of each year, to the *corvée* of compulsory labor (1 K. v. 13). The revolution that followed had, like most other revolutions, financial disorder as the chief among its causes. The people complained, not of the king's idolatry, but of their burdens, of his "grievous yoke" (1 K. xii. 4). Their hatred fell heaviest on Adoniram, who was over the tribute. If, on the one side, the division of the kingdom came as a penalty for Solomon's idolatrous apostasy from Jehovah, it was, on another, the Nemesis of a selfish passion for glory, itself the most terrible of all idolatries.

(6.) It remains for us to trace that other downfall, belonging more visibly, though not more really, to his religious life, from the loftiest height even to the lowest depth. The building and dedication of the Temple are obviously the representatives of the first. That was the special task which he inherited from his father, and to that he gave himself with all his heart and strength. He came to it with all the noble thoughts as to the meaning and grounds of worship which his father and Nathan could instill into him. We have already seen, in speaking of his intercourse with Tyre, what measures he took for its completion. All that can be said as to its architecture, proportions, materials [TEMPLE], and the organization of the ministering PRIESTS and LEVITES, will be found elsewhere. Here it will be enough to picture to ourselves the feelings of the men of Judah as they watched, during seven long years, the Cyclopean foundations of vast stones (still remaining when all else has perished, Ewald, iii. 297) gradually rising up and covering the area of the threshing-floor of Araunah, materials arriving continually from Joppa, cedar, and gold and silver, brass "without weight" from the foundries of Succoth and Zarethan, stones ready hewn and squared from the quarries. Far from colossal in its size, it was conspicuous chiefly by the lavish use, within and without, of the gold of Ophir and Parvaim. It glittered in the morning sun (it has been well said) like the sanctuary of an El Dorado (Milman, *Hist. of Jews*, i. 259). Throughout the whole work the tranquillity of the kingly city was unbroken by the sound of the workman's hammer:

"Like some tall palm, the noiseless fabric grew."

(7.) We cannot ignore the fact that even now there were some darker shades in the picture. Not reverence only for the Holy City, but the wish to shut out from sight the misery he had caused, to close his ears against cries which were rising daily to the ears of the Lord of Sabaoth, led him probably to place the works connected with the Temple at as great a distance as possible from the Temple itself. Forgetful of the lessons taught by the history of his own people, and of the precepts of the Law (Ex. xxii. 21, xxiii. 9, *et al.*), following the example of David's policy in its least noble aspect (1 Chr. xxii. 2), he reduced the "strangers" in the land, the remnant of the Canaanite races who had chosen the alternative of conformity to the religion of their conquerors, to the state of helots, and made their life "bitter with all hard bondage." [a] [PROSELYTES.] Copying the Pharaohs in their magnificence, he copied them also in their disregard of human suffering. Acting, probably, under the same counsels as had prompted that measure, on the result of David's census, he seized on these "strangers" for the weary, servile toil against which the free spirit of Israel would have rebelled. One hundred and fifty-three thousand, with wives and children in proportion, were torn from their homes and sent off to the quarries and the forests of Lebanon (1 K. v. 15; 2 Chr. ii. 17, 18). Even the Israelites, though not reduced permanently to the helot state (2 Chr. viii. 9), were yet summoned to take their share, by rotation, in the same labor (1 K. v. 13, 14). One trace of the special servitude of "these hewers of stone" existed long afterwards in the existence of a body of men attached to the Temple, and known as SOLOMON'S SERVANTS.

(8.) After seven years and a half the work was completed, and the day came to which all Israelites looked back as the culminating glory of their nation. Their worship was now established on a scale as stately as that of other nations, while it yet retained its freedom from all worship that could possibly become idolatrous. Instead of two rival sanctuaries, as before, there was to be one only. The ark from Zion, the Tabernacle from Gibeon, were both removed (2 Chr. v. 5) and brought to the new Temple. The choirs of the priests and Levites met in their fullest force, arrayed in white linen. Then, it may be for the first time, was heard the noble hymn, "Lift up your heads, O ye gates, and be ye lift up, ye everlasting doors, and the King of Glory shall come in" (Milman, *Hist. of Jews*, i. 263). The trumpeters and singers were "as one" in their mighty Hallelujah — "O praise the Lord, for He is good, for His mercy endureth for ever" (2 Chr. v. 13). The ark was solemnly placed in its golden sanctuary, and then "the cloud," the "glory of the Lord," filled the house of the Lord. The two tables of stone, associated with the first rude beginnings of the life of the wilderness, were still, they and they only, in the ark which had now so magnificent a shrine (2 Chr. v. 10). They bore their witness to the great laws of duty toward God and man, remaining unchangeable through all the changes and chances of national or individual life, from the beginning to the end of the growth of a national religion. And throughout the whole scene, the person of the king is the one central object, compared with whom even priests and prophets are for the time subordinate. Abstaining, doubtless, from distinctively priestly acts, such as slaying the victims and offering incense, he yet appears, even more than David did in the bringing up the ark, in a liturgical character. He, and not Zadok, blesses

[a] Ewald's apology for these acts of despotism (iii. 292) presents a singular contrast to the free spirit which, for the most part, pervades his work. Throughout his history of David and Solomon, his sympathy for the father's heroism, his admiration for the son's magnificence, seem to keep his judgment under a fascination which it is difficult for his readers to escape from.

Digitized by Google

the congregation, offers up the solemn prayer, dedicates the Temple. He, and not any member of the prophetic order, is then, and probably at other times, the spokesman and "preacher" of the people (Ewald, iii. 320). He takes at least some steps towards that far-off (Ps. cx. 1) ideal of "a priest after the order of Melchizedek," which one of his descendants rashly sought to fulfill [UZZIAH], but which was to be fulfilled only in a Son of David, not the crowned leader of a mighty nation, but despised, rejected, crucified. From him came the lofty prayer, the noblest utterance of the creed of Israel, setting forth the distance and the nearness of the Eternal God, One, Incomprehensible, dwelling not in temples made with hands, yet ruling men, hearing their prayers, giving them all good things, wisdom, peace, righteousness.[a]

(9.) The solemn day was followed by a week of festival, synchronizing with the Feast of Tabernacles, the time of the completed vintage. Representatives of all the tribes, elders, fathers, captains, proselytes, it may be, from the newly-acquired territories in Northern Syria (2 Chr. vi. 32, vii. 8), — all were assembled, rejoicing in the actual glory and the bright hopes of Israel. For the king himself then, or at a later period (the narrative of 1 K. ix. and 2 Chr. vii. leaves it doubtful), there was a strange contrast to the glory of that day. A criticism, misled by its own acuteness, may see in that warning prophecy of sin, punishment, desolation, only a *vaticinium ex eventu*, added some centuries afterwards (Ewald, iii. 404). It is open to us to maintain that, with a character such as Solomon's, with a religious ideal so far beyond his actual life, such thoughts were psychologically probable, that strange misgivings, suggested by the very words of the jubilant hymns of the day's solemnity, might well mingle with the shouts of the people and the Hallelujahs of the Levites.[b] It is in harmony with all we know of the work of the Divine Teacher, that those misgivings should receive an interpretation, that the king should be taught that what he had done was indeed right and good, but that it was not all, and might not be permanent. Obedience was better than sacrifice. There was a danger near at hand.

(10.) The danger came, and in spite of the warning the king fell. Before long the priests and prophets had to grieve over rival temples to Moloch, Chemosh, Ashtaroth, forms of ritual not idolatrous only, but cruel, dark, impure. This evil came, as the compiler of 1 K. xi. 1–8 records, as the penalty of another. Partly from policy, seeking fresh alliances, partly from the terrible satiety of lust seeking the stimulus of change, he gave himself to "strange women." He found himself involved in a fascination which led to the worship of strange gods. The starting-point and the goal are given us. We are left, from what we know otherwise, to trace the process. Something there was perhaps in his very "largeness of heart," so far in advance of the traditional knowledge of his age, rising to higher and wider thoughts of God, which predisposed him to it. His converse with men of other creeds and climes might lead him to anticipate, in this respect, one phase of modern thought, as the confessions of the Preacher in Koheleth anticipate another. In recognizing what was true in other forms of faith, he might lose his horror at what was false, his sense of the preëminence of the truth revealed to him, of the historical continuity of the nation's religious life. His worship might go backward from Jehovah to Elohim,[c] from Elohim to the "Gods many and Lords many" of the nations round. Jehovah, Baal, Ashtaroth, Chemosh, each form of nature-worship, might come to seem equally true, equally acceptable. The women whom he brought from other countries might well be allowed the luxury of their own superstitions. And, if permitted at all, the worship must be worthy of his fame and be part of his magnificence. With this there may, as Ewald suggests (iii. 380),[d] have mingled political motives. He may have hoped, by a policy of toleration, to conciliate neighboring princes, to attract a larger traffic. But probably also there was another influence less commonly taken into account. The wide-spread belief of the East in the magic arts of Solomon is not, it is believed, without its foundation of truth. On the one hand, an ardent study of nature, in the period that precedes science, runs on inevitably into the pursuit of occult, mysterious properties. On the other, throughout the whole history of Judah, the element of idolatry which has the strongest hold on men's minds was the thaumaturgic, soothsaying, incantations, divinations (2 K. i. 2; Is. ii. 6; 2 Chr. xxxiii. 6, *et al.*). The religion of Israel opposed a stern prohibition to all such perilous yet tempting arts (Deut. xviii. 10, *et al.*). The religions of the nations round fostered them. Was it strange that one who found his progress impeded in one path should turn into the other? So, at any rate it was. The reign which began so gloriously was a step backwards into the gross darkness of fetish worship. As he left behind him the legacy of luxury, selfishness, oppression, more than counterbalancing all the good of higher art and wider knowledge, so he left this too as an ineradicable evil. Not less truly than the son of Nebat might his name have been written in history as Solomon the son of David who "made Israel to sin."

(11.) Disasters followed before long as the natural consequence of what was politically a blunder as well as religiously a sin. The strength of the nation rested on its unity, and its unity depended on its faith. Whatever attractions the sensuous ritual which he introduced may have had for the great body of the people, the priests and Levites must have looked on the rival worship with entire disfavor. The zeal of the prophetic order, dormant in the earlier part of the reign, and as it were, hindered from its usual utterances by the more dazzling wisdom of the king, was now kindled into active opposition. Ahijah of Shiloh, as if taught by the history of his native place, was sent to utter

---

[a] Ewald, yielding to his one special weakness, sees in this prayer the rhetorical addition of the Deuteronomist editor (iii. 315).

[b] Ps. cxxxii. belongs manifestly (comp. vv. 7, 8, 10, 18, with 2 Chr. vi. 41) to the day of dedication: and v. 12 contains the condition, of which the vision of the night presents the dark as the day had presented the bright side.

[c] It is noticeable that Elohim, and not Jehovah, is the Divine name used throughout Ecclesiastes.

[d] To see, however, as Ewald does, in Solomon's policy nothing but a wise toleration like that of a modern statesman in regard to Christian sects, or of the English Government in India, is surely to read history through a refracting and distorting medium.

Digitized by Google

one of those predictions which help to work out their own fulfillment, fastening on thoughts before vague, pointing Jeroboam out to himself and to the people as the destined heir to the larger half of the kingdom, as truly called as David had been called, to be the anointed of the Lord (1 K. xi. 28–39). The king in vain tried to check the current that was setting strong against him. If Jeroboam was driven for a time into exile it was only, as we have seen, to be united in marriage to the then reigning dynasty, and to come back with a daughter of the Pharaohs as his queen (LXX. *ut supra*). The old tribal jealousies gave signs of renewed vitality. Ephraim was prepared once more to dispute the supremacy of Judah, needing special control (1 K. xi. 28). And with this weakness within there came attacks from without. Hadad and Rezon, the one in Edom, the other in Syria, who had been foiled in the beginning of his reign, now found no effectual resistance. The king, prematurely old,[a] must have foreseen the rapid breaking up of the great monarchy to which he had succeeded. Rehoboam, inheriting his faults without his wisdom, haughty and indiscreet, was not likely to avert it.

(12.) Of the inner changes of mind and heart which ran parallel with this history, Scripture is comparatively silent. Something may be learned from the books that bear his name, which, whether written by him or not, stand in the Canon of the O. T. as representing, with profound, inspired insight, the successive phases of his life; something also from the fact that so little remains out of so much, out of the songs, proverbs, treatises of which the historian speaks (1 K. iv. 32, 33). Legendary as may be the traditions which speak of Hezekiah as at one and the same time, preserving some portions of Solomon's writings (Prov. xxv. 1), and destroying others,[b] a like process of selection must have been gone through by the unknown Rabbis of the GREAT SYNAGOGUE after the return from the exile. Slowly and hesitatingly they received into the Canon, as they went on with their unparalleled work of the expurgation by a people of its own literature, the two books which have been the stumbling-blocks of commentators, Ecclesiastes and the Song of Songs[c] (Ginsburg, *Koheleth*, pp. 13–15) They give *excerpta* only from the 3,000 Proverbs. Of the thousand and five Songs (the precise number indicates a known collection) we know absolutely nothing. They were willing, *i. e.*, to admit Koheleth for the sake of its ethical conclusion; the Song of Songs, because at a very early period, possibly even then, it had received a mystical interpretation (Keil, *Einleit. in das Alt. Test.* § 127), because it was, at any rate, the history of a love which if passionate, was also tender, and pure, and true.[d] But it is easy to see that there are elements in that poem, the strong delight in visible outward beauty, the surrender of heart and will to one overpowering impulse, which might come to be divorced from truth and purity, and would then be perilous in proportion to their grace and charm. Such a divorce took place we know in the actual life of Solomon. It could not fail to leave its stamp upon the idyls in which feeling and fancy uttered themselves. The poems of the Son of David may have been like those of Hafiz. The Scribes who compiled the Canon of the O. T. may have acted wisely, rightly, charitably to his fame, in excluding them.

(13.) The books that remain meet us, as has been said, as, at any rate, representing the three stages of his life. The Song of Songs brings before us the brightness of his youth, the heart as yet untainted, human love passionate yet undefiled,[e] and therefore becoming, under a higher inspiration, half-consciously it may be to itself, but, if not, then unconsciously for others, the parable of the soul's affections.[f] [CANTICLES.] Then comes in the book of Proverbs, the stage of practical, prudential thought, searching into the recesses of man's heart, seeing duty in little things as well as great, resting all duty on the fear of God, gathering from the wide lessons of a king's experience, lessons which mankind could ill afford to lose.[g] The poet has

---

[a] Solomon's age at his death could not have been much more than fifty-nine or sixty, yet it was not till he was "old" that his wives perverted him (1 K. xi. 4).

[b] Hezekiah found, it was said, formulæ for the cure of diseases engraved on the door-posts of the Temple, and destroyed them because they drew men away from the worship of Jehovah (Suidas, *s. v.* Ἐζεκίας). Strange as the history is, it has a counterpart in the complaint of the writer of 2 Chr. xvi. 12, that Asa "sought not to the Lord but to the physicians." Was there a rivalry in the treatment of disease between the priests and prophets on the one side (comp. Is. xxxviii. 21), and idolatrous thaumaturgists on the other (comp. also 2 K. i. 2)?

[c] The Song of Songs, however, was never read publicly, either in the Jewish or the Christian Church, nor in the former were young men allowed to read it at all (Theod. Cyr. *Præf. in Cant. Cant.*; Theod. Mops. p. 699 in *Migne*).

[d] We rest on this as the necessary condition of all deeper interpretation. To argue, as many have done, that the mystical sense must be the only one because the literal would be insupportable, is simply to "bring a clean thing out of an unclean," to assert that the Divine Spirit would choose a love that was lustful and impure as the fitting parable of the holiest. Much rather may we say with Herder (*Geist der Ebr. Poes.*, Stal. vi.), that the poem, in its literal sense, is one which "might have been written in Paradise." The man and the woman are, as in their primeval innocence, loving and beloved, thinking no evil, "naked and not ashamed."

[e] We adopt the older view of Lowth (*Præl.* xxx., xxxi.) and others, rather than that of Renan and Ewald, which almost brings down a noble poem to the level of an operatic ballet at a Parisian theatre. Theodore of Mopsuestia (*l. c.*) had, at least, placed it on a level with the *Symposium* of Plato. The theory of Michaelis (*Not. in Lowth*, xxxi.) that it represents a young husband and his favorite bride hindered, by harem jealousies or regulations, from free intercourse with each other, seems to us preferable, and connects itself with the identification of the Shulamite with Abishag, already noticed.

[f] "The final cause of Canticles," it has been well said, "was that it might be a field in which mysticism could disport itself" (Bishop Jebb, *Correspond. with Knox*, i. 306). The traces of the "great mystery" which thus connects divine and human love, are indeed to be found everywhere, in the Targums of Rabbis, in the writings of Fathers, Schoolmen, Puritans, in the poems of Mystics like Novalis, Jelaleddin Rumi, Saadi (comp. Tholuck, *Morgenländ. Mystik*, pp. 55 227). It appears in its highest form in the *Vita Nuova* of Dante, purified by Christian feeling from the sensuous element which in eastern writers too readily mingles with it. Of all strange assertions, that of Renan, that mysticism of this kind is foreign to the Shemitic character, is perhaps about the strangest (*Cant. des Cant.* p. 119).

[g] Both in Ecclesiastes (ii. 3–12) and yet more in

Digitized by Google

become the philosopher, the mystic has passed into the moralist. But the *man* passed through both stages without being permanently the better for either. They were to him but phases of his life which he had known and exhausted (Eccl. i., ii.). And therefore there came, as in the Confessions of the Preacher, the great retribution. The "sense that wore with time" avenged "the crime of sense." There fell on him, as on other crowned voluptuaries,[a] the weariness which sees written on all things, Vanity of Vanities. Slowly only could he recover from that "vexation of spirit," and the recovery was incomplete. It was not as the strong burst of penitence that brought to his father David the assurance of forgiveness. He could not rise to the height from which he had fallen, or restore the freshness of his first love. The weary soul could only lay again, with slow and painful relapses, the foundations of a true morality [comp. ECCLESIASTES].

(14.) Here our survey must end. We may not enter into the things within the vail, or answer either way the doubting question, Is there any hope? Others have not shrunk from debating that question, deciding, according to their formulæ, that he did or did not fulfill the conditions of salvation so as to satisfy them, were they to be placed upon the judgment-seat. It would not be profitable to give references to the patristic and other writers who have dealt with this subject. They have been elaborately collected by Calmet (*Dictionn.* s. v. *Salomon*, *Nouveau Dissert. De la salut de Sal.*). It is noticeable and characteristic that Chrysostom and the theologians of the Greek Church are, for the most part, favorable, Augustine and those of the Latin, for the most part, adverse to his chances of salvation.[b]

VII. *Legends.* — (1.) The impression made by Solomon on the minds of later generations, is shown in its best form by the desire to claim the sanction of his name for even the noblest thoughts of other writers. Possibly in ECCLESIASTES, certainly in the *Book of Wisdom*, we have instances of this, free from the vicious element of an apocryphal literature. Before long, however, it took other forms. Round the facts of the history, as a nucleus, there gathers a whole world of fantastic fables, Jewish, Christian, Mohammedan, refractions, colored and distorted, according to the media through which they pass, of a colossal form. Even in the Targum of Ecclesiastes we find strange stories of his character. He and the Rabbis of the Sanhedrim sat and drank wine together in Jabne. His *paradise* was filled with costly trees which the evil spirits brought him from India. The casuistry of the Rabbis rested on his *dicta*. Ashmedai, the king of the demons, deprived him of his magic ring, and he wandered through the cities of Israel, weeping and saying, I, the preacher, was king over Israel in Jerusalem (Ginsburg, *Koheleth*, App. i. H.; Koran, *Sur.* 38). He left behind him spells and charms to cure diseases and cast out evil spirits; and for centuries, incantations bearing his name were the special boast of all the "vagabond Jew exorcists" who swarmed in the cities of the empire (Jos. *Ant.* viii. 2, § 5; Just. Mart. *Respons. ad Orthod.* p. 55; Origen, *Comm. in Matt.* xxvi. 3). His wisdom enabled him to interpret the speech of beasts and birds, a gift shared afterwards, it was said, by his descendant Hillel (Ewald, iii. 407; Koran, *Sur.* 37). He knew the secret virtues of gems and herbs[c] (Fabricius, *Codex Pseudep. V. T.* 1042). He was the inventor of Syriac and Arabian alphabets (*ibid.* 1014).

(2.) Arabic imagination took a yet wilder flight. After a long struggle with the rebellious Afreets and Jinns, Solomon conquered them and cast them into the sea (Lane, *Arabian Nights*, i. 36). The remote pre-Adamite past was peopled with a succession of forty Solomons, ruling over different races, each with a shield and sword that gave them sovereignty over the *Jinns*. To Solomon himself belonged the magic ring which revealed to him the past, the present, and the future. Because he stayed his march at the hour of prayer instead of riding on with his horsemen God gave him the winds as a chariot, and the birds flew over him, making a perpetual canopy. The demons in their spite wrote books of magic in his name, but he, being ware of it, seized them and placed them under his throne, where they remained till his death, and then the demons again got hold of them and scattered them abroad (D'Herbelot, *s. v.* "Soliman ben Daoud;" Koran, *Sur.* 21). The visit of the Queen of Sheba furnished some three or four romances. The Koran (*Sur.* 27) narrates her visit, her wonder, her conversion to the Islam, which Solomon professed. She appears under three different names, Nicaule (Calmet, *Dict.* s. v.), Balkis (D'Herbelot, *s. v.*), Makeda (Pineda, v. 14). The Arabs claim her as belonging to Yemen, the Ethiopians as coming from Meroë. In each form of the story a son is born to her, which calls Solomon its father, in the Arab version Meilekh, in the Ethiopian David, after his grandfather, the ancestor of a long line of Ethiopian kings (Ludolf, *Hist. Æthiop.* ii. 3, 4, 5). Twelve thousand Hebrews accompanied her on her return home, and from them were descended the Jews of Ethiopia, and the great Prester John (Presbyter Joannes) of mediæval travellers (D'Herbelot, *l. c.*; Pineda, *l. c.* Corylus, *Diss. de regina Austr.* in Menthen's *Thesaurus*, i.). She brought to Solomon the self-same gifts which the Magi afterwards brought to Christ. [MAGI.] One at least of the hard questions with which she came was rescued from oblivion. Fair boys and sturdy girls were dressed up by her exactly alike so that no eye could distin-

---

Proverbs (i. 11-17, vii. 6-23) we may find traces of experiences gained in other ways. The graphic picture of the life of the robbers and the prostitutes of an eastern city could hardly have been drawn but by one who, like Haroun Alrashid and other oriental kings, at times laid aside the trappings of royalty, and plunged into the other extreme of social life, that so he might gain the excitement of a fresh sensation.

[a] "A taste for pleasure is extinguished in the king's heart (Louis XIV.). Age and devotion have taught him to make serious reflections on the vanity of everything he was formerly fond of" (Mme de Maintenon's *Letters*, p. 206).

[b] How deeply this question entered into the hearts of mediæval thinkers, and in what way the noblest of them all decided it, we read in the *Divina Commedia*: —

> "La quinta luce ch'è tra noi più bella
> Spira di tal amor, che tutto il mondo
> Laggiù ne gola di saper novella."
>
> *Paradiso*, x. 109.

The "spira di tal amor" refers, of course, to the Song of Solomon.

[c] The name of a well-known plant, Solomon's seal (*Convallaria Majalis*), perpetuates the old belief

Digitized by Google

guish them. The king placed water before them and bade them wash, and then when the boys scrubbed their faces and the girls stroked them softly, he made out which were which (Glycas, *Annal.* in Fabricius, *l. c.*). Versions of these and other legends are to be found also in Weil, *Bibl. Legends*, p. 171; Fürst, *Perlenschnüre*, c. 36.

(3.) The fame of Solomon spread northward and eastward to Persia. At Shiraz they showed the *Meder-Suleiman*, or tomb of Bath-sheba, said that Persepolis had been built by the *Jinns* at his command, and pointed to the Takht-i-Suleiman (Solomon's throne) in proof. Through their spells too he made his wonderful journey, breakfasting at Persepolis, dining at Baal-bec, supping at Jerusalem (Chardin, iii. 135, 143; Ouseley, ii. 41, 437). Persian literature, while it had no single life of David, boasted of countless histories of Solomon, one, the Suleiman-Nameh, in eighty books, ascribed to the poet Firdousi (D'Herbelot, *l. c.*; Chardin, iii. 198). In popular belief he was confounded with the great Persian hero, Djemschid (Ouseley, ii. 64).

(4.) As might be expected, the legends appeared in their coarsest and basest form in Europe, losing all their poetry, the mere appendages of the most detestable of Apocrypha, Books of Magic, a Hygromanteia, a Contradictio Salomonis (whatever that may be) condemned by Gelasius, Incantationes, Clavicula, and the like.[a] One pseudonymous work has a somewhat higher character, the *Psalterium Salomonis*, altogether without merit, a mere *cento* from the Psalms of David, but not otherwise offensive (Fabricius, i. 917; Tregelles, *Introd. to N. T.* p. 154), and therefore attached sometimes, as in the great Alexandrian Codex, to the sacred volume. One strange story meets us from the omnivorous Note-book of Bede. Solomon did repent, and in his contrition he offered himself to the Sanhedrim, doing penance, and they scourged him five times with rods, and then he travelled in sackcloth through the cities of Israel, saying as he went. Give alms to Solomon (Bede, *de Salom.* ap. Pineda).

VIII. *New Testament.* — We pass from this wild farrago of Jewish and other fables, to that which presents the most entire contrast to them. The teaching of the N. T. adds nothing to the materials for a life of Solomon. It enables us to take the truest measure of it. The teaching of the Son of Man passes sentence on all that kingly pomp. It declares that in the humblest work of God, in the lilies of the field, there is a grace and beauty inexhaustible, so that even "Solomon in all his glory was not arrayed like one of these" (Matt. vi. 29).[b] It presents to us the perfect pattern of a growth in wisdom, like, and yet unlike his, taking, in the eyes of men, a less varied range; but deeper, truer, purer, because united with purity, victory over temptation, self-sacrifice, the true large-heartedness of sympathy with all men. On the lowest view which serious thinkers have ever taken of the life of Jesus of Nazareth, they have owned that there was in Him one "greater than Solomon" (Matt. xii. 42). The historical Son of David, ideally a *type* of the Christ that was to come, was in his actual life, the most strangely contrasted It was reserved for the true, the later Son of David, to fulfill the prophetic yearnings which had gathered round the birth of the earlier. He was the true Shĕlômoh, the prince of peace, the true Jedidjah, the well-beloved of the Father. E. H. P.

* SOLOMON'S GARDENS. [GARDEN, vol. i. p. 868.]

SOLOMON'S PORCH. [PALACE.]

SOLOMON'S SERVANTS (CHILDREN OF). (בְּנֵי עַבְדֵי שְׁלֹמֹה: *vioὶ Ἀβδησελμά*, Ezr. ii. 58; *vioὶ δούλων Σαλομών*, Ezr. ii. 55; Neh. vii. 57, 60: *filii servorum Salomonis.*) The persons thus named appear in the lists of the exiles who returned from the Captivity. They occupy all but the lowest places in those lists, and their position indicates some connection with the services of the Temple. First come the priests, then Levites, then Nethinim, then "the children of Solomon's servants." In the Greek of 1 Esdr. v. 33, 35, the order is the same, but instead of Nethinim we meet with *ἱερόδουλοι*, "servants" or "ministers," of the Temple. In the absence of any definite statement as to their office we are left to conjecture and inference. (1.) The name as well as the order, implies inferiority even to the Nethinim. They are the descendants of the *slaves* of Solomon. The servitude of the Nethinim, "*given* to the Lord," was softened by the idea of dedication. [NETHINIM.] (2.) The starting-point of their history is to be found probably in 1 K. v. 13, 14, ix. 20, 21; 2 Chr. viii. 7, 8. Canaanites, who had been living till then with a certain measure of freedom, were reduced by Solomon to the helot state, and compelled to labor in the king's stone-quarries, and in building his palaces and cities. To some extent, indeed, the change had been effected under David, but it appears to have been then connected specially with the Temple, and the servitude under his successor was at once harder and more extended (1 Chr. xxii. 2). (3.) The last passage throws some light on their special office. The Nethinim, as in the case of the Gibeonites, were appointed to be hewers of *wood* (Josh. ix. 23), and this was enough for the services of the Tabernacle. For the construction and repairs of the Temple another kind of labor was required, and the new slaves were set to the work of hewing and squaring *stones* (1 K. v. 17, 18). Their descendants appear to have formed a distinct order, inheriting probably the same functions and the same skill. The prominence which the erection of a new Temple on their return from Babylon would give to their work, accounts for the special mention of them in the lists of Ezra and

[a] Two of these strange books have been reprinted in *fac simile* by Scheible (*Kloster*, v.). The *Clavicula Salomonis Necromantica* consists of incantations made up of Hebrew words; and the mightiest spell of the enchanter is the *Sigillum Salomonis*, engraved with Hebrew characters, such as might have been handed down through a long succession of Jewish exorcists. It is singular (unless this too was part of the imposture) that both the books profess to be published with the special license of Popes Julius II. and Alexander VI. Was this *the* form of Hebrew literature which they were willing to encourage?

[b] A pleasant Persian apologue teaching a like lesson deserves to be rescued from the mass of fables The king of Israel met one day the king of the ants took the insect on his hand, and held converse with it, asking, Cræsus-like, "Am not I the mightiest an most glorious of men?" "Not so," replied the ant king, "Thou sittest on a throne of gold, but I make thy hand my throne, and thus am greater than thou (Chardin, iii. 199

Nehemiah. Like the Nethinim, they were in the position of proselytes, outwardly conforming to the Jewish ritual, though belonging to the hated race, and, even in their names, bearing traces of their origin (Ezr. ii. 55–58). Like them, too, the great mass must either have perished, or given up their position, or remained at Babylon. The 392 of Ezr. ii. 55 (Nethinim included) must have been but a small fragment of the descendants of the 150,000 employed by Solomon (1 K. v. 15). E. H. P.

SOLOMON'S SONG. [CANTICLES.]

SOLOMON, WISDOM OF. [WISDOM, BOOK OF.]

SON.[a] The term "son" is used in Scripture language to imply almost any kind of descent or succession, as *ben shánáh*, "son of a year," *i. e.* a year old, *ben kesheth*, "son of a bow," *i. e.* an arrow. The word *bar* is often found in N. T. in composition, as Bar-timæus. [CHILDREN.]

H. W. P.

SON OF GOD (*viὸs θeoῦ*),[b] the Second Person of the ever-blessed Trinity, who is coequal, coeternal, and consubstantial with the Father; and who took the nature of man in the womb of the blessed Virgin Mary, and as Man bears the name of JESUS, or Saviour, and who proved Himself to be the MESSIAH or CHRIST, the Prophet, Priest, and King of all true Israelites, the seed of faithful Abraham, the universal Church of God.

The title SON OF GOD was gradually revealed to the world in this its full and highest significance. In the book of Genesis the term occurs in the plural number, "Sons of God," בְּנֵי הָאֱלֹהִים (Gen. vi. 2, 4), and there the appellation is applied to the potentates of the earth, and to those who were set in authority over others (according to the exposition in Cyril Alex. *Adv. Julian.* p. 296, and *Adv. Anthropomorph.* c. 17), or (as some have held) the sons of the family of Seth — those who had been most distinguished by piety and virtue. In Job i. 6, and ii. 1, this title, "Sons of God," is used as a designation of the Angels. In Psalm lxxxii. 6, "I have said, ye are gods; and ye are all sons of the Highest" (בְּנֵי עֶלְיוֹן), the title is explained by Theodoret and others to signify those persons whom God invests with a portion of his own dignity and authority as rulers of his people, and who have clearer revelations of his will, as our Lord intimates (John x. 35); and therefore the children of Israel, the favored people of God, are specially called collectively, by God, his *Son* (Ex. v. 22, 23; Hos. xi. 1).

But, in a still higher sense, that title is applied by God to his only Son, begotten by eternal generation (see Ps. ii. 7), as interpreted in the Epistle to the Hebrews (i. 5, v. 5); the word הַיּוֹם, "to-day," in that passage, being expressive of the act of God, with whom is no yesterday, nor to-morrow. "In æterno nec præteritum est, nec futurum, sed perpetuum hodie" (Luther). That text evidently refers to the Messiah, who is crowned and anointed as King by God (Ps. ii. 2, 6), although resisted by men, Ps. ii. 1, 3, compared with Acts iv. 25–27, where that text is applied by St. Peter to the crucifixion of Christ and his subsequent exaltation; and the same psalm is also referred to Christ by St. Paul, when preaching in the Jewish synagogue at Antioch in Pisidia (Acts xiii. 33); whence it may be inferred that the Jews might have learnt from their own Scriptures that the Messiah is in a special sense the Son of God; and this is allowed by Maimonides in *Porta Mosis*, ed. Pococke, pp. 160, 239. This truth might have been deduced by logical inference from the Old Testament, but in no passage of the Hebrew Scriptures is the Messiah clearly and explicitly designated by the title "Son of God." The words, "The form of the fourth is like the Son of God," are in the Chaldee portion of the book of Daniel (Dan. iii. 25), and were uttered by a heathen and idolatrous king, Nebuchadnezzar, and cannot therefore be understood as expressing a clear appreciation, on the part of the speaker, of the divinity of the Messiah, although we may readily agree that, like Caiaphas and Pilate, the king of Babylon, especially as he was perhaps in habits of intercourse with Daniel, may have delivered a true prophecy concerning Christ.

We are now brought to the question, whether the Jews, in our Lord's age, generally believed that the Messiah, or Christ, was also the Son of God in the highest sense of the term, namely, as a Divine Person, coequal, coeternal, and consubstantial with the Father?

That the Jews entertained the opinion that the Messiah would be the Son of God, in the *subordinate* senses of the term already specified (namely, as a holy person, and as invested with great power by God), cannot be doubted; but the point at issue is, whether they supposed that the Messiah would be what the Universal Church believes Jesus Christ to be? Did they believe (as some learned persons suppose they did) that the terms Messiah and Son of God are "equivalent and inseparable"?

It cannot be denied that the Jews *ought* to have deduced the doctrine of the Messiah's divinity from their own Scriptures, especially from such texts as Psalm xlv. 6, 7, "Thy throne, *O God*, is for ever and ever; the sceptre of thy kingdom is a right sceptre. Thou lovest righteousness and hatest wickedness; therefore God, thy God, *anointed* Thee with the *oil of gladness* above thy fellows;" a text to which the author of the Epistle to the Hebrews appeals (Heb. i. 8); and the doctrine of the Messiah's Godhead might also have been inferred from such texts as Isaiah ix. 6, "Unto us a Child is born, unto us a Son is given . . . . and his name shall be called Wonderful, Counsellor, the *Mighty God*;" and vii. 14, "Behold a Virgin shall conceive and bear a Son, and shall call his name Immanuel" (with us, God); and from Jer. xxiii. 5, "Behold, the days come, saith the Lord, that I will raise unto *David* a righteous *Branch*, and a *King* shall reign and prosper . . . ; and this is the name

---

[a] 1. בֵּן: *vióς*: *filius*; from בָּנָה, "build" (see Jer. xxxiii. 7). [On the Biblical use of the word "son," see J. W. Gibbs in the *Quar. Christ. Spectator*, vi. 561 ff. — A.]

2. בָּחוּר, from בָּרַר, "pure": *τέκνον*: *dilectus* (Deut. xxxi. 2).

3. יֶלֶד: *παιδίον*: *puer*.

4. יְלִיד: *γέννημα*: *stirps*; *genus*.

5. בֵּן: *σπέρμα*: *posteri*.

6. מָכוֹן, like a son, *i. e.* a successor.

[b] The present article, in conjunction with that of SAVIOUR, forms the supplement to the life of our Lord. [See JESUS CHRIST, vol. ii. p. 1347.]

whereby He shall be called, the Lord (Jehovah) our Righteousness;" and from Micah v. 2, "Out of thee (Bethlehem Ephratah) shall He come forth unto me that is to be Ruler in Israel, whose goings forth have been from of old, from everlasting;" and from Zech. xi. 13, "And the Lord said unto me, Cast it unto the potter: a goodly price that I was prised at of them." [a]

But the question is not, whether the Jews *might not and ought not* to have inferred the Divine Sonship of the Messiah from their own Scriptures, but whether, for the most part, they really *did* deduce that doctrine from those Scriptures? They ought doubtless to have been prepared by those Scriptures for a *suffering* Messiah; but this we know was *not* the case, and the Cross of Christ was to them a stumbling-block (1 Cor. i. 23); and one of the strongest objections which they raised against the Christians was, that they worshipped a man who died a death which is declared to be an accursed one in the Law of Moses, which was delivered by God himself (Deut. xxi. 23).

May it not also be true, that the Jews of our Lord's age failed likewise of attaining to the true sense of their own Scriptures, in the opposite direction? May it not also be true, that they did not acknowledge the *Divine* Sonship of the Messiah, and that they were not prepared to admit the claims of one who asserted Himself to be the Christ, and also affirmed Himself to be the Son of God, coequal with the Father?

In looking at this question *à priori*, it must be remembered that the Hebrew Scriptures declare in the strongest and most explicit terms the Divine *Unity*. "Hear, O Israel, the Lord our God is *one* Lord" (Deut. vi. 4), this is the solemn declaration which the Jews recite daily, morning and evening (see Mishnah, *Berachoth*, chap. i.). They regarded themselves as set apart from all the nations of earth to be a witness of God's *unity*, and to protest against the polytheism of the rest of mankind. And having suffered severe chastisements in the Babylonish Captivity for their own idolatries, they shrunk — and still shrink — with fear and abhorrence, from everything that might seem in any degree to trench upon the doctrine of the unity of the Godhead.

To this consideration we must add, *à posteriori*, the external evidence derived from the testimony of ancient writers who lived near to our Lord's age.

Trypho, the learned Jew, who debated with Justin Martyr at Ephesus about A. D. 150, on the points of controversy between the Jews and Christians, expressly states, "that it seems to him not only paradoxical but silly (*μωρόν*), to say that the Messiah, or Christ, preëxisted from eternity as God, and that He condescended to be born as man, and" — Trypho explodes the notion — that Christ is "not man begotten of man" (Justin M. *Dialog. c. Tryphon.* § 48, vol. ii. p. 154, ed. Otto, Jen. 1842). Here is a distinct assertion on the part of the Jew that the Messiah is merely *man;* and here also is a denial of the Christian doctrine, that He is God, preëxisting from eternity, and took the nature of man. In the same Dialogue the Jewish interlocutor, Trypho, approves the tenets of the Ebionite heretics, who asserted that the Christ was a mere man (*ψιλὸς ἄνθρωπος*), and adds this remarkable declaration: "all we (Jews) expect that the Messiah will come as *a man from man* (i. e. from human parents), and that Elias will anoint Him when He is come" (*πάντες ἡμεῖς τὸν χριστὸν ἄνθρωπον ἐξ ἀνθρώπων προσδοκῶμεν γενήσεσθαι, καὶ τὸν Ἠλίαν χρίσαι αὐτὸν ἐλθόντα*, Trypho Judæus, ap. Justin M. *Dialog.* § 49, p. 156). And in § 54, St. Justin Martyr, speaking in the name of the Christian believers, combats that assertion, and affirms that the Hebrew prophecies themselves, to which he appeals, testify that the Messiah is *not* a man born of man, according to the ordinary manner of human generation, *ἄνθρωπος ἐξ ἀνθρώπων κατὰ τὸ κοινὸν τῶν ἀνθρώπων γεννηθείς*. And there is a remarkable passage in a subsequent portion of the same dialogue, where Justin says, "*If*, O Trypho, ye understood who He is that is sometimes called the Messenger of mighty counsel, and a Man by Ezekiel, and designated as the Son of Man by Daniel, and as a Child by Isaiah, and the Messiah and God by Daniel, and a Stone by many, and Wisdom by Solomon, and a Star by Moses, and the Day-spring by Zechariah, and who is represented as suffering, by Isaiah, and is called by him a Rod, and a Flower and Corner Stone, and the Son of God, you would not have spoken blasphemy against Him, who is already come, and who has been born, and has suffered, and has ascended into Heaven, and will come again" (Justin M. *c. Tryphon.* § 126, p. 409); and Justin affirms that he has proved, against the Jews, that "Christ, who is the Lord and God, and Son of God," appeared to their Fathers, the Patriarchs, in various forms, under the old dispensation (§ 128, p. 425). Compare the authorities in Dorner, *On the Person of Christ*, i. pp. 265–271, Engl. transl.

In the middle of the third century, Origen wrote his apologetic work in defense of Christianity against Celsus, the Epicurean, and in various places of that treatise he recites the allegations of the Jews against the Gospel. In one passage, when Celsus, speaking in the person of a Jew, had said that one of the Hebrew prophets had predicted that the Son of God would come to judge the righteous and to punish the wicked, Origen rejoins, that such a notion is most improperly ascribed to a *Jew;* inasmuch as the Jews did indeed look for a Messiah, but *not* as the Son of God. "No Jew," he says, would allow that any prophet ever said that a Son of God would come; but what the Jews do say, is, that the Christ of God will come; and they often dispute with us Christians as to this very question, for instance, concerning the Son of God, on the plea that no such Person exists or was ever foretold" (Origen, *Adv. Cels.* i. § 49, vol. i. p. 365, B.; see p. 38 and p. 79, ed. Spencer, and other places, *e. g.* pp. 22, 30, 51, 62, 71, 82, 110, 136).

In the 4th century Eusebius testified that the Jews of that age would *not* accept the title Son of God as applicable to the Messiah (Euseb. *Dem. Evang.* iv. 1), and in later days they charge Christians with impiety and blasphemy for designating Christ by that title (Leontius, *Conc. Nicen.* ii Act. iv.).

Lastly, a learned Jew, Oroblo, in the 17th century, in his conference with Limborch, affirms that if a prophet, or even, if it were possible, the Messiah

[a] On these passages and on the general subject, see, on the one hand, Hengstenberg's *Christology of the Old Test.;* on the other, three articles by Dr. G. R. Noyes in the *Christian Examiner* for Jan., Mar. and July, 1836.

Digitized by Google

himself, were to work miracles, and yet lay claim to *divinity*, he ought to be put to death by stoning, as one guilty of blasphemy (*Orobio* ap. Limborch, *Amica Collatio*, p. 295, ed. Goud. 1688).

Hence, therefore, on the whole, there seems to be sufficient reason for concluding (with Basnage, *Histoire des Juifs*, iv. c. 24), that although the Jews of our Lord's age might have inferred, and ought to have inferred, from their own Scriptures, that the Messiah, or Christ, would be a Divine Person, and the Son of God in the highest sense of the term; and although some among them, who were more enlightened than the rest, entertained that opinion: yet it was not the popular and generally received doctrine among the Jews that the Messiah would be other than a man, born of human parents, and not a Divine Being, and Son of God.

This conclusion reflects much light upon certain important questions of the Gospel History, and clears up several difficulties with regard to the evidences of Christianity.

1. It supplies an answer to the question, "Why was Jesus Christ put to death?" He was accused by the Jews before Pilate as guilty of sedition and rebellion against the power of Rome (Luke xxiii. 1–5; cf. John xix. 12); but it is hardly necessary to observe that this was a mere pretext, to which the Jews resorted for the sake of exasperating the Roman governor against Him, and even of compelling Pilate, against his will, to condemn Him, in order that he might not lay himself open to the charge of "not being Cæsar's friend" (John xix. 12); whereas, if our Lord had really announced an intention of emancipating the Jews from the Roman yoke, He would have procured for Himself the favor and support of the Jewish rulers and people.

Nor does it appear that Jesus Christ was put to death because He claimed to be the Christ. The Jews were at that time anxiously looking for the Messiah; the Pharisees asked the Baptist whether he was the Christ (John i. 20–25); "and all men mused in their hearts of John whether he were the Christ or not" (Luke iii. 15).

On this it may be observed, in passing, that the people well knew that John the Baptist was the son of Zacharias and Elizabeth; they knew him to be a *mere man*, born after the ordinary manner of human generation; and yet they all thought it probable that *he* might be the *Christ*.

This circumstance proves, that, according to their notions, the Christ was *not* to be a *Divine* Person; certainly not the Son of God, in the Christian sense of the term. The same conclusion may be deduced from the circumstance that the Jews of that age eagerly welcomed the appearance of those *false Christs* (Matt. xxiv. 24), who promised to deliver them from the Roman yoke, and whom they knew to be mere men, and who did not claim Divine origin, which they certainly would have done, if the Christ was generally expected to be the Son of God.

We see also that after the miraculous feeding, the people were desirous of "making Jesus a king" (John vi. 15); and after the raising of Lazarus at Bethany they met Him with enthusiastic acclamations, "Hosanna to the Son of David; blessed is He that cometh in the name of the Lord" (Matt. xxi. 9; Mark xi. 9; John xii. 13). And the eager and restless facility with which the Jews admitted the pretensions of almost every fanatical adventurer who professed to be the Messiah at that period, seems to show that they would have willingly allowed the claims of one who "wrought many miracles," as, even by the confession of the chief priests and Pharisees, Jesus of Nazareth did (John xi. 47), if He had been content with such a title as the Jews assigned to their expected Messiah, namely, that of a great Prophet, distinguished by mighty works.

We find that when our Lord put to the Pharisees this question, "What think ye of Christ, whose Son is He?" their answer was *not*, "He is the Son of God," *but* "He is the Son of David;" and they could not answer the second question which He next propounded to them, "How then doth David, speaking in the Spirit, call Him *Lord*?" The reason was, because the Pharisees did not expect the Messiah to be the Son of God; and when He, who is the Messiah, claimed to be God, they rejected his claim to be the Christ.

The reason, therefore, of his condemnation by the Jewish Sanhedrim, and of his delivery to Pilate for crucifixion, was not that He claimed to be the Messiah or Christ, but because He asserted Himself to be *much more* than that: in a word, because He claimed to be the *Son of God*, and to be *God*.

This is further evident from the words of the Jews to Pilate, "We have a law, and by our law He ought to die, because He made Himself the Son of God" (John xix. 7); and from the previous resolution of the Jewish Sanhedrim, "Then said they all, Art thou then the Son of God? And He said unto them, Ye say that I am. And they said, What need we any further witness? for we ourselves have heard of his own mouth. And the whole multitude of them arose and led Him unto Pilate" (Luke xxii. 70, 71, xxiii. 1).

In St. Matthew's Gospel the question of the high-priest is as follows: "I adjure thee by the living God, that thou tell us whether thou be the Christ, the Son of God" (Matt. xxvi. 63). This question does not intimate that in the opinion of the high-priest the Christ was the Son of God, but it shows that Jesus claimed both titles, and in claiming them for Himself asserted that the Christ was the Son of God; but that this was not the popular opinion, is evident from the considerations above stated, and also from his words to St. Peter when the Apostle confessed Him to be the "Christ, the Son of the living God" (Matt. xvi. 16); He declared that Peter had received this truth, not from human testimony, but by extraordinary revelation: "Blessed art thou, Simon Bar-jona: for flesh and blood hath not revealed it unto thee, but my Father which is in heaven" (Matt. xvi. 17).

It was the claim which He put forth to be the Christ *and* Son of God, that led to our Lord's condemnation by the unanimous verdict of the Sanhedrim: "They all condemned Him to be guilty of death" (Mark xiv. 64; Matt. xxvi. 63–66); and the sense in which He claimed to be Son of God is clear from the narrative of John v. 18. The Jews sought the more to kill Him because He not only had broken the Sabbath, but said also that God was his own Father (πατέρα ἴδιον ἔλεγε τὸν θεόν), making Himself "equal unto God;" and when He claimed Divine preëxistence, saying, "Before Abraham was (ἐγένετο), I am, then took they up stones to cast at Him" (John viii. 58, 59); and when He asserted his own unity with God, "I and the Father are *one*" — one *substance* (ἕν), not one *person*

Digitized by Google

(εἷς) — "then the Jews took up stones again to stone Him" (John x. 30, 31); and this is evident again from their own words, "For a good work we stone thee not, but for blasphemy; and because that thou, being a man, makest thyself God" (John x. 33).

Accordingly we find that, after the Ascension, the Apostles labored to bring the Jews to acknowledge that Jesus was not only the *Christ*, but was *also* a *Divine* Person, even the *Lord* Jehovah. Thus, for example, St. Peter, after the outpouring of the Holy Ghost on the Day of Pentecost by Christ, says, "*Therefore* let all the house of Israel know assuredly, that God hath made that same Jesus, whom ye have crucified, *both* LORD (Κύριον, JEHOVAH) *and Christ*" (Acts ii. 36).[a]

2. This conclusion supplies a convincing proof of Christ's Godhead. *If* He is not the Son of God, equal with God, then there is no other alternative but that He was guilty of blasphemy; for He claimed "God as his own Father, making Himself equal with God," and by doing so He proposed Himself as an object of Divine worship. And in that case He would have rightly been put to death; and the Jews in rejecting and killing Him would have been acting in obedience to the Law of God, which commanded them to put to death any prophet, however distinguished he might be by the working of miracles, if he were guilty of blasphemy (Deut. xiii. 1–11); and the crucifixion of Jesus would have been an act of pious zeal on their part for the honor of God, and would have commended them to his favor and protection, whereas we know that it was that act which filled the cup of their national guilt, and has made them outcasts from God to this day (Matt. xxiii. 32–38; Luke xiii. 33–35; 1 Thess. ii. 15, 16; James v. 6).

When they repent of this sin, and say, "Blessed (εὐλογημένος) is He that cometh in the name of the Lord," and acknowledge Jesus to be Christ and the Son of God, coequal with God, then Israel shall be saved (Rom. xi. 26).

3. This conclusion also explains the fact — which might otherwise have perplexed and staggered us — that the miracles which Jesus wrought, and which the Jews and their rulers acknowledged to have been wrought by Him, did not have their due influence upon them; those mighty and merciful works did not produce the effect upon them which they ought to have produced, and which those works would have produced, if the Jews and their rulers had been prepared, as they ought to have been, by an intelligent study of their own Scriptures, to regard their expected Messiah as the Son of God, coequal with God.

Not being so prepared, they applied to those miracles the test supplied by their own Law, which enjoined that, if a prophet arose among them, and wrought miracles, and endeavored to draw them away from the worship of the true God, those miracles were to be regarded as trials of their own steadfastness, and were not to be accepted as proofs of a Divine mission, "but the prophet himself was to be put to death" (Deut. xiii. 1–11). The Jews tried our Lord and his miracles by this law. Some of the Jews ventured to say that "Jesus *of* Nazareth was specially in the mind of the Divine Lawgiver when He framed that law" (see Fagius on the Chaldee Paraphrase of Deut. xiii., and his note on Deut. xviii. 15), and that it was provided expressly to meet his case. Indeed they do not hesitate to say that, in the words of the Law, "if thy brother, the *son of thy mother*, entice thee secretly" (Deut. xiii. 6), there was a prophetic reference to the case of Jesus, who "said that He had a human mother, but not a human father, but was the Son of God and was God" (see Fagius, *l. c.*).

Jesus claimed to be the Messiah; but, according to the popular view and preconceived notions of the Jews, the Messiah was to be merely a human personage, and would not claim to be God and to be entitled to Divine power. Therefore, though they admitted his miracles to be really wrought, yet they did not acknowledge the claim grounded on those miracles to be true, but rather regarded those miracles as trials of their loyalty to the One True God, whose prerogatives, they thought, were infringed and invaded by Him who wrought those miracles; and they even ascribed those miracles to the agency of the Prince of the Devils (Matt. xii. 24, 27; Mark iii. 22; Luke xi. 15), and said that He, who wrought those miracles, had a devil (John vii. 20, viii. 48), and they called Him Beelzebub (Matt. x. 25), because they thought that He was setting Himself in opposition to God.

4. "They *all* condemned Him to be guilty of death" (Mark xiv. 64). The Sanhedrim was unanimous in the sentence of condemnation. This is remarkable. We cannot suppose that there were not some conscientious persons in so numerous a body. Indeed, it may readily be allowed that many of the members of the Sanhedrim were actuated by an earnest zeal for the honor of God when they condemned Jesus to death, and that they did what they did with a view to God's glory, which they supposed to be disparaged by our Lord's pretensions; and that they were guided by a desire to comply with God's law, which required them to put to death every one who was guilty of blasphemy in arrogating to himself the power which belonged to God.

Hence we may explain our Lord's words on the cross, "Father, forgive them, for they *know not* what they do" (Luke xxiii. 34), "Father, they are not aware that He whom they are crucifying is thy Son:" and St. Peter said at Jerusalem to the Jews after the crucifixion, "Now, brethren, I wot that *through ignorance* ye did it (*i. e.* rejected and crucified Christ), as did also your rulers" (Acts iii. 17); and St. Paul declared in the Jewish synagogue at Antioch in Pisidia, "they that dwell at Jerusalem, and their rulers, because they knew Him not, nor yet the voices of the prophets, which are read every Sabbath-day, have fulfilled them in condemning Him" (Acts xiii. 27).

---

[a] * In ascribing to St. Peter the remarkable proposition that "God hath *made* Jesus JEHOVAH," the writer of this article appears to have overlooked the fact that κύριον ("Lord") in Acts ii. 36 refers to τῷ κυρίῳ μου ("my Lord") in ver. 34, quoted from Ps. cx. 1, where the Hebrew correspondent is not Jehovah but אֲדֹנָי, *Adôn*, the common word for "lord" or "master." St. Peter's meaning here may be illustrated by his language elsewhere; see Acts v. 31; 1 Pet. i. 21, iii. 22; and comp. Eph. i. 20–22, Phil. ii. 9–11. On the N. T. use of κύριος see Winer, *De sensu vocum κύριος et ὁ κύριος in Actis et Epp. Apost.*, Erlang. 1828; Prof. Stuart in the *Bibl. Repos.* for October, 1831, pp. 733–776, and Cremer's *Bibl.-theol. Wörterb. d. neutest. Gracitat* (1866), p. 340 f. A.

Hence it is evident that the predictions of Holy Scripture may be accomplished before the eyes of men, while they are unconscious of that fulfillment; and that the prophecies may be even accomplished by persons who have the prophecies in their hands, and do not know that they are fulfilling them. Hence also it is clear that men may be guilty of enormous sins when they are acting according to their consciences and with a view to God's glory, and while they hold the Bible in their hands and hear its voice sounding in their ears (Acts xiii. 27); and that it is therefore of unspeakable importance not only to hear the words of the Scriptures, but to mark, learn, and inwardly digest them, with humility, docility, earnestness, and prayer, in order to understand their *true meaning*.

Therefore the Christian student has great reason to thank God that He has given in the *New* Testament a divinely-inspired interpretation of the *Old* Testament, and also has sent the Holy Spirit to teach the Apostles all things (John xiv. 26), to abide forever with his Church (John xiv. 16), the body of Christ (Col. i. 24), which He has made to be the pillar and ground of truth (1 Tim. iii. 15), and on whose interpretations, embodied in the creeds generally received among Christians, we may safely rely, as declaring the *true sense* of the Bible.

If the Jews and their rulers had not been swayed by prejudice, but in a careful, candid, and humble spirit had considered the evidence before them, they would have known that their promised Messiah was to be the Son of God, coequal with God, and that He was revealed as such in their own Scriptures, and thus his miracles would have had their due effect upon their minds.

5. Those persons who now deny Christ to be the Son of God, coequal and coeternal with the Father, are followers of the Jews, who, on the plea of zeal for the divine *Unity*, rejected and crucified Jesus, who claimed to be God. Accordingly we find that the Ebionites, Cerinthians, Nazarenes, Photinians, and others who denied Christ's divinity, arose from the ranks of Judaism (cf. Waterland, *Works*, v. 240, ed. Oxf. 1823: on these heresies the writer of this article may perhaps be permitted to refer to his *Introduction* to the First Epistle of St. John, in his edition of the Greek Testament). It has been well remarked by the late Professor Blunt that the arguments by which the ancient Christian Apologists, such as Justin Martyr, Tertullian, and others, confuted the Jews, afford the strongest armor against the modern Socinians (see also the remark of St. Athanasius, *Orat.* ii. *adv. Arianos*, pp. 377–383, where he compares the Arians to the Jews).

The Jews sinned against the comparatively dim light of the *Old* Testament: they who have fallen into their error reject the evidence of both Testaments.

6. Lastly, the conclusion stated in this article supplies a strong argument for the Divine origin and truth of Christianity. The doctrine of Christ, *the Son of God* as well as *Son of Man*, reaches from the *highest pole of Divine glory to the lowest pole of human suffering*. No *human mind* could ever have *devised* such a scheme as that: and when it was presented to the mind of the Jews, the favored people of God, they could not reach to *either of* these *two poles;* they could not mount to the height of the Divine exaltation in Christ the *Son of God*, nor descend to the depth of human suffering in Christ the *Son of Man*. They invented the theory of *two* Messiahs, in order to escape from the imaginary contradiction between a suffering and triumphant Christ; and they rejected the doctrine of Christ's Godhead in order to cling to a defective and unscriptural Monotheism. They failed of grasping the true sense of their own Scriptures in both respects. But in the Gospel, Jesus Christ, Son of God and Son of Man, reaches from one pole to the other, and *filleth all in all* (Eph. i. 23). The Gospel of Christ ran counter to the Jewish zeal for Monotheism, and incurred the charge of Polytheism, by preaching Christ the Son of God, coequal with the Father; and also contravened and challenged all the complex and dominant systems of Gentile Polytheism, by proclaiming the Divine Unity. It boldly confronted the World, and it has conquered the World: because "the excellency of the power of the Gospel is not of man, but of God" (2 Cor. iv. 7).

The author of the above article may refer for further confirmation of his statements, to an excellent work by the Rev. W. Wilson, B. D., and Fellow of St. John's College, Cambridge, entitled *An Illustration of the Method of explaining the New Testament by the early Opinions of Jews and Christians concerning Christ*, Cambridge, 1797 [new ed. 1838]; and to Dr. J. A. Dorner's *History of the Development of the Doctrine of the Person of Christ*, of which an English translation has been printed at Edinburgh, 1861, 2 vols.; and to Hagenbach, *Dogmengeschichte*, §§ 42, 65, 66, 4te Auflage, Leipz. 1857. **SON OF MAN** (בֶּן־אָדָם, and in Chaldee בַּר־אֱנָשׁ: *ὁ υἱὸς τοῦ ἀνθρώπου*, or *υἱὸς ἀνθρώπου*), the name of the Second Person of the ever-blessed Trinity, the Eternal Word, the Everlasting Son, becoming Incarnate, and so made the Son of Man, the second Adam, the source of all grace to all men, united in his mystical body, the Christian Church.

1. In a general sense every descendant of Adam bears the name "Son of Man" in Holy Scripture, as in Job xxv. 6; Ps. cxliv. 3, cxlvi. 3; Is. li. 12, lvi. 2. But in a more restricted signification it is applied by way of distinction to particular persons. Thus the prophet Ezekiel is addressed by Almighty God as *Ben-Adam*, or "Son of Man," about eighty

times in his prophecies. This title appears to be assigned to Ezekiel as a memento from God — (*μέμνησο ἄνθρωπος ὢν*) — in order that the prophet, who had been permitted to behold the glorious manifestation of the Godhead, and to hold converse with the Almighty, and to see visions of futurity, should not be "exalted above measure by the abundance of his revelations," but should remember his own weakness and mortality, and not impute his prophetic knowledge to himself, but ascribe all the glory of it to God, and be ready to execute with meekness and alacrity the duties of his prophetic office and mission from God to his fellow-men.

2. In a still more emphatic and distinctive sense the title "Son of Man" is applied in the Old Testament to the Messiah. And, inasmuch as the Messiah is revealed in the Old Testament as a Divine Person and the Son of God (Ps. ii. 7, lxxxix. 27; Is. vii. 14, ix. 6), it is a prophetic pre-announcement of his *incarnation* (compare Ps. viii. 4 with Heb. ii. 6, 7, 8, and 1 Cor. xv. 27).

In the Old Testament the Messiah is designated by this title, "Son of Man," in his royal and judicial character, particularly in the prophecy of Dan. vii. 13: "Behold One like the *Son of Man* came with the clouds of heaven, and came to the Ancient of Days . . . . and there was given Him dominion and glory . . . . His dominion is an everlasting dominion." Here the title is not *Ben-ish*, or *Ben-Adam*, but *Bar-enosh*, which represents humanity in its greatest frailty and humility, and is a significant declaration that the exaltation of Christ in his kingly and judicial office is due to his previous condescension, obedience, self-humiliation, and suffering in his human nature (comp. Phil. ii. 5–11).

The title "Son of Man," derived from that passage of Daniel, is applied by St. Stephen to Christ in his heavenly exaltation and royal majesty: "Behold I see the heavens opened, and the Son of Man standing on the right hand of God" (Acts vii. 56). This title is also applied to Christ by St. John in the Apocalypse, describing our Lord's priestly office, which He executes in heaven (Rev. i. 13): "In the midst of the seven golden candlesticks" (or golden lamps, which are the emblems of the churches, i. 20), "one like the Son of Man clothed with a garment down to the foot" (his priestly attire); "his head and his hairs were white like wool, as white as snow" (attributes of divinity; comp. Dan. vii. 9). St. John also in the Apocalypse (xiv. 14) ascribes the title "Son of Man" to Christ when he displays his kingly and judicial office: "I looked and beheld a white cloud, and upon the cloud One sat like unto the Son of Man, having on his head a golden crown, and in his hand a sharp sickle" — to reap the harvest of the earth.

3. It is observable that Ezekiel never *calls himself* "Son of Man;" and in the Gospels Christ is never called "Son of Man" by the Evangelists; but wherever that title is applied to Him there, it is *applied by Himself*.

The only passages in the New Testament where Christ is called "Son of Man" by any one *except Himself* are those just cited, and they relate to Him, not in his humiliation upon earth, but in his heavenly exaltation consequent upon that humiliation. The passage in John xii. 34, "Who is this Son of Man?" is an inquiry of the people concerning Him who applied this title to Himself.

The reason of what has been above remarked seems to be, that, as on the one hand it was expedient for Ezekiel to be reminded of his own humanity, in order that he should not be elated by his revelations; and in order that the readers of his prophecies might bear in mind that the revelations in them are not due to Ezekiel, but to God the Holy Ghost, who spake by him (see 2 Pet. i. 21); so, on the other hand, it was necessary that they who saw Christ's miracles, the evidences of his divinity, and they who read the evangelic histories of them, might indeed adore Him as God, but might never forget that He is Man.

4. The two titles "Son of God" and "Son of Man," declaring that in the one Person of Christ there are two natures, the nature of God and the nature of man, joined together, but not confused, are presented to us in two memorable passages of the Gospel, which declare the will of Christ that all men should confess Him to be God and man, and which proclaim the blessedness of this confession.

(1.) "Whom do men say that I, the Son of Man, am?" was our Lord's question to his Apostles; and "Whom say ye that I am? Simon Peter answered and said, Thou art the Christ, the Son of the living God." Our Lord acknowledged this confession to be true, and to have been revealed from heaven, and He blessed him who uttered it: "Blessed art thou, Simon *Bar-jona* . . . ." — "Thou art son of Jonas, *Bar-jona* (comp. John xxi. 15); and as truly as *thou* art *Bar-jona*, so truly am I *Bar-enosh*, Son of Man, and *Ben-Elohim*, Son of God; and *My Father*, who is in heaven, hath revealed this truth unto thee. Blessed is every one who holds this faith; for I myself, Son of God and Son of Man, am the living *Rock* on which the Church is built; and he who holds this faith is a genuine *Petros*, a lively *stone*, hewn out of me the Divine *Petra*, the Everlasting *Rock*, and built upon me" (see the authorities cited in the note on Matt. xvi. 18, in the present writer's edition).

(2.) The other passage where the two titles (Son of God and Son of Man) are found in the Gospels is no less significant. Our Lord, standing before Caiaphas and the chief priests, was interrogated by the high-priest, "Art thou the Christ, the Son of God?" (Matt. xxvi. 63; comp. Mark xiv. 61). "Art thou what thou claimest to be, the Messiah? *and* art thou, as thou professest to be, a *Divine* Person, the Son of God, the Son of the Blessed?" "Jesus saith unto him, Thou sayest it; I am" (Matt. xxvi. 64; Mark xiv. 62).

But, in order that the high-priest and the council might *not* suppose Him to be a *Divine* Person *only*, and *not* to be also really and truly *Man*, our Lord added of *his own accord*, "Nevertheless" (*πλήν*, *besides*, or, as St. Mark has it, *καί*, *also*, in addition to the avowal of my divinity) "I say unto you, Hereafter shall ye see the Son of Man sitting on the right hand of power, and coming in the clouds of heaven" (Matt. xxvi. 64; Mark xiv. 62). That is, "I am indeed the Son of God, but do not forget that I am also the Son of Man. Believe and confess the true faith, that I, who claim to be the Christ, am Very God and Very Man."

5. The Jews, in our Lord's age, were not disposed to receive either of the truths expressed in those words. They were so tenacious of the doctrine of the Divine Unity (as they understood it

Digitized by Google

that they were not willing to accept the assertion that *Christ* is the "Son of God," Very God of Very God (see above, article SON OF GOD), and they were not disposed to admit that God could become Incarnate, and that the Son of God could be also the Son of Man (see the remarks on this subject by Dorner, *On the Person of Christ*, Introduction, throughout).

Hence we find that no sooner had our Lord asserted these truths, than "the high-priest rent his clothes, saying, He hath spoken blasphemy. What think ye? and they all condemned Him to be guilty of death" (Matt. xxvi 65, 66; Mark xiv. 63, 64). And when St. Stephen had said, "Behold, I see the heavens opened, and the Son of Man standing on the right hand of God," *then* they "cried out with a loud voice, and stopped their ears, and ran upon him with one accord, and cast him out of the city, and stoned him" (Acts vii. 57, 58). They could no longer restrain their rage against him as guilty of blasphemy, because he asserted that Jesus, who had claimed to be the Son of God, and who had been put to death because He made this assertion, is also the Son of Man, and was then glorified; and that therefore they were mistaken in looking for *another* Christ, and that they had been guilty of putting to death the Messiah.

6. Here, then, we have a clear view of the difficulties which the Gospel had to overcome, in proclaiming Jesus to be the Christ, and to be the Son of God, and to be the Son of Man; and in the building up of the Christian Church on this foundation. It had to encounter the prejudices of the whole world, both Jewish and Heathen, in this work. It did encounter them, and has triumphed over them. Here is a proof of its Divine origin.

7. If we proceed to analyze the various passages in the Gospel where Christ speaks of Himself as the Son of Man, we shall find that they not only teach the doctrine of the Incarnation of the Son of God (and thus afford a prophetic protest against the heresies which afterwards impugned that doctrine, such as the heresy of the Docetæ, Valentinus, and Marcion, who denied that *Jesus Christ was come in the flesh*, see on 1 John iv. 2, and 2 John 7), but they also declare the consequences of the Incarnation, both in regard to Christ, and in regard also to all mankind.

The consequences of Christ's Incarnation are described in the Gospels, as a capacity of being a perfect pattern and example of godly life to men (Phil. ii. 5; 1 Pet. ii. 21); and of suffering, of dying, of "giving his life as a ransom for all," of being "the propitiation for the sins of the whole world" (1 John ii. 2, iv. 10), of being the source of life and grace, of Divine Sonship (John i. 12), of Resurrection and Immortality to all the family of Mankind, as many as receive Him (John iii. 16, 36, xi. 25), and are engrafted into his body, and cleave to Him by faith and love, and participate in the Christian sacraments, which derive their virtue and efficacy from his Incarnation and Death, and which are the appointed instruments for conveying and imparting the benefits of his Incarnation and Death to us (comp. John iii. 5, vi. 53), who are "made partakers of the Divine nature" (2 Pet. i. ), by virtue of our union with Him who is God and Man.

The infinite value and universal applicability of the benefits derivable from the Incarnation and sacrifice of the Son of God are described by our Lord, declaring the perfection of the union of the two natures, the human nature and the Divine, in his own person. "No man hath ascended up to heaven but He that came down from heaven, even the Son of Man which is in heaven; and as Moses lifted up the serpent in the wilderness, even so must the Son of Man be lifted up: that whosoever believeth in Him should not perish, but have eternal life; for God so loved the world, that He gave his only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life; for God sent not his Son into the world to condemn the world; but that the world through Him might be saved" (John iii. 13–17); and again, "What and if ye shall see the Son of Man ascend up where He was before?" (John vi. 62, compared with John i. 1–3.)

8. By his perfect obedience in our nature, and by his voluntary submission to death in that nature, Christ acquired new dignity and glory, due to his obedience and sufferings. This is the dignity and glory of his mediatorial kingdom; *that* kingdom which He has as God-man, "the only Mediator between God and man" — (as partaking perfectly of the nature of both, and as making an *At-one-ment* between them), "the Man Christ Jesus" (1 Tim. ii. 5; Heb. ix. 15, xii. 24).

It was as Son of Man that He humbled Himself, it is as Son of Man that He is exalted; it was as Son of Man, born of a woman, that He was made under the Law (Gal. iv. 4), and as Son of Man He was Lord of the Sabbath-day (Matt. xii. 8); as Son of Man He suffered for sins (Matt. xvii. 12; Mark viii. 31), and as Son of Man He has authority on earth to forgive sins (Matt. ix. 6). It was as Son of Man that He had not where to lay his head (Matt. viii. 20; Luke ix. 58), it is as Son of Man that He wears on his head a golden crown (Rev. xiv. 14); it was as Son of Man that He was betrayed into the hands of sinful men, and suffered many things, and was rejected, and condemned, and crucified (see Matt. xvii. 22, xx. 18, xxvi. 2, 24; Mark viii. 31, ix. 31, x. 33; Luke ix. 22, 44, xviii. 31, xxiv. 7), it is as Son of Man that He now sits at the right hand of God, and as Son of Man He will come in the clouds of heaven, with power and great glory, in his own glory, and in the glory of his Father, and all his holy angels with Him, and it is as Son of Man that He will "sit on the throne of his glory," and "before Him will be gathered all nations" (Matt. xvi. 27, xxiv. 30, xxv. 31, 32; Mark xiv. 62; Luke xxi. 27); and He will send forth his angels to gather his elect from the four winds (Matt. xxiv. 31), and to root up the tares from out of his field, which is the world (Matt. xiii. 38, 41); and to bind them in bundles to burn them, and to gather his wheat into his barn (Matt. xiii. 30). It is as Son of Man that He will call all from their graves, and summon them to his judgment-seat, and pronounce their sentence for everlasting bliss or woe; "for, *the Father* judgeth no man, but hath committed all judgment unto *the Son*; . . . . and hath given Him authority to execute judgment also, *because* He is the *Son of Man*" (John v. 22, 27). Only "the pure in heart will *see God*" (Matt. v. 8; Heb. xii 14); but the evil as well as the good will see their Judge: "*every eye* shall see Him" (Rev. i. 7). This is fit and equitable: and it is also fit and equitable that He who as Son of Man was judged by the world, should also judge the world; and that He who was rejected openly, and suffered death for all, should

Digitized by Google

be openly glorified by all, and be exalted in the eyes of al., as King of kings, and Lord of lords.

9. Christ is represented in Scripture as the second Adam (1 Cor. xv. 45, 47; comp. Rom. v. 14), inasmuch as He is the *Father* of the new race of mankind; and as we are all by nature in Adam, so are we by grace in Christ; and "as in Adam all die, even so in Christ all are made alive" (1 Cor. xv. 22); and "if any man be in Christ, he is a new creature" (2 Cor. v. 17; Eph. iv. 24); and He, who is the *Son*, is also in this respect *a Father;* and therefore Isaiah joins both titles in one, "To us a *Son* is given . . . and his name shall be called the Mighty God, the Everlasting *Father*" (Is. ix. 6). Christ is the second *Adam*, as the Father of the new race; but in another respect He is unlike Adam, because Adam was formed in mature manhood *from the earth;* but Christ, the second Adam, is *Ben-Adam*, the *Son* of Adam; and therefore St. Luke, writing specially for the Gentiles, and desirous to show the universality of the redemption wrought by Christ, traces his genealogy to Adam (Luke iii. 23–38). He is Son of Man, inasmuch as he was the Promised Seed, and was conceived in the womb of the Virgin Mary, and took our nature, the nature of us all, and became "Emmanuel, God with us" (Matt. i. 23), "God manifest in the flesh" (1 Tim. iii. 16). Thus the new Creation sprung out of the old; and He made "all things new" (Rev. xxi. 5). *The Son of God* in Eternity became the *Son of Man* in Time. He turned back, as it were, the streams of pollution and of death, flowing in the innumerable channels of the human family, and introduced into them a new element, the element of life and health, of Divine incorruption and immortality; which would not have been the case, if He had been merely like Adam, having an independent origin, springing by a separate efflux out of the earth, and had not been *Ben-Adam* as well as *Ben-Elohim*, the *Son of Adam*, as well as the *Son of God*. And this is what St. Paul observes in his comparison — and contrast — between Adam and Christ (Rom. v. 15–18), "*Not*, as was the transgression (in Adam) so likewise was the free gift (in Christ). For if (as is the fact) the many (*i. e.* all) died by the transgression of the one (Adam), much more the grace of God, and the gift by the grace that is of the one Man Jesus Christ, overflowed to the many; and *not*, as by one who sinned, so is the gift; for the judgment came from one man to condemnation, but the free gift came forth from many transgressions to their state of justification. For if by the transgression of the one (Adam), Death reigned by means of the one, much more they who receive the abundance of grace and of the gift of righteousness will reign in life through the one, Jesus Christ . . . Thus, where Sin abounded, Grace did much more abound (Rom. v. 20); for, as, by the disobedience of the one man (Adam), the many were made sinners, so by the obedience of the one (Christ), the many were made righteous. . . ."

10. The benefits accruing to mankind from the Incarnation of the Son of God are obvious from these considerations: —

We are not so to conceive of Christ as of a Deliverer, *external* to humanity, but as incorporating humanity in Himself, and uniting it to God; as rescuing our nature from Sin, Satan, and Death; and as carrying us through the grave and gate of death to a glorious immortality; and bearing mankind, his lost sheep, on his shoulders; as bearing us and our sins in his own body on the tree (1 Pet. ii. 24); as bringing us through suffering to glory; as raising our nature to a dignity higher than that of angels; as exalting us by his Ascension into heaven; and as making us to "sit together with Himself in heavenly places" (Eph. ii. 6), even at the right hand of God. "To him that overcometh," He says, "will I grant to sit with me on my throne, even as I also overcame and am set down with my Father on his throne" (Rev. iii. 21). These are the hopes and privileges which we derive from the Incarnation of Christ, who is the Life (John i. 4, xi. 25, xiv. 6; 1 John i. 2); from our filial adoption by God in Him (John i. 12; 1 John iii. 1, 2); and from our consequent capacity of receiving the Spirit of adoption in our hearts (Gal. iv. 6); and from our membership and indwelling in Him, who is the Son of God from all eternity, and who became, for our sakes and for our salvation, the Son of Man, and submitted to the weakness of our humanity, in order that we might partake in the glory of his immortality.

11. These conclusions from Holy Scripture have been stated clearly by many of the ancient Fathers, among whom it may suffice to mention St. Irenæus (*Adv. Hæreses*, iii. 20, p. 247, Grabe): ἡνωσεν (Χριστὸς) ἄνθρωπον τῷ Θεῷ· εἰ γὰρ μὴ ἄνθρωπος ἐνίκησεν τὸν ἀντίκαλον τοῦ ἀνθρώπου, οὐκ ἂν δικαίως ἐνικήθη ὁ ἐχθρός· πάλιν τε εἰ μὴ ὁ Θεὸς ἐδωρήσατο τὴν σωτηρίαν, οὐκ ἂν βεβαίως ἔσχομεν αὐτήν· καὶ εἰ μὴ συνηνώθη ὁ ἄνθρωπος τῷ Θεῷ, οὐκ ἂν ἠδυνήθη μετασχεῖν τῆς ἀφθαρσίας· ἔδει γὰρ τὸν μεσίτην Θεοῦ τε καὶ ἀνθρώπου, διὰ τῆς ἰδίας πρὸς ἑκατέρους οἰκειότητος εἰς φιλίαν καὶ ὁμόνοιαν ἑκατέρους συναγαγεῖν. And iii. 21, p. 250: "Hic igitur Filius Dei, existens Verbum Patris . . . quoniam ex Mariâ factus est Filius hominis . . . primitias resurrectionis hominis in Seipso faciens, ut quemadmodum Caput resurrexit a mortuis, sic et reliquum corpus omnis hominis, qui invenitur in vitâ . . . resurgat per compagines et conjunctiones coalescens, et confirmatum augmento Dei" (Eph. iv. 16). And St. Cyprian (*De Idolorum Vanitate*, p. 538, ed. Venet. 1758): "Hujus gratiæ disciplinæque arbiter et magister Sermo (Λόγος) et *Filius Dei* mittitur, qui per prophetas omnes retro Illuminator et Doctor humani generis prædicabatur. Hic est virtus Dei . . . carnem Spiritu Sancto coöperante induitur . . . Hic Deus noster, Hic Christus est, qui Mediator duorum hominem induit, quem perducat ad Patrem. Quod homo est, esse Christus voluit, ut et homo possit esse, quod Christus est." And St. Augustine (*Serm.* 121): "Filius Dei factus est Filius hominis, ut vos, qui eratis filii hominis, efficeremini filii Dei."

SOP'ATER (Σώπατρος: *Sopater*). Sopater the son of Pyrrhus of Berœa was one of the companions of St. Paul on his return from Greece into Asia, as he came back from his third missionary journey (Acts xx. 4). Whether he is the same with Sosipater, mentioned in Rom. xvi. 21, cannot be positively determined. The name of his father, Pyrrhus, is omitted in the received text, though it has the authority of the oldest MSS., A, B, D, E, and the recently discovered Codex Sinaiticus, as well as of the Vulgate, Coptic, Sahidic, Philoxenian-Syriac, Armenian, and Slavonic versions. Mill condemns it, apparently without reason, as a traditional gloss. [PYRRHUS, Amer. ed.]

W. A. W.

SOPHE'RETH (סֹפֶרֶת [*writer, scribe*]: Σεφηρέ, Σαφαρέτ; [Vat. Ασεφηραθ, Σαφαραθ; FA. in N. Σαφαραθι:] Alex. Ασεφορα, Σαφαραθ: *Sopheret, Sophereth*). "The children of Sopheretb" were a family who returned from Babylon with Zerubbabel among the descendants of Solomon's servants (Ezr. ii. 55; Neh. vii. 57). Called AZAPHION in 1 Esdr. v. 33.

SOPHONI'AS (*Sophonias*). The Prophet ZEPHANIAH (2 Esdr. i. 40).

SORCERER. [DIVINATION.]

SO'REK, THE VALLEY OF (נַחַל שֹׂרֵק [see below]: [a]'Αλσωρήχ; Alex. χειμαρρους Σωρηχ: *Vallis Sorec*). A wady (to use the modern Arabic term which precisely answers to the Hebrew *nachal*), in which lay the residence of Delilah (Judg. xvi. 4). It appears to have been a Philistine place, and possibly was nearer Gaza than any other of the chief Philistine cities, since thither Samson was taken after his capture at Delilah's house. Beyond this there are no indications of its position, nor is it mentioned again in the Bible. Eusebius and Jerome (*Onomast.* Σωρήχ) state that a village named Capharsorech was shown in their day "on the north of Eleutheropolis, near the town of Saar (or Sarea), *i. e.* Zorah, the native place of Samson." Zorah is now supposed to have been fully 10 miles N. of *Beit-Jibrin*, the modern representative of Eleutheropolis, though it is not impossible that there may have been a second further south. No trace of the name of Sorek has been yet discovered either in the one position or the other.[b] But the district is comparatively unexplored, and doubtless it will ere long be discovered.

The word *Sorek* in Hebrew signifies a peculiarly choice kind of vine, which is said to have derived its name from the dusky color of its grapes, that perhaps being the meaning of the root (Gesenius, *Thes.* p. 1342). It occurs in three passages of the Old Test. (Is. v. 2; Jer. ii. 21; and, with a modification, in Gen. xlix. [c] 11). It appears to be used in modern Arabic for a certain purple grape, grown in Syria, and highly esteemed; which is noted for its small raisins, and minute, soft pips, and produces a red wine. This being the case, the valley of Sorek may have derived its name from the growth of such vines, though it is hardly safe to affirm the fact in the unquestioning manner in which Gesenius (*Thes.* ibid.) does. Ascalon was celebrated among the ancients for its wine; and though not in the neighborhood of Zorah, was the natural port by which any of the productions of that district would be exported to the west. G.

SOSIP'ATER (Σωσίπατρος: *Sosipater*). 1. A general of Judas Maccabæus, who in conjunction with Dositheus defeated Timotheus and took him prisoner, c. B. C. 164 (2 Macc. xii. 19–24).

2. Kinsman or fellow tribesman of St. Paul, mentioned in the salutations at the end of the Epistle to the Romans (xvi. 21). He is probably the same person as Sopater of Berœa. B. F. W.

SOS'THENES (Σωσθένης [*preserver of strength*]: *Sosthenes*) was a Jew at Corinth, who was seized and beaten in the presence of Gallio, on the refusal of the latter to entertain the charge of heresy which the Jews alleged against the Apostle Paul (see Acts xviii. 12–17). His precise connection with that affair is left in some doubt. Some have thought that he was a Christian, and was maltreated thus by his own countrymen, because he was known as a special friend of Paul. But it is improbable if Sosthenes was a believer, that Luke would mention him merely as "the ruler of the synagogue" (ἀρχισυνάγωγος), without any allusion to his change of faith. A better view is, that Sosthenes was one of the bigoted Jews; and that "the crowd" (πάντες simply, and not πάντες οἱ Ἕλληνες, is the true reading) were Greeks who, taking advantage of the indifference of Gallio, and ever ready to show their contempt of the Jews, turned their indignation against Sosthenes. In this case he must have been the successor of Crispus, (Acts xviii. 8) as chief of the synagogue (possibly a colleague with him, in the looser sense of ἀρχισυνάγωγοι, as in Mark v. 22), or, as Biscoe conjectures, may have belonged to some other synagogue at Corinth. Chrysostom's notion that Crispus and Sosthenes were names of the same person, is arbitrary and unsupported.

Paul wrote the First Epistle to the Corinthians jointly in his own name and that of a certain Sosthenes whom he terms "the brother" (1 Cor. i. 1). The mode of designation implies that he was well known to the Corinthians; and some have held that he was identical with the Sosthenes mentioned

[a] The ΑΛ is no doubt the last relic of Ναχαλ: comp. ABRAHAM; and KANAH, RIVER.

[b] M. Van de Velde (*Mem.* 350) proposes the *Wady Simsim*, which runs from near *Beit Jibrin* to *Ashdûd*; but this he admits to be mere conjecture.

[c] The Arabic versions of this passage retain the term Sorek as a proper name.

Digitized by Google

in the Acts. If this be so, he must have been converted at a later period (Wetstein, *N. Test.* vol. ii. p. 576), and have been at Ephesus and not at Corinth, when Paul wrote to the Corinthians. The name was a common one, and but little stress can be laid on that coincidence. Eusebius says (*H. E.* i. 12, § 1) that this Sosthenes (1 Cor. i. 1) was one of the seventy disciples, and a later tradition adds that he became bishop of the church at Colophon in Ionia. H. B. H.

SOSTRATUS (Σώστρατος [*saviour of the army*]: *Sostratus*), a commander of the Syrian garrison in the Acra at Jerusalem (ὁ τῆς ἀκροπόλεως ἔπαρχος) in the reign of Antiochus Epiphanes (c. B. C. 172: 2 Macc. iv. 27, 29). B. F. W.

SOTAI [2 syl.] (סוֹטַי [*one who turns aside*]: Σωταΐ, Σουτεί; Alex. Σουτιει in Neh.: *Sotai, Sothai*). The children of Sotai were a family of the descendants of Solomon's servants who returned with Zerubbabel (Ezr. ii. 55; Neh. vii. 57).

* SOUTH, QUEEN OF THE. [SHEBA.]

SOUTH RA'MOTH (רָמוֹת נֶגֶב: ἐν Ῥαμὲθ νότου; Alex. ἐν ραμαθ ν.: *Ramoth ad meridiem*). One of the places frequented by David and his band of outlaws during the latter part of Saul's life, and to his friends in which he showed his gratitude when opportunity offered (1 Sam. xxx. 27). The towns mentioned with it show that Ramoth must have been on the southern confines of the country — the very border of the desert. Bethel, in ver. 27, is almost certainly not the well-known sanctuary, but a second of the same name, and Hebron was probably the most northern of all the places in the list. It is no doubt identical with RAMATH OF THE SOUTH, a name the same in every respect except that by a dialectical or other change it is made plural, Ramoth instead of Ramath. G.

SOW. [SWINE.]

SOWER, SOWING. The operation of sowing with the hand is one of so simple a character, as to need little description. The Egyptian paintings furnish many illustrations of the mode in which it was conducted. The sower held the vessel or basket containing the seed, in his left hand, while with his right he scattered the seed broadcast (Wilkinson's *Anc. Eg.* ii. 12, 18, 39; see AGRICULTURE for one of these paintings). The "drawing out" of the seed is noticed, as the most characteristic action of the sower, in Ps. cxxvi. 6 (A. V. "precious") and Am. ix. 13: it is uncertain whether this expression refers to drawing out the handful of seed from the basket, or to the dispersion of the seed in regular rows over the ground (Gesen. *Thes.* p. 827). In some of the Egyptian paintings the sower is represented as preceding the plough: this may be simply the result of bad perspective, but we are told that such a practice actually prevails in the East in the case of sandy soils, the plough serving the purpose of the harrow for covering the seed (Russell's *Aleppo*, i. 74). In wet soils the seed was trodden in by the feet of animals (Is. xxxii. 20), as represented in Wilkinson's *Anc. Eg.* ii. 12.[a] The sowing season commenced in October and continued to the end of February, wheat being put in before, and barley after the beginning of January (Russell, i. 74). The Mosaic law prohibited the sowing of mixed seed (Lev. xix. 19; Deut. xxii. 9): Josephus (*Ant.* iv. 8, § 20) supposes this prohibition to be based on the repugnancy of nature to intermixture, but there would appear to be a further object of a moral character, namely, to impress on men's minds the general lesson of purity. The regulation offered a favorable opportunity for Rabbinical refinement, the results of which are embodied in the treatise of the Mishna, entitled *Kilaim*, §§ 1–3. That the ancient Hebrews did not consider themselves prohibited from planting several kinds of seeds in the same field, appears from Is. xxviii. 25. A distinction is made in Lev. xi. 37, 38, between dry and wet seed, in respect to contact with a corpse; the latter, as being more susceptible of contamination, would be rendered unclean thereby, the former would not. The analogy between the germination of seed and the effects of a principle or a course of action on the human character for good or for evil is frequently noticed in Scripture (Prov. xi. 18; Matt. xiii. 19, 24; 2 Cor. ix. 6; Gal. vi. 7). W. L. B.

SPAIN (Σπανία: *Hispania*). The Hebrews were acquainted with the position and the mineral wealth of Spain from the time of Solomon, whose alliance with the Phœnicians enlarged the circle of their geographical knowledge to a very great extent. [TARSHISH.] The local designation, Tarshish, representing the *Tartessus* of the Greeks, probably prevailed until the fame of the Roman wars in that country reached the East, when it was superseded by its classical name, which is traced back by Bochart to the Shemitic *tsâphân*, "rabbit," and by Humboldt to the Basque *España*, descriptive of its position on the *edge* of the continent of Europe (*Dict. of Geog.* i. 1074). The Latin form of this name is represented by the Ἰσπανία of 1 Macc. viii. 3 (where, however, some copies exhibit the Greek form), and the Greek by the Σπανία of Rom. xv. 24, 28. The passages cited contain all the Biblical notices of Spain: in the former the conquests of the Romans are described in somewhat exaggerated terms; for though the Carthaginians were expelled as early as B. C. 206, the native tribes were not finally subdued until B. C. 25, and not until then could it be said with truth that "they had conquered all the place" (1 Macc. viii. 4). In the latter, St. Paul announces his intention of visiting Spain. Whether he carried out this intention is a disputed point connected with his personal history. [PAUL.] The mere intention, however, implies two interesting facts, namely, the establishment of a Christian community in that country, and this by means of Hellenistic Jews resident there. We have no direct testimony to either of these facts; but as the Jews had spread along the shores of the Mediterranean as far as Cyrene in Africa and Rome in Europe (Acts ii. 10), there would be no

a * Ploughs in the East, at present, often have a quiver or tunnel attached to the front of them, especially when the soil is mellow and easily broken, through which the grain is dropped, and then covered up by the earth as turned aside in the furrow. It may be stated here that ploughs in Palestine have quite invariably but one handle, which the driver holds by one hand, while he carries his long goad in the other. This peculiarity makes the Saviour's expression precisely accurate: "He that putteth his *hand* to the plough," etc. (Luke ix. 62); whereas, with the plough constructed as among us, the plural would be more natural than the singular. H.

difficulty in assuming that they were also found in the commercial cities of the eastern coast of Spain. The early introduction of Christianity into that country is attested by Irenæus (i. 3) and Tertullian (*adv. Jud.* 7). An inscription, purporting to record a persecution of the Spanish Christians in the reign of Nero, is probably a forgery (Gieseler's *Eccl. Hist.* i. 82, note 5). W. L. B.

• **SPAN.** [WEIGHTS AND MEASURES, II. 1. (1.)]

**SPARROW** (צִפּוֹר, *tsippór*: ὄρνεον, ὀρνίθιον: τὸ πετεινόν, στρουθίον: *χίμαρος* in Neh. v. 18, where LXX. probably read צְפִיר: *avis, volucris, passer*). The above Heb. word occurs upwards of forty times in the O. T. In all passages excepting two it is rendered by A. V. indifferently "bird" or "fowl." In Ps. lxxxiv. 3, and Ps. cii. 7, A. V. renders it "sparrow." The Greek στρουθίον ("sparrow," A. V.) occurs twice in N. T., Matt. x. 29, Luke xii. 6, 7, where the Vulg. has *passeres*. *Tsippór* (צִפּוֹר), from a root signifying to "chirp" or "twitter," appears to be a phonetic representation of the call note of any passerine bird.[a] Similarly the modern Arabs use the term زَاوِش (*zaoush*) for all small birds which chirp, and زَرْزُور (*zerzour*) not only for the starling, but for any other bird with a harsh, shrill twitter, both these being evidently phonetic names.

*Tsippór* is therefore exactly translated by the LXX. στρουθίον, explained by Moschopulus τὰ μικρὰ τῶν ὀρνίθων, although it may sometimes have been used in a more restricted sense. See Athen. *Deipn.* ix. 391, where two kinds of στρουθία in the more restricted signification are noted.

It was reserved for later naturalists to discriminate the immense variety of the smaller birds of the passerine order. Excepting in the cases of the thrushes and the larks, the natural history of Aristotle scarcely comprehends a longer catalogue than that of Moses.

Yet in few parts of the world are the species of passerine birds more numerous or more abundant than in Palestine. A very cursory survey has supplied a list of above 100 different species of this order. See *Ibis*, vol. i. p. 26 ff. and vol. iv. p. 277 ff.

But although so numerous, they are not generally noticeable for any peculiar brilliancy of plumage beyond the birds of our own climate. In fact, with the exception of the denizens of the mighty forests and fertile alluvial plains of the tropics, it is a popular error to suppose that the nearer we approach the equator, the more gorgeous necessarily is the coloration of the birds. There are certain tropical families with a brilliancy of plumage which is unrivalled elsewhere; but any outlying members of these groups, as for instance the kingfisher of Britain, or the bee-eater and roller of Europe, are not surpassed in brightness of dress by any of their southern relations. Ordinarily in the warmer temperate regions, especially in those which like Palestine possess neither dense forests nor morasses, there is nothing in the brilliancy of plumage which especially arrests the attention of the unobservant. It is therefore no matter for surprise if, in an unscientific age, the smaller birds were generally grouped indiscriminately under the term *tsippór*, ὀρνίθιον or *passer*. The proportion of bright to obscure colored birds is not greater in Palestine than in England; and this is especially true of the southern portion, Judæa, where the wilderness with its bare hills and arid ravines affords a home chiefly to those species which rely for safety and concealment on the modesty and inconspicuousness of their plumage.

Although the common sparrow of England (*Passer domesticus*, L.) does not occur in the Holy Land, its place is abundantly supplied by two very closely allied Southern species (*Passer salicicola*, Vieill. and *Passer cisalpinus*, Tem.). Our English Tree Sparrow (*Passer montanus*, L.) is also very common, and may be seen in numbers on Mount Olivet, and also about the sacred inclosure of the mosque of Omar. This is perhaps the exact species referred to in Ps. lxxxiv. 3, "Yea, the sparrow hath found an house."

Though in Britain it seldom frequents houses, yet in China, to which country its eastward range extends, Mr. Swinhoe, in his *Ornithology of Amoy*, informs us its habits are precisely those of our familiar house sparrow. Its shyness here may be the result of persecution; but in the East the Musulmans hold in respect any bird which resorts to their houses, and in reverence such as build in or about the mosques, considering them to be under the Divine protection. This natural veneration has doubtless been inherited from antiquity. We learn from Ælian (*Var. Hist.* v. 17) that the Athenians condemned a man to death for molesting a sparrow in the temple of Æsculapius. The story of Aristodicus of Cyme, who rebuked the cowardly advice of the oracle of Branchidæ to surrender suppliant, by his symbolical act of driving the sparrows out of the temple, illustrates the same sentiment (Herod. i. 159), which was probably shared by David and the Israelites, and is alluded to in the psalm. There can be no difficulty in interpreting מִזְבְּחוֹת, not as the altar of sacrifice exclusively, but as the place of sacrifice, the sacred inclosure generally, τὸ τέμενος, "fanum." The interpretation of some commentators, who would explain צִפּוֹר in this passage of certain sacred birds, kept and preserved by the priests in the temple like the Sacred Ibis of the Egyptians, seems to be wholly without warrant. See Bochart, iii. 21, 22.

Most of our commoner small birds are found in Palestine. The starling, chaffinch, greenfinch, linnet, goldfinch, corn bunting, pipits, blackbird, song thrush, and the various species of wagtail abound. The wood lark (*Alauda arborea*, L.), crested lark (*Galerida cristata*, Boie.), Calandra lark (*Melanocorypha calandra*, Bp.), short-toed lark (*Calandrella brachylactyla*, Kaup.), Isabel lark (*Alauda deserti*, Licht.), and various other desert species, which are snared in great numbers for the markets, are far more numerous on the southern plains than the skylark in England. In the olive-yards, and among the brushwood of the hills, the Ortolan bunting (*Emberiza hortulana* L.), and especially Cretzschmaer's bunting (*Emberiza cassia*, Crets.), take the place of our common yellow-hammer, an exclusively northern species. Indeed, the second is seldom out of the traveller's

[a] Comp. the Arabic عصفور (*'asfur*), "a sparrow."

sight, hopping before him from bough to bough with its simple but not unpleasing note. As most of our warblers (*Sylviadæ*) are summer migrants, and have a wide eastern range, it was to be expected that they should occur in Syria; and accordingly upwards of twenty of those on the British list have been noted there, including the robin, redstart, whitethroat, blackcap, nightingale, willow-wren, Dartford warbler, whinchat, and stonechat. Besides these, the Palestine lists contain fourteen others, more southern species, of which the most interesting are perhaps the little fantail (*Cisticola schœnicola*, Bp.), the orphean (*Curruca orphæa*, Boie.) and the Sardinian warbler (*Sylvia melanocephala*, Lath.).

The chats (*Saxicolæ*), represented in Britain by the wheatear, whinchat, and stonechat, are very numerous in the southern parts of the country. At least nine species have been observed, and by their lively motions and the striking contrast of black and white in the plumage of most of them, they are the most attractive and conspicuous bird-inhabitants which catch the eye in the hill country of Judæa, the favorite resort of the genus. Yet they are not recognized among the Bedouin inhabitants by any name to distinguish them from the larks.

The rock sparrow (*Petronia stulta*, Strickl.) is a common bird in the barer portions of Palestine, eschewing woods, and generally to be seen perched alone on the top of a rock or on any large stone. From this habit it has been conjectured to be the bird alluded to in Ps. cii. 7, as "the sparrow that

*Petrocossyphus cyaneus.*

sitteth alone upon the housetop;" but as the rock sparrow, though found among ruins, never resorts to inhabited buildings, it seems more probable that the bird to which the psalmist alludes is the blue thrush (*Petrocossyphus cyaneus*, Boie.), a bird so conspicuous that it cannot fail to attract attention by its dark-blue dress and its plaintive monotonous note; and which may frequently be observed perched on houses and especially on outbuildings in the villages of Judæa. It is a solitary bird, eschewing the society of its own species, and rarely more than a pair are seen together. Certainly the allusion of the psalmist will not apply to the sociable and garrulous house or tree-sparrows.

Among the most conspicuous of the small birds of Palestine are the shrikes (Lanii), of which the red-backed shrike (*Lanius collurio*, L.) is a familiar example in the south of England, but there represented by at least five species, all abundantly and generally distributed, namely, *Enneoctonus rufus*, Bp., the woodchat shrike, *Lanius meridionalis*, L. *L. minor*, L.; *L. personatus*, Tem.; and *Telephonus cucullatus*, Gr.

There are but two allusions to the singing of birds in the Scriptures, Eccl. xii. 4 and Ps. civ. 12, "By them shall the fowls (עוֹף) of the heaven have their habitation, which sing among the branches." As the psalmist is here speaking of the sides of streams and rivers ("By them"), he probably had in his mind the bulbul (بلبل) of the country, or Palestine nightingale (*Ixos xanthopygius*, Hempr.), a bird not very far removed from the thrush tribe, and a closely allied species of which is the true bulbul of Persia and India. This lovely songster, whose notes, for volume and variety, surpass those of the nightingale, wanting only the final cadence, abounds in all the wooded districts of Palestine, and especially by the banks of the Jordan, where in the early morning it fills the air with its music.

In one passage (Ez. xxxix. 4), *tsippór* is joined with the epithet עַיִט (ravenous), which may very well describe the raven and the crow, both passerine birds, yet carrion feeders. Nor is it necessary to stretch the interpretation so as to include raptorial birds, which are distinguished in Hebrew and Arabic by so many specific appellations.

With the exception of the raven tribe, there is no prohibition in the Levitical law against any passerine birds being used for food; while the wanton destruction or extirpation of any species was guarded against by the humane provision in Deut. xxii. 6. Small birds were therefore probably as ordinary an article of consumption among the Israelites as they still are in the markets both of the Continent and of the East. The inquiry of our Lord, "Are not five sparrows sold for two farthings?" (Luke xii. 6), "Are not two sparrows sold for a farthing?" (Matt. x. 29), points to their ordinary exposure for sale in his time. At the present day the markets of Jerusalem and Jaffa are attended by many "fowlers" who offer for sale long strings of little birds of various species, chiefly sparrows, wagtails, and larks. These are also frequently sold ready plucked, trussed in rows of about a dozen on slender wooden skewers, and are cooked and eaten like kabobs.

It may well excite surprise how such vast numbers can be taken, and how they can be vended at a price too small to have purchased the powder required for shooting them. But the gun is never used in their pursuit. The ancient methods of fowling to which we find so many allusions in the Scriptures are still pursued, and, though simple, are none the less effective. The art of fowling is spoken of no less than seven times in connection with יָקוּשׁ, *e. g.* "a bird caught in the snare," "bird hasteth to the snare," "fall in a snare," "escaped out of the snare of the fowler." There is also one still more precise allusion, in Ecclus. xi. 30 to the well-known practice of using decoy or call-birds, πέρδιξ θηρευτὴς ἐν καρυάλλῳ. The reference in Jer v. 27, "As a cage is full of birds (עוֹפִים), is probably to the same mode of snaring birds.

Digitized by Google

There are four or five simple methods of fowling practiced at this day in Palestine which are probably identical with those alluded to in the O. T. The simplest, but by no means the least successful, among the dexterous Bedouins, is fowling with the throw-stick. The only weapon used is a short stick, about 18 inches long and half an inch in diameter, and the chase is conducted after the fashion in which, as we read, the Australian natives pursue the kangaroo with their boomerang. When the game has been discovered, which is generally the red-legged great partridge (*Caccabis saxatilis*, Mey.), the desert partridge (*Ammoperdix Heyi*, Gr.), or the little bustard (*Otis tetrax*, L.), the stick is hurled with a revolving motion so as to strike the legs of the bird as it runs, or sometimes at a rather higher elevation, so that when the victim, alarmed by the approach of the weapon, begins to rise, its wings are struck and it is slightly disabled. The fleet pursuers soon come up, and using their burnouses as a sort of net, catch and at once cut the throat of the game. The Mussulmans rigidly observe the Mosaic injunctions (Lev. xvii. 13) to spill the blood of every slain animal on the ground. This primitive mode of fowling is confined to those birds which, like the red-legged partridges and bustards, rely for safety chiefly on their running powers, and are with difficulty induced to take flight. The writer once witnessed the capture of the little desert partridge (*Ammoperdix Heyi*) by this method in the wilderness near Hebron: an interesting illustration of the expression in 1 Sam. xxvi. 20, "as when one doth hunt a partridge in the mountains."

A more scientific method of fowling is that alluded to in Ecclus. xi. 30, by the use of decoy-birds. The birds employed for this purpose are very carefully trained and perfectly tame, that they may utter their natural call-note without any alarm from the neighborhood of man. Partridges, quails, larks, and plovers are taken by this kind of fowling, especially the two former. The decoy-bird, in a cage, is placed in a concealed position, while the fowler is secreted in the neighborhood, near enough to manage his gins and snares. For game-birds, a common method is to construct of brushwood a narrow run leading to the cage, sometimes using a sort of bag-net within the brushwood. This has a trap-door at the entrance, and when the dupe has entered the run, the door is dropped. Great numbers of quail are taken in this manner in spring. Sometimes, instead of the more elaborate decoy of a run, a mere cage with an open door is placed in front of the decoy-bird, of course well concealed by grass and herbage, and the door is let fall by a string, as in the other method. For larks and other smaller birds the decoy is used in a somewhat different manner. The cage is placed without concealment on the ground, and springes, nets, or horse-hair nooses are laid round it to entangle the feet of those whom curiosity attracts to the stranger; or a net is so contrived as to be drawn over them, if the cage be placed in a thicket or among brushwood. Immense numbers can be taken by this means in a very short space of time. Traps, the door of which werbalances by the weight of the bird, exactly like the traps used by the shepherds on the Sussex downs to take wheatears and larks, are constructed by the Bedouin boys, and also the horse-hair springes so familiar to all English school-boys, though these devices are not wholesale enough to repay the professional fowler. It is to the nooses on the ground that reference is made in Ps. cxxiv. 7, "The snare is broken and we are escaped." In the towns and gardens great numbers of birds, starlings and others, are taken for the markets at night by means of a large loose net on two poles, and a lanthorn, which startles the birds from their perch, when they fall into the net.

At the season of migration immense numbers of birds, and especially quails, are taken by a yet more simple method. When notice has been given of the arrival of a flight of quails, the whole village turns out. The birds, fatigued by their long flight, generally descend to rest in some open space a few acres in extent. The fowlers, perhaps twenty or thirty in number, spread themselves in a circle round them, and, extending their loose large burnouses with both arms before them, gently advance toward the centre, or to some spot where they take care there shall be some low brushwood. The birds, not seeing their pursuers, and only slightly alarmed by the cloaks spread before them, begin to run together without taking flight, until they are hemmed into a very small space. At a given signal the whole of the pursuers make a din on all sides, and the flock, not seeing any mode of escape, rush huddled together into the bushes, when the burnouses are thrown over them, and the whole are easily captured by hand.

Although we have evidence that dogs were used by the ancient Egyptians, Assyrians, and Indians in the chase, yet there is no allusion in Scripture to their being so employed among the Jews, nor does it appear that any of the ancients employed the sagacity of the dog, as we do that of the pointer and setter, as an auxiliary in the chase of winged game. At the present day the Bedouins of Palestine employ, in the pursuit of larger game, a very valuable race of greyhounds, equalling the Scottish staghound in size and strength; but the inhabitants of the towns have a strong prejudice against the unclean animal, and never cultivate its instinct for any further purpose than that of protecting their houses and flocks (Is. lvi. 10; Job xxx. 1), and of removing the offal from their towns and villages. No wonder, then, that its use has been neglected for purposes which would have entailed the constant danger of defilement from an unclean animal, besides the risk of being compelled to reject as food game which might be torn by the dogs (cf. Ex. xxii 31; Lev. xxii. 8, &c.).

Whether falconry was ever employed as a mode of fowling or not is by no means so clear. Its antiquity is certainly much greater than the introduction of dogs in the chase of birds; and from the statement of Aristotle (*Anim. Hist.* ix. 24), "In the city of Thrace, formerly called Cedropolis, men hunt birds in the marshes with the help of hawks," and from the allusion to the use of falconry in India, according to Photius' abridgment of Ctesias, we may presume that the art was known to the neighbors of the ancient Israelites (see also Ælian, *Hist. An.* iv. 26, and Pliny, x. 8). Falconry, however, requires an open and not very rugged country for its successful pursuit, and Palestine west of the Jordan is in its whole extent ill adapted for this species of chase. At the present day falconry is practiced with much care and skill by the Arab inhabitants of Syria, though not in Judæa proper. It is indeed the favorite amusement of all the Bedouins of Asia and Africa, and esteemed an exclusively noble sport, only to be indulged in by wealthy sheiks. The rarest and most valuable species of hunting falcon (*Falco Lanarius*, L.) the Lanner, is a native of the

Digitized by Google

Lebanon and of the northern hills of Palestine. It is highly prized by the inhabitants, and the young are taken from the nest and sold for a considerable price to the chieftains of the Hauran. Forty pounds sterling is no uncommon price for a well-trained falcon. A description of falconry as now practiced among the Arabs would be out of place here, as there is no direct allusion to the subject in the O. T. or N. T. H. B. T.

**SPARTA** (Σπάρτη [*cord, strand*], 1 Macc. xiv. 16; Λακεδαιμόνιοι, 2 Macc. v. 9: A. V. "Lacedæmonians"). In the history of the Maccabees mention is made of a remarkable correspondence between the Jews and the Spartans, which has been the subject of much discussion. The alleged facts are briefly these. When Jonathan endeavored to strengthen his government by foreign alliances (cir. B. C. 144), he sent to Sparta to renew a friendly intercourse which had been begun at an earlier time between Areus and Onias [AREUS; ONIAS], on the ground of their common descent from Abraham (1 Macc. xii. 5–23). The embassy was favorably received, and after the death of Jonathan "the friendship and league" was renewed with Simon (1 Macc. xiv. 16–23). No results are deduced from this correspondence, which is recorded in the narrative without comment; and imperfect copies of the official documents are given as in the case of similar negotiations with the Romans. Several questions arise out of these statements as to (1) the people described under the name Spartans, (2) the relationship of the Jews and Spartans, (3) the historic character of the events, and (4) the persons referred to under the names Onias and Areus.

1. The whole context of the passage, as well as the independent reference to the connection of the "Lacedæmonians" and Jews in 2 Macc. v. 9, seem to prove clearly that the reference is to the Spartans, properly so called; Josephus evidently understood the records in this sense, and the other interpretations which have been advanced are merely conjectures to avoid the supposed difficulties of the literal interpretation. Thus Michaelis conjectured that the words in the original text were ספרדים, סְפָרִדִים (Obad. ver. 20; Ges. *Thes.* s. v.), which the translators read erroneously as ספרטים, סְפַרְטִים, and thus substituted *Sparta* for *Sepharad* [SEPHARAD]. And Frankel, again (*Monatsschrift*, 1853, p. 456), endeavors to show that the name *Spartans* may have been given to the Jewish settlement at Nisibis, the chief centre of the Armenian Dispersion. But against these hypotheses it may be urged conclusively that it is incredible that a Jewish colony should have been so completely separated from the mother state as to need to be reminded of its kindred, and also that the vicissitudes of the government of this strange city (1 Macc. xii. 20, βασιλεύς; xiv. 20, ἄρχοντες καὶ ἡ πόλις) should have corresponded with those of Sparta itself.

2. The actual relationship of the Jews and Spartans (2 Macc. v. 9, συγγένεια) is an ethnological error, which it is difficult to trace to its origin. It is possible that the Jews regarded the Spartans as the representatives of the Pelasgi, the supposed descendants of Peleg the son of Eber (Stillingfleet, *Origines Sacræ*, iii. 4, 15; Ewald, *Gesch.* iv. 277, note), just as in another place the Pergamenes trace back their friendship with the Jews to a connection in the time of Abraham (Joseph. *Ant.* xiv. 10, § 22); if this were so, they might easily spread their opinion. It is certain, from an independent passage, that a Jewish colony existed at Sparta at an early time (1 Macc. xv. 23), and the important settlement of the Jews in Cyrene may have contributed to favor the notion of some intimate connection between the two races. The belief in this relationship appears to have continued to later times (Joseph. *B. J.* i. 26, § 1), and, however mistaken, may be paralleled by other popular legends of the eastern origin of Greek states. The various hypotheses proposed to support the truth of the statement are examined by Wernsdorff (*De fide Lib. Macc.* § 94), but probably no one now would maintain it.

3. The incorrectness of the opinion on which the intercourse was based is obviously no objection to the fact of the intercourse itself; and the very obscurity of Sparta at the time makes it extremely unlikely that any forger would invent such an incident. But it is urged that the letters said to have been exchanged are evidently not genuine, since they betray their fictitious origin negatively by the absence of characteristic forms of expression, and positively by actual inaccuracies. To this it may be replied that the Spartan letters (1 Macc. xii. 20–23, xiv. 20–23) are extremely brief, and exist only in a translation of a translation, so that it is unreasonable to expect that any Doric peculiarities should have been preserved. The Hellenistic translator of the Hebrew original would naturally render the text before him without any regard to what might have been its original form (xii. 22–25, εἰρήνη, κτήνη; xiv. 20, ἀδελφοί). On the other hand the absence of the name of the second king of Sparta in the first letter (1 Macc. xii. 20), and of both kings in the second (1 Macc. xiv. 20), is probably to be explained by the political circumstances under which the letters were written. The text of the first letter, as given by Josephus (*Ant.* xii. 4, § 10), contains some variations, and a very remarkable additional clause at the end. The second letter is apparently only a fragment.

4. The difficulty of fixing the date of the first correspondence is increased by the recurrence of the names involved. Two kings bore the name Areus, one of whom reigned B. C. 309–265, and the other, his grandson, died B. C. 257, being only eight years old. The same name was also borne by an adventurer, who occupied a prominent position at Sparta, cir. B. C. 184 (Polyb. xxiii. 11, 12). In Judæa, again, three high-priests bore the name Onias, the first of whom held office B. C. 330–309 (or 300); the second, B. C. 240–226; and the third, cir. B. C. 198–171. Thus Onias I. was for a short time contemporary with Areus I., and the correspondence has been commonly assigned to them (Palmer, *De Epist.* etc., Darmst. 1828; Grimm, on 1 Macc. xii.). But the position of Judæa at that time was not such as to make the contraction of foreign alliances a likely occurrence; and the special circumstances which are said to have directed the attention of the Spartan king to the Jews as likely to effect a diversion against Demetrius Poliorcetes when he was engaged in the war with Cassander, B. C. 302 (Palmer, quoted by Grimm, *l. c.*), are not completely satisfactory, even if the priesthood of Onias can be extended to the later date.

---

[a] Ewald (*Gesch.* iv. 276, 277, note) supposes that the letter was addressed to Onias II. during his mi-

Digitized by Google

This being so, Josephus is probably correct in fixing the event in the time of Onias III. (*Ant.* xii. 4, § 10). The last-named Areus may have assumed the royal title, if that is not due to an exaggerated translation, and the absence of the name of a second king is at once explained (Ussher, *Annales*, A. C. 183; Herzfeld, *Gesch. d. V. Isr.* i. 215–218). At the time when Jonathan and Simon made negotiations with Sparta, the succession of kings had ceased. The last absolute ruler was Nabis, who was assassinated in B. C. 192. (Wernsdorff, *De fide Lib. Macc.* §§ 93–112; Grimm, *l. c.*; Herzfeld, *l. c.* The early literature of the subject is given by Wernsdorff.) B. F. W.

**SPEAR.** [ARMS.]

**SPEARMEN** (δεξιολάβοι). The word thus rendered in the A. V. of Acts xxiii. 23 is of very rare occurrence, and its meaning is extremely obscure. Our translators followed the *lancearii* of the Vulgate, and it seems probable that their rendering approximates most nearly to the true meaning. The reading of the Codex Alexandrinus is δεξιοβόλοις, which is literally followed by the Peshitto-Syriac, where the word is translated "darters with the right hand." Lachmann adopts this reading, which appears also to have been that of the Arabic in Walton's Polyglot. Two hundred δεξιολάβοι formed part of the escort which accompanied St. Paul in the night-march from Jerusalem to Cæsarea. They are clearly distinguished both from the στρατιῶται, or heavy-armed legionaries, who only went as far as Antipatris, and from the ἱππεῖς, or cavalry, who continued the journey to Cæsarea. As nothing is said of the return of the δεξιολάβοι to Jerusalem after their arrival at Antipatris, we may infer that they accompanied the cavalry to Cæsarea, and this strengthens the supposition that they were irregular light-armed troops, so lightly armed, indeed, as to be able to keep pace on the march with mounted soldiers. Meyer (*Kommentar*, II. 3, s. 404, 2te Aufl.) conjectures that they were a particular kind of light-armed troops (called by the Romans *Velites*, or *Rorarii*), probably either javelin-men or slingers. In a passage quoted by the Emperor Constantine Porphyrogenneta (*Them.* i. 1) from John of Philadelphia, they are distinguished both from the archers and from the peltasts, or targeteers, and with these are described as forming a body of light-armed troops, who in the 10th century were under the command of an officer called a *turmarch*. Grotius, however, was of opinion that at this late period the term had merely been adopted from the narrative in the Acts, and that the usage in the 10th century is no safe guide to its true meaning. Others regard them as body-guards of the governor, and Meursius, in his *Glossarium Græco-barbarum*, supposes them to have been a kind of military lictors, who had the charge of arresting prisoners; but the great number (200) employed is against both these suppositions. In Suidas and the *Etymologicum Magnum* παραφύλαξ is given as the equivalent of δεξιολάβος. The word occurs again in one of the Byzantine historians, Theophylactus Simocatta (iv. 1), and is used by him of soldiers who were employed on skirmishing duty. It is probable, therefore, that the δεξιολάβοι were light-armed troops of some kind, but nothing is certainly known about them. W. A. W.

* SPED, Judg. v. 30 (from the A.-S. *spedan*) means "succeeded," i. e. as a warrior in battle The Bishops' Bible has in that place "found," i. e booty, hence literally = מָצָא. H

* SPELT. [RYE.]

**SPICE, SPICES.** Under this head it will be desirable to notice the following Hebrew words, *bâsâm*, *nêcôth*, and *sammîn*.

1. *Bâsâm*, *besem*, or *bôsem* (בָּשָׂם, בֶּשֶׂם, or בֹּשֶׂם : ἡδύσματα, θυμιάματα: *aromata*). The first-named form of the Hebrew term, which occurs only in Cant. v. 1, "I have gathered my myrrh with my spice," points apparently to some definite substance. In the other places, with the exception perhaps of Cant. i. 13, vi. 2, the words refer more generally to sweet aromatic odors, the principal of which was that of the balsam, or balm of Gilead; the tree which yields this substance is now generally admitted to be the *Amyris* (*Balsamodendron*) *opobalsamum*; though it is probable that other species of *Amyridaceæ* are included under the terms. The identity of the Hebrew name with the Arabic *Basham* (بَشَام) or *Balasân* (بلسان) leaves no reason to doubt that the substances are identical. The *Amyris opobalsamum* was observed by Forskâl near Mecca; it was

Balsam of Gilead (*Amyris Gileadensis*).

called by the Arabs *Abuscham*, i. e. "very odorous." But whether this was the same plant that was cultivated in the plains of Jericho, and celebrated throughout the world (Pliny, *H. N.* xii. 25; Theophrastus, *Hist. Plant.* ix. 6; Josephus, *Ant.* xv. 4, § 2; Strabo, xvi. 367; &c.), it is difficult to determine; but being a tropical plant, it

---

[1] ...ssity (B. C. 220–240), in the course of the wars with Demetrius

Digitized by Google

cannot be supposed to have grown except in the warm valleys of the S. of Palestine. The shrub mentioned by Burckhardt (*Trav.* p. 323) as growing in gardens near Tiberias, and which he was informed was the balsam, cannot have been the tree in question. The A. V. never renders *Bâsâm* by "balm"; it gives this word as the representative of the Hebrew *tzeri*, or *tzori* [BALM]. The form *Besem* or *Bôsem*, which is of frequent occurrence in the O. T., may well be represented by the general term of "spices," or "sweet odors," in accordance with the renderings of the LXX. and Vulg. The balm of Gilead tree grows in some parts of Arabia and Africa, and is seldom more than fifteen feet high, with straggling branches and scanty foliage. The balsam is chiefly obtained from incisions in the bark, but the substance is procured also from the green and ripe berries. The balsam orchards near Jericho appear to have existed at the time of Titus, by whose legions they were taken formal possession of, but no remains of

*Astragalus Tragacantha.*

this celebrated plant are now to be seen in Palestine. (See *Scripture Herbal*, p. 33.)

2. *Nĕcôth* (נְכֹאת: θυμίαμα: *aromata*). The company of Ishmaelitish merchants to whom Joseph was sold were on their way from Gilead to Egypt, with their camels bearing *nĕcôth*, *tzeri* [BALM], and *lôt* (*ladanum*) (Gen. xxxvii. 25); this same substance was also among the presents which Jacob sent to Joseph in Egypt (see Gen. xliii. 11). It is probable from both these passages that *nĕcôth*, if a name for some definite substance, was a product of Palestine, as it is named with other "best fruits of the land" the *lôt* in the former passage being the gum of the *Cistus creticus*, and not "myrrh," as the A. V. renders it. [MYRRH.] Various opinions have been formed as to what *nĕcôth* denotes, for which see Celsius, *Hierob.* i. 548, and Rosenmüller, *Schol. in Gen.* (l. c.); the most probable explanation is that which refers the word to the Arabic *naka'at* (نَكْعَة), *i. e.* "the gum obtained from the tragacanth" (*Astragalus*), three or four species of which genus are enumerated as occurring in Palestine; see Strand's *Flora Palæstina*, No 413–416. The gum is a natural exudation from the trunk and branches of the plant, which on being "exposed to the air grows hard, and is formed either into lumps or slender pieces curled and winding like worms, more or less long according as matter offers" (Tournefort, *Voyage*, i. 59, ed. Lond. 1741).

It is uncertain whether the word נָכֹת in 2 K. xx. 13; Is. xxxix. 2, denotes spice of any kind. The A. V. reads in the text "the house of his precious things," the margin gives "spicery," which has the support of the Vulg., Aq., and Symm. It is clear from the passages referred to that Hezekiah possessed a house or treasury of precious and useful vegetable productions, and that *nĕcôth* may in these places denote, though perhaps not exclusively, tragacanth gum. Keil (*Comment.* l. c.) derives the word from an unused root (נכה, "implevit loculum"), and renders it by "treasure."

3. *Sammîm* (סַמִּים: ἥδυσμα, ἡδυσμός, ἄρωμα, θυμίαμα: *suave fragrans, boni odoris, gratissimus aromata*). A general term to denote those aromatic substances which were used in the preparation of the anointing oil, the incense offerings, etc. The root of the word, according to Gesenius, is to be referred to the Arabic *Samm*, "olfecit," whence *Samûm*, "an odoriferous substance." For more particular information on the various aromatic substances mentioned in the Bible, the reader is referred to the articles which treat of the different kinds: FRANKINCENSE, GALBANUM, MYRRH, SPIKENARD, CINNAMON, etc.

The spices mentioned as being used by Nicodemus for the preparation of our Lord's body (John xix. 39, 40) are "myrrh and aloes," by which latter word must be understood, not the aloes of medicine (*Aloe*), but the highly-scented wood of the *Aquilaria agallochum* (but see ALOES, i. 71 f.). The enormous quantity of 100 lbs. weight of which St. John speaks, has excited the incredulity of some authors. Josephus, however, tells us that there were five hundred spicebearers at Herod's funeral (*Ant.* xvii. 8, § 3), and in the Talmud it is said that 80 lbs. of opobalsamum were employed at the funeral of a certain Rabbi; still there is no reason to conclude that 100 lbs. weight of pure myrrh and aloes was consumed; the words of the Evangelist imply a preparation (*μίγμα*) in which perhaps the myrrh and aloes were the principal or most costly aromatic ingredients; again, it must be remembered that Nicodemus was a rich man, and perhaps was the owner of large stores of precious substances; as a constant though timid disciple of our Lord, he probably did not scruple at any sacrifice so that he could show his respect for Him.

W. H.

**SPIDER.** The representative in the A. V. of the Hebrew words *'accâbîsh* and *semâmîth*.

1. *'Accâbîsh* (עַכָּבִישׁ: ἀράχνη: *aranea*) occurs in Job viii. 14, where of the ungodly (A. V. hypocrite) it is said his "hope shall be cut off, and his trust shall be the house of an *'accâbîsh*," and in Is. lix. 5, where the wicked Jews are allegorically said to "weave the web of the *'accâbîsh*." There is no doubt of the correctness of our translation in rendering this word "spider." In the two pas-

Digitized by Google

sages quoted above, allusion is made to the fragile nature of the spider's web, which, though admirably suited to fulfill all the requirements of the animal, is yet most easily torn by any violence that may be offered to it. In the passage in Is. (*l. c.*), however, there is probably allusion also to the lurking habits of the spider for his prey: "The wicked hatch viper's eggs and weave the spider's web . . . their works are works of iniquity, wasting and destruction are in their paths." We have no information as to the species of *Araneidæ* that occur in Palestine, but doubtless this order is abundantly represented.

2. *Sĕmâmîth* (שְׁמָמִית: καλαβώτης: *stellio*), wrongly translated by the A. V. "spider" in Prov. xxx. 28, the only passage where the word is found, has reference, it is probable, to some kind of lizard (Bochart, *Hieroz.* ii. 510). The *sĕmâmîth* is mentioned by Solomon as one of the four things that are exceeding clever, though they be little upon earth. "The *sĕmâmîth* taketh hold with her hands, and is in kings' palaces." This term exists in the modern Greek language under the form σαμιάμιν-θος. "Quem Græci hodie σαμιάμινθον vocant, antiquæ Græciæ est ἀσκαλαβώτης, id est stellio — quæ vox pura Hebraica est et reperitur in Prov. cap. xxx. 28, שְׁמָמִית" (Salmasii *Plin. Exercit.* p. 817, b. G.). The lizard indicated is evidently some species of Gecko, some notice of which genus of animals is given under the article LIZARD, where the *letâêh* was referred to the *Ptyodactylus Gecko*. The *sĕmâmîth* is perhaps another species.

W. H.

SPIKENARD (נֵרְדְּ, *nêrd*: νάρδος: *nardus*). We are much indebted to the late lamented Dr. Royle for helping to clear up the doubts that had long existed as to what particular plant furnished the aromatic substance known as "spikenard." Of this substance mention is made twice in the O. T., namely, in Cant. i. 12, where its sweet odor is alluded to, and in iv. 13, 14, where it is enumerated with various other aromatic substances which were imported at an early age from Arabia or India and the far East. The ointment with which our Lord was anointed as He sat at meat in Simon's house at Bethany consisted of this precious substance, the costliness of which may be inferred from the indignant surprise manifested by some of the witnesses of the transaction (see Mark xiv. 3–5; John xii. 3–5). With this may be compared Horace, 4 *Carm.* xii. 16, 17 —

"Nardo vina merebere.
Nardi parvus onyx eliciet cadum."

Dioscorides speaks of several kinds of νάρδος, and gives the names of various substances which composed the ointment (i. 77). The Hebrew *nêrd*, according to Gesenius, is of Indian origin, and signifies the *stalk* of a plant; hence one of the Arabic names given by Avicenna as the equivalent of nard is *sunbul*, "spica;" comp. the Greek νάρδόσταχυς, and our "*spike*nard." But whatever may be the derivation of the Heb. נֵרְדְּ, there is no doubt that *sunbul* is by Arabian authors used as the representative of the Greek *nardos*, as Sir Wm. Jones has shown (*Asiat. Res.* ii. 416). It appears, however, that this great oriental scholar was unable to obtain the plant from which the drug is procured, a wrong plant having been sent him by Roxburgh. Dr. Royle, when director of the E. I. Company's botanic garden at Saharunpore, about 30 miles from the foot of the Himalayan Mountains, having ascertained that the *jatamansee*, one of the Hindu synonyms for the *sunbul*, was annually brought from the mountains overhanging the Ganges and Jumna rivers down to the plains, purchased some of these fresh roots and planted them in the botanic garden. They produced the same plant which in 1825 had been described by Don from specimens sent by Dr. Wallich from Nepal, and named by him *Patrinia jatamansi* (see the *Prodromus Floræ Nepalensis*, etc., *accedunt plantæ a Wallichio nuperius missæ*, Lond. 1825). The identity of the *jatamansi* with the *Sunbul hindee* of the Arabs is established beyond a doubt by the form of a portion of the rough stem of the plant, which the Arabs describe as being like the tail of an ermine (see wood-cut). This plant, which has been called *Nar-*

Spikenard.

*dostachys jatamansi* by De Candolle, is evidently the kind of *nardos* described by Dioscorides (i. 6 under the name of γαγγῖτις, *i. e.*, "the Ganges nard." Dioscorides refers especially to its having many shaggy (πολυτόμους) spikes growing from one root. It is very interesting to note that Dioscorides gives the same locality for the plant as is mentioned by Royle, ἀπό τινος ποταμοῦ παραῤῥέοντος τοῦ ὄρους, Γάγγου καλουμένου παρ' ᾧ φύεται: though he is here speaking of lowland specimens, he also mentions plants obtained from the mountains.

W. H.

SPINNING (טָוָה: νήθειν). The notices of spinning in the Bible are confined to Ex. xxxv 25, 26; Matt. vi. 28; and Prov. xxxi. 19. The latter passage implies (according to the A. V.) the use of the same instruments which have been in vogue for hand-spinning down to the present day namely, the distaff and spindle. The distaff, however, appears to have been dispensed with, and the term [a] so rendered means the spindle itself, while that rendered "spindle" [b] represents the *whirl* (*verticillus*, Plin. xxxvii. 11) of the spindle, a button or circular rim which was affixed to it, and gave steadiness to its circular motion. The "whirl"

[a] פֶּלֶךְ. [b] פְּישׁוֹר.

Digitized by Google

of the Syrian women was made of amber in the time of Pliny (*l. c.*). The spindle was held perpendicularly in the one hand, while the other was employed in drawing out the thread. The process is exhibited in the Egyptian paintings (Wilkinson, ii. 85). Spinning was the business of women, both among the Jews (Ex. *l. c.*), and for the most part among the Egyptians (Wilkinson, ii. 84).

W. L. B.

**SPIRIT, THE HOLY.** In the O. T. He is generally called רוּחַ אֱלֹהִים, or רוּחַ יְהוָה, the Spirit of God, the Spirit of Jehovah; sometimes the Holy Spirit of Jehovah, as Ps. li. 11; Is. lxiii. 10, 11; or the Good Spirit of Jehovah, as Ps. cxliii. 10; Neh. ix. 20. In the N. T. He is generally τὸ πνεῦμα τὸ ἅγιον, or simply τὸ πνεῦμα, the Holy Spirit, the Spirit; sometimes the Spirit of God, of the Lord, of Jesus Christ, as in Matt. iii. 16; Acts v. 9; Phil. i. 19, &c.

In accordance with what seems to be the general rule of Divine Revelation, that the knowledge of heavenly things is given more abundantly and more clearly in later ages, the person, attributes, and operations of the Holy Ghost are made known to us chiefly in the New Testament. And in the light of such later revelation, words which when heard by patriarchs and prophets were probably understood imperfectly by them, become full of meaning to Christians.

In the earliest period of Jewish history the Holy Spirit was revealed as coöperating in the creation of the world (Gen. i. 2), as the Source, Giver, and Sustainer of life (Job xxvii. 3, xxxiii. 4; Gen. ii. 7); as resisting (if the common interpretation be correct) the evil inclinations of men (Gen. vi. 3); as the Source of intellectual excellence (Gen. xli. 38; Deut. xxxiv. 9); of skill in handicraft (Ex. xxviii. 3, xxxi. 3, xxxv. 31); of supernatural knowledge and prophetic gifts (Num. xxiv. 2); of valor and those qualities of mind or body which give one man acknowledged superiority over others (Judg. iii. 10, vi. 34, xi. 29, xiii. 25).

In that period which began with Samuel, the effect of the Spirit coming on a man is described in the remarkable case of Saul as change of heart (1 Sam. x. 6, 9), shown outwardly by prophesying (1 Sam. x. 10; comp. Num. xi. 25, and 1 Sam. xix. 20). He departs from a man whom He has once changed (1 Sam. xvi. 14). His departure is the departure of God (xvi. 14, xviii. 12, xxviii. 15). His presence is the presence of God (xvi. 13, xviii. 12). In the period of the Kingdom the operation of the Spirit was recognized chiefly in the inspiration of the prophets (see Witsius, *Miscellanea Sacra*, lib. i.; J. Smith's *Select Discourses*, p. 6, *Of Prophecy*; Knobel, *Prophetismus der Hebräer*). Separated more or less from the common occupations of men to a life of special religious exercise (Bp. Bull's *Sermons*, x. p. 187, ed. 1840), they were sometimes workers of miracles, always foretellers of future events, and guides and advisers of the social and political life of the people who were contemporary with them (2 K. ii. 9; 2 Chr. xxiv. 20; Neh. ix. 30, &c.). In their writings are found abundant predictions of the ordinary operations of the Spirit which were to be most frequent in later times, by which holiness, justice, peace, and consolation were to be spread throughout the world (Is. xi. 2, xlii. 1, lxi. 1, &c.).

Even after the closing of the canon of the O. T. the presence of the Holy Spirit in the world continued to be acknowledged by Jewish writers (Wünsche, i. 7, ix. 17; Philo, *De Gigant.* 5; and see Ridley *Moyer Lectures*, Serm. ii. p. 81, &c.).

In the N. T., both in the teaching of our Lord and in the narratives of the events which preceded his ministry and occurred in its course, the existence and agency of the Holy Spirit are frequently revealed, and are mentioned in such a manner as shows that these facts were part of the common belief of the Jewish people at that time. Theirs was, in truth, the ancient faith, but more generally entertained, which looked upon prophets as inspired teachers, accredited by the power of working signs and wonders (see Nitzsch, *Christl. Lehre*, § 84). It was made plain to the understanding of the Jews of that age that the same Spirit who wrought of old amongst the people of God was still at work. "The Dove forsook the ark of Moses and fixed its dwelling in the Church of Christ" (Bull, *On Justification*, Diss. ii. ch. xi. § 7). The gifts of miracles, prediction, and teaching, which had cast a fitful lustre on the times of the great Jewish prophets, were manifested with remarkable vigor in the first century after the birth of Christ. Whether in the course of eighteen hundred years miracles and predictions have altogether ceased, and, if so, at what definite time they ceased, are questions still debated among Christians. On this subject reference may be made to Dr. Conyers Middleton's *Free Enquiry into the Miraculous Powers of the Christian Church*; Dr. Brooke's *Examination of Middleton's Free Enquiry*; W. Dodwell's *Letter to Middleton*; Bp. Douglas's *Criterion*; J. H. Newman's *Essay on Miracles*, etc. With respect to the gifts of teaching bestowed both in early and later ages, compare Neander, *Planting of Christianity*, b. iii. ch. v., with Horsley, *Sermons*, xiv., Potter, *On Church Government*, ch. v., and Hooker, *Eccl. Polity*, v. 72, §§ 5–8.

The relation of the Holy Spirit to the Incarnate Son of God (see Oxford translation of *Treatises of Athanasius*, p. 196, note *d*) is a subject for reverent contemplation rather than precise definition. By the Spirit the redemption of mankind was made known, though imperfectly, to the prophets of old (2 Pet. i. 21), and through them to the people of God. And when the time for the Incarnation had arrived, the miraculous conception of the Redeemer (Matt. i. 18) was the work of the Spirit; by the Spirit He was anointed in the womb or at baptism (Acts x. 38; cf. Pearson, *On the Creed*, Art. ii. p. 126, ed. Oxon. 1843); and the gradual growth of his perfect human nature was in the Spirit (Luke ii. 40, 52). A visible sign from heaven showed the Spirit descending on and abiding with Christ, whom He thenceforth filled and led (Luke iv. 1), coöperating with Christ in his miracles (Matt. xii. 18). The multitude of disciples are taught to pray for and expect the Spirit as the best and greatest boon they can seek (Luke xi. 13). He inspires with miraculous powers the first teachers whom Christ sends forth, and He is repeatedly promised and given by Christ to the Apostles (Matt. x. 20, xii. 28; John xiv. 16, xx. 22; Acts i. 8).

Perhaps it was in order to correct the grossly defective conceptions of the Holy Spirit which prevailed commonly among the people, and to teach them that this is the most awful possession of the heirs of the kingdom of heaven, that our Lord himself pronounced the strong condemnation of blasphemers of the Holy Ghost (Matt. xii. 31

Digitized by Google

this has roused in every age the susceptibility of tender consciences, and has caused much inquiry to be made as to the specific character of the sin so denounced, and of the human actions which fall under so terrible a ban. On the one hand it is argued that no one now occupies the exact position of the Pharisees whom our Lord condemned, for they had not entered into covenant with the Holy Spirit by baptism; they did not merely disobey the Spirit, but blasphemously attributed his works to the devil; they resisted not merely an inward motion but an outward call, supported by the evidence of miracles wrought before their eyes. On the other hand, a morbid conscience is prone to apprehend the unpardonable sin in every, even unintentional, resistance of an inward motion which may proceed from the Spirit. This subject is referred to in Article XVI. of the Church of England, and is discussed by Burnet, Beveridge, and Harold Browne, in their *Expositions of the Articles*. It occupies the greater part of Athanasius' *Fourth Epistle to Serapion*, cc. 8–22 (sometimes printed separately as a Treatise on Matt. xii. 31). See also Augustine, *Ep. ad Rom. Expositio inchoata*, §§ 14–23, tom. iii. pt. 2, p. 933. Also Odo Cameracensis (A. D. 1113), *De Blasphemia in Sp. Sanctum*, in Migne's *Patrologia Lat.* vol. 163; J. Denison (A. D. 1611), *The Sin against the Holy Ghost;* Waterland's *Sermons*, xxvii. in *Works*, vol. v. p. 706; Jackson, *On the Creed*, bk. viii. ch. iii. p. 770.

But the Ascension of our Lord is marked (Eph. iv. 8; John vii. 39, &c.) as the commencement of a new period in the history of the inspiration of men by the Holy Ghost. The interval between that event and the end of the world is often described as the Dispensation of the Spirit. It was not merely (as Didymus Alex. *De Trinitate*, iii. 34, p. 431, and others have suggested) that the knowledge of the Spirit's operations became more general among mankind. It cannot be allowed (though Bp. Heber, *Lectures*, viii. 514 and vii. 488, and Warburton have maintained it) that the Holy Spirit has sufficiently redeemed his gracious promise to every succeeding age of Christians only by presenting us with the New Testament. Something more was promised, and continues to be given. Under the old dispensation the gifts of the Holy Spirit were uncovenanted, not universal, intermittent, chiefly external. All this was changed. Our Lord, by ordaining (Matt. xxviii. 19) that every Christian should be baptized in the name of the Holy Ghost, indicated at once the absolute necessity from that time forth of a personal connection of every believer with the Spirit; and (in John xvi. 7–15) He declares the internal character of the Spirit's work, and (in John xiv. 16, 17, &c.) his permanent stay. And subsequently the Spirit's operations under the new dispensation are authoritatively announced as universal and internal in two remarkable passages (Acts ii. 16–21; Heb. viii. 8–12). The different relations of the Spirit to believers severally under the old and new dispensation are described by St. Paul under the images of a master to a servant, and a father to a son (Rom. iii. 15); so much deeper and more intimate is the union, so much higher the position (Matt. xi. 11) of a believer, in the later stage than in the earlier (see J. G. Walchius, *Miscellanea Sacra*, p. 763, *De Spiritu Adoptionis*, and the opinions collected in note H in Hare's *Mission of the Comforter*, vol ii. p. 433). The rite of imposition of hands, not only on teachers, but also on ordinary Christians, which has been used in the Apostolic (Acts vi. 6, xiii. 3, xix. 6, &c.) and in all subsequent ages, is a testimony borne by those who come under the new dispensation to their belief of the reality, permanence, and universality of the gift of the Spirit.

Under the Christian dispensation it appears to be the office of the Holy Ghost to enter into and dwell within every believer (Rom. viii. 9, 11; 1 John iii. 24). By Him the work of Redemption is (so to speak) appropriated and carried out to its completion in the case of every one of the elect people of God. To believe, to profess sincerely the Christian faith, and to walk as a Christian, are his gifts (2 Cor. iv. 13; 1 Cor. xii. 3; Gal. v. 18) to each person severally; not only does He bestow the power and faculty of acting, but He concurs (1 Cor. iii. 9; Phil. ii. 13) in every particular action so far as it is good (see South's *Sermons*, xxxv., vol. ii. p. 292). His inspiration brings the true knowledge of all things (1 John ii. 27). He unites the whole multitude of believers into one regularly organized body (1 Cor. xii., and Eph. iv, 4–16). He is not only the source of light to us on earth (2 Cor. iii. 6; Rom. viii. 2), but also the power by whom God raises us from the dead (Rom. viii. 11). All Scripture, by which men in every successive generation are instructed and made wise unto salvation, is inspired by Him (Eph. iii. 5; 2 Tim. iii. 16; 2 Pet. i. 21); He coöperates with suppliants in the utterance of every effectual prayer that ascends on high (Eph. ii. 18, vi. 18; Rom. viii. 26); He strengthens (Eph. iii. 16), sanctifies (2 Thes. ii. 13), and seals the souls of men unto the day of completed redemption (Eph i. 13, iv. 30).

That this work of the Spirit is a real work, and not a mere imagination of enthusiasts, may be shown (1) from the words of Scripture to which reference has been made, which are too definite and clear to be explained away by any such hypothesis; (2) by the experience of intelligent Christians in every age, who are ready to specify the marks and tokens of his operation in themselves, and even to describe the manner in which they believe He works, on which see Barrow's *Sermons*, lxxvii. and lxxviii., towards the end; Waterland's *Sermons*, xxvi., vol. v. p. 686; (3) by the superiority of Christian nations over heathen nations, in the possession of those characteristic qualities which are gifts of the Spirit, in the establishment of such customs, habits, and laws as are agreeable thereto, and in the exercise of an enlightening and purifying influence in the world. Christianity and civilization are never far asunder: those nations which are now eminent in power and knowledge are all to be found within the pale of Christendom, not indeed free from national vices, yet on the whole manifestly superior both to contemporary unbelievers and to Paganism in its ancient palmy days. (See Hare's *Mission of the Comforter*, Serm. 6, vol. i. p. 202; Porteus on the *Beneficial Effects of Christianity on the Temporal Concerns of Mankind*, in *Works*, vol. vi. pp. 375–460.)

It has been inferred from various passages of Scripture that the operations of the Holy Spirit are not limited to those persons who either by circumcision or by baptism have entered into covenant with God. Abimelech (Gen. xx. 3), Melchizedek (xiv. 18), Jethro (Ex. xviii. 12), Balaam (Num. xxii. 9), and Job in the O. T.; and the Magi

Digitized by Google

(Matt. ii. 12) and the case of Cornelius, with the declaration of St. Peter (Acts x. 35) thereon, are instances showing that the Holy Spirit bestowed his gifts of knowledge and holiness in some degree even among heathen nations; and if we may go beyond the attestation of Scripture, it might be argued from the virtuous actions of some heathens, from their ascription of whatever good was in them to the influence of a present Deity (see the references in Heber's *Lectures*, vi. 446), and from their tenacious preservation of the rite of animal sacrifice, that the Spirit whose name they knew not must have girded them, and still girds such as they were, with secret blessedness.

Thus far it has been attempted to sketch briefly the work of the Holy Spirit among men in all ages as it is revealed to us in the Bible. But after the closing of the canon of the N. T. the religious subtilty of oriental Christians led them to scrutinize, with the most intense accuracy, the words in which God has, incidentally as it were, revealed to us something of the mystery of the Being of the Holy Ghost. It would be vain now to condemn the superfluous and irreverent curiosity with which these researches were sometimes prosecuted, and the scandalous contentions which they caused. The result of them was the formation and general acceptance of certain statements as inferences from Holy Scripture which took their place in the established creeds and in the teaching of the Fathers of the Church, and which the great body of Christians throughout the world continue to adhere to, and to guard with more or less vigilance.

The Sadducees are sometimes mentioned as preceding any professed Christians in denying the personal existence of the Holy Ghost. Such was the inference of Epiphanius (*Hæres.* xli.), Gregory Nazianzen (*Oratio*, xxxi. § 5, p. 558, ed. Ben.), and others, from the testimony of St. Luke (Acts xxiii. 8). But it may be doubted whether the error of the Sadducees did not rather consist in asserting a corporeal Deity. Passing over this, in the first youthful age of the Church, when, as Neander observes (*Ch. Hist.* ii. 327, Bohn's ed.), the power of the Holy Spirit was so mightily felt as a new creative, transforming principle of life, the knowledge of this Spirit, as identical with the Essence of God, was not so thoroughly and distinctly impressed on the understanding of Christians. Simon Magus, the Montanists, and the Manicheans, are said to have imagined that the promised Comforter was personified in certain human beings. The language of some of the primitive Fathers, though its deficiencies have been greatly exaggerated, occasionally comes short of a full and complete acknowledgment of the Divinity of the Spirit. Their opinions are given in their own words, with much valuable criticism, in Dr. Burton's *Testimonies of the Ante-Nicene Fathers to the Doctrine of the Trinity and the Divinity of the Holy Ghost* (1831). Valentinus believed that the Holy Spirit was an angel. The Sabellians denied that He was a distinct Person from the Father and the Son. Eunomius, with the Anomœans and the Arians, regarded Him as a created Being. Macedonius, with his followers the Pneumatomachi, also denied his Divinity, and regarded Him as a created Being attending on the Son. His procession from the Son as well as from the Father was the great point of controversy in the Middle Ages. In modern times the Socinians and Spinoza have altogether denied the Personality, and have regarded Him as an influence or power of the Deity. It must suffice in this article to give the principal texts of Scripture in which these erroneous opinions are contradicted, and to refer to the principal works in which they are discussed at length. The documents in which various existing communities of Christians have stated their belief are specified by G. B. Winer (*Comparative Darstellung des Lehrbegriffs*, etc., pp. 41 and 80).

The Divinity of the Holy Ghost is proved by the fact that He is called God. Compare 1 Sam. xvi. 13 with xviii. 12; Acts v. 3 with v. 4; 2 Cor. iii. 17 with Ex. xxxiv. 34; Acts xxviii. 25 with Is. vi. 8; Matt. xii. 28 with Luke xi. 20; 1 Cor. iii. 16 with vi. 19. The attributes of God are ascribed to Him. He creates, works miracles, inspires prophets, is the Source of holiness (see above), is everlasting (Heb. ix. 14), omnipresent, and omniscient (Ps. cxxxix. 7; and 1 Cor. ii. 10).

The personality of the Holy Ghost is shown by the actions ascribed to Him. He hears and speaks (John xvi. 13; Acts x. 19, xiii. 2, &c.). He wills and acts on his decision (1 Cor. xii. 11). He chooses and directs a certain course of action (Acts xv. 28). He knows (1 Cor. ii. 11). He teaches (John xiv. 26). He intercedes (Rom. viii. 26). The texts 2 Thes. iii. 5, and 1 Thes. iii. 12, 13. are quoted against those who confound the three persons of the Godhead.

The procession of the Holy Ghost from the Father is shown from John xiv. 26, xv. 26, &c. The tenet of the Western Church that He proceeds from the Son is grounded on John xv. 26, xvi. 7; Rom. viii. 9; Gal. iv. 6; Phil. i. 19; 1 Pet. i. 11; and on the action of our Lord recorded by St. John xx. 22. The history of the long and important controversy on this point has been written by Pfaff, by J. G. Walchius, *Historia Controversiæ de Processione*, 1751, and by Neale, *History of the Eastern Church*, ii. 1093.

Besides the *Expositions of the Thirty-nine Articles* referred to above, and Pearson, *On the Creed*, art. viii., the work of Barrow (*De Spiritu Sancto*) contains an excellent summary of the various heresies and their confutation. The following works may be consulted for more detailed discussion: Athanasius, *Epistolæ IV. ad Serapionem*; Didymus Alex. *De Spiritu Sancto*; Basil the Great, *De Spiritu Sancto*, and *Adversus Eunomium*; Gregory Nazianzen, *Orationes de Theologia*; Gregory of Nyssa, *Contra Eunomium*, lib. xiii.; Ambrose, *De Spiritu Sancto*, lib. iii.; Augustine, *Contra Maximinum*, and *De Trinitate*; Paschasius Diaconus, *De Spiritu Sancto*; Isidorus, Hisp. *Etymologia*, vii. 3, *De Spiritu Sancto*; Ratramnus Corbeiensis, *Contra Græcorum*, etc., lib. iv.; Alcuin, P. Damian, and Anselm, *De Processione*; Aquinas, *Sum. Theol.* i. 36–43; Owen, *Treatise on the Holy Spirit*; J. Howe, *Office and Works of the Holy Spirit*; W. Clagett, *On the Operations of the Spirit*, 1678; M. Hole, *On the Gifts and Graces of the H. S.*; Bp. Warburton, *Doctrine of Grace*; Gl. * **SPOIL**, as a verb = *despoil* or *plunder* (Gen. xxxiv. 27, 29; Ex. iii. 22; Col. ii. 8, &c.), like *spoliare* in Latin. H.

* **SPOILER** = *plunderer* (Judg. ii. 14; Jer. vi. 26, vii. 12, &c.). [SPOIL.] H.

**SPONGE** (σπόγγος: *spongia*) is mentioned only in the N. T. in those passages which relate the incident of "a sponge filled with vinegar and put on a reed" (Matt. xxvii. 48; Mark xv. 36), or "on hyssop" (John xix. 29), being offered to our Lord on the cross. The commercial value of the sponge was known from very early times; and although there appears to be no notice of it in the O. T., yet it is probable that it was used by the ancient Hebrews, who could readily have obtained it good from the Mediterranean. Aristotle mentions several kinds, and carefully notices those which were useful for economic purposes (*Hist. Anim.* v. 14). His speculations on the nature of the sponge are very interesting. W. H.

**SPOUSE.** [MARRIAGE.]

**STA'CHYS** (Στάχυς [*ear of corn*]: *Stachys*). A Christian at Rome, saluted by St. Paul in the Epistle to the Romans (xvi. 9). The name is Greek. According to a tradition recorded by Nicephorus Callistus (*H. E.* viii. 6) he was appointed bishop of Byzantium by St. Andrew, held the office for sixteen years, and was succeeded by Onesimus.

* **STALL.** [CRIB; MANGER.]

**STACTE** (נָטָף, *nâṭâf*: στακτή: *stacte*), the name of one of the sweet spices which composed the holy incense (see Ex. xxx. 34). The Hebrew word occurs once again (Job xxxvi. 27), where it is used to denote simply "a drop" of water. For the various opinions as to what substance is intended by *nâṭâf*, see Celsius (*Hierob.* i. 529); Rosenmüller (*Bib. Bot.* p. 164) identifies the *nâṭâf* with the gum of the storax tree (*Styrax officinale*); the LXX. στακτή (from στάζω, "to drop") is the exact translation of the Hebrew word. Now Dioscorides describes two kinds of στακτή: one is the fresh gum of the myrrh tree (*Balsamodendron myrrha*) mixed with water and squeezed out through a press (i. 74); the other kind, which he calls, from the manner in which it is prepared, σκευαστὴ στύραξ, denotes the resin of the storax adulterated with wax and fat. The true stacte of the Greek writers points to the distillation from the myrrh tree, of which, according to Theophrastus (*Fr.* iv. 29, ed. Schneider), both a natural and an artificial kind were known; this is the *môr dĕrôr* (מוֹר דְּרוֹר) of Ex. xxx. 23. Perhaps the *nâṭâf* denotes the *storax* gum; but all that is positively known is that it signifies an odorous distillation from some plant. For some account of the styrax tree see under POPLAR. W. H.

**STANDARDS.** [ENSIGN.]

* **STARGAZERS.** [MAGI; and see the next article.]

**STAR OF THE WISE MEN.** Until the last few years the interpretation of St. Matt. ii. 1–12, by theologians in general, coincided in the main with that which would be given to it by any person of ordinary intelligence who read the account with due attention. Some supernatural light resembling a star had appeared in some country (possibly Persia) far to the east of Jerusalem, to men who were versed in the study of celestial phenomena, conveying to their minds a supernatural impulse to repair to Jerusalem, where they would find a new-born king. It supposed them to be followers, and possibly priests, of the Zend religion, whereby they were led to expect a Redeemer in the person of the Jewish infant. On arriving at Jerusalem, after diligent inquiry and consultation with the priests and learned men who could naturally best inform them, they are directed to proceed to Bethlehem. The star which they had seen in the east reappeared to them and preceded them (προῆγεν αὐτούς), until it took up its station over the place where the young child was (ἕως ἐλθὼν ἐστάθη ἐπάνω οὗ ἦν τὸ παιδίον). The whole matter, that is, was supernatural; forming a portion of that divine prearrangement, whereby, in his deep humiliation among men, the child Jesus was honored and acknowledged by the Father, as his beloved Son in whom He was well pleased. Thus the lowly shepherds who kept their nightly watch on the hills near to Bethlehem, together with all that remained of the highest and best philosophy of the East, are alike the partakers and the witnesses of the glory of Him who was "born in the city of David, a Saviour which is Christ the Lord." Such is substantially the account which, until the earlier part of the present century would have been given by orthodox divines, of the Star of the Magi. Latterly, however, a very different opinion has gradually become prevalent upon the subject. The star has been displaced from the category of the supernatural, and has been referred to the ordinary astronomical phenomenon of a conjunction of the planets Jupiter and Saturn. The idea originated with Kepler, who, among many other brilliant but untenable fancies, supposed that if he could identify a conjunction of the above-named planets with the Star of Bethlehem he would thereby be able to determine, on the basis of certainty, the very difficult and obscure point of the Annus Domini. Kepler's suggestion was worked out with great care and at

Digitized by Google

very great inaccuracy by Dr. Ideler of Berlin, and the results of his calculations certainly do, on the first impression, seem to show a very specious accordance with the phenomena of the star in question. We purpose, then, in the first place, to state what celestial phenomena did occur with reference to the planets Jupiter and Saturn, at a date assuredly not very distant from the time of our Saviour's birth; and then to examine how far they fulfill, or fail to fulfill, the conditions required by the narrative in St. Matthew.

In the month of May, B. C. 7, a conjunction of the planets Jupiter and Saturn occurred, not far from the first point of Aries, the planets rising in Chaldæa about 3½ hours before the sun. It is said that on astrological grounds such a conjunction could not fail to excite the attention of men like the Magi, and that in consequence partly of their knowledge of Balaam's prophecy, and partly from the uneasy persuasion then said to be prevalent that some great one was to be born in the East, these Magi commenced their journey to Jerusalem. Supposing them to have set out at the end of May B. C. 7 upon a journey for which the circumstances will be seen to require at least seven months, the planets were observed to separate slowly until the end of July, when their motions becoming retrograde, they again came into conjunction by the end of September. At that time there can be no doubt Jupiter would present to astronomers, especially in so clear an atmosphere,[a] a magnificent spectacle. It was then at its most brilliant apparition, for it was at its nearest approach both to the sun and to the earth. Not far from it would be seen its duller and much less conspicuous companion Saturn. This glorious spectacle continued almost unaltered for several days, when the planets again slowly separated, then came to a halt, when, by reassuming a direct motion, Jupiter again approached to a conjunction for the third time with Saturn, just as the Magi may be supposed to have entered the Holy City. And, to complete the fascination of the tale, about an hour and a half after sunset, the two planets might be seen from Jerusalem, hanging as it were in the meridian, and suspended over Bethlehem in the distance. These celestial phenomena thus described are, it will be seen, beyond the reach of question, and at the first impression they assuredly appear to fulfill the conditions of the Star of the Magi.

The first circumstance which created a suspicion to the contrary, arose from an exaggeration, unaccountable for any man having a claim to be ranked among astronomers, on the part of Dr. Ideler himself, who described the two planets as wearing the appearance of one bright but diffused light *to persons having weak eyes.* "*So dass für ein schwaches Auge der eine Planet fast in den Zertreuungskreis des andern trat, mithin beide als ein einziger Stern erscheinen konnten,*" p. 407, vol. ii. Not only is this imperfect eyesight inflicted upon the Magi, but it is quite certain that had they possessed any remains of eyesight at all, they could not have failed to see, not a single star, but two planets, at the very considerable distance of double the moon's apparent diameter. Had they been even twenty times closer, the duplicity of the two stars must have been apparent; Saturn, moreover, rather confusing than adding to the brilliance of his companion. This forced blending of the two lights into one by Ideler was still further improved by Dean Alford, in the first edition of his very valuable and suggestive Greek Testament, who indeed restores ordinary sight to the Magi, but represents the planets as forming a single star of surpassing brightness, although they were certainly at more than double the distance of the sun's apparent diameter. Exaggerations of this description induced the writer of this article to undertake the very formidable labor of calculating afresh an *ephemeris* of the planets Jupiter and Saturn, and of the sun, from May to December B. C. 7. The result was to confirm the fact of there being three conjunctions during the above period, though somewhat to modify the dates assigned to them by Dr. Ideler. Similar results, also, have been obtained by Encke, and the December conjunction has been confirmed by the Astronomer-Royal; no celestial phenomena, therefore, of ancient date are so certainly ascertained as the conjunctions in question. We shall now proceed to examine to what extent, or, as it will be seen, to how slight an extent the December conjunction fulfills the conditions of the narrative of St. Matthew. We can hardly avoid a feeling of regret at the dissipation of so fascinating an illusion: but we are in quest of the truth, rather than of a picture, however beautiful.

(*a.*) The writer must confess himself profoundly ignorant of any system of astrology; but supposing that some system did exist, it nevertheless is inconceivable that solely on the ground of astrological reasons men would be induced to undertake a seven months' journey. And as to the widely-spread and prevalent expectation of some powerful personage about to show himself in the East, the fact of its existence depends on the testimony of Tacitus, Suetonius, and Josephus. But it ought to be very carefully observed that all these writers speak of this expectation as applying to Vespasian, in A. D. 69, which date was seventy-five years, or two generations after the conjunctions in question! The well-known and often quoted words of Tacitus are "eo ipso tempore;" of Suetonius, "eo tempore;" of Josephus, "κατὰ τὸν καιρὸν ἐκεῖνον;" all pointing to A. D. 69, and not to B. C. 7. Seeing, then, that these writers refer to no general uneasy expectation as prevailing in B. C. 7, it can have formed no reason for the departure of the Magi. And, furthermore, it is quite certain that in the February of B. C. 66 (Pritchard, in *Trans. R. Ast. Soc.* vol. XXV.), a conjunction of Jupiter and Saturn occurred in the constellation *Pisces*, closer than the one on December 4, B. C. 7. If, therefore, astrological reasons alone impelled the Magi to journey to Jerusalem in the latter instance, similar considerations would have impelled their fathers to take the same journey fifty-nine years before.

(*b.*) But even supposing the Magi did undertake the journey at the time in question, it seems impossible that the conjunction of December, B. C. 7 can on any reasonable grounds be considered as fulfilling the conditions in St. Matt. ii 9. The circumstances are as follows: On December 4, the sun set at Jerusalem at 5 p. m. Supposing the Magi to have then commenced their journey to Bethlehem, they would first see Jupiter and his dull and somewhat distant companion 1½ hour distant from the meridian, in a S. E. direction, and decidedly to the east of Bethlehem. By the time they came to Rachel's tomb (see Robinson's *Bibl. Res.* ii. 168

[a] The atmosphere in parts of Persia is so transparent that the Magi may have seen the satellites of Jupiter with their naked eyes.

Digitized by Google

the planets would be due south of them, on the meridian, and no longer over the hill of Bethlehem (see the maps of Van de Velde and of Tobler), for that village (see Robinson, as above) bears from Rachel's tomb S. 5° E. + 8° declension = S. 13° E. The road then takes a turn to the east, and ascends the hill near to its western extremity; the planets therefore would now be on their right hands, and a little *behind* them: the "star," therefore, ceased altogether to go "before them" as a guide. Arrived on the hill and in the village, it became physically impossible for the star to stand over any house whatever close to them, seeing that it was now visible far away beyond the hill to the west, and far off in the heavens at an altitude of 57°. As they advanced, the star would of necessity recede, and under no circumstances could it be said to stand "over" ("*ἐπάνω*") any house, unless at the distance of miles from the place where they were. Thus the two heavenly bodies altogether fail to fulfill either of the conditions implied in the words "*προῆγεν αὐτούς*" or "*ἐστάθη ἐπάνω.*" A star, if vertical, would appear to stand over any house or object to which a spectator might chance to be near; but a star at an altitude of 57° could appear to stand over no house or object in the immediate neighborhood of the observer. It is scarcely necessary to add that if the Magi had left the Jaffa Gate before sunset, they would not have seen the planets at the outset; and if they had left Jerusalem later, the "star" would have been a more useless guide than before. Thus the beautiful phantasm of Kepler and Ideler, which has fascinated so many writers, vanishes before the more perfect daylight of investigation.

A modern writer of great ability (Dr. Wordsworth) has suggested the antithesis to Kepler's speculation regarding the star of the Magi, namely, that the star was visible to the Magi alone. It is difficult to see what is gained or explained by the hypothesis. The song of the multitude of the heavenly host was published abroad in Bethlehem; the journey of the Magi thither was no secret whispered in a corner. Why, then, should the heavenly light, standing as a beacon of glory over the place where the young child was, be concealed from all eyes but theirs, and form no part in that series of wonders which the Virgin Mother kept and pondered in her heart?

The original authorities on this question are Kepler, *De Jesu Christi vero anno natalitio*, Frankfurt, 1614; Ideler, *Handbuch der Chronologie*, ii. 398; Pritchard, *Memoirs of Royal Ast. Society*, vol. xxv. C. P.

**STATER** (*στατήρ*: *stater*: A. V. "a piece of money;" margin, "stater").

1. The term stater, from *ἵστημι*, is held to signify a coin of a certain weight, but perhaps means a standard coin. It is not restricted by the Greeks to a single denomination, but is applied to standard coins of gold, electrum, and silver. The gold staters were didrachms of the later Phœnician and the Attic talents, which, in this denomination, differ only about four grains troy. Of the former talent were the Daric staters or Darics (*στατῆρες Δαρεικοί, Δαρεικοί*), the famous Persian gold pieces, and those of Crœsus (*Κροισεῖοι*), of the latter, the stater of Athens. The electrum staters were coined by the Greek towns on the west coast of Asia Minor; the most famous were those of Cyzicus (*στατῆρες Κυζικηνοί Κυζικηνοί*), which weigh about 248 grains. They are of gold and silver mixed, in the proportion, according to ancient authority — for we believe these rare coins have not been analyzed — of three parts of gold to one of silver. The gold was alone reckoned in the value, for it is said that one of these coins was equal to 28 Athenian silver drachms, while the Athenian gold stater, weighing about 132 grains, was equal to 20 (20 : 132 : : 28 : 184+ or ¾ of a Cyzicene stater). This stater was thus of 184+ grains, and equivalent to a didrachm of the Æginetan talent. Thus far the stater is always a didrachm. In silver, however, the term is applied to the tetradrachm of Athens, which was of the weight of two gold staters of the same currency. There can therefore be no doubt that the name stater was applied to the standard denomination of both metals, and does not positively imply either a didrachm or a tetradrachm.

2. In the N. T. the stater is once mentioned, in the narrative of the miracle of the sacred tribute-money. At Capernaum the receivers of the didrachms (*οἱ τὰ δίδραχμα λαμβάνοντες*) asked St. Peter whether his master paid the didrachms. The didrachm refers to the yearly tribute paid by every Hebrew into the treasury of the Temple.[a] The sum was half a shekel, called by the LXX. *τὸ ἥμισυ τοῦ διδράχμου*. The plain inference would therefore be, that the receivers of sacred tribute took their name from the ordinary coin or weight of metal, the shekel, of which each person paid half. But it has been supposed that as the coined equivalent of this didrachm at the period of the Evangelist was a tetradrachm, and the payment of each person was therefore a current didrachm [of account], the term here applies to single payments of didrachms. This opinion would appear to receive some support from the statement of Josephus, that Vespasian fixed a yearly tax of two drachms on the Jews instead of that they had formerly paid into the treasury of the Temple (*B. J.* vii. 6, § 6). But this passage loses its force when we remember that the common current silver coin in Palestine at the time of Vespasian, and that in which the civil tribute was paid, was the denarius, *the tribute-money*, then equivalent to the debased Attic drachm. It seems also most unlikely that the use of the term didrachm should have so remarkably changed in the interval between the date of the LXX. translation of the Pentateuch and that of the writing of St. Matthew's Gospel. To return to the narrative. St. Peter was commanded to take up a fish which should be found to contain a stater, which he was to pay to the collectors of tribute for our Lord and himself (Matt. xvii. 24–27). The stater must here mean a silver tetradrachm; and the only tetradrachms then current in Palestine were of the same weight as the Hebrew shekel. And it is observable, in confirmation of the minute accuracy of the Evangelist, that at this period the silver currency in Palestine consisted of Greek imperial tetradrachms, or staters, and Roman denarii of a quarter their value, didrachms having fallen into disuse. Had two didrachms been found by St. Peter the receivers

[a] It has been supposed by some ancient and modern commentators that the civil tribute is here referred to; but by this explanation the force of our Lord's reason for freedom from the payment seems to be completely missed.

Digitized by Google

of tribute would scarcely have taken them; and, no doubt, the ordinary coin paid was that miraculously supplied. R. S. P.

**STEEL.** In all cases where the word "steel" occurs in the A. V. the true rendering of the Hebrew is "copper." נְחוּשָׁה, *nĕchûshâh*, except in 2 Sam. xxii. 35, Job xx. 24, Ps. xviii. 34 [35], is always translated "brass;" as is the case with the cognate word נְחֹשֶׁת, *nĕchôsheth*, with the two exceptions of Jer. xv. 12 (A. V. "steel") and Ezr. viii. 27 (A. V. "copper"). Whether the ancient Hebrews were acquainted with steel is not perfectly certain. It has been inferred from a passage in Jeremiah (xv. 12), that the "iron from the north" there spoken of denoted a superior kind of metal, hardened in an unusual manner, like the steel obtained from the Chalybes of the Pontus, the ironsmiths of the ancient world. The hardening of iron for cutting instruments was practiced in Pontus, Lydia, and Laconia (Eustath. *Il.* ii. p. 294, 6R, quoted in Müller, *Hand. d. Arch. d. Kunst*, § 307, *n.* 4). Justin (xliv. 3, § 8) mentions two rivers in Spain, the Bilbilis (the Salo, or Xalon, a tributary of the Ebro) and Chalybs, the water of which was used for hardening iron (comp. Plin. xxxiv. 41). The same practice is alluded to both by Homer (*Od.* ix. 393) and Sophocles (*Aj.* 650). The Celtiberians, according to Diodorus Siculus (v. 33), had a singular custom. They buried sheets of iron in the earth till the weak part, as Diodorus calls it, was consumed by rust, and what was hardest remained. This firmer portion was then converted into weapons of different kinds. The same practice is said by Beckmann (*Hist. of Inv.* ii. 328, ed. Bohn) to prevail in Japan. The last-mentioned writer is of opinion that of the two methods of making steel, by fusion either from iron-stone or raw iron, and by cementation, the ancients were acquainted only with the former.

There is, however, a word in Hebrew, פַּלְדָּה, *palddh*, which occurs only in Nah. ii. 3 [4], and is there rendered "torches," but which most probably denotes steel or hardened iron, and refers to the flashing scythes of the Assyrian chariots. In Syriac and Arabic the cognate words (فُولاذ, *pôldô*, فالوذ, *fûldûdh*, فولاذ, *fûlâdh*) signify a kind of iron of excellent quality, and especially steel.

Steel appears to have been known to the Egyptians. The steel weapons in the tomb of Rameses III., says Wilkinson, are painted blue, the bronze red (*Anc. Eg.* iii. 247). W. A. W.

**STEPH'ANAS** (Στεφανᾶς: *Stephanas*). A Christian convert of Corinth whose household Paul baptized as the "first fruits of Achaia" (1 Cor. i. 16, xvi. 15). He was present with the Apostle at Ephesus when he wrote his First Epistle to the Corinthians, having gone thither either to consult him about matters of discipline connected with the Corinthian Church (Chrysost. *Hom.* 44), or on some charitable mission arising out of the "service for the saints" to which he and his family had devoted themselves (1 Cor. xvi. 16, 17). W. L. B.

**STEPHEN** (Στέφανος [*a crown*]: *Stephanus*), the First Martyr. His Hebrew[a] (or rather Syriac) name is traditionally said to have been Chelil, or Cheliel (a crown).

He was the chief of the Seven (commonly called DEACONS) appointed to rectify the complaints in the early Church of Jerusalem, made by the Hellenistic against the Hebrew Christians. His Greek name indicates his own Hellenistic origin.

His importance is stamped on the narrative by a reiteration of emphatic, almost superlative phrases: "full of faith and of the Holy Ghost" (Acts vi. 5): "full of grace[b] and power" (*ibid.* 8): irresistible "spirit and wisdom" (*ibid.* 10); "full of the Holy Ghost"[c] (vii. 55). Of his ministrations amongst the poor we hear nothing. But he seems to have been an instance, such as is not uncommon in history, of a new energy derived from a new sphere. He shot far ahead of his six companions, and far above his particular office. First, he arrests attention by the "great wonders and miracles that he did." Then begins a series of disputations with the Hellenistic Jews of North Africa, Alexandria, and Asia Minor, his companions in race and birthplace. The subject of these disputations is not expressly mentioned; but, from what follows, it is evident that he struck into a new vein of teaching, which eventually caused his martyrdom.

Down to this time the Apostles and the early Christian community had clung in their worship, not merely to the Holy Land and the Holy City, but to the holy place of the Temple. This local worship, with the Jewish customs belonging to it, he now denounced. So we must infer from the accusations brought against him, confirmed as they are by the tenor of his defense. The actual words of the charge may have been false, as the sinister and malignant intention which they ascribed to him was undoubtedly false. "Blasphemous" (βλάσφημα), that is, "*calumnious*" words, "against Moses and against God" (vi. 11), he is not likely to have used. But the overthrow of the Temple, the cessation of the Mosaic ritual, is no more than St. Paul preached openly, or than is implied in Stephen's own speech: "against this holy place and the Law" — "that Jesus of Nazareth shall destroy this place, and shall change the customs that Moses delivered us" (vi. 13, 14).

For these sayings he was arrested at the instigation of the Hellenistic Jews, and brought before the Sanhedrim, where, as it would seem, the Pharisaic party had just before this time (v. 34, vii. 51) gained an ascendency.

When the charge was formally lodged against him, his countenance kindled as if with the view of the great prospect which was opening for the Church; the whole body even of assembled judges was transfixed by the sight, and "saw his face as it had been the face of an angel" (vi. 15).

For a moment, the account seems to imply, the judges of the Sanhedrim were awed at his presence.[d] Then the high-priest that presided appealed to him (as Caiaphas had in like manner appealed in the

great Trial in the gospel history) to know his own sentiments on the accusations brought against him. To this Stephen replied in a speech which has every appearance of being faithfully reported. The peculiarities of the style, the variations from the Old Testament history, the abruptness which, by breaking off the argument, prevents us from easily doing it justice, are all indications of its being handed down to us substantially in its original form.

The framework in which his defense is cast is a summary of the history of the Jewish Church. In this respect it has only one parallel in the N. T., the 11th chapter[a] of the Epistle to the Hebrews — a likeness that is the more noticeable, as in all probability the author of that epistle was, like Stephen, a Hellenist.

In the facts which he selects from this history, he is guided by two principles — at first more or less latent, but gradually becoming more and more apparent as he proceeds. The first is the endeavor to prove that, even in the previous Jewish history, the presence and favor of God had not been confined to the Holy Land or the Temple of Jerusalem. This he illustrates with a copiousness of detail which makes his speech a summary almost as much of sacred geography as of sacred history — the appearance of God to Abraham "*in Mesopotamia before he dwelt in Haran*" (vii. 2); his successive migrations *to Haran* and to Canaan (vii. 4); his want of even *a resting-place for his foot* in Canaan (vii. 5); the dwelling of his seed in a *strange land* (vii. 6); the details of the stay *in Egypt* (vii. 8–13); the education of Moses *in Egypt* (vii. 20–22); his exile *in Midian* (vii. 29); the appearance *in Sinai*, with the declaration that the *desert ground* was holy earth (γῆ ἁγία) (vii. 30–33); the forty years in the *wilderness* (vii. 36, 44); the long delay before the preparation for the tabernacle of David (vii. 45); the proclamation of spiritual worship even after the building of the Temple (vii. 47–50).

The second principle of selection is based on the attempt to show that there was a tendency from the earliest times toward the same ungrateful and narrow spirit that had appeared in this last stage of their political existence. And this rigid, suspicious disposition he contrasts with the freedom of the Divine Grace and of the human will, which were manifested in the exaltation of Abraham (vii. 4), Joseph (vii. 10), and Moses (vii. 20), and in the jealousy and rebellion of the nation against these their greatest benefactors, as chiefly seen in the bitterness against Joseph (vii. 9) and Moses (vii. 27), and in the long neglect of true religious worship in the wilderness (vii. 39–43).

Both of these selections are worked out on what may almost be called critical principles. There is no allegorizing of the text, nor any forced constructions. Every passage quoted yields fairly the sense assigned to it.

Besides the direct illustration of a freedom from local restraints involved in the general argument, there is also an indirect illustration of the same doctrine, from his mode of treating the subject in detail. No less than twelve of his references to the Mosaic history differ from it either by variation or addition.

1. The call of Abraham *before the migration* to Haran (vii. 2), not, as according to Gen. xii. 1, in Haran.

2. The death of his father *after the call* (vii. 4), not, as according to Gen. xi. 32, before it.

3. The 75 souls of Jacob's migration (vii. 14), not (as according to Gen. xlvi. 27) 70.

4. The *godlike* loveliness (ἀστεῖος τῷ Θεῷ) of Moses[b] (vii. 20), not, simply, as according to Ex. ii. 2, the statement that "he was a goodly child."

5. His Egyptian education (vii. 22) as contrasted with the silence on this point in Ex. iv. 10.

6. The same contrast with regard to his secular greatness, "mighty in words and deeds" (vii. 22, comp. Ex. ii. 10).

7. The distinct mention of the three periods of forty years (vii. 23, 30, 36) of which only the last is specified in the Pentateuch.

8. The terror of Moses at the bush (vii. 32), not mentioned in Ex. iii. 3.

9. The supplementing of the Mosaic narrative by the allusions in Amos to their neglect of the true worship in the desert (vii. 42, 43).

10. The intervention of the angels in the giving of the law (vii. 53), not mentioned in Ex. xix. 16

11. The burial of the twelve Patriarchs at Shechem (vii. 16), not mentioned in Ex. i. 6.

12. The purchase of the tomb at Shechem by Abraham from the sons of Emmor (vii. 16), not, as according to Gen. xxiii. 15, the purchase of the cave at Machpelah from Ephron the Hittite.

To which may be added

13. The introduction of Remphan from the LXX of Amos v. 26, not found in the Hebrew.

The explanation and source of these variations must be sought under the different names to which they refer; but the general fact of their adoption by Stephen is significant, as showing the freedom with which he handled the sacred history, and the comparative unimportance assigned by him and by the sacred historian who records his speech, to minute accuracy. It may almost be said that the whole speech is a protest against a rigid view of the mechanical exactness of the inspired records of the O. T. "He had regard," as St. Jerome says, "to the meaning, not to the words."

It would seem that, just at the close of his argument, Stephen saw a change in the aspect of his judges, as if for the first time they had caught the drift of his meaning. He broke off from his calm address, and turned suddenly upon them in an impassioned attack which shows that he saw what was in store for him. Those heads thrown back on their unbending necks, those ears closed against any penetration of truth, were too much for his patience: "Ye stiffnecked and uncircumcised in heart and ears! *ye* do always resist the Holy Ghost: as your fathers did, so do *ye*. Which of the prophets did not *your* fathers persecute? . . . the Just One: of whom *ye* are the betrayers and murderers." As he spoke they showed by their faces that their hearts (to use the strong language of the narrative) "were being sawn asunder," and they

kept gnashing their set teeth against him; but still, though with difficulty, restraining themselves. He, in this last crisis of his fate, turned his face upwards to the open sky, and as he gazed the vault of heaven seemed to him to part asunder (διηνοιγμένους): and the Divine Glory appeared through the rending of the earthly veil — the Divine Presence, seated on a throne, and on the right hand the human form of "Jesus," not, as in the usual representations, sitting in repose, but standing erect as if to assist his suffering servant. Stephen spoke as if to himself, describing the glorious vision; and, in so doing, alone of all the speakers and writers in the N. T., except only Christ himself, uses the expressive phrase, "the Son of Man." As his judges heard the words, expressive of the Divine exaltation of Him whom they had sought so lately to destroy, they could forbear no longer. They broke into a loud yell; they clapped their hands to their ears, as if to prevent the entrance of any more blasphemous words; they flew as with one impulse upon him, and dragged him out of the city to the place of execution.

It has been questioned by what right the Sanhedrim proceeded to this act without the concurrence of the Roman government; but it is enough to reply that the whole transaction is one of violent excitement. On one occasion, even in our Lord's life, the Jews had nearly stoned Him even within the precincts of the Temple (John viii. 59). "Their vengeance in other cases was confined to those subordinate punishments which were left under their own jurisdiction: imprisonment, public scourging in the synagogue, and excommunication" (Milman's *Hist. of Latin Christianity*, i. 400). See Conybeare and Howson's *St. Paul*, i. 74.

On this occasion, however, they determined for once to carry out the full penalties enjoined by the severe code of the Mosaic ritual.

Any violator of the Law was to be taken outside the gates, and there, as if for the sake of giving to each individual member of the community a sense of his responsibility in the transaction, he was to be crushed by stones, thrown at him by all the people.

Those, however, were to take the lead in this wild and terrible act who had taken upon themselves the responsibility of denouncing him (Deut. xvii. 7; comp. John viii. 7). These were, in this instance, the witnesses who had reported or misreported the words of Stephen. They, according to the custom, for the sake of facility in their dreadful task, stripped themselves, as is the eastern practice on commencing any violent exertion: and one of the prominent leaders in the transaction was deputed by custom to signify his assent[a] to the act by taking the clothes into his custody, and standing over them whilst the bloody work went on. The person who officiated on this occasion was a young man from Tarsus — one probably of the Cilician Hellenists who had disputed with Stephen. His name, as the narrative significantly adds, was Saul.

Everything was now ready for the execution. It was outside the gates of Jerusalem. The earlier tradition[b] fixed it at what is now called the Damascus Gate. The later, which is the present tradition, fixed it at what is hence called St. Stephen's Gate, opening on the descent to the Mount of Olives; and in the red streaks of the white limestone rocks of the sloping hill used to be shown the marks of his blood, and on the first rise of Olivet, opposite, the eminence on which the Virgin stood to support him with her prayers.

The sacred narrative fixes its attention only on two figures — that of Saul of Tarsus already noticed, and that of Stephen himself.

As the first volley of stones burst upon him, he called upon the Master whose human form he had just seen in the heavens, and repeated almost the words with which He himself had given up his life on the cross, "O Lord Jesus, receive my spirit."

Another crash of stones brought him on his knees. One loud, piercing cry (ἔκραξε μεγάλῃ φωνῇ) — answering to the loud shriek or yell with which his enemies had flown upon him — escaped his dying lips. Again clinging to the spirit of his Master's words, he cried, "Lord, lay not this sin to their charge," and instantly sank upon the ground, and, in the touching language of the narrator, who then uses for the first time the word, afterwards applied to the departure of all Christians, but here the more remarkable from the bloody scenes in the midst of which the death took place — ἐκοιμήθη, "*fell asleep.*"[c]

His mangled body was buried by the class of Hellenists and proselytes to which he belonged (οἱ εὐσεβεῖς), with an amount of funeral state and lamentation expressed in two words used here only in the N. T. (συνεκόμισαν and κοπετόν).

This simple expression is enlarged by writers of the fifth century into an elaborate legend. The high-priest, it is said, had intended to leave the corpse to be devoured by beasts of prey. It was rescued by Gamaliel, carried off in his own chariot by night, and buried in a new tomb on his property at Caphar Gamala (village of the Camel), 8 leagues from Jerusalem. The funeral lamentations lasted for forty days. All the Apostles attended. Gamaliel undertook the expense, and, on his death, was interred in an adjacent cave.

This story was probably first drawn up on the occasion of the remarkable event which occurred in A. D. 415, under the name of the Invention and Translation of the Relics of St. Stephen. Successive visions of Gamaliel to Lucian, the parish priest of Caphar Gamala, on the 3d and 18th of December in that year, revealed the spot where the martyr's remains would be found. They were identified by a tablet bearing his name *Cheliel*, and were carried in state to Jerusalem, amidst various portents, and buried in the church on Mount Zion, the scene of so many early Christian traditions. The event of the translation is celebrated in the Latin Church on August 3, probably from the tradition of that day being the anniversary of the dedication of a chapel of St. Stephen at Ancona.

The story itself is encompassed with legend, but

---

[a] Comp. "I was standing by and consenting to his death, and kept the raiment of those that slew him" (Acts xxii. 20).

[b] These conflicting versions are well given in Conybeare and Howson, *S. Paul*, i. 80.

[c] The date of Stephen's death is unknown. But ecclesiastical tradition fixes it in the same year as the Crucifixion, on the 26th of December, the day after Christmas-day. It is beautifully said by Augustine (in allusion to the juxtaposition of the two festivals), that men would not have had the courage to die for God if God had not become man to die for them (Tillemont, *S. Étienne*, art. 4).

Digitized by Google

the event is mentioned in all the chief writers of the time. Parts of his remains were afterwards transported to different parts of the coast of the West — Minorca, Portugal, North Africa, Ancona, Constantinople, — and in 460 what were still left at Jerusalem were translated by the Empress Eudocia to a splendid church called by his name on the supposed scene of his martyrdom (Tillemont, *S. Étienne*, art. 5–9, where all the authorities are quoted).

The importance of Stephen's career may be briefly summed up under three heads: —

I. He was the first great Christian ecclesiastic. The appointment of "the Seven," commonly (though not in the Bible) called Deacons, formed the first direct institution of the nature of an organised Christian ministry, and of these Stephen was the head, — "the Archdeacon," as he is called in the Eastern Church, — and in this capacity represented as the companion or precursor of Laurence, Archdeacon of Rome in the Western Church. In this sense allusion is made to him in the Anglican Ordination of Deacons.

II. He is the first *martyr* — the proto-martyr. To him the name "martyr" is first applied (Acts xxii. 20). He, first of the Christian Church, bore witness to the truth of his convictions by a violent and dreadful death. The veneration which has accrued to his name in consequence is a testimony of the Bible to the sacredness of truth, to the nobleness of sincerity, to the wickedness and the folly of persecution. It also contains the first germs of the reverence for the character and for the relics of martyrs, which afterwards grew to a height now regarded by all Christians as excessive. A beautiful hymn by Reginald Heber commemorates this side of Stephen's character.

III. He is the forerunner of St. Paul. So he was already regarded in ancient times. Παύλου ὁ διδάσκαλος is the expression used for him by Basil of Seleucia. But it is an aspect that has been much more forcibly drawn out in modern times. Not only was his martyrdom (in all probability) the first means of converting St. Paul, his prayer for his murderers not only was fulfilled in the conversion of St. Paul — the blood of the first martyr the seed of the greatest Apostle, the pangs of remorse for his death amongst the stings of conscience against which the Apostle vainly writhed (Acts ix. 5) — not only thus, but in his doctrine also he was the anticipator, as, had he lived, he would have been the propagator, of the new phase of Christianity, of which St. Paul became the main support. His denunciations of local worship, the stress which he lays on the spiritual side of the Jewish history, his freedom in treating that history, the very turns of expression that he uses, are all Pauline.

The history of the above account is taken from Acts (vi. 1–viii. 2; xxii. 19, 20); the legends from Tillemont (ii. 1–24); the more general treatment from Neander's *Planting of the Christian Church*, and from Howson and Conybeare in *The Life of St. Paul*, ch. 2. A. P. S.

* It is impossible that all the facts in regard to the Divine dealings with man can have been preserved in the sacred records. The memory of many circumstances, additional to the original record, must have been long kept alive by tradition; and, although gradually overlaid by a mass of human fictions, later writers have frequently rescued the facts from such inventions as transmitted them to us in a truthful form. For examples of this, see Ps. cv. 18; 2 Tim. iii. 8; 2 Pet ii. 7, 8; Gal. iii. 19; Heb. ii. 2; Deut. xxxiii. 2; Acts xx. 35, &c. [TRADITION, Amer. ed.] It is not surprising, therefore, to find St. Stephen mentioning some minor details, evidently already familiar to his audience, not recorded in the Mosaic narrative. Our Lord's promise to his disciples (John xiv. 26), when placed in the situation of Stephen warrants us in trusting to the accuracy of such supplementary information.

Stephen's speech, however, contains some apparent variations from the Mosaic narrative, pointed out in the preceding article, of a different kind, and worthy of a closer examination. One of these relates to the time of Abram's call, represented by Stephen as occurring in Mesopotamia, before the sojourn in Haran. The alleged inconsistency does not appear in Gen. xii. 1, according to the A. V.; for the verb is very properly rendered as pluperfect and not as perfect. The Hebrew verb has in fact no specific form for the pluperfect; and the form in Gen. xii. 1 supplies the place of several tenses of our western tongues. For other instances of the same form of this verb as pluperfect (necessarily, = "had said"), see Ex. xxxiii. 5; 1 K. xxi. 4; Is. xxxviii. 21, 22. The same remark applies of course to the corresponding forms of other Hebrew verbs. The truth in this matter, therefore, must depend not on the Hebrew tense, but the context, and other Scripture notices.

The most probable reason for the migration of Terah and his family is the one assigned by Stephen — the Divine command made known to Abram in Ur.[a] We are not left, however, to mere conjecture here; but have explicit statements, both in the Mosaic narrative, and in other parts of Scripture. "I am the Lord that brought thee *out of Ur* of the Chaldees" (Gen. xv. 7); "I took your father Abraham *from the other side of the flood*" (Josh. xxiv. 3); "who didst choose Abram, and broughtest him *forth out of Ur* of the Chaldees" (Neh. ix. 7). The positive assertions so often made that according to Gen. xii. 1, and xi. 32, the call of Abram was *not* before his migration to Haran, and *not* before the death of his father, are utterly gratuitous. They are founded upon an unjustifiable limitation of the Hebrew tense, and are contradictory to other parts of the narrative. Viewing Stephen simply as a pious Jew, evidently a man of ability, addressing Jews familiar with their own history, it is inconceivable that he should have blundered so grossly in the facts of that history and the meaning of words in the sacred language of his nation, as to be open to correction at the distance of 1,800 years by men of another tongue.

Another difficulty is about the age of Abram's father at the time of his nativity. Gen. xi. 26 asserts: "Terah lived 75 years and begat Abram, Nahor, and Haran;" Gen. xii. 4, "Abram was 75 years old when he departed out of Haran;" Gen. xi. 32, Terah died at the age of 205 years and Abram removed from Haran after the death of his father (Acts vii. 4). Now since 205 — 75 = 130, either Abram, in contradiction to Stephen's statement, must have left Haran before the death of his father, or else — as was really the case — Terah must have been at least 130 at the time of his birth. It is neither to be assumed that Terah's

a * For the expression of this view by Philo, and by the Christian fathers, see the references given by Wordsworth *in loco*.

Digitized by Google

three sons were all born in one year, nor that Abram was the eldest because his name is mentioned first. In a parallel case, Gen. v. 32, it is said "Noah was 500 years old, and Noah begat Shem, Ham, and Japheth; but in Gen. x. 21, it is expressly said that Japheth was older than Shem, and by comparing v. 32 with vii. 11 and xi. 10, we see that Noah was at least 502 at Shem's birth. In both cases all the sons are mentioned together in connection with the birth of the eldest; and that one is mentioned first from whom the Jews were descended. It is nowhere stated in terms that Abram was the younger brother, but the facts of the narrative show that he must have been very much the younger. Nahor married the daughter of Haran (Gen. xi. 29), and was therefore probably many years his junior; Isaac, Abraham's *son*, married Rebecca, the *granddaughter* of Nahor through Bethuel the youngest of his eight sons (Gen. xxii. 20–23). This would make Abram — notwithstanding his advanced age at the birth of Isaac — much younger than Nahor, as he in turn was much younger than Haran. These facts put together imply that Abram was at least the sixty years younger than Haran required by the facts mentioned at the outset, and hence that Terah was at least 130 years old at his birth. In accordance with this was the Jewish tradition (mentioned by Lightfoot, *Hor. Heb.* in Acts vii. 4, II.) that Abram was the youngest of the brothers. In accordance with this, also, is the fact that Haran, already the father of a family (Gen. xi. 29, 31), died before his father left Ur (xi. 28), while Abram must have been still a comparatively young man.

Again, Stephen puts the number who went down into Egypt at 75, in accordance with the LXX.; but whether he took this number from the LXX., or the text of that version has been altered to correspond with his speech, does not matter. In Gen. xlvi. 26, the number is given as 66, and again in the following verse as 70. All these statements are the result of looking at the same facts from different points of view. Now, Jacob himself and Joseph with his two sons already in Egypt are excluded from the number to make 66; now they are included to make 70; and now with them are also included (as in the LXX.) the children of Joseph's sons — the sons themselves having been taken for heads of tribes — to make 75. Obviously by including the wives, and in other ways, still other numbers might be obtained. Stephen, not stopping to discuss the matter, merely gives the reckoning then in most common use.

The Egyptian education of Moses is surely a necessary consequence of his being the adopted son of Pharaoh's daughter (Ex. ii. 10); while the statement that he was "mighty in words and deeds" manifestly refers to the whole life and character of Moses, and there is no man in history of whom it could more truly be affirmed. We know that his entire age was 120 years, during the last forty of which he was the leader and lawgiver of his people. At exactly what age he fled from the court of Pharaoh is not recorded. Probability would point to the age of about forty, according to the tradition, thus making the three periods mentioned by Stephen (vii. 23, 30, 36). The same tradition appears to have kept alive the memory of his fear at the bush (ver. 32), as similar fear at Mount Sinai is elsewhere recorded (Heb. xii. 21). As Stephen does not profess to confine himself to the Mosaic narrative he was quite free to make use of what was true in these traditions, as well as to embody in his speech any additional information contained in the prophetic writings (Am. v. 25, 26) or in other parts of Scripture, such as "the intervention of angels in the giving of the law" mentioned in Deut. xxxiii. 2, and well known to the Jews, as appears from Gal. iii. 19, and Heb. ii. 2. The burial of (— not explicitly, "the twelve patriarchs," but of —) "our fathers" at Shechem must have been a fact within the knowledge of every Jew at the time, and in regard to one of them, Joseph, we have the express record of it in Josh. xxiv. 32.

The only point in Stephen's speech that involves any real difficulty is the purchase of the tomb at Shechem by *Abraham* of the sons of Emmor (Acts vii. 16). The facts recorded are, that Abraham bought the cave of Machpelah, with the adjoining field, "for a possession of a burying-place of the sons of Ephron the Hittite" (Gen. xxiii. 3–20), and that Jacob also bought a field near Shechem of the sons of Emmor (xxxiii. 18, 19). These purchases were made at some distance of time from each other, and were made by different persons of different parties. In the former Jacob was buried (l. 13); in the latter Joseph (Josh. xxiv. 32), and according to constant tradition, Jewish as well as Christian, also his brothers. Is it possible that Stephen can have confused the two places and transactions together? On the supposition that he makes one common statement in regard to the burial-place of Jacob and his sons, and that he refers to the purchases mentioned above, the difficulty is palpable. As to the first, his words are: "So Jacob went down into Egypt, and died, he and our fathers, and were carried over into Sychem and laid in the sepulchre," etc. (Acts vii. 15, 16). The sentence may, in itself, be understood in either of two ways: either as referring throughout to both Jacob and the patriarchs; or as, in the number of its clauses, dropping out Jacob from the latter ones, and predicating them only of "our fathers." In the original this is much plainer; indeed, by placing a period after πατέρες ἡμῶν, the following μετετέθησαν and ἐτέθησαν would naturally take πατέρες for their nominative, and the meaning, if at all doubtful in the written text, would have been clear when spoken by the living voice. There was, too, the less need of explicitness because the burial-places were so familiarly known to every one in the audience. In this therefore there is no real difficulty. But Stephen continues, "in the sepulchre that Abraham bought for a sum of money of the sons of Emmor *the father* of Sychem." It is certain that this does not refer to the cave of Machpelah which was purchased of Ephron, and where the twelve patriarchs were not buried. A conjectural emendation of the text, substituting the name of Jacob for that of Abraham has been suggested, but is not necessary since the same result follows from the supposition that Abraham did actually purchase this field which, being reclaimed by the Shechemites, was afterwards purchased again by Jacob; and there is some ground for this supposition. From Gen. xii. 6, 7, we learn that there God appeared to Abram, and there he "builded an altar unto the Lord." Now while he might have done this without hesitation in an uninhabited place (as Jacob afterwards did at Bethel, Gen. xxviii. 11–22, xxxv 1), it is unlikely that one so scrupulous in matters of property (see e. g. xiv. 23) would have done so

Digitized by Google

without purchase in an inhabited region, where rights of property already existed. That this was the case at Sychem appears from the statement (xii. 6), "the Canaanite was then in the land," and from the subsequent purchase by Jacob in this very locality, and apparently for the same purpose (xxxiii. 18–20). It is in itself, therefore, not unlikely that Abraham did make a purchase there. Again, this probability is increased by the fact of Jacob's purchase. For in the prolonged absence of Abram and his descendants, the field would almost certainly have been reoccupied by the Shechemites, just as the Philistines stopped the wells dug by Abraham (Gen. xxvi. 15, 18). And just as Isaac reopened those wells (ver. 18), so Jacob would have desired to repossess the field and to rebuild the altar of his grandfather. A reason is thus found for his purchase of this particular locality; and it is not probable that he would have built another altar there if Abram's remained undisturbed. Further, if in Acts vii. 16 we translate according to the all but universal Greek usage (in the N. T. *quite* universal), we must read, not "Emmor *the father*," but "Emmor *the son* of Sychem." Of course it is possible that Hamor's father and son may both have been named Sychem, but it is more likely that a different Hamor is referred to; if so, then it is evident that Stephen had in mind distinctly a purchase made by Abram of the sons of one Hamor, quite distinct from the subsequent repurchase by Jacob of the same field from the sons of another Hamor. Such repetitions of names are of no uncommon occurrence in oriental — or for that matter, in occidental — genealogies. On the whole, then, it seems that while, negatively, there is no reason whatever to deny the previous purchase of this field by Abraham, there is positively no inconsiderable reason in favor of the supposition.

Thus in Stephen's speech we find no loose and inaccurate references to the Mosaic narrative; but rather a most careful and conscientious, as well as able, use of the facts in the ancient history of his people. Some of these facts, but for Stephen, might have been lost to us; preserved as they are, they lead to still further knowledge of the details of the patriarchal story. F. G.

STOCKS (מַהְפֶּכֶת, סַד: ξύλον). The term "stocks" is applied in the A. V. to two different articles, one of which (the Hebrew *mahpecĕth*) answers rather to our pillory, inasmuch as its name implies that the body was placed in a *bent* position by the confinement of the neck and arms as well as the legs; while the other (*sad*) answers to our "stocks," the feet alone being confined in it. The former may be compared with the Greek κύφων, as described in the Scholia ad Aristoph. *Plut.* 476: the latter with the Roman *nervus* (Plaut. *Asin.* iii. 2, 5; *Capt.* v. 3, 40), which admitted, however, of being converted into a species of torture, as the legs could be drawn asunder at the will of the jailer (Biscoe *on Acts*, p. 229). The prophet Jeremiah was confined in the first sort (Jer. xx. 2), which appears to have been a common mode of punishment in his day (Jer. xxix. 26), as the prisons contained a chamber for the special purpose, termed "the house of the pillory" (2 Chr. xvi. 10; A. V. "prison-house"). The stocks (*sad*) are noticed in Job xiii. 27, xxxiii. 11, and Acts xvi. 24.[a] The term used in Prov. vii. 22 (A. V. "stocks") more properly means a fetter.

STOICS. The Stoics and Epicureans, who are mentioned together in Acts xvii. 18, represent the two opposite schools of practical philosophy which survived the fall of higher speculation in Greece [PHILOSOPHY]. The Stoic school was founded by Zeno of Citium (cir. B. C. 280), and derived its name from the painted portico (ἡ ποικίλη στοά, Diog. L. vii.) in which he taught. Zeno was followed by Cleanthes (cir. B. C. 260), Cleanthes by Chrysippus (cir. B. C. 240), who was regarded as the intellectual founder of the Stoic system (Diog. L. vii. 183). Stoicism soon found an entrance at Rome. Diogenes Babylonius, a scholar of Chrysippus, was its representative in the famous embassy of philosophers, B. C. 161 (Aulus Gellius, *N. A.* vii. 14); and not long afterwards Panætius was the friend of Scipio Africanus the younger, and many other leading men at Rome. His successor Posidonius numbered Cicero and Pompey among his scholars; and under the empire stoicism was not unnaturally connected with republican virtue Seneca († A. D. 65) and Musonius (Tac. *Hist.* iii. 81) did much to popularize the ethical teaching of the school by their writings; but the true glory of the later Stoics is Epictetus († cir. A. D. 115), the records of whose doctrine form the noblest monument of heathen morality (*Epicteteæ Philos Monum.* ed. Schweighäuser, 1799). The precepts of Epictetus were adopted by Marcus Aurelius (A. D. 121–180) who endeavored to shape his public life by their guidance. With this last effort stoicism reached its climax and its end. [PHILOSOPHY.]

The ethical system of the Stoics has been commonly supposed to have a close connection with Christian morality (Gataker, *Antoninus, Præf.*; Meyer, *Stoic. Eth. c. Christ. comptr.*, 1823), and the outward similarity of isolated precepts is very close and worthy of notice.[b] But the morality of stoicism is essentially based on pride, that of Christianity on humility; the one upholds individual independence, the other absolute faith in another; the one looks for consolation in the issue of fate, the other in Providence; the one is limited by periods of cosmical ruin, the other is consummated in a personal resurrection (Acts xvii. 18).

But in spite of the fundamental error of stoicism, which lies in a supreme egotism,[c] the teaching of

---

[a] The term in Acts xvi. 24 is ξύλον. The writer was told at *Kavalla* (Neapolis), that this is still a common mode of punishment in that part of Greece. H.

this school gave a wide currency to the noble doctrines of the Fatherhood of God (Cleanthes, *Hymn.* 31–38; comp. Acts xvii. 28), the common bonds of mankind (Anton. iv. 4), the sovereignty of the soul. Nor is it to be forgotten that the earlier Stoics were very closely connected with the East, from which much of the form, if not of the essence, of their doctrines seems to have been derived. Zeno himself was a native of Citium, one of the oldest Phœnician settlements. [CHITTIM.] His successor Chrysippus came from Soli or Tarsus; and Tarsus is mentioned as the birthplace of a second Zeno and Antipater. Diogenes came from Seleucia in Babylonia, Posidonius from Apamea in Syria, and Epictetus from the Phrygian Hierapolis (comp. Sir A. Grant, *The Ancient Stoics*, *Oxford Essays*, 1858, p. 82).

The chief authorities for the opinions of the Stoics are Diog. Laert. vii.; Cicero, *De Fin.*; Plutarch, *De Stoic. repugn.*; *De plac. Philos. adv. Stoic.*; Sextus Empiricus; and the remains of Seneca, Epictetus, and Marcus Aurelius. Gataker, in his edition of the *Meditations of M. Aurelius*, has traced out with the greatest care the parallels which they offer to Christian doctrine.

B. F. W.

* See Merivale, *History of the Romans* (vi. 190–233), for an account of the Stoics and their principles. Some have supposed that Seneca may have been one of the members of the emperor's household, to whom Paul refers in Phil. iv. 22. On this question of the possibility of an acquaintance between the Apostle and the philosopher during Paul's captivity at Rome, Professor Lightfoot has an extended *Dissertation* in his *Commentary* on Philippians (pp. 268–331). The discussion involves an elaborate examination of the spirit and teachings of Stoicism as compared with those of the Gospel. The fourteen letters said to be written by Seneca to St. Paul are undoubted forgeries. H.

**STOMACHER** (פְּתִיגִיל). The Heb. *pethigil* describes some article of female attire (Is. iii. 24), the character of which is a mere matter of conjecture. The LXX. describes it as a variegated tunic (*χιτὼν μεσοπόρφυρος*); the Vulg. as a species of girdle (*fascia pectoralis*). The word is evidently a compound, but its elements are uncertain. Gesenius (*Thes.* p. 1187) derives it from פְּתִיל גָּיִל, with very much the same sense as in the LXX.; Saalschütz (*Archäol.* i. 30) from פְּתִי גָּיִל, with the sense of "undisguised lust," as applied to some particular kind of dress. Other explanations are given in Gesen. *Thes.* l. c.

W. L. B.

**STONES** (אֶבֶן). The uses to which stones were applied in ancient Palestine were very various. (1.) They were used for the ordinary purposes of building, and in this respect the most noticeable point is the very large size to which they occasionally run (Mark xiii. 1). Robinson gives the dimensions of one as 24 feet long by 6 feet broad and 3 feet high (*Res.* i. 233; see also p. 284, note). For most public edifices hewn stones were used: an exception was made in regard to altars, which were to be built of unhewn stone (Ex. xx. 25; Deut. xxvii. 5; Josh. viii. 31), probably as being in a more natural state. The Phœnicians were particularly famous for their skill in hewing stone (2 Sam. v. 11; 1 K. v. 18). Stones were selected of certain colors in order to form ornamental string-courses: in 1 Chr. xxix. 2 we find enumerated "onyx stones and stones to be set, glistering stones (lit. stones of *eye-paint*), and of divers colors (i. e. streaked with veins), and all manner of precious stones, and marble stones" (comp. 2 Chr. iii. 6). They were also employed for pavements (2 K. xvi. 17; comp. Esth. i. 6). (2.) Large stones were used for closing the entrances of caves (Josh. x. 18; Dan. vi. 17), sepulchres (Matt. xxvii. 60; John xi. 38, xx. 1), and springs (Gen. xxix. 2). (3.) Flint stones[a] occasionally served the purpose of a knife, particularly for circumcision and similar objects (Ex. iv. 25; Josh. v. 2, 3; comp. Herod. ii. 86; Plutarch, *Nicias*, p. 13; Catull. *Carm.* lxii. 5). (4.) Stones were further used as a munition of war for slings (1 Sam. xvii. 40, 49), catapults (2 Chr. xxvi. 14), and bows (Wisd. v. 22; comp. 1 Macc. vi. 51); as boundary marks (Deut. xix. 14, xxvii. 17; Job xxiv. 2; Prov. xxii. 28, xxiii. 10); such were probably the stone of Bohan (Josh. xv. 6, xviii. 17), the stone of Abel (1 Sam. vi. 15, 18), the stone Ezel (1 Sam. xx. 19), the great stone by Gibeon (2 Sam. xx. 8), and the stone Zoheleth (1 K. i. 9); as weights for scales (Deut. xxv. 13; Prov. xvi. 11); and for mills (2 Sam. xi. 21). (5.) Large stones were set up to commemorate any remarkable events, as by Jacob at Bethel after his interview with Jehovah (Gen. xxviii. 18, xxxv. 14), and again when he made the covenant with Laban (Gen. xxxi. 45); by Joshua after the passage of the Jordan (Josh. iv. 9); and by Samuel in token of his victory over the Philistines (1 Sam. vii. 12). Similarly the Egyptian monarchs erected their *stelæ* at the farthest point they reached (Herod. ii. 106). Such stones were occasionally consecrated by anointing, as instanced in the stone erected at Bethel (Gen. xxviii. 18). A similar practice existed in heathen countries, and by a singular coincidence these stones were described in Phœnicia by a name very similar to Bethel, namely, *baetylia* (*βαιτύλια*), whence it has been surmised that the heathen name was derived from the Scriptural one, or *vice versâ* (Kalisch's *Comm. in Gen.* l. c.). But neither are the names actually identical, nor are the associations of a kindred nature; the *baetylia* were meteoric stones, and derived their sanctity from the belief that they had fallen from heaven, whereas the stone at Bethel was simply commemorative. [BETHEL; IDOL.] The only point of resemblance between the two consists in the custom of anointing — the anointed stones (*λίθοι λιπαροί*), which are frequently mentioned by ancient writers as objects of divine honor (Arnob. *adv. Gent.* i. 39; Euseb. *Præp. Evan.* i. 10, § 18; Plin. xxxvii. 51), being probably aërolites. (6.) That the worship of stones prevailed among the heathen nations surrounding Palestine, and was borrowed from them by apostate Israelites, appears from Is. lvii. 6, according to the ordinary rendering of the passage; but the original[b] admits of another sense, "in the smooth (clear of wood) places of the valley," and no reliance can be placed on a peculiar term introduced partly for the sake of alliteration. The *eben mascith*,[c] noticed in Lev. xxvi. 1 (A. V. "image of stone"), has again been identified with the *baetylia*,

---

b נְחַלֵּי־חַלָּק = שָׁמֵן מַשְׁחִית

Digitized by Google

the doubtful term *mascîth* (comp. Num. xxxiii. 52, "picture"; Ez. viii. 12, "imagery") being supposed to refer to devices engraven on the stone. [IDOL.] The statue (*matstsêbâh* [a]) of Baal is said to have been of stone and of a conical shape (Movers, *Phœn.* i. 673), but this is hardly reconcilable with the statement of its being burnt in 2 K. x. 26 (the correct reading of which would be *matstsêbah*, and not *matstsêbôth*). (7.) Heaps of stones were piled up on various occasions, as in token of a treaty (Gen. xxxi. 46), in which case a certain amount of sanctity probably attached to them (cf. Hom. *Od.* xvi. 471); or over the grave of some notorious offender (Josh. vii. 26, viii. 29; 2 Sam. xviii. 17; see Propert. iv. 5, 75, for a similar custom among the Romans). The size of some of these heaps becomes very great from the custom prevalent among the Arabs that each passer-by adds a stone; [b] Burckhardt mentions one near Damascus 20 ft. long, 2 ft. high, and 3 ft. broad (*Syria*, p. 46). (8.) The "white stone" noticed in Rev. ii. 17 has been variously regarded as referring to the pebble of acquittal used in the Greek courts (Ov. *Met.* xv. 41); to the lot cast in elections in Greece: to both these combined, the *white* conveying the notion of acquittal, the *stone* that of election (Bengel, *Gnom.*): to the stones in the high-priest's breastplate (Züllig); to the tickets presented to the victors at the public games, securing them maintenance at the public expense (Hammond); or, lastly, to the custom of writing on stones (Alford *in l. c.*). (9.) The use of stones for tablets is alluded to in Ex. xxiv. 12, and Josh. viii. 32. (10.) Stones for striking fire are mentioned in 2 Macc. x. 3. (11.) Stones were prejudicial to the operations of husbandry: hence the custom of spoiling an enemy's field by throwing quantities of stones upon it (2 K. iii. 19, 25), and, again, the necessity of gathering stones previous to cultivation (Is. v. 2): allusion is made to both these practices in Eccl. iii. 5 ("a time to cast away stones, and a time to gather stones"). (12.) The notice in Zech. xii. 3 of the "burdensome stone" is referred by Jerome to the custom of lifting stones as an exercise of strength, which he describes as being practiced in Judæa in his day (comp. Ecclus. vi. 21); but it may equally well be explained of a large corner-stone as a symbol of strength (Is. xxviii. 16).

Stones are used metaphorically to denote hardness or insensibility (1 Sam. xxv. 37; Ez. xi. 19, xxxvi. 26), as well as firmness or strength, as in Gen. xlix. 24, where "the *stone* of Israel" is equivalent to "the rock of Israel" (2 Sam. xxiii. 3; Is. xxx. 29). The members of the Church are called "living stones," as contributing to rear that living temple in which Christ, himself "a living *stone*," is the chief or head of the corner (Eph. ii. 20–22; 1 Pet. ii. 4–8). W. L. B.

**STONES, PRECIOUS.** The reader is referred to the separate articles, such as AGATE, CARBUNCLE, SARDONYX, etc., for such information as it has been possible to obtain on the various gems mentioned in the Bible. The identification of many of the Hebrew names of precious stones is a task of considerable difficulty: sometimes we have no further clew to aid us in the determination of a name than the mere derivation of the word, which derivation is always too vague to be of any service, as it merely expresses some quality often common to many precious stones. As far, however, as regards the stones of the high-priest's breastplate, it must be remembered that the authority of Josephus, who had frequent opportunities of seeing it worn, is preferable to any other. The Vulgate agrees with his nomenclature, and in Jerome's time the breastplate was still to be inspected in the Temple of Concord: hence this agreement of the two is of great weight.[c] The modern Arabic names of the more usual gems, which have probably remained fixed the last 2,000 years, afford us also some approximations to the Hebrew nomenclature; still, as it was intimated above, there is much that can only be regarded as conjecture in attempts at identification. Precious stones are frequently alluded to in the Holy Scriptures; they were known and very highly valued in the earliest times. The onyx-stone, fine specimens of which are still of great value, is expressly mentioned by Moses as being found in the land of Havilah. The sard and sardonyx, the amethyst or rose-quartz, with many agates and other varieties of quartz, were doubtless the best known and most readily procured. "Onyx-stones, and stones to be set, glistering stones and of divers colors, and all manner of precious stones" were among the articles collected by David for the temple (1 Chr. xxix. 2). The Tyrians traded in precious stones supplied by Syria (Ez. xxvii. 16), and the robes of their king were covered with the most brilliant gems. The merchants of Sheba and Raamah in South Arabia, and doubtless India and Ceylon, supplied the markets of Tyre with various precious stones.

The art of engraving on precious stones was known from the very earliest times. Sir G. Wilkinson says (*Anc. Egypt.* ii. 67, Lond. 1854), "The Israelites learnt the art of cutting and engraving stones from the Egyptians." There can be no doubt that they did learn much of the art from this skillful nation, but it is probable that it was known to them long before their sojourn in Egypt; for we read in Gen. xxxviii. 18, that when Tamar desired a pledge Judah gave her his signet, which we may safely conclude was engraved with some device. The twelve stones of the breastplate were engraved each one with the name of one of the tribes (Ex. xxviii. 17–21). The two onyx (or sardonyx) stones which formed the high-priest's shoulder-pieces were engraved with the names of the twelve tribes, six on one stone and six on the other, "with the work of an engraver in stone like the *engravings of a signet*." See also ver. 36, "like the engravings of a signet." It is an undecided question whether the diamond was known to the early nations of antiquity. The A. V. gives it as the rendering of the Heb. *Yahâlôm*, יָהֲלֹם,

[a] מַצֵּבָה.

[b] A reference to this practice is supposed by Gesenius to be contained in Prov. xxvi. 8, which he renders "as a bag of gems in a heap of stones" (*Thes.* 1268). The Vulgate has a curious version of this passage: "Sicut qui mittit lapidem in acervum Mercurii."

[c] The LXX., Vulg., and Josephus, are all agreed as to the names of the stones; there is, however, some little difference as to their relative positions in the breastplate: thus the ἴασπις, which, according to Josephus, occupies the second place in the third row, is by the LXX. and Vulg. put in the third place; a similar transposition occurs with respect to the ἀμέθυστος and the ἄχάτης in the third row.

Digitized by Google

set it is probable that the jasper is intended. Sir G Wilkinson is of opinion that the ancient Egyptians were acquainted with the diamond, and used it for engraving (ii. 67). Beckmann, on the other hand, maintains that the use of the diamond was unknown even to the Greeks and Romans: "I must confess that I have found no proofs that the ancients cut glass with a diamond" (*Hist. of Inventions*, ii. 87, Bohn's ed.). The substance used for polishing precious stones by the ancient Hebrews and Egyptians was emery powder or the emery stone (*Corundum*), a mineral inferior only to the diamond in hardness [ADAMANT]. There is *no proof* that the diamond was known to the ancient Orientals, and it certainly must be banished from the list of *engraved* stones which made the sacerdotal breastplate; for the diamond can be cut only by abrasion with its own powder, or by friction with another diamond; and this, even in the hands of a well-practiced artist, is a work of most patient labor and of considerable difficulty; and it is not likely that the Hebrews, or any other oriental people, were able to engrave a name upon a diamond as upon a signet ring.[a] Again, Josephus tells us (*Ant.* iii. 7, § 5) that the twelve stones of the breastplate were of great size and extraordinary beauty. We have no means of ascertaining their size; probably they were nearly an inch square; at any rate a diamond only half that size, with the five letters of זְבוּלֻן (Zebulun) engraved on it — for, as he was the sixth son of Jacob (Gen. xxx. 20), his name would occupy the third place in the second row — is quite out of the question, and cannot possibly be the *Yahâlôm* of the breastplate.

Perhaps the stone called "ligure" by the A. V. has been the subject of more discussion than any other of the precious stones mentioned in the Bible. In our article on that subject we were of opinion that the stone denoted was probably *tourmaline*. We objected to the "hyacinth stone" representing the *lyncurium* of the ancients, because of its not possessing attractive powers in any marked degree, as we supposed and had been informed by a well-known jeweler. It appears, however, from a communication kindly made to us by Mr. King, that the *hyacinth* (*zircon*) *is* highly electric when rubbed. He states he is practically convinced of this fact, although he allows that highly electric powers are not usually attributed to it by mineralogists. Mr. King asserts that *our hyacinth* (*jacinth, zircon*) was greatly used for engraving on by Greeks, Romans, and Persians, and that numerous intaglios in it exist of the age of Theophrastus. The *ancient hyacinthus* was our *sapphire*, as Solinus shows.

Precious stones are used in Scripture in a figurative sense, to signify value, beauty, durability, etc., in those objects with which they are compared (see Cant. v. 14; Is. liv. 11, 12; Lam. iv. 7; Rev. iv. 3, xxi. 10–21). As to the precious stones in the breastplate of the high-priest, see Josephus, *Ant.* iii. 7, § 5; Epiphanius, *περὶ τῶν ιβ' λίθων τῶν ὄντων ἐν τ. στολ. τ. Ἀαρών*, in Epiphanii *Opusc.* ed. Petavius, ii. 225–232, Cologne, 1682 (this treatise has been edited separately by Conr. Gesner, *De omni rerum fossil. genere*, etc., Tiguri, 1565; and by Mat. Hiller, the author of the *Hierophyticon*, in his *Syntagmata Hermeneutica*, p. 83, Tubing. 1711); Braun *De Vestitu Sacerdotum Hebræorum* (Amstel. 1680 and 2d ed. 1698), lib. ii. caps. 7 and 8; Bellermann, *Die Urim und Thummim die Aeltesten Gemmen*, Berlin, 1824; Rosenmüller, "The Mineralogy of the Bible," *Biblical Cabinet*, vol. xxvii

W. H.

• **STONE-SQUARERS.** [GIBLITES.]

**STONING.** [PUNISHMENTS.]

• **STOOL.** [MIDWIFE.]

• **STORE-CITIES** (עָרֵי מִסְכְּנוֹת, LXX πόλεις ὀχυραί, A. V. "treasure-cities" once, Ex. i. 11). מִסְכְּנוֹת occurs alone in 2 Chr. xxxii. 28 (A. V. "store-houses"), and is followed by עָרֵי in 2 Chr. xvi. 4 (A. V. incorrectly "store-cities"). The rendering *store-houses* for מִסְכְּנוֹת seems therefore more appropriate than *stores*. According to 2 Chr. xxxii. 28, they were for the products of the soil. But whether the provisions thus stored up were designed chiefly for purposes of trade (Ewald, *Gesch. d. V. Israel*, ii. p. 16), or for the benefit of travellers and their beasts (Bertheau on 2 Chr. viii. 4, 6), or for times of need (Knobel on Ex. i. 11; Thenius on 1 K. ix. 19), or for purposes of war (Bush on Ex. i. 11; Kurtz, *Gesch. d. A. Bundes*, ii. 167), and, if for the latter purpose, whether fortified (LXX. Bush, *l. c.*; Hengstenberg, *Die Bücher Mose's u. Ægypten*, p. 46; Hawks, *Egypt and its Monuments*, p. 178) or not (Kurtz, *l. c.*, and Keil on Ex. i. 11), is disputed. The conjecture that the store-cities had a military object, is favored by the position of PITHOM and RAAMSES, Ex. i. 11, and of HAMATH, 1 K. ix. 19, 2 Chr. viii. 4; and by the mention of the building of store-cities in connection with that of fortresses, as illustrating Jehoshaphat's greatness, 2 Chr. xvii. 12.

C. M. M.

**STORK** (חֲסִידָה, *chasîdâh*: translated indifferently by LXX. ἀσίδα, ἔποψ, ἐρωδιός, πελεκάν: Vulg. *herodio, herodius, milvus*: A. V. "stork," except in Job xxxix. 13, where it is translated "wing" ("stork" in the margin). But there is some question as to the correct reading in this passage. The LXX. do not seem to have recognized the stork under the Hebrew term חֲסִידָה; otherwise they could scarcely have missed the obvious rendering of πελαργός, or have adopted in two instances the phonetic representation of the original, ἀσίδα (whence no doubt Hesych. ἄσις, εἶδος ὀρνέου). It is singular that a bird so conspicuous and familiar as the stork must have been both in Egypt and Palestine should have escaped notice by the LXX., but there can be no doubt of the correctness of the rendering of A. V. The Heb. term is derived from the root חָסַד, whence חֶסֶד, "kindness," from the maternal and filial affection of which this bird has been in all ages the type).

The White Stork (*Ciconia alba*, L.) is one of the largest and most conspicuous of land birds standing nearly four feet high, the jet black of its wings and its bright red beak and legs contrasting

[a] "The artists of the Renaissance actually succeeded in engraving on the diamond; the discovery is assigned to Clement Birago, by others to J. de Trezzo Philip II.'s engraver." C. W. King

lnely with the pure white of its plumage (Zech. v. 9, "They had wings like the wings of a stork"). It is placed by naturalists near the Heron tribe, with which it has some affinity, forming a connecting link between it and the spoonbill and ibis, like all of which, the stork feeds on fish and reptiles, especially on the latter. In the neighborhood of man it devours readily all kinds of offal and garb-

White Stork (*Ciconia alba*).

age. For this reason, doubtless, it is placed in the list of unclean birds by the Mosaic law (Lev. xi. 19; Deut. xiv. 18). The range of the white stork extends over the whole of Europe, except the British Isles, where it is *now* only a rare visitant, and over Northern Africa and Asia, as far at least as Burmah.

The Black Stork (*Ciconia nigra*, L.), though less abundant in places, is scarcely less widely distributed, but has a more easterly range than its congener. Both species are very numerous in Palestine, the white stork being universally distributed, generally in pairs, over the whole country, the black stork living in large flocks after the fashion of herons, in the more secluded and marshy districts. The writer met with a flock of upwards of fifty black storks feeding near the west shore of the Dead Sea. They are still more abundant by the Sea of Galilee, where also the white stork is so numerous as to be gregarious; and in the swamps round the waters of Merom.

While the black stork is never found about buildings, but prefers marshy places in forests, and breeds on the tops of the loftiest trees, where it heaps up its ample nest far from the haunts of man; the white stork attaches itself to him, and for the service which it renders in the destruction of reptiles and the removal of offal has been repaid from the earliest times by protection and reverence. This is especially the case in the countries where it breeds. In the streets of towns in Holland, in the villages of Denmark, and in the bazaars of Syria and Tunis, it may be seen stalking gravely among the crowd, and woe betide the stranger either in Holland or in Palestine who should dare to molest it. The claim of the stork to protection seems to have been equally recognized by the ancients. Sempr. Rufus, who first ventured to bring young storks to table, gained the following epigram, on the failure of his candidature for the prætorship:—

"Quanquam est duobus elegantior Plancis
Suffragiorum puncta non tulit septem.
Ciconiarum populus ultus est mortem."

Horace contemptuously alludes to the same sacrilege in the lines

"Tutoque ciconia nido,
Donec vos auctor docuit prætorius" (*Sat.* ii. 2, 49).

Pliny (*Nat. Hist.* x. 21) tells us that in Thessaly it was a capital crime to kill a stork, and that they were thus valued equally with human life, in consequence of their warfare against serpents. They were not less honored in Egypt. It is said that at Fez in Morocco, there is an endowed hospital for the purpose of assisting and nursing sick cranes and storks, and of burying them when dead. The Marocains hold that storks are human beings in that form from some distant islands (see note to Brown's *Pseud. Epid.* iii. 27, § 3). The Turks in Syria point to the stork as a true follower of Islam, from the preference he always shows for the Turkish and Arab over the Christian quarters. For this undoubted fact, however, there may be two other reasons — the greater amount of offal to be found about the Moslem houses, and the persecutions suffered from the skeptical Greeks, who rob the nests, and show none of the gentle consideration towards the lower animals which often redeems the Turkish character. Strickland, *Mem. and Papers*, vol. ii. p. 227, states that it is said to have quite deserted Greece, since the expulsion of its Mohammedan protectors. The observations of the writer corroborated this remark. Similarly the rooks were said to be so attached to the old *régime*, that most of them left France at the Revolution; a true statement, and accounted for by the clearing of most of the fine old timber which used to surround the chateaux of the noblesse.

The derivation of חֲסִידָה points to the paternal and filial attachment of which the stork seems to have been a type among the Hebrews no less than the Greeks and Romans. It was believed that the young repaid the care of their parents by attaching themselves to them for life, and tending them in old age. Hence it was commonly called among the Latins "avis pia." (See Laburnus in Petronius Arbiter; Aristotle, *Hist. Anim.* ix. 14; and Pliny, *Nat. Hist.* x. 32.)

Pliny also notices their habit of always returning to the same nest. Probably there is no foundation for the notion that the stork so far differs from other birds as to recognize its parents after it has become mature; but of the fact of these birds returning year after year to the same spot, there is no question. Unless when molested by man, storks' nests all over the world are rebuilt, or rather repaired, for generations on the same site, and in Holland the same individuals have been recognized for many years. That the parental attachment of the stork is very strong, has been proved on many occasions. The tale of the stork which, at the burning of the town of Delft, vainly endeavored to carry off her young, and at length sacrificed her life with theirs rather than desert them, has been often repeated, and seems corroborated by unquestionable evidence. Its watchfulness over its young is unremitting, and often shown in a somewhat droll manner. The writer was once in camp near

Digitized by Google

an old ruined tower in the plain of Zana, south of the Atlas, where a pair of storks had their nest. The four young might often be seen from a little distance, surveying the prospect from their lonely height; but whenever any of the human party happened to stroll near the tower, one of the old storks, invisible before, would instantly appear, and, lighting on the nest, put its foot gently on the necks of all the young, so as to hold them down out of sight till the stranger had passed, snapping its bill meanwhile, and assuming a grotesque air of indifference and unconsciousness of there being anything under its charge.

Few migratory birds are more punctual to the time of their reappearance than the white stork, or at least, from its familiarity and conspicuousness, its migrations have been more accurately noted. "The stork in the heaven knoweth her appointed times" (see Virgil, *Georg.* ii. 319, and Petron. *Sat.*). Pliny states that it is rarely seen in Asia Minor after the middle of August. This is probably a slight error, as the ordinary date of its arrival in Holland is the second week in April, and it remains until October. In Denmark Judge Boie noted its arrival from 1820 to 1847. The earliest date was the 26th March, and the latest the 12th April (Kjaerbolling, *Danmarks Fugle*, p. 262). In Palestine it has been observed to arrive on the 22d March. Immense flocks of storks may be seen on the banks of the Upper Nile during winter, and some few further west, in the Sahara; but it does not appear to migrate very far south, unless indeed the birds that are seen at the Cape of Good Hope in December be the same which visit Europe.

The stork has no note, and the only sound it emits is that caused by the sudden snapping of its long mandibles, well expressed by the epithet "crotalistria" in Petron. (quasi κροταλίζω, to rattle the castanets). From the absence of voice probably arose the error alluded to by Pliny, "Sunt qui ciconiis non inesse linguas confirment."

Some unnecessary difficulty has been raised respecting the expression in Ps. civ. 17, "As for the stork, the fir-trees are her house." In the west of Europe the home of the stork is connected with the dwellings of man, and in the East, as the eagle is mentally associated with the most sublime scenes in nature, so, to the traveller at least, is the stork with the ruins of man's noblest works. Amid the desolation of his fallen cities throughout Eastern Europe and the classic portions of Asia and Africa, we are sure to meet with them surmounting his temples, his theatres or baths. It is the same in Palestine. A pair of storks have possession of the only tall piece of ruin in the plain of Jericho; they are the only tenants of the noble tower of Richard Cœur de Lion at Lydda; and they gaze on the plain of Sharon from the lofty tower of Ramleh (the ancient Arimathea). So they have a pillar at Tiberias, and a corner of a ruin at Nebi Mousseh. And no doubt in ancient times the sentry shared the watch-tower of Samaria or of Jezreel with the cherished storks. But the instinct of the stork seems to be to select the loftiest and most conspicuous spot he can find where his huge nest may be supported; and whenever he can combine this taste with his instinct for the society of man, he naturally selects a tower or a roof. In lands of ruins, which from their neglect and want of drainage supply him with abundance of food, he finds a column or a solitary arch the most secure position for his nest; but where neither towers nor ruins abound he does not hesitate to select a tall tree, as both storks, swallows, and many other birds must have done before they were tempted by the artificial conveniences of man's buildings to desert their natural places of nidification. [NEST, Amer. ed.] Thus the golden eagle builds, according to circumstances, in cliffs, on trees, or even on the ground, and the common heron, which generally associates on the tops of the tallest trees, builds in Westmoreland and in Galway on bushes. It is therefore needless to interpret the text of the stork merely *perching* on trees. It probably was no less numerous in Palestine when David wrote than now; but the number of suitable towers must have been far fewer, and it would therefore resort to trees. Though it does not frequent trees in South Judæa, yet it still builds on trees by the Sea of Galilee, according to several travellers; and the writer may remark, that while he has never seen the nest except on towers or pillars in that land of ruins, Tunis, the only nest he ever saw in Morocco was on a tree. Varro (*Re Rustica*, iii. 5) observes, "Advenæ volucres pullos faciunt, *in agro ciconiæ*, in tecto hirundines." All modern authorities give instances of the white stork building on trees. Degland mentions several pairs which still breed in a marsh near Châlons-sur-Marne (*Orn. Europ.* ii. 153). Kjaerbolling makes a similar statement with respect to Denmark, and Nillson also as to Sweden. Bädeker observes "that in Germany the white stork builds in the gables, etc., and in trees, chiefly the tops of poplars and the strong upper branches of the oak, binding the branches together with twigs, turf, and earth, and covering the flat surface with straw, moss, and feathers" (*Eier Eur.* pl. xxxvi.).

The black stork, no less common in Palestine, has never relinquished its natural habit of building upon trees. This species, in the northeastern portion of the land, is the most abundant of the two (Harmer's *Obs.* iii. 323). Of either, however, the expression may be taken literally, that "the fir-trees are a dwelling for the stork."

* **STORY**, 2 Chr. xiii. 22, xxiv. 27, is used in the sense of *history* (Ital. *storia*). So "story-writer" for *historian*, 1 Esdr. ii. 17. A.

**STRAIN AT**. The A. V. of 1611 renders Matt. xxiii. 24, "Ye blind guides! which *strain at* a gnat, and swallow a camel." There can be little doubt, as Dean Trench has supposed, that this obscure phrase is due to a printer's error, and that the true reading is "strain out." Such is the sense of the Greek διϋλίζειν, as used by Plutarch (*Op. Mor.* p. 692 D, *Symp. Probl.* vi. 7, § 1) and Dioscorides (ii. 86), namely, to clarify by passing through a strainer (διυστήρ). "Strain out" is the reading of Tyndale's (1539), Cranmer's (1539), the Bishops' (1568), and the Geneva (1557) Bibles, and "strain *at*," which is neither correct nor intelligible, could only have crept into our A. V., and been allowed to remain there, by an oversight. Dean Trench gives an interesting illustration of the passage from a private letter written to him by a recent traveller in North Africa, who says: "In a ride from Tangier to Tetuan, I observed that a Moorish soldier who accompanied me, when he drank, always unfolded the end of his turban and placed it over the mouth of his *bota* drinking through the muslin, to strain *out* the *gnats*, whose larvæ swarm in the water of that country" (*On the Auth. Vers. of the N. T.* pp. 172, 173). If one might

Digitized by Google

son jecture the cause which led, even erroneously, to the substitution of *at* for *out*, it is perhaps to be found in the marginal note of the Geneva Version, which explains the verse thus: "Ye stay *at* that which is nothing, and let pass that which is of greater importance."

* **STRAITLY** is often used in the A. V. in the now obsolete senses of *closely* (Josh. vi. 1; Wisd. xvii. 16; Gen. xliii. 7); and *strictly* (Matt. ix. 30; Acts v. 28, etc.). A.

* **STRANGE**, as used for *foreign*, in some passages of the A. V. may not be understood by all readers; *e. g.* "*strange* vanities," Jer. viii. 19, for "foreign idols." The "*strange* woman" in Prov. ii. 16 is so designated as being the wife of another (ver. 17), or at least, as one who has no business with the person whom she tempts. A.

**STRANGER** (נֵכָר, תּוֹשָׁב). A "stranger" in the technical sense of the term may be defined to be a person of foreign, *i. e.* non-Israelitish, extraction, resident within the limits of the promised land. He was distinct from the proper "foreigner," [a] inasmuch as the latter still belonged to another country, and would only visit Palestine as a traveller: he was still more distinct from the "nations," [b] or non-Israelite peoples, who held no relationship with the chosen people of God. The term answers most nearly to the Greek *μέτοικος*, and may be compared with our expression "naturalized foreigner," in as far as this implies a certain political *status* in the country where the foreigner resides: it is opposed to one "born in the land," [c] or, as the term more properly means, "not transplanted," in the same way that a naturalized foreigner is opposed to a *native*. The terms applied to the "stranger" have special reference to the fact of his *residing* [d] in the land. The existence of such a class of persons among the Israelites is easily accounted for: the "mixed multitude" that accompanied them out of Egypt (Ex. xii. 38) formed one element; the Canaanitish population, which was never wholly extirpated from their native soil, formed another and a still more important one; captives taken in war formed a third; fugitives, hired servants, merchants, etc., formed a fourth. The number from these various sources must have been at all times very considerable; the census of them in Solomon's time gave a return of 153,600 males (2 Chr. ii. 17), which was equal to about a tenth of the whole population. The enactments of the Mosaic Law, which regulated the political and social position of resident strangers, were conceived in a spirit of great liberality. With the exception of the Moabites and Ammonites (Deut. xxiii. 3), all nations were admissible to the rights of citizenship under certain conditions. It would appear, indeed, to be a consequence of the prohibition of intermarriage with the Canaanites (Deut. vii. 3), that these would be excluded from the rights of citizenship; but the Rabbinical view that this exclusion was superseded in the case of proselytes seems highly probable, as we find Doeg the Edomite (1 Sam. xxi. 7, xxii. 9), Uriah the Hittite (2 Sam. xi. 6), and Araunah the Jebusite (2 Sam. xxiv. 18), enjoying to all appearance the full rights of citizenship. Whether a stranger could ever become legally a landowner is a question about which there may be doubt. Theoretically the whole of the soil was portioned out among the twelve tribes, and Ezekiel notices it as a peculiarity of the division which he witnessed in vision, that the strangers were to share the inheritance with the Israelites, and should thus become as those "born in the country" (Ex. xlvii. 22). Indeed the term "stranger" is more than once applied in a pointed manner to signify one who was not a landowner (Gen. xxiii. 4; Lev. xxv. 23): while on the other hand *ezrach* (A. V. "born in the land") may have reference to the possession of the soil, as it is borrowed from the image of a tree *not transplanted*, and so occupying its native soil. The Israelites, however, never succeeded in obtaining possession of the whole, and it is possible that the Canaanitish occupants may in course of time have been recognized as "strangers," and had the right of retaining their land conceded to them. There was of course nothing to prevent a Canaanite from becoming the mortgagee in possession of a plot, but this would not constitute him a proper landowner, inasmuch as he would lose all interest in the property when the year of Jubilee came round. That they possessed land in one of these two capacities is clear from the case of Araunah above cited. The stranger appears to have been eligible to all civil offices, that of king excepted (Deut. xvii. 15). In regard to religion, it was absolutely necessary that the stranger should not infringe any of the fundamental laws of the Israelitish state: he was forbidden to blaspheme the name of Jehovah (Lev. xxiv. 16), to work on the Sabbath (Ex. xx. 10), to eat leavened bread at the time of the Passover (Ex. xii. 19), to commit any breach of the marriage laws (Lev. xviii. 26), to worship Molech (Lev. xv. 2), or to eat blood or the flesh of any animal that had died otherwise than by the hand of man (Lev. xvii. 10, 15). He was required to release a Hebrew servant in the year of Jubilee (Lev. xxv. 47–54), to observe the day of atonement (Lev. xvi. 29), to perform the rites of purification when necessary (Lev. xvii. 15; Num. xix. 10), and to offer sin-offerings after sins of ignorance (Num. xv. 29). If the stranger was a bondsman he was obliged to submit to circumcision (Ex. xii. 44); if he was independent, it was optional with him; but if he remained uncircumcised, he was prohibited from partaking of the Passover (Ex. xii. 48), and could not be regarded as a full citizen. Liberty was also given in regard to the use of prohibited food to an uncircumcised stranger; for on this ground alone can we harmonize the statements in Deut. xiv. 21 and Lev. xvii. 10, 15. Assuming, however, that the stranger was circumcised, no distinction existed in regard to legal rights between the stranger and the Israelite: "one law" for both classes is a principle affirmed in respect to religious

---

[a] נָכְרִי. [b] זָרִים. [c] אֶזְרָח.

[d] תּוֹשָׁב, גֵּר. These terms appear to describe not two different classes of strangers, but the stranger under two different aspects, *gêr* rather implying his foreign origin, or the fact of his having *turned aside* to abide with another people, *tôshâb* implying his permanent *residence* in the land of his adoption. Winer (Lexicon. "Fremde") regards the latter as equivalent to hireling. Jahn (*Archæol.* i. 11, § 181) explains *tôshâb* of one who, whether Hebrew or foreigner, was destitute of a home. We see no evidence for either of these opinions. In the LXX. these terms are most frequently rendered by *πάροικος*, the Alexandrian substitute for the classical *μέτοικος*. Sometimes προσήλυτος is used, and in two passages (Ex. xii. 19; Is. xiv. 1) ἐπήλυτος, as representing the Chaldee form of the word *gêr*.

Digitized by Google

observances (Ex. xii. 49; Num. xv. 16), and to legal proceedings (Lev. xxiv. 22), and the judges are strictly warned against any partiality in their decisions (Deut. i. 16, xxiv. 17, 18). The Israelite is also enjoined to treat him as a brother (Lev. xix. 34; Deut. x. 19), and the precept is enforced in each case by a reference to his own state in the land of Egypt. Such precepts were needed in order to counteract the natural tendency to treat persons in the position of strangers with rigor. For, though there was the possibility of a stranger acquiring wealth and becoming the owner of Hebrew slaves (Lev. xxv. 47), yet his normal state was one of poverty, as implied in the numerous passages where he is coupled with the fatherless and the widow (*e. g.* Ex. xxii. 21–23; Deut. x. 18, xxiv. 17), and in the special directions respecting his having a share in the feasts that accompanied certain religious festivals (Deut. xvi. 11, 14, xxvi. 11), in the leasing of the cornfield, the vineyard, and the olive-yard (Lev. xix. 10, xxiii. 22; Deut. xxiv. 20), in the produce of the triennial tithe (Deut. xiv. 28, 29), in the forgotten sheaf (Deut. xxiv. 19), and in the spontaneous production of the soil in the sabbatical year (Lev. xxv. 6). It also appears that the "stranger" formed the class whence the hirelings were drawn: the terms being coupled together in Ex. xii. 45; Lev. xxii. 10, xxv. 6, 40. Such laborers were engaged either by the day (Lev. xix. 13; Deut. xxiv. 15), or by the year (Lev. xxv. 53), and appear to have been considerately treated, for the condition of the Hebrew slave is favorably compared with that of the hired servant and the sojourner in contradistinction to the bondman (Lev. xxv. 39, 40). A less fortunate class of strangers, probably captives in war or for debt, were reduced to slavery, and were subject to be bought and sold (Lev. xxv. 45), as well as to be put to task-work, as was the case with the Gibeonites (Josh. ix. 21) and with those whom Solomon employed in the building of the Temple (2 Chr. ii. 18). The liberal spirit of the Mosaic regulations respecting strangers presents a strong contrast to the rigid exclusiveness of the Jews at the commencement of the Christian era. The growth of this spirit dates from the time of the Babylonish Captivity, and originated partly in the outrages which the Jews suffered at the hands of foreigners, and partly through a fear lest their nationality should be swamped by constant admixture with foreigners: the latter motive appears to have dictated the stringent measures adopted by Nehemiah (Neh. ix. 2, xiii. 3). Our Lord condemns this exclusive spirit in the parable of the good Samaritan, where He defines the term "neighbor" in a sense new to his hearers (Luke x. 36). It should be observed, however, that the proselyte[a] of the New Testament is the true representative of the stranger of the Old Testament, and towards this class a cordial feeling was manifested. [PROSELYTE.] The term "stranger" (ξένος) is generally used in the New Testament in the general sense of *foreigner*, and occasionally in its more technical sense as opposed to a citizen (Eph. ii. 19).[b] W. L. B.

STRAW (תֶּבֶן, *teben*: ἄχυρον: *palea*). Both wheat and barley straw were used by the ancient Hebrews chiefly as fodder for their horses, cattle, and camels (Gen. xxiv. 25; 1 K. iv. 28; Is. xi. 7 lxv. 25). The straw was probably often chopped and mixed with barley, beans, etc., for provender (see Harmer's *Observations*, i. 423, 424; Wilkinson, *Anc. Egypt.* ii. 48, Lond. 1854). There is no intimation that straw was used for litter; Harmer thinks it was not so employed; the litter the people now use in those countries is the animals' dung, dried in the sun and bruised between their hands, which they heap up again in the morning, sprinkling it in the summer with fresh water to keep it from corrupting (*Obs.* p. 424, Lond. 1797). Straw was employed by the Egyptians for making bricks (Ex. v. 7, 16): it was chopped up and mixed with the clay to make them more compact and to prevent their cracking (*Anc. Egypt.* ii. 194). [BRICKS.] The ancient Egyptians reaped their corn close to the ear, and afterwards cut the straw close to the ground (*Ibid.* p. 48) and laid it by. This was the straw that Pharaoh refused to give to the Israelites, who were therefore compelled to gather "stubble" (קַשׁ, *Kash*) instead, a matter of considerable difficulty, seeing that the straw itself had been cut off near to the ground. The *stubble* frequently alluded to in the Scriptures may denote either the short standing straw, mentioned above, which was commonly set on fire, hence the allusions in Is. v. 24; Joel ii. 5, or the small fragments that would be left behind after the reapings, hence the expression, "as the *kash* before the wind" (Ps. lxxxiii. 13; Is. xli. 2; Jer. xiii. 24). W. H.

STREAM OF EGYPT (נַחַל מִצְרַיִם: Πινακόρουρα (pl.): *torrens Ægypti*) once occurs in the A. V. instead of "the river of Egypt," apparently to avoid tautology (Is. xxvii. 12). It is the best translation of this doubtful name, for it expresses the sense of the Hebrew while retaining the vagueness it has, so long as we cannot decide whether it is applied to the Pelusian branch of the Nile or the stream of the *Wadi-l-'Areesh*. [RIVER OF EGYPT; NILE.] R. S. P.

STREET (שׁוּק, רְחוֹב, רְחוֹב: πλατεῖα, ῥύμη). The streets of a modern oriental town present a great contrast to those with which we are familiar, being generally narrow, tortuous, and gloomy, even in the best towns, such as Cairo (Lane, i. 25), Damascus (Porter, i. 30), and Aleppo (Russell, i. 14). Their character is mainly fixed by the climate and the style of architecture, the narrowness being due to the extreme heat, and the gloominess to the circumstance of the windows looking for the most part into the inner court. As these same influences existed in ancient times, we should be inclined to think that the streets were much of the same character as at present. The opposite opinion has, indeed, been maintained on account of the Hebrew term *rĕchôb*, frequently applied to streets, and properly meaning a *wide* place. The specific signification of this term is rather a court-yard or square: it is applied in this sense to the broad open space adjacent to the gate of a town, where public business was transacted (Deut. xiii. 16), and, again, to the court before the Temple (Ezr. x. 9) or before a palace (Esth. iv. 6). Its application to the street may point to the *comparative* width of the main street, or it may per-

[a] The term προσήλυτος occurs in the LXX. as = גֵּר in Ex. xii. 19, xx. 10, xxii. 21, xxiii. 9.

[b] "Strangers of Rome" (οἱ ἐπιδημοῦντες Ῥωμαῖοι), Acts ii. 10, are literally "Romans who are sojourners," *i. e.* as the subjoined apposition shows "Jews and proselytes" who had come to Jerusalem from Rome.

Digitized by Google

saps convey the idea of *publicity* rather than of width, a sense well adapted to the passages in which it occurs (*e. g.* Gen. xix. 2; Judg. xix. 15: 2 Sam. xxi. 12). The street called "Straight," in Damascus (Acts ix. 11), was an exception to the rule of narrowness: it was a noble thoroughfare, 100 feet wide, divided in the Roman age by colonnades into three avenues, the central one for foot passengers, the side passages for vehicles and horsemen going in different directions (Porter, i. 47). The shops and warehouses were probably collected together into bazars in ancient as in modern times: we read of the bakers' bazar (Jer. xxxvii. 21), and of the wool, brazier, and clothes bazars (ἀγορά) in Jerusalem (Joseph. *B. J.* v. 8, § 1), and perhaps the agreement between Benhadad and Ahab, that the latter should "make streets in Damascus" (1 K. xx. 34), was in reference rather to bazars (the term *chûts* here used being the same as in Jer. xxxvii. 21), and thus amounted to the establishment of a *jus commercii*. A lively description of the bazars at Damascus is furnished us by Porter (i. 58–60). The broad and narrow streets are distinguished under the terms *rĕchôb* and *chûts* in the following passages, though the point is frequently lost in the A. V. by rendering the latter term "abroad" or "without": Prov. v. 16, vii. 12, xxii. 13; Jer. v. 1, ix. 21; Am. v. 16; Nah. ii. 4. The same distinction is apparently expressed by the terms *rĕchôb* and *shûk* in Cant. iii. 2, and by πλατεῖα and ῥύμη in Luke xiv. 21: but the etymological sense of *shûk* points rather to a place of *concourse*, such as a marketplace, while ῥύμη is applied to the "Straight" street of Damascus (Acts ix. 11), and is also used in reference to the Pharisees (Matt. vi. 2) as a place of the greatest publicity: it is therefore doubtful whether the contrast can be sustained: Josephus describes the alleys of Jerusalem under the term στενωποί (*B. J.* v. 8, § 1). The term *shûk* occurs elsewhere only in Prov. vii. 8; Eccl. xii. 4, 5. The term *chûts*, already noticed, applies generally to that which is *outside* the residence (as in Prov. vii. 12, A. V. "she is without"), and hence to other places than streets, as to a pasture-ground (Job xviii. 17, where the A. V. requires emendation). That streets occasionally had names appears from Jer. xxxvii. 21; Acts ix. 11. That they were generally unpaved may be inferred from the notices of the pavement laid by Herod the Great at Antioch (Joseph. *Ant.* xvi. 5, § 3), and by Herod Agrippa II. at Jerusalem (*Ant.* xx. 9, § 7). Hence pavement forms one of the peculiar features of the ideal Jerusalem (Tob. xiii. 17; Rev. xxi. 21). Each street and bazar in a modern town is locked up at night (Lane, i. 25; Russell, i. 21), and hence a person cannot pass without being observed by the watchman: the same custom appears to have prevailed in ancient times (Cant. iii. 3).

* **STRIKING THE MOUTH.** [PUNISHMENTS, Amer. ed.]

**STRIPES.** [PUNISHMENTS.]

**SU'AH** (סוּחַ [*filth*]: Σουέ; [Vat. corrupt:] *Sue*). Son of Zophah, an Asherite (1 Chr. vii. 36).

**SU'BA** (Σαβά; [Vat.] Alex. Σουβας: *Suba*). The sons of Suba were among the sons of Solomon's servants who returned with Zerubbabel (1 Esdr. v. 34). There is nothing corresponding to the name in the Hebrew lists of Ezra and Nehemiah.

**SU'BAI** (Συβαί; [Vat.] Alex. Συβαει: *Obai*) = SHALMAI (1 Esdr. v. 30; comp. Ezr. ii. 46).

* **SUBURBS**, as the composition of the word (*sub* and *urbs*) would imply, designates anything, as land or buildings, under the walls of a town, *i. e.* lying close around it. In several O. T. passages it designates land given to the Levites in connection with their cities as pasturage for their animals and for other purposes. See Lev. xxv. 34; Num. xxxv. 3 ff. and elsewhere. Num. xxxv. 5 gives the extent of the territory designated as sub urbe. The usual Hebrew term denoting such dependencies is מִגְרָשׁ, properly a place whither flocks and herds are driven.

R. D. C. R.

**SUC'COTH** (סֻכּוֹת [*booths*]: Σκηναί in Gen. [and Ps.,] elsewhere Σοκχώθ, Σοκχωθά; [Vat. in 2 Chr. iv. 17,] Σεχχωθ; Alex. Σοκχωθ, [in Josh. xiii. 27, Σωχω:] in Gen. *Socoth, id est, tabernacula*; [*Socoth,*] *Soccoth*, [*Sochoth, Sochot*]). A town of ancient date in the Holy Land, which is first heard of in the account of the homeward journey of Jacob from Padan-aram (Gen. xxxiii. 17). The name is fancifully derived from the fact of Jacob's having there put up "booths" (*Succóth*, סֻכֹּת) for his cattle, as well as a house for himself. Whether that occurrence originated the name of Succoth (and, following the analogy of other history, it is not probable that it did), the mention of the house and the booths in contrast to the "tents" of the wandering life indicates that the Patriarch made a lengthened stay there — a fact not elsewhere alluded to.

From the itinerary of Jacob's return it seems that Succoth lay between PENIEL, near the ford of the torrent Jabbok, and Shechem (comp. xxxii. 30, and xxxiii. 18, which latter would be more accurately rendered "Came safe to the city Shechem"). In accordance with this is the mention of Succoth in the narrative of Gideon's pursuit of Zebah and Zalmunna (Judg. viii. 5–17). His course is eastward — the reverse of Jacob's — and he comes first to Succoth, and then to Penuel, the latter being further up the mountain than the former (ver. 8, "went up thence"). Its importance at this time is shown by the organization and number of its seventy-seven head-men — chiefs and [a] sheikhs — and also by the defiance with which it treated Gideon on his first application.[b]

---

[a] זִקְנֵי, A. V. "elders." The word has exactly the signification of the Arabic *Sheikh*, an old man, and hence the head of a tribe.

[b] * Gideon is he was pursuing Zebah and Zalmunna, kings of Midian, threatened to "tear the flesh of the princes of Succoth," because they refused to supply his men with bread (Judg. viii. 6 ff.). On returning from his victory he executed that menace. He took the elders of the city and thorns of the wilderness and briars, and with them he taught (punished) the men of Succoth." The Egyptians in like manner sentenced certain criminals "to be lacerated with sharpened reeds, and after being thrown on thorns to be burnt to death" (Wilkinson, *Ancient Egyptians*, ii. 209). Dr. Robinson found almost a forest of thistles at Sûkût (Succoth) sometimes so high as to overtop the rider's head on horseback (*Later Res.*, p. 313). Such thickets however are by no means peculiar to any one locality in Palestine.

H

Digitized by Google

It would appear from this passage that it lay on the east of Jordan, which is corroborated by the fact that it was allotted to the tribe of Gad (Josh. xiii. 27). In the account of Jacob's journey, all mention of the Jordan is omitted.

Succoth is named once again after this — in 1 K. vii. 46; 2 Chr. iv. 17 — as marking the spot at which the brass foundries were placed for casting the metal-work of the Temple, "in the district of Jordan, in the fat or soft ground between Succoth and Zarthan." But, as the position of Zarthan is not yet known, this notice has no topographical value beyond the mention of the Jordan.

It appears to have been known in the time of Jerome, who says (*Quæst. in Gen.* xxxiii. 16) that there was then a town named Sochoth beyond the Jordan (*trans Jordanem*), in the district (*parte*) of Scythopolis. Nothing more, however, was heard of it till Burckhardt's journey. He mentions it in a note to p. 345 (July 2). He is speaking of the places about the Jordan, and, after naming three ruined towns "on the west side of the river to the north of Bysan," he says: "Near where we crossed to the south are the ruins of Sukkot (سقط). On the western bank of the river there are no ruins between Ain Sultan (which he has just said was the southernmost of the three ruined places north of Bysan) and Rieha or Jericho." There can, therefore, be no doubt that the Sukkot of Burckhardt was on the east of the Jordan. The spot at which he crossed he has already stated (pp. 343, 344) to have been "two hours from Bysan, which bore N. N. W."

Dr. Robinson (*Bibl. Res.* iii. 309, &c.) and Mr. Van de Velde (*Syr. and Pal.* ii. 343) have discovered a place named *Sâkût* (ساكوت), evidently entirely distinct both in name and position from that of Burckhardt. In the accounts and maps of these travellers it is placed on the west side of the Jordan, less than a mile from the river, and about 10 miles south of *Beisân*. A fine spring bubbles out on the east side of the low bluff on which the ruins stand. The distance of *Sâkût* from *Beisân* is too great, even if it were on the other side of the Jordan, to allow of its being the place referred to by Jerome. The *Sukkot* of Burckhardt is more suitable. But it is doubtful whether either of them can be the Succoth of the Old Test. For the events of Gideon's story the latter of the two is not unsuitable. It is in the line of flight and pursuit which we may suppose the Midianites and Gideon to have taken, and it is also near a ford. *Sâkût*, on the other hand, seems too far south, and is also on the west of the river. But both appear too far to the north for the Succoth of Jacob, lying as that did between the Jabbok and Shechem, especially if we place the *Wady Zerka* (usually identified with the Jabbok) further to the south than it is placed in Van de Velde's map, as Mr. Beke[a] proposes to do. Jacob's direct road from the *Wady Zerka* to Shechem would have led him by the *Wady Fevvah*, on the one hand, or through *Yabûs*, on the other. If he went north as far as *Sâkût*, he must have ascended by the *Wady Malek* to *Teyasîr*, and so through *Tubâs* and the *Wady Bidân*. Perhaps his going north was a ruse to escape the dangerous proximity of Esau; and if he made a long stay at Succoth, as suggested in the outset of this article, the *détour* from the direct road to Shechem would be of little importance to him.

Until the position of Succoth is more exactly ascertained, it is impossible to say what was the VALLEY OF SUCCOTH mentioned in Ps. lx. 6 and cviii. 7. The word rendered "Valley" is *'émek* in both cases (ἡ κοίλας τῶν σκηνῶν: *Vallis Soccoth*). The same word is employed (Josh. xiii. 27) in specifying the position of the group of towns amongst which Succoth occurs, in describing the allotment of Gad. So that it evidently denotes some marked feature of the country. It is not probable, however, that the main valley of the Jordan, the *Ghôr*, is intended, that being always designated in the Bible by the name of "the Arabah." G.

**SUC'COTH** (סֻכּוֹת [*booths*]: Σοκχόθ; [ex. xii. 37, Vat. Σοκχωθα:] *Socoth, Soccoth*, "booths," or "tents"), the first camping-place of the Israelites when they left Egypt (Ex. xii. 37, xiii. 20; Num. xxxiii. 5, 6). This place was apparently reached at the close of the first day's march. It can scarcely be doubted that each of the first three stations marks the end of a single journey. Rameses, the starting-place, we have shown was probably near the western end of the *Wâdi-t-Tumeylât*. We have calculated the distance traversed in each day's journey to have been about fifteen miles, and as Succoth was not in the desert, the next station, Etham, being "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6), it must have been in the valley, and consequently nearly due east of Rameses, and fifteen miles distant in a straight line. If Rameses may be supposed to have been near the mound called *El-'Abbâseeyeh*, the position of Succoth can be readily determined within moderate limits of uncertainty. It was probably, to judge from its name, a resting-place of caravans, or a military station, or a town named from one of the two. We find similar names in Scenæ Mandræ (*Itin. Ant.*), Scenæ Mandrorum (*Not. Dign.*) or Σκηναὶ Μανδρῶν (*Not. Græc. Episcopatuum*), Scenæ Veteranorum (*It. Ant. Not. Dign.*), and *Scenæ extra Gerasa* (*sic: Not. Dign.*). See, for all these places, Parthey, *Zur Erdkunde des alten Ægyptens*, p. 535. It is, however, evident that such a name would be easily lost, and even if preserved, hard to recognize, as it might be concealed under a corresponding name of similar signification, though very different in sound, as that of the settlement of Ionian and Carian mercenaries, called τὰ Στρατόπεδα (Herod. ii. 154).

We must here remark upon the extreme carelessness with which it has been taken for granted that the whole journey to the Red Sea was through the desert, and an argument against the authenticity of the sacred narrative based upon evidence which it not only does not state but contradicts. For as we have seen, Etham, the second camping-place,

[a] This gentleman, an old and experienced traveller, has lately returned from a journey between Damascus, the *Wady Zerka*, and *Nâblus*. It was undertaken with the view of testing his theory that Haran was in the neighborhood of Damascus [HARAN, Amer. ed.]. Without going into that question, all that concerns us here is to say that he has fixed the latitude of the mouth of the *Wady Zerka* at 32° 12′, or more than ten miles south of its position in Van de Velde's map. Mr. Beke's paper and map will be published in the *Journal* of the R. Geogr. Society for 1862.

Digitized by Google

was "in the edge of the wilderness," and the country was once cultivated along the valley through which passed the canal of the Red Sea. The demand that Moses was commissioned to make, that the Israelites might take "three days' journey into the wilderness" (Ex. iii. 18), does not imply that the journey was to be of three days through the wilderness, but rather that it would be necessary to make three days' journey in order to sacrifice in the wilderness. [EXODUS, THE; RED SEA, PASSAGE OF.] R. S. P.

**SUCCOTH-BE'NOTH** (סְכּוֹת־בְּנוֹת [*booths of daughters*]: Σοκχώθ Βενίθ [Vat. Ροκχωθ Βαιτειθει, Alex. Σοκχωθ Βενιθει]: *Sochoth-benoth*) occurs only in 2 K. xvii. 30, where the Babylonish settlers in Samaria are said to have set up the worship of Succoth-benoth on their arrival in that country. It has generally been supposed that this term is pure Hebrew, and signifies the "tents of daughters;" which some explain as "the booths in which the daughters of the Babylonians prostituted themselves in honor of their idol," others as "small tabernacles in which were contained images of female deities" (compare Gesenius and S. Newman, *ad voc.* סֻכָּה; Winer, *Realwörterbuch*, ii. 543; Calmet, *Commentaire Littéral*, ii. 897). It is a strong objection to both these explanations, that Succoth-benoth, which in the passage in Kings occurs in the same construction with Nergal and various other gods, is thus not a deity at all, nor, strictly speaking, an object of worship. Perhaps therefore the suggestion of Sir H. Rawlinson, against which this objection does not lie, may be admitted to deserve some attention. This writer thinks that Succoth-benoth represents the Chaldæan goddess *Zir-banit*, the wife of Merodach, who was especially worshipped at Babylon, in conjunction with her husband, and who is called the "queen" of the place. *Succoth* he supposes to be either "a Hamitic term equivalent to *Zir*," or possibly a Shemitic mistranslation of the term — *Zirat*, "supreme," being confounded with *Zarat*, "tents." (See the *Essay* of Sir H. Rawlinson in Rawlinson's *Herodotus*, vol. i. p. 630.) G. R.

**SU'CHATHITES** (שׁוּחָתִי [patr. whence unknown]: [Σωχαθμι; Vat. Alex.] Σωκαθιειμ: *in tabernaculis commorantes*). One of the families of scribes at Jabez (1 Chr. ii. 55).

**SUD** (Σούδ: *Sodi*). A river in the immediate neighborhood of Babylon, on the banks of which Jewish exiles lived (Bar. i. 4). No such river is known to geographers: but if we assume that the first part of the book of Baruch was written in Hebrew, the original text may have been Sur, the final ר having been changed into ד. In this case the name would represent, not the town of Sora, as suggested by Bochart (*Phaleg*, i. 8), but the river Euphrates itself, which is always named by Arab geographers "the river of Sura," a corruption probably of the "Sippara" of the inscriptions (Rawlinson's *Herod.* i. 611, note 4). W. L. B.

**SUD** (Σουδ; [Vat. Σουα;] Alex. Σουσα; [Ald. Σούδ:] *Su*) = SIA, or SIAHA (1 Esdr. v. 29; comp. Neh. vii. 47; Ezr. ii. 44).

**SUDI'AS** (Σουδίας: *Serebias et Edias*) = HODAVIAH 3 and HODEVAH (1 Esdr. v. 26; comp. Ezr. iii. 40; Neh. vii. 43).

**SUK'KIIMS** (סֻכִּיִּים [*booth-dwellers*]. [Rom. Vat. Τραγοδύται; Alex.] Τραγλοδυται: *Troglodita*), a nation mentioned (2 Chr. xii. 3) with the Lubim and Cushim as supplying part of the army which came with Shishak out of Egypt when he invaded Judah. Gesenius (*Lex.* s. v.) suggests that their name signifies "dwellers in tents," in which case it might perhaps be better to suppose them to have been an Arab tribe like the Scenitæ, than Ethiopians. If it is borne in mind that Zerah was apparently allied with the Arabs south of Palestine [ZERAH], whom we know Shishak to have subdued [SHISHAK], our conjecture does not seem to be improbable. The Sukkiims may correspond to some one of the shepherd or wandering races mentioned on the Egyptian monuments, but we have not found any name in hieroglyphics resembling their name in the Bible, and this somewhat favors the opinion that it is a Shemitic appellation. R. S. P.

* **SUMMER.** [AGRICULTURE, p. 40 *b* PALESTINE, p. 2317; RAIN.]

* **SUMMER-PARLOR.** [HOUSE, p. 1105.]

**SUN** (שֶׁמֶשׁ). In the history of the creation the sun is described as the "greater light" in contradistinction to the moon or "lesser light," in conjunction with which it was to serve "for signs and for seasons, and for days, and for years,' while its special office was "to rule the day" (Gen i. 14–16). The "signs" referred to were probably such extraordinary phenomena as eclipses which were regarded as conveying premonitions of coming events (Jer. x. 2; Matt. xxiv. 29, with Luke xxi. 25). The joint influence assigned to the sun and moon in deciding the "seasons," both for agricultural operations and for religious festivals, and also in regulating the length and subdivisions of the "years," correctly describes the combination of the lunar and solar year, which prevailed at all events subsequently to the Mosaic period — the moon being the *measurer* (κατ' ἐξοχήν) of the lapse of time by the subdivisions of months and weeks, while the sun was the ultimate *regulator* of the length of the year by means of the recurrence of the feast of Pentecost at a fixed agricultural season, namely, when the corn became ripe. The sun "ruled the day" alone, sharing the dominion of the skies with the moon, the brilliancy and utility of which for journeys and other purposes enhances its value in eastern countries. It "ruled the day," not only in reference to its powerful influences, but also as deciding the length of the day and supplying the means of calculating its progress. Sun-rise and sun-set are the only defined points of time in the absence of artificial contrivances for telling the hour of the day: and as these points are less variable in the latitude of Palestine than in our country, they served the purpose of marking the commencement and conclusion of the working day. Between these two points the Jews recognized three periods, namely, when the sun became hot, about 9 A. M. (1 Sam. xi. f. Neh. vii. 3); the double light or noon (Gen. xliii 16; 2 Sam. iv. 5), and "the cool of the day" shortly before sunset (Gen. iii. 8). The sun also served to fix the quarters of the hemisphere, east, west, north, and south, which were represented respectively by the rising sun, the setting sun (Is. xlv. 6; Ps. l. 1), the dark quarter (Gen. xlii. 14; Joel ii. 20), and the brilliant quarter (Deut. xxxiii

Digitized by Google

28; Job xxxvii. 17; Es. xl. 24); or otherwise by their position relative to a person facing the rising sun — before, behind, on the left hand, and on the right hand (Job xxiii. 8, 9). The apparent motion of the sun is frequently referred to in terms that would imply its reality (Josh. x. 13; 2 K. xx. 11; Ps. xix. 6; Eccl. i. 5; Hab. iii. 11). The ordinary name for the sun, *shemesh*, is supposed to refer to the extreme brilliancy of its rays, producing *stupor* or *astonishment* in the mind of the beholder; the poetical names, *chammâh*[a] (Job xxx. 28; Cant. vi. 10; Is. xxx. 26), and *cheres*[b] (Judg. xiv. 18; Job ix. 7) have reference to its heat, the beneficial effects of which are duly commemorated (Deut. xxxiii. 14; Ps. xix. 6), as well as its baneful influence when in excess (Ps. cxxi. 6; Is. xlix. 10; Jon. iv. 8; Ecclus. xliii. 3, 4). The vigor with which the sun traverses the heavens is compared to that of a "bridegroom coming out of his chamber," and of a "giant rejoicing to run his course" (Ps. xix. 5). The speed with which the beams of the rising sun dart across the sky, is expressed in the term "wings" applied to them (Ps. cxxxix. 9; Mal. iv. 2).

The worship of the sun, as the most prominent and powerful agent in the kingdom of nature, was widely diffused throughout the countries adjacent to Palestine. The Arabians appear to have paid direct worship to it without the intervention of any statue or symbol (Job xxxi. 26, 27; Strab. xvi. p. 784), and this simple style of worship was probably familiar to the ancestors of the Jews in Chaldæa and Mesopotamia. In Egypt the sun was worshipped under the title of Rê or Ra, and not as was supposed by ancient writers under the form of Osiris (Diod. Sic. i. 11; see Wilkinson's *Anc. Eg.* iv. 289): the name came conspicuously forward as the title of the kings, Pharaoh, or rather Phra, meaning "the sun" (Wilkinson, iv. 287). The Hebrews must have been well acquainted with the idolatrous worship of the sun during the Captivity in Egypt, both from the contiguity of On, the chief seat of the worship of the sun as implied in the name itself (On = the Hebrew Beth-shemesh, "house of the sun," Jer. xliii. 13), and also from the connection between Joseph and Potipherah ("he who belongs to Ra"), the priest of On (Gen. xli. 45). After their removal to Canaan, the Hebrews came in contact with various forms of idolatry, which originated in the worship of the sun; such as the Baal of the Phœnicians (Movers, *Phön.* i. 180), the Moloch or Milcom of the Ammonites, and the Hadad of the Syrians (Plin. xxxvii. 71). These idols were, with the exception of the last, introduced into the Hebrew commonwealth at various periods (Judg. ii. 11; 1 K. xi. 5); but it does not follow that the object symbolized by them was known to the Jews themselves. If we have any notice at all of conscious sun-worship in the early stages of their history, it exists in the doubtful term *chammânim*[c] (Lev. xxvi. 30; Is. xvii. 8, &c.), which was itself significant of the sun, and probably described the stone pillars or statues under which the solar Baal (Baal-Haman of the Punic inscriptions, Gesen. *Thes.* i. 489) was worshipped at Baal-Hamon (Cant. viii. 11) and other places. Pure sun-worship appears to have been introduced by the Assyrians, and to have become formally established by Manasseh (2 K. xxi. 3, 5), in contravention of the prohibitions of Moses (Deut. iv. 19, xvii. 3). Whether the practice was borrowed from the Sepharvites of Samaria (2 K. xvii. 31), whose gods Adrammelech and Anammelech are supposed to represent the male and female sun, and whose original residence (the Heliopolis of Berosus) was the chief seat of the worship of the sun in Babylonia (Rawlinson's *Herod.* i. 611), or whether the kings of Judah drew their model of worship more immediately from the east, is uncertain. The dedication of chariots and horses to the sun (2 K. xxiii. 11) was perhaps borrowed from the Persians (Herod. i. 189; Curt. iii. 3, § 11. Xen. *Cyrop.* viii. 3, § 24), who honored the sun under the form of Mithras (Strab. xv. p. 732). At the same time it should be observed that the horse was connected with the worship of the sun in other countries, as among the Massagetæ (Herod. i. 216), and the Armenians (Xen. *Anab.* iv. 5, § 35), both of whom used it as a sacrifice. To judge from the few notices we have on the subject in the Bible, we should conclude that the Jews derived their mode of worshipping the sun from several quarters. The practice of burning incense on the house-tops (2 K. xxiii. 5, 12; Jer. xix. 13; Zeph. i. 5) might have been borrowed from the Arabians (Strab. xvi. p. 784), as also the simple act of adoration directed towards the rising sun (Ez. viii. 16; comp. Job xxxi. 27). On the other hand, the use of the chariots and horses in the processions on festival days came, as we have observed, from Persia; and so also the custom of "putting the branch to the nose" (Ez. viii. 17), according to the generally received explanation, which identifies it with the Persian practice of holding in the left hand a bundle of twigs called Barsam while worshipping the sun (Strab. xv. p. 733; Hyde, *Rel. Pers.* p. 345). This, however, is very doubtful, the expression being otherwise understood of "putting the knife to the nose," *i. e.* producing self-mutilation (Hitzig, *On Ezek.*). An objection lies against the former view from the fact that the Persians are not said to have held the branch to the nose. The importance attached to the worship of the sun by the Jewish kings, may be inferred from the fact that the horses were stalled within the precincts of the temple (the term *parvar*[d] meaning not "suburb" as in the A. V., but either a portico or an outbuilding of the temple). They were removed thence by Josiah (2 K. xxiii. 11).

In the metaphorical language of Scripture the sun is emblematic of the law of God (Ps. xix. 7), of the cheering presence of God (Ps. lxxxiv. 11), of the person of the Saviour (John i. 9; Mal. iv. 2), and of the glory and purity of heavenly beings (Rev. i. 16, x. 1, xii. 1). W. L. B.

sthers, again, *Sárafend*. But none of these are satisfactory.

**SURETISHIP.** (1.) The A. V. rendering for *tôkê'îm*,[a] lit. in marg. "those that strike (hands)." (2.) The phrase[b] *tôsémeth yâd*, "depositing in the hand," i. e. giving in pledge, may be understood to apply to the act of pledging, or virtual though not personal suretiship (Lev. vi. 2, in Heb. v. 21). In the entire absence of commerce the Law laid down no rules on the subject of suretiship, but it is evident that in the time of Solomon commercial dealings had become so multiplied that suretiship in the commercial sense was common (Prov. vi. 1, xi. 15, xvii. 18, xx. 16, xxii. 26, xxvii. 13). But in older times the notion of one man becoming a surety for a service to be discharged by another was in full force (see Gen. xliv. 32), and it is probable that the same form of undertaking existed, namely, the giving the hand to (striking hands with), not, as Michaelis represents, the person who was to discharge the service — in the commercial sense the debtor — but the person to whom it was due, the creditor (Job xvii. 3; Prov. vi. 1; Michaelis, *Laws of Moses*, § 151, ii. 322, ed. Smith). The surety of course became liable for his client's debts in case of his failure. In later Jewish times the system had become common, and caused much distress in many instances, yet the duty of suretiship in certain cases is recognized as valid (Ecclus. viii. 13, xxix. 14, 15, 16, 18, 19). * **SURETY.** [SURETISHIP; PLEDGE.]

**SUSA** ([Σοῦσα:] *Susan*). Esth. xi. 3, xvi. 18. [SHUSHAN.]

**SU'SANCHITES** (שׁוּשַׁנְכָיֵא [see below]: Σουσαναχαῖοι; [Vat. M. -συσ-:] *Susanechaei*) is found once only — in Ezr. iv. 9, where it occurs among the list of the nations whom the Assyrians had settled in Samaria, and whose descendants still occupied the country in the reign of the Pseudo-Smerdis. There can be no doubt that it designates either the inhabitants of the city Susa (שׁוּשַׁן), or those of the country — Susis or Susiana — wherein Susa was the capital. Perhaps as the Elamites are mentioned in the same passage, and as Daniel (viii. 2) seems to call the country Elam and the city Shushan (or Susa), the former explanation is preferable. (See SHUSHAN.) G. R.

**SUSAN'NA** ([Theodot.] Σουσάννα, [Alex.] Σουσαννα; [LXX. Σουσάννα:] i. e. שׁוֹשַׁנָּה, "a lily"). 1. The heroine of the story of the Judgment of Daniel. [DANIEL, APOCRYPHAL ADDITIONS TO.] The name occurs in Diod. Sic. as that of the daughter of Ninus (ii. 6), and Shashan (1 Chr. ii. 31, 34, 35) is of the same origin and meaning (Ges. *Thes.* s. v.).

2. One of the women who ministered to the Lord (Luke viii. 3). B. F. W.

**SU'SI** (סוּסִי: Σουσί [Vat. -σει]: *Susi*). The father of Gaddi the Manassite spy (Num. xiii. 11).

**SWALLOW,** דְּרוֹר, *dĕrôr*, and עָגוּר, *ăgûr*, both thus translated in A. V. דְּרוֹר occurs twice, Ps. lxxxiv. 3, and Prov. xxvi. 2: transl. by LXX. *oeryón* and *στρουθός*; Vulg. *turtur* and *passer*. עָגוּר also twice, Is. xxxviii. 14, and Jer. viii. 7, both times in conjunction with סוּס or כּוּס, and rendered by LXX. περιστερά and *στρουθίον*, Vulg. "columba" and "ciconia." In each passage סוּס is rendered, probably correctly, by LXX. χελιδών (swallow), A. V. *crane* [CRANE], which is more probably the true signification of עָגוּר. סוּס is perhaps, connected with Arab. مسيسي (*'msissi*), applied to many warbling birds.

The rendering of A. V. for דְּרוֹר seems less open to question, and the original (quasi דְּרוֹר, "freedom") may include the swallow with other swiftly flying or free birds. The old commentators, except Bochart, who renders it "columba fera," apply it to the swallow from the love of freedom in this bird, and the impossibility of retaining it in captivity.

Whatever be the precise rendering, the characters ascribed in the several passages where the names occur, are strictly applicable to the swallow, namely, its swiftness of flight, its nesting in the buildings of the Temple, its mournful, garrulous note, and its regular migration, shared indeed in common with several others. But the turtle-dove, for which the LXX. have taken דְּרוֹר, was scarcely likely to be a familiar resident in the Temple inclosure. On Is. xxxviii. 14, "Like a swallow, so did I chatter," we may observe that the garrulity of the swallow was proverbial among the ancients (see Nonn Dionys. ii. 133, and Aristoph. *Batr.* 93). Hence its epithet κωτιλάς, "the twitterer," κωτιλάδας δὲ τὰς χελιδόνας, Athen. p. 622. See Anacr. 104, and ὀρθρογόη, Hes. *Op.* 566; and Virg. *Georg.* iv. 306.

Although Aristotle in his "Natural History," and Pliny following him, have given currency to the fable that many swallows bury themselves during winter, yet the regularity of their migration alluded to by the Prophet Jeremiah was familiarly recognized by the ancients. See Anacreon (*Od.* xxxiii.).

The ditty quoted by Athen. (p. 360) from Theognis is well known —

> Ἦλθ' ἦλθε χελιδών, καλὰς ὥρας ἄγουσα,
> καλοὺς ἰματιοῦς, ἐπὶ γαστέρα λευκά, ἐπὶ νῶτα μέλαινα.

So Ovid (*Fast.* ii. 853), "Præmuntia veris hirundo."

Many species of swallow occur in Palestine. All those familiar to us in Britain are found. The swallow (*Hirundo rustica*, L., var. *Cahirica*, Lichst.), martin (*Chelidon urbica*, L.), sand martin (*Cotyle riparia*, L.) abound. Besides these the eastern swallow (*Hir. rufula*, Tem.), which nestles generally in fissures in rocks, and the crag martin (*Cotyle rupestris*, L.), which is confined to mountain gorges and desert districts, are also common. See *Ibis*, vol. i. p. 27, vol. ii. p. 386. The crag martin is the only member of the genus which does not migrate from Palestine in winter. Of the genus *Cypselus* (swift), our swift (*Cypselus apus*, L.) is common, and the splendid alpine swift (*Cyps. melba*, L.) may be seen in a... suitable localities. A third species, peculiar, so far as is yet known

---

[a] תּוֹקְעִים: Vulg. *tegentes*: from תָּקַע, "strike" (Gen. p. 1617).

[b] תְּשׂוּמֶת יָד: τιμωρία.

to the northeast of Palestine, has recently been described under the name of *Cypselus Galileensis*.

Whatever be the true appellation for the swallow tribe in Hebrew, it would perhaps include the bee-eaters, so similar to many of the swallows, at least in the eyes of a cursory observer, in flight, note, and habits. Of this beautiful genus three species occur in Palestine, *Merops apiaster*, L., *Merops Persicus*, L., and in the valley of the Jordan *only*, the eastern sub-tropical form *Merops viridis*, L.

H. B. T.

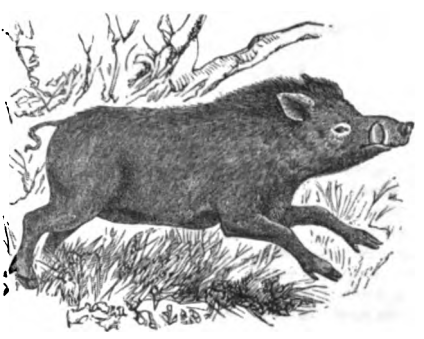
SWAN (תִּנְשֶׁמֶת, *tinshemeth*). Thus rendered by A. V. in Lev. xi. 18; Deut. xiv. 16, where it occurs in the list of unclean birds; LXX. πορφυρίων, ἶβις; Vulg. *porphyrio, ibis*. Bochart (*Hieroz.* ii. 290) explains it *noctua* (owl), and derives the name from שָׁמַם, "to astonish," because other birds are startled at the apparition of the owl. Gesenius suggests the *pelican*, from נָשַׁם, "to breathe, to puff," with reference to the inflation of its pouch. Whatever may have been the bird intended by Moses, these conjectures cannot be admitted as satisfactory, the owl and pelican being both distinctly expressed elsewhere in the catalogue. Nor is the A. V. translation likely to be correct. It is not probable that the swan was known to Moses or the Israelites, or at least that it was sufficiently familiar to have obtained a place in this list. Hasselquist indeed mentions his having seen a swan on the coast of Damietta, but though a regular winter visitant to Greece, only accidental stragglers wander so far south as the Nile, and it has not been observed by recent naturalists either in Palestine or Egypt. Nor, if it had been known to the Israelites, is it easy to understand why the swan should have been classed among the unclean birds. The renderings of the LXX., "porphyrio" and "ibis," are either of them more probable. Neither of these birds occur elsewhere in the catalogue, both would be familiar to residents in Egypt, and the original seems to point to some water-fowl. The Samaritan Version also agrees with the LXX. Πορφυρίων, *porphyrio antiquorum*, Bp., the purple water-hen, is mentioned by Aristotle (*Hist. An.* viii. 8), Aristophanes (*Av.* 707), Pliny (*Nat. Hist.* x. 63), and more fully described by Athenæus (*Deipn.* ix. 388). It is allied to our corn-crake and water-hen, and is the largest and most beautiful of the family *Rallidæ*, being larger than the domestic fowl, with a rich dark-blue plumage, and brilliant red beak and legs. From the extraordinary length of its toes it is enabled, lightly treading on the flat leaves of water-plants, to support itself without immersion, and apparently to run on the surface of the water. It frequents marshes and the sedge by the banks of rivers in all the countries bordering on the Mediterranean, and is abundant in Lower Egypt. Athenæus has correctly noted its singular habit of grasping its food with its very long toes, and thus conveying it to its mouth. It is distinguished from all the other species of *Rallidæ* by its short powerful mandibles, with which it crushes its prey, consisting often of reptiles and young birds. It will frequently seize a young duck with its long feet, and at once crunch the head of its victim with its beak. It is an omnivorous feeder, and from the miscellaneous character of its food, might reasonably find a place in the catalogue of unclean birds. Its flesh is rank, coarse, and very dark-colored. H. B. T.

SWEARING. [OATH.]

SWEAT, BLOODY. One of the physical phenomena attending our Lord's agony in the garden of Gethsemane is described by St. Luke (xxii. 44): "His sweat was as it were great drops (lit. clots, θρόμβοι) of blood falling down to the ground." The genuineness of this verse and of the preceding has been doubted, but is now generally acknowledged. They are omitted in A and B, but are found in the Codex Sinaiticus (ℵ), Codex Bezæ, and others, and in the Peshito, Philoxenian, and Curetonian Syriac (see Tregelles, *Greek New Test.*; Scrivener, *Introd. to the Crit. of the N. T.* p. 434), and Tregelles points to the notation of the section and canon in ver. 42 as a trace of the existence of the verse in the Codex Alexandrinus.

Of this malady, known in medical science by the term *diapedesis*, there have been examples recorded both in ancient and modern times. Aristotle was aware of it (*De Part. Anim.* iii. 5). The cause assigned is generally violent mental emotion. "Kannegiesser," quoted by Dr. Stroud (*Phys. Cause of the Death of Christ*, p. 86), "remarks, 'Violent mental excitement, whether occasioned by uncontrollable anger or vehement joy, and in like manner sudden terror or intense fear, forces out a sweat accompanied with signs either of anxiety or hilarity.' After ascribing this sweat to the unequal constriction of some vessels and dilatation of others, he further observes: 'If the mind is seized with a sudden fear of death, the sweat, owing to the excessive degree of constriction, often becomes bloody.'" Dr. Millingen (*Curiosities of Medical Experience*, p. 489, 2d ed.) gives the following explanation of the phenomenon: "It is probable that this strange disorder arises from a violent commotion of the nervous system, turning the streams of blood out of their natural course, and forcing the red particles into the cutaneous excretories. A mere relaxation of the fibres could not produce so powerful a revulsion. It may also arise in cases of extreme debility, in connection with a thinner condition of the blood."

The following are a few of the instances on record which have been collected by Calmet (*Diss. sur la Sueur du Sang*), Millingen, Stroud, Trusen (*Die Sitten, Gebräuche, und Krankheiten d. alt. Hebr.*, Breslau, 1853). Schenkius (*Obs. Med.* lib. iii. p. 458) mentions the case of a nun who was so terrified at falling into the hands of soldiers that blood oozed from all the pores of her body. The same writer says that in the plague of Miseno, in 1554, a woman who was seized sweated blood for three days. In 1552, Conrad Lycosthenes (*de Prodigiis*, p. 623, ed. 1557) reports, a woman sick of the plague sweated blood from the upper part of her body. Maldonato (*Comm. in Evang.*) gives an instance, attested by eye-witnesses, of a man at Paris in full health and vigor, who, hearing the sentence of death, was covered with a bloody sweat. According to De Thou (lib. xi. vol. i. p. 326, ed. 1626), the governor of Montemaro, being seized by stratagem and threatened with death, was so moved thereat that he sweated blood and water. Another case, recorded in the same historian (lib. lxxxii. vol. iv. p. 44), is that of a Florentine youth who was unjustly condemned to death by Pope Sixtus V. The death of Charles IX. of France was attended by the same phenomenon. Mezeray (*Hist. de France*, ii. 1170, ed. 1646) says of his last moments "Il s'agitoit et se remuoit sans cesse, et le sang luy jailliscoit par tous les conduits mesme par les



Digitized by Google

pores, de sorte qu'on le trouva une fois qui baignoit dedans." A sailor, during a fearful storm, is said to have fallen with terror, and when taken up his whole body was covered with a bloody sweat (Millingen, p. 488). In the *Mélanges d'Histoire* (iii. 179), by Dom Bonaventure d'Argonne, the case is given of a woman who suffered so much from this malady that, after her death, no blood was found in her veins. Another case, of a girl of 18 who suffered in the same way, is reported by Mesaporiti,[a] a physician at Genoa, accompanied by the observations of Vallisneri, Professor of Medicine at Padua. It occurred in 1703 (*Phil. Trans.* No. 303, p. 2144). There is still, however, wanted a well-authenticated instance in modern times, observed with all the care and attested by all the exactness of later medical science. That given in Caspar's *Wochenschrift*, 1848, as having been observed by Dr. Schneider, appears to be the most recent, and resembles the phenomenon mentioned by Theophrastus (*London Med. Gaz.*, 1848, vol. ii. p. 953). For further reference to authorities, see Copland's *Dict. of Medicine*, ii. 72. W. A. W.

**SWINE** (חֲזִיר, *chăzir*: ὗς, θεῖος, σῦς; χοῖρος in N. T.: *sus*, *aper*). Allusion will be found in the Bible to these animals, both (1) in their domestic and (2) in their wild state.

(1.) The flesh of swine was forbidden as food by the Levitical law (Lev. xi. 7; Deut. xiv. 8); the abhorrence which the Jews as a nation had of it may be inferred from Is. lxv. 4, where some of the idolatrous people are represented as "eating swine's flesh," and as having the "broth of abominable things in their vessels;" see also lxvi. 3, 17, and 2 Macc. vi. 18, 19, in which passage we read that Eleazar, an aged scribe, when compelled by Antiochus to receive in his mouth swine's flesh, "spit it forth, choosing rather to die gloriously than to live stained with such an abomination." The use of swine's flesh was forbidden to the Egyptian priests, to whom, says Sir G. Wilkinson (*Anc. Egypt.* i. 322), "above all meats it was particularly obnoxious" (see Herodotus, ii. 47; Ælian, *de Nat. Anim.* x. 16; Josephus, *Contr. Apion.* ii. 14), though it was occasionally eaten by the people. The Arabians also were disallowed the use of swine's flesh (see Pliny, viii. *H. N.* 52; Koran, ii. 175), as were also the Phœnicians, Æthiopians, and other nations of the East.

No other reason for the command to abstain from swine's flesh is given in the Law of Moses beyond the general one which forbade any of the mammalia as food which did not literally fulfill the terms of the definition of a "clean animal," namely, that it was to be a cloven-footed ruminant. The pig, therefore, though it divides the hoof, but does not chew the cud, was to be considered unclean; and consequently, inasmuch as, unlike the ass and the horse in the time of the Kings, no use could be made of the animal when alive, the Jews did not breed swine (Lactant. *Instit.* iv. 17). It is, however, probable that dietetical considerations may have influenced Moses in his prohibition of swine's flesh; it is generally believed that its use in hot countries is liable to induce cutaneous disorders; hence in a people liable to leprosy the necessity for the observance of a strict rule. "The reason of the meat not being eaten was its unwholesomeness, on which account it was forbidden to the Jews and Moslems" (Sir G. Wilkinson's *note* in Rawlinson's *Herodotus*, ii. 47). Ham. Smith, however (Kitto's *Cycl.* art. "Swine"), maintains that this reputed unwholesomeness of swine's flesh has been much exaggerated; and recently a writer in Colburn's *New Monthly Magazine* (July, 1862, p. 266) has endorsed this opinion. Other conjectures for the reason of the prohibition, which are more curious than valuable, may be seen in Bochart (*Hieroz.* i. 806, f.). Callistratus (apud Plutarch. *Sympos.* iv. 5) suspected that the Jews did not use swine's flesh for the same reason which, he says, influenced the Egyptians, namely, that this animal was sacred, inasmuch as by turning up the earth with its snout it first taught men the art of ploughing (see Bochart, *Hieroz.* i. 806, and a dissertation by Cassel, entitled *De Judæorum odio et abstinentia a porcina ejusque causis*, Magdeb.; also Michaelis, *Comment. on the Laws of Moses*, art. 203, iii. 230, Smith's transl.). Although the Jews did not breed swine, during the greater period of their existence as a nation, there can be little doubt that the heathen nations of Palestine used the flesh as food.

Wild Boar.

At the time of our Lord's ministry it would appear that the Jews occasionaly violated the law of Moses with respect to swine's flesh. Whether "the herd of swine" into which the devils were allowed to enter (Matt. viii. 32; Mark v. 13) were the property of the Jewish or Gentile inhabitants of Gadara does not appear from the sacred narrative; but that the practice of keeping swine did exist amongst some of the Jews seems clear from the enactment of the law of Hyrcanus, "ne cui porcum alere liceret" (Grotius, *Annot. ad Matt.* l. c.). Allusion is made in 2 Pet. ii. 22 to the fondness which swine have for "wallowing in the mire;" this, it appears, was a proverbial expression, with which may be compared the "amica luto sus" of Horace (*Ep.* i. 2, 26). Solomon's comparison of a "jewel of gold in a swine's snout" to a "fair woman without discretion" (Prov. xi. 22), and the expression of our Lord, "neither cast ye your pearls before swine," are so obviously intelligible as to render any remarks unnecessary. The transaction of the destruction of the herd of swine already alluded to, like the cursing of the barren fig-tree, has been the subject of most unfair cavil: it is well answered by Trench (*Miracles*, p. 173), who observes that "a man is of more value than many swine;" besides which it must be remembered that it is not necessary to suppose that our Lord

[a] So the name is given in the *Philos. Trans.*; Calmet writes it "M. Saporitius."

Digitized by Google

sent the devils into the swine. He merely permitted them to go, as Aquinas says, "quod autem porci in mare præcipitati sunt non fuit operatio divini miraculi, sed operatio dæmonum e permissione divinâ;" and if these Gadarene villagers were Jews and owned the swine, they were rightly punished by the loss of that which they ought not to have had at all.

(2.) The wild boar of the wood (Ps. lxxx. 13) is the common *Sus scrofa* which is frequently met with in the woody parts of Palestine, especially in Mount Tabor. The allusion in the psalm to the injury the wild boar does to the vineyards is well borne out by fact. "It is astonishing what havoc a wild boar is capable of effecting during a single night; what with eating and trampling under foot, he will destroy a vast quantity of grapes" (Hartley's *Researches in Greece*, p. 234).

W. H.

SWORD. [ARMS.]

SYCAMINE TREE (συκάμινος: *morus*) is mentioned once only, namely, in Luke xvii. 6, "If ye had faith as a grain of mustard-seed, ye might

*Morus nigra* (Mulberry).

say to this sycamine tree, Be thou plucked up," etc. There is no reason to doubt that the συκάμινος is distinct from the συκομωραία of the same Evangelist (xix. 4) [SYCAMORE], although we learn from Dioscorides (i. 180) that this name was sometimes given to the συκόμορος. The sycamine is the mulberry tree (*Morus*), as is evident from Dioscorides, Theophrastus (*H. P.* i. 6, § 1; 10, § 10; 13, § 4, &c.), and various other Greek writers; see Celsius, *Hierob.* i. 288. A form of the same word, συκαμινγά, is still one of the names for the mulberry tree in Greece (see Heldreich's *Nutzpflanzen Griechenlands*, Athen. 1862, p. 19. "Morus alba L. und M. nigra L. ἡ Μοργά, Μουργά, und Μουρνά, auch Συκαμινγά — pelasg. muré, — éd."). Both black and white mulberry trees are common in Syria and Palestine, and are largely cultivated there for the sake of supplying food to the caterpillars of the silk-worm, which are bred in great numbers. The mulberry tree is too well known to render further remarks necessary. W. H.

SYCAMORE (שִׁקְמָה, *shik'mâh*: συκάμινος. συκομωρέα or συκομωραία, in the N. T.: *sycamorus, morus, ficetum*). The Hebrew word occurs in the O. T. only in the plural form masc. and once fem., Ps. lxxviii. 47; and it is in the LXX. always translated by the Greek word συκάμινος. The two Greek words occur only once each in the N. T, συκάμινος (Luke xvii. 6), and συκομωραία (Luke xix. 4). Although it may be admitted that the *sycamine* is properly, and in Luke xvii. 6, the *mulberry*, and the *sycamore* the *fig-mulberry*, or sycamore-fig (*Ficus sycomorus*), yet the latter is the tree generally referred to in the O. T., and called by the LXX. *sycamine*, as 1 K. x. 27; 1 Chr. xxvii. 28; Ps. lxxviii. 47; Am. vii. 14. Dioscorides expressly says Συκόμορον, ἔνιοι δὲ καὶ τοῦτο συκάμινον λέγουσι, lib. i. cap. 180. Compare Gesenius, *Thesaurus Heb.* p. 1476 *b*; Winer, *Real.* ii. 65 ff.; Rosenmüller, *Alterthumskunde*, B. iv. § 281 ff.; Celsius, *Hierob.* i. 310.

The *sycamore*, or *fig-mulberry* (from σῦκον, *fig*, and μόρον, *mulberry*), is in Egypt and Palestine a tree of great importance and very extensive use. It attains the size of a walnut tree, has wide-spreading branches, and affords a delightful shade.[a] On this account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the under side, and fragrant. The fruit grows directly from the trunk itself on little sprigs, and in clusters like the grape. To make it eatable, each fruit, three or four days before gathering, must, it is said, be punctured with a sharp instrument or the finger-nail. Comp. Theophrastus, *De Caus. Plant.* i. 17, § 9; *Hist. Pl.* iv. 2, § 1; Pliny, *H. N.* xiii. 7; Forskål, *Descr. Plant.* p. 182. This was the original employment of the prophet Amos, as he says, vii. 14.[b] Hasselquist (*Trav.* p. 260; Lond. 1766) says, "The fruit of this tree tastes pretty well; when quite ripe it is soft, watery, somewhat sweet, with a very little portion of an aromatic taste." It appears, however, that a species of gall insect (*Cynips sycomori*) often spoils much of the fruit. "The tree," Hasselquist adds, "is wounded or cut by the inhabitants at the time it buds, for without this precaution, as they say, it will not bear fruit" (p. 261). In form and smell and inward structure it resembles the fig, and hence its name. The tree is always verdant, and bears fruit several times in the year without being confined to fixed seasons, and is thus, as a permanent food-bearer, invaluable to the poor. The wood of the tree, though very porous, is exceedingly durable. It suffers neither from moisture nor heat. The

[a] "The size of this tree made it a fitting emblem for the Saviour's use (Luke xvii. 6). "Its ample girth, its wide-spread arms branching off from the parent trunk only a few feet from the ground, its enormous roots, as thick, as numerous, and as wide-spread into the deep soil below as the branches extend into the air above, made it the very best type of invincible steadfastness" (Thomson, *Land and Book*, i. 24). This writer supposes the sycamine and sycamore tree to be one and the same. H.

[b] Amos says of himself he was בּוֹלֵס שִׁקְמִים LXX. κνίζων συκάμινα: Vulg. *vellicans sycamina*; i. a cutter of the fruit for the purpose of ripening it. Κνίζω is the very word used by Theophrastus.

Digitized by Google

Egyptian mummy coffins, which are made of it, are still perfectly sound after an entombment of thousands of years. It was much used for doors, and large furniture, such as sofas, tables, and chairs.[a] So great was the value of these trees, that David appointed for them in his kingdom a special overseer, as he did for the olives (1 Chr. xxvii. 28); and it is mentioned as one of the heaviest of Egypt's calamities, that her sycamores were destroyed by hailstones (Ps. lxxviii. 47). That which is called sycamore in N. America, the *Occidental plane* or *button-wood* tree, has no resemblance whatever to the sycamore of the Bible; the name is also applied to a species of maple (the *Acer pseudo-platanus* or *False-plane*), which is much used by turners and millwrights.[b] C. E. S.

*Ficus sycomorus.*

**SY'CHAR** (Συχάρ in ℵ A C D; but Rec. Text Συχάρ with B: *Sichar;* but Codd. Am. and Fuld. *Sychar:* Syriac, *Socar*). A place named only in John iv. 5. It is specified as a city of Samaria, called Sychar, near the ground which Jacob gave to Joseph his son; and there was the well of Jacob."

Jerome believed that the name was merely a copyist's error for Sychem; but the unanimity of the MSS. is sufficient to dispose of this supposition.

Sychar was either a name applied to the town of Shechem, or it was an independent place. 1. The first of these alternatives is now almost universally accepted. In the words of Dr. Robinson (*Bibl. Res.* ii. 290), "In consequence of the hatred which existed between the Jews and the Samaritans, and in allusion to their idolatry, the town of Sichem received, among the Jewish common people, the by-name Sychar." This theory may be correct, but the only support which can be found for it is the very imperfect one afforded by a passage in Isaiah (xxviii. 1, 7), in which the prophet denounces the Ephraimites as *shicc'rim* — "drunkards;" and by a passage in Habakkuk (ii. 18) in which the words *môreh sheker*, "a teacher of lies," are supposed to contain an allusion to Moreh, the original name of the district of Shechem, and to the town itself. But this is surely arguing in a circle. And had such a nickname been applied to Shechem so habitually as its occurrence in St. John would seem to imply, there would be some trace of it in those passages of the Talmud which refer to the Samaritans, and in which every term of opprobrium and ridicule that can be quoted or invented is heaped on them. It may be affirmed, however, with certainty that neither in Targum nor Talmud is there any mention of such a thing. Lightfoot did not know of it. The numerous treatises on the Samaritans are silent about it, and recent close search has failed to discover it.

Presuming that Jacob's well was then, where it is now shown, at the entrance of the valley of *Nâblus*, Shechem would be too distant to answer to the words of St. John, since it must have been more than a mile off.

"A city of Samaria called Sychar, near to the plot of ground which Jacob gave to Joseph" — surely these are hardly the terms in which such a place as Shechem would be described; for though it was then perhaps at the lowest ebb of its fortunes, yet the tenacity of places in Syria to name and fame is almost proverbial.

There is not much force in the argument that St. Stephen uses the name Sychem in speaking of Shechem, for he is recapitulating the ancient history, and the names of the Old Testament narrative (in the LXX. form) would come most naturally to his mouth. But the earliest Christian tradition, in the persons of Eusebius and the Bordeaux Pilgrim — both in the early part of the 4th century — discriminates Shechem from Sychar. Eusebius (*Onomast.* Συχάρ and Λουζά) says that Sychar

---

[a] See Wilkinson's *Ancient Egyptians*, ii. 110, Lond. 1854. "For coffins, boxes, tables, doors, and other objects which required large and thick planks, for idols and wooden statues, the sycamore was principally employed; and from the quantity discovered in the tombs alone, it is evident that the tree was cultivated to a great extent." Don, however, believed that the mummy-cases of the Egyptians were made of the wood of the *Cordia myxa*, a tree which furnishes the Sebesten plums. There can be no doubt, however, that the wood of the *Ficus sycomorus* was extensively used in ancient days. The dry climate of Egypt might have helped to have preserved the timber, which must have been valuable in a country where large timber trees are scarce.

[b] Trench states after Robinson (see *Bibl. Res.* ii. 290), that "There are no sycamores now in the Plain of Jericho" (*Studies in the Gospels*, p. 264, Amer. ed.). But Tristram (*Land of Israel*, p. 509) says: "Hare (near Jericho) was a fine old sycamore fig-tree, perhaps a lineal descendant, and nearly the last, of that into which Zacchæus climbed." In his *Nat. Hist. of the Bible*, p. 399, he says that this tree "is very easy to climb, with its short trunk and its wide lateral branches forking out in all directions; and would naturally be selected by Zacchæus (Luke xix. 4) as the most accessible position from which to obtain a view of our Lord as he passed." H

Digitized by Google

was in front of the city of Neapolis; and, again, that it lay by the side of Luza, which was [a] three miles from Neapolis. Sychem, on the other hand, he places in the suburbs of Neapolis by the tomb of Joseph. The Bordeaux Pilgrim describes Sechim as at the foot of the mountain, and as containing Joseph's monument [b] and plot of ground (*villa*). And he then proceeds to say that a thousand paces thence was the place called Sechar.

And notwithstanding all that has been said of the predilection of Orientals for the water of certain springs or wells (Porter, *Handbook*, p. 342), it does appear remarkable, when the very large number of sources in *Nâblus* itself is remembered, that a woman should have left them and come out a distance of more than a mile. On the other hand, we need not suppose that it was her habit to do so; it may have been a casual visit.

2. In favor of Sychar having been an independent place is the fact that a village named *'Askar* (عسكر) still exists [c] at the southeast foot of Ebal, about northeast of the Well of Jacob, and about half a mile from it. Whether this is the village alluded to by Eusebius, and Jerome, and the Bordeaux Pilgrim, it is impossible to tell. The earliest notice of it which the writer has been able to discover is in Quaresmius (*Elucidatio*, ii. 808 *b*). It is uncertain if he is speaking of himself or quoting Brocardus. If the latter, he had a different copy from that which is published.[d] It is an important point, because there is a difference of more than four centuries between the two, Brocardus having written about 1280, and Quaresmius about 1630. The statement is, that "on the left of the well," *i. e.* on the north, as Gerizim has just been spoken of as on the right, "is a large city (*oppidum magnum*), but deserted and in ruins, which is believed to have been the ancient Sichem. . . . The natives told me that they called the place *Istar*."

A village like *'Askar* [e] answers much more appropriately to the casual description of St. John than so large and so venerable a place as Shechem.

On the other hand there is an etymological difficulty in the way of this identification. *'Askar* begins with the letter *'Ain*, which Sychar does not appear to have contained; a letter too stubborn and enduring to be easily either dropped or assumed in a name. [But see p. 2979 *a*, (*b*.) — A.]

In favor of the theory that Sychar was a "nickname" of Shechem, it should not be overlooked that St. John appears always to use the expression Λεγόμενος, "called," to denote a soubriquet or title borne by place or person in addition to the name, or to attach it to a place remote and little known. Instances of the former practice are xi. 16, xx. 24, xix. 13, 17; of the latter, xi. 54.

These considerations have been stated not so much with the hope of leading to any conclusion on the identity of Sychar, which seems hopeless, as with the desire to show that the ordinary explanation is not nearly so obvious as it is usually assumed to be. [SHECHEM, at the end.] G.

**SY'CHEM** (Συχέμ: *Sichem*; Cod. Amiat *Sychem*). The Greek form of the word Shechem, the name of the well-known city of Central Palestine. It occurs in Acts vii. 16 only. The main interest of the passage rests on its containing two of those numerous and singular variations from the early history, as told in the Pentateuch, with which the speech of St. Stephen [f] abounds. [STEPHEN.] This single verse exhibits an addition to, and a discrepancy from, the earlier account. (1.) The patriarchs are said in it to have been buried at Sychem, whereas in the O. T. this is related of the bones of Joseph alone (Josh. xxiv. 32). (2.) The sepulchre at Sychem is said to have been bought from Emmor by Abraham; whereas in the O. T. it was the cave of Machpelah at Kirjath-arba which Abraham bought and made into his sepulchre, and Jacob who bought the plot of ground at Shechem from Hamor (Gen. xxxiii. 19). In neither of these cases is there any doubt of the authenticity of the present Greek text, nor has any explanation been put forward which adequately meets the difficulty — if difficulty it be. That no attempt should have been made to reconcile the numerous and obvious discrepancies contained in the speech of St. Stephen by altering the MSS. is remarkable, and a cause of great thankfulness. Thankfulness because we are thus permitted to possess at once a proof that it is possible to be as thoroughly inspired by the Spirit of God as was Stephen on this occasion, and yet have remained ignorant or forgetful of minute facts, — and a broad and conspicuous seal to the unimportance of such slight variations in the different accounts of the sacred history, as long as the general tenor of the whole remains harmonious.

A bastard variation of the name Sychem, namely, SICHEM, is found, and its people are mentioned as —

**SY'CHEMITE, THE** (τὸν Συχέμ: *Hevæus*), in Jud. v. 16. This passage is remarkable for giving the inhabitants of Shechem an independent place among the tribes of the country who were dispossessed at the conquest. G.

* **SYCOMORE**, originally and properly so written in the A. V. [SYCAMORE.] H.

**SYE'LUS** (Συήλος; [Vat. η συνοδος;] Alex. Ησυηλος: om. in Vulg.) = JEHIEL 3 (1 Esdr. i. 8; comp. 2 Chr. xxxv. 8). [The A. V. ed. 1611 reads "Sielus."]

**SYE'NE**, properly SEVENEH (סְוֵנֵה [see below]: Συήνη; [Alex. Σοηνη, Σουηνη:] *Syene*), a town of Egypt on the frontier of Cush or Ethiopia. The prophet Ezekiel speaks of the desolation of Egypt "from Migdol to Seveneh, even unto the border of Cush" (xxix. 10), and of its people being slain "from Migdol to Seveneh" (xxx. 6). Migdol was on the eastern border [MIGDOL], and Seveneh is thus rightly identified with the town of Syene, which was always the last town of Egypt on the

[a] The text of Eusebius reads θ = 9 miles; but this corrected by Jerome to 3.

[b] The tomb or monument alluded to in these two passages must have occupied the place of the Moslem tomb of *Yusuf*, now shown at the foot of Gerizim, not far from the east gate of *Nâblus*.

[c] Dr Rosen, in *Zeitschrift der D. M. G.* xiv. 634. Van de Velde (*S. & P.* ii. 333) proposes *'Askar* as the native place of Judas Iscariot.

[d] Perhaps this is one of the variations spoken of by Robinson (ii. 539).

[e] The identity of Askar with Sychar is supported by Dr. Thomson (*Land and Book*, ch. xxxi.), and by Mr. Williams in the *Dict. of Geogr.* (ii. 412 *b*). [So Ewald, *Gesch.* iv. 284, v. 348, 3e Ausg.; Neubauer *Géog. du Talmud* (1868), p. 169 f.; Caspari, *Chron. geog. Einleitung* (1869), p. 106 f.; comp. Raumer *Pal.* p. 162 f. — A.]

[f] These are examined at great length, and elaborately reconciled, in the *New Testament of Canon* Wordsworth, 1860, pp. 65–69.

ⲛⲟⲩⲃ, though at one time included in the nome Nubia. Its ancient Egyptian name is SUN (Brugsch, *Geogr. Inschrift.* i. 155, tab. i., No. 55), preserved in the Coptic ⲥⲟⲩⲁⲛ, ⲥⲉⲛⲟⲛ, and the Arabic *Aswân*. The modern town is slightly to the north of the old site, which is marked by an interesting early Arab burial-ground, covered with remarkable tombstones, having inscriptions in the Cufic character. Champollion suggests the derivation ⲥⲁ, causative, ⲟⲩⲏⲙ, ⲟⲩⲉⲙ, "to open," as though it signified the opening or key of Egypt (*L'Égypte*, i. 161–166), and this is the meaning of the hieroglyphic name. R. S. P.

SYNAGOGUE (συναγωγή: *Synagoga*). It may be well to note at the outset the points of contact between the history and ritual of the synagogues of the Jews, and the facts to which the inquiries of the Biblical student are principally directed. (1.) They meet us as the great characteristic institution of the later phase of Judaism. More even than the Temple and its services, in the time of which the N. T. treats, they at once represented and determined the religious life of the people. (2.) We cannot separate them from the most intimate connection with our Lord's life and ministry. In them He worshipped in his youth, and in his manhood. Whatever we can learn of the ritual which then prevailed tells us of a worship which He recognized and sanctioned; which for that reason, if for no other, though, like the statelier services of the Temple, it was destined to pass away, is worthy of our respect and honor. They were the scenes, too, of no small portion of his work. In them were wrought some of his mightiest works of healing (Mark i. 23; Matt. xii. 9; Luke xiii. 11). In them were spoken some of the most glorious of his recorded words (Luke iv. 16; John vi. 59); many more, beyond all reckoning, which are not recorded (Matt. iv. 23, xiii. 54; John xviii. 20, etc., etc.). (3.) There are the questions, leading us back to a remoter past: In what did the worship of the synagogue originate? what type was it intended to reproduce? what customs, alike in nature, if not in name, served as the starting-point for it? (4.) The synagogue, with all that belonged to it, was connected with the future as well as with the past. It was the order with which the first Christian believers were most familiar, from which they were most likely to take the outlines, or even the details, of the worship, organization, government of their own society. Widely divergent as the two words and the things they represented afterwards became, the Ecclesia had its starting-point in the Synagogue.

Keeping these points in view, it remains to deal with the subject in a somewhat more formal manner.

I. *Name.* — (1.) The Aramaic equivalent כְּנִשְׁתָּא first appears in the Targum of Onkelos as a substitute for the Hebrew עֵדָה (= congregation) in the Pentateuch (Leyrer, *ut infr.*). The more precise local designation, בֵּית הַכְּנֶסֶת (*Beth ha-Cenneseth* = House of gathering), belongs to a yet later date. This is, in itself, tolerably strong evidence that nothing precisely answering to the later synagogue was recognized before the Exile. If it had been, the name was quite as likely to have been perpetuated as the thing.

(2.) The word συναγωγή, not unknown in classical Greek (Thuc. ii. 18, Plato, *Republ.* 526 D.), became prominent in that of the Hellenists. It appears in the LXX. as the translation of not less than twenty-one Hebrew words in which the idea of a gathering is implied (Tromm. *Concordant.* s. v.). With most of these we have nothing to do. Two of them are more noticeable. It is used 130 times for עֵדָה, where the prominent idea is that of an *appointed* meeting (Gesenius, *s. v.*), and 25 times for קָהָל, a meeting *called* together, and therefore more commonly translated in the LXX. by ἐκκλησία. In one memorable passage (Prov. v. 14) the two words, ἐκκλησία and συναγωγή, destined to have such divergent histories, to be representatives of such contrasted systems, appear in close juxtaposition. In the books of the Apocrypha the word, as in those of the O. T., retains its general meaning, and is not used specifically for any recognized place of worship. For this the received phrase seems to be τόπος προσευχῆς (1 Macc. iii. 46, 3 Macc. vii. 20). In the N. T., however, the local meaning is the dominant one. Sometimes the word is applied to the tribunal which was connected with or sat in the synagogue in the narrower sense (Matt. x. 17, xxiii. 34; Mark xiii. 9; Luke xxi. 12, xii. 11). Within the limits of the Jewish Church it perhaps kept its ground as denoting the *place* of meeting of the Christian brethren (Jas. ii. 2). It seems to have been claimed by some of the pseudo-Judaising, half-Gnostic sects of the Asiatic churches for their meetings (Rev. ii. 9). It was not altogether obsolete, as applied to Christian meetings, in the time of Ignatius (*Ep. ad Trall.* c. 5, *ad Polyc.* c. 3). Even in Clement of Alexandria the two words appear united as they had done in the LXX. (ἐπὶ τὴν συναγωγὴν ἐκκλησίας, *Strom.* vi. p. 633). Afterwards, when the chasm between Judaism and Christianity became wider, Christian writers were fond of dwelling on the meanings of the two words which practically represented them, and showing how far the Synagogue was excelled by the Ecclesia (August. *Enarr.* in Ps. lxxx.; Trench, *Synonyms of N. T.* § i.). The cognate word, however, σύναξις, was formed or adopted in its place, and applied to the highest act of worship and communion for which Christians met (Suicer, *Thes.* s. v.; [Sophocles, *Gr. Lex.* s. v.]).

II. *History.* — (1.) Jewish writers have claimed for their synagogues a very remote antiquity. In well-nigh every place where the phrase "before the Lord" appears, they recognize in it a known sanctuary, a fixed place of meeting, and therefore a synagogue (Vitringa, *De Synag.* pp. 271 *et seq.*). The Targum of Onkelos finds in Jacob's "dwelling in tents" (Gen. xxv. 27) his attendance at a synagogue or house of prayer. That of Jonathan finds them in Judg. v. 9, and in "the calling of assemblies" of Is. i. 13 (Vitringa, pp. 271–315).

(2.) Apart from these far-fetched interpretations, we know too little of the life of Israel, both before and under the monarchy, to be able to say with certainty whether there was anything at all corresponding to the synagogues of later date. On the one hand, it is probable that if new moons and Sabbaths were observed at all, they must have been attended by some celebration apart from, as well as at, the Tabernacle or the Temple (1 Sam. xx. 5; 2 K. iv. 23). On the other, so far as we find traces of such local worship, it seems to have fallen too readily into a fetich-religion, sacrifices to ephods and teraphim (Judg. viii. 27, xvii. 5) in groves and

Digitized by Google

on high-places, offering nothing but a contrast to the "reasonable service," the prayers, psalms, instruction in the Law, of the later synagogue. The special mission of the Priests and Levites under Jehoshaphat (2 Chr. xvii. 7–9) shows that there was no regular provision for reading the "book of the law of the Lord" to the people, and makes it probable that even the rule which prescribed that it should be read once every seven years at the feast of Tabernacles had fallen into disuse (Deut. xxxi. 10). With the rise of the prophetic order we trace a more distinct though still a partial approximation. Wherever there was a company of such prophets there must have been a life analogous in many of its features to that of the later Essenes and Therapeutæ, to that of the *cœnobia* and monasteries of Christendom. In the abnormal state of the polity of Israel under Samuel, they appear to have aimed at purifying the worship of the high-places from idolatrous associations, and met on fixed days for sacrifice and psalmody (1 Sam. ix. 12, x. 5). The scene in 1 Sam. xix. 20–24 indicates that the meetings were open to any worshippers who might choose to come, as well as to "the sons of the prophets," the brothers of the order themselves. Later on in the time of Elisha, the question of the Shunammite's husband (2 K. iv. 23), "Wherefore wilt thou go to him (the prophet) to-day? It is neither new moon nor sabbath," implies frequent periodical gatherings, instituted or perhaps revived by Elijah and his successors, as a means of sustaining the religious life of the northern kingdom, and counteracting the prevalent idolatry. The date of Ps. lxxiv. is too uncertain for us to draw any inference as to the nature of the "synagogues of God" (מוֹעֲדֵי אֵל, meeting-places of God), which the invaders are represented as destroying (v. 8). It may have belonged to the time of the Assyrian or Chaldæan invasion (Vitringa, *Synag.* pp. 396–405). It has been referred to that of the Maccabees (De Wette, *Psalmen*, in loc.), or to an intermediate period when Jerusalem was taken and the land laid waste by the army of Bagoses, under Artaxerxes II. (Ewald, *Poet. Bücher*. ii. 358). The "assembly of the elders," in Ps. cvii. 32, leaves us in like uncertainty.

(3.) During the exile, in the abeyance of the Temple-worship, the meetings of devout Jews probably became more systematic (Vitringa, *De Synag.* pp. 413-429; Jost, *Judenthum*, i. 168; Bornitius, *De Synagog.* in Ugolini, *Thes.* xxi.), and must have helped forward the change which appears so conspicuously at the time of the Return. The repeated mention of gatherings of the elders of Israel, sitting before the prophet Ezekiel, and hearing his word (Ez. viii. 1, xiv. 1, xx. 1, xxxiii. 31), implies the transfer to the land of the captivity of the custom that had originated in the schools of the prophets. One remarkable passage may possibly contain a more distinct reference to them. Those who still remained in Jerusalem taunted the prophet and his companions with their exile, as outcasts from the blessings of the sanctuary. "Get ye far from the Lord; unto us is this land given in a possession." The prophet's answer is, that it was not so. Jehovah was as truly with them in their "little sanctuary" as He had been in the Temple at Jerusalem. His presence, not the outward glory, was itself the sanctuary (Ez. xi. 15 16).[a] The whole history of Ezra presupposes the habit of solemn, probably of periodic meetings (Ezr. viii. 15; Neh. viii. 2, ix. 1; Zech. vii. 5). To that period accordingly we may attribute the revival, if not the institution of synagogues. The "ancient days" of which St. James speaks (Acts xv. 21) may, at least, go back so far. Assuming Ewald's theory as to the date and occasion of Ps. lxxiv., there must, at some subsequent period, have been a great destruction of the buildings, and a consequent suspension of the services. It is, at any rate, striking that they are not in any way prominent in the Maccabæan history, either as objects of attack, or rallying points of defense, unless we are to see in the gathering of the persecuted Jews at Maspha (Mizpah) as at a "place where they prayed aforetime in Israel" (1 Macc. iii. 46), not only a reminiscence of its old glory as a holy place, but the continuance of a more recent custom. When that struggle was over, there appears to have been a freer development of what may be called the synagogue parochial system among the Jews of Palestine and other countries. The influence of John Hyrcanus, the growing power of the Pharisees, the authority of the Scribes, the example, probably, of the Jews of the "dispersion" (Vitringa, p. 426), would all tend in the same direction. Well-nigh every town or village had its one or more synagogues. Where the Jews were not in sufficient numbers to be able to erect and fill a building, there was the προσευχή, or place of prayer, sometimes open, sometimes covered in, commonly by a running stream or on the sea-shore, in which devout Jews and proselytes met to worship, and, perhaps, to read (Acts xvi. 13; Jos. *Ant.* xiv. 10, 23; Juven. *Sat.* iii. 296).[b] Sometimes the term προσευχή (= בֵּית תְּפִלָּה) was applied even to an actual synagogue (Jos. *Vit.* c. 54).

(4.) It is hardly possible to overestimate the influence of the system thus developed. To it we may ascribe the tenacity with which, after the Maccabæan struggle, the Jews adhered to the religion of their fathers, and never again relapsed into idolatry. The people were now in no danger of forgetting the Law, and the external ordinances that hedged it round. If pilgrimages were still made to Jerusalem at the great feasts, the habitual religion of the Jews in, and yet more out of Palestine, was connected much more intimately with the synagogue than with the Temple. Its simple, edifying devotion, in which mind and heart could alike enter, attracted the heathen proselytes who might have been repelled by the bloody sacrifices of the Temple, or would certainly have been driven from it unless they could make up their minds to submit to circumcision (Acts xxi. 28; comp.

[a] The passage is not without its difficulties. The interpretation given above is supported by the LXX., Vulg., and A. V. It is confirmed by the general *consensus* of Jewish interpreters (Vatablus, in *Crit. Sac.* in loco, Calmet, s. v *Synagogue*). The other renderings (comp. Ewald and Rosenmüller, *in loc.*), "I will be to them a sanctuary, for a little time," or "in a little measure," give a less satisfactory meaning. The language of the later Jews applied the term "sanctuary" to the ark-end of the synagogue (*infra*).

[b] We may trace perhaps in this selection of localities, like the "sacri fontis *nemus*" cf. Juv. *Sat.* iii. 13, the reappearance, freed from its old abominations of the attachment of the Jews to the worship of the groves, of the charm which led them to bow down under "every green tree" (Is. lvii. 5; Jer. ii. 20).

Digitized by Google

PROSELYTES). Here too, as in the cognate order of the Scribes, there was an influence tending to diminish and ultimately almost to destroy the authority of the hereditary priesthood. The services of the synagogue required no sons of Aaron; gave them nothing more than a complimentary precedence. [PRIESTS; SCRIBES.] The way was silently prepared for a new and higher order, which should rise in "the fullness of time" out of the decay and abolition of both the priesthood and the Temple. In another way too the synagogues everywhere prepared the way for that order. Not "Moses" only, but "the Prophets" were read in them every Sabbath-day, and thus the Messianic hopes of Israel, the expectation of a kingdom of Heaven, were universally diffused.

III. *Structure.* — (1.) The size of a synagogue, like that of a church or chapel, varied with the population. We have no reason for believing that there were any fixed laws of proportion for its dimensions, like those which are traced in the Tabernacle and the Temple. Its position was, however, determinate. It stood, if possible, on the highest ground, in or near the city to which it belonged. Failing this, a tall pole rose from the roof to render it conspicuous (Leyrer, *s. v. Synag.* in Herzog's *Real-Encykl.*). And its direction, too, was fixed. Jerusalem was the *Kibleh* of Jewish devotion. The synagogue was so constructed, that the worshippers as they entered, and as they prayed, looked toward it[a] (Vitringa, pp. 178, 457). The building was commonly erected at the cost of the district, whether by a church-rate levied for the purpose, or by free gifts, must remain uncertain (Vitringa, p. 229). Sometimes it was built by a rich Jew, or even, as in Luke vii. 5, by a friendly proselyte. In the later stages of eastern Judaism it was often erected, like the mosques of Mohammedans, near the tombs of famous Rabbis or holy men. When the building was finished it was set apart, as the Temple had been, by a special prayer of dedication. From that time it had a consecrated character. The common acts of life, eating, drinking, reckoning up accounts, were forbidden in it. No one was to pass through it as a short cut. Even if it ceased to be used, the building was not to be applied to any base purpose — might not be turned, *e. g.* into a bath, a laundry, or a tannery. A scraper stood outside the door that men might rid themselves, before they entered, of anything that would be defiling (Leyrer, *l. c.*, and Vitringa).

(2.) In the internal arrangement of the synagogue we trace an obvious analogy, *mutatis mutandis*, to the type of the Tabernacle. At the upper or Jerusalem end stood the Ark, the chest which, like the older and more sacred Ark, contained the Book of the Law. It gave to that end the name and character of a sanctuary (הֵיכָל). The same thought was sometimes expressed by its being called after the name of Aaron (Buxtorf, *Synag. Jud.* ch. x.), and was developed still further in the name of *Cŏphereth*, or Mercy-seat, given to the lid, or door of the chest, and in the Veil which hung before it (Vitringa, p. 181). This part of the synagogue was naturally the place of honor. Here were the πρωτοκαθεδρίαι, after which Pharisees and Scribes strove so eagerly (Matt. xxiii. 6), to which the wealthy and honored worshipper was invited (James ii. 2, 3). Here too, in front of the Ark, still reproducing the type of the Tabernacle, was the eight-branched lamp, lighted only on the greater festivals. Besides this, there was one lamp kept burning perpetually. Others, brought by devout worshippers, were lighted at the beginning of the Sabbath, *i. e.* on Friday evening (Vitringa, p. 198).[b] A little further toward the middle of the building was a raised platform, on which several persons could stand at once, and in the middle of this rose a pulpit in which the Reader stood to read the lesson, or sat down to teach. The congregation were divided, men on one side, women on the other, a low partition, five or six feet high, running between them (Philo, *De Vit. Contempl.* ii. 476). The arrangements of modern synagogues, for many centuries, have made the separation more complete by placing the women in low side-galleries, screened off by lattice-work (Leo of Modena, in Picart, *Cérém. Relig.* i.). Within the Ark, as above stated, were the rolls of the sacred books. The rollers round which they were wound were often elaborately decorated, the cases for them embroidered or enameled, according to their material. Such cases were customary offerings from the rich when they brought their infant children on the first anniversary of their birthday, to be blessed by the Rabbi of the synagogue.[c] As part of the fittings we have also to note (1), another chest for the *Haphtaroth*, or rolls of the prophets. (2.) Alms-boxes at or near the door, after the pattern of those at the Temple, one for the poor of Jerusalem, the other for local charities.[d] (3.) Notice boards, on which were written the names of offenders who had been "put out of the Synagogue." (4.) A chest for trumpets and other musical instruments, used at the New Years, Sabbaths, and other festivals (Vitringa, Leyrer, *l. c.*).[e]

IV. *Officers.* — (1.) In smaller towns there was

[a] The practice of a fixed *Kibleh* (= direction) in prayer was clearly very ancient, and commended itself to some special necessities of the eastern character. In Ps. xxviii., ascribed to David, we have probably the earliest trace of it (De Wette, *in loc.*). It is recognised in the dedication prayer of Solomon (1 K. viii. 29, *et al.*). It appears as a fixed rule in the devotions of Daniel (Dan. vi. 10). It was adopted afterwards by Mohammed, and the point of the Kibleh, after some lingering reverence to the Holy City, transferred from Jerusalem to the Kaaba of Mecca. The early Christian practice of praying toward the east indicates a like feeling, and probably originated in the adoption by the churches of Europe and Africa of the structure of the synagogue. The position of the altar in those churches rested on a like analogy. The table of the Lord, bearing witness of the blood of the New Covenant, took the place of the Ark which contained the Law that was the groundwork of the Old.

[b] Here also the customs of the Eastern Church, the votive silver lamps hanging before the shrines and holy places, bring the old practice vividly before our eyes.

[c] The custom, it may be noticed, connects itself with the memorable history of those who "brought young children" to Jesus that He should touch them (Mark x. 13).

[d] If this practice existed, as is probable, in the first century, it throws light upon the special stress laid by St. Paul on the collection for the "poor saints" in Jerusalem (1 Cor. xvi. &c.). The Christian Churches were not to be behind the Jewish Synagogues in their contributions to the Palestine Relief Fund.

[e] For remains of ancient synagogues in Galilee, see *Notes on Jewish Synagogues*, by Capt. C. W. Wilson (*Quarterly Statement of the Palestine Exploration Fund*, No. ii. 1869).

H

often but one Rabbi (Vitringa, p. 549). Where a fuller organization was possible, there was a college of Elders (זְקֵנִים = πρεσβύτεροι, Luke vii. 3) presided over by one who was κατ' ἐξοχήν, ὁ ἀρχισυνάγωγος (Luke viii. 41, 49, xiii. 14; Acts xviii. 8, 17). To these elders belonged a variety of synonyms, each with a special significance. They were פַּרְנָסִים (Parnasim = ποιμένες, Eph. iv. 11), watching over their flock, προεστῶτες, ἡγούμενοι, as ruling over it (1 Tim. v. 17; Heb. xiii. 7). With their head, they formed a kind of Chapter, managed the affairs of the synagogue, possessed the power of excommunicating (Vitringa, pp. 549–621, 727).

(2.) The most prominent functionary in a large synagogue was known as the שְׁלִיחַ (*Shĕliach* = legatus), the officiating minister who acted as the delegate of the congregation, and was therefore the chief reader of prayers, etc., in their name. The conditions laid down for this office remind us of St. Paul's rule for the choice of a bishop. He was to be active, of full age, the father of a family, not rich or engaged in business, possessing a good voice, apt to teach (comp. 1 Tim. iii. 1–7; Tit. i. 6–9). In him we find, as the name might lead us to expect, the prototype of the ἄγγελος ἐκκλησίας of Rev. i. 20, ii. 1, &c. (Vitringa, p. 934).

(3.) The *Chazzân* (חַזָּן), or ὑπηρέτης of the synagogue (Luke iv. 20) had duties of a lower kind resembling those of the Christian deacon, or subdeacon. He was to open the doors, to get the building ready for service. For him too there were conditions like those for the *legatus*. Like the *legatus* and the *elders*, he was appointed by the imposition of hands (Vitringa, p. 836). Practically he often acted during the week as school-master of the town or village, and in this way came to gain a prominence which placed him nearly on the same level as the *legatus*.[a]

(4.) Besides these there were ten men attached to every synagogue, whose functions have been the subject-matter of voluminous controversy.[b] They were known as the Batlanim (בטלנים = *Otiosi*), and no synagogue was complete without them. They were to be men of leisure, not obliged to labor for their livelihood, able therefore to attend the week-day as well as the Sabbath services. By some (Lightfoot, *Hor. Heb.* in *Matt.* iv. 23, and, in part, Vitringa, p. 532) they have been identified with the above officials, with the addition of the alms-collectors.[c] Rhenferd, however (Ugolini, *Thes.* vol. xxi.), sees in them simply a body of men, permanently on duty, making up a congregation (ten being the minimum number[d]), so that there might be no delay in beginning the service at the proper hours, and that no single worshipper might go away disappointed. The latter hypothesis is supported by the fact that there was a like body of men, the Stationarii or Viri Stationis of Jewish Archæologists, appointed to act as permanent representatives of the congregation in the services of the Temple (Jost, *Gesch. Judenth.* i. 168–172). It is of course possible that in many cases the same persons may have united both characters, and been, *e. g.*, at once *Otiosi* and alms-collectors.

(5.) It will be seen at once how closely the organization of the synagogue was reproduced in that of the Ecclesia. Here also there was the single presbyter-bishop [BISHOP] in small towns, a council of presbyters under one head in large cities. The *legatus* of the synagogue appears in the ἄγγελος (Rev. i. 20, ii. 1), perhaps also in the ἀπόστολος of the Christian Church. To the elders as such is given the name of Shepherds (Eph. iv. 11; 1 Pet. v. 1). They are known also as ἡγούμενοι (Heb. xiii. 7). Even the transfer to the Christian proselytes of the once distinctively sacerdotal name of ἱερεύς, foreign as it was to the feelings of the Christians of the Apostolic Age, was not without its parallel in the history of the synagogue. Sceva, the exorcist Jew of Ephesus, was probably a "chief priest" in this sense (Acts xix. 14). In the edicts of the later Roman emperors, the terms ἀρχιερεύς and ἱερεύς are repeatedly applied to the rulers of synagogues (Cod. Theodos. *De Jud.*, quoted by Vitringa, *De decem Otiosis*, in Ugolini, *Thes.* xxi.). Possibly, however, this may have been, in part, owing to the presence of the scattered priests, after the destruction of the Temple, as the Rabbis or elders of what was now left to them as their only sanctuary. To them, at any rate, a certain precedence was given in the synagogue services. They were invited first to read the lessons for the day. The benediction of Num. vi. 22 was reserved for them alone.

V. *Worship.* — (1.) The ritual of the synagogue was to a large extent the reproduction (here also, as with the fabric, with many inevitable changes) of the statelier liturgy of the Temple. This is not the place for an examination of the principles and structure of that liturgy, or of the baser elements, wild Talmudic legends, curses against Christians under the name of Epicureans,[e] and other extravagances which have mingled with it (McCaul, *Old Paths*, ch. xvii., xix.). It will be

[a] * With the account here given of the functions of the *Shĕliach* or *legatus*, and of the *Chazzân*, should be compared the more detailed statements of Dr. Ginsburg in his valuable and elaborate art. *Synagogue*, in the 3d ed. of Kitto's *Cyc. of Bibl. Lit.* He makes the office of the *Chazzân* in the time of Christ, and for several centuries later, more like that of the sexton or beadle in our churches, than that of deacon, and denies that either he or the *legatus* was appointed by the imposition of hands. The function of the legatus, he says, "was not permanently vested in any individual ordained for this purpose, but was alternately conferred upon any lay member who was supposed to possess the qualifications necessary for offering up prayer in the name of the congregation." A.

[b] The two treatises *De decem Otiosis*, by Rhenferd and Vitringa in Ugolini's *Thesaurus*, vol. xxi., occupy more than 700 folio pages. The present writer has not read them through. Is there any one living who has?

[c] Lightfoot's classification is as follows. The Ten consisted of three Judges, the Legatus, whom this writer identifies with the Chazzân, three Parnasim, whom he identifies with alms-collectors and compares to the deacons of the church, the Targumist or interpreter, the school-master and his assistant. The whole is, however, very conjectural.

[d] This was based on a fantastic inference from Num xiv. 27. The ten unfaithful spies were spoken of as an "evil *congregation*." *Sanhedr.* iv. 6, in Lightfoot, *l. c.*

[e] * Dr. Ginsburg, art. *Synagogue* in the 3d ed. of Kitto's *Cyclop. of Bibl. Lit.*, iii. 907, note, denies that the Jewish prayers contain "curses against Christians under the name of Epicureans." His account of the Jewish liturgy is very full and interesting. A.

Digitized by Google

enough, in this place, to notice in what way the ritual, no less than the organization, was connected with the facts of the N. T. history, and with the life and order of the Christian Church. Here too we meet with multiplied coincidences. It would hardly be an exaggeration to say that the worship of the Church was identical with that of the Synagogue, modified (1) by the new truths, (2) by the new institution of the Supper of the Lord, (3) by the spiritual *Charismata*.

(2.) From the synagogue came the use of fixed forms of prayer. To that the first disciples had been accustomed from their youth. They had asked their Master to give them a distinctive one, and He had complied with their request (Luke xi. 1), as the Baptist had done before for his disciples, as every Rabbi did for his. The forms might be and were abused. The Pharisee might in synagogues, or, when the synagogues were closed, in the open street, recite aloud the devotions appointed for hours of prayer, might gabble through the *Shema* ("Hear O Israel," etc, from Deut. vi. 4), his *Kaddish*, his *Shemôneh Esréh*, the eighteen *Berachoth* or blessings, with the "vain repetition" which has reappeared in Christian worship. But for the disciples this was, as yet, the true pattern of devotion, and their Master sanctioned it. To their minds there would seem nothing inconsistent with true heart worship in the recurrence of a fixed order (κατὰ τάξιν, 1 Cor. xiv. 40), of the same prayers, hymns, doxologies, such as all liturgical study leads us to think of as existing in the Apostolic Age. If the gifts of utterance which characterized the first period of that age led for a time to greater freedom, to unpremeditated prayer, if that was in its turn succeeded by the renewed predominance of a formal fixed order, the alternation and the struggle which have reappeared in so many periods of the history of the Church were not without their parallel in that of Judaism. There also, was a protest against the rigidity of an unbending form. Eliezer of Lydda, a contemporary of the second Gamaliel (circ. A. D. 80–115), taught that the *legatus* of the synagogue should discard even the *Shemôneh Esréh*, the eighteen fixed prayers and benedictions of the daily and Sabbath services, and should pray as his heart prompted him. The offense against the formalism into which Judaism stiffened, was apparently too great to be forgiven. He was excommunicated (not, indeed, avowedly on this ground), and died at Cæsarea (Jost, *Gesch. Judenth.* ii. 36, 45).

(3.) The large admixture of a didactic element in Christian worship, that by which it was distinguished from all Gentile forms of adoration, was derived from the older order. "Moses" was "read in the synagogues every Sabbath-day" (Acts xv. 1), the whole Law being read consecutively, so as to be completed, according to one cycle, in three years, according to that which ultimately prevailed and determined the existing divisions of the Hebrew text (BIBLE, and LEYRER, *l. c.*), in the 52 weeks of a single year. The writings of the Prophets were read as second lessons in a corresponding order. They were followed by the *Derash*, the λόγος παρακλήσεως (Acts xiii. 15), the exposition, the sermon of the synagogue. The first Christian synagogues, we must believe, followed this order with but little deviation. It remained for them before long to add "the other Scriptures" which they had learned to recognize as more precious even than the Law itself, the "prophetic word" of the New Testament which not less truly than that of the Old, came, in epistle or in narrative, from the same Spirit [SCRIPTURE]. The synagogue use of Psalms again, on the plan of selecting those which had a special fitness for special times, answered to that which appears to have prevailed in the Church of the first three centuries, and for which the simple consecutive repetition of the whole Psalter, in a day as in some Eastern monasteries, in a week as in the Latin Church, in a month as in the English Prayer-book, is, perhaps, a less satisfactory substitute.

(4.) To the ritual of the synagogue we may probably trace a practice which has sometimes been a stumbling-block to the student of Christian antiquity, the subject-matter of fierce debate among Christian controversialists. Whatever account may be given of it, it is certain that Prayers for the Dead appear in the Church's worship as soon as we have any trace of it after the immediate records of the Apostolic age. It has well been described by a writer, whom no one can suspect of Romish tendencies, as an "immemorial practice." Though "Scripture is silent, yet antiquity plainly speaks." The prayers "have found a place in every early liturgy of the world" (Ellicott, *Destiny of the Creature*, Serm. vi.). How, indeed, we may ask, could it have been otherwise? The strong feeling shown in the time of the Maccabees, that it was not "superfluous and vain" to pray for the dead (2 Macc. xii. 44), was sure, under the influence of the dominant Pharisaic Scribes, to show itself in the devotions of the synagogue. So far as we trace back these devotions, we may say that there also the practice is "immemorial," as old at least as the traditions of the Rabbinic fathers (Buxtorf, *De Synag.* pp. 709, 710; McCaul, *Old Paths*, ch. xxxviii.). There is a probability indefinitely great that prayers for the departed (the *Kaddish* of later Judaism) were familiar to the synagogues of Palestine and other countries, that the early Christian believers were not startled by them as an innovation, that they passed uncondemned even by our Lord himself. The writer already quoted sees a probable reference to them in 2 Tim. i. 18 (Ellicott, *Past. Epistles*, in loc.). St. Paul remembering Onesiphorus as one whose "house" had been bereaved of him, prays that he may find mercy of the Lord "in that day." Prayers for the dead can hardly, therefore, be looked upon as anti-Scriptural. If the English Church has wisely and rightly eliminated them from her services, it is not because Scripture says nothing of them, or that their antiquity is not primitive, but because, in such a matter, experience is a truer guide than the silence or the hints of Scripture, or than the voice of the most primitive antiquity.

(5.) The conformity extends also to the times of prayer. In the hours of service this was obviously the case. The third, sixth, and ninth hours were, in the times of the N. T. (Acts iii. 1, x. 3, 9), and had been, probably, for some time before (Ps. lv. 17; Dan. vi. 10), the fixed times of devotion, known then, and still known, respectively as the *Shachdrith*, the *Mincha*, and the *'Arâbith*; they had not only the *prestige* of an authoritative tradition, but were connected respectively with the names of Abraham, Isaac, and Jacob, to whom, as to the first originators, their institution was ascribed (Buxtorf, *Synag.* p. 280). The same hours, it is well known, were recognized in the Church of the second, probably in that of the first century also (Clem. Al. *Strom.* l. c.; Tertull. *De Orat* c. xxv.).

Digitized by Google

The sacred days belonging to the two systems seem, at first, to present a contrast rather than a resemblance; but here, too, there is a symmetry which points to an original connection. The solemn days of the synagogue were the second, the fifth, and the seventh, the last or Sabbath being the conclusion of the whole. In whatever way the change was brought about, the transfer of the sanctity of the Sabbath to the Lord's Day involved a corresponding change in the order of the week, and the first, the fourth, and the sixth became to the Christian society what the other days had been to the Jewish.

(6.) The following suggestion as to the mode in which this transfer was effected, involves, it is believed, fewer arbitrary assumptions than any other [comp. LORD'S DAY, SABBATH], and connects itself with another interesting custom, common to the Church and the Synagogue. It was a Jewish custom to end the Sabbath with a feast, in which they did honor to it as to a parting king. The feast was held in the synagogue. A cup of wine, over which a special blessing had been spoken, was handed round (Jost, *Gesch. Judenth.* i. 180). It is obvious that, so long as the Apostles and their followers continued to use the Jewish mode of reckoning, so long, *i. e.* as they fraternized with their brethren of the stock of Abraham, this would coincide in point of time with their δεῖπνον on the *first* day of the week. A supper on what we should call Sunday evening would have been to them on the *second*. By degrees, as has been shown elsewhere [LORD'S SUPPER], the time became later, passed on to midnight, to the early dawn of the next day. So the Lord's Supper ceased to be a supper really. So, as the Church rose out of Judaism, the supper *gave* its holiness to the coming, instead of *deriving* it from the departing day. The day came to be κυριακή, because it began with the δεῖπνον κυριακόν.[a] Gradually the Sabbath ceased as such to be observed at all. The practice of observing both, as in the Church of Rome up to the fifth century, gives us a trace of the transition period.

(7.) From the synagogue lastly came many less conspicuous practices, which meet us in the liturgical life of the first three centuries. Ablution, entire or partial, before entering the place of meeting (Heb. x. 22; John xiii. 1–15; Tertull. *De Orat.* cap. xi.); standing and not kneeling, as the attitude of prayer (Luke xviii. 11; Tertull. *ibid.* cap. xxiii.); the arms stretched out (Tertull. *ibid.* cap. xiii.); the face turned toward the Kibleh of the East (Clem. Al. *Strom.* l. c.); the responsive Amen of the congregation to the prayers and benedictions of the elders (1 Cor. xiv. 16).[b] In one strange exceptional custom of the Church of Alexandria we trace the wilder type of Jewish, of oriental devotion. There, in the closing responsive chorus of the prayer, the worshippers not only stretched out their necks and lifted up their hands, but leapt up with wild gestures (τοὺς τε πόδας ἐκτινάσσομεν), as if they would fain rise with their prayers to heaven itself (Clem. Al. *Strom.* vii. 40).[c] This, too, reproduced a custom of the synagogue. Three times did the whole body of worshippers leap up simultaneously as they repeated the great Ter-sanctus hymn of Isaiah vi. (Vitringa, p. 1100 ff.; Buxtorf, cap. x.).

VI. *Judicial Functions.*—(1.) The language of the N. T. shows that the officers of the synagogue exercised in certain cases a judicial power. The synagogue itself was the place of trial (Luke xii. 11, xxi. 12); even, strange as it may seem, of the actual punishment of scourging (Matt. x. 17; Mark xiii. 9). They do not appear to have had the right of inflicting any severer penalty, unless, under this head, we may include that of excommunication, or "putting a man out of the synagogue" (John xii. 42, xvi. 2), placing him under an anathema (1 Cor. xvi. 22; Gal. i. 8, 9), "delivering him to Satan" (1 Cor. v. 5; 1 Tim. i. 20). (Meyer and Stanley, *in loc.*) In some cases they exercised the right, even outside the limits of Palestine, of seizing the persons of the accused, and sending them in chains to take their trial before the Supreme Council at Jerusalem (Acts ix. 2, xxii. 5).

(2.) It is not quite so easy, however, to define the nature of the tribunal, and the precise limits of its jurisdiction. In two of the passages referred to (Matt. x. 17; Mark xiii. 9) they are carefully distinguished from the συνέδρια, or councils, yet both appear as instruments by which the spirit of religious persecution might fasten on its victims. The explanation commonly given that the council sat in the synagogue, and was thus identified with it, is hardly satisfactory (Leyrer, in Herzog's *Real-Encykl.* "Synedrien"). It seems more probable that the council was the larger tribunal of 23, which sat in every city [COUNCIL], identical with that of the seven, with two Levites as assessors to each, which Josephus describes as acting in the smaller provincial towns (*Ant.* iv. 8, § 14; *B. J.* ii. 20, § 5),[d] and that under the term synagogue we are to understand a smaller court, probably that of the Ten judges mentioned in the Talmud (Gem. Hieros. *Sanhedr.* l. c.), consisting either of the elders, the chazzan, and the legatus, or otherwise (as Herzfeld conjectures, i. 392) of the ten Batlanim, or *Otiosi* (see above, IV. 4).

(3.) Here also we trace the outline of a Christian institution. The ἐκκλησία, either by itself or by appointed delegates, was to act as a Court of Arbitration in all disputes among its members. The elders of the Church were not, however, to descend to the trivial disputes of daily life (τὰ βιωτικά). For these any men of common sense and fairness, however destitute of official honor and position (οἱ ἐξουθενημένοι) would be enough (1 Cor. vi. 1–8).

---

[a] It has always to be borne in mind that the word was obviously coined for the purposes of Christian life, and is applied in the first instance to the supper (1 Cor. xi. 20), afterwards to the day (Rev. i. 10).

[b] One point of contrast is as striking as these points of resemblance. The Jew prayed with his head covered, with the *Tallith* drawn over his ears and reaching to the shoulders. The Greek, however, habitually in worship as in other acts, went bare-headed; and the Apostle of the Gentile churches, renouncing all early prejudices, recognises this as more fitting, more natural, more in harmony with the right relation of the sexes (1 Cor. xi. 4).

[c] The same curious practice existed in the 17th century, and is perhaps not yet extinct in the Church of Abyssinia, in this, as in other things, preserving more than any other Christian society, the type of Judaism (Ludolf, *Hist. Æthiop.* iii. 6; Stanley, *Eastern Church*, p. 12).

[d] The identification of these two is due to an ingenious conjecture by Grotius (on Matt. v. 21). The addition of two scribes or secretaries makes the number in both cases equal.

Digitized by Google

For the elders, as for those of the synagogue, were reserved the graver offenses against religion and morals. In such cases they had power to excommunicate, to "put out of" the Ecclesia, which had taken the place of the synagogue, sometimes by their own authority, sometimes with the consent of the whole society (1 Cor. v. 4). It is worth mentioning that Hammond and other commentators have seen a reference to these judicial functions in James ii. 2–4. The special sin of those who fawned upon the rich was, on this view, that they were "*judges* of evil thoughts," carrying respect of persons into their administration of justice. The interpretation, however, though ingenious, is hardly sufficiently supported. E. H. P.

* *Synagogues as related to the Spread of Christianity.* — That the first preachers of the gospel made much use of the synagogues in spreading the new faith is evident from many passages in the book of Acts. Thus Paul in Damascus (ix. 20), immediately after his conversion, "preached Christ in the synagogues, that he is the Son of God." So Paul and Barnabas at Salamis in Cyprus (xiii. 5) "preached the word of God in the synagogues of the Jews;" and so again at Antioch in Pisidia (xiii. 14–16); and yet again at Iconium (xiv. 1). When Paul and Silas had come to Amphipolis (xvii. 1, 2), "where was a synagogue of the Jews," it is stated that "Paul, *as his manner was*, went in unto them, and three sabbath-days reasoned with them out of the Scriptures." Coming thence to Berea (xvii. 10), they "went into the synagogue of the Jews." At Athens (xvii. 16, 17), while Paul was waiting for his companions, "he disputed in the synagogue with the Jews, and with the devout" [Greeks]. At Corinth (xviii. 4), "he reasoned in the synagogue every sabbath, and persuaded the Jews and the Greeks." At Ephesus (xviii. 19) "he himself entered into the synagogue, and reasoned with the Jews." In like manner, Apollos at Ephesus (xviii. 26) "began to speak boldly in the synagogue;" and when, in Achaia (xviii. 28), "he mightily convinced the Jews, and that publicly, showing by the Scriptures that Jesus was Christ," it was, doubtless, in the synagogues that he did so. That this use of the place was sometimes long continued is seen in the statement of xix. 8, that in Ephesus Paul "went into the synagogue, and spake boldly for the space of three months, disputing and persuading the things concerning the kingdom of God."

These passages are more than sufficient to show that in the early diffusion of Christianity the synagogues bore a very important part. To its first preachers they afforded a pulpit and an audience, — a place where they could set forth their new doctrine, and an assembly prepared to hear it. In the free and pliable order of the synagogue-service, an opportunity of Scripture-reading, exposition, or exhortation seems to have been offered to any who wished it. Of such opportunities our Lord had made habitual use (Matt. iv. 23, xiii. 54; Mark i. 21; John vi. 59; "I ever taught in the synagogues," John xviii. 20). In Luke iv. 16, it is said of Jesus at Nazareth, that, "*as his custom was*, he went into the synagogue on the sabbath-day, and *stood up to read*," and after the reading began an address to the people. When Paul and Barnabas were at Antioch in Pisidia (Acts xiii. 15), it is stated that, "after the reading of the law and the prophets, *the rulers of the synagogue sent unto them*, saying, Ye men and brethren, if ye have any word of exhortation for the people, say on." The opposition of the Jews to Christianity was not for some time so developed that its apostles were excluded from this privilege of the synagogue. In every Jewish community (and one was found in almost every city of the civilized world) there were persons ready to hear and receive a faith which offered itself as the necessary complement of the Jewish religion and scriptures. But the synagogues brought together many Gentiles, who had either become members of the Jewish body by circumcision, or had adopted the belief and worship of the Jews without submitting to the ritual law [PROSELYTES]. The latter class were, doubtless, more open than the Jews themselves to the truths and principles of Christianity.

It was under the influences of the synagogue that the Greek language assumed the peculiar character which fitted it to be the vehicle for Christian teaching. That process of translating Jewish ideas into Greek words, which we see first in the Septuagint, must have gone on wherever Jewish worship was conducted in the Greek language; that is, in most synagogues out of Palestine, and, to some extent certainly, in those of Palestine itself. [LANGUAGE OF THE NEW TESTAMENT.] Hence arose the idiom of the New Testament writers, colored by Semitic forms of speech, and thoroughly impregnated with the religious conceptions common to both the Old and New Testaments. The possession of such an idiom, fully developed and widely understood, was an important advantage to the first preachers of Christianity. Many new words must be formed, many old words taken in new connections and senses, before the language of Xenophon could express the doctrine of Christ. But changes like these require time for their accomplishment: if it had been left for the apostles to make and introduce them, the spread of the new religion must have been seriously retarded.

It is not easy to overestimate the value of these preparations and opportunities for the preaching of the gospel. Unquestionably, they had much to do with its immediate and rapid progress. The New Testament accounts of this progress will not seem incredible to any one who duly appreciates these favoring influences. Among the causes which by divine arrangement paved the way for the spread of Christianity, we may claim as high a place for the general planting of the Jewish synagogues, as for the universal diffusion of the Greek language, or the unifying conquests of the Roman Empire

J. H.

**SYNAGOGUE, THE GREAT** (כְּנֶסֶת הַגְּדוֹלָה). The institution thus described, though not Biblical in the sense of occurring as a word in the Canonical Scriptures, is yet too closely connected with a large number of Biblical facts and names to be passed over. In the absence of direct historical *data*, it will be best to put together the traditions or conjectures of Rabbinic writers.

(1.) On the return of the Jews from Babylon, a great council was appointed, according to these traditions, to reorganize the religious life of the people. It consisted of 120 members (*Megilloth*, 17 *b*, 18 *c*), and these were known as the men of the Great Synagogue, the successors of the prophets, themselves, in their turn, succeeded by scribes prominent, individually, as teachers (*Pirke Aboth*, i. 1). Ezra was recognized as president. Among the other members, in part together, in part successively, were Joshua, the high-priest, Zerubbabel

Digitized by Google

and their companions, Daniel and the three "children," the prophets Haggai, Zechariah, Malachi, the rulers Nehemiah and Mordecai. Their aim was to restore again the *crown* or *glory* of Israel, *i. e.* to reinstate in its majesty the name of God as Great, Mighty, Terrible (Deut. vii. 21, x. 17; Neh. i. 5, ix. 32; Jer. xxxii. 18; Dan. ix. 4). To this end they collected all the sacred writings of former ages and their own, and so completed the canon of the O. T. Their work included the revision of the text, and this was settled by the introduction of the vowel points, which have been handed down to us by the Masoretic editors. They instituted the feast of Purim. They organized the ritual of the synagogue, and gave their sanction to the *Shemôneh Esrêh*, the eighteen solemn benedictions in it (Ewald, *Gesch.* iv. 193). Their decrees were quoted afterwards as those of the elders (the πρεσβύτεροι of Mark vii. 3, the ἀρχαῖοι of Matt. v. 21, 27, 33), the *Dibrê Sôphêrîm* (= words of the scribes), which were of more authority than the Law itself. They left behind them the characteristic saying, handed down by Simon the high-priest, the last member of the order, "Be cautious in judging; train up many scholars; set a hedge about the Law" (*Pirke Aboth*, i. 1). [SCRIBES.]

(2.) Much of this is evidently uncertain. The absence of any historical mention of such a body, not only in the O. T. and the Apocrypha, but in Josephus, Philo, and the *Seder Olam*, so that the earliest record of it is found in the *Pirke Aboth*, circ. the second century after Christ, had led some critics (*e. g.* De Wette, J. D. Michaelis) to reject the whole statement as a Rabbinic invention, resting on no other foundation than the existence, after the exile, of a Sanhedrim of 71 or 72 members, charged with supreme executive functions. Ewald (*Gesch. Isr.* iv. 192) is disposed to adopt this view, and looks on the number 120 as a later element, introduced for its symbolic significance. Jost (*Gesch. des Jud.* i. 41) maintains that the Greek origin of the word Sanhedrim points to its later date, and that its functions were prominently judicial, while those of the so-called Great Synagogue were prominently legislative. He recognizes, on the other hand, the probability that 120 was used as a round number, never actually made up, and thinks that the germ of the institution is to be found in the 85 names of those who are recorded as having joined in the solemn league and covenant of Neh. x. 1–27. The narrative of Neh. viii. 13 clearly implies the existence of a body of men acting as counsellors under the presidency of Ezra, and these may have been (as Jost, following the idea of another Jewish critic, suggests) an assembly of delegates from all provincial synagogues — a synod (to use the terminology of a later time) of the National Church. The *Pirke Aboth*, it should be mentioned, speaks of the Great Synagogue as ceasing to exist before the historical origin of the Sanhedrim (x. 1), and it is more probable that the latter rose out of an attempt to reproduce the former than that the former was only the mythical transfer of the latter to an earlier time. (Comp. Leyrer, s. v. *Synagoge*, *die grosse*, in Herzog's *Encyklop.*)

E. H. P.

**SYNTYCHE** (Συντύχη [*accident*, *event*]: *Syntyche*), a female member of the Church of Philippi, mentioned (Phil. iv. 2, 3) along with another named EUODIAS (or rather Euodia). To what has been said under the latter head the following may be added. The Apostle's injunction to these two women is, that they should live in harmony with one another: from which we infer that they had, more or less, failed in this respect. Such harmony was doubly important, if they held an office, as deaconnesses, in the church: and it is highly probable that this was the case. They had afforded to St. Paul active coöperation under difficult circumstances (ἐν τῷ εὐαγγελίῳ συνήθλησάν μοι, ver. 2), and perhaps there were at Philippi other women of the same class (αἵτινες, *ibid.*). At all events this passage is an illustration of what the Gospel did for women, and women for the Gospel, in the Apostolic times: and it is the more interesting, as having reference to that church which was the first founded by St. Paul in Europe, and the first member of which was LYDIA. Some thoughts on this subject will be found in Rilliet, *Comm. sur l'Épître aux Philipp.* pp. 311–314. J. S. H.

**SYR'ACUSE** (Συράκουσαι: *Syracusa*). The celebrated city on the eastern coast of Sicily. St. Paul arrived thither in an Alexandrian ship from Melita, on his voyage to Rome (Acts xxviii. 12). The magnificence which Cicero describes as still remaining in his time, was then no doubt greatly impaired. The whole of the resources of Sicily had been exhausted in the civil wars of Cæsar and Pompey, and the piratical warfare which Sextus Pompeius, the youngest son of the latter, subsequently carried on against the triumvir Octavius. Augustus restored Syracuse, as also Catana and Centoripa, which last had contributed much to the successful issue of his struggle with Sextus Pompeius. Yet the island Ortygia, and a very small portion of the mainland adjoining, sufficed for the new colonists and the remnant of the former population. But the site of Syracuse rendered it a convenient place for the African corn-ships to touch at, for the harbor was an excellent one, and the fountain Arethusa in the island furnished an unfailing supply of excellent water. The prevalent wind in this part of the Mediterranean is the W. N. W. This would carry the vessels from the corn region lying eastward of Cape Bon, round the southern point of Sicily, Cape Pachynus, to the eastern shore of the island. Creeping up under the shelter of this, they would lie either in the harbor of Messana, or at Rhegium, until the wind changed to a southern point and enabled them to fetch the Campanian harbors, Puteoli or Gaeta, or to proceed as far as Ostia. In crossing from Africa to Sicily, if the wind was excessive, or varied two or three points to the northward, they would naturally bear up for Malta, — and this had probably been the case with the "Twins," the ship in which St. Paul found a passage after his shipwreck on the coast of that island. Arrived in Malta, they watched for the opportunity of a wind to take them westward, and with such a one they readily made Syracuse. To proceed further while it continued blowing would have exposed them to the dangers of a lee-shore, and accordingly they remained "three days." Then, the wind having probably shifted into a westerly quarter so as to give them smooth water, coasted the shore and made (περιελθόντες κατηντήσαμεν εἰς) Rhegium. After one day there, the wind got round still more and blew from the south; they therefore weighed, and arrived at Puteoli in the course of the second day of the run (Acts xxviii. 12-14).

In the time of St. Paul's voyage, Sicily did not supply the Romans with corn to the extent it had done in the time of King Hiero, and in a less degree

Digitized by Google

as late as the time of Cicero. It is an error, however, to suppose that the soil was exhausted; for Strabo expressly says, that for *corn*, and some other productions, Sicily even surpassed Italy. But the country had become depopulated by the long series of wars, and when it passed into the hands of Rome, her great nobles turned vast tracts into pasture. In the time of Augustus, the whole of the centre of the island was occupied in this manner, and among its exports (except from the neighborhood of the volcanic region, where excellent wine was produced), fat stock, hides, and wool appear to have been the prominent articles. These grazing and horse-breeding farms were kept up by slave labor; and this was the reason that the whole island was in a chronic state of disturbance, owing to the slaves continually running away and forming bands of brigands. Sometimes these became so formidable as to require the aid of regular military operations to put them down; a circumstance of which Tiberius Gracchus made use as an argument in favor of his measure of an Agrarian law (Appian, *B. C.* i. 9), which would have reconverted the spacious grass-lands into small arable farms cultivated by Roman freemen.

In the time of St. Paul there were only five Roman colonies in Sicily, of which Syracuse was one. The others were Catana, Tauromenium Thermæ, and Tyndaris. Messana too, although not a colony, was a town filled with a Roman population. Probably its inhabitants were merchants connected with the wine trade of the neighborhood, of which Messana was the shipping-port. Syracuse and Panormus were important as strategical points, and a Roman force was kept up at each. Sicels, Sicani, Morgetes, and Iberes (aboriginal inhabitants of the island, or very early settlers), still existed in the interior, in what exact political condition it is impossible to say; but most likely in that of villeins. Some few towns are mentioned by Pliny as having the Latin franchise, and some as paying a fixed tribute; but with the exception of the five colonies, the owners of the soil of the island were mainly great absentee proprietors, and almost all its produce came to Rome (Strabo, vi. c. 2; Appian, *B. C.* iv. 84 ff., v. 15-118; Cicero, *Verr.* iv. 53; Plin. *H. N.* ii. 8). J. W. H.

**SYRIA** (אֲרָם: Συρία: *Syria*) is the term used throughout our version for the Hebrew *Aram*, as well as for the Greek Συρία. The Greek writers generally regarded it as a contraction or corruption of Assyria (Herod. vii. 63; Scylax, *Peripl.* p. 80; Dionys. Perieg. 970-975; Eustath. *Comment.* ad loc., etc.). But this derivation is exceedingly doubtful. Most probably Syria is for *Tsyria*, the country about *Tsur* (צוֹר), or Tyre, which was the first of the Syrian towns known to the Greeks. The resemblance to Assyria (אַשּׁוּר) is thus purely accidental; and the two words must be regarded as in reality completely distinct.

1. *Geographical Extent.*— It is very difficult to fix the limits of Syria. The Hebrew Aram seems to commence on the northern frontier of Palestine, and to extend thence northward to the skirts of Taurus, westward to the Mediterranean, and eastward probably to the Khabour River. Its chief divisions are Aram-Dammesek, or "Syria of Damascus," Aram-Zobah, or "Syria of Zobah," Aram-Naharaim, "Mesopotamia," or "Syria of the Two Rivers" and Padan-Aram, "the plain Syria," or "the plain at the foot of the mountains.' Of these we cannot be mistaken in identifying the first with the rich country about Damascus, lying between Anti-Libanus and the desert, and the last with the district about Harran and Orfah, the flat country stretching out from the western extremity of Mons Masius toward the true source of the Khabour at *Ras el-Ain*. Aram-Naharaim seems to be a term including this last tract, and extending beyond it, though how far beyond is doubtful. The "two rivers" intended are probably the Tigris and the Euphrates, which approach very near each other in the neighborhood of Diarbekr; and Aram-Naharaim may have originally been applied especially to the mountain tract which here separates them. If so, it no doubt gradually extended its meaning; for in Gen. xxiv. 10 it clearly includes the district about Harran, the Padan-Aram of other places. Whether the Scriptural meaning ever extends much beyond this is uncertain. It is perhaps most probable that, as the Mesopotamia of the later Greeks, so the Aram-Naharaim of the Hebrews was limited to the northwestern portion of the country contained between the two great streams. [See MESOPOTAMIA.] Aram-Zobah seems to be the tract between the Euphrates and Cœle-Syria; since, on the one hand, it reaches down to the Great River (2 Sam. viii. 3, x. 16), and on the other excludes Hamath (2 Sam. viii. 9, 10). The other divisions of Aram, such as Aram-Maachah and Aram-beth-Rechob, are more difficult to locate with any certainty. Probably they were portions of the tract intervening between Anti-Libanus and the desert.

The Greek writers used the term Syria still more vaguely than the Hebrews did Aram. On the one hand they extended it to the Euxine, including in it Cappadocia, and even Bithynia (Herod. i. 72, 76, ii. 104; Strab. xvi. 1, § 2; Dionys. Perieg. 972); on the other they carried it to the borders of Egypt, and made it comprise Philistia and Edom (Herod. iii. 5; Strab. xvi. 2, § 2). Again, through the confusion in their minds between the Syrians and the Assyrians, they sometimes included the country of the latter, and even its southern neighbor Babylonia, in Syria (Strab. xvi. 1, § 2). Still they seem always to have had a feeling that Syria Proper was a narrower region. Herodotus, while he calls the Cappadocians and the Assyrians Syrians, gives the name of Syria only to the country lying on the Mediterranean between Cilicia and Egypt (ii. 106, 157, 159, iii. 6, 91). Dionysius, who speaks of two Syrias, an eastern and a western, assigns the first place to the latter (*Perieg.* 895). Strabo, like Herodotus, has one Syria only, which he defines as the maritime tract between Egypt and the Gulf of Issus. The ordinary use of the term Syria, by the LXX. and New Testament writers, is even more restricted than this. They distinguish Syria from Phœnicia on the one hand, and from Samaria, Judæa, Idumæa, etc., on the other. In the present article it seems best to take the word in this narrow sense, and to regard Syria as bounded by Amanus and Taurus on the north, by the Euphrates and the Arabian desert on the east, by Palestine, or the Holy Land, on the south, by the Mediterranean near the mouth of the Orontes, and then by Phœnicia upon the west. The tract thus circumscribed is about 300 miles long from north to south, and from 50 to 150 miles broad. It contains an area of about 30,000 square miles.

2. *General Physical Features.* — The general character of the tract is mountainous, as the He

Digitized by Google

brew name Aram (from a root signifying "height") sufficiently implies. On the west, two longitudinal chains, running parallel with the coast at no great distance from one another, extend along two thirds of the length of Syria, from the latitude of Tyre to that of Antioch. These chains, toward the south, were known respectively as Libanus and Anti-Libanus, after which, about lat. 35°, the more western chain, Libanus, became Bargylus, while the eastern, sinking into comparative insignificance, was without any special appellation. In the latitude of Antioch the longitudinal chains are met by the chain of Amanus, an outlying barrier of Taurus, having the direction of that range, which in this part is from southwest to northeast. From this point northward to the true Taurus, which here bounded Syria, and eastward to the Euphrates about *Bireh-jik* and *Sumeisat*, the whole tract appears to consist of mountains infinitely ramified; below which, toward *Sajur* and Aleppo, are some elevated plains, diversified with ranges of hills, while south of these, in about lat. 36°, you enter the desert. The most fertile and valuable tract of Syria is the long valley intervening between Libanus and Anti-Libanus, which slopes southward from a point a little north of Baalbek, and is there drained by the *Litany*; while above that point the slope is northward, and the streams form the Orontes, whose course is in that direction. The northern mountain region is also fairly productive; but the soil of the plains about Aleppo is poor, and the eastern flank of the Anti-Libanus, except in one place, is peculiarly sterile. The exception is at the lower or southern extremity of the chain, where the stream of the Barada forms the rich and delightful tract already described under the head of DAMASCUS.

3. *The Mountain Ranges.* — (*a.*) Lebanon. Of the various mountain ranges of Syria, Lebanon possesses the greatest interest. It extends from the mouth of the Litany to *Arka*, a distance of nearly 100 miles, and is composed chiefly of Jura limestone, but varied with sandstone and basalt. It culminates toward its northern extremity, half-way between Tripoli and Beyrut, and at this point attains an elevation of nearly 10,000 feet (Robinson, *Bibl. Researches*, iii. 547). Anciently it was thickly wooded with cypresses, cedars, and firs; but it is now very scantily clothed. As a minute description of its present condition has been already given in the proper place, it is unnecessary to prolong the present account. [LEBANON.] (*b.*) Anti-Libanus. This range, as the name implies, stands over against Lebanon, running in the same direction, *i. e.* nearly north and south, and extending the same length. It is composed of Jura limestone, oolite, and Jura dolomite. The culminating point is Hermon, at the southern, or rather the southeastern end of the chain; for Anti-Libanus, unlike Libanus, bifurcates at its lowest extremity, dividing into two distinct ridges, between which flows the stream of the *Hasbeya*. Hermon is thought to exceed the height of 9,000 feet. (*c.*) Bargylus. Mount Bargylus, called now *Jebel Nosairi* toward the south, and toward the north *Jebel Kraad*, extends from the mouth of the *Nahr el-Kebir* (Eleutherus), nearly opposite Hems, to the vicinity of Antioch, a distance of rather more than 100 miles. It is separated from Lebanon by a comparatively level tract, 15 or 20 miles broad (*el-Bukeva*), through which flows the stream called *el-Kebir*. Mount Bargylus is broader than Lebanon, and throws out a number of short spurs east and west both toward the sea and toward the valley of the Orontes. One of the western spurs terminates in a remarkable headland, known to the ancients as Mount Casius, and now called *Jebel el-Akra*, or the "Bald Mountain," which rises abruptly from the sea to a height exceeding 5,000 feet. At the northern extremity of Bargylus, where it overhangs the lower course of the Orontes, was Daphne, the delicious suburb of Antioch, and the favorite haunt of its luxurious populace. (*d.*) Amanus. North of the mouth of the Orontes, between its course and the eastern shore of the Gulf of Issus (*Iskenderun*), lies the range of Amanus, which extends from the southwest end of the gulf, in a northeasterly direction, a distance of 85 or 90 miles, and finally forms a junction with Taurus in about long. 36° 25′. Amanus divides Syria from Cilicia, and is a stony range with bold rugged peaks and conical summits, formed of serpentines and other secondary rocks supporting a tertiary formation. Its average elevation is 5,000 feet, and it terminates abruptly at *Ras el-Khanzir*, in a high cliff overhanging the sea. There are only two or three passes across it; and one alone, that of *Beilan*, is tolerably commodious. Amanus, like Anti-Libanus, bifurcates at its southwestern extremity, having, besides its termination at the *Ras el-Khanzir*, another, now called *Musa Dagh*, which approaches within about six miles of the mouth of the Orontes, and seems to be the Pieria of Strabo (xvi. 2, § 8). This spur is of limestone formation. The flanks of Amanus are well clothed with forests of pine, oak, and larch, or copses of myrtle, arbutus, oleander, and other shrubs. The range was well known to the Assyrians, who called it *Khamana*, and not unfrequently cut timber in it, which was conveyed thence to their capital.

4. *The Rivers.* — The principal rivers of Syria are the Litany and the Orontes. The Litany springs from a small lake situated in the middle of the Cœle-Syrian valley, about six miles to the southwest of Baalbek. Hence it descends the valley called *el-Bukaa*, with a course a little west of south, sending out on each side a number of canals for irrigation, and receiving rills from the opposite ranges of Libanus and Anti-Libanus, which compensate for the water given off. The chief of these is called *el-Bardony*, and descends from Lebanon near *Zahleh*. The *Bukaa* narrows as it proceeds southward, and terminates in a gorge, through which the Litany forces itself with a course which is still to the southwest, flowing deep between high precipices, and spanned by a bold bridge of a single arch, known as the *Jisr Burghus*. Having emerged from the ravine, it flows first southwest by west, and then nearly due south, till it reaches the latitude of Tyre, when meeting the mountains of Upper Galilee, it is forced to bend to the west, and, passing with many windings through the low coast tract, enters the sea about 5 miles north of the great Phœnician city. The entire course of the stream, exclusive of small windings, is about 80 miles. The source of the Orontes is but about 15 miles from that of the Litany. A little north of Baalbek, the highest point or water-shed of the Cœle-Syrian valley is reached, and the ground begins to descend northward. A small rill breaks out from the foot of Anti-Libanus, which, after flowing nearly due north for 15 miles across the plain, meets another greater source given out by Lebanon in lat. 34° 22′, which is now considered

Digitized by Google

the true "head of the stream." The Orontes from this point flows down the valley to the northeast, and passing through the *Bahr el-Kades* — a lake about 3 miles long and 2 broad — approaches *Hems* (Emesa), which it leaves on its right bank. It then flows for 20 miles nearly due north; after which, on approaching *Hamah* (Hamath), it makes a slight bend to the east round the base of the *Jebel Erbayn*, and then, entering the rich pasture country of *el-Ghab*, runs northwest and north to *Jisr Hadid*. The tributaries which it receives in this part of its course are many but small, the only one of any importance being the *Wady el-Saruj*, which enters it from the west a little below Hamath. At *Jisr Hadid*, or "the Iron Bridge," the course of the Orontes suddenly changes. Prevented by the range of Amanus from flowing any further to the north, it sweeps round boldly to the west, and receiving a large tributary — the *Kara-Su* — from the northeast, the volume of whose water exceeds its own, it enters the broad valley of Antioch, "doubling back here upon itself, and flowing to the southwest." In this part of its course the Orontes has been compared to the Wye (Stanley, *Sinai and Palestine*, p. 409). The entire length of the stream is estimated at above 200 miles. Its modern name is the *Nahr el-Asi*, or "Rebel Stream," an appellation given to it on account of its violence and impetuosity in many parts of its course.

The other Syrian streams of some consequence, besides the Litany and the Orontes, are the *Barada*, or River of Damascus, the *Koweik*, or River of Aleppo, and the *Sajur*, a tributary of the Euphrates. The course of the *Barada* has already been described under the head of Damascus. [DAMASCUS.] The *Koweik* rises in the highlands south of *Ain-Tab*, from two sources, one of which is known as the *Baloklu-Su*, or "Fish-River." It seems to be the Chalus of Xenophon (*Anab.* i. 4, § 9). Its course is at first east, but soon becomes south, or a little west of south, to Aleppo, after which it meanders considerably through the high plain south of that city, finally terminating in a marsh known as *el-Matkh*. The *Sajur* rises a little further to the north, in the mountains north of *Ain-Tab*. Its course for the first 25 miles is southeast, after which it runs east for 15 or 20 miles, finally resuming its first direction, and flowing by the town of *Sajur* into the Euphrates. It is a larger river than the *Koweik*, though its course is scarcely so long.

5. *The Lakes.* — The principal lakes of Syria are the *Agh-Dengiz*, or Lake of Antioch; the *Sabakhah*, or Salt Lake, between Aleppo and Balis; the *Bahr el-Kades*, on the Upper Orontes; and the *Bahr el-Merj*, or Lake of Damascus. (*a.*) The Lake of Antioch is an oblong fresh-water basin, 10 miles long by 7 broad, situated to the north of the Orontes, where it sweeps round through the plain of *Umk*, before receiving the *Kara-Su*. It is formed by the waters of three large streams — the *Kara-Su*, the *Afrin*, and the *Aswad* — which collect the drainage of the great mountain tract lying northeast and east of Antioch, between the 36th and 37th parallels. It has been argued, from the silence of Xenophon and Strabo, that this lake did not exist in ancient times (Rennell, *Illustrations of the Expedition of Cyrus*, p. 65), but modern investigations pursued upon the spot are thought to disprove this theory (Ainsworth, *Researches in Mesopotamia*, p 299). The waters flow into the lake on the east and north, and flow out of it at its southwest angle by a broad and deep stream, known as the *Kara-Su*, which falls into the Orontes a few miles above Antioch. (*b.*) The *Sabakhah* is a salt lake, into which only insignificant streams flow, and which has no outlet. It lies midway between Balis and Aleppo, the route between these places passing along its northern shore. It is longer than the Lake of Antioch, but narrower, being about 13 miles from east to west, and 4 miles only from north to south, even where it is widest. (*c.*) The *Bahr el-Kades* is smaller than either of the foregoing lakes. It has been estimated at 8 miles long and 3 broad (Pococke, *Description of the East*, i 140), and again at 6 miles long and 2 broad (Chesney, *Euphrates Exp.* i. 394), but has never been accurately measured. Pococke conjectures that it is of recent formation; but his only reason seems to be the silence of ancient writers, which is scarcely sufficient to prove the point. (*d.*) The *Bahr el-Merj*, like the piece of water in which the *Koweik* or River of Aleppo ends, scarcely deserves to be called a lake, since it is little better than a large marsh. The length, according to Colonel Chesney, is 9 miles, and the breadth 2 miles (*Euphrat. Exp.* i. 503); but the size seems to vary with the seasons, and with the extent to which irrigation is used along the course of the *Barada*. A recent traveller, who traced the *Barada* to its termination, found it divide a few miles below Damascus, and observed that each branch terminated in a marsh of its own; while a neighboring stream, the *Awadj*, commonly regarded as a tributary of the *Barada*, also lost itself in a third marsh separate from the other two (Porter in *Geograph. Journ.* xxvi. 43–46).

6. *The Great Valley.* — By far the most important part of Syria, and on the whole its most striking feature, is the great valley which reaches from the plain of *Umk*, near Antioch, to the narrow gorge on which the Litany enters in about lat. 33° 30′. This valley, which runs nearly parallel with the Syrian coast, extends the length of 230 miles, and has a width varying from 6 or 8 to 15 or 20 miles. The more southern portion of it was known to the ancients as Cœle-Syria, or "the Hollow Syria," and has been already described. [CŒLESYRIA.] In length this portion is rather more than 100 miles, terminating with a screen of hills a little south of *Hems*, at which point the northeastern direction of the valley also ceases, and it begins to bend to the northwest. The lower valley from *Hems* downward is broader, generally speaking, and richer than the upper portion. Here was "Hamath the Great" (Am. vi. 2), now *Hamah*; and here too was Apameia, a city but little inferior to Antioch, surrounded by rich pastures, where Seleucus Nicator was wont to feed 500 elephants, 300 stallion horses, and 30,000 mares (Strab. xvi. 2, § 10). The whole of this region is fertile, being watered not only by the Orontes, but by the numerous affluents which flow into it from the mountain ranges inclosing the valley on either side.

7. *The Northern Highlands.* — Northern Syria, especially the district called *Commagéné*, between Taurus and the Euphrates, is still very insufficiently explored. It seems to be altogether an elevated tract, consisting of twisted spurs from Taurus and Amanus, with narrow valleys between them, which open out into bare and sterile plains. The valleys themselves are not very fertile. They are

Digitized by Google

watered by small streams, producing often abundant fish, and, for the most part, flowing into the Orontes or the Euphrates. A certain number of the more central ones, however, unite, and constitute the "river of Aleppo," which, unable to reach either of the oceanic streams, forms (as we have seen) a lake or marsh, wherein its waters evaporate. Along the course of the Euphrates there is rich land and abundant vegetation; but the character of the country thence to the valley of the Orontes is bare and woodless, except in the vicinity of the towns, where fruit-trees are cultivated, and orchards and gardens make an agreeable appearance. Most of this region is a mere sheep-walk, which grows more and more harsh and repulsive as we approach the south, where it gradually mingles with the desert. The highest elevation of the plateau between the two rivers is 1500 feet; and this height is reached soon after leaving the Euphrates, while toward the west the decline is gradual.

8. *The Eastern Desert.* — East of the inner mountain-chain, and south of the cultivable ground about Aleppo, is the great Syrian Desert, an "elevated dry upland, for the most part of gypsum and marls, producing nothing but a few spare bushes of wormwood, and the usual aromatic plants of the wilderness." Here and there bare and stony ridges of no great height cross this arid region, but fail to draw water from the sky, and have, consequently, no streams flowing from them. A few wells supply the nomad population with a brackish fluid. The region is traversed with difficulty, and has never been accurately surveyed. The most remarkable oasis is at Palmyra, where there are several small streams and abundant palm-trees. [See TADMOR.] Toward the more western part of the region along the foot of the mountain range which there bounds it, is likewise a good deal of tolerably fertile country, watered by the streams which flow eastward from the range, and after a longer or a shorter course are lost in the desert. The best known and the most productive of these tracts, which seem stolen from the desert, is the famous plain of Damascus — the *el-Ghutah* and *el-Merj* of the Arabs — already described in the account given of that city. [DAMASCUS.] No rival to this "earthly paradise" is to be found along the rest of the chain, since no other stream flows down from it at all comparable to the Barada; but wherever the eastern side of the chain has been visited, a certain amount of cultivable territory has been found at its foot; corn is grown in places, and olive-trees are abundant (Burckhardt, *Travels in Syria*, pp. 124–129; Pococke, *Description of the East*, ii. 146). Further from the hills all is bare and repulsive; a dry, hard desert like that of the Sinaitic peninsula, with a soil of marl and gravel, only rarely diversified with sand.

9. *Chief Divisions.* — According to Strabo, Syria Proper was divided into the following districts: (1.) *Commagéné*; (2.) *Cyrrhestica*; (3.) *Seleucis*; (4.) *Cœle-Syria*; and (5.) *Damascéné*. If we take its limits, however, as laid down above (§ 1), we must add to these districts three others: *Chalybonitis*, or the country about Aleppo; *Chalcis* or *Chalcidicé*, a small tract south of this, about the lake in which the river of Aleppo ends; and *Palmyrené*, or the desert so far as we consider it to have been Syrian. (*a.*) *Commagéné*[a] lay to the north. Its capital was Samosata or *Sumeisat* The territory is said to have been fairly fertile, but small; and from this we may gather that it did not descend lower than about *Ain-Tab*. (*b.*) From *Ain-Tab*, or perhaps from a point higher up, commenced *Cirrhestica* or *Cyristica*. It was bounded on the north by *Commagéné*, on the northwest by *Amanus*, on the west and southwest by *Seleucis*, and on the south by *Chalybonitis* or the region of Chalybon. Both it and *Commagéné* reached eastward to the Euphrates. *Cyrrhestica* was so called from its capital Cyrrhus, which seems to be the modern *Corus*. It included Hierapolis (*Bambuk*), Batnæ (*Dahab?*), and Gindarus (*Gindaries*). (*c.*) Chalybonitis adjoined Cyrrhestica on the south, lying between that region and the desert. It extended probably from the Euphrates, about *Balis*, to Mount St. Simeon (*Amguli Dagh*). Like Cyrrhestica, it derived its name from its capital city, which was Chalybon, now corrupted into *Haleb* or Aleppo. (*d.*) Chalcidicé was south of the more western portion of Chalybonitis, and was named from its capital, Chalcis, which seems to be marked by the modern *Kennasserin*, a little south of the lake in which the River of Aleppo ends (Pococke, *Travels*, ii. 149). (*e.*) Seleucis lay between Cyrrhestica, Chalybonitis, and Chalcis on the one side, and the Mediterranean on the other. It was a large province, and contained four important subdivisions: (1) Seleucis Proper or Pieria, the little corner between Amanus and the Orontes, with its capital, Seleucia, on the coast, above the mouth of the Orontes; (2) Antiochis, the region about Antioch; (3) Laodicéné, the coast tract between the mouth of the Orontes and Phœnicia, named after its capital, Laodiceia (still called *Ladikiyeh*), which was an excellent port, and situated in a most fertile district (Strab. xvi. 2, § 9); and (4) Apamêné, consisting of the valley of the Orontes from *Jisr Hadid* to *Hamah*, or perhaps to *Hems*, and having Apameia (now *Famieh*) for its chief city. (*f.*) Cœle-Syria lay south of Apameia, being the continuation of the Great Valley, and extending from *Hems* to the gorge in which the valley ends. The chief town of this region was Heliopolis (*Baalbek*). (*g.*) Damascêné included the whole cultivable tract between the bare range which breaks away from Anti-Libanus in lat. 33° 30′, and the hills which shut in the valley of the *Awaj* on the south. It lay east of Cœle-Syria and southwest of Palmyrêné. (*h.*) Palmyrêné was the name applied to the whole of the Syrian Desert. It was bounded on the east by the Euphrates, on the north by Chalybonitis and Chalcidicé, on the west by Apamêné and Cœle-Syria, and on the south by the great desert of Arabia.

10. *Principal Towns.*—The chief towns of Syria may be thus arranged, as nearly as possible in the order of their importance: 1. Antioch; 2. Damascus; 3. Apameia; 4. Seleucia; 5. Tadmor or Palmyra; 6. Laodiceia; 7. Epiphaneia (Hamath); 8. Samosata; 9. Hierapolis (Mabog); 10. Chalybon; 11. Emesa; 12. Heliopolis; 13. Laodiceia ad Libanum; 14. Cyrrhus; 15. Chalcis; 16. Poseideium; 17. Heracleia; 18. Gindarus; 19. Zeugma; 20. Thapsacus. Of these, Samosata Zeugma, Thapsacus, are on the Euphrates; Seleucia, Laodiceia, Poseideium, and Heracleia, on the seashore; Antioch, Apameia, Epiphaneia, and Emesa

[a] The root of this name appears in the early Assyrian inscriptions as that of a people, the *Qummukh*, or *Qummukhi*. They dwell, however, east of the Euphrates, between *Sumeisat* and *Diarbekr*

Digitized by Google

(*Hems*) on the Orontes; Heliopolis and Laodicæa ad Libanum, in Cœle-Syria; Hierapolis, Chalybon, Cyrrhus, Chalcis, and Gindarus, in the northern highlands; Damascus on the skirts, and Palmyra in the centre of the eastern desert.

11. *History.* — The first occupants of Syria appear to have been of Hamitic descent. The Canaanitish races, the Hittites, Jebusites, Amorites, etc., are connected in Scripture with Egypt and Ethiopia, Cush and Mizraim (Gen. x. 6 and 15–18); and even independently of this evidence, there seems to be sufficient reason for believing that the races in question stood in close ethnic connection with the Cushite stock (Rawlinson's *Herodotus*, iv. 243–245). These tribes occupied not Palestine only, but also Lower Syria, in very early times, as we may gather from the fact that Hamath is assigned to them in Genesis (x. 18). Afterwards they seem to have become possessed of Upper Syria also, for when the Assyrians first push their conquests beyond the Euphrates, they find the Hittites (*Khatti*) established in strength on the right bank of the Great River. After a while the first comers, who were still to a great extent nomads, received a Shemitic infusion, which most probably came to them from the southeast. The family of Abraham, whose original domicile was in Lower Babylonia, may, perhaps, be best regarded as furnishing us with a specimen of the migratory movements of the period. Another example is that of Chedorlaomer with his confederate kings, of whom one at least — Amraphel — must have been a Shemite. The movement may have begun before the time of Abraham, and hence, perhaps, the Shemitic names of many of the inhabitants when Abraham first comes into the country, as Abimelech, Melchizedek, Eliezer, etc.[a] The only Syrian town whose existence we find distinctly marked at this time is Damascus (Gen. xiv. 15, xv. 2), which appears to have been already a place of some importance. Indeed, in one tradition, Abraham is said to have been king of Damascus for a time (Nic. Dam. *Fr.* 30); but this is quite unworthy of credit. Next to Damascus must be placed Hamath, which is mentioned by Moses as a well-known place (Num. xiii. 21, xxxiv. 8), and appears in Egyptian papyri of the time of the eighteenth dynasty (*Cambridge Essays*, 1858, p. 268). Syria at this time, and for many centuries afterwards, seems to have been broken up among a number of petty kingdoms. Several of these are mentioned in Scripture, as Damascus, Rehob, Maachah, Zobah, Geshur, etc. We also hear occasionally of "*the kings* of Syria and of the Hittites" (1 K. x. 29; 2 K. vii. 6) — an expression indicative of that extensive subdivision of the tract among numerous petty chiefs which is exhibited to us very clearly in the early Assyrian inscriptions. At various times different states had the preëminence; but none was ever strong enough to establish an authority over the others.

The Jews first come into hostile contact with the Syrians, *under that name*, in the time of David. The wars of Joshua, however, must have often been with Syrian chiefs, with whom he disputed the possession of the tract about Lebanon and Hermon (Josh. xi. 2–18). After his time the Syrians were apparently undisturbed, until David began his aggressive wars upon them. Claiming the frontier of the Euphrates, which God had promised to Abraham (Gen. xv. 18), David made war on Hadadezer, king of Zobah, whom he defeated in a great battle, killing 18,000 of his men, and taking from him 1,000 chariots, 700 horsemen, and 20,000 footmen (2 Sam. viii. 3, 4, 13). The Damascene Syrians, having endeavored to succor their kinsmen, were likewise defeated with great loss (*ibid.* ver. 5); and the blow so weakened them that they shortly afterwards submitted and became David's subjects (ver. 6). Zobah, however, was far from being subdued as yet. When, a few years later, the Ammonites determined on engaging in a war with David, and applied to the Syrians for aid, Zobah, together with Beth-Rehob, sent them 20,000 footmen, and two other Syrian kingdoms furnished 13,000 (2 Sam. x. 6). This army being completely defeated by Joab, Hadadezer obtained aid from Mesopotamia (*ibid.* ver. 16), and tried the chance of a third battle, which likewise went against him, and produced the general submission of Syria to the Jewish monarch. The submission thus begun continued under the reign of Solomon, who "reigned over all the kingdoms from the river (Euphrates) unto the land of the Philistines and unto the border of Egypt; they brought presents and served Solomon all the days of his life" (1 K. iv. 21). The only part of Syria which Solomon lost seems to have been Damascus, where an independent kingdom was set up by Rezon, a native of Zobah (1 K. xi. 23–25). On the separation of the two kingdoms, soon after the accession of Rehoboam, the remainder of Syria no doubt shook off the yoke. Damascus now became decidedly the leading state, Hamath being second to it, and the northern Hittites, whose capital was Carchemish near *Bambuk*, third. [CARCHEMISH.] The wars of this period fall most properly into the history of Damascus, and have already been described in the account given of that city. [DAMASCUS.] Their result was to attach Syria to the great Assyrian empire, from which it passed to the Babylonians, after a short attempt on the part of Egypt to hold possession of it, which was frustrated by Nebuchadnezzar. From the Babylonians Syria passed to the Persians, under whom it formed a satrapy in conjunction with Judæa, Phœnicia, and Cyprus (Herod. iii. 91). Its resources were still great, and probably it was his confidence in them which encouraged the Syrian satrap, Megabazus, to raise the standard of revolt against Artaxerxes Longimanus (B. C. 447). After this we hear little of Syria till the year of the battle of Issus (B. C. 333), when it submitted to Alexander without a struggle.

Upon the death of Alexander Syria became, for the first time, the head of a great kingdom. On the division of the provinces among his generals (B. C. 321), Seleucus Nicator received Mesopotamia and Syria; and though, in the twenty years of struggle which followed, this country was lost and won repeatedly, it remained finally, with the exception of Cœle-Syria, in the hands of the prince to whom it was originally assigned. That prince, whose dominions reached from the Mediterranean to the Indus, and from the Oxus to the Southern Ocean, having, as he believed, been exposed to great dangers on account of the distance from Greece of his original capital, Babylon, resolved immediately upon his victory of Ipsus (B. C. 301) to fix his metropolis in the West, and settled upon

Syria as the fittest place for it. Antioch was begun in B. C. 300, and, being finished in a few years, was made the capital of Seleucus' kingdom. The whole realm was thenceforth ruled from this centre, and Syria, which had long been the prey of stronger countries, and had been exhausted by their exactions, grew rich with the wealth which now flowed into it on all sides. The luxury and magnificence of Antioch were extraordinary. Broad straight streets, with colonnades from end to end, temples, statues, arches, bridges, a royal palace, and various other public buildings dispersed throughout it, made the Syrian capital by far the most splendid of all the cities of the East. At the same time, in the provinces, other towns of large size were growing up. Seleucia in Pieria, Apameia, and both Laodiceias were foundations of the Seleucidæ, as their names sufficiently indicate. Weak and indolent as were many of these monarchs, it would seem that they had a hereditary taste for building; and so each aimed at outdoing his predecessors in the number, beauty, and magnificence of his constructions. As the history of Syria under the Seleucid princes has been already given in detail, in the articles treating of each monarch [ANTIOCHUS, DEMETRIUS, SELEUCUS, etc.], it will be unnecessary here to do more than sum it up generally. The most flourishing period was the reign of the founder, Nicator. The empire was then almost as large as that of the Achæmenian Persians, for it at one time included Asia Minor, and thus reached from the Ægean to India. It was organized into satrapies, of which the number was 72. Trade flourished greatly, old lines of traffic being restored and new ones opened. The reign of Nicator's son, Antiochus I., called Soter, was the beginning of the decline, which was progressive from his date, with only one or two slight interruptions. Soter lost territory to the kingdom of Pergamus, and failed in an attempt to subject Bithynia. He was also unsuccessful against Egypt. Under his son, Antiochus II., called Θεός, or "the God," who ascended the throne in B. C. 261, the disintegration of the empire proceeded more rapidly. The revolt of Parthia in B. C. 256, followed by that of Bactria in B. C. 254, deprived the Syrian kingdom of some of its best provinces, and gave it a new enemy which shortly became a rival and finally a superior. At the same time the war with Egypt was prosecuted without either advantage or glory. Fresh losses were suffered in the reign of Seleucus II. (Callinicus), Antiochus the Second's successor. While Callinicus was engaged in Egypt against Ptolemy Euergetes, Eumenes of Pergamus obtained possession of a great part of Asia Minor (B. C. 242); and about the same time Arsaces II., king of Parthia, conquered Hyrcania and annexed it to his dominions. An attempt to recover this latter province cost Callinicus his crown, as he was defeated and made prisoner by the Parthians (B. C. 226). In the next reign, that of Seleucus III. (Ceraunus), a slight reaction set in. Most of Asia Minor was recovered for Ceraunus by his wife's nephew, Achæus (B. C. 224), and he was preparing to invade Pergamus when he died poisoned. His successor and brother, Antiochus III., though he gained the surname of Great from the grandeur of his expeditions and the partial success of some of them, can scarcely be said to have really done anything toward raising the empire from its declining condition, since his conquests on the side of Egypt, consisting of Cœle-Syria, Phœnicia, and Palestine, formed no sufficient compensation for the loss of Asia Minor, which he was forced to cede to Rome for the aggrandisement of the rival kingdom of Pergamus (B. C. 190). Even had the territorial balance been kept more even, the ill policy of making Rome an enemy of the Syrian kingdom with which Antiochus the Great is taxable, would have necessitated our placing him among the princes to whom its ultimate ruin was mainly owing. Toward the East, indeed, he did something, if not to thrust back the Parthians, at any rate to protect his empire from their aggressions. But the exhaustion consequent upon his constant wars and signal defeats — more especially those of Raphia and Magnesia — left Syria far more feeble at his death than she had been at any former period. The almost eventless reign of Seleucus IV. (Philopator), his son and successor (B. C. 187–175), is sufficient proof of this feebleness. It was not till twenty years of peace had recruited the resources of Syria in men and money, that Antiochus IV. (Epiphanes), brother of Philopator, ventured on engaging in a great war (B. C. 171) — a war for the conquest of Egypt. At first it seemed as if the attempt would succeed. Egypt was on the point of yielding to her foe of so many years, when Rome, following out her traditions of hostility to Syrian power and influence, interposed her mediation, and deprived Epiphanes of all the fruits of his victories (B. C. 168). A greater injury was, about the same time (B. C. 167), inflicted on Syria by the folly of Epiphanes himself. Not content with replenishing his treasury by the plunder of the Jewish temple, he madly ordered the desecration of the Holy of Holies, and thus caused the revolt of the Jews, which proved a permanent loss to the empire and an aggravation of its weakness. After the death of Epiphanes the empire rapidly verged to its fall. The regal power fell into the hands of an infant, Antiochus V. (Eupator), son of Epiphanes (B. C. 164); the nobles contended for the regency; a pretender to the crown started up in the person of Demetrius, son of Seleucus IV.; Rome put in a claim to administer the government; and amid the troubles thus caused, the Parthians, under Mithridates I., overran the eastern provinces (B. C. 164), conquered Media, Persia, Susiana, Babylonia, etc., and advanced their frontier to the Euphrates. It was in vain that Demetrius II. (Nicator) made an attempt (B. C. 142) to recover the lost territory; his boldness cost him his liberty; while a similar attempt on the part of his successor, Antiochus VII. (Sidetes), cost that monarch his life (B. C. 128). Meanwhile, in the shorn Syrian kingdom, disorders of every kind were on the increase; Commagêné revolted and established her independence; civil wars, murders mutinies of the troops, rapidly succeeded one another; the despised Jews were called in by both sides in the various struggles; and Syria, in the space of about ninety years, from B. C. 154 to B. C. 64, had no fewer than ten sovereigns. All the wealth of the country had been by this time dissipated; much had flowed Romewards in the shape of bribes; more, probably, had been spent on the wars; and still more had been wasted by the kings in luxury of every kind. Under these circumstances the Romans showed no eagerness to occupy the exhausted region, which passed under the power of Tigranes, king of Armenia, in B. C. 83, and was not made a province of the Roman Empire till after Pompey's complete defeat of Mithridates and his ally Tigranes, B. C. 64.

The chronology of this period has been well worked out by Clinton (*F. H.* vol. iii. pp. 308–346), from whom the following table of the kings, with the dates of their accession, is taken: —

| Kings. | Length of Reign. | Date of Accession. |
|---|---|---|
| 1. Seleucus Nicator | 32 years. | Oct. 312 |
| 2. Antiochus Soter | 19 " | Jan. 280 |
| 3. Antiochus Theus | 15 " | Jan. 261 |
| 4. Seleucus Callinicus | 20 " | Jan. 246 |
| 5 Seleucus Ceraunus | 3 " | Aug. 226 |
| 6. Antiochus Magnus | 36 " | Aug. 223 |
| 7. Seleucus Philopator | 12 " | Oct. 187 |
| 8. Antiochus Epiphanes | 11 " | Aug. 175 |
| 9 Antiochus Eupator | 2 " | Dec. 164 |
| 10 Demetrius Soter | 12 " | Nov. 162 |
| 11 Alexander Bala | 5 " | Aug. 150 |
| 12. Demetrius Nicator (1st reign) | 9 " | Nov. 146 |
| 13. Antiochus Sidetes | 9 " | Feb. 137 |
| 14. Demetrius Nicator (2d reign) | 3 " | Feb. 128 |
| 15. Antiochus Grypus | 13 " | Aug. 125 |
| 16. Antiochus Cyzicenus | 18 " | 113 |
| 17. Antiochus Eusebes and Philippus | 12 " | 95 |
| 18. Tigranes | 14 " | 83 |
| 19 Antiochus Asiaticus | 4 " | 69 |

As Syria holds an important place, not only in the Old Testament, but in the New, some account of its condition under the Romans must now be given. That condition was somewhat peculiar. While the country generally was formed into a Roman province, under governors who were at first proprætors or quæstors, then proconsuls, and finally legates, there were exempted from the direct rule of the governor, in the first place, a number of "free cities," which retained the administration of their own affairs, subject to a tribute levied according to the Roman principles of taxation; and 2dly, a number of tracts, which were assigned to petty princes, commonly natives, to be ruled at their pleasure, subject to the same obligations with the free cities as to taxation (Appian, *Syr.* 50). The free cities were Antioch, Seleucia, Apameia, Epiphaneia, Tripolis, Sidon, and Tyre; the principalities, Commagêné, Chalcis ad Belum (near *Baalbek*), Arethusa, Abila or Abilêné, Palmyra, and Damascus. The principalities were sometimes called kingdoms, sometimes tetrarchies. They were established where it was thought that the natives were so inveterately wedded to their own customs, and so well disposed for revolt, that it was necessary to consult their feelings, to flatter the national vanity, and to give them the semblance without the substance of freedom. (*a.*) Commagêné was a kingdom (*regnum*). It had broken off from Syria during the later troubles, and become a separate state under the government of a branch of the Seleucidæ, who affected the names of Antiochus and Mithridates. The Romans allowed this condition of things to continue till A. D. 17, when, upon the death of Antiochus III., they made Commagêné into a province; in which condition it continued till A. D. 38, when Caligula gave the crown to Antiochus IV. (Epiphanes), the son of Antiochus III. Antiochus IV. continued king till A. D. 72, when he was deposed by Vespasian, and Commagêné was finally absorbed into the Empire. He had a son, called also Antiochus and Epiphanes, who was betrothed to Drusilla, the sister of "King Agrippa," and afterwards the wife of Felix, the procurator of Judæa. (*b.*) Chalcis "ad Belum" was not the city so called near Aleppo, which gave name to the district of Cnalcidice, but a town of less importance near Heliopolis (*Baalbek*), whence probably the suffix "ad Belum." It is mentioned in this connection by Strabo (xvi. 2, § 10), and Josephus says that it was under Lebanon (*Ant.* xiv. 7, § 4), so that there cannot be much doubt as to its position. It must have been in the "Hollow Syria" — the modern *Bikaa* — to the south of *Baalbek* (Joseph. *B. J.* i. 9, § 2), and therefore probably at *Anjar*, where there are large ruins (Robinson, *Bibl. Res.* iii. 496, 497). This too was generally, or perhaps always, a "kingdom." Pompey found it under a certain Ptolemy, "the son of Menneæus," and allowed him to retain possession of it, together with certain adjacent districts. From him it passed to his son, Lysanias, who was put to death by Antony at the instigation of Cleopatra (ab. B. C. 34), after which we find its revenues farmed by Lysanias' steward, Zenodorus, the royalty being in abeyance (Joseph. *Ant.* xv. 10, § 1). In B. C. 23 Chalcis was added by Augustus to the dominions of Herod the Great, at whose death it probably passed to his son Philip (*ibid.* xvii. 11, § 4). Philip died A. D. 34; and then we lose sight of Chalcis, until Claudius in his first year (A. D. 41) bestowed it on a Herod, the brother of Herod Agrippa I., still as a "kingdom." From this Herod it passed (A. D. 49) to his nephew, Herod Agrippa II., who held it only three or four years, being promoted from it to a better government (*ibid.* xx. 7, § 1). Chalcis then fell to Agrippa's cousin Aristobulus, son of the first Herodian king, under whom it remained till A. D. 73 (Joseph. *B. J.* vii. 7, § 1). About this time, or soon after, it ceased to be a distinct government, being finally absorbed into the Roman province of Syria. (*c.*) Arethusa (now *Restan*) was for a time separated from Syria, and governed by phylarchs. The city lay on the right bank of the Orontes between Hamah and Hems, rather nearer to the former. In the government were included the Emiseni, or people of Hems (Emesa), so that we may regard it as comprising the Orontes valley from the *Jebel Erbayn*, at least as high as the *Bahr el-Kades*, or *Buheiret-Hems*, the lake of Hems. Only two governors are known, Sampsiceramus, and Jamblichus, his son (Strab. xvi. 2, § 10). Probably this principality was one of the first absorbed. (*d.*) Abilêné, so called from its capital Abila, was a "tetrarchy." It was situated to the east of Anti-Libanus, on the route between Baalbek and Damascus (*Itin. Ant.*). Ruins and inscriptions mark the site of the capital (Robinson, *Bibl. Res.* iii. 479–482), which was at the village called *el-Suk*, on the river Barada, just where it breaks forth from the mountains. The limits of the territory are uncertain. We first hear of this tetrarchy in St. Luke's Gospel (iii. 1), where it is said to have been in the possession of a certain Lysanias at the commencement of St. John's ministry, which was probably A. D. 27. Of this Lysanias nothing more is known; he certainly cannot be the Lysanias who once held Chalcis; since that Lysanias died above sixty years previously. Eleven years after the date mentioned by St. Luke, A. D. 38, the heir of Caligula bestowed "the tetrarchy of Lysanias," by which Abilêné is no doubt intended, on the elder Agrippa (Joseph. *Ant.* xviii. 6, § 10); and four years later Claudius confirmed the same prince in the possession of the "*Fiefs of Lysanias*"

Digitized by Google

(*ibid.* xix. 5, § 1). Finally, in A. D. 53, Claudius, among other grants, conferred on the younger Agrippa "Abila, which had been the tetrarchy of Lysanias" (*ibid.* xx. 7, § 1). Abila was taken by Placidus, one of the generals of Vespasian, in B. C. 69 (Joseph. *Bell. Jud.* iv. 7, § 6), and thenceforth was annexed to Syria. (*c.*) Palmyra appears to have occupied a different position from the rest of the Syrian principalities. It was in no sense dependent upon Rome (Plin. *H. N.* v. 25), but relying on its position, claimed and exercised the right of self-government from the breaking up of the Syrian kingdom to the reign of Trajan. Antony made an attempt against it, B. C. 41, but failed. It was not till Trajan's successes against the Parthians, between A. D. 114 and A. D. 116, that Palmyra was added to the Empire. (*f.*) Damascus is the last of the principalities which it is necessary to notice here. It appears to have been left by Pompey in the hands of an Arabian prince, Aretas, who, however, was to pay a tribute for it, and to allow the Romans to occupy it at their pleasure with a garrison (Joseph. *Ant.* xiv. 4, § 5; 5, § 1; 11, § 7). This state of things continued most likely to the settlement of the Empire by Augustus, when Damascus was attached to the province of Syria. During the rest of Augustus' reign, and during the entire reign of Tiberius, this arrangement was in force; but it seems probable that Caligula on his accession separated Damascus from Syria, and gave it to another Aretas, who was king of Petra, and a relation (son?) of the former. [See ARETAS.] Hence the fact, noted by St. Paul (2 Cor. xi. 32), that at the time of his conversion Damascus was held by an "ethnarch of king Aretas." The semi-independence of Damascus is thought to have continued through the reigns of Caligula and Claudius (from A. D. 37 to A. D. 54), but to have come to an end under Nero, when the district was probably reattached to Syria.

The list of the governors of Syria, from its conquest by the Romans to the destruction of Jerusalem, has been made out with a near approach to accuracy, and is as follows: —

| Names. | Titles of office. | Date of entering office. | Date of quitting office. |
|---|---|---|---|
| M. Æmilius Scaurus | Quæstor pro prætore | B. C. 62 | B. C. 61 |
| L. Marcius Philippus | Proprætor | 61 | 59 |
| Lentulus Marcellinus | Proprætor | 59 | 57 |
| Gabinius | Proconsul | 56 | 55 |
| Crassus | | 55 | 53 |
| Cassius | Quæstor | 53 | 51 |
| M. Calpurnius Bibulus | Proconsul | 51 | 47 |
| Sext. Julius Cæsar | | 47 | 46 |
| Q. Cæcilius Bassus | Prætor | 46 | 44 |
| (Q. Cornificius | received authority from the Senate to dispossess Bassus, but failed.) | | |
| (L. Statius Murcus | | | |
| Q. Marcius Crispus | | | |
| C. Cassius Longinus | Proconsul | B. C. 43 | B. C. 42 |
| L. Decidius Saxa | Legatus | 41 | 40 |
| P. Ventidius Bassus | Legatus | 40 | 38 |
| C. Sosius | Legatus | 38 | 35 |
| L. Munatius Plancus | Legatus | 35 | 32 |
| L. Calpurnius Bibulus | Legatus | 31 | 31 |
| Q. Didius | Legatus | 30 | |
| M. Valerius Messalla | Legatus | 29 | 29 |
| Varro | Legatus | 24 | |
| M. Vipsanius Agrippa | Legatus | 23 | 20 |
| M. Tullius | Legatus | 19 (?) | |
| M. Vipsanius Agrippa | Legatus | 15 | |
| M. Titius | Legatus | 11 | 7 |
| C. Sentius Saturninus | Legatus | 7 | 3 |
| P. Quintilius Varus | Legatus | 3 | A. D. 5 |
| P. Sulpicius Quirinus | Legatus | A. D. 5 | |
| Q. Cæcilius Metellus Creticus Silanus | Legatus | | 17 |
| M. Calpurnius Piso | Legatus | 17 | 19 |
| Cn. Sentius Saturninus | Prolegatus | 19 | |
| L. Pomponius Flaccus | Proprætor | 22 | 33 |
| L. Vitellius | Legatus | 35 | 39 |

| Vibius Marsus | Legatus | 42 | 43 |
| C. Cassius Longinus | Legatus | 43 | 51 |
| T. Numidius[1] Quadratus | Legatus | 51 | 60 |
| Domitius Corbulo | Legatus | 60 | 62 |
| Cincius | Legatus | 62 | |
| C. Cestius Gallus | Legatus | 65 | 67 |
| P. Licinius Mucianus | Legatus | 67 | 69 |

The history of Syria during this period may be summed up in a few words. Down to the battle of Pharsalia, Syria was fairly tranquil, the only troubles being with the Arabs, who occasionally attacked the eastern frontier. The Roman governors labored hard to raise the condition of the province, taking great pains to restore the cities, which had gone to decay under the later Seleucidæ. Gabinius, proconsul in the years 56 and 55 B. C., made himself particularly conspicuous in works of this kind. After Pharsalia (B. C. 46) the troubles of Syria were renewed. Julius Cæsar gave the province to his relative Sextus in B. C. 47; but Pompey's party was still so strong in the east, that in the next year one of his adherents, Cæcilius Bassus, put Sextus to death, and established himself in the government so firmly that he was able to resist for three years three proconsuls appointed by the Senate to dispossess him, and only finally yielded upon terms which he himself offered to his antagonists. Many of the petty princes of Syria sided with him, and some of the nomadic Arabs took his pay and fought under his banner (Strab. xvi. 2, § 10). Bassus had but just made his submission, when, upon the assassination of Cæsar, Syria was disputed between Cassius and Dolabella, the friend of Antony, a dispute terminated by the suicide of Dolabella, B. C. 43, at Laodicea, where he was besieged by Cassius. The next year Cassius left his province and went to Philippi, where, after the first unsuccessful engagement, he too committed suicide. Syria then fell to Antony, who appointed as his legate L. Decidius Saxa, in B. C. 41. The troubles of the empire now tempted the Parthians to seek a further extension of their dominions at the expense of Rome, and Pacorus, the crown-prince, son of Arsaces XIV., assisted by the Roman refugee, Labienus, overran Syria and Asia Minor, defeating Antony's generals, and threatening Rome with the loss of all her Asiatic possessions (B. C. 40–39). Ventidius, however, in B. C. 38, defeated the Parthians, slew Pacorus, and recovered for Rome her former boundary. A quiet time followed. From B. C. 38 to B. C. 31 Syria was governed peaceably by the legates of Antony, and, after his defeat at Actium and death at Alexandria in that year, by those of Augustus. In B. C. 27 took place that formal division of the provinces between Augustus and the Senate, from which the imperial administrative system dates; and Syria, being from its exposed situation among the *provincia principis* continued to be ruled by legates, who were of consular rank (*consulares*) and bore severally the

[1] Called "Vinidius" by Tacitus.

Digitized by Google

full title of "Legatus Augusti pro prætore." During the whole of this period the province enlarged or contracted its limits according as it pleased the reigning emperor to bestow tracts of land on the native princes, or to resume them and place them under his legate. Judæa, when attached in this way to Syria, occupied a peculiar position. Partly perhaps on account of its remoteness from the Syrian capital, Antioch, partly no doubt because of the peculiar character of its people, it was thought best to make it, in a certain sense, a separate government. A special procurator was therefore appointed to rule it, who was subordinate to the governor of Syria, but within his own province had the power of a legatus. [See JUDÆA.] Syria continued without serious disturbance from the expulsion of the Parthians (B. C. 38) to the breaking out of the Jewish war (A. D. 66). In B. C. 19 it was visited by Augustus, and in A. D. 18–19 by Germanicus, who died at Antioch in the last-named year. In A. D. 44–47 it was the scene of a severe famine. [See AGABUS.] A little earlier Christianity had begun to spread into it, partly by means of those who "were scattered" at the time of Stephen's persecution (Acts xi. 19), partly by the exertions of St. Paul (Gal. i. 21). The Syrian Church soon grew to be one of the most flourishing (Acts xiii. 1, xv. 23, 35, 41, &c.). Here the name of "Christian" first arose — at the outset no doubt a gibe, but thenceforth a glory and a boast. Antioch, the capital, became as early probably as A. D. 44 the see of a bishop, and was soon recognized as a patriarchate. The Syrian Church is accused of laxity both in faith and morals (Newman, *Arians*, p. 10); but, if it must admit the disgrace of having given birth to Lucian and Paulus of Samosata, it can claim on the other hand the glory of such names as Ignatius, Theophilus, Ephræm, and Babylas. It suffered without shrinking many grievous persecutions; and it helped to make that emphatic protest against worldliness and luxuriousness of living at which monasticism, according to its original conception, must be considered to have aimed. The Syrian monks were among the most earnest and most self-denying; and the names of Hilarion and Simon Stylites are enough to prove that a most important part was played by Syria in the ascetic movement of the 4th and 5th centuries.

(For the geography of Syria, see Pococke's *Description of the East*, vol. ii. pp. 88–209; Burckhardt's *Travels in Syria and the Holy Land*, pp. 1–309; Robinson's *Later Biblical Researches*, pp. 419–625; Stanley's *Sinai and Palestine*, pp. 403–414; Porter's *Five Years in Damascus;* Ainsworth's *Travels in the Track of the Ten Thousand*, pp. 57–70; *Researches*, etc., p. 290 ff For the history under the Seleucidæ, see (besides the original sources) Clinton's *Fasti Hellenici*, vol. iii. Appendix iii. pp. 306–346; Vaillant's *Imperium Seleucidarum*, and Frölich's *Annales Rerum et Regum Syriæ*. The two articles on Mount Lebanon, in the *Bibl. Sacra*, xxvi. 541–571, and 673–713, by Rev. T. Laurie, D. D., treat somewhat fully of the topography and antiquity of Northern Syria. For a graphic description of Cœle-Syria (the modern *Buka'a*), the great military road of the ancient invaders of Palestine, see Rawlinson's *Ancient Monarchies*, iii. 244 ff. H.

* SYRIAC, Dan. ii. 4. [SYRIAN.]

SYRIAC VERSIONS. [VERSIONS, SYRIAC.]

* SYRIAN (אֲרַמִּי: Σύρος: *Syrus*), a native or inhabitant of Syria (Gen. xxv. 20, xxviii. 5, xxxi. 20, 24; Deut. xxvi. 5; 2 K. v. 20). The plural, "Syrians," is commonly the translation of אֲרָם, ARAM; *e. g.* 2 Sam. viii. 5–13, x. 6–19 &c.; but of אֲרָמִים, 2 K. viii. 28, 29, ix. 15; comp. 2 Chr. xxii. 5. "In the Syrian language" or "tongue," 2 K. xviii. 26; Is. xxxvi. 11; Ezr. iv. 7; or "in Syriac," Dan. ii. 4, is אֲרָמִית (Συριστί: *Syriace, Syra lingua, sermone Syro*); in 2 Macc. xv. 36, τῇ Συριακῇ φωνῇ, *voce Syriaca* A.

* SYRIA-MA'ACHAH, 1 Chr. xix. 6. [ARAM: MAACHAH, 2].

SYRO-PHŒNICIAN (Συροφοινίκισσα [Lachm., Tisch., 8th ed.], Συροφοίνισσα [Rec. Text; Σύρα Φοινίκισσα or Συραφ., Griesb., Tisch. 7th ed., Treg.], or Σύρα Φοίνισσα [no good MS.]: *Syro-Phœnissa*) occurs only in Mark vii. 26. The coinage of the words "Syro-Phœnicia," and "Syro-Phœnicians," seems to have been the work of the Romans, though it is difficult to say exactly what they intended by the expressions. It has generally been supposed that they wished to distinguish the Phœnicians of Syria from those of Africa (the Carthaginians); and the term "Syrophœnix" has been regarded as the exact converse to "Libyphœnix" (Alford, *in loc.*). But the Libyphœnices are not the Phœnicians of Africa generally — they are a peculiar race, half-African and half-Phœnician ("mixtum Punicum Afris genus," Liv. xxi. 22). The Syro-Phœnicians, therefore, should, on this analogy, be a mixed race, half-Phœnicians and half-Syrians. This is probably the sense of the word in the satirists Lucilius (ap. Non. Marc. *De proprietat. serm.* iv. 431) and Juvenal (*Sat.* viii. 159), who would regard a mongrel Oriental as peculiarly contemptible.

In later times a geographic sense of the terms superseded the ethnic one. The Emperor Hadrian divided Syria into three parts, Syria Proper, Syro Phœnice, and Syria Palæstina; and henceforth a Syro-Phœnician meant a native of this sub-province (Lucian, *De Conc. Deor.* § 4), which included Phœnicia Proper, Damascus, and Palmyrené.

As the geographic sense had not come into use in St. Mark's time, and as the ethnic one would be a refinement unlikely in a sacred writer, it is perhaps most probable that he really wrote Σύρα Φοίνισσα, "a Phœnician Syrian," which is found in some copies. [The reading Σύρα Φοινίκισσα is much better supported. — A.]

St. Matthew uses "Canaanitish" (Χαναναία) in the place of St. Mark's "Syro-Phœnician," or "Phœnician Syrian," on the same ground that the LXX. translate Canaan by Phœnicia (Φοινίκη). The terms Canaan and Phœnicia had succeeded one another as geographical names in the same country; and Phœnicians were called "Canaanites," just as Englishmen are called "Britons." No conclusion as to the identity of the Canaanites with the Phœnicians can properly be drawn from the indifferent use of the two terms. (See Rawlinson's *Herodotus*, vol. iv. pp. 242–245.) G. R.

**TA'ANACH** (תַּעְנָךְ) [perh. *castle*, Dietr.]: Ζαχαι [Vat. Ζαχαι], Θαναχ, Θαανάχ, [Ιθαανάχ, Vat. corrupt;] Alex. Θαναχ, Ταναχ, εκθαναάδ, Θεννάχ, Θαανάχ: [*Thenac*,] *Thanac*, *Thaanach*). An ancient Canaanitish city, whose king is enumerated amongst the thirty-one conquered by Joshua (Josh. xii. 21). It came into the hands of the half tribe of Manasseh (Josh. xvii. 11, xxi. 25; 1 Chr. vii. 29), though it would appear to have lain outside their boundary and within the allotment of either Issachar or Asher (Josh. xvii. 11), probably the former. It was bestowed on the Kohathite Levites (Josh. xxi. 25). Taanach was one of the places in which, either from some strength of position, or from the ground near it being favorable for their mode of fighting, the Aborigines succeeded in making a stand (Josh. xvii. 12; Judg. i. 27); and in the great struggle of the Canaanites under Sisera against Deborah and Barak, it appears to have formed the head-quarters of their army (Judg. v. 19). After this defeat the Canaanites of Taanach were probably made, like the rest, to pay a tribute (Josh. xvii. 13; Judg. i. 28), but in the town they appear to have remained to the last. Taanach is almost always named in company with Megiddo, and they were evidently the chief towns of that fine rich district which forms the western portion of the great plain of Esdraelon (1 K. iv. 12).

There it is still to be found. The identification of *Ti'annuk* with Taanach, may be taken as one of the surest in the whole Sacred Topography. It was known to Eusebius, who mentions it twice in the *Onomasticon* (Θαανάχ and Θαναχ) as a "very large village," standing between 3 and 4 Roman miles from Legio — the ancient Megiddo. It was known to hap-Parchi, the Jewish mediæval traveller, and it still stands about 4 miles southeast of *Lejjûn*, retaining its old name with hardly the change of a letter. The ancient town was planted on a large mound at the termination of a long spur or promontory, which runs out northward from the hills of Manasseh into the plain, and leaves a recess or bay, subordinate to the main plain on its north side and between it and *Lejjûn*. The modern hamlet clings to the S. W. base of the mound (Rob. ii. 316, 329; Van de Velde, i. 358; Stanley, *Jewish Church*, pp. 321, 322).

In one passage the name is slightly changed both in [the] original and A. V. [TANACH.] G.

**TA'ANATH-SHI'LOH** (תַּעְנַת שִׁלֹה) [*circle of Shiloh*, Fürst]:[a] Θηρασα και Σελλησ [Vat. Σελλησα]; Alex. Ταναθ σηλω: *Tanath-Selo*). A place named once only (Josh. xvi. 6) as one of the landmarks of the boundary of Ephraim, but of which boundary it seems impossible to ascertain. All we can tell is, that at this part the enumeration is from west to east, Janohah being east of Taanath Shiloh. With this agrees the statement of Eusebius (*Onomasticon*), who places Janohah 12, and Thenath, or as it was then called Thena,[b] 10 Roman miles east of Neapolis. Janohah has been identified with some probability at *Yanûn*, on the road from *Nâblus* to the Jordan Valley. The name *Tâna*, or *Ain Tâna*, seems to exist in that direction. A place of that name was seen by Robinson N. E. of *Mejdel* (*Bibl. Res.* iii. 295), and it is mentioned by Barth (Ritter, *Jordan*, p. 471), but without any indication of its position. Much stress cannot however be laid on Eusebius's identification.

In a list of places contained in the Talmud (*Jerusalem Megillah* i.), Taanath Shiloh is said to be identical with SHILOH. This has been recently revived by Kurtz (*Gesch. des Alt. Bundes*, ii. 70). His view is that Taanath was the ancient Canaanitish name of the place, and Shiloh the Hebrew name, conferred on it in token of the "rest" which allowed the Tabernacle to be established there after the conquest of the country had been completed. This is ingenious, but at present it is a mere conjecture, and it is at variance with the identification of Eusebius, with the position of Janohah, and, as far as it can be inferred, of Michmethath, which is mentioned with Taanath Shiloh in Josh. xvi. 6.

G.

**TAB'AOTH** (Ταβαώθ; Alex. Ταβωθ: *Tob loch*). TABBAOTH (1 Esdr. v. 29).

**TAB'BAOTH** (טַבָּעוֹת) [*rings*, *Ges.*]: Ταβαώθ; [Vat. Ταβωθ, Ταβαωθ;] Alex. Ταββαωθ *Tabbaoth*, *Tebbaoth*). The children of Tabbaoth were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 43; Neh. vii. 46). The name occurs in the form TABAOTH in 1 Esdr. v. 29.

**TAB'BATH** (טַבָּת) [perh. *celebrated*]: Ταβδώθ; Alex. Ταβαθ: *Tebbath*). A place mentioned only in Judg. vii. 22, in describing the flight of the Midianite host after Gideon's night attack. The host fled to Beth-shittah, to Zererah, to the brink of Abel-meholah on (עַל) Tabbath. Beth-shittah may be *Shittah*, which lies on the open plain between *Jebel Fukûa* and *Jebel Duhy*, 4 miles east of *Ain Jalûd*, the probable scene of Gideon's onslaught. Abel-meholah was no doubt in the Jordan Valley, though it may not have been so much as 8 miles south of Beth-shean, where Eusebius and Jerome would place it. But no attempt seems to have been made to identify Tabbath, nor does any name resembling it appear in the books or maps, unless it be *Tubukhat-Fahil*, *i. e.* "Terrace of Fahil." This is a very striking natural bank, 600 feet in height (Rob., iii. 325), with a long, horizontal, and apparently flat top, which is embanked against the western face of the mountains east of the Jordan, and descends with a very steep front to the river. It is such a remarkable object in the whole view of this part of the Jordan Valley that it is difficult to imagine that it did not bear a distinctive name in ancient as well as modern times. At any rate, there is no doubt that, whether this *Tubukah* represents Tabbath or not, the latter was somewhere about this part of the Ghor. G.

**TAB'EAL** (טַבְאֵל) [*God is good*]: Ταβεήλ; *Tabeel*). Properly "Tabeel," the *pathach* being

a • Dietrich resolves the name into Taanath by Ballah (*Ges. Hebr. Lex.* p. 906, 6te Aufl.). H.

b Ptolemy names Thena and Neapolis as the two chief towns of the district of Samaria (xvp. 16, quoted in Reland, *Pal.* p. 461).

Digitized by Google

line to the pause (Gesen. *Lehrg.* § 52, 1 *b*; *Heb. Gr.* § 29, 4 *c*). The son of Tabeal was apparently an Ephraimite in the army of Pekah the son of Remaliah, or a Syrian in the army of Rezin, when they went up to besiege Jerusalem in the reign of Ahaz (Is. vii. 6). The Aramaic form of the name favors the latter supposition [comp. TABRIMMON]. The Targum of Jonathan renders the name as an appellative, "and we will make king in the midst of her him who seems good to us" (יָת מַן דְּכָשַׁר לָהֵן). Rashi by *Gematria* turns the name into רְמַלְיָא, *Rimla*, by which apparently he would understand *Remaliah*.

TAB'EËL (טָבְאֵל [see above]: Ταβεήλ: *Thabeel*). An officer of the Persian government in Samaria in the reign of Artaxerxes (Ezr. iv. 7). His name appears to indicate that he was a Syrian, for it is really the same as that of the Syrian vassal of Rezin who is called in our A. V. "Tabael." Add to this that the letter which he and his companions wrote to the king was in the Syrian or Aramæan language. Gesenius, however (*Jes.* i. 280), thinks that he may have been a Samaritan. He is called TABELLIUS in 1 Esdr. ii. 16. The name of Tobiel the father of Tobit is probably the same.

W. A. W.

TABEL'LIUS (Ταβέλλιος: *Babellius*) 1 Esdr. ii. 16. [TABEEL.]

TAB'ERAH (תַּבְעֵרָה [*a burning*]: ἐμπυρισμός). The name of a place in the wilderness of Paran, given from the fact of a "burning" among the people by the "fire of the Lord" which there took place (Num. xi. 3, Deut. ix. 22). It has not been identified, and is not mentioned among the list of encampments in Num. xxxiii. H. H.

TABERING (תֹּתְפְּפוֹת: φθεγγόμενα: *murmurantes*). The obsolete word thus used in the A. V. of Nah. ii. 7 requires some explanation. The Hebrew word connects itself with תֹּף, "a timbrel," and the image which it brings before us in this passage is that of the women of Nineveh, led away into captivity, mourning with the plaintive cones of doves, and beating on their breasts in anguish, as women beat upon their timbrels (comp. Ps. lxviii. 25 [26], where the same verb is used). The LXX. and Vulg., as above, make no attempt at giving the exact meaning. The Targum of Jonathan gives a word which, like the Hebrew, has the meaning of "tympanizantes." The A. V. in like manner reproduces the original idea of the words. The "tabour" or "tabor" was a musical instrument of the drum type, which with the pipe formed the band of a country village. We retain a trace at once of the word and of the thing in the "tabourine" or "tambourine" of modern music, in the "tabret" of the A. V. and older English writers. To "tabour," accordingly, is to beat with loud strokes as men beat upon such an instrument. The verb is found in this sense in Beaumont and Fletcher, *The Tamer Tamed* ("I would tabor her"), and answers with a singular felicity to the exact meaning of the Hebrew. E. H. P.

TABERNACLE (מִשְׁכָּן, אֹהֶל: σκηνή: *tabernaculum*). The description of the Tabernacle and its materials will be found under TEMPLE. The writer of that article holds that he cannot deal satisfactorily with the structural order and proportions of the one without discussing also those of the other. Here, therefore, it remains for us to treat — (1) of the word and its synonyms; (2) of the history of the Tabernacle itself; (3) of its relation to the religious life of Israel; (4) of the theories of later times respecting it.

I. *The Word and its Synonyms.* — (1.) The first word thus used (Ex. xxv. 9) is מִשְׁכָּן (*Mishcân*), formed from שָׁכַן = to settle down or dwell, and thus itself = dwelling. It connects itself with the Jewish, though not Scriptural, word Shechinah, as describing the dwelling-place of the Divine Glory. It is noticeable, however, that it is not applied in prose to the common dwellings of men, the tents of the Patriarchs in Genesis, or those of Israel in the wilderness. It seems to belong rather to the speech of poetry (Ps. lxxxvii. 2; Cant. i. 8). The loftier character of the word may obviously have helped to determine its religious use, and justifies translators who have the choice of synonyms like "tabernacle" and "tent" in a like preference.

(2.) Another word, however, is also used, more connected with the common life of men; אֹהֶל (*Ohel*), the "tent" of the Patriarchal age, of Abraham, and of Isaac, and of Jacob (Gen. ix. 21, &c.). For the most part, as needing something to raise it, it is used, when applied to the Sacred Tent, with some distinguishing epithet. In one passage only (1 K. i. 39) does it appear with this meaning by itself. The LXX. not distinguishing between the two words gives σκηνή for both. The original difference appears to have been that אֹהֶל represented the outermost covering, the black goat's hair curtains; מִשְׁכָּן, the inner covering, the curtains which rested on the boards (Gesenius, *s. v.*). The two words are accordingly sometimes joined, as in Ex. xxxix. 32, xl. 2, 6, 29 (A. V. "the tabernacle of the tent"). Even here, however, the LXX. gives σκηνή only, with the exception of the *var. lect.* of ἡ σκηνὴ τῆς σκεπῆς in Ex. xl. 29.

(3.) בַּיִת (*Baith*): οἶκος: *domus*, is applied to the Tabernacle in Ex. xxiii. 19, xxxiv. 26; Josh. vi. 24, ix. 23; Judg. xviii. 31, xx. 18, as it had been, apparently, to the tents of the Patriarchs (Gen. xxxiii. 17). So far as it differs from the two preceding words, it expresses more definitely the idea of a fixed, settled habitation. It was therefore fitter for the sanctuary of Israel after the people were settled in Canaan, than during their wanderings. For us the chief interest of the word lies in its having descended from a yet older order, the first word ever applied in the O. T. to a local sanctuary, "BETH-EL," "*the house of God*" (Gen. xxviii. 17, 22), keeping its place, side by side, with other words, tent, tabernacle, palace, temple, synagogue, and at last outliving all of them, rising, in the Christian Ecclesia, to yet higher uses (1 Tim. iii. 15).

(4.) לְקֹדֶשׁ (*Kôdesh*), מִקְדָּשׁ (*Mikdâsh*): ἁγίασμα, ἁγιαστήριον, τὸ ἅγιον, τὰ ἅγια: *sanctuarium*, the holy, consecrated place, and therefore applied, according to the graduated scale of holiness of which the Tabernacle bore witness, sometimes to the whole structure (Ex. xxv. 8; Lev. xii. 4), sometimes to the court into which none but the priests might enter (Lev. iv. 6; Num. iii. 38, iv. 12), sometimes to the innermost sanctuary of all, the Holy of Holies (Lev. iv. 6?). Here also the word

Digitized by Google

had an earlier starting-point and a far-reaching history. En-Mishpat, the city of judgment, the seat of some old oracle, had been also Kadesh, the sanctuary (Gen. xiv. 7; Ewald, *Gesch. Isr.* ii. 307). The name *el-Khuds* clings still to the walls of Jerusalem.

(5.) הֵיכָל (*Hêcâl*): *vads*: *templum*, as meaning the stately building, or palace of Jehovah (1 Chr. xxix. 1, 19), is applied more commonly to the Temple [a] (2 K. xxiv. 13, &c.), but was used also (probably at the period when the thought of the Temple had affected the religious nomenclature of the time) of the Tabernacle at Shiloh (1 Sam. i. 9, iii. 3) and Jerusalem (Ps. v. 7). In either case the thought which the word embodies is, that the "tent," the "house," is royal, the dwelling-place of the great king.

(6.) The two words (1) and (2) receive a new meaning in combination (*a*) with מוֹעֵד (*mô'êd*), and (*b*) with הָעֵדוּת, *ha'edûth*. To understand the full meaning of the distinctive titles thus formed is to possess the key to the significance of the whole Tabernacle. (*a*.) The primary force of יָעַד is "to meet by appointment," and the phrase אֹהֶל מוֹעֵד has therefore the meaning of "a place of or for a fixed meeting." Acting on the belief that the meeting in this case was that of the worshippers, the A. V. has uniformly rendered it by "tabernacle of the congregation" (so Seb. Schmidt, "tentorium conventûs;" and Luther, "Stiftshütte" in which Stift = Pfarrkirche), while the LXX. and Vulg. confounding it with the other epithet, have rendered both by ἡ σκηνὴ τοῦ μαρτυρίου, and "tabernaculum testimonii." None of these renderings, however, bring out the real meaning of the word. This is to be found in what may be called the *locus classicus*, as the interpretation of all words connected with the Tabernacle. "This shall be a continual burnt-offering . . . at the door of the tabernacle of *meeting* (מוֹעֵד) where I will *meet* you (אִוָּעֵד, γνωσθήσομαι) to speak there unto thee. And there will I *meet* (וְנָעַדְתִּי, γνώσομαι) with the children of Israel. And I will *sanctify* (וְקִדַּשְׁתִּי) the tabernacle of meeting . . . and I will *dwell* (וְשָׁכַנְתִּי) among the children of Israel, and will be their God. And they shall know that I am the Lord their God" (Ex. xxix. 42–46). The same central thought occurs in Ex. xxv. 22, "There I will *meet* with thee" (comp. also Ex. xxx. 6, 36; Num. xvii. 4). It is clear, therefore, that "congregation" is inadequate. Not the gathering of the worshippers only, but the meeting of God with his people, to commune with them, to make himself known to them, was what the name embodied. Ewald has accordingly suggested *Offenbarungszelt* = Tent of Revelation, as the best equivalent (*Alterthümer*, p. 130). This made the place a *sanctuary*. Thus it was that the *tent* was the *dwelling*, the *house* of God (Bähr, *Symbolik*, i. 81)

(7.) The other compound phrase, (*b*.) אֹהֶל הָעֵדוּת, as connected with עוּד (= to bear witness), is rightly rendered by ἡ σκηνὴ τοῦ μαρτυρίου, *tabernaculum testimonii*, *die Wohnung des Zeugnisses*, "the tent of the testimony" (Num. ix. 15) "the tabernacle of witness" (Num. xvii. 7, xviii. 2). In this case the tent derives its name from that which is the centre of its holiness. The two tables of stone within the ark are emphatically *the* testimony (Ex. xxv. 16, 21, xxxi. 18). They were to all Israel the abiding witness of the nature and will of God. The tent, by virtue of its relation to them, became the witness of its own significance as the meeting-place of God and man. The probable connection of the two distinct names, in sense as well as in sound (Bähr, *Symb.* i. 83; Ewald, *Alt.* p. 230), gave, of course, a force to each which no translation can represent.

II. *History.* — (1.) The outward history of the Tabernacle begins with Ex. xxv. It comes after the first great group of Laws (xix.-xxiii.), after the covenant with the people, after the vision of the Divine Glory (xxiv.). For forty days and nights Moses is in the mount. Before him there lay a problem, as measured by human judgment, of gigantic difficulty. In what fit symbols was he to embody the great truths, without which the nation would sink into brutality? In what way could those symbols be guarded against the evil which he had seen in Egypt, of idolatry the most degrading? He was not left to solve the problem for himself. There rose before him, not without points of contact with previous associations, yet in no degree formed out of them, the "pattern" of the Tabernacle. The lower analogies of the painter and the architect seeing, with their inward eye, their completed work, before the work itself begins, may help us to understand how it was that the vision on the mount included all details of form, measurement, materials, the order of the ritual, the apparel of the priests.[b] He is directed in his choice of the two chief artists, Bezaleel of the tribe of Judah,[c] Aholiab of the tribe of Dan (xxxi.). The sin of the golden calf apparently postpones the execution. For a moment it seems as if the people were to be left without the Divine Presence itself, without any recognized symbol of it (Ex. xxxiii. 3). As in a transition period, the whole future depending on the penitence of the people, on the intercession of their leader, a tent is pitched, probably that of Moses himself, outside the camp, to be provisionally the Tabernacle of Meeting. There the mind of the Lawgiver enters into ever-closer fellowship with the mind of God (Ex. xxxiii. 11), learns to think of Him as "merciful and gracious" (Ex. xxxiv. 6), in the strength of that thought is led back to the fulfillment of the plan which had seemed likely to end, as it began, in vision. Of this provisional

---

[a] * In Acts vii. 46, "tabernacle" in the A. V. is anachronistic. It should be "habitation" or "place of abode" (see Scholefield's *Hints for the Improvement of the A. V.*, p. 40) David desired to build a Temple for Jehovah; the Tabernacle had already existed for centuries. H.

[b] An interesting parallel is found in the preparations for the Temple. There also the extremest minutiæ were among the things which the Lord made David "to understand in writing by his hand upon him," *i. e.* by an inward illumination which seemed to exclude the slow process of deliberation as in Decision (1 Chr. xxviii. 19).

[c] The prominence of artistic power in the general ogies of the tribe of Judah is worth noticing (1 Chr iv. 4, 14, 21, 23). Dan, also, in the person of Hiram, b afterwards conspicuous (2 Chr. ii 14; comp. 1 K. vii 13, 14).

Digitized by Google

Tabernacle it has to be noticed, that there was as yet no ritual and no priesthood. The people went out to it as to an oracle (Ex. xxxiii. 7). Joshua, though of the tribe of Ephraim, had free access to it (Ex. xxxiii. 11).

(2.) Another outline Law was, however, given; another period of solitude, like the first, followed. The work could now be resumed. The people offered the necessary materials in excess of what was wanted (Ex. xxxvi. 5, 6). Other workmen (Ex. xxxvi. 2) and work-women (Ex. xxxv. 25) placed themselves under the direction of Bezaleel and Aholiab. The parts were completed separately, and then, on the first day of the second year from the Exodus, the Tabernacle itself was erected and the ritual appointed for it begun (Ex. xl. 2).

(3.) The position of the new tent was itself significant. It stood, not, like the provisional Tabernacle, at a distance from the camp, but in its very centre. The multitude of Israel, hitherto scattered with no fixed order, were now, within a month of its erection (Num. ii. 2), grouped round it, as around the dwelling of the unseen Captain of the Host, in a fixed order, according to their tribal rank. The Priests on the east, the other three families of the Levites on the other sides, were closest in attendance, the "body-guard" of the Great King. [LEVITES.] In the wider square, Judah, Zebulun, Issachar, were on the east; Ephraim, Manasseh, Benjamin, on the west; the less conspicuous tribes, Dan, Asher, Naphtali, on the north; Reuben, Simeon, Gad, on the south side. When the army put itself in order of march, the position of the Tabernacle, carried by the Levites, was still central, the tribes of the east and south in front, those of the north and west in the rear (Num. ii.). Upon it there rested the symbolic cloud, dark by day, and fiery red by night (Ex. xl. 38). When the cloud removed, the host knew that it was the signal for them to go forward (Ex. xl. 36, 37; Num. ix. 17). As long as it remained, whether for a day, or month, or year, they continued where they were (Num. ix. 15–23). Each march, it must be remembered, involved the breaking up of the whole structure, all the parts being carried on wagons by the three Levite families of Kohath, Gershon, and Merari, while the "sons of Aaron" prepared for the removal by covering everything in the Holy of Holies with a purple cloth (Num. iv. 6–15).

(4.) In all special facts connected with the Tabernacle, the original thought reappears. It is the place where man *meets* with God. There the Spirit "comes upon" the seventy Elders, and they prophesy (Num. xi. 24, 25). Thither Aaron and Miriam are called out, when they rebel against the servant of the Lord (Num. xii. 4). There the "glory of the Lord" appears after the unfaithfulness of the twelve spies (Num. xiv. 10), and the rebellion of Korah and his company (Num. xvi. 19, 42), and the sin of Meribah (Num. xx. 6). Thither, when there is no sin to punish, but a difficulty to be met, do the daughters of Zelophehad come to bring their cause "before the Lord" (Num. xxvii. 2). There, when the death of Moses draws near, is the solemn "charge" given to his successor (Deut. xxxi. 14).

(5.) As long as Canaan remained unconquered, and the people were still therefore an army, the Tabernacle was probably moved from place to place, wherever the host of Israel was, for the time, encamped, at Gilgal (Josh. iv. 19), in the valley between Ebal and Gerizim (Josh. viii. 30–35); again at the headquarters of Gilgal (Josh. ix. 6, x. 15, 43); and, finally, as at "the place which the Lord had chosen," at Shiloh (Josh. ix. 27, xviii. 1). The reasons of the choice are not given. Partly, perhaps, its central position, partly its belonging to the powerful tribe of Ephraim, the tribe of the great captain of the host, may have determined the preference. There it continued during the whole period of the Judges, the gathering-point for "the heads of the fathers" of the tribes (Josh. xix. 51), for councils of peace or war (Josh. xxii. 12; Judg. xxi. 12), for annual solemn dances, in which the women of Shiloh were conspicuous (Judg. xxi. 21). There, too, as the religion of Israel sank towards the level of an orgiastic heathenism, troops of women assembled,[a] shameless as those of Midian, worshippers of Jehovah, and, like the *ἱερόδουλοι* of heathen temples, concubines of his priests (1 Sam. ii. 22). It was far, however, from being what it was intended to be, the one national sanctuary, the witness against a localized and divided worship. The old religion of the high places kept its ground. Altars were erected, at first under protest, and with reserves, as being not for sacrifice (Josh. xxii. 26), afterwards freely and without scruple (Judg. vi. 24, xiii. 19). Of the names by which the one special sanctuary was known at this period, those of the "House," or the "Temple," of Jehovah (1 Sam. i. 9, 24, iii. 3, 15) are most prominent.

(6.) A state of things which was rapidly assimilating the worship of Jehovah to that of Ashtaroth, or Mylitta, needed to be broken up. The Ark of God was taken and the sanctuary lost its glory; and the Tabernacle, though it did not perish, never again recovered it[b] (1 Sam. iv. 22). Samuel, at once the Luther and the Alfred of Israel, who had grown up within its precincts, treats it as an abandoned shrine (so Ps. lxxviii. 60), and sacrifices elsewhere, at Mizpeh (1 Sam. vii. 9), at Ramah (ix. 12, x. 13), at Gilgal (x. 8, xi. 15). It probably became once again a movable sanctuary, less honored as no longer possessing the symbol of the Divine Presence, yet cherished by the priesthood, and some portions, at least, of its ritual kept up. For a time it seems, under Saul, to have been settled at NOB (1 Sam. xxi. 1–6), which thus became what it had not been before — a priestly city. The massacre of the priests and the flight of Abiathar must, however, have robbed it yet further of its glory. It had before lost the Ark. It now lost the presence of the High-Priest, and with it the oracular ephod, the URIM and the THUMMIM (1 Sam. xxii. 20, xxiii. 6). What change of fortune then followed we do not know. The fact that all Israel was encamped, in the last days of Saul, at Gilboa, and that there Saul, though without success, inquired of the Lord by Urim (1 Sam.

[a] The occurrence of the same distinctive word in Ex. xxxviii. 8, implies a recognised dedication of some kind, by which women bound themselves to the service of the Tabernacle, probably as singers and dancers. What we find under Eli was the corruption of the original practice (comp. Ewald, *Alterth.* 297). In the dances of Judg. xxi. 21, we have a stage of transition.

[b] Ewald (*Geschichte*, ii. 540) infers that Shiloh itself was conquered and laid waste.

Digitized by Google

xxviii. 4–6), makes it probable that the Tabernacle, as of old, was in the encampment, and that Abiathar had returned to it. In some way or other, it found its way to Gibeon (1 Chr. xvi. 39). The anomalous separation of the two things which, in the original order, had been joined, brought about yet greater anomalies; and, while the ark remained at Kirjath-jearim, the Tabernacle at Gibeon connected itself with the worship of the high-places (1 K. iii. 4). The capture of Jerusalem and the erection there of a new Tabernacle, with the ark, of which the old had been deprived (2 Sam. vi. 17; 1 Chr. xv. 1), left it little more than a traditional, historical sanctity. It retained only the old altar of burnt-offerings (1 Chr. xxi. 29). Such as it was, however, neither king nor people could bring themselves to sweep it away. The double service went on; Zadok, as high-priest, officiated at Gibeon (1 Chr. xvi. 39); the more recent, more prophetic service of psalms and hymns and music, under Asaph, gathered round the Tabernacle at Jerusalem (1 Chr. xvi. 4, 37). The divided worship continued all the days of David. The sanctity of both places was recognized by SOLOMON on his accession (1 K. iii. 15; 2 Chr. i. 3). But it was time that the anomaly should cease. As long as it was simply Tent against Tent, it was difficult to decide between them. The purpose of David fulfilled by Solomon, was that the claims of both should merge in the higher glory of the Temple. Some, Abiathar probably among them, clung to the old order, in this as in other things [SOLOMON; URIM AND THUMMIM], but the final day at last came, and the Tabernacle of Meeting was either taken down,[a] or left to perish and be forgotten. So a page in the religious history of Israel was closed. So the disaster of Shiloh led to its natural consummation.

III. *Relation to the Religious Life of Israel.* — (1.) Whatever connection may be traced between other parts of the ritual of Israel and that of the nations with which Israel had been brought into contact, the thought of the Tabernacle meets us as entirely new.[b] The "house of God" [BETHEL] of the Patriarchs had been the large "pillar of stone" (Gen. xxviii. 18, 19), bearing record of some high spiritual experience, and tending to lead men upward to it (Bähr, *Symbol.* i. 93), or the grove which, with its dim, doubtful light, attuned the souls of men to a divine awe (Gen. xxi. 33). The temples of Egypt were stately and colossal, hewn in the solid rock, or built of huge blocks of granite, as unlike as possible to the sacred tent of Israel. The command was one in which we can trace a special fitness. The stately temples belonged to the house of bondage which they were leaving. The sacred places of their fathers were in the land toward which they were journeying. In the mean while they were to be wanderers in the wilderness. To have set up a Bethel after the old pattern would have been to make that a resting-place, the object then or afterwards of devout pilgrimage; and the multiplication of such places at the different stages of their march would have led inevitably to polytheism. It would have failed utterly to lead them to the thought which they needed most — of a Divine Presence never absent from them, protecting, ruling, judging. A sacred tent, a moving Bethel, was the fit sanctuary for a people still nomadic.[c] It was capable of being united afterwards, as it actually came to be, with "the grove" of the older *cultus* (Josh. xxiv. 26).

(2.) The structure of the Tabernacle was obviously determined by a complex and profound symbolism; but its meaning remains one of the things at which we can but dimly guess. No interpretation is given in the Law itself. The explanations of Jewish writers long afterwards are manifestly wide of the mark. That which meets us in the Epistle to the Hebrews, the application of the *types* of the Tabernacle to the mysteries of Redemption, was latent till those mysteries were made known. And yet we cannot but believe that, as each portion of the wonderful order rose before the inward eye of the lawgiver, it must have embodied distinctly manifold truths which he apprehended himself, and sought to communicate to others. It entered, indeed, into the order of a divine education for Moses and for Israel; and an education by means of symbols, no less than by means of words, presupposes an existing language. So far from shrinking, therefore, as men have timidly and unwisely shrunk (Witsius, *Ægyptiaca*, in Ugolini, *Thes.* vol. i.) from asking what thoughts the Egyptian education of Moses would lead him to connect with the symbols he was now taught to use, we may see in it a legitimate method of inquiry — almost the only method possible. Where that fails, the gap may be filled up (as in Bähr, *Symbol. passim*) from the analogies of other nations, indicating, where they agree, a wide-spread primeval symbolism. So far from laboring to prove, at the price of ignoring or distorting facts, that everything was till then unknown, we shall as little expect to find it so, as to see in Hebrew a new and heaven-born language, spoken for the first time on Sinai, written for the first time on the Two Tables of the Covenant.

(3.) The thought of a graduated sanctity, like that of the outer court, the Holy Place, the Holy of Holies, had its counterpart, often the same number of stages, in the structure of Egyptian temples (Bähr, i. 216). The interior Adytum (to proceed from the innermost recess outward) was small in proportion to the rest of the building, and commonly, as in the Tabernacle (Joseph. *Ant.* ii. 6, § 3), was at the western end (Spencer, iii. 2), and was unlighted from without.

In the Adytum, often at least, was the sacred ARK, the culminating point of holiness, containing the highest and most mysterious symbols, winged figures, generally like those of the cherubim (Wilkinson, *Anc. Egypt.* v. 275; Kenrick, *Egypt*, i.

---

[a] The language of 2 Chr. v. 5, leaves it doubtful whether the Tabernacle there referred to was that at Jerusalem or Gibeon. (But see Joseph. *Ant.* viii. 4, § 1.)

[b] Spencer (*De leg. Hebræor.* iii. 3) labors hard, but not successfully, to prove that the tabernacles of Moloch of Amos v. 26, were the prototypes of the Tent of Meeting. It has to be remembered, however, (1) that the word used in Amos (*sicc'uth*) is never used of the Tabernacle, and means something very different; and (2) that the Moloch-worship represented a defection of the people *subsequent* to the erection of the Tabernacle. On these grounds, then, and not from any abstract repugnance to the idea of such a transfer, I abide by the statement in the text.

[c] Analogies of like wants met in a like way, with no ascertainable historical connection, are to be found among the Getulians and other tribes of northern Africa (Sil. Ital. iii. 289), and in the Sacred Tent of the Carthaginian encampments (Diod. Sic. xx. 65).

Digitized by Google

100), the emblems of stability and life. Here were outward points of resemblance. Of all elements of Egyptian worship this was one which could be transferred with least hazard, with most gain. No one could think that the Ark itself was the likeness of the God he worshipped. When we ask what gave the Ark its holiness, we are led on at once to the infinite difference, the great gulf between the two systems. That of Egypt was predominantly *cosmical*, starting from the productive powers of nature. The symbols of those powers, though not originally involving what we know as impurity, tended to it fatally and rapidly (Spencer, iii. 1; Warburton, *Divine Legation*, II. 4 note). That of Israel was predominantly ethical. The nation was taught to think of God, not chiefly as revealed in nature, but as manifesting himself in and to the spirits of men. In the Ark of the Covenant, as the highest revelation then possible of the Divine Nature, were the two tables of stone, on which were graven, by the teaching of the Divine Spirit, and therefore by "the finger of God,"[a] the great unchanging laws of human duty which had been proclaimed on Sinai. Here the lesson taught was plain enough. The highest knowledge was as the simplest, the esoteric as the exoteric. In the depths of the Holy of Holies, and for the high-priest as for all Israel, there was the revelation of a righteous Will requiring righteousness in man (Saalschütz, *Archäol.* c. 77). And over the Ark was the Cŏphereth (MERCY-SEAT), so called with a twofold reference to the root-meaning of the word. It *covered* the Ark. It was the witness of a mercy *covering* sins As the "footstool" of God, the "throne" of the Divine Glory, it declared that over the Law which seemed so rigid and unbending there rested the compassion of ONE forgiving "iniquity and transgression."[b] And over the Mercy-seat were the CHERUBIM, reproducing, in part at least, the symbolism of the great Hamitic races, forms familiar to Moses and Israel, needing no description for them, interpreted for us by the fuller vision of the later prophets (Ez. i. 5–13, x. 8–15, xli. 19), or by the winged forms of the imagery of Egypt. Representing as they did the manifold powers of nature, created life in its highest form (Bähr, i. 341), their "overshadowing wings." "meeting" as in token of perfect harmony, declared that nature as well as man found its highest glory in subjection to a Divine Law, that men might take refuge in that Order, as under "the shadow of the wings" of God (Stanley, *Jewish Church*, p. 98). Placed where those and other like figures were, in the temples of Egypt, they might be hindrances and not helps, might sensualize instead of purifying the worship of the people. But it was part of the wisdom which we may reverently trace in the order of the Tabernacle, that while Egyptian symbols are retained, as in the Ark, the Cherubim, the URIM and the THUMMIM, their place is changed. They remind the high-priest, the representative of the whole nation, of the truths on which the order rests. The people cannot bow down and worship that which they never see.

The material not less than the forms, in the Holy of Holies was significant. The acacia or shittim-wood, least liable, of woods then accessible, to decay, might well represent the imperishableness of Divine Truth, of the Laws of Duty (Bähr, i. 286). Ark, mercy-seat, cherubim, the very walls, were all overlaid with gold, the noblest of all metals, the symbol of light and purity, sun-light itself as it were, fixed and embodied, the token of the incorruptible, of the glory of a great king (Bähr, i. 282). It was not without meaning that all this lavish expenditure of what was most costly was placed where none might gaze on it. The gold thus offered taught man, that the noblest acts of beneficence and sacrifice are not those which are done that they may be seen of men, but those which are known only to Him who "seeth in secret" (Matt. vi. 4). Dimensions also had their meaning. Difficult as it may be to feel sure that we have the key to the enigma, there can be but little doubt that the older religious systems of the world did attach a mysterious significance to each separate number; that the training of Moses, as afterwards the far less complete initiation of Pythagoras in the symbolism of Egypt, must have made that transparently clear to him, which to us is almost impenetrably dark.[c] To those who think over the words of two great teachers, one heathen (Plutarch, *De Is. et Os.* p. 411), and one Christian (Clem. Al. *Strom.* vi. pp. 84–87), who had at least studied as far as they could the mysteries of the religion of Egypt, and had inherited part of the old system, the precision of the numbers in the plan of the Tabernacle will no longer seem unaccountable. If in a cosmical system, a right angled triangle with the sides three, four, five, represented the triad of Osiris, Isis, Orus, creative force, receptive matter, the universe of creation (Plutarch, *l. c.*), the perfect cube of the Holy of Holies, the constant recurrence of the numbers 4 and 10, may well be accepted as

---

[a] The equivalence of the two phrases, "by the Spirit of God," and "by the finger of God," is seen by comparing Matt. xii. 28 and Luke xi. 20. Comp. also the language of Clement of Alexandria (*Strom.* vi. § 133) and the use of "the hand of the Lord" in 1 K. xviii. 46; 2 K. iii. 15; Ez. i. 3, iii. 14; 1 Chr. xxviii. 19.

[b] Ewald, giving to כָּפַר, the root of *Cŏphereth*, the meaning of "to scrape," "erase," derives from that meaning the idea implied in the LXX. ἱλαστήριον, and denies that the word ever signified *tegmen* (*Alterth.* pp. 128, 129).

[c] A full discussion of the subject is obviously impossible here, but it may be useful to exhibit briefly the chief thoughts which have been connected with the numbers that are most prominent in the language of symbolism. Arbitrary as some of them may seem, a sufficient induction to establish each will be found in Bähr's elaborate dissertation, i. 128–255, and other works. Comp. Wilkinson, *Anc. Eg.* iv. 190-199; Leyrer in *Herzog's Encyclop.* "Stiftshütte."

ONE — The Godhead, Eternity, Life, Creative Force, the Sun, Man.

TWO — Matter, Time, Death, Receptive Capacity, the Moon, Woman.

THREE (as a number, or in the triangle) — The Universe in connection with God, the Absolute in itself, the Unconditioned, God.

FOUR (the number, or in the square or cube) — Conditioned Existence, the World as created, Divine Order, Revelation.

SEVEN (as = 3 + 4) — The Union of the World and God, Rest (as in the Sabbath), Peace, Blessing, Purification.

TEN (as = 1 + 2 + 3 + 4) — Completeness, moral and physical, Perfection.

FIVE — Perfection half attained, Incompleteness.

TWELVE — The Signs of the Zodiac, the Cycle of the Seasons; in Israel the idea' number of the people, of the Covenant of God with them

symbolizing order, stability, perfection (Bähr, i. 225).[a]

(4.) Into the inner sanctuary neither people nor the priests as a body ever entered. Strange as it may seem, that in which everything represented light and life was left in utter darkness, in profound solitude. Once only in the year, on the DAY OF ATONEMENT, might the high-priest enter. The strange contrast has, however, its parallel in the spiritual life. Death and life, light and darkness, are wonderfully united. Only through death can we truly live. Only by passing into the "thick darkness" where God is (Ex. xx. 21; 1 K. viii. 12), can we enter at all into the "light inaccessible," in which He dwells everlastingly. The solemn annual entrance, like the withdrawal of symbolic forms from the gaze of the people, was itself part of a wise and divine order. Intercourse with Egypt had shown how easily the symbols of Truth might become common and familiar things, yet without symbols, the truths themselves might be forgotten. Both dangers were met. To enter once, and once only in the year, into the awful darkness, to stand before the Law of Duty, before the presence of the God who gave it, not in the stately robes that became the representative of God to man, but as representing man in his humiliation, in the garb of the lower priests, bare-footed and in the linen ephod, to confess his own sins and the sins of the people, this was what connected the Atonement-day (*Cippûr*) with the Mercy-seat (*Cŏphereth*). And to come there with blood, the symbol of life, touching with that blood the mercy-seat, with incense, the symbol of adoration (Lev. xvi. 12-14), what did that express but the truth: (1) that man must draw near to the righteous God with no lower offering than the pure worship of the heart, with the living sacrifice of body, soul, and spirit; (2) that could such a perfect sacrifice be found, it would have a mysterious power working beyond itself, in proportion to its perfection, to cover the multitude of sins?

(5.) From all others, from the high-priest at all other times, the Holy of Holies was shrouded by the double VEIL, bright with many colors and strange forms, even as curtains of golden tissue were to be seen hanging before the Adytum of an Egyptian temple, a strange contrast often to the bestial form behind them (Clem. Al. *Paed.* iii. 4). In one memorable instance, indeed, the veil was the witness of higher and deeper thoughts. On the shrine of Isis at Sais, there were to be read words which, though pointing to a pantheistic rather than an ethical religion, were yet wonderful in their loftiness, "I am all that has been (*ὢν τὸ γεγονός*), and is, and shall be, and my veil no mortal hath withdrawn" (*ἀνεκάλυψεν*) (*De Is. et Osir.* p. 894). Like, and yet more, unlike the truth, we feel that no such words could have appeared on the veil of the Tabernacle. In that identification of the world and God, all idolatry was latent, as in the faith of Israel in the I AM, all idolatry was excluded.[b] In that despair of any withdrawal of the veil, of any revelation of the Divine Will, there were latent all the arts of an unbelieving priestcraft, substituting symbols, pomp, ritual for such a revelation. But what then was the meaning of the veil which met the gaze of the priests as they did service in the sanctuary? Colors in the art of Egypt were not less significant than number, and the four bright colors, probably, after the fashion of that art, in parallel bands, blue symbol of heaven, and purple of kingly glory, and crimson of life and joy, and white of light and purity (Bähr, i. 305-330), formed in their combination no remote similitude of the rainbow, which of old had been a symbol of the Divine covenant with man, the pledge of peace and hope, the sign of the Divine Presence (Ex. i. 28; Ewald, *Alterth.* p. 333). Within the veil, light and truth were seen in their unity. The veil itself represented the infinite variety, the *πολυποίκιλος σοφία* of the divine order in Creation (Eph. iii. 10). And there again were seen copied upon the veil, the mysterious forms of the cherubim; how many, or in what attitude, or of what size, or in what material, we are not told. The words "cunning work" in Ex. xxxvi. 35, applied elsewhere to combinations of embroidery and metal (Ex. xxviii. 15, xxxi. 4), justify perhaps the conjecture that here also they were of gold. In the absence of any other evidence it would have been, perhaps, natural to think that they reproduced on a larger scale, the number and the position of those that were over the mercy-seat. The visions of Ezekiel, however, reproducing, as they obviously do, the forms with which his priestly life had made him familiar, indicate not less than four (c. i. and x.), and those not all alike, having severally the faces of a man, a lion, an ox, and an eagle, strange symbolic words, which elsewhere we should have identified with idolatry, but which here were bearing witness against it, emblems of the manifold variety of creation as at once manifesting and concealing God.

(6.) The outer sanctuary was one degree less awful in its holiness than the inner. Silver, the type of Human Purity, took the place of gold, the type of the Divine Glory (Bähr, i. 284). It was to be trodden daily by the priests, as by men who lived in the perpetual consciousness of the nearness of God, of the mystery behind the veil. Barefooted and in garments of white linen, like the priests of Isis [PRIESTS], they accomplished their ministrations. And here, too, there were other emblems of Divine realities. With no opening to admit light from without, it was illumined only by the golden LAMP with its seven lights, one taller than the others, as the Sabbath is more sacred than the other days of the week, never all extinguished together, the perpetual symbol of all derived gifts of wisdom and holiness in man, reaching their mystical perfection when they shine in God's sanctuary to his glory (Ex. xxv. 31, xxvii. 20; Zech. iv. 1-14). The SHEW-BREAD, the "bread of faces," of the Divine Presence, not unlike in outward form to the sacred cakes which the Egyptians placed before the shrines of their gods, served as a token that, though there was no form or likeness of the Godhead, He was yet there, accepting all offerings, recognizing in particular that special offering which represented the life of the nation at once in the distinctness of its tribes and in its

[a] The symbol reappears in the most startling form in the closing visions of the Apocalypse. There the heavenly Jerusalem is described, in words which absolutely exclude the literalism which has sometimes been blindly applied to it, as a city four-square, 12,000 furlongs in length and breadth and height (Rev. xxi. 16).

[b] The name Jehovah, it has been well said, was "the rending asunder of the veil of Sais." (Stanley *Jewish Church*, p. 110.)

Digitized by Google

unity as a people (Ewald, *Alterth.* p. 120). The meaning of the ALTAR OF INCENSE was not less obvious. The cloud of fragrant smoke was the natural, almost the universal, emblem of the heart's adoration (Ps. cxli. 2). The incense sprinkled on the shew-bread and the lamp taught men that all other offerings needed the intermingling of that adoration. Upon that altar no "strange fire" was to be kindled. When fresh fire was needed it was to be taken from the ALTAR OF BURNT-OFFERING in the outer court (Lev. ix. 24, x. 1). Very striking, as compared with what is to follow, is the sublimity and the purity of these symbols. It is as though the priestly order, already leading a consecrated life, were capable of understanding a higher language which had to be translated into a lower for those that were still without (Saalschütz, *Archäol.* § 77).

(7.) Outside the tent, but still within the consecrated precincts, was the COURT, fenced in by an enclosure, yet open to all the congregation as well as to the Levites, those only excepted who were ceremonially unclean. No Gentile might pass beyond the curtains of the entrance, but every member of the priestly nation might thus far 'draw near" to the presence of Jehovah. Here therefore stood the ALTAR OF BURNT-OFFERINGS, at which SACRIFICES in all their varieties were offered by penitent or thankful worshippers (Ex. xxvii. 1–8, xxxviii. 1), the brazen LAVER at which those worshippers purified themselves before they sacrificed, the priests before they entered into the sanctuary (Ex. xxx. 17–21). Here the graduated scale of holiness ended. What Israel was to the world, fenced in and set apart, that the Court of the Tabernacle was to the surrounding wilderness, just as the distinction between it and the sanctuary answered to that between the sons of Aaron and other Israelites, just as the idea of holiness culminated personally in the high-priest, locally in the Holy of Holies.

IV. *Theories of Later Times.* — (1.) It is not probable that the elaborate symbolism of such a structure was understood by the rude and sensual multitude that came out of Egypt. In its fullness perhaps no mind but that of the lawgiver himself ever entered into it, and even for him, one half, and that the highest, of its meaning must have been altogether latent. Yet it was not the less, was perhaps the more fitted, on that account to be an instrument for the education of the people. To the most ignorant and debased it was at least a witness of the nearness of the Divine King. It met the craving of the human heart which prompts to worship, with an order which was neither idolatrous nor impure. It taught men that their fleshly nature was the hindrance to worship; that it rendered them unclean; that only by subduing it, killing it, as they killed the bullock and the goat, could they offer up an acceptable sacrifice; that such a sacrifice was the condition of forgiveness, — a higher sacrifice than any they could offer the ground of that forgiveness. The sins of the past were considered as belonging to the fleshly nature which was slain and offered, not to the true inner self of the worshipper. More thoughtful minds were led inevitably to higher truths. They were not slow to see in the Tabernacle the parable of God's presence manifested in Creation. Darkness was as his pavilion (2 Sam. xxii. 12). He has made a Tabernacle for the Sun (Ps. xix. 4). The heavens were spread out like its curtains. The beams of his chambers were in the mighty waters (Ps. civ. 2, 3; Is. xl. 22; Lowth, *De Sac. Poes.* viii.). The majesty of God seen in the storm and tempest was as of one who rides upon a cherub (2 Sam. xxii. 11). If the words, "He that dwelleth between the cherubim," spoke on the one side of a special, localized manifestation of the Divine Presence, they spoke also on the other of that Presence as in the heaven of heavens, in the light of setting suns, in the blackness and the flashes of the thunder-clouds.

(2.) The thought thus uttered, essentially poetical in its nature, had its fit place in the psalms and hymns of Israel. It lost its beauty, it led men on a false track, when it was formalized into a system. At a time when Judaism and Greek philosophy were alike effete, when a feeble physical science which could read nothing but its own thoughts in the symbols of an older and deeper system, was after its own fashion rationalizing the mythology of heathenism, there were found Jewish writers willing to apply the same principle of interpretation to the Tabernacle and its order. In that way, it seemed to them, they would secure the respect even of the men of letters who could not bring themselves to be Proselytes. The result appears in Josephus and in Philo, in part also in Clement of Alexandria and Origen. Thus interpreted, the entire significance of the Two Tables of the Covenant and their place within the ark disappeared, and the truths which the whole order represented became *cosmical* instead of ethical. If the special idiosyncrasy of one writer (Philo, *De Profug.*) led him to see in the Holy of Holies and the Sanctuary that which answered to the Platonic distinction between the visible (*αἰσθητά*) and the spiritual (*νοητά*), the coarser, less intelligent Josephus goes still more completely into the new system. The Holy of Holies is the visible firmament in which God dwells, the Sanctuary as the earth and sea which men inhabit (*Ant.* iii. 6, § 4, 7; 7, § 7). The twelve loaves of the shew-bread represented the twelve months of the year, the twelve signs of the Zodiac. The seven lamps were the seven planets. The four colors of the veil were the four elements (*στοιχεῖα*), air, fire, water, earth. Even the wings of the cherubim were, in the eyes of some, the two hemispheres of the universe, or the constellations of the Greater and the Lesser Bears! (Clem. Alex. *Strom.* v. § 85). The table of shew-bread and the altar of incense stood on the north, because north winds were most fruitful, the lamp on the south because the motions of the planets were southward (*ibid.* §§ 34, 35). We need not follow such a system of interpretation further. It was not unnatural that the authority with which it started should secure for it considerable respect. We find it reappearing in some Christian writers, Chrysostom (*Hom. in Joann. Bapt.*) and Theodoret (*Quæst. in Exod.*) — in some Jewish, Ben Uzziel, Kimchi, Abarbanel (Bähr, i. 103 *f.*). It was well for Christian thought that the Church had in the Epistle to the Hebrews and the Apocalypse of St. John that which helped to save it from the pedantic puerilities of this physico-theology.[a]

[a] It is curious to note how in Clement of Alexandria the two systems of interpretation cross each other, leading sometimes to extravagances like those in the text, sometimes to thoughts at once lofty and true

Digitized by Google

(3). It will have been clear from all that has been said that the Epistle to the Hebrews has not been looked on as designed to limit our inquiry into the meaning of the symbolism of the Tabernacle, and that there is consequently no ground for adopting the system of interpreters who can see in it nothing but an aggregate of types of Christian mysteries. Such a system has, in fact, to choose between two alternatives. Either the meaning was made clear, at least to the devout worshippers of old, and then it is no longer true that the mystery was hid "from ages and generations," or else the mystery was concealed, and then the whole order was voiceless and unmeaning as long as it lasted, then only beginning to be instructive when it was "ready to vanish away." Rightly viewed there is, it is believed, no antagonism between the interpretation which starts from the idea of *symbols* of Great, Eternal Truths, and that which rests on the idea of *types* foreshadowing Christ and his Work, and his Church. If the latter were the highest manifestation of the former (and this is the keynote of the Epistle to the Hebrews), then the two systems run parallel with each other. The type may help us to understand the symbol. The symbol may guard us against misinterpreting the type. That the same things were at once symbols and types may take its place among the proofs of an insight and a foresight more than human. Not the veil of nature only but the veil of the flesh, the humanity of Christ, at once conceals and manifests the Eternal's Glory. The rending of that veil enabled all, who had eyes to see and hearts to believe, to enter into the Holy of Holies, into the Divine Presence, and to see, not less clearly than the High Priest, as he looked on the ark and the Mercy Seat, that Righteousness and Love, Truth and Mercy were as one. Blood had been shed, a life had been offered which, through the infinite power of its Love, was able to atone, to satisfy, to purify.[a]

(4.) We cannot here follow out that strain of a higher mood, and it would not be profitable to enter into the speculations which later writers have engrafted on the first great thought. Those who wish to enter upon that line of inquiry may find materials enough in any of the greater commentaries on the Epistle to the Hebrews (Owen's, Stuart's Bleek's, Tholuck's, Delitzsch's, Alford's), or in special treatises, such as those of Van Till (*De Tabernac.* in Ugolini, *Thes.* viii.); Bede (*Expositio Mystica et Moralis Mosaici Tabernaculi*): Witaius (*De Tabern. Levit. Mysteriis*, in Miscell. Sacr.). Strange, outlying hallucinations, like those of ancient Rabbis, inferring, from "the pattern showed to Moses in the Mount," the permanent existence of a heavenly Tabernacle, like in form, structure, proportions to that which stood in the wilderness (Leyrer, *l. c.*), or of later writers who have seen in it (not in the spiritual but the anatomical sense of the word) a *type* of humanity, representing the outer bodily framework, the inner vital organs (Friederich, *Symb. der Mos. Stiftshütte*, in Leyrer, *l. c.*; and Ewald, *Alt.* p. 338), may be dismissed with a single glance: —

"Non ragioniam di lor, ma guarda e passa."

(5.) It is not quite as open to us to ignore a speculative hypothesis which, though in itself unsubstantial enough, has been lately revived under circumstances which have given it prominence. It has been maintained by Von Bohlen and Vatke (Bähr, i 117, 273) that the commands and the descriptions relating to the Tabernacle in the Books of Moses are altogether unhistorical, the result of the effort of some late compiler to ennoble the cradle of his people's history by transferring to a remote antiquity what he found actually existing in the Temple, modified only so far as was necessary to fit it in to the theory of a migration and a wandering. The structure did not belong to the time of the Exodus, if indeed there ever was an Exodus. The Tabernacle thus becomes the mythical aftergrowth of the Temple, not the Temple the historical sequel to the Tabernacle. It has lately been urged as tending to the same conclusion that the circumstances connected with the Tabernacle in the Pentateuch are manifestly unhistorical. The whole congregation of Israel are said to meet in a court which could not have contained more than a few hundred men (Colenso, *Pentateuch and Book of Joshua*, P. I. c. iv., v.). The number of priests was utterly inadequate for the services of the Tabernacle (*ibid.* c. xx.). The narrative of the head-money collection, of the gifts of the people, is full of anachronisms (*ibid.* c. xiv.).

(6.) Some of these objections — those, *e. g.* as to the number of the first-born, and the disproportionate smallness of the priesthood, have been met by anticipation in remarks under PRIESTS and LEVITES, written some months before the objections, in their present form, appeared. Others bearing upon the general veracity of the Pentateuch history it is impossible to discuss here. It will be sufficient to notice such as bear immediately upon the subject of this article. (1.) It may be said that this theory, like other similar theories as to the history of Christianity, adds to instead of diminishing difficulties and anomalies. It may be possible to make out plausibly that what purports to be the first period of an institution, is, with all its documents, the creation of the second; but the question then comes how we are to explain the existence of the second. The world rests upon an elephant, and the elephant on a tortoise, but the footing of the tortoise is at least somewhat insecure. (2.) Whatever may be the weight of the argument drawn from the alleged presence of the whole congregation at the door of the Tabernacle tells with equal force against the historical existence of the Temple and the narrative of its dedication. There also when the population numbered some seven or eight millions (2 Sam. xxiv. 9), "all the men of Israel" (1 K. viii. 2), all "the congregation" (ver. 5), all the children of Israel (ver. 63) were assembled, and the king "blessed" all the congregation (vv. 14, 55). (3.) There are, it is believed, undesigned touches indicating the nomad life of the wilderness. The wood employed for the Tabernacle is not the sycamore of the valleys nor

---

Some of these have been already noticed. Others, not to be passed over, are, that the seven lamps set forth the varied degrees and forms (πολυμερῶς καὶ πολυτρόπως) of God's Revelation, the form and the attitude of the Cherubim, the union of active ministry and grateful, ceaseless contemplation (*Strom.* v. §§ 36, 37).

[a] The allusions to the Tabernacle in the Apocalypse are, as might be expected, full of interest. As in a vision, which loses sight of all time limits, the Temple of the Tabernacle is seen in heaven (Rev. xv. 5), and yet in the heavenly Jerusalem there is no Temple seen (xxi. 22). And in the heavenly Temple there is no longer any veil; it is open, and the ark of the covenant is clearly seen (xi. 19).

Digitized by Google

the cedar of Lebanon, as afterwards in the Temple, but the shittim of the Sinaitic peninsula. [SHITTAH TREE, SHITTIM.] The abundance of fine linen points to Egypt, the seal or dolphin skins ("badgers" in A. V. but see Gesenius s. v. תְּחָשׁ) to the shores of the Red Sea. [BADGER-SKINS.] The Levites are not to enter on their office till the age of thirty, as needing for their work as bearers a man's full strength (Num. iv. 23, 30). Afterwards when their duties are chiefly those of singers and gate-keepers, they were to begin at twenty (1 Chr. xxiii. 24). Would a later history again have excluded the priestly tribe from all share in the structure of the Tabernacle, and left it in the hands of mythical persons belonging to Judah, and to a tribe then so little prominent as that of Dan? (4.) There remains the strong Egyptian stamp impressed upon well-nigh every part of the Tabernacle and its ritual, and implied in other incidents. (Comp. PRIESTS, LEVITES, URIM AND THUMMIM, BRAZEN SERPENT.] Whatever bearing this may have on our views of the things themselves, it points, beyond all doubt, to a time when the two nations had been brought into close contact, when not jewels of silver and gold only, but treasures of wisdom, art, knowledge were "borrowed" by one people from the other. To what other period in the history before Samuel than that of the Exodus of the Pentateuch can we refer that intercourse? When was it likely that a wild tribe, with difficulty keeping its ground against neighboring nations, would have adopted such a complicated ritual from a system so alien to its own? So it is that the wheel comes full circle. The facts which when urged by Spencer, with or without a hostile purpose, were denounced as daring and dangerous and unsettling, are now seen to be witnesses to the antiquity of the religion of Israel, and so to the substantial truth of the Mosaic history. They are used as such by theologians who in various degrees enter their protest against the more destructive criticism of our own time (Hengstenberg, *Egypt and the Books of Moses;* Stanley, *Jewish Church*, lect. iv.). (5.) We may, for a moment, put an imaginary case. Let us suppose that the records of the O. T. had given us in 1 and 2 Sam. a history like that which men now seek to substitute for what is actually given, had represented Samuel as the first great preacher of the worship of Elohim, Gad, or some later prophet as introducing for the first time the name and worship of Jehovah, and that the O. T. began with this (Colenso, P. II. c. xxi.). Let us then suppose that some old papyrus, freshly discovered, slowly deciphered, gave us the whole or the greater part of what we now find in Exodus and Numbers, that there was thus given an explanation both of the actual condition of the people and of the Egyptian element so largely intermingled with their ritual. Can we not imagine with what jubilant zeal the books of Samuel would then have been "critically examined," what inconsistencies would have been detected in them, how eager men would have been to prove that Samuel had had credit given him for a work which was not his, that not he, but Moses, was the founder of the polity and creed of Israel, that the Tabernacle on Zion, instead of coming fresh from David's creative mind, had been preceded by the humbler Tabernacle in the Wilderness? E. H. P.

## TABERNACLES, THE FEAST OF (חַג הַסֻּכּוֹת: ἑορτὴ σκηνῶν: *feria tabernaculorum:* חַג הָאָסִף, Ex. xxiii. 16, "the feast of ingathering:" σκηνοπηγία, John vii. 2; Jos. *Ant.* viii. 4, § 5: σκηναί, Philo, *De Sept.* § 24; ἡ σκηνή, Plut. *Sympos.* iv. 62), the third of the three great festivals of the Hebrews, which lasted from the 15th till the 22d of Tisri.

I. The following are the principal passages in the Pentateuch which refer to it: Ex. xxiii. 16, where it is spoken of as the Feast of ingathering, and is brought into connection with the other festivals under their agricultural designations, the Feast of Unleavened Bread and the Feast of Harvest; Lev. xxiii. 34–36, 39–43, where it is mentioned as commemorating the passage of the Israelites through the desert; Deut. xvi. 13–15, in which there is no notice of the eighth day, and it is treated as a thanksgiving for the harvest; Num. xxix. 12–38, where there is an enumeration of the sacrifices which belong to the festival; Deut. xxxi. 10–13, where the injunction is given for the public reading of the Law in the Sabbatical year, at the Feast of Tabernacles. In Neh. viii. there is an account of the observance of the feast by Ezra, from which several additional particulars respecting it may be gathered.

II. The time of the festival fell in the autumn, when the whole of the chief fruits of the ground, the corn, the wine, and the oil, were gathered in (Ex. xxiii. 16; Lev. xxiii. 39; Deut. xvi. 13–15). Hence it is spoken of as occurring "in the end of the year, when thou hast gathered in thy labors out of the field." Its duration was strictly only seven days (Deut. xvi. 13; Ez. xlv. 25). But it was followed by a day of holy convocation, distinguished by sacrifices of its own, which was sometimes spoken of as an eighth day (Lev. xxiii. 36; Neh. viii. 18).

During the seven days the Israelites were commanded to dwell in booths or huts[a] formed of the boughs of trees. These huts, when the festival was celebrated in Jerusalem, were constructed in the courts of houses, on the roofs, in the court of the Temple, in the street of the Water Gate, and in the street of the Gate of Ephraim. The boughs were of the olive, palm, pine, myrtle, and other trees with thick foliage (Neh. viii. 15, 16). The command in Lev. xxiii. 40 is said to have been so understood,[b] that the Israelites, from the first day of the feast to the seventh, carried in their hands "the fruit (as in the margin of the A. V., not *branches*, as in the text) of goodly trees, with branches of palm trees, boughs of thick trees, and willows of the brook."

According to Rabbinical tradition, each Israelite used to tie the branches into a bunch, to be carried in his hand, to which the name *lulab*[c] was given.

---

[a] The word סֻכָּה means "a hut," and is to be distinguished from אֹהֶל, "a tent of skins or cloth," which is the term applied to the Tabernacle of the Congregation. See Gesen. *s. v.*

[b] This is the view of the Rabbinists, which appears to be countenanced by a comparison of v. 40 with v 42. But the Karaites held that the boughs here mentioned were for no other purpose than to cover the huts, and that the willow branches were merely for tying the parts of the huts together.

[c] The word לוּלָב strictly means simply a palm

Digitized by Google

The "fruit of goodly trees" is generally taken by the Jews to mean the citron.[a] But Josephus (*Ant.* iii. 10, § 4) says that it was the fruit of the *persea*, a tree said by Pliny to have been conveyed from Persia to Egypt (*Hist. Nat.* xv. 13), and which some have identified with the peach (*Malus persica*). The boughs of thick trees were understood by Onkelos and others to be myrtles (חֲדַסִּים), but that no such limitation to a single species could have been intended seems to be proved by the boughs of thick trees and myrtle branches being mentioned together (Neh. viii. 15).

The burnt-offerings of the Feast of Tabernacles were by far more numerous than those of any other festival. It is said that the services of the priests were so ordered that each one of the courses was employed during the seven days (*Succah*, v. 6). There were offered on each day two rams, fourteen lambs, and a kid for a sin-offering. But what was most peculiar was the arrangement of the sacrifices of bullocks, in all amounting to seventy. Thirteen were offered on the first day, twelve on the second, eleven on the third, and so on, reducing the number by one each day till the seventh, when seven bullocks only were offered (Num. xxix. 12–38).

The eighth day was a day of holy convocation of peculiar solemnity, and, with the seventh day of the Passover, and the day of Pentecost, was designated עֲצֶרֶת [PASSOVER, iii. 2343, note *a*]. We are told that on the morning of this day the Hebrews left their huts and dismantled them, and took up their abode again in their houses. The special offerings of the day were a bullock, a ram, seven lambs, and a goat for a sin-offering (Num. xxix. 36–38).[b]

When the Feast of Tabernacles fell on a Sabbatical year, portions of the Law were read each day in public, to men, women, children, and strangers (Deut. xxxi. 10–13). It is said that, in the time of the Kings, the king himself used to read from a wooden pulpit erected in the court of the women, and that the people were summoned to assemble by sound of trumpet.[c] Whether the selections were made from the book of Deuteronomy only, or from the other books of the Law also, is a question. But according to the Mishna (*Sota*, vi. 8, quoted by Reland) the portions read were Deut. i. 1–vi. 4, xi. 13–xiv. 22, xiv. 23–xvi. 22, xviii. 1–14, xxvii. 1–xxviii. 68 (see Fagius and Rosenmüller on Deut. xxxi. 11; Lightfoot, *Temple Service*, c. xvii.). We find Ezra reading the Law during the festival "day by day, from the first day to the last day" (Neh. viii. 18).[d]

III. There are two particulars in the observance of the Feast of Tabernacles which appear to be referred to in the New Testament, but are not noticed in the Old. These were, the ceremony of pouring out some water of the pool of Siloam, and the display of some great lights in the court of the women.

We are told that each Israelite, in holiday attire, having made up his *lulab*, before he broke his fast (Fagius in Lev. xxiii.), repaired to the Temple with the *lulab* in one hand and the citron in the other, at the time of the ordinary morning sacrifice. The parts of the victim were laid upon the altar. One of the priests fetched some water in a golden ewer from the pool of Siloam, which he brought into the court through the Water Gate. As he entered the trumpets sounded, and he ascended the slope of the altar. At the top of this were fixed two silver basins with small openings at the bottom. Wine was poured into that on the eastern side, and the water into that on the western side, whence it was conducted by pipes into the Kedron (Maimon. ap. Carpzov. p. 419). The *hallel* was then sung, and when the singers reached the first verse of Ps. cxviii. all the company shook their *lulabs*. This gesture was repeated at the 25th verse, and again when they sang the 29th verse. The sacrifices which belonged to the day of the festival were then offered, and special passages from the Psalms were chanted.

In the evening (it would seem after the day of holy convocation with which the festival had commenced had ended), both men and women assembled in the court of the women, expressly to hold a rejoicing for the drawing of the water of Siloam. On this occasion, a degree of unrestrained hilarity was permitted, such as would have been unbecoming while the ceremony itself was going on, in the presence of the altar and in connection with the offering of the morning sacrifice (*Succah*, iv. 9, v. 1, and the passages from the Gem. given by Lightfoot, *Temple Service*, § 4).

At the same time there were set up in the court two lofty stands, each supporting four great lamps. These were lighted on each night of the festival. It is said that they cast their light over nearly the whole compass of the city. The wicks were furnished from the cast-off garments of the priests, and the supply of oil was kept up by the sons of the priests. Many in the assembly carried flambeaux. A body of Levites, stationed on the fifteen steps leading up to the women's court, played instruments of music, and chanted the fifteen psalms which are called in the A. V. Songs of Degrees (Ps. cxx.–cxxxiv.). Singing and dancing were afterwards continued for some time. The same ceremonies in the day, and the same joyous meeting in the evening, were renewed on each of the seven days.

It appears to be generally admitted that the

branch. Buxt. *Lex. Talm.* c. 1143; Carpzov, *App. Crit.* p. 416; Drusius, *Not. Maj.* in Lev. xxiii.

[a] אֶתְרוֹג. So Onkelos, Jonathan, and *Succah*. See Buxt. *Lex. Talm.* sub אתרג.

[b] The notion of Münster, Godwin, and others, that the eighth day was called "the day of palms," is utterly without foundation. No trace of such a designation is found in any Jewish writer. It probably resulted from a theory that the Feast of Tabernacles must, like the Passover and Pentecost, have a festival to answer to it in the calendar of the Christian Church, and that "the day of palms" passed into Palm Sunday

[c] A story is told of Agrippa, that when he was once performing this ceremony, as he came to the words "thou may'st not set a stranger over thee which is not thy brother," the thought of his foreign blood occurred to him, and he was affected to tears. But the bystanders encouraged him, crying out "Fear not, Agrippa! Thou art our brother." Lightfoot, *T. S.* c xvii.

[d] Dean Alford considers that there may be a reference to the public reading of the Law at the Feast of Tabernacles, John vii. 19 — "Did not Moses give you the law? and yet none of you keepeth the law" — even if that year was not the Sabbatical year, and the observance did not actually take place at the time

Digitized by Google

words of our Saviour (John vii. 37, 38) — "If any man thirst, let him come unto me and drink. He that believeth on me, as the Scripture hath said, out of his belly shall flow rivers of living water" — were suggested by the pouring out of the water of Siloam. The Jews seem to have regarded the rite as symbolical of the water miraculously supplied to their fathers from the rock at Meribah. But they also gave to it a more strictly spiritual signification, in accordance with the use to which our Lord appears to turn it. Maimonides (note in *Succah*) applies to it the very passage which appears to be referred to by our Lord (Is. xii. 3) — "Therefore with joy shall ye draw water out of the wells of salvation." The two meanings are of course perfectly harmonious, as is shown by the use which St. Paul makes of the historical fact (1 Cor. x. 4) — "they drank of that spiritual rock that followed them: and that rock was Christ."

But it is very doubtful what is meant by "the last day, that great day of the feast." It would seem that either the last day of the feast itself, that is the seventh, or the last day of the religious observances of the series of annual festivals, the eighth, must be intended. But there seems to have been nothing, according to ancient testimony, to distinguish the seventh, as a great day, compared with the other days; it was decidedly inferior, in not being a day of holy convocation, and in its number of sacrifices, to the first day.[a] On the other hand, it is nearly certain that the ceremony of pouring out the water did not take place on the eighth day,[b] though the day might have been, by an easy license, called the great day of the feast (2 Macc. x. 6; Joseph. *Ant.* iii. 10, § 4; Philo, *De Sept.* § 24). Dean Alford reasonably supposes that the eighth day may be meant, and that the reference of our Lord was to an ordinary and well-known observance of the feast, though it was not, at the very time, going on.

We must resort to some such explanation, if we adopt the notion that our Lord's words (John viii. 12) — "I am the light of the world" — refer to the great lamps of the festival. The suggestion must have arisen in the same way, or else from the apparatus for lighting not being removed, although the festival had come to an end. It should, however, be remarked that Bengel, Stier, and some others, think that the words refer to the light of morning which was then dawning. The view that may be taken of the genuineness of John viii. 1–11 will modify the probability of the latter interpretation.

IV. There are many directions given in the Mishna for the dimensions and construction of the huts. They were not to be lower than ten palms, nor higher than twenty cubits. They were to stand by themselves, and not to rest on any external support, nor to be under the shelter of a larger building, or of a tree. They were not to be covered with skins or cloth of any kind, but only with boughs, or, in part, with reed mats or laths. They were to be constructed expressly for the festival, out of new materials. Their forms might vary in accordance with the taste of the owners.[c] According to some authorities, the Israelites dwelt in them during the whole period of the festival (*Sifri*, in Reland), but others said it was sufficient if they ate fourteen meals in them, that is, two on each day (*Succah*, ii. 6). Persons engaged in religious service, the sick, nurses, women, slaves, and minors, were excepted altogether from the obligation of dwelling in them, and some indulgence appears to have been given to all in very tempestuous weather (*Succah*, i. ii.; Münster on Lev. xxiii. 40; Buxt. *Syn. Jud.* c. xxi.).

The furniture of the huts was to be, according to most authorities, of the plainest description. There was to be nothing which was not fairly necessary. It would seem, however, that there was no strict rule on this point, and that there was a considerable difference according to the habits or circumstances of the occupant[d] (Carpzov, p. 415; Buxt. *Syn. Jua.* p. 451).

It is said that the altar was adorned throughout the seven days with sprigs of willows, one of which each Israelite who came into the court brought with him. The great number of the sacrifices has been already noticed. The number of public victims offered on the first day exceeded those of any day in the year (*Menach.* xiii. 5). But besides these, the Chagigahs or private peace-offerings [PASSOVER, iii. 2346 f.] were more abundant than at any other time; and there is reason to believe that the whole of the sacrifices nearly outnumbered all those offered at the other festivals put together. It belongs to the character of the feast that on each day the trumpets of the Temple are said to have sounded twenty-one times.

V. Though all the Hebrew annual festivals were seasons of rejoicing, the Feast of Tabernacles was, in this respect, distinguished above them all. The huts and the *lulabs* must have made a gay and striking spectacle over the city by day, and the lamps, the flambeaux, the music, and the joyous gatherings in the court of the Temple must have given a still more festive character to the night. Hence, it was called by the Rabbis חג, *the festival*, κατ' ἐξοχήν. There is a proverb in *Succah* (v. 1), "He who has never seen the rejoicing at the pouring out of the water of Siloam has never seen rejoicing in his life." Maimonides says that he who failed at the Feast of Tabernacles in contributing to the public joy according to his means, incurred especial guilt (Carpzov, p. 419). The feast is designated by Josephus (*Ant.* viii. 4, § 1) ἑορτὴ ἁγιωτάτη καὶ μεγίστη, and by Philo, ἑορτῶν μεγίστη. Its thoroughly festive nature is shown in the accounts of its observance in Josephus (*Ant.* viii. 4, § 1, xv. 33), as well as in the accounts of its celebration by Solomon, Ezra, and Judas Maccabæus. From this fact, and its connection with the ingathering of the fruits of the year, especially the vintage, it is not wonderful that Plutarch should have likened it to the Dionysiac festivals, calling it θυρσοφορία and κρατηροφορία

[a] But Buxtorf, who contends that St. John speaks of the seventh day, says that the modern Jews of his time called that day "the Great Hosanna," and distinguished it by a greater attention than usual to their personal appearance, and by performing certain peculiar rites in the synagogue (*Syn. Jud.* xxi).

[b] R. Jehuda, however, said that the water was poured out on eight days. (*Succah*, iv. 9, with Bartenora's note.)

[c] There are some curious figures of different forms of huts, and of the great lights of the Feast of Tabernacles, in Surenhusius' *Mishna*, vol. ii.

[d] There is a lively description of some of the huts used by the Jews in modern times in *La Vie Juive en Alsace*, p. 170, &c.

Digitized by Google

(*Sympos.* iv.). The account which he gives of it is curious, but it is not much to our purpose here. It contains about as much truth as the more famous passage on the Hebrew nation in the fifth book of the History of Tacitus.

VI. The main purposes of the Feast of Tabernacles are plainly set forth (Ex. xxiii. 16, and Lev. xxiii. 43). It was to be at once a thanksgiving for the harvest, and a commemoration of the time when the Israelites dwelt in tents during their passage through the wilderness. In one of its meanings, it stands in connection with the Passover, as the Feast of Abib, the month of green ears, when the first sheaf of barley was offered before the Lord; and with Pentecost, as the feast of harvest, when the first loaves of the year were waved before the altar. in its other meaning, it is related to the Passover as the great yearly memorial of the deliverance from the destroyer, and from the tyranny of Egypt. The tents of the wilderness furnished a home of freedom compared with the house of bondage out of which they had been brought. Hence the Divine Word assigns as a reason for the command that they should dwell in huts during the festival, "that your generations may know that I made the children of Israel to dwell in booths, when I brought them out of the land of Egypt" (Lev. xxiii. 43).

But naturally connected with this exultation in their regained freedom, was the rejoicing in the more perfect fulfillment of God's promise, in the settlement of his people in the Holy Land. Hence the festival became an expression of thanksgiving for the rest and blessing of a settled abode, and, as connected with it, for the regular annual cultivation of the ground, with the storing up of the corn and the wine and the oil, by which the prosperity of the nation was promoted and the fear of famine put into a remoter distance. Thus the agricultural and the historical ideas of the feast became essentially connected with each other.

But besides this, Philo saw in this feast a witness for the original equality of all the members of the chosen race. All, during the week, poor and rich, the inhabitant alike of the palace or the hovel, lived in huts which, in strictness, were to be of the plainest and most ordinary materials and construction.[a] From this point of view the Israelite would be reminded with still greater edification of the perilous and toilsome march of his forefathers through the desert, when the nation seemed to be more immediately dependent on God for food, shelter, and protection, while the completed harvest stored up for the coming winter set before him the benefits he had derived from the possession of the land flowing with milk and honey which had been of old promised to his race

But the culminating point of this blessing was the establishment of the central spot of the national worship in the Temple at Jerusalem. Hence it was evidently fitting that the Feast of Tabernacles should be kept with an unwonted degree of observance at the dedication of Solomon's Temple (1 K. viii. 2, 65; Joseph. *Ant.* viii. 4, § 5), again, after the rebuilding of the Temple by Ezra (Neh. viii. 13–18), and a third time by Judas Maccabæus when he had driven out the Syrians and restored the Temple to the worship of Jehovah (2 Macc x. 5–8).

The origin of the Feast of Tabernacles is by some connected with Succoth, the first halting-place of the Israelites on their march out of Egypt; and the huts are taken not to commemorate the tents in the wilderness, but the leafy booths (*succoth*) in which they lodged for the last time before they entered the desert. The feast would thus call to mind the transition from settled to nomadic life (Stanley, *Sinai and Palestine*, Appendix, § 89).

Rab.* p. 230; the treatise *Succah*, in the Mishna, with Surenhusius' Notes; Hupfeld, *De Fest. Hebr.* part ii. Of the monographs on the subject the most important appear to be, Ikenius, *De Libatione Aquæ in Fest. Tab.*; Groddek, *De Ceremoniis Palmarum in Fest. Tab.* (in Ugolini, vol. xviii.), with the Notes of Dachs on *Succah*, in the Jerusalem Gemara. S. C.

**TABITHA** (Ταβιθά [*gazelle*]: *Tabitha*), also called Dorcas (Δορκάς) by St. Luke: a female disciple of Joppa, "full of good works," among which that of making clothes for the poor is specifically mentioned. While St. Peter was at the neighboring town of Lydda, Tabitha died, upon which the disciples at Joppa sent an urgent message to the Apostle, begging him to come to them without delay. It is not quite evident from the narrative whether they looked for any exercise of miraculous power on his part, or whether they simply wished for Christian consolation under what they regarded as the common calamity of their Church; but the miracle recently performed on Eneas (Acts ix. 34), and the expression in ver. 38 (διελθεῖν ἕως ἡμῶν), lead to the former supposition. Upon his arrival Peter found the deceased already prepared for burial, and laid out in an upper chamber, where she was surrounded by the recipients and the tokens of her charity. After the example of our Saviour in the house of Jairus (Matt. ix. 25; Mark v. 40), "Peter put them all forth," prayed for the Divine assistance, and then commanded Tabitha to arise (comp. Mark v. 41; Luke viii. 54). She opened her eyes and sat up, and then, assisted by the Apostle, rose from her couch. This great miracle, as we are further told, produced an extraordinary effect in

[a] Some Jewish authorities and others connect with it the fact that in the month Tisri the weather becomes rather cold, and hence there was a degree of self-denial, at least for the rich, in dwelling in huts (Joseph. *Ant.* iii. 10. § 4; Buxt. *Syn. Jud.* p. 447; Bel. *Ant.* iv. 5). They see in this a reason why the commemoration of the journey through the desert should have been fixed at this season of the year. The notion seems, however, not to be in keeping with the general character of the feast, the time of which appears to have been determined entirely on agricultural grounds. Hence the appropriateness of the language of the prophet, Zech. xiv. 16, 17; comp. Ex. xxiii. 16; Deut xvi. 13–17. As little worthy of more than a passing notice is the connecting the fall of Jericho with the festival (Godwyn, p. 72; Reland, iv. 5), and of the seventy bullocks offered during the seven days being a symbol of the seventy Gentile nations (Reland, iv. 5; Bochart, *Phaleg*, i. 15). But of somewhat more interest is the older notion found in Onkelos, that the shade of the branches represented the cloud by day which sheltered the Israelites. He renders the words in Lev. xxiii. 43 — "that I made the children of Israel to dwell under the shadow of cloud."

Digitized by Google

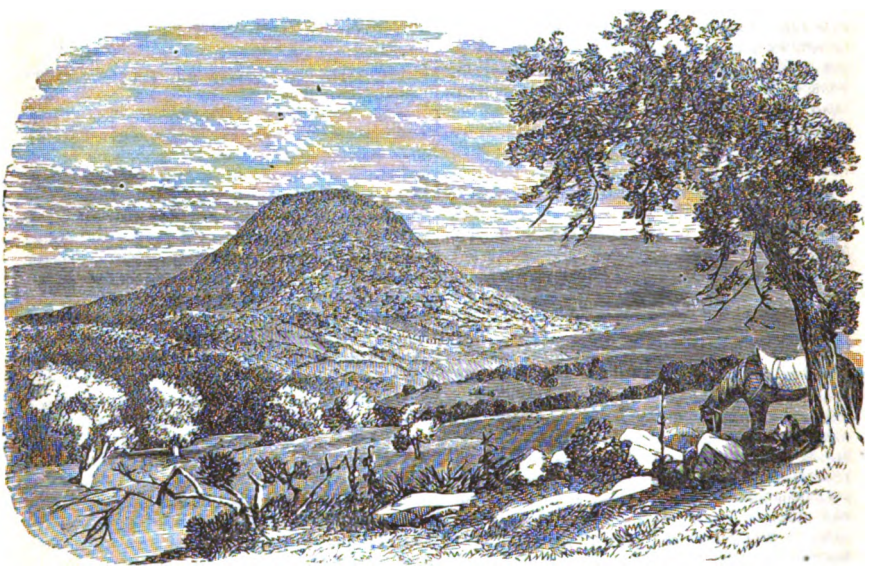
Joppa, and was the occasion of many conversions there (Acts ix. 36–42).

The name of "Tabitha" (טְבִיתָא) is the Aramaic form answering to the Hebrew צְבִיָּה, a "female gazelle," the gazelle being regarded in the East, among both Jews and Arabs, as a standard of beauty, — indeed, the word צְבִי properly means "beauty." St. Luke gives "Dorcas" as the Greek equivalent of the name. Similarly we find δορκάς as the LXX. rendering of צְבִי in Deut. xii. 15, 22; 2 Sam. ii. 18; Prov. vi. 5. It has been inferred from the occurrence of the two names, that Tabitha was a Hellenist (see Whithy, *in loc.*). This, however, does not follow, even if we suppose that the two names were actually borne by her, as it would seem to have been the practice even of the Hebrew Jews at this period to have a Gentile name in addition to their Jewish name. But it is by no means clear from the language of St. Luke that Tabitha actually bore the name of Dorcas. All he tells us is that the name of Tabitha means "gazelle" (δορκάς), and, for the benefit of his Gentile readers, he afterwards speaks of her by the Greek equivalent. At the same time it is very possible that she may have been known by both names; and we learn from Josephus (*B. J.* iv. 3, § 5) that the name of Dorcas was not unknown in Palestine. Among the Greeks, also, as we gather from Lucret. iv. 1154, it was a term of endearment. Other examples of the use of the name will be found in Wetstein, *in loc.* W. B. J.

* **TABLE.** See under other heads for important information connected with this word [MEALS; MONEY-CHANGERS; SHEW BREAD; TABERNACLE]. The earliest Hebrew term may have been *shulchán* (from שָׁלַח, *to stretch out*), being simply a piece of leather or cloth spread on the ground on which the food was placed. The word naturally passed to other applications so as to denote a table of any kind. We read in Judg. i. 7 that the vassals of Adoni-bezek (which see) "gathered their meat under his table," apparently therefore a raised cushion or *triclinium* at that early period. A table formed part of the furniture of the prophet Elisha's chamber (2 K. iv. 10). The table and its entertainments stand figuratively for the soul's food which God provides for his people (Ps. xxiii. 5, lxix. 22); and also for the enjoyments of Christ's perfected kingdom in heaven (Matt. viii. 11; Luke xiii. 29). To "serve tables" (Acts vi. 2) meant to provide food, or the means of purchasing it, for the poor, as arranged in the primitive Church at Jerusalem. The "table of the Lord," 1 Cor. x. 21, designates the Lord's Supper as opposed to the "table of demons" (δαιμονίων) or feasts of heathen revelling. The "writing-table" on which Zacharias wrote the name of John (Luke i. 63) was no doubt a "tablet" (πινακίδιον) covered with wax, on which the ancients wrote with a stylus. As Tertullian says: "Zacharias loquitur in stylo, auditur in cera."

In Mark vii. 4 "tables" is a mistranslation for "beds" or "couches." The same Greek term (κλίνη) is rendered "bed" in the nine other passages where it occurs (Matt. ix. 2, 6; Mark iv. 21, vii. 30; Luke v. 18, viii. 16, xvii. 34; Acts v. 15; Rev. ii. 22), and should be so rendered here. Not beds of every sort are intended in Mark vii. 4, but as Meyer observes (*in loc.*), "table-beds" (*Speisesluger*), which might be defiled by the leprous, the menstruous, or others considered unclean, for the entire context relates to the act of eating. This is made reasonably certain by the manifest relation of the passage to Lev. xv. 4, where the same rule is enjoined, and where the language is: "Every bed whereon he lieth that hath the issue, is unclean; and everything whereon he sitteth shall be unclean." They were couches or raised sofas on which the ancients reclined at meals, or on ordinary occasions may have been little more than cushions or rugs (see Matt. ix. 6; Acts v. 15). This washing of such articles was something which the Pharisees were always careful to have done after the couches had been used, before they themselves would run the risk of any defilement. It should be added that Tischendorf rejects κλίνα from Mark vii. 4, but against adequate testimony for it. H.

**TA'BOR and MOUNT[a] TABOR** (הַר תָּבוֹר, probably = "height," as in Simonis' *Onomasticon*, p. 300: Γαιθβώρ [Alex. Ταφωθ], ὄρος Θαβώρ, Θαβώρ, but τὸ Ἰταβύριον in Jer. and Hosea, and in Josephus, who has also Ἀταρβύριον: *Thuoor*), one of the most interesting and remarkable of the single mountains in Palestine. It was a Rabbinic saying (and shows the Jewish estimate of the attractions of the locality), that the Temple ought of right to have been built here, but was required by an express revelation to be erected on Mount Moriah. It rises abruptly from the north-eastern arm of the plain of Esdraelon, and stands entirely insulated, except on the west, where a narrow ridge connects it with the hills of Nazareth. It presents to the eye, as seen from a distance, a beautiful appearance, being so symmetrical in its proportions, and rounded off like a hemisphere or the segment of a circle, yet varying somewhat as viewed from different directions. The body of the mountain consists of the peculiar limestone of the country. It is studded with a comparatively dense forest of oaks, pistacias, and other trees and bushes, with the exception of an occasional opening on the sides, and a small uneven tract on the summit. The coverts afford at present a shelter for wolves, wild boars, lynxes, and various reptiles. Its height from the base is estimated at 1,000 feet, but may be somewhat more rather than less.[b] Its ancient name, as already suggested, indicates its elevation, though it does not rise much, if at all, above some of the other summits in the vicinity. It is now called *Jebel et-Tûr*. It lies about six or eight miles almost due east from Nazareth. The writer, in returning to that village toward the close of the day (May 3, 1852), found the sun as it went down in the west shining directly in his face, with hardly any deviation to the right hand or the left by a single turn of the path. The ascent is usually made on the west side, near the little village of *Debûrieh*, probably the ancient Daberath (Josh. xix. 12), though it can be made with entire ease in other places. It requires three-quarters of an hour or an hour to reach the top. The path is circuitous and



[a] The full form occurs in Judg. iv. 6, 12, 14; that of Tabor only, in Josh. xix. 22; Judg. viii. 18; Ps. lxxix. 12; Jer. xlvi. 18; Hos. v. 1.

[b] * Tristram (*Land of Israel*, p. 499) says 1,200 feet from the base, and 1,865 from the sea-level. The latter is Van de Velde's estimate H.

Digitized by Google

at times steep, but not so much so as to render it difficult to ride the entire way. The trees and bushes are generally so thick as to intercept the prospect; but now and then the traveller as he ascends comes to an open spot which reveals to him a magnificent view of the plain. One of the most pleasing aspects of the landscape, as seen from such points, in the season of the early harvest, is that presented in the diversified appearance of the fields. The different plots of ground exhibit various colors, according to the state of cultivation at the time. Some of them are red, where the land has been newly plowed up, owing to the natural properties of the soil; others yellow or white, where the harvest is beginning to ripen or is already ripe; and others green, being covered with grass or springing grain. As they are contiguous to each other, or intermixed, these parti colored plots present, as looked down upon from above, an appearance of gay checkered work which is singularly beautiful. The top of Tabor consists of an irregular platform, embracing a circuit of half an hour's walk, and commanding wide views of the subjacent plain from end to end. A copious dew falls here during the warm months. Travellers who have spent the night there have found their tents as wet in the morning as if they had been drenched with rain.

It is the universal judgment of those who have stood on the spot that the panorama spread before them as they look from Tabor includes as great a variety of objects of natural beauty and of sacred and historic interest as any one to be seen from any position in the Holy Land. On the east the waters of the Sea of Tiberias, not less than fifteen miles distant, are seen glittering through the clear atmosphere in the deep bed where they repose so quietly. Though but a small portion of the surface of the lake can be distinguished, the entire outline of its basin can be traced on every side. In the

View of Mount Tabor from the S. W., from a sketch taken in 1842 by W. Tipping, Esq., and engraved by his permission.

same direction the eye follows the course of the Jordan for many miles; while still further east it rests upon a boundless perspective of hills and valleys, embracing the modern Haurân, and further south the mountains of the ancient Gilead and Bashan. The dark line which skirts the horizon on the west is the Mediterranean; the rich plains of Galilee fill up the intermediate space as far as the foot of Tabor. The ridge of Carmel lifts its head in the northwest, though the portion which lies directly on the sea is not distinctly visible. On the north and northeast we behold the last ranges of Lebanon as they rise into the hills about Safed, overtopped in the rear by the snow-capped Hermon, and still nearer to us the Horns of Hattîn, the reputed Mount of the Beatitudes. On the south are seen, first the summits of Gilboa, which David's touching elegy on Saul and Jonathan has fixed forever in the memory of mankind, and further onward a confused view of the mountains and valleys which occupy the central part of Palestine. Over the heads of Dûhy and Gilboa the spectator looks into the valley of the Jordan in the neighborhood of Beisân (itself not within sight), the ancient Beth-shean, on whose walls the Philistines hung up the headless trunk of Saul, after their victory over Israel. Looking across a branch of the plain of Esdraelon, we behold Endor, the abode of the sorceress whom the king consulted on the night before his fatal battle. Another little village clings to the hill-side of another ridge, on which we gaze with still deeper interest. It is Nain, the village of that name in the New Testament, where the Saviour touched the bier, and restored to life the widow's son. The Saviour must have passed often at the foot of this mount in the course of his journeys in different parts of Galilee. It is not surprising that the Hebrews looked up with so much admiration to this glorious work of the Creator's hand. The

same beauty rests upon its brow to-day, the same richness of verdure refreshes the eye, in contrast with the bleaker aspect of so many of the adjacent mountains. The Christian traveller yields spontaneously to the impression of wonder and devotion, and appropriates as his own the language of the psalmist (lxxxix. 11, 12): —

"The heavens are thine, the earth also is thine;
The world and the fullness thereof, thou hast founded them.
The north and the south thou hast created them;
Tabor and Hermon shall rejoice in thy name."

Tabor does not occur in the New Testament, but makes a prominent figure in the Old. The book of Joshua (xix. 22) mentions it as the boundary between Issachar and Zebulon (see ver. 12). Barak, at the command of Deborah, assembled his forces on Tabor, and, on the arrival of the opportune moment, descended thence with "ten thousand men after him" into the plain, and conquered Sisera on the banks of the Kishon (Judg. iv. 6–15). The brothers of Gideon, each of whom "resembled the children of a king," were murdered here by Zebah and Zalmunna (Judg. viii. 18, 19). Some writers, after Herder and others, think that Tabor is intended when it is said of Issachar and Zebulon in Deut. xxxiii. 19, that "they shall call the people unto *the mountain*; there they shall offer sacrifices of righteousness." Stanley, who adopts this view (*Sinai and Palestine*, p. 351), remarks that he was struck with the aspect of the open glades on the summit as specially fitted for the convocation of festive assemblies, and could well believe that in some remote age it may have been a sanctuary of the northern tribes, if not of the whole nation. The prophet in Hos. v. 1, reproaches the priests and royal family with having "been a snare on Mispah and a net spread upon Tabor." The charge against them probably is that they had set up idols and practiced heathenish rites on the high places which were usually selected for such worship. The comparison in Jer. xlvi. 18, "as Tabor is among the mountains and Carmel by the sea," imports apparently that these heights were proverbial for their conspicuousness, beauty, and strength.

Dr. Robinson (*Researches*, ii. 353) has thus described the ruins which are to be seen at present on the summit of Tabor. "All around the top are the foundations of a thick wall built of large stones, some of which are beveled, showing that the entire wall was perhaps originally of that character. In several parts are the remains of towers and bastions. The chief remains are upon the ledge of rocks on the south of the little basin, and especially towards its eastern end; here are — in indiscriminate confusion — walls, and arches, and foundations, apparently of dwelling-houses, as well as other buildings, some of hewn, and some of large beveled stones. The walls and traces of a fortress are seen here, and further west along the southern brow, of which one tall pointed arch of a Saracenic gateway is still standing, and bears the name of *Bâb el-Hawa*, 'Gate of the Wind.' Connected with it are loopholes, and others are seen near by. These latter fortifications belong to the era of the Crusades; but the large beveled stones we refer to a style of architecture not later than the times of the Romans, before which period, indeed, a town and fortress already existed on Mount Tabor. In the days of the crusaders, too, and earlier, there were here churches and monasteries. The summit has many cisterns, now mostly dry." The same writer found the thermometer here at 10 A. M. (June 18th) at 98° F., at sunrise at 64°, and at sunset at 74°. The Latin Christians have now an altar here, at which their priests from Nazareth perform an annual mass. The Greeks also have a chapel, where, on certain festivals, they assemble for the celebration of religious rites.[a]

Most travellers who have visited Tabor in recent times have found it utterly solitary so far as regards the presence of human occupants. It happened to the writer on his visit here (1852) to meet, unexpectedly, with four men who had taken up their abode in this retreat, so well suited to encourage the devotion of religious devotees. One of them was an aged priest of the Greek Church, a native of Wallachia, named Erinna, according to his own account more than a hundred years old, who had come here to await the final advent of Christ. Dean Stanley found the old hermit still living in 1862. According to his own story, Erinna "in his early years received an intimation in his sleep that he was to build a church on a mountain shown to him in his dream. He wandered through many countries, and found his mountain at last in Tabor. There he lived and collected money from pilgrims, which at his death, a few years ago, amounted to a sufficient sum to raise the church, which is approaching completion. He was remarkable for his long beard and for a tame panther, which, like the ancient hermits, he made his constant companion" (*Sermons in the East*, p. 191 f.). He was a man of huge physical proportions, and stood forth as a good witness for the efficacy of the diet of milk and herbs, on which, according to his own account, he subsisted. The other three men were natives of the same province. Two of them, having been to Jerusalem and the Jordan on a pilgrimage, had taken Tabor in their way on their return homeward, where, finding unexpectedly the priest, whom they happened to know, they resolved to remain with him for a time. One of them was deliberating whether he should not take up his permanent abode there. The fourth person was a young man, a relative of the priest, who seemed to have taken on himself the filial office of caring for his aged friend in the last extremity. In the monastic ages Tabor, in consequence, partly, of a belief that it was the scene of the Saviour's transfiguration, was crowded with hermits. It was one of the shrines from the earliest period which pilgrims to the Holy Land regarded it as a sacred duty to honor with their presence and their prayers. Jerome, in his Itinerary of Paula, writes, "Scandebat montem Thabor, in quo transfiguratus est Dominus; aspiciebat procul Hermon et Hermonim et campos latissimos Galilææ (Jesreel), in quibus Sisara prostratus est. Torrens Cison qui mediam

[a] Professor Stanley, in his *Notices of Localities visited with the Prince of Wales*, has mentioned some particulars attached to the modern history of Tabor which appear to have escaped former travellers. "The fortress, of which the ruins crown the summit, and evidently four gateways, like those by which the great Roman camps of our own country were entered. By one of these gateways my attention was called to an Arabic inscription, said to be the only one on the mountain." It records the building or rebuilding of "this blessed fortress" by the order of the Sultan Abu Bekr on his return from the East A. H. 607.

planitiem dividet, et oppidum juxta, Naim, monstrabantur."

This idea that our Saviour was transfigured on Tabor prevailed extensively among such of the early Christians as adopted legends of this nature (though not earlier than the 6th century), and reappears often still in popular religious works. If one might choose a place which he would deem peculiarly fitting for so sublime a transaction, there is none certainly which would so entirely satisfy our feelings in this respect as the lofty, majestic, beautiful Tabor. It is impossible, however, to acquiesce in the correctness of this opinion. It is susceptible of proof from the Old Testament, and from later history, that a fortress or town existed on Tabor from very early times down to B. C. 50 or 53; and as Josephus says (*Bell. Jud.* iv. 1, § 8) that he strengthened the fortifications of a city there, about A. D 60, it is morally certain that Tabor must have been inhabited during the intervening period, that is, in the days of Christ. Tabor, therefore, could not have been the Mount of Transfiguration; for when it is said that Jesus took his disciples "up into a high mountain apart and was transfigured before them" (Matt. xvii. 1, 2), we must understand that He brought them to the summit of the mountain, where they were alone by themselves (*κατ' ἰδίαν*). It is impossible to ascertain with certainty what place is entitled to the glory of this marvelous scene. The evangelists record the event in connection with a journey of the Saviour to Cæsarea Philippi, near the sources of the Jordan. It is conjectured that the Transfiguration may have taken place on one of the summits of Mount Hermon in that vicinity. [HERMON, Amer. ed.] See Ritter's *Erdkunde*, xv. 394 ff.; and Lichtenstein's *Leben Jesu*, p. 309. For the history of the tradition which connects Tabor with the Transfiguration, consult Robinson's *Researches*, ii. 358, 359. [TRANSFIGURATION, Amer. ed.] H. B. H.

**TA'BOR** (תָּבוֹר [*height*]: [Vat.] Θαχχεια; [Rom.] Alex. Θαβεσρ: *Thabor*) is mentioned in the lists of 1 Chr. vi. as a city of the Merarite Levites, in the tribe of Zebulun (ver. 77). The catalogue of Levitical cities in Josh. xxi. does not contain any name answering to this (comp. vers. 34, 35). But the list of the towns of Zebulun (*ib.* xix.) contains the name of CHISLOTH-TABOR (ver. 12). It is, therefore, possible, either that Chisloth-Tabor is abbreviated into Tabor by the chronicler, or that by the time these later lists were compiled, the Merarites had established themselves on the sacred mountain, and that Tabor is Mount Tabor. G.

**TA'BOR, THE PLAIN OF** (אֵלוֹן תָּבוֹר [*oak of the height*]: ἡ δρῦς Θαβώρ: *quercus Thabor*). It has been already pointed out [see PLAIN, ii. 2547 f.], that this is an incorrect translation, and should be THE OAK OF TABOR. It is mentioned in 1 Sam. x. 3, only as one of the points in the homeward journey of Saul after his anointing by Samuel. It was the next stage in the journey after "Rachel's sepulchre at Zelzach." But unfortunately, like so many of the other spots named in this interesting passage, the position of the Oak of Tabor has not yet been fixed.

Ewald seems to consider it certain (*gewiss*) that Tabor and Deborah are merely different modes of pronouncing the same name, and he accordingly identifies the Oak of Tabor with the tree under which Deborah, Rachel's nurse, was buried (Gen xxxv. 8), and that again with the palm, under which Deborah the prophetess delivered her oracles (*Gesch.* iii. 29, i. 390, ii. 489), and this again with the Oak of the old Prophet near Bethel (*ib.* iii. 444). But this, though most ingenious, can only be received as a conjecture, and the position on which it would land us — "between Ramah and Bethel" (Judg. iv. 5), is too far from Rachel's sepulchre to fall in with the conditions of the narrative of Saul's journey, as long as we hold that to be the traditional sepulchre near Bethlehem. A further opportunity for examining this most puzzling route will occur under ZELZAH; but the writer is not sanguine enough to hope that any light can be thrown on it in the present state of our knowledge. [See RAMAH, Amer. ed.] G.

**TABRET.** [TIMBREL.]

**TAB'RIMON** (טַבְרִמּוֹן: Ταβερεμά; Alex. Ταβερραμμα: *Tabremon*). Properly, Tabrimmon, *i. e.* "good is Rimmon," the Syrian god; compare the analogous forms Tobiel, Tobiah, and the Phœnician Tab-aram (Gesen. *Mon. Phœn.* p. 456). The father of Benhadad I., king of Syria in the reign of Asa (1 K. xv. 18).

**TACHE** (קֶרֶס: κρίκος: *circulus, fibula*). The word thus rendered occurs only in the description of the structure of the Tabernacle and its fittings (Ex. xxvi. 6, 11, 33, xxxv. 11, xxxvi. 13, xxxix. 33), and appears to indicate the small hooks by which a curtain is suspended to the rings from which it hangs, or connected vertically, as in the case of the veil of the Holy of Holies, with the loops of another curtain. The history of the English word is philologically interesting, as presenting points of contact with many different languages. The Gaelic and Breton branches of the Keltic family give *tac*, or *tach*, in the sense of a nail or hook. The latter meaning appears in the *attaccare*, *staccare*, of Italian, in the *attacher*, *détacher*, of French. On the other hand, in the *tak* of Dutch, and the *Zacke* of German, we have a word of like sound and kindred meaning. Our Anglo-Saxon *taccan* and English *take* (to seize as with a hook?) are probably connected with it. In later use the word has slightly altered both its form and meaning, and the *tack* is no longer a hook, but a small flat-headed nail (comp. Diez, *Roman. Wörteb.* s. v. *Tacco*). E. H. P.

**TACH'MONITE, THE** (הַתַּחְכְּמֹנִי [see below]: ὁ Χαναναῖος; [Comp. ὁ υἱὸς Θακεμανί:] *sapientissimus*). "The Tachmonite (properly, Tachcemonite) that sat in the seat," chief among David's captains (2 Sam. xxiii. 8), is in 1 Chr. xi. 11 called "Jashobeam an Hachmonite," or, as the margin gives it, "son of Hachmoni." The Geneva version has in 2 Sam. xxiii. 8, "He that sate in the seate of wisedome, being chiefe of the princes, was Adino of Ezni," regarding "Tachmonite" as an adjective derived from חָכָם, *chácám*, "wise," and in this derivation following Kimchi. Kennicott has shown, with much appearance of probability, that the words יֹשֵׁב בַּשֶּׁבֶת, *yóshéb bashshebeth*, "he that sat in the seat," are a corruption of Jashobeam, the true name of the hero, and that the mistake arose from an error of the transcriber, who carelessly inserted בַּשֶּׁבֶת from the previous verse where it

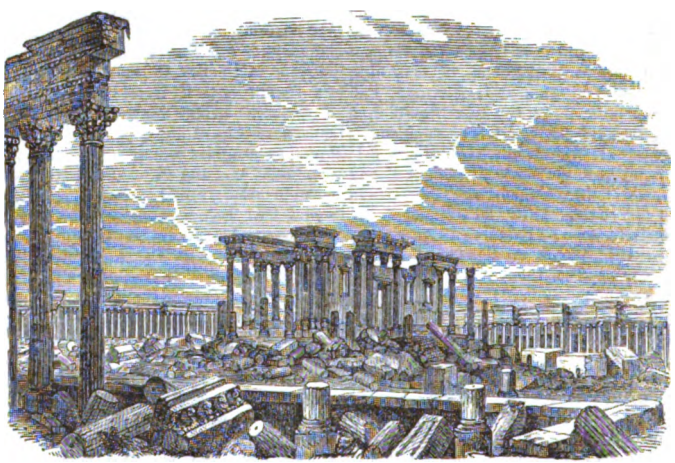
Digitized by Google

secure. He further considers "the Tachmonite" a corruption of the appellation in Chronicles, "son of Hachmoni," which was the family or local name of Jashobeam. "The name here in Samuel was at first הַחַכְמֹנִי, the article הַ at the beginning having been corrupted into a ה; for the word בֶּן in Chronicles is regularly supplied in Samuel by that article" (*Dissert.* p. 82). Therefore he concludes "Jashobeam the Hachmonite" to have been the true reading. Josephus (*Ant.* vii. 12, § 4) calls him Ἰέσσαμος υἱὸς Ἀχεμάλου, which favors Kennicott's emendation. W. A. W.

* **TACKLING.** For this nautical term in Acts xxvii. 17, see SHIP (6). It occurs also Is. xxxiii. 23, where in the prophet's allegory it (חֶבֶל) refers to the ropes connected with the vessel's mast and sails. H.

**TADMOR** (תַּדְמֹר [prob. *city of palms*]: [in 1 K. ix. 18, Rom. Vat. omit, Alex. Θερμαθ; in 2 Chr., Rom.] Θοεδμορ, [Vat. Θοεδομορ, Alex. Θεδμορ:] *Palmira*), called "Tadmor in the wilderness" (2 Chr. viii. 4). There is no reasonable doubt that this city, said to have been built by Solomon, is the same as the one known to the Greeks and Romans and to modern Europe by the name, in some form or other, of Palmyra (Παλμυρά, Παλμιρά, Palmira). The identity of the two cities results from the following circumstances: 1st, The same city is specially mentioned by Josephus (*Ant.* viii. 6, § 1) as bearing in his time the name of Tadmor among the Syrians, and Palmyra among the Greeks; and in his Latin translation of the Old Testament, Jerome translates Tadmor by Palmira (2 Chr. viii. 4). 2dly, The modern Arabic name of Palmyra is substantially the same as the Hebrew word, being Tadmur or Tathmur. 3dly, The word Tadmor has nearly the same meaning as Palmyra, signifying probably the "City of Palms," from Tamar, a palm; and this is confirmed by the Arabic word for Palma, a Spanish town on the Guadalquivir, which is said to be called Tadmir (see Gesenius in his *Thesaurus*, p. 345). 4thly, The name Tadmor or Tadmôr actually occurs as the name of the city in Aramaic and Greek inscriptions which have been found there. 5thly, In the Chronicles, the city is mentioned as having been built by Solomon after his conquest of Hamath Zobah, and it is named in conjunction with "all the store-cities which he built in Hamath." This accords fully with the situation of Palmyra [HAMATH]; and there is no other known city, either in the desert or not in the desert, which can lay claim to the name of Tadmor.

In addition to the passage in the Chronicles, there is a passage in the book of Kings (1 K. ix. 18) in which, according to the marginal reading (*Keri*), the statement that Solomon built Tadmor likewise occurs. But on referring to the original text (*Cethib*), the word is found to be not Tadmor, but Tamar. Now, as all the other towns mentioned in this passage with Tamar are in Palestine Gezer, Beth-horon, Baalath), as it is said of Tamar that it was "in the wilderness *in the land*," and as, in Ezekiel's prophetical description of the Holy Land, there is a Tamar mentioned as one of the borders of the land on the south (Ez. xlviii 19), where, as is notorious, there is a desert, it is probable that the author of the book of Kings did not really mean to refer to Palmyra, and that the marginal reading of "Tadmor" was founded on the passage in the Chronicles (see Thenius, *Exegetisches Handbuch*, 1 K. ix. 18).



If this is admitted, the suspicion naturally suggests itself, that the compiler of the Chronicles may have misapprehended the original passage in the book of Kings, and may have incorrectly written "Tadmor" instead of "Tamar." On this hypothesis there would have been a curious circle of mistakes; and the final result would be, that any supposed connection between Solomon and the foundation of Palmyra must be regarded as purely imaginary. This conclusion is not necessarily incorrect or unreasonable, but there are not sufficient reasons for adopting it. In the first place, the Tadmor of the Chronicles is not mentioned in connection with the same cities as the Tamar of the Kings, so there is nothing cogent to suggest the inference that the statement of the Chronicles was copied from the Kings. Secondly, admitting the historical correctness of the statement that the kingdom of Solomon extended from Gaza, near the Mediterranean Sea, to Tiphsah or Thapsacus, on the Euphrates (1 K. iv. 24; comp. Ps. lxxii. 8, 9), it would be in the highest degree probable that Solomon occupied and garrisoned such a very important station for connecting different parts of his dominions as Palmyra. And, even without reference to military and political considerations, it would have been a masterly policy in Solomon to have secured Palmyra as a point of commercial communication with the Euphrates, Babylon, and the Persian Gulf. It is evident that Solomon had large views of commerce; and as we know that he availed himself of the nautical skill of the Tyrians by causing some of his own subjects to accompany them in distant voyages from a port on the Red Sea (1 K. ix. 26, 27, 28, x. 22), it is unlikely that he should have neglected trade by land with such a centre of wealth and civilization as Babylon. But that great city, though so nearly in the same latitude with Jerusalem that there is not the difference of even one degree between them, was separated from Jerusalem by a great desert, so that regular direct communication between the two cities was impracticable. In a celebrated passage, indeed, of Isaiah (xl. 3), connected with "the voice of him that crieth in the wilderness," images are introduced of a direct return of the Jewish exiles from Babylon through the desert. Such a route was known to the Bedawîn of the desert; and may have been exceptionally passed over by others; but evidently these images are only poetical, and it may be deemed indisputable that the successive caravans of Jews who returned to their own land from Babylon arrived from the same quarter as Nebuchadnezzar and the Chaldæans (Jer. i. 14. 15, x. 22, xxv. 9), namely, from the North. In fact, Babylon thus became so associated with the North in the minds of the Jews, that in one passage of Jeremiah [a] (xxiii. 8) it is called "the North country," and it is by no means impossible that many

[a] A misunderstanding of this passage has countenanced the ideas of those who believe in a future second return of the Jews to Palestine. This belief may, under peculiarly favorable circumstances, lead hereafter to its own realization. It has not, however, been hitherto really proved that a second dispersion or a second return of the Jews was ever contemplated by any Hebrew prophet.

Digitized by Google

of the Jews may have been ignorant that Babylon was nearly due east from Jerusalem, although somewhat more than 600 miles distant. Now, the way in which Palmyra would have been useful to Solomon in trade between Babylon and the west is evident from a glance at a good map. By merely following the road up the stream on the right bank of the Euphrates, the traveller goes in a northwesterly direction, and the width of the desert becomes proportionally less, till at length, from a point on the Euphrates, there are only about 120 miles across the desert to Palmyra,[a] and thence about the same distance across the desert to Damascus. From Damascus there were ultimately two roads into Palestine, one on each side of the Jordan; and there was an easy communication with Tyre by Paneias, or Cæsarea Philippi, now *Bânids*. It is true that the Assyrian and Chaldee armies did not cross the desert by Palmyra, but took the more circuitous road by Hamath on the Orontes: but this was doubtless owing to the greater facilities which that route afforded for the subsistence of the cavalry of which those armies were mainly composed. For mere purposes of trade, the shorter road by Palmyra had some decided advantages, as long as it was thoroughly secure. See Movers, *Das Phönizische Alterthum*, 3ter Theil, p. 243, &c.

Hence there are not sufficiently valid reasons for denying the statement in the Chronicles that Solomon built Tadmor in the wilderness, or Palmyra. As, however, the city is nowhere else mentioned in the whole Bible, it would be out of place to enter into a long, detailed history of it on the present occasion. The following leading facts, however, may be mentioned. The first author of antiquity who mentions Palmyra is Pliny the Elder (*Hist. Nat.* v. 26), who says, "Palmira nobilis urbs situ, divitiis soli et aquis amœnis vasto undique ambitu arenis includit agros;" and then proceeds to speak of it as placed apart, as it were between the two empires of the Romans and the Parthians, and as the first object of solicitude to each at the commencement of war. Afterwards it was mentioned by Appian (*De Bell. Civil.* v. 9), in reference to a still earlier period of time, in connection with a design

Ruins of Tadmor or Palmyra.

of Mark Antony to let his cavalry plunder it. The inhabitants are said to have withdrawn themselves and their effects to a strong position on the Euphrates — and the cavalry entered an empty city. In the second century A. D. it seems to have been beautified by the Emperor Hadrian, as may be inferred from a statement of Stephanus of Byzantium as to the name of the city having been changed to Hadrianopolis (*s. v.* Παλμυρά). In the beginning of the third century A. D. it became a Roman colony under Caracalla (211–217 A. D.), and received the jus Italicum. Subsequently, in the reign of Gallienus, the Roman Senate invested Odenathus, a senator of Palmyra, with the regal dignity, on account of his services in defeating Sapor king of Persia. On the assassination of Odenathus, his celebrated wife Zenobia seems to have conceived the design of erecting Palmyra into an independent monarchy; and in prosecution of this object, she for a while successfully resisted the Roman arms. She was at length defeated and taken captive by the Emperor Aurelian (A. D. 273), who left a Roman garrison in Palmyra. This garrison was massacred in a revolt; and Aurelian punished the city by the execution not only of those who were taken in arms, but likewise of common peasants, of old men, women, and children. From this blow Palmyra never recovered, though there are proofs of its having continued to be inhabited until the downfall of the Roman Empire. There is a fragment of a building, with a Latin inscription, bearing the name of Diocletian; and there are existing walls of the city of the age of the Emperor Justinian. In 1172. Benjamin of Tudela found 4,000 Jews there; and at a later period Abulfeda mentioned it as full of splendid ruins. Subsequently its very existence had become unknown to modern Europe, when, in 1691 A. D., it was visited by some merchants from the English factory in Aleppo; and an account of their discoveries was published in 1695

[a] The exact latitude and longitude of Palmyra do not seem to have been scientifically taken. Mr. Wood mentions that his party had no quadrant with them, and there is a disagreement between various maps and geographical works. According to Mr. Johnston the position is, lat. 34° 18′ N., and long. 38° 12′ E.

Digitized by Google

in the *Philosophical Transactions* (vol. xix. No. 217, p. 83, No. 218, p. 129). In 1751, Robert Wood took drawings of the ruins on a very large scale, which he published in 1753, in a splendid folio work, under the title of *The Ruins of Palmyra, otherwise, Tadmor in the Desert.* This work still continues to be the best on Palmyra; and its valuable engravings fully justify the powerful impression which the ruins make on every intelligent traveller who crosses the desert to visit them. The colonnade and individual temples are inferior in beauty and majesty to those which may be seen elsewhere — such, for example, as the Parthenon, and the remains of the Temple of Jupiter, at Athens: and there is evidently no one temple equal to the Temple of the Sun at Baalbek, which, as built both at about the same period of time and in the same order of architecture, suggests itself most naturally as an object of comparison. But the long lines of Corinthian columns at Palmyra, as seen at a distance, are peculiarly imposing; and in their general effect and apparent vastness, they seem to surpass all other ruins of the same kind. All the buildings to which these columns belonged were probably erected in the second and third centuries of our era. Many inscriptions are of later date, but no inscription earlier than the second century seems yet to have been discovered.

For further information consult the original authorities for the history of Palmyra in the *Scriptores Historiæ Augustæ, Triginta Tyranni*, xiv., *Divus Aurelianus*, xxvi.; *Eutropius*, ix. cap. 10, 11, 12. In 1696 A. D., Abraham Seller published a most instructive work entitled, *The Antiquities of Palmyra, containing the History of the City and its Emperors*, which contains several Greek inscriptions, with translations and explanations. The Preface to Wood's work likewise contains a detailed history of the city; and Gibbon, in the 11th chapter of the *Decline and Fall*, has given an account of Palmyra with his usual vigor and accuracy. For an interesting account of the present state of the ruins see Porter's *Handbook for Syria and Palestine*, pp. 543–549, and Beaufort's *Egyptian Sepulchres*, etc., vol. i. E. T.

**TA'HAN** (תַּחַן) [*tent-place, encampment*]: Ταχάν, Θαάν: *Thehen, Thaan*). A descendant of Ephraim, but of what degree is uncertain (Num. xxvi. 35). In 1 Chr. vii. 25 he appears as the son of Telah.

**TA'HANITES, THE** (הַתַּחֲנִי [patr.]: ὁ Ταναχί [Vat. -χει]: *Thehenita*). The descendants of the preceding, a branch of the tribe of Ephraim (Num. xxvi. 35).

* **TAHAP'ANES.** [TAHPANHES.]

**TA'HATH** (תַּחַת) [*place, station*]: Θαάθ; Vat. in ver. 24, Καάθ:] *Thahath*). 1. A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 24, 37 [9, 22]).

2. (Θαάθ; [Vat. omits;] Alex. Θααθ.) According to the present text, son of Bered, and great-grandson of Ephraim (1 Chr. vii. 20). Burrington, however (*Geneal.* i. 273), identifies Tahath with Tahan, the son of Ephraim.

3. (Ἀαάθ; [Vat. Νααμ;] Alex. Νομεε.) Grandson of the preceding, as the text now stands (1 Chr. vii. 20). But Burrington considers him as a son of Ephraim (ii. tab. xix.). In this case Tahath was one of the sons of Ephraim who were slain by the men of Gath in a raid made upon their cattle.

**TA'HATH** (תַּחַת [*see below*]: Καταθί [*Thahath*]). The name of a desert-station of the Israelites between Makheloth and Tarah (Num. xxxiii. 26). The name, signifying "under" or "below," may relate to the level of the ground. The site has not been identified.

*Tachta*, from the same root, is the common word employed to designate the lower one of the double villages so common in Syria, the upper one being *foka*. Thus *Beitûr el-foka* is the upper Bethhoron, *Beitûr el-tachta* the lower one. H. H.

**TAH'PANHES, TEHAPH'NEHES, TAHAP'ANES** (תַּחְפַּנְחֵס, תְּחַפְנֵס, תַּחְפְּנֵס, the last form in text, but *Keri* has first [see below]: Τάφνας, Τάφναι: *Taphnis, Taphne*). A city of Egypt, of importance in the time of the prophets Jeremiah and Ezekiel. The name is evidently Egyptian, and closely resembles that of the Egyptian queen TAHPENES. The Coptic name of this place, ⲦⲀⲪⲚⲀⲤ, (Quatremère, *Mem. Géog. et Hist.* i. 297, 298), is evidently derived from the LXX. form: the Gr. and Lat. forms, Ἀάφνα, Hdt., Ἀάφνη, Steph. Byz., *Dafno*, Itin. Ant., are perhaps nearer to the Egyptian original (see Parthey, *Zur Erdkunde des Alten Ægyptens*, p. 528).

Tahpanhes was evidently a town of Lower Egypt near or on the eastern border. When Johanan and the other captains went into Egypt "they came to Tahpanhes" (Jer. xliii. 7). Here Jeremiah prophesied the conquest of the country by Nebuchadnezzar (8–13). Ezekiel foretells a battle to be there fought apparently by the king of Babylon just mentioned (xxx. 18). The Jews in Jeremiah's time remained here (Jer. xliv. 1). It was an important town, being twice mentioned by the latter prophet with Noph or Memphis (ii. 16, xlvi. 14), as well as in the passage last previously cited. Here stood a house of Pharaoh Hophra before which Jeremiah hid great stones, where the throne of Nebuchadnezzar would afterwards be set, and his pavilion spread (xliii. 8–10). It is mentioned with "Ramesse and all the land of Gesen" in Jud. i. 9. Herodotus calls this place Daphnæ of Pelusium (Ἀάφναι αἱ Πηλουσίαι), and relates that Psammetichus I. here had a garrison against the Arabians and Syrians, as at Elephantine against the Ethiopians, and at Marea against Libya, adding that in his own time the Persians had garrisons at Daphnæ and Elephantine (ii. 30). Daphnæ was therefore a very important post under the XXVIth dynasty. According to Stephanus it was near Pelusium (*s. v.*).

In the *Itinerary of Antoninus* this town, called *Dafno*, is placed 16 Roman miles to the southwest of Pelusium (ap. Parthey, Map vi., where observe that the name of Pelusium is omitted). This position seems to agree with that of *Tel-Defenneh*, which Sir Gardner Wilkinson supposes to mark the site of Daphnæ (*Modern Egypt and Thebes*, i. 447, 448). This identification favors the inland position of the site of Pelusium, if we may trust to the distance stated in the *Itinerary*. [SIN.] Sir G. Wilkinson (*l. c.*) thinks it was an outpost of Pelusium. It may be observed that the Camps, τὰ Στρατόπεδα, the fixed garrison of Ionians and Carians established by Psammetichus I., may possibly have been at Daphnæ. Can the name be of Greek origin? If the HANES mentioned by Isaiah (xxx. 4) be the same as Tahpanhes, as we have

Digitized by Google

suggested (*s. v.*), this conjecture must be dismissed. No satisfactory Egyptian etymology of this name has been suggested, Jablonski's ⲧⲁϩⲡⲉⲛⲏⲥ, "the head" or "beginning of the age" (*Opusc.* i. 343), being quite untenable, nor has any Egyptian name resembling it been discovered.[a] The name of Queen TAHPENES throws no light upon this matter. R. S. P.

**TAH'PENES** (תַּחְפְּנֵיס [see above]: Θεκεμίνα; [Vat. -μες-; Comp. Θεκεφένης:] *Taphnes*), a proper name of an Egyptian queen. She was wife of the Pharaoh who received Hadad the Edomite, and who gave him her sister in marriage (1 K. xi. 18–20). In the LXX. the latter is called the elder sister of Thekemina, and in the addition to ch. xii. Shishak (Susakim) is said to have given Ano, the elder sister of Thekemina his wife to Jeroboam. It is obvious that this and the earlier statement are irreconcilable, even if the evidence from the probable repetition of an elder sister be set aside, and it is scarcely necessary to add that the name of Shishak's chief or only wife, KARAÄMAT, does not support the LXX. addition. [SHISHAK.] There is therefore but one Tahpenes or Thekemina. At the time to which the narrative refers there were probably two, if not three, lines ruling in Egypt, the Tanites of the XXIst dynasty in the lower country, the high-priest kings at Thebes, but possibly they were of the same line, and perhaps one of the last *fainéants* of the Rameses family. To the Tanite line, as apparently then the most powerful, and as holding the territory nearest Palestine, the Pharaoh in question, as well as the father-in-law of Solomon, probably belonged. If Manetho's list be correct he may be conjectured to have been Psusennes. [PHARAOH.] No name that has any near resemblance to either Tahpenes or Thekemina has yet been found among those of the period (see Lepsius, *Königsbuch*). R. S. P.

**TAHRE'A** (תַּחְרֵעַ [*craft, cunning*]: Θαράχ; Alex. Θαρα; [Comp. Ald. Θαραδ:] *Tharaa*). Son of Micah, and grandson of Mephibosheth (1 Chr. ix. 41). In the parallel list of 1 Chr. viii. 35 his name appears as TAREA.

**TAHTIM HOD'SHI, THE LAND OF** אֶרֶץ תַּחְתִּים חָדְשִׁי [see below]: εἰς γὴν Θαβασὼν ἡ ἐστιν Ἀβασαί [Vat. Ναβ.]: Alex. γὴν εθαων αδασαι: *terra inferior Hodsi*). One of the places visited by Joab during his census of the land of Israel. It occurs between Gilead and Dan-jaan (2 Sam. xxiv. 6). The name has puzzled all the interpreters. The old versions throw no light upon it. Fürst (*Handwb.* i. 380) proposes to separate the "Land of the Tachtim" from "Hodshi," and so read the latter as Harshi — the people of Harosheth (comp. Judg. iv. 2). Thenius restores the text of the LXX. to read "the Land of Bashan, which is Edrei." This in itself is feasible, although it is certainly very difficult to connect it with the Hebrew. Ewald (*Gesch.* iii. 207) proposes to read Hermon for Hodshi; and Gesenius (*Thes.* p. 450 *a*) dismisses the passage with a *vix pro sano habendum*.

There is a district called the *Ard et-tahta*, to the E. N. E. of Damascus, which recalls the old name — but there is nothing to show that any Israelite was living so far from the Holy Land in the time of David. G.

**TALENT** (כִּכָּר : τάλαντον : *talentum*), the greatest weight of the Hebrews. Its Hebrew name properly signifies "a circle" or "globe," and was perhaps given to it on account of a form in which it was anciently made. The Assyrian name of the talent is *tikun* according to Dr. Hincks.

The subject of the Hebrew talent will be fully discussed in a later article [WEIGHTS].

R. S. P.

**TALITHA CU'MI** (ταλιθὰ κοῦμι : ܛܠܝܬܐ ܩܘܡܝ). Two Syriac words (Mark v. 41), signifying "Damsel, arise."

The word טְלִיתָא occurs in the Chaldee paraphrase of Prov. ix. 3, where it signifies a girl; and Lightfoot (*Hora Heb.* Mark v. 41) gives an instance of its use in the same sense by a Rabbinical writer. Gesenius (*Thesaurus*, p. 550) derives it from the Hebrew טָלֶה, a lamb. The word קוּמִי is both Hebrew and Syriac (2 p. fem. Imperative, Kal, and Peal), signifying stand, arise.

As might be expected, the last clause of this verse, after Cumi, is not found in the Syriac version.

Jerome (Ep. lvii. *ad Pammachium*, *Opp.* tom. i. p. 308, ed. Vallars.) records that St. Mark was blamed for a false translation on account of the insertion of the words, "I say unto thee;" but Jerome points to this as an instance of the superiority of a free over a literal translation, inasmuch as the words inserted serve to show the emphasis of our Lord's manner in giving this command on his own personal authority. W. T. B.

**TAL'MAI** [2 syl.] (תַּלְמַי [*furrowed*]: Θελαμί, Θολαμί, Θολμί; [Vat. Θελαμει, Θοαλμει, Θολμειν;] Alex. Θελαμειν, Θολμαι, Θαμει: *Tholmai*). 1. One of the three sons of "the Anak," who were driven out from their settlement in Kirjath-Arba, and slain by the men of Judah, under the command of Caleb (Num. xiii. 22; Josh xv. 14; Judg. i. 10).

2. (Θολμί [Vat. Θολμει, Θολμαιλημ] in 2 Sam., Θολμαΐ [Vat. Θοαμαι] in 1 Chr.; Alex. Θολμει, Θολομαϊ, Θολμαϊ: *Tholmai*, *Tholomai*.) Son of Ammihud, king of Geshur (2 Sam. iii. 3, xiii. 37; 1 Chr. iii. 2). His daughter Maachah was one of the wives of David and mother of Absalom. He was probably a petty chieftain dependent on David, and his wild retreat in Bashan afforded a shelter to his grandson after the assassination of Amnon.

**TAL'MON** (טַלְמוֹן [*oppressed*]: Τελμών, but Τελαιλν in Neh. xi. 19; [in 1 Chr., Vat. Ταμμαμ; in Neh. xi. 19, Vat. FA. Τελαμων; xii. 25, Rom. Vat. Alex. FA.[1] omit, FA.[2] Ταλμων;] Alex. Τελμαν, Τολμων, Τελαμειν : *Telmon*). The head of a family of doorkeepers in the Temple, "the porters for the camps of the sons of Levi" (1 Chr. ix. 17; Neh. xi. 19). Some of his descendants returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45), and were employed in their hereditary office in the days of Nehemiah and Ezra (Neh. xii. 25), for the proper names in this passage must be considered as the names of families.

[a] Dr. Brugsch, following Mr. Heath (*Exodus Papyri*, p. 174), identifies the fort TeBNeT with Tahpanhes; but this name does not seem to us sufficiently near either to the Hebrew or to the Greek (*Insc. Inschr.* i. 300, 301; Taf. lvi. no. 1726).

* **TAL'MUD.** [PHARISEES, iii. 2472 *f*, and note *b*; SCRIBES, p. 2867, and note *b*.]

**TAL'SAS** (Ταλδας; [Vat. Ταλθαε; Wechel Ταλσας:] *Thalsus*). ELASAH (1 Esdr. ix. 22)

**TA'MAH** (תֶּמַח [prob. *laughter*]: Θημά; [Vat.] FA. Ημαθ: *Thema*). The children of Tamah, or THAMAH (Ezr. ii. 53), were among the Nethinim who returned with Zerubbabel (Neh. vii. 55).

**TA'MAR** (תָּמָר = "palm-tree"). The name of three women remarkable in the history of Israel.

1. (Θάμαρ: *Thamar.*) The wife successively of the two sons of Judah, ER and ONAN (Gen. xxxviii. 6–30). Her importance in the sacred narrative depends on the great anxiety to keep up the lineage of Judah. It seemed as if the family were on the point of extinction. ER and ONAN had successively perished suddenly. Judah's wife Bathshuah died; and there only remained a child Shelah, whom Judah was unwilling to trust to the dangerous union, as it appeared, with Tamar, lest he should meet with the same fate as his brothers. That he should, however, marry her seems to have been regarded as part of the fixed law of the tribe, whence its incorporation into the Mosaic Law in after times (Deut. xxv. 5; Matt. xxii. 24); and, as such, Tamar was determined not to let the opportunity escape through Judah's parental anxiety. Accordingly she resorted to the desperate expedient of entrapping the father himself into the union which he feared for his son. He, on the first emergence from his mourning for his wife, went to one of the festivals often mentioned in Jewish history as attendant on sheep-shearing He wore on his finger the ring of his chieftainship; he carried his staff in his hand; he wore a collar or necklace round his neck. He was encountered by a veiled woman on the road leading to Timnath, the future birthplace of Samson, amongst the hills of Dan. He took her for one of the unfortunate women who were consecrated to the impure rites of the Canaanite worship. [SODOMITES.] He promised her, as the price of his intercourse, a kid from the flocks to which he was going, and left as his pledge his ornaments and his staff. The kid he sent back by his shepherd (LXX.), Hirah of Adullam. The woman could nowhere be found. Months afterwards it was discovered to be his own daughter-in-law Tamar who had thus concealed herself under the veil or mantle, which she cast off on her return home, where she resumed the seclusion and dress of a widow. She was sentenced to be burned alive, and was only saved by the discovery, through the pledges which Judah had left, that her seducer was no less than the chieftain of the tribe. He had the magnanimity to recognize that she had been driven into this crime by his own neglect of his promise to give her in marriage to his youngest son. "She hath been more righteous than I . . . . and he knew her again no more" (Gen. xxxviii. 26). The fruit of this intercourse were twins, PHAREZ and ZARAH, and through Pharez the sacred line was continued. Hence the prominence given to Tamar in the nuptial benediction of the tribe of Judah (Ruth iv. 12), and in the genealogy of our Lord (Matt. i. 3).

The story is important (1) as showing the significance, from early times, attached to the continuance of the line of Judah; (2) as a glimpse into the rough manners of the patriarchal time; (3) as the germ of a famous Mosaic law.

2. (Θημάρ; Alex. Θαμαρ [exc. 1 Chr. Θημαρ]; Joseph. Θαμάρα: *Thamar.*) Daughter of David and Maachah the Geshurite princess, and thus sister of Absalom (2 Sam. xiii. 1–32; 1 Chr. iii. 9. Joseph. *Ant.* vii. 8, § 1). She and her brother were alike remarkable for their extraordinary beauty. Her name ("Palm-tree") may have been given her on this account. This fatal beauty inspired a frantic passion in her half-brother Amnon, the eldest son of David by Ahinoam. He wasted away from the feeling that it was impossible to gratify his desire, "for she was a virgin" — the narrative leaves it uncertain whether from a scruple on his part, or from the seclusion in which in her unmarried state she was kept. Morning by morning, as he received the visits of his friend JONADAB, he is paler and thinner (Joseph. *Ant.* vii. 8, § 1). Jonadab discovers the cause, and suggests to him the means of accomplishing his wicked purpose. He was to feign sickness. The king, who appears to have entertained a considerable affection, almost awe, for him, as the eldest son (2 Sam. xiii. 5, 21: LXX.), came to visit him; and Amnon entreated the presence of Tamar, on the pretext that she alone could give him food that he would eat. What follows is curious, as showing the simplicity of the royal life. It would almost seem that Tamar was supposed to have a peculiar art of baking palatable cakes. She came to his house (for each prince appears to have had a separate establishment), took the dough and kneaded it, and then in his presence (for this was to be a part of his fancy, as though there were something exquisite in the manner of her performing the work) kneaded it a second time into the form of cakes. The name given to these cakes (*lebibah*), "heart cakes," has been variously explained: "hollow cakes" — "cakes with some stimulating spices" (like our word *cordial*) — cakes in the shape of a heart (like the Moravian *gerührte Herzen*, Thenius, *ad loc.*) — cakes "the delight of the heart." Whatever it be, it implies something special and peculiar. She then took the pan, in which they had been baked, and poured them all out in a heap before the prince. This operation seems to have gone on in an outer room, on which Amnon's bedchamber opened. He caused his attendants to retire — called her to the inner room and there accomplished his design. In her touching remonstrance two points are remarkable. First, the expression of the infamy of such a crime "in *Israel*," implying the loftier standard of morals that prevailed, as compared with other countries at that time; and, secondly, the belief that even this standard might be overborne lawfully by royal authority — "Speak to the king, for he will not withhold me from thee." This expression has led to much needless explanation, from its contradiction to Lev. xviii. 9, xx. 17; Deut. xxvii. 22: as, *e. g.*, that, her mother Maachah not being a Jewess, there was no proper legal relationship between her and Amnon; or that she was ignorant of the law; or that the Mosaic laws were not then in existence. (Thenius, *ad loc.*) It is enough to suppose, what evidently her whole speech implies, that the king had a dispensing power, which was conceived to cover even extreme cases.

The brutal hatred of Amnon succeeding to his brutal passion, and the indignation of Tamar at his barbarous insult, even surpassing her indignation at his shameful outrage, are pathetically and

Digitized by Google

graphically told, and in the narrative another glimpse is given us of the manners of the royal household. The unmarried princesses, it seems, were distinguished by robes or gowns with sleeves (so the LXX., Josephus, etc., take the word translated in the A. V. "divers colors"). Such was the dress worn by Tamar on the present occasion, and when the guard at Amnon's door had thrust her out and closed the door after her to prevent her return, she, in her agony, snatched handfuls of ashes from the ground and threw them on her hair, then tore off her royal sleeves, and clasped her bare hands upon her head, and rushed to and fro through the streets screaming aloud. In this state she encountered her brother Absalom, who took her to his house, where she remained as if in a state of widowhood. The king was afraid or unwilling to interfere with the heir to the throne, but she was avenged by Absalom, as Dinah had been by Simeon and Levi, and out of that vengeance grew the series of calamities which darkened the close of David's reign.

The story of Tamar, revolting as it is, has the interest of revealing to us the interior of the royal household beyond that of any other incident of those times. (1.) The establishments of the princes. (2.) The simplicity of the royal employments. (3.) The dress of the princesses. (4.) The relation of the king to the princes and to the law.

3. (Θημάρ; Alex. Θαμαρ: *Thamar*.) Daughter of Absalom, called probably after her beautiful aunt, and inheriting the beauty of both aunt and father (2 Sam. xiv. 27). She was the sole survivor of the house of Absalom; and ultimately, by her marriage with Uriah of Gibeah, became the mother of Maachah, the future queen of Judah, or wife of Abijah (1 K. xv. 2), Maachah being called after her great-grandmother, as Tamar after her aunt.

A. P. S.

**TA'MAR** (תָּמָר [*palm-tree*]: Θαμάρ[a] in both MSS.: *Thamar*). A spot on the south-eastern frontier of Judah, named in Ez. xlvii. 19, xlviii. 28 only, evidently called from a palm-tree. If not *Hazazon Tamar*, the old name of En-gedi, it may be a place called *Thamar* in the *Onomasticon* ("Hazazon Tamar"), a day's journey south of Hebron. The Peutinger Tables give Thamar in the same direction, and Robinson (*Bibl. Res.* ii. 198, 201) identifies the place with the ruins of an old fortress at *Kurnub*. De Saulcy (*Narr.* i. ch. 7) endeavors to establish a connection between Tamar and the *Kalaat embarrheg*, at the mouth of the ravine of that name on the S. W. side of the Dead Sea, on the ground (amongst others) that the names are similar. But this, to say the least, is more than doubtful.

A. P. S.

**TAM'MUZ** (תַּמּוּז [see below]: ὁ Θαμμούζ: *Adonis*). [Ez. viii. 14.] Properly "the Tammuz," the article indicating that at some time or other the word had been regarded as an appellative, though at the time of its occurrence and subsequently it may have been applied as a proper name. As it is found once only in the O. T., and then in a passage of extreme obscurity, it is not surprising that many conjectures have been formed concerning it; and as none of the opinions which have been expressed rise above the importance of conjecture, it will be the object of this article to set them forth as clearly as possible, and to give at least a history of what has been said upon the subject.

In the sixth year of the captivity of Jehoiachin, in the sixth month, and on the fifth day of the month, the prophet Ezekiel, as he sat in his house surrounded by the elders of Judah, was transported in spirit to the far distant Temple at Jerusalem. The hand of the Lord God was upon him, and led him "to the door of the gate of the house of Jehovah, which was towards the north; and behold there the women sitting, weeping for the Tammuz." Some translate the last clause "causing the Tammuz to weep," and the influence which this rendering has upon the interpretation will be seen hereafter. If תַּמּוּז be a regularly formed Hebrew word, it must be derived either from a root תָּמַז or תָּמָז (comp. the forms חַנּוּן, אֱלוֹהַּ), which is not known to exist. To remedy this defect Fürst (*Handwb.* s. v.) invents a root to which he gives the signification "to be strong, mighty, victorious," and transitively, "to overpower, annihilate." It is to be regretted that this lexicographer cannot be contented to confess his ignorance of what is unknown. Roediger (in Gesen. *Thes.* s. v.) suggests the derivation from a root, תָּמַם = מָזַז; according to which תַּמּוּז is a contraction of תַּמְזוּז, and signifies a melting away, dissolution, departure, and so the ἀφανισμὸς Ἀδώνιδος, or disappearance of Adonis, which was mourned by the Phœnician women, and after them by the Greeks. But the etymology is unsound, and is evidently contrived so as to connect the name Tammuz with the general tradition regarding it.

The ancient versions supply us with no help. The LXX., the Targum of Jonathan Ben Uzziel, the Peshito Syriac, and the Arabic in Walton's Polyglot, merely reproduce the Hebrew word. The Vulgate alone gives *Admis* as a modern equivalent, and this rendering has been eagerly adopted by subsequent commentators, with but few exceptions. It is at least as old, therefore, as Jerome, and the fact of his having adopted it shows that it must have embodied the most credible tradition. In his note upon the passage he adds that since, according to the Gentile fable, Adonis had been slain in the month of June, the Syrians give the name of Tammuz to this month, when they celebrate to him an anniversary solemnity, in which he is lamented by the women as dead, and afterwards coming to life again is celebrated with songs and praises. In another passage (*ad Paulinum*, Op. i. p. 102, ed. Basil. 1565) he laments that Bethlehem was overshadowed by a grove of Tammuz, that is, of Adonis, and that "in the cave where the infant Christ once cried, the lover of Venus was bewailed." Cyril of Alexandria (*in Oseam*, Op. iii. 79, ed. Paris, 1638), and Theodoret (*in Exech.*), give the same explanation, and are followed by the author of the Chronicon Paschale. The only exception to this uniformity is in the Syriac translation of Melito's Apology edited by Dr. Cureton in his *Spicilegium Syriacum*. The date of the translation is unknown; the original if genuine must belong to the second century. The following is a literal rendering of the Syriac: "The sons of Phœnicia worshipped Balthi, the queen of Cyprus. For she loved Tamuzo, the son of Cuthar the king of the Phœnicians, and forsook her king

[a] Ez. xlvii. 19 contains an instance of the double translation not infrequent in the present text of the LXX., viz. Θαμὰν καὶ Φουτιήνους.

Digitized by Google

Jom, and came and dwelt in Gebal, a fortress of the Phœnicians. And at that time she made all the villages [a] subject to Cuthar the king. For before Tamuzo she had loved Ares, and committed adultery with him, and Hephæstus her husband caught her, and was jealous of her. And he (*i. e.* Ares) came and slew Tamuzo on Lebanon while he made a hunting among the wild boars.[b] And from that time Balthi remained in Gebal, and died in the city of Aphaca, where Tamuzo was buried" (p. 25 of the Syriac text). We have here very clearly the Greek legend of Adonis reproduced with a simple change of name. Whether this change is due to the translator, as is not improbable, or whether he found "Tammuz" in the original of Melito, it is impossible to say. Be this as it may, the tradition embodied in the passage quoted is probably as valuable as that in the same author which regards Serapis as the deification of Joseph. The Syriac lexicographer Bar Bahlul (10th cent.) gives the legend as it had come down to his time. "Tomuzo was, as they say, a hunter shepherd and chaser of wild beasts; who when Belathi loved him took her away from her husband. And when her husband went forth to seek her Tomuzo slew him. And with regard to Tomuzo also, there met him in the desert a wild boar and slew him. And his father made for him a great lamentation and weeping in the month Tomuz: and Belathi his wife, she too made a lamentation and mourning over him. And this tradition was handed down among the heathen people during her lifetime and after her death, which same tradition the Jews received with the rest of the evil festivals of the people, and in that month Tomuz used to make for him a great feast. Tomuz also is the name of one of the months of the Syrians." [c] In the next century the legend assumes for the first time a different form in the hands of a Rabbinical commentator. Rabbi Solomon Isaaki (Rashi) has the following note on the passage in Ezekiel. "An image which the women made hot in the inside, and its eyes were of lead, and they melted by reason of the heat of the burning, and it seemed as if it wept; and they (the women) said, He asketh for offerings. Tammuz is a word signifying burning, as עַל יְדֵי חַזָּה לְמְזִיזָה (Dan. iii. 19), and אַתּוּנָא אַחְמֵי יַתִּירְדָה (*ibid.* ver. 22)." And instead of rendering "weeping for the Tammuz," he gives, what appears to be the equivalent in French, "faisantes pleurer l'échauffé." It is clear, therefore, that Rashi regards Tammuz as an appellative, derived from the Chaldee root אָחַם, *ḥâm*, "to make hot." It is equally clear that his etymology cannot be defended for an instant. In the 12th century (A. D. 1161), Solomon ben Abraham Parchon in his Lexicon, compiled at Salerno from the works of Jehuda Chayug and Abulwalid Merwan ben Gannach, has the following observations upon Tammuz. "It is the likeness of a reptile which they make upon the water, and the water is collected in it and flows through its holes, and it seems as if it wept. But the month called Tammuz is Persian, and so are all our months; none of them is from the sacred tongue, though they are written in the Scripture they are Persian; but in the sacred tongue the first month, the second month," etc. At the close of this century we meet for the first time with an entirely new tradition repeated by R. David Kimchi, both in his Lexicon and in his Commentary, from the *Morch Nébuchim* of Maimonides. "In the month Tammuz they made a feast of an idol, and the women came to gladden him; and some say that by crafty means they caused the water to come into the eyes of the idol which is called Tammuz, and it wept, as if it asked them to worship it. And some interpret Tammuz 'the burnt one,' as if from Dan. iii. 19 (see above), *i. e.* they wept over him because he was burnt; for they used to burn their sons and their daughters in the fire, and the women used to weep over them. . . . But the Rab, the wise, the great, our Rabbi Moshe bar Maimon, of blessed memory, has written, that it is found written in one of the ancient idolatrous books, that there was a man of the idolatrous prophets, and his name was Tammuz. And he called to a certain king and commanded him to serve the seven planets and the twelve signs. And that king put him to a violent death, and on the night of his death there were gathered together all the images from the ends of the earth to the temple of Babel, to the golden image which was the image of the sun. Now this image was suspended between heaven and earth, and it fell down in the midst of the temple, and the images likewise (fell down) round about it, and it told them what had befallen Tammuz the prophet. And the images all of them wept and lamented all the night; and, as it came to pass, in the morning all the images flew away to their own temples in the ends of the earth. And this was to them for an everlasting statute; at the beginning of the first day of the month Tammuz each year they lamented and wept over Tammuz. And some interpret Tammuz as the name of an animal, for they used to worship an image which they had, and the Targum of (the passage) וּפְנַשׁוּ וְיַעֲרְרוּן צִיִּים אֶת אִיִּים (Is. xxxiv. 14) is תְּמוּזִין בְּהַרְהוֹלִין. But in most copies תְּמוּזִין is written with two vaws." The book of the ancient idolaters from which Maimonides quotes, is the now celebrated work on the Agriculture of the Nabatheans, to which reference will be made hereafter. Ben Melech gives no help, and Abendana merely quotes the explanations given by Rashi and Kimchi.

The tradition recorded by Jerome, which identifies Tammuz with Adonis, has been followed by most subsequent commentators: among others by Vatablus, Castellio, Cornelius a Lapide, Osiander, Caspar Sanctius, Lavater, Villalpandus, Selden, Simonis, Calmet, and in later times by J. D. Michaelis, Gesenius, Ben Zeb, Rosenmüller, Maurer, Ewald, Hävernick, Hitzig, and Movers. Luther and others regarded Tammuz as a name of Bacchus. That Tammuz was the Egyptian Osiris, and that his worship was introduced to Jerusalem from Egypt, was held by Calvin, Piscator, Junius, Leusden, and Pfeiffer. This view depends chiefly upon a false etymology proposed by Kircher, which

[a] Not "Cyprians," as Dr. Cureton translates.

[b] Dr. Cureton's emendation of this corrupt passage seems the only one which can be adopted.

[c] In this translation I have followed the MS. of Bar Bahlul in the Cambridge University Library, the readings of which seem preferable in many respects to those in the extract furnished by Bernstein to Chwolsohn (*Die Ssabier*, etc. ii. 206).

connects the word Tammuz with the Coptic *tamut*, to hide, and so makes it signify the hidden or concealed one; and therefore Osiris, the Egyptian king slain by Typho, whose loss was commanded by Isis to be yearly lamented in Egypt. The women weeping for Tammuz are in this case, according to Junius, the priestesses of Isis. The Egyptian origin of the name Tammuz has also been defended by a reference to the god Amuz, mentioned by Plutarch and Herodotus, who is identical with Osiris. There is good reason, however, to believe that Amuz is a mistake for Amun. That something corresponding to Tammuz is found in Egyptian proper names, as they appear in Greek, cannot be denied. Ταμώς, an Egyptian, appears in Thucydides (viii. 31) as a Persian officer, in Xenophon (*Anab.* i. 4, § 2) as an admiral. The Egyptian pilot who heard the mysterious voice bidding him proclaim, "Great Pan is dead," was called Θαμούς (Plutarch, *De Defect. Orac.* 17). The names of the Egyptian kings, Θούμμωσις, Τέθμωσις, and Θμῶσις, mentioned by Manetho (Jos. *c. Ap.* i. 14, 15), have in turn been compared with Tammuz; but unless some more certain evidence be brought forward than is found in these apparent resemblances, there is little reason to conclude that the worship of Tammuz was of Egyptian origin.

It seems perfectly clear, from what has been said, that the name Tammuz affords no clew to the identification of the deity whom it designated. The slight hint given by the prophet of the nature of the worship and worshippers of Tammuz has been sufficient to connect them with the yearly mourning for Adonis by the Syrian damsels. Beyond this we can attach no especial weight to the explanation of Jerome. It is a conjecture and nothing more, and does not appear to represent any tradition. All that can be said therefore is that it is not impossible that Tammuz may be a name of Adonis the sun-god, but that there is nothing to prove it. The town of Byblos in Phœnicia was the headquarters of the Adonis-worship [a] The feast in his honor was celebrated each year in the temple of Aphrodite on the Lebanon [b] (Lucian, *De Dea Syrâ*, § 6), with rites partly sorrowful, partly joyful. The Emperor Julian was present at Antioch when the same festival was held (Amm. Marc. xxii. 9, § 13). It lasted seven days (Amm. Marc. xx. 1), the period of mourning among the Jews (Ecclus. xxii. 12; Gen. l. 10; 1 Sam. xxxi. 13; Jud. xvi. 24), the Egyptians (Heliodor. *Æth.* vii. 11), and the Syrians (Lucian, *De Dea Syrâ*, § 52), and began with the disappearance (ἀφανισμός) of Adonis. Then followed the search (ζήτησις) made by the women after him. His body was represented by a wooden image placed in the so-called "gardens of Adonis" ('Αδώνιδος κῆποι), which were earthenware vessels filled with mould, and planted with wheat, barley, lettuce, and fennel. They were exposed by the women to the heat of the sun, at the house-doors or in the "porches of Adonis;" and the withering of the plants was regarded as symbolical of the slaughter of the youth by the fire-god Mars. In one of these gardens Adonis was found again, whence the fable says he was slain by the boar in the lettuce (ἀφάκη = Aphaca?), and was there found by Aphrodite. The finding again (εὕ-

[a] There was a temple at Amathus, in Cyprus, shared by Adonis and Aphrodite (Paus ix. 41, § 2); and the worship of Adonis is said to have come from Cyprus to Athens in the time of the Persian War.

ρεσις) was the commencement of a wake, accompanied by all the usages which in the East attend such a ceremony — prostitution, cutting off the hair (comp. Lev. xix. 28, 29, xxi. 5; Deut. xiv. 1), cutting the breast with knives (Jer. xvi. 6), and playing on pipes (comp. Matt. ix. 23). The image of Adonis was then washed and anointed with spices, placed in a coffin on a bier, and the wound made by the boar was shown on the figure. The people sat on the ground round the bier, with their clothes rent (comp. *Ep. of Jer.* 31, 32 [or Bar. vi. 31, 32]), and the women howled and cried aloud. The whole terminated with a sacrifice for the dead, and the burial of the figure of Adonis (see Movers, *Phönizier*, i. c. 7). According to Lucian, some of the inhabitants of Byblos maintained that the Egyptian Osiris was buried among them, and that the mourning and orgies were in honor of him, and not of Adonis (*De Deâ Syrâ*, § 7). This is in accordance with the legend of Osiris as told by Plutarch (*De Is. et Os.*). Lucian further relates that, on the same day on which the women of Byblos every year mourned for Adonis, the inhabitants of Alexandria sent them a letter, inclosed in a vessel which was wrapped in rushes or papyrus, announcing that Adonis was found. The vessel was cast into the sea, and carried by the current to Byblos (Procopius on Is. xviii.). It is called by Lucian βυβλίνην κεφαλήν, and is said to have traversed the distance between Alexandria and Byblos in seven days. Another marvel related by the same narrator is that of the river Adonis (*Nahr Ibrahim*), which flows down from the Lebanon, and once a year was tinged with blood, which, according to the legend, came from the wounds of Adonis (comp. Milton, *P. L.* i. 460); but a rationalist of Byblos gave him a different explanation, how that the soil of the Lebanon was naturally very red-colored, and was carried down into the river by violent winds, and so gave a bloody tinge to the water; and to this day, says Mr. Porter (*Handb.* p. 187), "after every storm that breaks upon the brow of Lebanon, the Adonis still 'runs purple to the sea.' The rushing waters tear from the banks red soil enough to give them a ruddy tinge, which poetical fancy, aided by popular credulity, converted into the blood of Thammuz."

The time at which these rites of Adonis were celebrated is a subject of much dispute. It is not so important with regard to the passage in Ezekiel for there does not appear to be any reason for supposing that the time of the prophet's vision was coincident with the time at which Tammuz was worshipped. Movers, who maintained the contrary, endeavored to prove that the celebration was in the late autumn, the end of the Syrian year, and corresponded with the time of the autumnal equinox. He relies chiefly for his conclusion on the account given by Ammianus Marcellinus (xxii. 9, § 13) of the feast of Adonis, which was being held at Antioch when the Emperor Julian entered the city. It is clear, from a letter of the emperor's (*Ep. Jul.* 52), that he was in Antioch before the first of August, and his entry may therefore have taken place in July, the Tammuz of the Syrian year. This time agrees moreover with the explanation of the symbolical meaning of the rites given by Ammianus Marcellinus (xxii. 9, § 15), that they were a token of the fruits cut down in their prime. Now

[b] Said to have been founded by Kinyras, the reputed father of Adonis.

at Aleppo (Russell, *Aleppo*, i. 72 the harvest is all over before the end of June, and we may fairly conclude that the same was the case at Antioch. Add to this that in Hebrew astronomical works תְּקוּפַת תַּמּוּז, *tĕkûphath Tammûz*, is the "summer solstice," and it seems more reasonable to conclude that the Adonis feast of the Phœnicians and Syrians was celebrated rather as the summer solstice than as the autumnal equinox. At this time the sun begins to descend among the wintry signs (Kenrick, *Phœnicia*, p. 310).

The identification of Tammuz with an idolatrous prophet, which has already been given in a quotation from Maimonides, who himself quotes from the *Agriculture of the Nabathæans*, has been recently revived by Professor Chwolsohn of St. Petersburg (*Ueber Tammuz*, etc. 1860). An Arab writer of the 10th century, En-Nedîm, in his book called *Fihrist el-'Ulûm*, says (quoting from Abû Sa'îd Wahb ben Ibrahîm) that in the middle of the month Tammuz a feast is held in honor of the god Tâ'ûz. The women bewailed him because his lord slew him and ground his bones in a mill, and scattered them to the winds. In consequence of this the women ate nothing during the feast that had been ground in a mill (Chwolsohn, *Die Ssabier*, etc. ii. 27). Professor Chwolsohn regards Tâ-'ûz as a corruption of Tammuz; but the most important passage in his eyes is from the old Babylonian book called the *Agriculture of the Nabathæans*, to which he attributes a fabulous antiquity. It was written, he maintains, by one Qût'âmî, towards the end of the 14th century B. C., and was translated into Arabic by a descendant of the ancient Chaldæans, whose name was Ibn Washiyyah. As Professor Chwolsohn's theory has been strongly attacked, and as the chief materials upon which it is founded are not yet before the public, it would be equally premature to take him as an authority, or to pronounce positively against his hypothesis, though, judging from present evidence, the writer of this article is more than skeptical as to its truth. Qût'âmî then, in that dim antiquity from which he speaks to us, tells the same story of the prophet Tammuz as has already been given in the quotation from Kimchi. It was read in the temples after prayers, to an audience who wept and wailed; and so great was the magic influence of the tale that Qût'âmî himself, though incredulous of its truth, was unable to restrain his tears. A part, he thought, might be true, but it referred to an event so far removed by time from the age in which he lived that he was compelled to be skeptical on many points. His translator, Ibn Washiyyah, adds that Tammuz belonged neither to the Chaldæans nor to the Canaanites, nor to the Hebrews, nor to the Assyrians, but to the ancient people of Janbân. This last, Chwolsohn conjectures, may be the Shemitic name given to the gigantic Cushite aborigines of Chaldæa, whom the Shemitic Nabathæans found when they first came into the country, and from whom they adopted certain elements of their worship. Thus Tammûz, or Tammûzi, belongs to a religious epoch in Babylonia which preceded the Shemitic (Chwolsohn, *Ueberreste d. Altbabyl. Lit.* p. 19). Ibn Washiyyah says moreover that all the Sabians of his time, both those of Babylonia and of Harran wept and wailed for Tammuz in the month which was named after him, but that none of them preserved any tradition of the origin of the worship. This fact alone appears to militate strongly against the truth of Ibn Washiyyah's story as to the manner in which he discovered the works he professed to translate. It has been due to Professor Chwolsohn's reputation to give in brief the substance of his explanation of Tammuz; but it must be confessed that he throws little light upon the obscurity of the subject.

In the Targum of Jonathan on Gen. viii. 5, "the tenth month" is translated "the month Tammuz." According to Castell (*Lex. Hept.*), *tamûz* is used in Arabic to denote "the heat of summer;" and *Tamûzi* is the name given to the Pharaoh who cruelly treated the Israelites.

W. A. W.

**TA'NACH** (תַּעְנָךְ [perh. *castle*, Distr.]: Ταανάχ; Alex. η Θααναχ: *Thanach*). A slight variation, in the vowel-points alone, of the name TAANACH. It occurs in Josh. xxi. 25 only. G.

**TANHU'METH** (תַּנְחֻמֶת [*comfort*]: Θαναμάθ, Θαναεμέθ; [Vat. Θανεμαθ, Θαναεμαθ;] Alex. Θανεμαν in 2 K.: *Thanehumeth*). The father of Seraiah in the time of Gedaliah (2 K. xxv. 23; Jer. xl. 8). In the former passage he is called "the Netophathite," but a reference to the parallel narrative of Jeremiah will show that some words have dropped out of the text.

**TA'NIS** (Τάνις), Jud. i. 10. [ZOAN.]

* **TANNER.** This was Simon's occupation with whom Peter lodged at Joppa at the time of his vision on the house-top, and of the arrival of the messengers from Cornelius (Acts x. 5). He is termed βυρσεύς, for which the more descriptive equivalent is βυρσοδέψης (from βύρσα, *a skin*, and δέψω, *to soften, make supple*): while σκυτοδέψης (from σκῦτος, *a dressed hide*) designates the operation with reference to its result or product. Among the Jews, as well as the Greeks and Romans, the tanning process included the removal of the hair of the skins, and also the making of the skins smooth and soft. (For the manipulations of the art and the depilatory astringents used, see especially Walch's *Dissertationes in Acta Apostolorum*, ii. 91–128.) Skins tanned and dyed were used for covering the Tabernacle (Ex. xxv. 5, xxvi. 14). [BADGER.] The occupation of the tanner was in ill-repute among all the ancient nations, especially the Jews. The Jews considered the entering into this business and concealing the fact before marriage, or the entering into it after marriage, a sufficient cause for divorce. It was also one of the few interdicted trades from which they held that no one could be taken for the office of high-priest or king. For other reasons as well as the disrepute of the business, tanners were required to live, or at least to carry on their work, outside of the cities. The Greeks and Romans made it a law that they should remove their houses and workshops out of the towns, and establish themselves near streams or other bodies of water. "Apud veteres coriarii plerumque extra urbes, prope flumina, officinas et domos suas habuerant, non solum ob mortua animalia, quorum usum ipsa eorum opificii ratio efflagitabat; sed etiam ob fœtidos in eorum officinis et sedibus odores et sordes; tum vero, quod aqua hi, coria præparantes, nullo fere pacto carere poterant" (Walch). Yet such restrictions, from the nature of the case, would be more or less severe in different places, and in the same place be enforced or relaxed very much as a variable public feeling might dictate. Generally in the East at present

Digitized by Google

"such establishments are removed to a distance beyond the walls, because they are offensive as well as prejudicial to health" (Thomson, *Land and Book*, ii. 281). Yet even at Jerusalem a tannery is tolerated, near the Church of the Holy Sepulchre, a nuisance and offense to all the neighborhood (Tobler, *Denkwürdigkeiten des Jerus.* p. 242). Peter in being the guest of Simon may have been less scrupulous than most of the Jews. According to the Talmud the house of a tanner was considered like that of a heathen. It has been suggested that as both the host and the guest bore the name of Simon they may have been related to each other, and that Peter acted the more freely on that account. It certainly was not this relationship that brought Peter to Joppa from Lydda, but information of the death of Dorcas (Acts ix. 38). The two places (now *Jaffa* and *Lûd*) are within sight of each other.

The house of Simon was "by the sea-side" (Acts x. 6), and though Peter is said to have dwelt with him "in Joppa" (Acts ix. 43), we may understand this expression of the suburbs as well as of the town itself. Stanley seriously thinks that the house at *Jaffa* now shown as Simon's may occupy the original site. It is "close on the sea-shore; the waves beat against the low wall. In the courtyard is a spring of fresh water, such as must always have been needed for the purposes of tanning. . . . There is a tradition which describes the premises to have been long employed as a tannery" (*Sin. and Pal.* p. 269). Sepp suggests with more probability that it may have been further out of the town, though at no very great distance from it, near the mouth of a brook where there are now four tanneries still in operation (*Jerus. u. das heil. Land*, i. 11). H.

**TA'PHATH** (טָפַת [*drop, ornament*]: Τεφάθ; Alex. Ταφατα: *Tapheth*). The daughter of Solomon, who was married to Ben-Abinadab, one of the king's twelve commissariat officers (1 K. iv. 11).

* **TAPH'NES** (Ταφνάς), Jud. i. 9. [TAHPANHES.] H.

**TA'PHON** (ἡ Τεφών; Joseph. Τοχόα or Τοχόανα: *Thopo*; Syr. *Tefoa*). One of the cities in Judæa fortified by Bacchides (1 Macc. ix. 50). It is probably the BETH-TAPPUAH of the Old Test. which lay near Hebron. The form given by Josephus suggests *Tekoa*, but Grimm (*Exeg. Handbuch*) has pointed out that his equivalent for that name is Θεκωε; and there is besides too much unanimity among the Versions to allow of its being accepted. G.

**TAPPU'AH** (הַתַּפּוּחַ [*apple, apple-tree*]: [In Josh. xii. 17, Ταφούτ, Alex. Θαφφου; in xv. 34,] LXX. omits in both MSS. [but Comp. Ald. Ταφφουα:] *Taphhua*). 1. A city of Judah, in the district of the *Shefelah*, or lowland (Josh. xv. 34). It is a member of the group which contains Zoreah, Zanoah, and Jarmuth; and was therefore no doubt situated on the lower slopes of the mountains of the N. W. portion of Judah, about 12 miles W. of Jerusalem, where these places have all been identified with tolerable probability. It is remarkable that the name should be omitted in both MSS. of the LXX. The Syriac Peshito has Pathuch, which, when connected with the Enam that follows it in the list, recalls the *Pathuch-enayim* of Gen. xxxviii. 14, long a vexed place with the commentators. [See ENAM, i. 732.] Neither Tappuah nor Pathuch have however been encountered. This Tappuah must not be confounded either with the Beth-Tappuah near Hebron, or with the Land of Tappuah in the territory of Ephraim. It is uncertain which of the three is named in the list of the thirty-one kings in Josh. xii.

2. (Τάφου, Θαφέθ; Alex. Εφφουε, Θαφθωθ; [Comp. Θαπφουέ:] *Taphua*.) A place on the boundary of the "children of Joseph" (Josh. xvi. 8, xvii. 8). Its full name was probably En-tappuah (xvii. 7), and it had attached to it a district called the Land of Tappuah (xvii. 8). This document is evidently in so imperfect or confused a state that it is impossible to ascertain from it the situation of the places it names, especially as comparatively few of them have been yet met with on the ground. But from the apparent connection between Tappuah and the Nachal Kanah, it seems natural to look for the former somewhere to the S. W. of *Nâblus*, in the neighborhood of the *Wady Falnik*, the most likely claimant for the Kanah. We must await further investigation in this hitherto unexplored region before attempting to form any conclusion. G.

**TAPPU'AH** (הַתַּפּוּחַ [*apple*]: [Rom. Θαπφούς; Vat.] Θαπους; Alex. Θαφφου; [Comp. Θαφουέ:] *Taphua*). One of the sons of Hebron, of the tribe of Judah (1 Chr. ii. 43). It is doubtless the same as BETH-TAPPUAH, now *Teffuh*, near Hebron; and the meaning of the record is that Tappuah was colonized by the men of Hebron. G.

**TAPPU'AH, THE LAND OF** (אֶרֶץ הַתַּפּוּחַ [*land of the apple*]: Vat. omits; [so also Rom. Alex.:] *terra Taphua*). A district named in the specification of the boundary between Ephraim and Manasseh (Josh. xvii. 8). It apparently lay near the torrent Kanah (probably the *Wady Falnik*), but the name has not yet been met with at all in the central district of Palestine. G.

**TA'RAH** (תָּרַח [*turning* or *wandering*]: Ταράθ; [Alex. Θαραθ: *Thare*,] Num. xxxiii. 27). A desert-station of the Israelites between Tahath and Mithcah, not yet identified with any known site. H. H.

**TAR'ALAH** (תַּרְאֲלָה [*reeling, drunkenness*, Ges., Fürst]: Θαρηλά; Alex. Θαραλα: *Tharela*). One of the towns in the allotment of Benjamin (Josh. xviii. 27, only). It is named between Irpeel and Zelah; but nothing certain is known of the position of either of those places, and no name at all resembling Taralah has yet been discovered. Schwarz's identification (with "Thaniel" *Daniyel*), near Lydd, is far-fetched in etymology, and unsuitable as to position; for there is nothing to lead to the conclusion that the Benjamites had extended themselves so far to the west when the lists of Joshua were drawn up. G.

**TARE'A** (תָּרֵעַ [*flight*, Fürst]: Θαρέχ, [Vat. Θερες;] Alex. Θαρεε: *Tharaa*). The same

[a] It is probable that the ν is the sign of the accusative case. Jericho, Emmaus, and Bethel, in the same paragraph, are certainly in the accusative.

[b] The principal valley of the town of Hebron is called *Wady Tuffûh* (Map to Rosen's paper in *Zeitsch. D. M. G.* xii. and p. 481).

as Tahrea. the son of Micah (1 Chr. viii. 35), the Hebrew letters ר and ת being interchanged, a phenomenon of rare occurrence (Gesen. *Thes.* p. 2).

TARES (ζιζάνια: *zizania*). There can be little doubt that the ζιζάνια of the parable (Matt. xiii. 25) denote the weed called "darnel" (*Lolium temulentum*), a widely distributed grass, and the only species of the order that has deleterious properties. The word used by the Evangelist is an Oriental, and not a Greek term. It is the Arabic زوان (*zuwân*), and the *zônin* (זוֹנִין) of the Talmud (Buxtorf, *Lex. Talm.* s. v.). The derivation of the Arabic word, from *zân* (زان), "nausea," is well suited to the character of the plant, the grains of which produce vomiting and purging, convulsions, and even death. Volney (*Trav.* ii. 306) experienced the ill effects of eating its seeds; and the "whole of the inmates of the Sheffield workhouse were attacked some years ago with symptoms supposed to be produced by their oatmeal having been accidentally adulterated with *lolium*" (*Engl. Cyc.* s. v. *Lolium*).[a] The darnel before it comes into ear is very similar in appearance to wheat; hence the command that the *zizania* should be left to the harvest, lest while men plucked up the tares "they should root up also the wheat with them." Prof. Stanley, however (*S. & P.* p. 426), speaks of women and children picking out from the wheat in the cornfields of Samaria the tall green stalks, still called by the Arabs *zuwân*. "These stalks," he continues, "if sown designedly throughout the fields, would be inseparable from the wheat, from which, even when growing naturally and by chance, they are at first sight hardly distinguishable." See also Thomson (*Land and Book*, p. 420): "The grain is just in the proper stage to illustrate the parable. In those parts where the grain has *headed out*, the tares have done the same, and then a child cannot mistake them for wheat or barley; but where both are less developed, the closest scrutiny will often fail to detect them. Even the farmers, who in this country generally *weed* their fields, do not attempt to separate the one from the other." The grain-growers in Palestine believe that the *zuwân* is merely a degenerate wheat: that in wet seasons the wheat turns to tares. Dr. Thomson asserts that this is their fixed opinion. It is curious to observe the retention of the fallacy through many ages. "Wheat and *zunin*," says Lightfoot (*Hor. Heb.* on Matt. xiii. 25), quoting from the Talmud, "are not seeds of different kinds." See also Buxtorf (*Lex. Talm.* s. v. זוֹנִין): "Zizania, species tritici degeneris, sic dicti, quod scortando cum bono tritico, in pejorem naturam degenerat." The Roman writers appear to have entertained a similar opinion with respect to some of the cereals: thus Pliny (*H. N.* xviii. 17), borrowing probably from Theophrastus, asserts that "barley will degenerate into the oat." The notion that the *zizania* of the parable are merely diseased or degenerate wheat has been defended by P. Brederod (see his letter to Schultetus in *Exercit. Evang.* ii. cap. 65), and strangely adopted by Trench, who (*Notes on the Parables*, p. 91, 4th ed.) regards the distinction of these two plants to be "a falsely assumed fact." If the *zizania* of the parable denote the *Lolium temulentum*, and there cannot be any reasonable doubt about it, the plants are certainly distinct, and the *L. temulentum* has as much right to specific distinction as any other kind of grass.

TARGUMS. [VERSIONS, CHALDEE.]

TARPELITES, THE (טַרְפְּלָיֵא: Ταρφαλαῖοι; Alex. Ταρφαλλαῖοι: *Tharphalæi*). A race of colonists who were planted in the cities of Samaria after the captivity of the northern kingdom of Israel (Ezr. iv. 9). They have not been identified with any certainty. Junius and others have found a kind of resemblance in name to the Tarpelites in the Tapyri (Ταπουροί) of Ptolemy (vi. 2, § 6), a tribe of Media who dwelt eastward of Elymais, but the resemblance is scarcely more than apparent. They are called by Strabo Τάπυροι (xi. 514, 515, 520, 523). Others, with as little probability, have sought to recognize the Tarpelites in the Tarpetes (Ταρπῆτες, Strab. xi. 495), a Mæotic race. In the Peshito-Syriac the resemblance is greater, for they are there called *Tarpóyé*. Fürst (*Handwb.*) says in no case can *Tarpel*, the country of the Tarpelites, be the Phœnician *Tripolis*.

**TAR'SHISH** (תַּרְשִׁישׁ [prob. *fortress*, Dietr.]: [generally] Θάρσεις [or Θαρσεις; in Is. xxiii. Καρχηδών; in Ez. Καρχηδόνιοι, ex. Alex. in Ez. xxxviii. 13, χαλκηδόνων; LXX. in Is. ii. 16, θάλασσα:] *Tharsis*, [in Is. xxiii., lx., lxvi., and Ez. xxvii. 25, xxxviii. 13, *mare*; in Ez. xxvii. 12, *Carthaginenses*,] Gen. x. 4). 1. Probably Tartessus; Gr. Ταρτησσός. A city and emporium of the Phœnicians in the south of Spain. In psalm lxxii. 10, it seems applied to a large district of country; perhaps, to that portion of Spain which was known to the Hebrews when that psalm was written. And the word may have been likewise used in this sense in Gen. x. 4, where Knobel (*Völkertafel der Genesis*, Giessen, 1850, *ad loc.*) applies it to the Tuscans, though he agrees with nearly all Biblical critics in regarding it elsewhere as synonymous with Tartessus. The etymology is uncertain.

With three exceptions in the book of Chronicles, which will be noticed separately (see below, No. 2), the following are references to all the passages in the Old Testament, in which the word "Tarshish" occurs; commencing with the passage in the book of Jonah, which shows that it was accessible from Yaphô, Yafa, or Joppa, a city of Palestine with a well-known harbor on the Mediterranean Sea (Jon. i. 3, iv. 2; Gen. x. 4; 1 Chr. i. 7; Is. ii. 16, xxiii. 1, 6, 10, 14, lx. 9, lxvi. 19; Jer. x. 9; Ez. xxvii. 12, 25, xxxviii. 13; 1 K. x. 22, xxii. 48 [49]; [in 1 K., A. V. THARSHISH;] Ps. xlviii. 7, lxxii. 10). On a review of these passages, it will be seen that not one of them furnishes direct proof that Tarshish and Tartessus were the same cities. But their identity is rendered highly probable by the following circumstances. 1st, There is a very close similarity of name between them, Tartessus being merely Tarshish in the Aramaic form, as was first pointed out by Bochart (*Phaleg*, lib. iii. cap. 7). Thus the Hebrew word *Ashshûr* = Assyria, is in the Aramaic form *Athûr*, *Attûr*, and in Greek Ἀτουρία (Strabo, xvi. 1, 2), and Ἀτυρία (Dion Cass. lxviii. 26) — though, as is well known, the ordinary Greek form was Ἀσσυρία. Again, the Hebrew word *Bashan*, translated in the same form in the A. V. of the Old Testament, is *Bathan* or *Buthnan* in Aramaic, and Βαταναία in Greek; whence also Batanea in Latin (see Buxtorfii *Lexicon Chaldaicum Talmudicum et Rabbinicum*, s. vv.). Moreover, there are numerous changes of the same kind in common words; such as the Aramaic numeral 8, *tamnei*, which corresponds with the Hebrew word *shemoneh*; and *telag*, the Aramaic word for "snow," which is the same word as the Hebrew *sheleg* (see Gesenius, *Thesaurus*, p. 1344). And it is likely that in some way which cannot now be explained, the Greeks received the word "Tarshish" from the Phœnicians in a partly Aramaic form, just as they received in that form many Hebrew letters of the alphabet. The last *sh* of Tarshish [a] would naturally be represented by the double *s* in the Greek ending, as the sound and letter *sh* was unknown to the Greek language. [SHIBBOLETH.] 2dly, There seems to have been a special relation between Tarshish and Tyre, as there was at one time between Tartessus and the Phœnicians. In the 23d chapter of Isaiah, there is something like an appeal to Tarshish to assert its independence (see the notes of Rosenmüller, Gesenius, and Ewald, on verse 18). And Arrian (*De Exped. Alexandri*, ii. 16, § 3) expressly states that Tartessus was founded or colonized by the Phœnicians, saying, Φοινίκων κτίσμα ἡ Ταρτησσός. It has been suggested that this is a mistake on the part of Arrian, because Diodorus (xxvi. 14) represents Hamilcar as defeating the Iberians and *Tartessians*, which has been thought to imply that the latter were not Phœnicians. But it is to be remembered that there was a river in Hispania Bætica called Tartessus, as well as a city of that name (Strabo, iii. 148), and it may easily have been the case that tribes which dwelt on its banks may have been called Tartessians, and may have been mentioned under this name, as defeated by Hamilcar. Still, this would be perfectly compatible with the fact, that the Phœnicians established there a factory or settlement called Tartessus, which had dominion for a while over the adjacent territory. It is to be borne in mind, likewise, that Arrian, who must be pronounced on the whole to be a judicious writer, had access to the writings of Menander of Ephesus, who translated some of the Tyrian archives into Greek (Joseph. *Ant.* ix. 14, § 2), and it may be presumed Arrian consulted those writings when he undertook to give some account of Tyre, in reference to its celebrated siege by Alexander, in connection with which he makes his statement respecting Tartessus.

3dly. The articles which Tarshish is stated by the prophet Ezekiel to have supplied to Tyre are precisely such as we know through classical writers to have been productions of the Spanish Peninsula. Ezekiel specifies silver, iron, lead, and tin (Ez. xxvii. 12), and in regard to each of these metals as connected with Spain, there are the following authorities. As to silver, Diodorus, who (v. 35) speaks of Spain as possessing this metal in the greatest abundance and of the greatest beauty (σχεδόν τι πλεῖστον καὶ κάλλιστον), and particularly mentions that the Phœnicians made a great profit by this metal, and established colonies in Spain on its account, at a time when the mode of working it was unknown to the natives (comp. Aristot. *de Mirabil.* c. 135, 87). This is confirmed by Pliny, who says (*Hist. Nat.* xxxiii. 31), "Argentum reperitur — in Hispaniâ pulcherrimum; id quoque in sterili solo, atque etiam montibus;" and he proceeds to say that wherever one vein has been found, another vein is found not far off. With regard to iron and lead, Pliny says, "metallis *plumbi*, *ferri*, æris, argenti, auri tota ferme Hispania scatet" (*Hist. Nat.* iii. 4). And as to lead, more especially, this is so true even at present, that a writer on Mines and Mining in the last edition of the *Encyc. Britannica*, p. 242, states as follows: "Spain possesses numerous and valuable lead mines. The most important are those of Linares, which are situated to the east of Bailen near the Sierra Morena. They have been long celebrated, and perhaps no known mineral field is naturally so rich in lead as this." And, lastly, in regard to tin, the trade of Tarshish in this metal is peculiarly significant, and taken in conjunction with similarity of name and other circumstances already mentioned, is reasonably conclusive as to its identity

[a] It is unsafe to lay any stress on Tarseium (Ταρσήιον), which Stephanus of Byzantium says (*s. v.*) was a city near the Columns of Hercules. Stephanus was probably misled by a passage to which he refers in Polybius, iii. 24. The Ταρσήιον of Polybius could scarcely have been very far from the Pulchrum Promontorium of Carthage.

Digitized by Google

with Tartessus. For even now the countries in Europe, or on the shores of the Mediterranean Sea where tin is found are very few: and in reference to ancient times, it would be difficult to name any such countries except Iberia or Spain, Lusitania, which was somewhat less in extent than Portugal, and Cornwall in Great Britain. Now if the Phœnicians, for purposes of trade, really made coasting voyages on the Atlantic Ocean as far as to Great Britain, no emporium was more favorably situated for such voyages than Tartessus. If, however, in accordance with the views of Sir G. Cornewall Lewis, it is deemed unlikely that Phœnician ships made such distant voyages (*Historical Survey of the Astronomy of the Ancients*, p. 455), it may be added, that it is improbable, and not to be admitted as a fact without distinct proof, that nearly 600 years before Christ, when Ezekiel wrote his prophecy against Tyre, they should have supplied the nations on the shores of the Mediterranean with British tin obtained by the mouths of the Rhone. Diodorus indeed mentions (v. 38), that in his time tin was imported into Gaul from Britain, and was then conveyed on horseback by traders across Gaul to Massilia, and the Roman colony of Narbo. But it would be a very different thing to assume that this was the case so many centuries earlier, when Rome, at that time a small and insignificant town, did not possess a foot of land in Gaul; and when, according to the received systems of chronology, the settlement of Massilia had only just been founded by the Phocæans. As countries then from which Tarshish was likely to obtain its tin, there remain only Lusitania and Spain. And in regard to both of these, the evidence of Pliny the Elder at a time when they were flourishing provinces of the Roman empire, remains on record to show that tin was found in each of them (*Hist. Nat.* xxxiv. 47). After mentioning that there were two kinds of lead, namely, black lead and white lead, the latter of which was called "Cassiteros" by the Greeks, and was fabulously reported to be obtained in islands of the Atlantic Sea, Pliny proceeds to say, "Nunc certum est in Lusitaniâ gigni, et in Gallæciâ;" and he goes on to describe where it is found, and the mode of extracting it (compare Pliny himself, iv. 34, and Diodorus, *l. c.* as to tin in Spain). It may be added that Strabo, on the authority of Posidonius, had made previously a similar statement (iii. 147), though fully aware that in his time tin was likewise brought to the Mediterranean, through Gaul by Massilia, from the supposed Cassiterides or Tin Islands. Moreover, as confirming the statement of Strabo and Pliny, tin mines now actually exist in Portugal; both in parts which belonged to ancient Lusitania, and in a district which formed part of ancient Gallæcia.[a] And it is to be borne in mind that Seville on the Guadalquivir, which has free communication with the sea, is only about 80 miles distant from the Portuguese frontier.

Subsequently, when Tyre lost its independence, the relation between it and Tarshish was probably altered, and for a while, the exhortation of Isaiah (xxiii. 10) may have been realized by the inhabitants passing through their land, free as a river. This independence of Tarshish, combined with the overshadowing growth of the Carthaginian power, would explain why in after times the learned Jews do not seem to have known where Tarshish was. Thus, although in the Septuagint translation of the Pentateuch the Hebrew word was as closely followed as it could be in Greek (Θάρσεις, in which the θ is merely ת without a point, and ει is equivalent to ι, according to the pronunciation in modern Greek), the Septuagint translators of Isaiah and Ezekiel translate the word by "Carthage" and "the Carthaginians" (Is. xxiii. 1, 10, 14; Ez. xxvii. 12, xxxviii. 13); and in the Targum of the book of Kings and of Jeremiah, it is translated "Africa," as is pointed out by Gesenius (1 K. xxii. 48; Jer. x. 9). In one passage of the Septuagint (Is. ii. 16), and in others of the Targum, the word is translated *sea*; which receives apparently some countenance from Jerome, in a note on Is. ii. 16, wherein he states that the Hebrews believe that Tharsis is the name of the sea in their own language. And Josephus, misled, apparently, by the Septuagint translation of the Pentateuch, which he misinterpreted, regarded Tharsis as Tarsus in Cilicia (*Ant.* i. 6, § 1), in which he was followed by other Jews, and (using Tarsus in the sense of all Cilicia) by one learned writer in modern times. See Hartmann's *Aufklärungen über Asien*, vol. i. p. 69, as quoted by Winer, *s. v.*

It tallies with the ignorance of the Jews respecting Tarshish, and helps to account for it, that in Strabo's time the emporium of Tartessus had long ceased to exist, and its precise site had become a subject of dispute. In the absence of positive proof, we may acquiesce in the statement of Strabo (iii. 148), that the river Bætis (now the Guadalquivir) was formerly called Tartessus, that the city Tartessus was situated between the two arms by which the river flowed into the sea, and that the adjoining country was called Tartessis. But there were two other cities which some deemed to have been Tartessus; one, Gadir, or Gadira (Cadiz) (Sallust, *Fragm.* lib. ii.; Pliny, *Hist. Nat.* iv. 36, and Avienus, *Descript. Orb. Terr.* p. 614); and the other, Carteia, in the bay of Gibraltar (Strabo, iii. 151; Ptolem., ii. 4; Pliny, iii. 3; Mela, ii. 6). Of the three, Carteia, which has found a learned supporter at the present day (Ersch and Gruber's *Encyclopädie*, s. v.), seems to have the weakest claims, for in the earliest Greek prose work extant, Tartessus is placed beyond the Columns of Hercules (Herodotus, iv. 152); and in a still earlier fragment of Stesichorus (Strabo, iii. 148), mention is made of the *river* Tartessus, whereas there is no stream near Carteia (= El Roccadillo) which deserves to be called more than a rivulet. Strictly speaking, the same objection would apply to Gadir; but, for poetical uses, the Guadalquivir, which is only 20 miles distant, would be sufficiently near. It was, perhaps, in reference to the claim of Gadir that Cicero, in a letter to Atticus (vii. 3), jocosely calls Balbus, a native of that town, "Tartessium istum tuum." But Tartessus was, likewise, used by poets to express the extreme west where the sun set (Ovid, *Metam.* xiv. 416; Silius Italicus, x. 358; compare Sil. Ital. iii. 399).

*Literature.* — For Tarshish, see Bochart, *Phaleg*, lib. iii. cap. 7; Winer, *Biblisches Realwörterbuch*, s. v.; and Gesenius, *Thesaurus Ling. Hebr. et Chald.* s. v. For Tartessus, see a learned Paper of Sir G. Cornewall Lewis, *Notes and Queries*, 2d Series, vol. vii. pp. 189–191.

2. If the book of Chronicles is to be followed there would seem to have been a Tarshish, accessible from the Red Sea, in addition to the Tarshish

[a] Namely, in the provinces of Porto, Beira, and Braganza. Specimens were in the International Exhibition of 1862.

Digitized by Google

of the south of Spain. Thus, with regard to the ships of Tarshish, which Jehoshaphat caused to be constructed at Ezion-geber on the Ælanitic Gulf of the Red Sea (1 K. xxii. 48), it is said in the Chronicles (2 Chr. xx. 36) that they were made to go to Tarshish; and in like manner the navy of ships which Solomon had previously made in Ezion-geber (1 K. ix. 26) is said in the Chronicles (2 Chr. ix. 21) to have gone to Tarshish with the servants of Hiram. It is not to be supposed that the author of these passages in the Chronicles contemplated a voyage to Tarshish in the south of Spain by going round what has since been called the Cape of Good Hope. Sir G. Cornewall Lewis (*Notes and Queries*, 2d series, vol. vi. pp. 61–64, 81–83) has shown reasons to doubt whether the circumnavigation of Africa was ever effected by the Phœnicians, even in the celebrated voyage which Herodotus says (iv. 42) they made by Neco's orders; but at any rate it cannot be seriously supposed that, according to the Chronicles, this great voyage was regularly accomplished once in three years in the reign of Solomon. Keil supposes that the vessels built at Ezion-geber, as mentioned in 1 K. xxii. 49, 50, were really destined for the trade to Tarshish in Spain, but that they were intended to be transported across the isthmus of Suez, and to be launched in one of the havens of Palestine on the Mediterranean Sea. (See his Notes *ad locum*, Engl. transl.) But this seems improbable; and the two alternatives from which selection should be made seem to be, 1st, that there were *two* emporia or districts called Tarshish, namely, one in the south of Spain, and one in the Indian Ocean; or, 2dly, that the compiler of the Chronicles, misapprehending the expression "ships of Tarshish," supposed that they meant ships destined to go to Tarshish; whereas, although this was the original meaning, the words had come to signify large[a] Phœnician ships, of a particular size and description, destined for long voyages, just as in English "East Indiaman" was a general name given to vessels, some of which were not intended to go to India at all. The first alternative was adopted by Bochart, *Phaleg*, lib. iii. c. 7, and has probably been the ordinary view of those who have perceived a difficulty in the passages of the Chronicles; but the second, which was first suggested by Vitringa, has been adopted by the acutest Biblical critics of our own time, such as De Wette, *Introduction to the Old Testament*, Parker's translation, Boston, 1843, p. 267, vol. ii.; Winer, *Biblisches Realwörterbuch*, s. v.; Gesenius, *Thesaurus Linguæ Heb. et Chald.* s. v., and Ewald, *Geschichte des Volkes Israel*, vol. iii. 1st ed. p. 76; and is acknowledged by Movers, *Ueber die bibl. Chronik*. 1834, 254, and Hävernick, *Spezielle Einleitung in das Alte Testament*, 1839, vol. ii. p. 237. This alternative is in itself by far the most probable, and ought not to occasion any surprise. The compiler of the Chronicles, who probably lived in the time of Alexander's successors, had the book of Kings before him, and in copying its accounts, occasionally used later and more common words for words older and more unusual (De Wette, *l. c.* p. 266). It is probable that during the Persian domination Tartessus was independent (Herodotus i. 163); at any rate, when first visited by the Greeks, it appears to have had its own kings. It is not, therefore, by any means unnatural that the old trade of the Phœnicians with Tarshish had ceased to be understood; and the compiler of the Chronicles, when he read of "ships of Tarshish," presuming, as a matter of course, that they were destined for Tarshish, consulted, as he thought, the convenience of his readers by inserting the explanation as part of the text.

Although, however, the point to which the fleet of Solomon and Hiram went once in three years did not bear the name of Tarshish, the question here arises of what that point was, however it was called? And the reasonable answer seems to be *India*, or the Indian islands. This is shown by the nature of the imports with which the fleet returned, which are specified as "gold, silver, ivory, apes, and *peacocks*" (1 K. x. 22). The gold might possibly have been obtained from Africa, or from Ophir in Arabia [OPHIR], and the ivory and the apes might likewise have been imported from Africa; but the peacocks point conclusively, not to Africa, but to India. One of the English translators of Cuvier's *Animal Kingdom*, London, 1829, vol. viii. p. 136, says, in reference to this bird: "It has long since been decided that India was the cradle of the peacock. It is in the countries of Southern Asia, and the vast archipelago of the Eastern Ocean, that this bird appears to have fixed its dwelling, and to live in a state of freedom. All travellers who have visited these countries make mention of these birds. Thevenot encountered great numbers of them in the province of Guzzerat; Tavernier throughout all India, and Payrard in the neighborhood of Calcutta. Labillardière tells us that peacocks are common in the island of Java." To this may be added the statement of Sir William Jardine, *Naturalist's Library*, vol. xx. p. 147. There are only two species "known; both inhabit the continent and islands of India" — so that the mention of the peacock seems to exclude the possibility of the voyage having been to Africa. Mr. Crawfurd, indeed, in his excellent *Descriptive Dictionary of the Indian Islands*, p. 310, expresses an opinion that the birds are more likely to have been parrots than peacocks; and he objects to the peacock, that, independent of its great size, it is of delicate constitution, which would make it nearly impossible to convey it in small vessels and by a long sea voyage. It is proper, however, to mention, on the authority of Mr. Gould, whose splendid works on birds are so well known, that the peacock is by no means a bird of delicate constitution, and that it would bear a sea voyage very well. Mr. Gould observes that it might be easily fed during a long voyage, as it lives on grain; and that it would merely have been necessary, in order to keep it in a cage, to have cut off its train; which, it is to be observed, falls off of itself, and is naturally renewed once a year.

The inference to be drawn from the importation of peacocks is confirmed by the Hebrew name for the ape and the peacock. Neither of these names is of Hebrew, or even Shemitic origin; and each points to India.[b] Thus the Hebrew word for ape is

[a] Sir Emerson Tennent has pointed out and translated a very instructive passage in Xenophon, *Œconom.* cap. viii., in which there is a detailed description of a large Phœnician vessel, τὸ μέγα πλοῖον τὸ Φοινικῶν. This seems to have struck Xenophon with the same kind of admiration which every one feels who becomes acquainted for the first time with the arrangements of an English man-of-war. See *Encycl. Britannica*, 8th ed. s. v. "Tarshish."

[b] The word "*shenhabbim*" = ivory, is likewise

Digitized by Google

Κῶφ, while the Sanskrit word is *kapi* (see Gesenius and Fürst, *s. v.*, and Max Müller, *On the Science of Language*, p. 190). Again, the Hebrew word for peacock is *tukki*, which cannot be explained in Hebrew, but is akin to *tóka* in the Tamil language, in which it is likewise capable of explanation. Thus, the Rev. Dr. R. Caldwell, than whom there is no greater authority on the Tamil language, writes as follows from Pálamcottah, Madras, June 12, 1862: "*Tóka*[a] is a well recognized Tamil word for peacock, though now used only in poetry. The Sanskrit *sikki* refers to the peculiar crest of the peacock, and means (*avis*) *cristata*; the Tamil *tóka* refers to the other and still more marked peculiarity of the peacock, its tail (*i. e.* its train), and means (*avis*) *caudata*. The Tamil *tóka* signifies, according to the dictionaries, 'plumage, the peacock's tail, the peacock, the end of a skirt, a flag, and, lastly, a woman' (a comparison of gayly-dressed women with peacocks being implied). The explanation of all these meanings is, that *tóka* literally means that which hangs — a hanging. Hence *tókhai*, another form of the same word in provincial use in Tamil (see also the *Tôgai* of Rödiger in Gesenius's *Thesaurus*, p. 1502), means 'skirt,' and in Telugu, *tôka* means a tail." It is to be observed, however, that, if there was any positive evidence of the voyage having been to Africa, the Indian origin of the Hebrew name for ape and peacock would not be of much weight, as it cannot be proved that the Hebrews first became acquainted with the names of these animals through Solomon's naval expeditions from Ezion-geber. Still, this Indian origin of those names must be regarded as important in the absence of any evidence in favor of Africa, and in conjunction with the fact that the peacock is an Indian and not an African bird.[b]

It is only to be added, that there are not sufficient data for determining what were the ports in India or the Indian islands which were reached by the fleet of Hiram and Solomon. Sir Emerson Tennent has made a suggestion of *Point de Galle*, in Ceylon, on the ground that from three centuries before the Christian era there is one unbroken chain of evidence down to the present time, to prove that it was the grand emporium for the commerce of all nations east of the Red Sea. [See article TARSHISH, above.] But however reasonable this suggestion may be, it can only be received as pure conjecture, inasmuch as there is no evidence that any emporium at all was in existence at the point de Galle 700 years earlier. It can scarcely be doubted that there will always henceforth be an emporium at Singapore; and it might seem a spot marked out by nature for the commerce of nations: yet we know how fallacious it would be, under any circumstances, to argue 2,000 years hence that it must have been a great emporium in the twelfth century, or even previous to the nineteenth century of the Christian era. E. T.

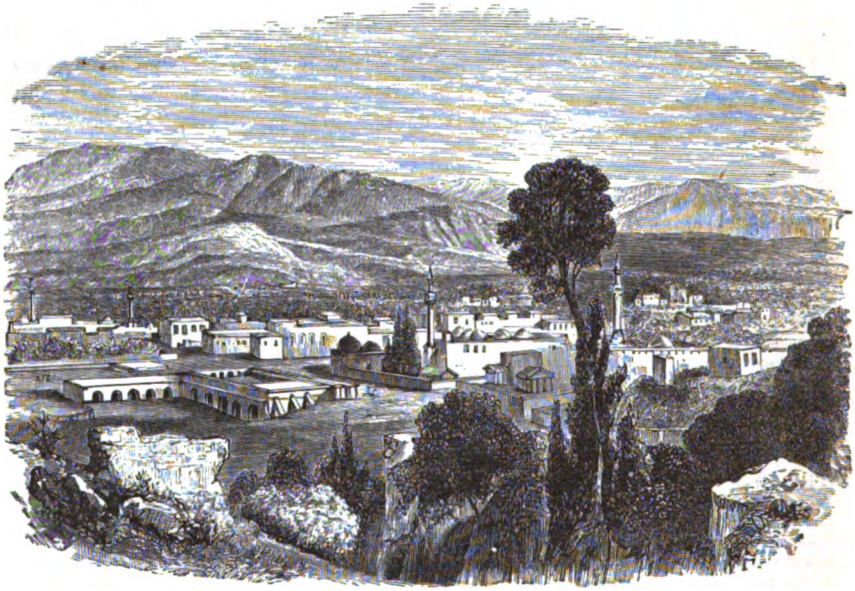
* In addition to the two cities in the extreme East and West, there were others called Tarshish One of these, Tarsus of Cilicia, has a fair claim to recognition as mentioned in the O. T. as well as the N. T. That the name is the same is shown on the one hand by the Sept. rendering of תַּרְשִׁישׁ in Gen. x. 4, Jon. i. 3, Θάρσεις, and by the same rendering by other Greek interpreters in other passages (Is. ii. 16, xxiii. 10; Ez. xxxviii. 13); and on the other hand, by the fact that in the N. T. the Greek Ταρσός is uniformly rendered in the ancient Syriac of Acts ix. 11, 30, xi. 25, xxi. 39, xxii. 3, ܛܪܣܘܣ, and in the modern Hebrew תַּרְשִׁישׁ. Now Tarsus of Cilicia is said to have been founded by the Assyrian king Sardanapalus (Smith's *Dict. of Greek and Rom. Geogr.* s. v.), and therefore in the time of Jonah would naturally have been in active communication with Nineveh. If then we may suppose Tarsus of Cilicia to be the Tarshish of the book of Jonah, we readily see how the prophet might have found at Joppa a vessel bound for this port. The prophet's story, carried by the ship's crew to Tarsus, would thence have gone on before him to Nineveh, and would have prepared the city to receive his preaching. It is interesting to think of this city as thus possibly connected with the ancient prophet sent to the heathen, and with the Christian Apostle sent to the Gentiles. F. G.

**TARSUS** (Ταρσός). The chief town of CILICIA, "no mean city" in other respects, but illustrious to all time as the birthplace and early residence of the Apostle Paul (Acts ix. 11, xxi. 39, xxii. 3). It is simply in this point of view that the place is mentioned in the three passages just referred to. And the only other passages in which the name occurs are Acts ix. 30 and xi. 25, which give the limits of that residence in his native town which succeeded the first visit to Jerusalem after his conversion, and preceded his active ministerial work at Antioch and elsewhere (compare Acts xxii. 21 and Gal. i. 21). Though Tarsus, however, is not actually mentioned elsewhere, there is little doubt that St. Paul was there at the beginning of his second and third missionary journeys (Acts xv 41, xviii. 23).

Even in the flourishing period of Greek history it was a city of some considerable consequence (Xen. *Anab.* i. 2, § 23). After Alexander's conquests had swept this way (Q. Curt. iii. 5), and the Seleucid kingdom was established at Antioch, Tarsus usually belonged to that kingdom, though for a time it was under the Ptolemies. In the civil wars of Rome

---

usually regarded as of Indian origin, "ibha" being in Sanskrit, "elephant." But "shenhabbim," or "shenhavim," as the word would be without points, is nowhere used for ivory except in connection with this voyage, the usual word for ivory being *shen* by itself. The conjecture of Rödiger in Gesenius's *Thesaurus*, s. v. is very probable, that the correct reading is שֵׁן חֻבַּנִים, ivory (and) ebony = shen habnim, which is remarkably confirmed by a passage in Ezekiel (xxvii. 15), where he speaks of the men of Dedan having brought to Tyre horns of ivory and ebony, שֵׁן וְהוֹבְנִים.



[a] The Greeks received the peacock through the Persians, as is shown by the Greek name ταὼς, ταῶς, which is nearly identical with the Persian name taûs, طاوس. The fact that the peacock is mentioned for the first time in Aristophanes, *Aves*, 102, 269 (being unknown to the Homeric poems), agrees with this Persian origin.

[b] * When it is said (2 Chr. ix. 21) that "once every three years came the ships of Tarshish," it is fairly implied that the length of a voyage corresponded in some measure with the interval of time at which it was repeated. This accords very well with a Tarshish in India, but not with a Tarshish in Spain. F. G.

it took Cæsar's side, and on the occasion of a visit from him had its name changed to Juliopolis (Cæs. *Bell. Alex.* 66; Dion Cass. xlvii. 26). Augustus made it a "free city." We are not to suppose that St. Paul had, or could have, his Roman citizenship from this circumstance, nor would it be necessary to mention this, but that many respectable commentators have fallen into this error. We ought to note, on the other hand, the circumstances in the social state of Tarsus, which had, or may be conceived to have had, an influence on the Apostle's training and character. It was renowned as a place of education under the early Roman emperors. Strabo compares it in this respect to Athens and Alexandria, giving, as regards the zeal for learning showed by the residents, the preference to Tarsus (xiv. 673). Some eminent Stoics resided here, among others Athenodorus, the tutor of Augustus, and Nestor, the tutor of Tiberius. Tarsus also was a place of much commerce, and St. Basil describes it as a point of union for Syrians, Cilicians, Isaurians, and Cappadocians (Basil, *Ep. Eusеb. Samos. Episc.*).

Tarsus was situated in a wide and fertile plain on the banks of the Cydnus, the waters of which are famous for the dangerous fever caught by Alexander when bathing, and for the meeting of Antony and Cleopatra. This part of Cilicia was intersected

Tarsus.

in Roman times by good roads, especially one crossing the Tarsus northwards by the "Cilician Gates" to the neighborhood of Lystra and Iconium, the other joining Tarsus with Antioch, and passing eastwards by the "Amanian" and "Syrian Gates." No ruins of any importance remain. The following

**TARTAK** (תַּרְתָּק) [see below]: Θαρθάκ: *Tharthac*). One of the gods of the Avite, or Avvite, colonists who were planted in the cities of Samaria after the removal of the tribes by Shalmaneser (2 K. xvii. 31). According to Rabbinical tradition, Tartak is said to have been worshipped under the form of an ass (Talm. Babl. *Sankedrin*, fol. 63 *b*). From this it has been conjectured that this idol was the Egyptian Typho, but though in the hieroglyphics the ass is the symbol of Typho, it was so far from being regarded as an object of worship, that it was considered absolutely unclean (Plut. *Is. et Os.* c. 14). A Persian or Pehlvi origin has been suggested for Tartak, according to which it signifies either "intense darkness," or "hero of darkness," or the underworld, and so perhaps some planet of ill-luck as Saturn or Mars (Ges. *Thes.*; Fürst, *Handwb.*). The Carmanians, a warlike race on the Persian Gulf, worshipped Mars alone of all the gods, and sacrificed an ass in his honor (Strabo, xv. 727). Perhaps some trace of this worship may have given rise to the Jewish tradition.

**TARTAN** (תַּרְתָּן) [see below]: Θαρθάν [Vat. Θαυθαν], *Tarθan*; [in Is., Vat.$^2$ Sin. Alex. Ναθαν:] *Thrthan*), which occurs only in 2 K. xviii. 17, and Is. xx. 1, has been generally regarded as a proper name. (Gesen. *Lex. Heb.* s. v.; Winer *Realwörterbuch*; Kitto *Bibl. Cyclopæd.*, etc.

Digitized by Google

Winer assumes, on account of the identity of name, that the same person is intended in the two places. Kitto, with more caution, notes that this is uncertain. Recent discoveries make it probable that in Tartan, as in Rabsaris and Rabshakeh, we have not a proper name at all, but a title or official designation, like Pharaoh or Sarena.[a] The Assyrian *Tartan* is a general, or commander-in-chief. It seems as if the Greek translator of 2 Kings had an inkling of the truth, and therefore prefixed the article to all three names (ἀπέστειλε βασιλεὺς Ἀσσυρίων τὸν Θαρθὰν καὶ τὸν Ῥαφὶς (?) καὶ τὸν Ῥαψάκην πρὸς τὸν βασιλέα Ἐζεκίαν), which he very rarely prefixes to the names of persons where they are first mentioned.

If this be the true account of the term *Tartan*, we must understand in 2 K. xviii. 17, that Sennacherib sent "a general," together with his "chief eunuch" and "chief cup-bearer," on an embassy to Hezekiah, and in Is. xx. 1 that "a general" — probably a different person — was employed by Sargon against Ashdod, and succeeded in taking the city. **TAVERNS, THE THREE.** [Three Taverns.]

**TAXES.** In the history of Israel, as of other nations, the student who desires to form a just estimate of the social condition of the people must take into account the taxes which they had to pay. According as these are light or heavy may vary the happiness and prosperity of a nation. To them, though lying in the background of history, may often be traced, as to the true motive-power, many political revolutions. Within the limits of the present article, it will not be possible to do more than indicate the extent and form of taxation in the several periods of Jewish history and its influence on the life of the people.

I. Under the Judges, according to the theocratic government contemplated by the law, the only payments obligatory upon the people as of permanent obligation were the Tithes, the First Fruits, the Redemption-money of the first-born, and other offerings as belonging to special occasions [Priests]. The payment by each Israelite of the half-shekel as "atonement-money," for the service of the Tabernacle, on taking the census of the people (Ex. xxx. 13), does not appear to have had the character of a recurring tax, but to have been supplementary to the free-will offerings of Ex. xxv. 1–7, levied for the one purpose of the construction of the sacred tent. In later times, indeed, after the return from Babylon, there was an annual payment for maintaining the fabric and services of the Temple; but the fact that this begins by the voluntary compact to pay one third of a shekel (Neh x. 32) shows that till then there was no such payment recognized as necessary. A little later the third became a half, and under the name of the *didrachma* (Matt. xvii. 24) was paid by every Jew, in whatever part of the world he might be living (Jos. *Ant.* xviii. 9, § 1). Large sums were thus collected in Babylon and other eastern cities, and were sent to Jerusalem under a special escort (Jos. *Ant.* l. c.; Cic. *pro Flacc.* c. 28). We have no trace of any further taxation than this during the period of the Judges. It was not in itself heavy: it was lightened by the feeling that it was paid as a religious act. In return for it the people secured the celebration of their worship, and the presence among them of a body of men acting more or less efficiently as priests, judges, teachers, perhaps also as physicians. [Priests.] We cannot wonder that the people should afterwards look back to the good old days when they had been so lightly burdened.

II. The kingdom, with its centralized government and greater magnificence, involved, of course, a larger expenditure, and therefore a heavier taxation. This may have come, during the long history of the monarchy, in many different forms, according to the financial necessities of the times. The chief burdens appear to have been: (1.) A tithe of the produce both of the soil and of live stock, making, together with the ecclesiastical tithe, 20 per cent. on incomes of this nature (1 Sam. viii. 15, 17). (2.) Forced military service for a month every year (1 Sam. viii. 12; 1 K. ix. 22; 1 Chr. xxvii. 1). (3.) Gifts to the king, theoretically free, like the old Benevolences of English taxation, but expected as a thing of course, at the commencement of a reign (1 Sam. x. 27) or in time of war (comp. the gifts of Jesse, 1 Sam. xvi. 20, xvii. 18). In the case of subject-princes the gifts, still made in kind, armor, horses, gold, silver, etc., appear to have been regularly assessed (1 K. x. 25; 2 Chr. ix. 24). Whether this was ever the case with the presents from Israelite subjects must remain uncertain. (4.) Import duties, chiefly on the produce of the spice districts of Arabia (1 K. x. 15). (5.) The monopoly of certain branches of commerce, as, for example, that of gold (1 K. ix. 28, xxii. 48), fine linen or byssus from Egypt (1 K. x. 28), and horses (*ibid.* ver. 29). (6.) The appropriation to the king's use of the early crop of hay (Am vii. 1). This may, however, have been peculiar to the northern kingdom or occasioned by a special emergency (Ewald, *Proph.* in loc.).[b]

It is obvious that burdens such as these, coming upon a people previously unaccustomed to them, must have been almost intolerable. Even under Saul exemption from taxes is looked on as a sufficient reward for great military services (1 Sam. xvii. 25). Under the outward splendor and prosperity of the reign of Solomon there lay the deep discontent of an over-taxed people, and it contributed largely to the revolution that followed. The people complain not of Solomon's idolatry but of their taxes (1 K. xii. 4). Of all the king's officers he whom they hate most is Adoram or

[a] Sarena, the Parthian term for "a general," was often mistaken for a proper name by the classical writers. (Strab. xvi. 1, § 28; Appian, *Bell. Parth.* p. 140; Dion Cass. xl. 16; Plut. *Crass* p. 561, E, etc.) Tacitus is the first author who seems to be aware that it is a title (*Ann.* vi. 42).

[b] The history of the drought in the reign of Ahab (1 K. xviii. 5) shows that in such cases a power like this must have been essential to the support of the cavalry of the royal army.

Digitized by Google

ADONIRAM, who was "over the tribute" (1 K. xii. 18). At times, too, in the history of both the kingdoms there were special burdens. A tribute of 50 shekels a head had to be paid by Menahem to the Assyrian king (2 K. xv. 20), and under his successor Hoshea, this assumed the form of an annual tribute (2 K. xvii. 4; amount not stated). After the defeat of Josiah by Pharaoh-Necho, in like manner a heavy income-tax had to be imposed on the kingdom of Judah to pay the tribute demanded by Egypt (2 K. xxiii. 35), and the change of masters consequent on the battle of Carchemish brought in this respect no improvement (Jos. *Ant.* x. 9, §§ 1–3).

III. Under the Persian empire, the taxes paid by the Jews were, in their broad outlines, the same in kind as those of other subject races. The financial system which gained for Darius Hystaspis the name of the "shopkeeper king" (κάπηλος, Herod. iii. 89), involved the payment by each satrap of a fixed sum as the tribute due from his province (*ibid.*), and placed him accordingly in the position of a *publicanus*, or farmer of the revenue, exposed to all the temptation to extortion and tyranny inseparable from such a system. Here, accordingly, we get glimpses of taxes of many kinds. In Judæa, as in other provinces, the inhabitants had to provide in kind for the maintenance of the governor's household (comp. the case of Themistocles, Thuc. i. 138, and Herod. i. 192, ii. 98), besides a money-payment of 40 shekels a day (Neh. v. 14, 15). In Ezr. iv. 13, 20, vii. 24, we get a formal enumeration of the three great branches of the revenue. (1.) The מִדָּה, fixed, *measured* payment, probably direct taxation (Grotius). (2.) בְּלוֹ, the excise or *octroi* on articles of *consumption* (Gesen. *s. v.*). (3.) הֲלָךְ, probably the toll payable at bridges, fords, or certain stations on the high road. The influence of Ezra secured for the whole ecclesiastical order, from the priests down to the Nethinim, an immunity from all three (Ezr. vii. 24); but the burden pressed heavily on the great body of the people, and they complained bitterly both of this and of the ἀγγαρήιον, or forced service, to which they and their cattle were liable (Neh. ix. 37). They were compelled to mortgage their vineyards and fields, borrowing money at 12 per cent., the interest being payable apparently either in money or in kind (Neh. v. 1–11). Failing payment, the creditors exercised the power (with or without the mitigation of the year of JUBILEE) of seizing the persons of the debtors and treating them as slaves (Neh. v. 5; comp. 2 K. iv. 1). Taxation was leading at Jerusalem to precisely the same evils as those which appeared from like causes in the early history of Rome. To this cause may probably be ascribed the incomplete payment of tithes or offerings at this period (Neh. xiii. 10, 12; Mal. iii. 8), and the consequent necessity of a special poll-tax of the third part of a shekel for the services of the Temple (Neh. x. 32). What could be done to mitigate the evil was done by Nehemiah, but the taxes continued, and oppression and injustice marked the government of the province accordingly (Eccl. v. 8).[a]

IV. Under the Egyptian and Syrian kings the taxes paid by the Jews became yet heavier. The "farming" system of finance was adopted in its worst form. The Persian governors had had to pay a fixed sum into the treasury. Now the taxes were put up to auction. The contract sum for those of Phœnicia, Judæa, Samaria, had been estimated at about 8,000 talents. An unscrupulous adventurer (*e. g.* Joseph, under Ptolemy Euergetes) would bid double that sum, and would then go down to the province, and by violence and cruelty like that of Turkish or Hindoo collectors, squeeze out a large margin of profit for himself (Jos. *Ant.* xii. 4, § 1–5).

Under the Syrian kings we meet with an ingenious variety of taxation. Direct tribute (φόρος), an excise duty on salt, crown-taxes (στέφανοι, golden crowns, or their value, sent yearly to the king), one half the produce of fruit trees, one third that of corn land, a tax of some kind on cattle: these, as the heaviest burdens, are ostentatiously enumerated in the decrees of the two Demetriuses remitting them (1 Macc. x. 29, 30, xi. 35). Even after this, however, the golden crown and scarlet robe continue to be sent (1 Macc. xiii. 39). The proposal of the apostate Jason to farm the revenues at a rate above the average (460 talents, while Jonathan — 1 Macc. xi. 28 — pays 300 only), and to pay 150 talents more for a license to open a circus (2 Macc. iv. 9), gives us a glimpse of another source of revenue. The exemption given by Antiochus to the priests and other ministers, with the deduction of one third for all the residents in Jerusalem, was apparently only temporary (Jos. *Ant.* xii. 3, § 3).

V. The pressure of Roman taxation, if not absolutely heavier, was probably more galling, as being more thorough and systematic, more distinctively a mark of bondage. The capture of Jerusalem by Pompey was followed immediately by the imposition of a tribute, and within a short time the sum thus taken from the resources of the country amounted to 10,000 talents (Jos. *Ant.* xiv. 4, §§ 4, 5). The decrees of Julius Cæsar showed a characteristic desire to lighten the burdens that pressed upon the subjects of the republic. The tribute was not to be farmed. It was not to be levied at all in the Sabbatic year. One fourth only was demanded in the year that followed (Jos. *Ant.* xiv. 10, §§ 5, 6). The people, still under the government of Hyrcanus, were thus protected against their own rulers. The struggle of the republican party after the death of the Dictator brought fresh burdens upon the whole of Syria, and Cassius levied not less than 700 talents from Judæa alone. Under Herod, as might be expected from his lavish expenditure in public buildings, the taxation became heavier. Even in years of famine a portion of the produce of the soil was seized for the royal revenue (Jos. *Ant.* xv. 9, § 1), and it was not till the discontent of the people became formidable that he ostentatiously diminished this by one third (Jos. *Ant.* xv. 10, § 4). It was no wonder that when Herod wished to found a new city in Trachonitis, and to attract a population of residents, he found that the most effective bait was to promise immunity from taxes (Jos. *Ant* xvii. 2, § 1), or that on his death the people should be loud in their demands that Archelaus should release them from their burdens, complaining specially of the duty levied on all sales (Jos. *Ant.* xvii 8, § 4).

When Judæa became formally a Roman prov

[a] The later date of the book is assumed in this reference. Comp. ECCLESIASTES.

Digitized by Google

ans, the whole financial system of the Empire came as a natural consequence. The taxes were systematically farmed, and the publicans appeared as a new curse to the country. [PUBLICANS.] The Porteria were levied at harbors, piers, and the gates of cities. These were the τέλη of Matt. xvii. 24; Rom. xiii. 7. In addition to this there was the κῆνσος or poll-tax (Cod. D. gives ἀτυκεφάλαιον in Mark xii. 15) paid by every Jew, and looked upon, for that reason, as the special badge of servitude. It was about the lawfulness of this payment that the Rabbis disputed, while they were content to acquiesce in the payment of the customs (Matt. xxii. 17; Mark xii. 13; Luke xx. 20). It was against this apparently that the struggles of Judas of Galilee and his followers were chiefly directed (Jos. *Ant.* xviii. 1, § 6; *B. J.* ii. 8, § 1). United with this, as part of the same system, there was also, in all probability, a property-tax of some kind. Quirinus, after the deposition of Archelaus, was sent to Syria to complete the work — begun, probably, at the time of our Lord's birth — of valuing and registering property [CYRENIUS, TAXING], and this would hardly have been necessary for a mere poll-tax. The influence of Joazar the high-priest led the people generally (the followers of Judas and the Pharisee Sadduc were the only marked exceptions) to acquiesce in this measure and to make the required returns (Jos. *Ant.* xviii. 1, § 1); but their discontent still continued, and, under Tiberius, they applied for some alleviation (Tac. *Ann.* ii. 42). In addition to these general taxes, the inhabitants of Jerusalem were subject to a special house-duty about this period; Agrippa, in his desire to reward the good-will of the people, remitted it (Jos. *Ant.* xix. 6, § 3).

It can hardly be doubted that in this, as in most other cases, an oppressive taxation tended greatly to demoralize the people. Many of the most glaring faults of the Jewish character are distinctly traceable to it. The fierce, vindictive cruelty of the Galilæans, the Zealots, the Sicarii, was its natural fruit. It was not the least striking proof that the teaching of our Lord and his disciples was more than the natural outrush of popular feeling, that it sought to raise men to the higher region in which all such matters were regarded as things indifferent; and, instead of expressing the popular impatience of taxation, gave, as the true counsel, the precept "Render unto Cæsar the things that are Cæsar's," "tribute to whom tribute is due, custom to whom custom." E. H. P.

**TAXING.** I. (ἡ ἀπογραφή: *descriptio*, Luke ii. 2; *professio*, Acts v. 37) The cognate verb ἀπογράφεσθαι in like manner is rendered by "to be taxed" in the A. V.,[a] while the Vulgate employs "ut describeretur universus orbis" in Luke ii. 1, and "ut profiterentur singuli" in ver. 3. Both the Latin words thus used are found in classical writers with the meaning of a registration or formal return of population or property (Cic. *Verr.* ii. 3, § 47; *de Off.* i. 7; Sueton. *Tiber.* p. 30). The English word conveys to us more distinctly the notion of a tax or tribute actually levied, but it appears to have been used in the 16th century for the simple assessment of a subsidy upon the property of a given county (Bacon, *Hen. VII.* p. 87), or the registration of the people for the purpose of a poll-tax (Camden, *Hist. of Eliz.*). This may account for the choice of the word by Tindal in lieu of "description" and "profession," which Wickliffe, following the Vulgate, had given. Since then "taxing" has kept its ground in most English versions with the exception of "tribute" in the Geneva, and "enrolment" in the Rhemish of Acts v. 37. The word ἀπογραφή by itself leaves the question whether the returns made were of population or property undetermined. Josephus, using the words ἡ ἀποτίμησις τῶν οὐσιῶν (*Ant.* xviii. 1, § 1) as an equivalent, shows that "*the* taxing" of which Gamaliel speaks included both. That connected with the nativity, the first step toward the complete statistical returns, was probably limited to the former (Greswell, *Harmony*, i. 542). In either case "census" would have seemed the most natural Latin equivalent, but in the Greek of the N. T., and therefore probably in the familiar Latin of the period, as afterwards in the Vulg., that word slides off into the sense of the tribute actually paid (Matt. xvii. 24, xxii. 17).

II. Two distinct registrations, or taxings, are mentioned in the N. T., both of them by St. Luke. The first is said to have been the result of an edict of the emperor Augustus, that "all the world (*i. e.* the Roman empire) should be taxed (ἀπογράφεσθαι πᾶσαν τὴν οἰκουμένην) (Luke ii. 1), and is connected by the Evangelist with the name of Cyrenius, or Quirinus. The second, and more important (ἡ ἀπογραφή, Acts v. 37), is referred to in the report of Gamaliel's speech, and is there distinctly associated, in point of time, with the revolt of Judas of Galilee. The account of Josephus (*Ant.* xviii. 1, § 1; *B. J.* ii. 8, § 1) brings together the two names which St. Luke keeps distinct, with an interval of several years between them. Cyrenius comes as governor of Syria after the deposition of Archelaus, accompanied by Coponius as procurator of Judæa. He is sent to make an assessment of the value of property in Syria (no intimation being given of its extension to the οἰκουμένη), and it is this which rouses Judas and his followers to their rebellion. The chronological questions presented by these apparent discrepancies have been discussed, so far as they are connected with the name of the governor of Syria, under CYRENIUS. An account of the tumults caused by the taxing will be found under JUDAS OF GALILEE.

III. There are, however, some other questions connected with the statement of Luke ii. 1–3, which call for some notice.

(1.) The truth of the statement has been questioned by Strauss (*Leben Jesu*, i. 28) and De Wette (*Comm. in loc.*), and others, on the ground that neither Josephus nor any other contemporary writer mentions a census extending over the whole empire at this period (A. U. C. 750). An edict like this, causing a general movement from the cities where men resided to those in which, for some reason or other, they were to be registered, must, it is said, have been a conspicuous fact, such as no historian would pass over. (2.) Palestine, it is urged further, was at this time, an independent kingdom under Herod, and therefore would not have come under the operation of an imperial edict. (3.) If such a measure, involving the recognition of Roman sovereignty, had been attempted under Herod, it would

[a] In Heb. xii. 23 (πρωτοτόκων ἀπογεγραμμένων ἐν οὐρανοῖς), where the idea is that of the registration of the first-born as citizens of the heavenly Jerusalem, the A. V. has simply "written," the Vulg. "qui conscripti sunt."

Digitized by Google

have roused the same resistance as the undisputed census under Quirinus did at a later period. (4.) The statement of St. Luke that "all went to be taxed, every one into his own city," is said to be inconsistent with the rules of the Roman census, which took cognizance of the place of residence only, not of the place of birth. (5.) Neither in the Jewish nor the Roman census would it have been necessary for the wife to travel with her husband in order to appear personally before the registrar (*censitor*). The conclusions from all these objections are, that this statement belongs to legend, not to history; that it was a contrivance, more or less ingenious, to account for the birth at Bethlehem (that being assumed in popular tradition as a preconceived necessity for the Messiah) of one whose kindred lived, and who himself had grown up at Nazareth; that the whole narrative of the Infancy of our Lord, in St. Luke's Gospel, is to be looked on as mythical. A sufficient defense of that narrative may, it is believed, be presented within comparatively narrow limits.

(1.) It must be remembered that our history of this portion of the reign of Augustus is defective. Tacitus begins his Annals with the emperor's death. Suetonius is gossiping, inaccurate, and ill-arranged. Dion Cassius leaves a gap from A. U. C. 748 to 756, with hardly any incidents. Josephus does not profess to give a history of the empire. It might easily be that a general census, cir. A. U. C. 749–750, should remain unrecorded by them. If the measure was one of frequent occurrence, it would be all the more likely to be passed over. The testimony of a writer, like St. Luke, obviously educated and well informed, giving many casual indications of a study of chronological data (Luke i. 5, iii.; Acts xxiv. 27), and of acquaintance with the Herodian family (Luke viii. 3, xxiii. 8; Acts xii. 20, xiii. 1) and other official people (Acts xxiii.–xxvi.), recognizing distinctly the later and more conspicuous ἀπογραφή, must be admitted as fair presumptive evidence, hardly to be set aside in the absence of any evidence to the contrary. How hazardous such an inference from the silence of historians would be, we may judge from the fact that there was undoubtedly a geometrical survey of the empire at some period in the reign of Augustus, of which none of the above writers take any notice (comp. the extracts from the Rei Agrariæ Scriptores in Greswell, *Harmony*, i. 537). It has been argued further that the whole policy of Augustus rested on a perpetual communication to the central government of the statistics of all parts of the empire. The inscription on the monument of Ancyra (Gruter, *Corpus Inscript.* i. 230) names three general censuses in the years A. U. C. 726, 746, 767 (comp. Sueton. *Octav.* c. 28; Greswell, *Harm.* i. 535). Dion Cass. (lv. 13) mentions another in Italy in A. U. C. 757. Others in Gaul are assigned to A. U. C. 727, 741, 767. Strabo (vi. 4, § 2) writing early in the reign of Tiberius, speaks of μία τῶν καθ' ἡμᾶς τιμήσεων, as if they were common things. In A. U. C. 726, when Augustus offered to resign his power, he laid before the senate a "rationarium imperii" (Sueton. *Octav.* c. 28). After his death, in like manner, a "breviarium totius imperii" was produced, containing full returns of the population, wealth, resources of all parts of the empire, a careful digest apparently of facts collected during the labors of many years (Sueton. *Octav.* c. 101; Dion Cass. lv.; Tacit. *Ann.* i. 11). It will hardly seem strange that one of the routine official steps in this process should only be mentioned by a writer who, like St. Luke, had a special reason for noticing it. A census, involving property-returns, and the direct taxation consequent on them, might excite attention. A mere ἀπογραφή would have little in it to disturb men's minds, or force itself upon a writer of history.

There is, however, some evidence, more or less circumstantial, in confirmation of St. Luke's statement. (1.) The inference drawn from the silence of historians may be legitimately met by an inference drawn from the silence of objectors. It never occurred to Celsus, or Lucian, or Porphyry, questioning all that they could in the Gospel history, to question this. (2.) A remarkable passage in Suidas (*s. v.* ἀπογραφή) mentions a census, obviously differing from the three of the Ancyran monument, and agreeing, in some respects, with that of St. Luke. It was made by Augustus not as censor, but by his own imperial authority (δόξαν αὐτῷ; comp. ἐξῆλθε δόγμα, Luke ii. 1). The returns were collected by twenty commissioners of high rank. They included property as well as population, and extended over the whole empire. (3.) Tertullian, incidentally, writing controversially, not against a heathen, but against Marcion, appeals to the returns of the census for Syria under Sentius Saturninus as accessible to all who cared to search them, and proving the birth of Jesus in the city of David (Tert. *adv. Marc.* iv. 19). Whatever difficulty the difference of names may present [comp CYRENIUS], here is, at any rate, a strong indication of the fact of a census of population, cir. A. U. C. 749, and therefore in harmony with St. Luke's narrative. (4.) Greswell (*Harm.* i. 476, iv. 6) has pointed to some circumstances mentioned by Josephus in the last year of Herod's life, and therefore coinciding with the time of the Nativity, which imply some special action of the Roman government in Syria, the nature of which the historian carelessly or deliberately suppresses.[a] When Herod attends the council at Berytus there are mentioned as present, besides Saturninus and the Procurator, οἱ περὶ Πεδάνιον πρέσβεις, as though the officer thus named had come, accompanied by other commissioners, for some purpose which gave him for the time almost coördinate influence with the governor of Syria himself (*B. J.* i. 27, § 2). Just after this again, Herod, for some unexplained reason, found it necessary to administer to the whole people an oath, not of allegiance to himself, but of good-will to the emperor; and this oath 6,000 of the Pharisees refused to take (Joseph. *Ant.* xvii. 2, § 4; *B. J.* i. 29, § 2). This statement implies, it is urged, some disturbing cause affecting the public tranquillity, a formal appearance of all citizens before the king's officers, and lastly, some measure specially distasteful to the Pharisees. The narrative of St. Luke offers an undesigned explanation of these phenomena.

(2.) The second objection admits of as satisfactory an answer. The statistical document already referred to included subject-kingdoms and allies, no less than the provinces (Sueton. *l. c.*). It

[a] The fullness with which Josephus dwells on the history of David's census and the tone in which he speaks of it (*Ant.* vii. 13) make it probable that there may have been a superstitious unwillingness to speak of this population census, which would not apply to the property assessment of Quirinus.

Digitized by Google

Augustus had any desire to know the resources of Judæa, the position of Herod made him neither willing nor able to resist. From first to last we meet with repeated instances of subservience. He does not dare to try or punish his sons, but refers their cause to the emperor's cognizance (Joseph. *Ant.* xvi. 4, § 1, xvii. 5, § 8). He holds his kingdom on condition of paying a fixed tribute. Permission is ostentatiously given him to dispose of the succession to his throne as he likes best (Joseph. *Ant.* xvi. 4, § 5). He binds his people, as we have seen, by an oath of allegiance to the emperor (Joseph. *Ant.* xvii. 2, § 4). The threat of Augustus that he would treat Herod no longer as an ally but as a subject (Joseph. *Ant.* xvi. 9, § 3) would be followed naturally enough by some such step as this, and the desire of Herod to regain his favor would lead him to acquiesce in it.

(3.) We need not wonder that the measure should have been carried into effect without any popular outbreak. It was a return of the population only, not a valuation of property; there was no immediate taxation as the consequence. It might offend a party like the Pharisees. It was not likely to excite the multitude. Even if it seemed to some the prognostication of a coming change, and of direct government by the Roman emperor, we know that there was a large and influential party ready to welcome that change as the best thing that could happen for their country (Joseph. *Ant.* xvii. 11, § 2).

(4.) The alleged inconsistency of what St. Luke narrates is precisely what might be expected under the known circumstances of the case. The census, though Roman in origin, was effected by Jewish instrumentality, and in harmony therefore with Jewish customs. The alleged practice is, however, doubtful, and it has been maintained (Huschke, *über den Census*, etc. in Winer "Schatzung") that the inhabitants of the provinces were, as far as possible, registered in their *forum originis* — not in the place in which they were only residents. It may be noticed incidentally that the journey from Nazareth to Bethlehem belongs to a time when Galilee and Judæa were under the same ruler, and would therefore have been out of the question (as the subject of one prince would certainly not be registered as belonging to another) after the death of Herod the Great. The circumstances of the Nativity indicate, if they do not prove, that Joseph went there only for personal enrollment, not because he was the possessor of house or land.

(5.) The last objection as to the presence of the Virgin, where neither Jewish nor Roman practice would have required it, is perhaps the most frivolous and vexatious of all. If Mary were herself of the house and lineage of David, there may have been special reasons for her appearance at Bethlehem. In any case the Scripture narrative is consistent with itself. Nothing could be more natural, looking to the unsettled state of Palestine at this period, than that Joseph should keep his wife under his own protection, instead of leaving her by herself in an obscure village, exposed to danger and reproach. In proportion to the hopes he had been taught to cherish of the birth of a Son of David, in proportion also to his acceptance of the popular belief that the Christ was to be born in the city of David (Matt. ii. 5; John vii. 42), would be his desire to guard against the accident of birth in the despised Nazareth out of which "no good thing" could come (John i. 46).

The literature connected with this subject is, as might be expected, very extensive. Every commentary contains something on it. Meyer, Wordsworth, and Alford may be consulted as giving the latest summaries. Good articles will be found under "Schatzung" in Winer, *Realwb.*; and Herzog's *Real-Encyklop.* A very full and exhaustive discussion of all points connected with the subject is given by Spanheim, *Dubia Evang.* ii. 3–9; and Richardus, *Diss. de Censu Augusti*, in Menthen's *Thesaurus*, ii. 428; comp. also Ellicott, *Hulsean Lectures*, p. 57. E. H. P.

* The exact nature of the census at the time of our Lord's birth cannot be ascertained, as we know nothing of the census itself except what Luke tells us. That all the provinces were subjected to an ἀπογραφή indicates nothing, since this might be on one plan in Syria and Judæa, and on another in Gaul. At that age of Rome it was still the policy not to smooth down all the differences in the empire. A. W. Zumpt in his recent work, *Das Geburtsjahr Christi* (Leipz. 1869), strives to show that the ἀπογραφή was held for the purpose of levying a capitation tax. For had it been of the same kind with the census of Quirinius, in A. D. 6, when property in land was certainly registered and assessed, we might expect, Zumpt thinks, to have mention made of it by Josephus, and to hear of commotions such as occurred owing to that census. But if *tributum capitis* included only a poll-tax, of equal amount for all, what need to send the population to the ancestral abodes of their tribes, families, and smaller subdivisions? If however this tax included also a levy upon movable property (see Rein, in Pauly v. *tributum*, Marquardt in Bekker-Marq. iii.), there would be more need to make a registration at the places where the holders of property had been gathered for this purpose in earlier times.

This census then cannot be shown to be a mere enumeration of inhabitants. The population of the provinces does not appear to have been counted except for the purpose of ascertaining their taxable capacity. It has been said that the *Breviarium* of Augustus contained lists of the population of the empire, but the passages (Tac. *Annal.* i. 11; Suet. *August.* sub fin., Dion Cass. lvi. § 33, ed. Sturz) show only that Augustus had prepared a brief statement of the resources of the empire in money and troops together with the expenses. Pliny the elder, although often referring to measurements of distances made under the supervision of Agrippa gives no sufficient proof that he was acquainted with general tables of population. A passage of the lexicographer Suidas, under the word Augustus, does indeed speak of an enumeration, but all scholars admit, we believe, that the fact to which he refers is to be restricted to the number of Roman citizens. In the other passage spoken of on page 3186, it is clearly implied that tribute was the object of the ἀπογραφή. This passage, notwithstanding its errors and its derivation from a Christian writer, who had Luke ii. in his mind, is thought by A. W. Zumpt and Marquardt, two of the leading archæologists of our day, to contain substantial truth (Zumpt, *u. s.*, p. 160; Bekker-Marq. iii. 2, 168).

The difficulty found by some in a census of Judæa, when Herod was king there, is best met by Wieseler, in his recent *Beiträge* (Gotha, 1869), a supplement to his *Synopse*. Herod had very limited powers. He could not make war on his own account, nor even coin money in gold and silver. Judæa

Digitized by Google

had been subject to tribute from Pompey's time down to the appointment of Herod as king, and there are indications that this subjection to Roman taxation did not cease at his accession. Comp. Wieseler, *u. s.*, pp. 67, 69 ff. If made under the direction of the president of Syria by Jewish officers, it would not greatly differ from a similar registration made by Herod, nor need it have alarmed the Jews, if carefully managed.

Some find it hard to believe that Joseph, if living at Nazareth, could be obliged to go to Bethlehem to be registered. We are forced to say that nothing is known of the relations of men to the tribes and towns of their fathers at this period of Jewish history. The difficulty here is an argument from our ignorance and cannot be removed. Tertullian, a lawyer of no mean learning, accepted the statement. If it be called mythical, we can fairly say that the myth does not invent new usages but grows up around old ones. So, then, if the history of our Lord's birth were a myth, this passage itself would prove that Joseph might have gone to Bethlehem to be registered, consistently with prevailing usage in Judæa. Add to this that family genealogies were still kept up, as is shown by the cases of Zacharias, father of John, of Anna, daughter of Phanuel (Luke ii. 36), though belonging to one of the ten tribes, of our Lord's family (Euseb. *Hist.* iii. 20), and by the family registers of Matthew and Luke, which at least show that it was then supposed that descent might be and ought to be traced a good way backwards.

One more remark: in the discussions on the taxing and some other historical difficulties, Luke is brought to the stand by a certain class of writers, as if he had no independent authority in himself. But this is unfair. Luke's honesty is more clear than that of Josephus, and his accuracy in many respects is shown by modern research to be great. If one puts against a statement of his the absence of all mention by Josephus, or other historians, this is unfair, and proceeds upon the assumption that there is a great balance of probability against the truth of the Gospels. Such a one should also remember too, that Josephus despatches the whole reign of Archelaus in a few passages; that Dion Cassius is defective just where we want his testimony, and that Tacitus begins his annals after the birth of Christ, and notices only that which is politically important to Rome.

T. D. W.

**TE'BAH** (טֶבַח [*slaughter*]: Ταβέκ: *Tabee*). Eldest of the sons of Nahor, by his concubine Reumah (Gen. xxii. 24). Josephus calls him Ταβαῖος (*Ant.* i. 6, § 5).

**TEBALI'AH** (טֶבַלְיָהוּ [*Jehovah immerses* or *purifies*, Ges.]: Ταβλαί; Alex. Ταβελιας: *Tabelias*). Third son of Hosah of the children of Merari (1 Chr. xxvi. 11).

**TE'BETH.** [MONTH.]

**TEHAPH'NEHES,** Ez. xxx. 18. [TAHPANHES.]

**TEHIN'NAH** (תְּחִנָּה [*cry for mercy, mercy*]: Θαιμάν; Alex. Θανα; [Comp. Θεεννά:] *Tehinna*). The father or founder of Ir-Nahash, the city of Nahash, and son of Eshton (1 Chr. iv. 12). His name only occurs in an obscure genealogy of the tribe of Judah, among those who are called "the men of Rechah."

**TEIL-TREE.** [OAK.]

**TEKO'A and TEKO'AH** (תְּקוֹעַ, but in 2 Sam. xiv. 2 only, תְּקוֹעָה [see below]: Θεκωέ and Θεκουέ; Joseph. Θεκωέ, Θεκόα: *Thecua, Thecue*), a town in the tribe of Judah (2 Chr. xi. 6, as the associated places show), on the range of hills which rise near Hebron, and stretch eastward toward the Dead Sea. These hills bound the view of the spectator as he looks to the south from the summit of the Mount of Olives. Jerome (*in Amos, Prooem.*) says that Tekoa was six Roman miles from Bethlehem, and that as he wrote (*in Jerem.* vi. 1) he had that village daily before his eyes (*Thekoam quotidie oculis cernimus*). In his *Onomasticon* (art. *Elthece*, Ἐλθεκέ) he represents Tekoa as nine miles only from Jerusalem; but elsewhere he agrees with Eusebius in making the distance twelve miles. In the latter case he reckons by the way of Bethlehem, the usual course in going from the one place to the other; but there may have been also another and shorter way, to which he has reference in the other computation. Some suggest (Bachiene, *Palästina*, ii. 60) that an error may have crept into Jerome's text, and that we should read *twelve* there instead of *nine*. In 2 Chr. xx. 20 (see also 1 Macc. ix. 33), mention is made of "the wilderness of Tekoa," which must be understood of the adjacent region on the east of the town (see *infra*), which in its physical character answers so entirely to that designation. It is evident from the name (derived from תָּקַע "to strike," said of driving the stakes or pins into the ground for securing the tent), as well as from the manifest adaptation of the region to pastoral pursuits, that the people who lived here must have been occupied mainly as shepherds, and that Tekoa in its best days could have been little more than a cluster of tents, to which the men returned at intervals from the neighboring pastures, and in which their families dwelt during their absence.

The Biblical interest of Tekoa arises, not so much from any events which are related as having occurred there, as from its connection with various persons who are mentioned in Scripture. It is not enumerated in the Hebrew catalogue of towns in Judah (Josh. xv. 49), but is inserted in that passage of the Septuagint. The "wise woman" whom Joab employed to effect a reconciliation between David and Absalom was obtained from this place (2 Sam. xiv. 2). Here also, Ira, the son of Ikkesh, one of David's thirty "mighty men" (גִּבֹּרִים) was born, and was called on that account "the Tekoite" (2 Sam. xxiii. 26). It was one of the places which Rehoboam fortified, at the beginning of his reign, as a defense against invasion from the south (2 Chr. xi. 6). Some of the people from Tekoa took part in building the walls of Jerusalem, after the return from the Captivity (Neh. iii. 5, 27). In Jer. vi. 1 the prophet exclaims, "Blow the trumpet in Tekoa and set up a sign of fire in Beth-Haccerem" — the latter probably the "Frank Mountain," the cone-shaped hill so conspicuous from Bethlehem. It is the sound of the trumpet as a warning of the approach of enemies, and a signal-fire kindled at night for the same purpose, which are described here as so appropriately heard and seen, in the hour of danger, among the mountains of Judah. Put Tekoa is chiefly memorable as the birthplace of the prophet Amos, who was here called

Digitized by Google

by a special voice from heaven to leave his occupation as "a herdman" and "a gatherer of wild figs," and was sent forth thence to Bethel to testify against the sins of the kingdom of Israel (Amos vii. 14).[a] Accustomed as Amos was to a shepherd's life, he must have been familiar with the solitude of the desert, and with the dangers there incident to such an occupation. Some effect of his peculiar training amid such scenes may be traced, as critics think (De Wette, *Einl. ins Alte Test.* p. 356), in the contents and style of his prophecy. Jerome (*ad Am.* i. 2) says, ". . . . etiam Amos prophetam qui pastor de pastoribus fuit et pastor non in locis cultis et arboribus ac vineis consitis, aut certe inter sylvas et prata virentia, sed in lata eremi vastitate, in qua versatur leonum feritas et interfectio pecorum, *artis suæ usum esse sermonibus.*" "The imagery of his visions," says Stanley, "is full of his country life, whether in Judæa or Ephraim. The locusts in the royal meadows, the basket of fruit, vineyards and fig-trees, the herds of cows rushing heedlessly along the hill of Samaria, the shepherds fighting with lions for their prey, the lion and the bear, the heavy-laden wagon, the sifting of corn, — these are his figures" (*Jewish Church*, i. 399, Amer. ed.). See, also, the striking remarks of Dr. Pusey (*Introd. to Amos*). Compare Am. ii. 13, iii. 4, 12, iv. 1, vi. 12, vii. 1, &c.

In the genealogies of Judah (1 Chr. ii. 24, and iv. 5), Ashur, a posthumous son of Hezron and a brother of Caleb, is mentioned as the father of Tekoa, which appears to mean that he was the founder of Tekoa, or at least the owner of that village. (See Roediger in Gesen. *Thes.* iii. 1518.) If he was the owner of the village, it was of course in his capacity as the prince or sheik of Tekoa (Bertheau, *Bücher der Chr.* p. 17).

Tekoa is known still as *Tekû'a*, and, though it lies somewhat aside from the ordinary route, has been visited and described by several recent travellers. The writer was there on the 21st of April, 1852, during an excursion from Jerusalem by the way of Bethlehem and *Urtâs*. Its distance from *Beit Lahm* agrees precisely with that assigned by the early writers as the distance between Tekoa and Bethlehem. It is within sight also of the "Frank Mountain," beyond question the famous Herodium, or site of Herod's Castle, which Josephus (*B. J.* iv. 9, § 5) represents as near the ancient Tekoa. It lies on an elevated hill, which spreads itself out into an irregular plain of moderate extent. Its "high position" (Robinson, *Bibl. Res.* i. 486) "gives it a wide prospect. Toward the northeast the land slopes down toward *Wady Khureitûn*; on the other sides the hill is surrounded by a belt of level table-land; beyond which are valleys, and then other higher hills. On the south, at some distance, another deep valley runs off southeast toward the Dead Sea. The view in this direction is bounded only by the level mountains of Moab, with frequent bursts of the Dead Sea, seen through openings among the rugged and desolate intervening mountains." The scene, on the occasion of the writer's journey above referred to, was eminently a pastoral one, and gave back no doubt a faithful image of the olden times There were two encampments of shepherds there, consisting of tents covered with the black goat-skins so commonly used for that purpose; they were supported on poles and turned up in part on one side, so as to enable a person without to look into the interior. Flocks were at pasture near the tents and on the remoter hill-sides in every direction. There were horses and cattle and camels also, though these were not so numerous as the sheep and goats. A well of living water, on the outskirts of the village, was a centre of great interest and activity; women were coming and going with their pitchers, and men were filling the troughs to water the animals which they had driven thither for that purpose. The general aspect of the region was sterile and unattractive; though here and there were patches of verdure, and some of the fields, which had yielded an early crop, had been recently ploughed up as if for some new species of cultivation. Fleecy clouds, white as the driven snow, were floating toward the Dead Sea, and their shadows, as they chased each other over the landscape, seemed to be fit emblems of the changes in the destiny of men and nations, of which there was so much to remind one at such a time and in such a place. Various ruins exist at Tekoa, such as the walls of houses, cisterns, broken columns, and heaps of building-stones. Some of these stones have the so-called "beveled" edges which are supposed to show a Hebrew origin. There was a convent here at the beginning of the 6th century, and a Christian settlement in the time of the Crusaders; and undoubtedly most of these remains belong to modern times rather than ancient. Among these should be mentioned a baptismal font, sculptured out of a limestone block, three feet and nine inches deep, with an internal diameter at the top of four feet, and designed evidently for baptism as administered in the Greek Church. It stands in the open air, like a similar one which the writer saw at *Jufna*, near *Beitin*, the ancient Bethel. [OPHNI, Amer. ed.] See more fully in the *Christian Review* (New York, 1853, p. 519).

Near *Tekû'a*, among the same mountains, on the brink of a frightful precipice,[b] are the ruins of *Khureitûn*, which some have thought may be a corruption of Kerioth (Josh. xv. 25), and in that case perhaps the birthplace of Judas the traitor, who was thence called Iscariot, *i. e.* "man of Kerioth." It is impossible to survey the scenery of the place, and not feel that a dark spirit would find itself in its own element amid the seclusion and wildness of such a spot. High up from the bottom of the ravine is an opening in the face of the rocks which leads into an immense subterranean labyrinth, which many suppose may have been the Cave of Adullam, in which David and his followers sought refuge from the pursuit of Saul. [ADULLAM.] It is large enough to contain hundreds of men, and is capable of defense against almost any attack that could be made upon it from without. When a party of the Turks fell upon *Tekû'a* and sacked it, A. D. 1138, most of the inhabitants, anticipating the danger, fled to this cavern, and thus saved their lives. It is known among the Arabs as the "Cave of Refuge." It may be questioned

[a] * It was a journey of 6 or 7 hours only, being just the same distance (12 miles) north of Jerusalem that Tekoa was south of it. H.

[b] * A stillness almost fearful hangs over the deep basin. H. von Schubert tells us in his characteristic way how he was impressed there. His first impulse on reaching the place was to fire his carbine and wake the echoes, but the next moment he was so awed that he dared not disturb the silence (*Reise in das Morgenland*, iii. 29). H.

(Robinson, i. 481) whether this was the actual place of David's retreat, but it illustrates, at all events, that peculiar geological formation of the country, which accounts for such frequent allusions to "dens and caves" in the narrations of the Bible. The writer was told, as a common opinion of the natives, that some of the passages of this particular excavation extended as far as to Hebron, several miles distant, and that all the cord at Jerusalem would not be sufficient to serve as clew for traversing its windings. [ODOLLAM.] Tobler, in his exploration of the cave, found a number of sarcophagi and some Phœnician inscriptions.

One of the gates of Jerusalem in Christian times seems to have borne the name of Tekoa. Arculf, at any rate, mentions the "gate called Tecuitis" in his enumeration of the gates of the city (A. D. 700). It appears to have led down into the valley of the Kedron, probably near the southern end of the east wall. (See Tobler's *Topogr. von Jerusalem*, p. 165.) But his description is not very clear. Can it be to this that St. Jerome alludes in the singular expression in the *Epit. Paulæ* (§ 12), . . . . *revertar Jerosolymam et per Thecuam atque Amos, rutilantem montis Oliveti Crucem aspiciam.* The Church of the Ascension on the summit of Olivet would be just opposite a gate in the east wall, and the "glittering cross" would be particularly conspicuous if seen from beneath its shadow. There is no more *primâ facie* improbability in a Tekoa gate than in a Bethlehem, Jaffa, or Damascus gate, all which still exist at Jerusalem. But it is strange that the allusions to it should be so rare, and that the circumstances which made Tekoa prominent enough at that period to cause a gate to be named after it should have escaped preservation. H. B. H.

**TEKO'A** (תְּקוֹעַ [*striking, pitching of tents*]: Θεκωέ: *Thecua*). A name occurring in the genealogies of Judah (1 Chr. ii. 24, iv. 5), as the son of Ashur. There is little doubt that the town of Tekoa is meant, and that the notice implies that the town was colonized or founded by a man or a town of the name of ASHUR. G.

**TEKOITE, THE** (הַתְּקוֹעִי; in Chr. הַתְּקוֹעִי [patr.]: ὁ Θεκωίτης [Vat. Alex. -ει-], ὁ Θεκωί [Vat. FA. Θεκω], ὁ Θεκωίτης [Vat. -γεν-; in Neh., οἱ Θεκωίμ, Vat. -ειν, Alex. -ειμ, FA. -ειμ, -ειν: *de Thecua*, [*Thecuites, Thecuenus*]). IRA ben-Ikkesh, one of David's warriors, is thus designated (2 Sam. xxiii. 26; 1 Chr. xi. 28, xxvii. 9). The common people among THE TEKOITES displayed great activity in the repairs of the wall of Jerusalem under Nehemiah. They undertook two lengths of the rebuilding (Neh. iii. 5, 27). It is however specially mentioned that their "lords" (אֲדֹנֵיהֶם) took no part in the work. G.

**TEL-A'BIB** (תֵּל־אָבִיב [Chald. *corn-hill*]: μετέωρος: *ad acervum novarum frugum*) [Ez. iii. 15] was probably a city of Chaldæa or Babylonia, not of Upper Mesopotamia, as generally imagined. (See Calmet on Ez. iii. 15, and Winer, *ad voc.*) The whole scene of Ezekiel's preaching and visions seems to have been Chaldæa Proper; and the river Chebar, as already observed [see CHEBAR], was not the *Khabour*, but a branch of the Euphrates. Ptolemy has in this region a Thel-benecane and a Thal-atha (*Geograph.* v. 20); but neither name can be identified with Tel-abib, unless we suppose a serious corruption. The element "Tel" in Tel-abib, is undoubtedly "hill." It is applied in modern times by the Arabs especially to the mounds or heaps which mark the site of ruined cities all over the Mesopotamian plain, an application not very remote from the Hebrew use, according to which "Tel" is "especially a heap of stones" (Gesen. *ad voc.*). It thus forms the first syllable in many modern, as in many ancient names, throughout Babylonia, Assyria, and Syria. (See Assemann, *Bibl. Orient.* iii. pt. ii. p. 784.)

The LXX. have given a translation of the term, by which we can see that they did not regard it as a proper name, but which is quite inexplicable. The Vulgate likewise translates, and correctly enough, so far as Hebrew scholarship is concerned; but there seems to be no reason to doubt that the word is really a proper name, and therefore ought not to be translated at all. G. R.

**TE'LAH** (תֶּלַח [*breach*]: Θαλεέ; Alex. Θαλε: *Thale*). A descendant of Ephraim, and ancestor of Joshua (1 Chr. vii. 25).

**TEL'AIM** (הַטְּלָאִים, with the article [*lambs*]: ἐν Γαλγάλοις in both MSS., and so also Josephus: *quasi agnos*). The place at which Saul collected and numbered his forces before his attack on Amalek (1 Sam xv. 4, only). It may be identical with TELEM, the southern position of which would be suitable for an expedition against Amalek; and a certain support is given to this by the mention of the name (Thailam or Thelam) in the LXX. of 2 Sam. iii. 12. On the other hand the reading of the LXX. in 1 Sam. xv. 4 (not only in the Vatican MS., but also in the Alex., usually so close an adherent of the Hebrew text), and of Josephus (*Ant.* vi. 7, § 2), who is not given to follow[a] the LXX. slavishly — namely, Gilgal, is remarkable; and when the frequent connection of that sanctuary with Saul's history is recollected, it is almost sufficient to induce the belief that in this case the LXX. and Josephus have preserved the right name, and that instead of Telaim we should, with them, read Gilgal. It should be observed, however, that the Hebrew MSS. exhibit no variation in the name, and that, excepting the LXX. and the Targum, the Versions all agree with the Hebrew. The Targum renders it "lambs of the Passover," according to a curious fancy, mentioned elsewhere in the Jewish books (*Yalkut* on 1 Sam. xv. 4, &c.), that the army met at the Passover, and that the census was taken by counting the lambs.[b] This is partly indorsed by Jerome in the *Vulgate*. G.

**TELASSAR** (תַּלַּשַּׂר [*Assyrian hill*]: Θασσάρ, Θεεμάθ; [Alex. Θαλασσαρ, Θαιμαθ,

---

[a] In this instance his rendering is more worthy of notice, because it would have been easy for him to have interpreted the name as the Rabbis do, with whose traditions he was well acquainted.

[b] A similar fancy in reference to the name BEREK (2 Sam. xi. 8) is found in the Midrash. It is taken literally as meaning "broken pieces of pottery," by which, as by counters, the numbering was effected. Berek and Telaim are considered by the Talmudists as two of the ten numberings of Israel, past and future.

Digitized by Google

Sin. in Is., Θεγμα:] *Thelassar*, *Thalassar*) is mentioned in 2 K. xix. 12 and in Is. xxxvii. 12 as a city inhabited by "the children of Eden," which had been conquered, and was held in the time of Sennacherib by the Assyrians. In the former passage the name is rather differently given both in Hebrew and English. [THELASAR.] In both it is connected with Gozan (Gauzanitis), Haran (Carrhæ, now *Harran*), and Reseph (the *Rasappa* of the Assyrian Inscriptions), all of which belong to the hill country above the Upper Mesopotamian plain, the district from which rise the *Khabûr* and *Belik* rivers. [See MESOPOTAMIA, GOZAN, and HARAN.] It is quite in accordance with the indications of locality which arise from this connection, to find Eden joined in another passage (Ez. xxvii. 23) with Haran and Asshur. Telassar, the chief city of a tribe known as the *Beni Eden*, must have been in Western Mesopotamia, in the neighborhood of Harran and Orfa. It would be uncritical to attempt to fix the locality more exactly. The name is one which might have been given by the Assyrians to any place where they had built a temple to Asshur,[a] and hence perhaps its application by the Targums to the Resen of Gen. x. 12, which must have been on the Tigris, near Nineveh and Calah. [RESEN.] G. R.

**TE'LEM** (טֶלֶם [*oppression*]: Μαυδμ;[b] Alex. Τελεμ: *Telem*). One of the cities in the extreme south of Judah (Josh. xv. 24). It occurs between ZIPH (not the Ziph of David's escape) and BEALOTH: but has not been identified. The name *Dhullâm* is found in Van de Velde's map, attached to a district immediately to the north of the *Kubbet el-Baul*, south of *el-Milh* and *Ar'arah* — a position very suitable; but whether the coincidence of the name is merely accidental or not, is not at present ascertainable. Telem is identified by some with Telaim, which is found in the Hebrew text of 1 Sam. xv. 4; but there is nothing to say either for or against this.

The LXX. of 2 Sam. iii. 12, in both MSS., exhibits a singular variation from the Hebrew text. Instead of "on the spot" (תַּחְתָּיו), A. V. incorrectly, "on his behalf") they read "to Thailam (or Thelam) where he was." If this variation should be substantiated, there is some probability that Telem or Telaim is intended. David was at the time king, and quartered in Hebron, but there is no reason to suppose that he had relinquished his marauding habits; and the south country, where Telem lay, had formerly been a favorite field for his expeditions (1 Sam. xxvii. 8–11).

The Vat. LXX. in Josh. xix. 7, adds the name Θαλχά, between Remmon and Ether, to the towns of Simeon. This is said by Eusebius (*Onomast.*) and Jerome to have been then existing as a very large village called Thella, 16 miles south of Eleutheropolis. It is however claimed as equivalent to TOCHEN. G.

**TE'LEM** (טֶלֶם [*oppression*]: Τελμήρ; [Vat. Τελημ; FA] Alex. Τελλημ: *Telem*). A porter or doorkeeper of the Temple in the time of Ezra, who had married a foreign wife (Ezr. x. 24). He is probably the same as TALMON in Neh. xii. 25, the name being that of a family rather than of an individual. In 1 Esdr. ix. 25 he is called TOLBANES.

**TEL-HAR'SA, or TEL-HAR'ESHA** (תֵּל־חַרְשָׁא [see below]: Θελαρησά; [in Ezr., Vat. corrupt: in Neh., Vat. FA Αρησα, Alex. Θελαρσα:] *Thelharsa*) was one of the Babylonian towns, or villages, from which some Jews, who "could not show their father's house, nor their seed, whether they were of Israel," returned to Judæa with Zerubbabel (Ezr. ii. 59; Neh. vii. 61). Gesenius renders the term "Hill of the Wood" (*Lex.* ad voc.). It was probably in the low country near the sea, in the neighborhood of Tel-Melah and Cherub; but we cannot identify it with any known site. G. R.

**TEL-ME'LAH** (תֵּל־מֶלַח [*hill of salt*]: Θελμελέχ, Θελμελέθ; [Vat. in Ezr., Θερμελεθθα; Alex. Θελμεχελ, Θελμελεχ; FA. in Neh., Θερμελεθ:] *Thelmala*) is joined with Tel-Harsa and Cherub in the two passages already cited under TEL-HARSA. It is perhaps the Thelme of Ptolemy (v. 20), which some wrongly read as Theame (ΘΕΑΜΗ for ΘΕΛΜΗ), a city of the low salt tract near the Persian Gulf, whence probably the name, which means "Hill of Salt" (Gesen. *Lex. Heb.* sub voc.). Cherub, which may be pretty surely identified with Ptolemy's Chiripha (Χιριφά), was in the same region. G. R.

**TE'MA** (תֵּימָא [*on the right, south*]: Θαιμάν: *Thema*, [*terra Austri*]). The ninth son of Ishmael (Gen. xxv. 15; 1 Chr. i. 30); whence the tribe called after him, mentioned in Job vi. 19, "The troops of Tema looked, the companies of Sheba waited for them," and by Jeremiah (xxv. 23), "Dedan, Tema, and Buz;" and also the land occupied by this tribe: "The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanim. The inhabitants of the land of Tema brought water to him that was thirsty, they prevented with their bread him that fled" (Is. xxi. 13, 14).

The name is identified satisfactorily with *Teymâ*, تيماء, a small town on the confines of Syria, between it and *Wadi el-Kurâ*, on the road of the Damascus pilgrim-caravan (*Marâsid*, s. v.). It is in the neighborhood of *Doomat el-Jendel*, which agrees etymologically and by tradition with the Ishmaelite DUMAH, and the country of *Keydâr*, or KEDAR. *Teymâ* is a well-known town and district, and is appropriate in every point of view as the chief settlement of Ishmael's son Tema. It is commanded by the castle called *el-Ablak* (or *el-Ablak el-Fard*), of Es-Semâw-al (Samuel) Ibn-'Adiyà the Jew, a contemporary of Imrà el-Keys (A. D. 550 cir.); but according to a tradition it was built by Solomon, which points at any rate to its antiquity (comp. *el-Bekree*, in *Marâsid*, iv. 22); now in ruins, described as being built of rubble and crude bricks, and said to be named *el-Ablak* from having whiteness and redness in its structure

---

[a] It would signify simply "the Hill of Asshur." Compare Tel-ens, "the Hill of Ana," a name which seems to have been applied in later times to the city called by the Assyrians "Asshur," and marked by the ruins at *Kileh Shurghat* (Steph. Byz. ad voc. Τελάνη.)

[b] The passage is in such confusion in the Vatican MS., that it is difficult rightly to assign the words, and impossible to infer anything from the equivalents.

Digitized by Google

(*Mardsid*, s. v. *Ablak*). This fortress seems, like that of *Doomat el-Jendel*, to be one of the strongholds that must have protected the caravan route along the northern frontier of Arabia; and they recall the passage following the enumeration of the sons of Ishmael: "These [are] the sons of Ishmael, and these [are] their names, by their *towns*, and by their *castles*; twelve princes according to their nations" (Gen. xxv. 16).

*Teymá* signifies "a desert," "an untilled district," etc. Freytag (*s. v.*) writes the *name* without a long final *alif*, but not so the *Mardsid*.

Ptolemy (xix. 6) mentions θέμμη in Arabia Deserta, which may be the same place as the existing *Teymá*. The LXX. reading seems to have a reference to TEMAN, which see. E. S. P.

• "The troops of Tema," "the companies of Sheba" (Job vi. 19), elsewhere referred to as "predatory bands" [SHEBA], were, probably, companies of travellers, or caravans, crossing the wilderness in the dry season. Parched with thirst, they pressed forward with eager hope to the remembered beds of winter-streams, only to find that under the extreme heat the winding "brook" had disappeared — evaporated and absorbed in the sands — leaving its channel as dry as the contiguous desert. Their keen disappointment was a lively image of the experience of Job, when in his deep affliction he looked for sympathy from his brethren, and listened to censure instead of condolence. The simile, poetic and vivid, is scarcely less forcible in its broader application to the illusiveness of the fairest earthly promises and to the fading hopes of mortals. [DECEITFULLY, Amer. ed.; RIVER, 2.] S. W.

**TE'MAN** (תֵּימָן [*on the right hand, south*]: Θαιμάν: *Theman*). 1. A son of Eliphaz, son of Esau by Adah (Gen. xxxvi. 11; 1 Chr. i. 36, 53), afterwards named as a duke (phylarch) of Edom (ver. 15), and mentioned again in the separate list (vv. 40–43) of "the names of the rulers [that came] of Esau, according to their families, after their places, by their names;" ending, "these be the dukes of Edom, according to their habitations in the land of their possession: he [is] Esau the father of the Edomites."

2. [Rom. Vat. Θαμαν, Am. i. 12; FA. and Sin. Θεμαν, Jer. xlix. 7, Ob., Hab.: *Theman, auster, meridies.*] A country, and probably a city, named after the Edomite phylarch, or from which the phylarch took his name, as may be perhaps inferred from the verses of Gen. xxxvi. just quoted. The Hebrew signifies "south," etc. (see Job ix. 9; Is. xliii. 6; besides the use of it to mean the south side of the Tabernacle in Ex. xxvi. and xxvii., *etc.*); and it is probable that the land of Teman was a southern portion of the land of Edom, or, in a wider sense, that of the sons of the East, the Bene-kedem. Teman is mentioned in five places by the Prophets, in four of which it is connected with Edom, showing it to be the same place as that inclosed in the list of the dukes; twice it is named with Dedan.

"Concerning Edom, thus saith the Lord of hosts: [Is] wisdom no more in Teman? is counsel perished from the prudent? is their wisdom vanished? Flee ye, turn back, dwell deep, O inhabitants of Dedan" (Jer. xlix. 7, 8); and "I will make it [Edom] desolate from Teman; and they of Dedan shall fall by the sword" (Ez. xxv. 13). This connection with the great Keturahite tribe of Dedan gives additional importance to Teman, and helps to fix its geographical position. This is further defined by a passage in the chapter of Jer. already cited, vv. 20, 21, where it is said of Edom and Teman, "The earth is moved at the noise of their fall; at the cry the noise thereof was heard in the Red Sea (*yam Suf*)." In the sublime prayer of Habakkuk, it is written, "God came from Teman, and the Holy One from Mount Paran" (iii. 3). Jeremiah, it has been seen, speaks of the wisdom of Teman; and the prophecy of Obadiah implies the same (vv. 8, 9), "Shall I not in that day, saith the Lord, even destroy the wise (men) out of Edom, and understanding out of the mount of Esau? And thy [mighty] men, O Teman, shall be dismayed." In wisdom, the descendants of Esau, and especially the inhabitants of Teman, seem to have been preëminent among the sons of the East.

In common with most Edomite names, Teman appears to have been lost. The occupation of the country by the Nabathæans seems to have obliterated almost all of the traces (always obscure) of the migratory tribes of the desert. It is not likely that much can ever be done by modern research to clear up the early history of this part of the "east country." True, Eusebius and Jerome mention Teman as a town in their day distant 15 miles (according to Eusebius) from Petra, and a Roman post. The identification of the existing Maan (see Burckhardt) with this Teman may be geographically correct, but it cannot rest on etymological grounds.

The gentilic noun of Teman is הֵימָנִי (Job ii. 11; xxii. 1), and Eliphaz the Temanite was one of the wise men of Edom. The gen. n. occurs also in Gen. xxxvi. 34, where the land of Temani (so in the A. V.) is mentioned. E. S. P.

**TE'MANI.** [TEMAN.]

**TE'MANITE.** [TEMAN.]

**TEME'NI** (תֵּימָנִי [patr.]: Θαιμάν: *Themani*). Son of Ashur, the father of Tekoa, by his wife Naarah (1 Chr. iv. 6). [TEKOA.]

• **TEMPERANCE** (A. V. Acts xxiv. 25. Gal. v. 23; 2 Pet. i. 6) is the rendering of the Greek ἐγκράτεια, which signifies "self-control," the restraint of *all* the appetites and passions. "Temperate" is used in the A. V. in a corresponding sense. A.

**TEMPLE.**• There is perhaps no building of the ancient world which has excited so much attention since the time of its destruction as the Temple which Solomon built at Jerusalem, and its successor as rebuilt by Herod. Its spoils were considered worthy of forming the principal illustration of one of the most beautiful of Roman triumphal arches, and Justinian's highest architectural ambition was that he might surpass it. Throughout the Middle Ages it influenced to a considerable degree the forms of Christian churches,

• • In some of the topographical allusions in this article, the reader will recognise the author's peculiar and unsupported theory respecting the topography of Jerusalem, which we have examined in the article JERUSALEM (ii. 1230 ff., Amer. ed.), and which we pass without comment here, as not affecting his reasonings respecting this edifice — its history, its form, dimensions, style of architecture, etc. E. W.

and its peculiarities were the watchwords and rallying points of all associations of builders. Since the revival of learning in the 16th century its arrangements have employed the pens of numberless learned antiquarians, and architects of every country have wasted their science in trying to reproduce its forms.

But it is not only to Christians that the Temple of Solomon is so interesting; the whole Mohammedan world look to it as the foundation of all architectural knowledge, and the Jews still recall its glories and sigh over their loss with a constant tenacity, unmatched by that of any other people to any other building of the ancient world.

With all this interest and attention it might fairly be assumed that there was nothing more to be said on such a subject — that every source of information had been ransacked, and every form of restoration long ago exhausted, and some settlement of the disputed points arrived at which had been generally accepted. This is, however, far from being the case, and few things would be more curious than a collection of the various restorations that have been proposed, as showing what different meanings may be applied to the same set of simple architectural terms.

The most important work on this subject, and that which was principally followed by restorers in the 17th and 18th centuries, was that of the brothers Pradi, Spanish Jesuits, better known as Villalpandi. Their work was published in folio at Rome, 1596–1604, superbly illustrated. Their idea of Solomon's Temple was, that both in dimensions and arrangement it was very like the Escurial in Spain. But it is by no means clear whether the Escurial was being built while their book was in the press, in order to look like the Temple, or whether its authors took their idea of the Temple from the palace. At all events their design is so much the more beautiful and commodious of the two, that we cannot but regret that Herrera was not employed on the book, and the Jesuits set to build the palace.

When the French expedition to Egypt, in the first years of this century, had made the world familiar with the wonderful architectural remains of that country, every one jumped to the conclusion that Solomon's Temple must have been designed after an Egyptian model, forgetting entirely how hateful that land of bondage was to the Israelites, and how completely all the ordinances of their religion were opposed to the idolatries they had escaped from — forgetting, too, the centuries which had elapsed since the Exode before the Temple was erected, and how little communication of any sort there had been between the two countries in the interval.

The Assyrian discoveries of Botta and Layard have within the last twenty years given an entirely new direction to the researches of the restorers, and this time with a very considerable prospect of success, for the analogies are now true, and whatever can be brought to bear on the subject is in the right direction. The original seats of the progenitors of the Jewish races were in Mesopotamia. Their language was practically the same as that spoken on the banks of the Tigris. Their historical traditions were consentaneous, and, so far as we can judge, almost all the outward symbolism of their religions was the same, or nearly so. Unfortunately, however, no Assyrian temple has yet been exhumed of a nature to throw much light on this subject, and we are still forced to have recourse to the later buildings at Persepolis, or to general deductions from the style of the nearly contemporary secular buildings at Nineveh and elsewhere, for such illustrations as are available. These, however, nearly suffice for all that is required for Solomon's Temple. For the details of that erected by Herod we must look to Rome.

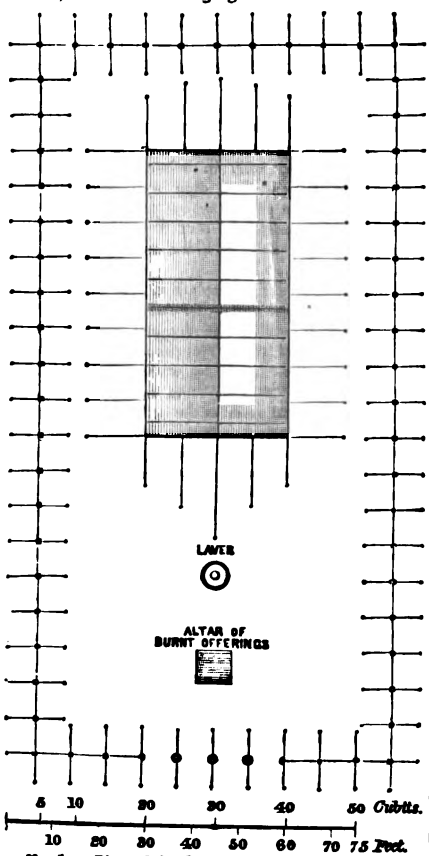
Of the intermediate Temple erected by Zerubbabel we know very little, but, from the circumstance of its having been erected under Persian influences contemporaneously with the buildings at Persepolis, it is perhaps the one of which it would be most easy to restore the details with anything like certainty.

Before proceeding, however, to investigate the arrangements of the Temple, it is indispensable first carefully to determine those of the Tabernacle which Moses caused to be erected in the Desert of Sinai immediately after the promulgation of the Law from that mountain. For, as we shall presently see, the Temple of Solomon was nothing more nor less than an exact repetition of that earlier Temple, differing only in being erected of more durable materials, and with exactly double the dimensions of its prototype, but still in every essential respect so identical that a knowledge of the one is indispensable in order to understand the other.

### Tabernacle.

The written authorities for the restoration of the Tabernacle are, first, the detailed account to be found in the 26th chapter of Exodus, and repeated in the 36th, verses 8 to 38, without any variation beyond the slightest possible abridgment. Secondly, the account given of the building by Josephus (*Ant.* iii. 6), which is so nearly a repetition of the account found in the Bible that we may feel assured that he had no really important authority before him except the one which is equally accessible to us. Indeed we might almost put his account on one side, if it were not that, being a Jew, and so much nearer the time, he may have had access to some traditional accounts which may have enabled him to realize its appearance more readily than we can do, and his knowledge of Hebrew technical terms may have enabled him to understand what we might otherwise be unable to explain.

The additional indications contained in the Talmud and in Philo are so few and indistinct, and are besides of such doubtful authenticity, that they practically add nothing to our knowledge, and may safely be disregarded.



For a complicated architectural building these written authorities probably would not suffice without some remains or other indications to supplement them; but the arrangements of the Tabernacle were so simple that they are really all that are required. Every important dimension was either 5 cubits or a multiple of 5 cubits, and all the arrangements in plan were either squares or double squares, so that there really is no difficulty in putting the whole together, and none would ever have occurred were it not that the dimensions of the sanctuary, as obtained from the "boards" that formed its walls, appear at first sight to be one thing, while those obtained from the dimensions of the curtains which covered it appear to give another, and no one has yet succeeded in reconciling these with one another or with the text of Scripture. The apparent discrepancy is, however easily explained, as we shall presently see, and never

would have occurred to any one who had lived long under canvas or was familiar with the exigencies of tent architecture.

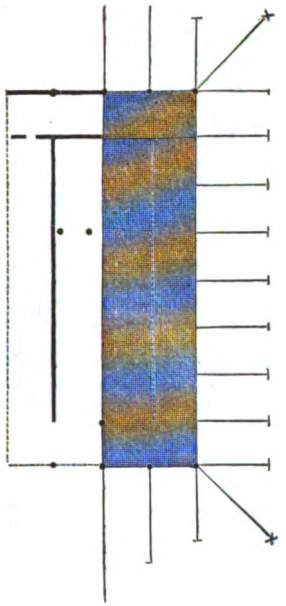
*Outer Inclosure.* — The court of the Tabernacle was surrounded by canvas screens — in the East called Kannauts — and still universally used to inclose the private apartments of important personages. Those of the Tabernacle were 5 cubits in height, and supported by pillars of brass 5 cubits apart, to which the curtains were attached by hooks and fillets of silver (Ex. xxvii. 9, &c.). This inclosure was only broken on the eastern side by the entrance, which was 20 cubits wide, and closed by curtains of fine twined linen wrought with needlework, and of the most gorgeous colors.

No. 1. — Plan of the Outer Court of the Tabernacle.

The space inclosed within these screens was a double square, 50 cubits, or 75 feet north [a] and south, and 100 cubits or 150 ft. east and west. In the outer or eastern half was placed the altar of burnt-offerings, described in Ex. xxvii. 1–8, and between it and the Tabernacle the laver (*Ant.* iii. 6, § 2), at which the priests washed their hands and feet on entering the Temple.

In the square towards the west was situated the Temple or Tabernacle itself. The dimensions in plan of this structure are easily ascertained. Josephus states them (*Ant.* iii. 6, § 3) as 30 cubits long by 10 broad, or 45 feet by 15, and the Bible is scarcely less distinct, as it says that the north and south walls were each composed of twenty upright boards (Ex. xxvi. 15, &c.), each board one cubit and a half in width, and at the west end there were six boards equal to 9 cubits, which, with the angle boards or posts, made up the 10 cubits of Josephus.

Each of these boards was furnished with two tenons at its lower extremity, which fitted into silver sockets placed on the ground. At the top at least they were jointed and fastened together by bars of shittim or acacia wood run through rings of gold (Ex. xxvi. 26). Both authorities agree that there were five bars for each side, but a little difficulty arises from the Bible describing (ver. 28) a middle bar which reached from end to end. As we shall presently see, this bar was probably applied to a totally different purpose, and we may therefore assume for the present that Josephus' description of the mode in which they were applied is the correct one: "Every one," he says (*Ant.* iii. 6, § 3), "of the pillars or boards had a ring of gold affixed to its front outwards, into which were inserted bars gilt with gold, each of them 5 cubits long, and these bound together the boards; the head of one bar running into another after the manner of one tenon inserted into another. But for the wall behind there was only one bar that went through all the boards, into which one of the ends of the bars on both sides was inserted."



So far, therefore, everything seems certain and easily understood. The Tabernacle was an oblong rectangular structure, 30 cubits long by 10 broad, open at the eastern end, and divided internally into two apartments. The Holy of Holies, into which no one entered — not even the priest, except on very extraordinary occasions — was a cube, 10 cubits square in plan, and 10 cubits high to the top of the wall. In this was placed the Mercy-seat, surmounted by the cherubim, and on it was placed the Ark, [b] containing the tables of the Law. In front of these was an outer chamber, called the Holy Place — 20 cubits long by 10 broad, and 10 high, appropriated to the use of the priests. In it

[a] The cubit used throughout this article is assumed to be the ordinary cubit, of the length of a man's forearm from the elbow-joint to the tip of the middle finger, or 18 Greek inches, equal to 18¼ English inches. There seems to be little doubt but that the Jews also used occasionally a shorter cubit of 5 handbreadths, or 15 inches, but only (in so far as can be ascertained) in speaking of vessels or of metal work, and never applied it to buildings. After the Babylonish Captivity they seem also occasionally to have employed the Babylonian cubit of 7 handbreadths, or 21 inches. This, however, can evidently have no application to the Tabernacle or Solomon's Temple, which was erected before the Captivity; nor can it be available to explain the peculiarities of Herod's Temple as Josephus, who is our principal authority regarding it, most certainly did always employ the Greek cubit of 18 inches, or 400 to 1 stadium of 600 Greek feet; and the Talmud, which is the only other authority, always gives the same number of cubits where we can be certain they are speaking of the same thing; so that we may feel perfectly sure they both were using the same measure. Thus, whatever other cubits the Jews may have used for other purposes, we may rest assured that for the buildings referred to in this article the cubit of 18 inches, and that only, was the one employed.

[b] * The Mercy-seat was on or over the Ark. A.

Digitized by Google

were placed the golden candlestick on one side, the table of shew-bread opposite, and between them in the centre the altar of incense.

No. 2. — The Tabernacle, showing one half ground plan and one half as covered by the curtains.

The roof of the Tabernacle was formed by 3, or rather 4, sets of curtains, the dimensions of two of which are given with great minuteness both in the Bible and by Josephus. The innermost (Ex. xxvi. 1, &c.), of fine twined linen according to our translation (Josephus calls them wool: ἔριον, *Ant.* iii. 6, § 4), were ten in number, each 4 cubits wide and 28 cubits long. These were of various colors, and ornamented with cherubim of "cunning work." Five of these were sewn together so as to form larger curtains, each 20 cubits by 28, and these two again were joined together, when used, by fifty gold buckles or clasps.

Above these were placed curtains of goats' hair each 4 cubits wide by 30 cubits long, but eleven in number; these were also sewn together, six into one curtain, and five into the other, and, when used, were likewise joined together by fifty gold buckles.

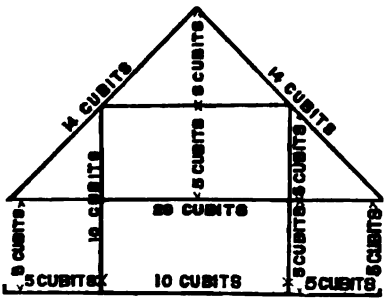
Over these again was thrown a curtain of rams' skins with the wool on, dyed red, and a fourth covering is also specified as being of badgers' skins, so named in the A. V., but which probably really consisted of seal-skins. [BADGER-SKINS, vol. i. p. 224 f.] This did not of course cover the rams' skins, but most probably was only used as a coping or ridge piece to protect the junction of the two curtains of rams' skins which were laid on each slope of the roof, and probably only laced together at the top.

The question which has hitherto proved a stumbling block to restorers is, to know how these curtains were applied as a covering to the Tabernacle. Strange to say, this has appeared so difficult that, with hardly an exception, they have been content to assume that they were thrown over its walls as a pall is thrown over a coffin, and they have thus cut the Gordian knot in defiance of all probabilities, as well as of the distinct specification of the Pentateuch. To this view of the matter there are several important objections.

First. If the inner or ornamental curtain was so used, only about one third of it would be seen; 9 cubits on each side would be entirely hidden between the walls of the Tabernacle and the goats'-hair curtain. It is true that Bähr (*Symbolik des Mosaischen Cultus*), Neumann (*Der Stiftshütte*, 1861), and others, try to avoid this difficulty by hanging this curtain so as to drape the walls inside; but for this there is not a shadow of authority, and the form of the curtain would be singularly awkward and unsuitable for this purpose. If such a thing were intended, it is evident that one curtain would have been used as wall-hangings and another as a ceiling, not one great range of curtains all joined the same way to hang the walls all round and form the ceiling at the same time.

A second and more cogent objection will strike any one who has ever lived in a tent. It is, that every drop of rain that fell on the Tabernacle would fall through; for, however tightly the curtains might be stretched, the water could never run over the edge, and the sheep-skins would only make the matter worse, as when wetted their weight would depress the centre, and probably tear any curtain that could be made, while snow lying on such a roof would certainly tear the curtains to pieces.

But a third and fatal objection is, that this arrangement is in direct contradiction to Scripture. We are there told (Ex. xxvi. 9) that half of one of the goats'-hair curtains shall be doubled back in front of the Tabernacle, and only the half of another (ver. 12) hang down behind; and (ver. 13) that one cubit shall hang down on each side — whereas this arrangement makes 10 cubits hang down all round, except in front.



The solution of the difficulty appears singularly obvious. It is simply, that the tent had a ridge, as all tents have had from the days of Moses down to the present day; and we have also very little difficulty in predicating that the angle formed by the two sides of the roof at the ridge was a right angle — not only because it is a reasonable and usual angle for such a roof, and one that would most likely be adopted in so regular a building, but because its adoption reduces to harmony the only abnormal measurement in the whole building. As mentioned above, the principal curtains were only 28 cubits in length, and consequently not a multiple of 5; but if we assume a right angle at the ridge, each side of the slope was 14 cubits, and $14^2 + 14^2 = 392$, and $20^2 = 400$, two numbers which are practically identical in tent-building. The base of the triangle, therefore, formed by the roof was 20 cubits, or in other words, the roof of the Tabernacle extended 5 cubits beyond the walls, not only in front and rear, but on both sides; and it may be added, that the width of the Tabernacle thus became identical with the width of the entrance to the enclosure; which but for this circumstance would appear to have been disproportionately large.

With these data it is easy to explain all the other difficulties which have met previous restorers.

First. The Holy of Holies was divided from the Holy Place by a screen of *four* pillars supporting curtains which no one was allowed to pass. But, strange to say, in the entrance there were *five* pil

Digitized by Google

ance in a similar space. Now, no one would put a pillar in the centre of an entrance without a motive; but the moment a ridge is assumed it becomes indispensable.

No. 3. — Diagram of the Dimensions of the Tabernacle in Section.

It may be assumed that all the five pillars were spaced within the limits of the 10 cubits of the breadth of the Tabernacle, namely, one in the centre, two opposite the two ends of the walls, and the other two between them; but the probabilities are so infinitely greater that those two last were beyond those at the angles of the tent, that it is hardly worth while considering the first hypothesis. By the one here adopted the pillars in front would, like everything else, be spaced exactly 5 cubits apart.

Secondly. Josephus twice asserts (*Ant.* iii. 6, § 4) that the Tabernacle was divided into three parts, though he specifies only two — the Adytum and the Pronaos. The third was of course the porch, 5 cubits deep, which stretched across the width of the house.

Thirdly. In speaking of the western end, the Bible always uses the plural, as if there were two sides there. There was, of course, at least one pillar in the centre beyond the wall, — there may have been five, — so that there practically were two sides there. It may also be remarked that the Pentateuch, in speaking (Ex. xxvi. 12) of this after part calls it *Mishcan*, or the dwelling, as contradistinguished from *Ohel*, or the tent, which applies to the whole structure covered by the curtains.

Fourthly. We now understand why there are 10 breadths in the under curtains, and 11 in the upper. It was that they might break joint — in other words, that the seam of the one, and especially the great joining of the two divisions, might be over the centre of the lower curtain, so as to prevent the rain penetrating through the joints. It may also be remarked that, as the two cubits which were in excess at the west hung at an angle, the depth of fringe would be practically about the same as on the sides.

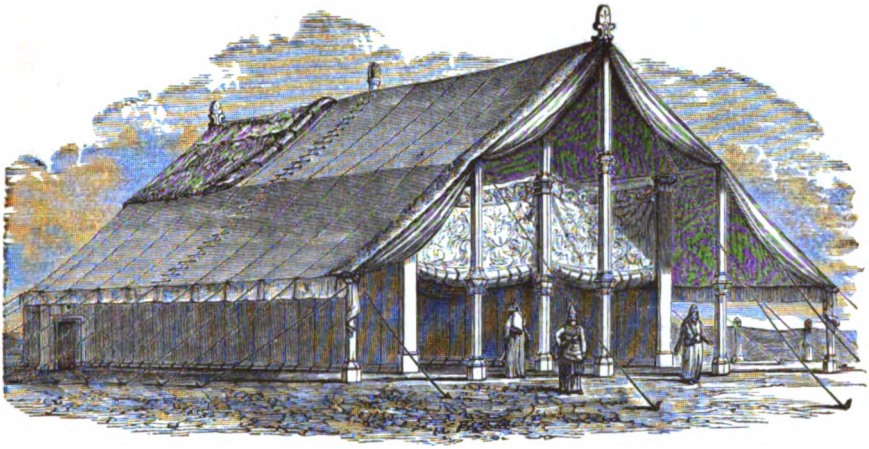
With these suggestions, the whole description in the Book of Exodus is so easily understood that it is not necessary to dilate further upon it; there are, however, two points which remain to be noticed, but more with reference to the Temple which succeeded it than with regard to the Tabernacle itself.

The first is the disposition of the side bars of shittim-wood that joined the boards together. At first sight it would appear that there were four short and one long bar on each side, but it seems impossible to see how these could be arranged to accord with the usual interpretation of the text, and very improbable that the Israelites would have carried about a bar 45 feet long, when 5 or 6 bars would have answered the purpose equally well, and 5 rows of bars are quite unnecessary, besides being in opposition to the words of the text.

The explanation hinted at above seems the most reasonable one — that the five bars named (vers. 26 and 27) were joined end to end, as Josephus asserts, and the bar mentioned (ver. 28) was the ridge-pole of the roof. The words of the Hebrew text will equally well bear the translation — "and the middle bar which is *between*," instead of "*in the midst of* the boards, shall reach from end to end." This would appear a perfectly reasonable solution but for the mechanical difficulty that no pole could be made stiff enough to bear its own weight and that of the curtains over an extent of 45 feet, without intermediate supports. A ridge-rope could easily be stretched to twice that distance, if required for the purpose, though it too would droop in the centre. A pole would be a much more appropriate and likely architectural arrangement — so much so, that it seems more than probable that one was employed with supports. One pillar in the centre where the curtains were joined would be amply sufficient for all practical purposes; and if the centre board at the back of the Holy of Holies was 15 cubits high (which there is nothing to contradict), the whole would be easily constructed. Still, as no internal supports are mentioned either by the Bible or Josephus, the question of how the ridge was formed and supported must remain an open one, incapable of proof with our present knowledge, but it is one to which we shall have to revert presently.

The other question is — were the sides of the Verandah which surrounded the Sanctuary closed or left open? The only hint we have that this was done, is the mention of the western *sides* always in the plural, and the employment of *Mishcan* and *Ohel* throughout this chapter, apparently in opposition to one another, *Mishcan* always seeming to apply to an inclosed space, which was or might be dwelt in, *Ohel* to the tent as a whole or to the covering only; though here again the point is by no means so clear as to be decisive.

The only really tangible reason for supposing the sides were inclosed is, that the Temple of Solomon was surrounded, on all sides but the front, by a range of small cells five cubits wide, in which the priests resided who were specially attached to the service of the Temple.



It would have been so easy to have done this in the Tabernacle, and its convenience — at night at least — so great, that I cannot help suspecting it was the case.

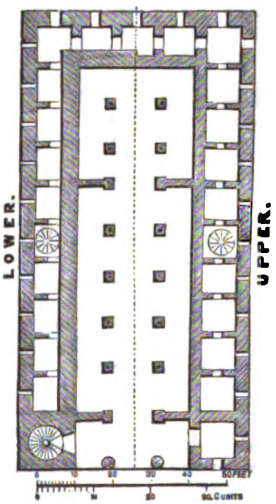
It is not easy to ascertain, with anything like certainty, at what distance from the tent the tent-pegs were fixed. It could not be less on the sides than 7 cubits, it may as probably have been 10. In front and rear the central peg could hardly have been at a less distance than 20 cubits; so that it is by no means improbable that from the front to rear the whole distance may have been 80 cubits, and from side to side 40 cubits, measured from peg to peg; and it is this dimension that seems to have governed the pegs of the inclosures, as it would just allow room for the fastenings of the inclosure on either side, and for the altar and laver in front. It is scarcely worth while, however, insisting strongly on these and some other minor points.

Enough has been said to explain with the woodcuts all the main points of the proposed restoration

Digitized by Google

and to show that it is possible to reconstruct the Tabernacle in strict conformity with every word and every indication of the sacred text, and at the same time to show that the Tabernacle was a reasonable tent-like structure, admirably adapted to the purposes to which it was applied.

No. 4. — Southeast View of the Tabernacle, as restored.



### Solomon's Temple.

The Tabernacle accompanied the Israelites in all their wanderings, and remained their only Holy Place or Temple till David obtained possession of Jerusalem, and erected an altar in the threshing-floor of Araunah, on the spot where the altar of the Temple always afterwards stood. He also brought the Ark out of Kirjath-jearim (2 Sam. vi. 2; 1 Chr. xiii. 6) and prepared a tabernacle for it in the new city which he called after his own name. Both these were brought up thence by Solomon (2 Chr. v. 5); the Ark placed in the Holy of Holies, but the Tabernacle seems to have been put on one side as a relic (1 Chr. xxiii. 32). We have no account, however, of the removal of the original Tabernacle of Moses from Gibeon, nor anything that would enable us to connect it with that one which Solomon removed out of the City of David (2 Chr. v. 5). In fact, from the time of the building of the Temple, we lose sight of the Tabernacle altogether. It was David who first proposed to replace the Tabernacle by a more permanent building, but was forbidden for the reasons assigned by the prophet Nathan (2 Sam. vii. 5, &c.), and though he collected materials and made arrangements, the execution of the task was left for his son Solomon.

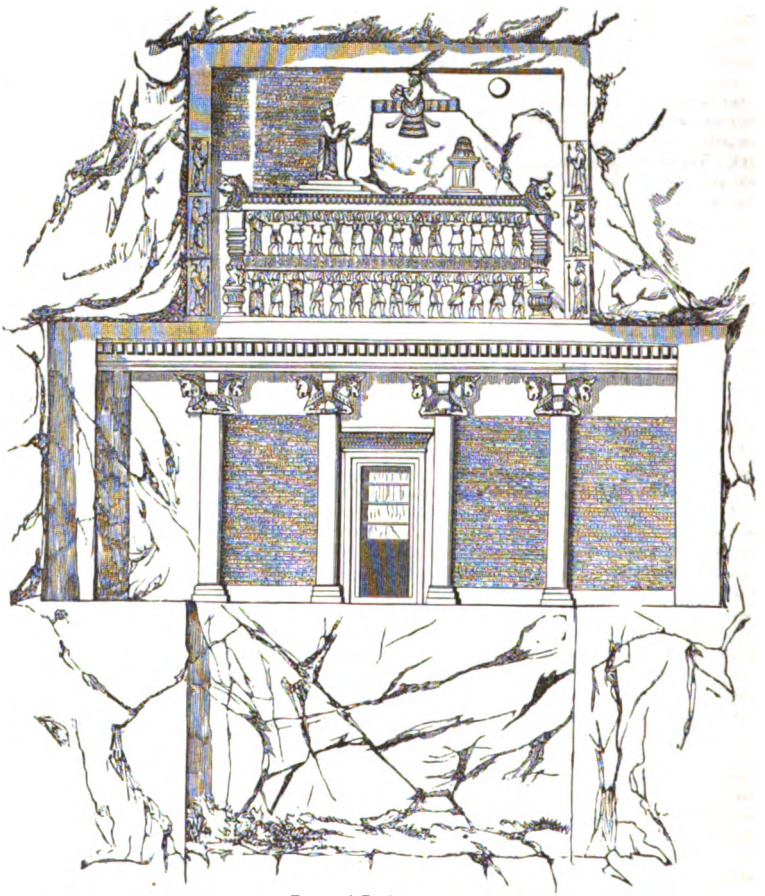
He, with the assistance of Hiram king of Tyre, commenced this great undertaking in the fourth year of his reign, and completed it in seven years, about 1005 B. C. according to the received chronology.

On comparing the Temple, as described in 1 Kings vi. and 2 Chronicles iii. and by Josephus viii. 3, with the Tabernacle, as just explained, the first thing that strikes us is that all the arrangements were identical, and the dimensions of every part were exactly double those of the preceding structure. Thus the Holy of Holies in the Tabernacle was a cube, 10 cubits each way; in the Temple it was 20 cubits. The Holy Place, or outer hall was 10 cubits wide by 20 long and 10 high in the Tabernacle. In the Temple all these dimensions were exactly double. The porch in the Tabernacle was 5 cubits deep, in the Temple 10; its width in both instances being the width of the house. The chambers round the House and the Tabernacle were each 5 cubits wide on the ground-floor, the difference being that in the Temple the two walls taken together made up a thickness of 5 cubits, thus making 10 cubits for the chambers.

Taking all these parts together, the ground-plan of the Temple measured 80 cubits by 40; that of the Tabernacle, as we have just seen, was 40 by 20; and what is more striking than even this is that though the walls were 10 cubits high in the one

No. 5. — Plan of Solomon's Temple, showing the position of the chambers in two stories.

and 20 cubits in the other, the whole height of the Tabernacle was 15, that of the Temple 30 cubits; the one roof rising 5, the other 10 cubits above the height of the internal walls.[a] So exact indeed is this



[a] In the Apocrypha there is a passage which bears curiously and distinctly on this subject. In Wisd is

coincidence, that it not only confirms to the fullest extent the restoration of the Tabernacle which has just been explained, but it is a singular confirmation of the minute accuracy which characterized the writers of the Pentateuch and the books of Kings and Chronicles in this matter; for not only are we able to check the one by the other at this distance of time with perfect certainty, but, now that we know the system on which they were constructed, we might almost restore both edifices from Josephus' account of the Temple as rebuilt by Herod, of which more hereafter.

The proof that the Temple, as built by Solomon, was only an enlarged copy of the Tabernacle, goes far also to change the form of another important question which has been long agitated by the students of Jewish antiquities, inasmuch as the inquiry as to whence the Jews derived the plan and design of the Temple must now be transferred to the earlier type, and the question thus stands, Whence did they derive the scheme of the Tabernacle?

From Egypt?

There is not a shadow of proof that the Egyptians ever used a movable or tent-like temple; neither the pictures in their temples nor any historical record

No. 6.—Tomb of Darius near Persepolis.

point to such a form, nor has any one hitherto ventured to suggest such an origin for that structure.

From Assyria?

Here too we are equally devoid of any authority or tangible data, for though the probabilities certainly are that the Jews would rather adopt a form from the kindred Assyrians than from the hated strangers whose land they had just left, we have nothing further to justify us in such an assumption.

From Arabia?

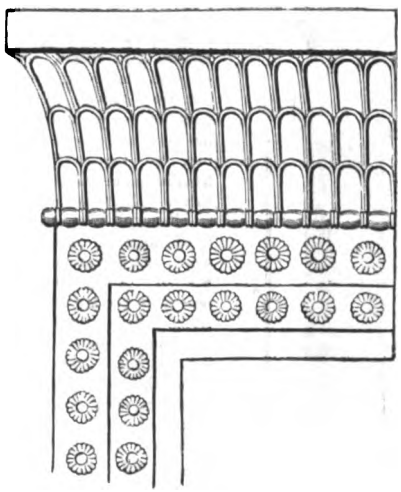
It is possible that the Arabs may have used movable tent-like temples. They were a people nearly allied in race with the Jews. Moses' father-in-law was an Arab, and something he may have seen there may have suggested the form he adopted. But beyond this we cannot at present go.[a]

---

2, it is said, "Thou hast commanded me (*i. e.* Solomon) to build a Temple in Thy Holy Mount, and an altar in the city wherein Thou dwellest, a resemblance of the Holy Tabernacle which Thou hast prepared from the beginning."

[a] The only thing resembling it we know of is the Holy Tent of the Carthaginians, mentioned by Diodorus Siculus, xx 65, which, in consequence of a

Digitized by Google



For the present, at least, it must suffice to know that the form of the Temple was copied from the Tabernacle, and that any architectural ornaments that may have been added were such as were usually employed at that time in Palestine, and more especially at Tyre, whence most of the artificers were obtained who assisted in its erection.

So far as the dimensions above quoted are concerned, everything is as clear and as certain as anything that can be predicated of any building of which no remains exist, but beyond this there are certain minor problems by no means so easy to resolve, but fortunately they are of much less importance. The first is the —

*Height.* — That given in 1 K. vi. 2 — of 30 cubits — is so reasonable in proportion to the other dimensions, that the matter might be allowed to rest there were it not for the assertion (2 Chr. iii. 4) that the height, though apparently only of the porch, was 120 cubits = 180 feet (as nearly as may be the height of the steeple of St. Martin's in the Fields). This is so unlike anything we know of in ancient architecture, that, having no counterpart in the Tabernacle, we might at first sight feel almost justified in rejecting it as a mistake or interpolation, but for the assertion (2 Chr. iii. 9) that Solomon overlaid the *upper chambers* with gold, and 2 K. xxiii. 12, where the altars on the top of the *upper chambers*, apparently of the Temple, are mentioned. In addition to this, both Josephus and the Talmud persistently assert that there was a superstructure on the Temple equal in height to the lower part, and the total height they, in accordance with the book of Chronicles, call 120 cubits or 180 feet (*Ant.* viii. 3, § 2). It is evident, however, that he obtains these dimensions first by doubling the height of the lower Temple, making it 60 instead of 30 cubits, and in like manner exaggerating every other dimension to make up this quantity. Were it not for these authorities, it would satisfy all the real exigencies of the case if we assumed that the upper chamber occupied the space between the roof of the Holy Place and the roof of the Temple. Ten cubits or 15 feet, even after deducting the thickness of the two roofs, is sufficient to constitute such an apartment as history would lead us to suppose existed there. But the evidence that there was something beyond this is so strong that it cannot be rejected.

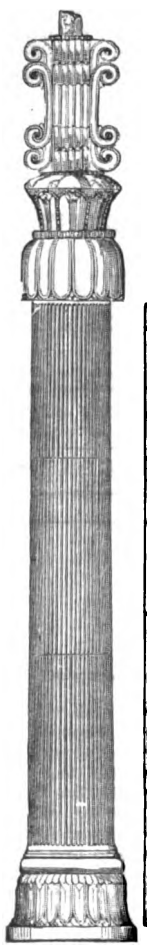
In looking through the monuments of antiquity for something to suggest what this might be, the only thing that occurs is the platform or Talar that existed on the roofs of the Palace Temples at Persepolis — as shown in Wood-cut No. 6, which represents the Tomb of Darius, and is an exact reproduction of the façade of the Palace shown in plan, Wood-cut No. 9. It is true these were erected five centuries after the building of Solomon's Temple; but they are avowedly copies in stone of older Assyrian forms, and as such may represent, with more or less exactness, contemporary buildings. Nothing in fact could represent more correctly "the altars on the top of the upper chambers" which Josiah beat down (2 K. xxiii. 12) than this, nor could anything more fully meet all the architectural or devotional exigencies of the case; but its height never could have been 60 cubits, or even 30, but it might very probably be the 20 cubits which incidentally Josephus (xv. 11, § 3) mentions as "sinking down in the failure of the foundations, but was so left till the days of Nero." There can be little doubt but that the part referred to in this paragraph was some such superstructure as that shown in the last wood-cut; and the incidental mention of 20 cubits is much more to be trusted than Josephus' heights generally are, which he seems systematically to have exaggerated when he was thinking about them.

*Jachin and Boaz.* — There are no features connected with the Temple of Solomon which have given rise to so much controversy, or been so difficult to explain, as the form of the two pillars of brass which were set up in the porch of the house. It has even been supposed that they were not pillars in the ordinary sense of the term, but obelisks; for this, however, there does not appear to be any authority. The porch was 30 feet in width, and a roof of that extent, even if composed of a wooden

No. 7. — Cornice of lily-work at Persepolis.

beam, would not only look painfully weak without some support, but be, in fact, almost impossible to construct with the imperfect science of these days. Another difficulty arises from the fact that the book of Chronicles nearly doubles the dimensions given in Kings; but this arises from the systematic reduplication of the height which misled Josephus; and if we assume the Temple to have been 60 cubits high, the height of the pillars, as given in the book of Chronicles, would be appropriate to support the roof of its porch, as those in Kings are the proper height for a temple 30 cubits high, which there is every reason to believe was the true dimension. According to 1 K. vii. 15 ff., the pillars were 18 cubits high and 12 in circumference, with capitals five cubits in height. Above this was (ver. 19) another member, called also chapiter of lily-work, four cubits in height, but which from

sudden change of wind at night blowing the flames from which victims were being sacrificed, towards the lights over-spread, took fire, a circumstance which spread such consternation throughout the army as to lead to its destruction.



The Carthaginians were a Shemitic people, and seem to have carried their Holy Tent about with their armies, and to have performed sacrifices in front of it precisely as was done by the Jews, excepting, of course, the nature of the victims.

Digitized by Google

the second mention of it in ver. 22 seems more probably to have been an entablature, which is necessary to complete the order. As these members make out 27 cubits, leaving 3 cubits or 4½ feet for the slope of the roof, the whole design seems reasonable and proper.

If this conjecture is correct, we have no great difficulty in suggesting that the lily-work must have been something like the Persepolitan cornice (Wood-cut No. 7), which is probably nearer in style to that of the buildings at Jerusalem than anything else we know of.

It seems almost in vain to try and speculate on what was the exact form of the decoration of these celebrated pillars. The nets of checker-work and wreaths of chain-work, and the pomegranates, etc., are all features applicable to metal architecture; and though we know that the old Tartar races did use metal architecture everywhere, and especially in bronze, from the very nature of the material every specimen has perished, and we have now no representations from which we can restore them. The styles we are familiar with were all derived more or less from wood, or from stone with wooden ornaments repeated in the harder material. Even at Persepolis, though we may feel certain that everything we see there had a wooden prototype, and may suspect that much of their wooden ornamentation was derived from the earlier metal forms, still it is so far removed from the original source that in the present state of our knowledge, it is dangerous to insist too closely on any point. Notwithstanding this, the pillars at Persepolis, of which Wood-cut No. 8 is a type, are probably more like Jachin and Boaz than any other pillars which have reached us from antiquity, and give a better idea of the immense capitals of these columns than we obtain from any other examples; but being in stone, they are far more simple and less ornamental than they would have been in wood, and infinitely less so than their metal prototypes.

No. 8. — Pillar of Northern Portico at Persepolis.

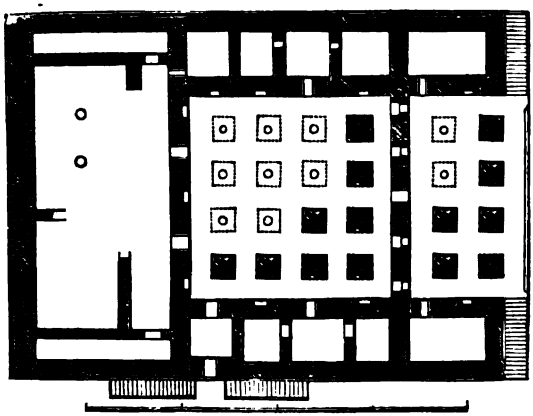
*Internal Supports.* — The existence of these two pillars in the porch suggests an inquiry which has hitherto been entirely overlooked: Were there any pillars in the interior of the Temple? Considering that the clear space of the roof was 20 cubits, or 30 feet, it may safely be asserted that no cedar beam could be laid across this without sinking in the centre by its own weight, unless trussed or supported from below. There is no reason whatever to suppose that the Tyrians in those days were acquainted with the scientific forms of carpentry implied in the first suggestion, and there is no reason why they should have resorted to them even if they knew how; as it cannot be doubted but that architecturally the introduction of pillars in the interior would have increased the apparent size and improved the artistic effect of the building to a very considerable degree.

If they were introduced at all, there must have been four in the sanctuary and ten in the hall, not necessarily equally spaced, in a transverse direction, but probably standing 6 cubits from the walls, leaving a centre aisle of 8 cubits.

The only building at Jerusalem whose construction throws any light on this subject is the House of the Forest of Lebanon. [PALACE.] There the pillars were an inconvenience, as the purposes of the hall were state and festivity; but though the pillars in the palace had nothing to support above the roof, they were spaced probably 10, certainly not more than 12½, cubits apart. If Solomon had been able to roof a clear space of 20 cubits, he certainly would not have neglected to do it there.

At Persepolis there is a small building, called the Palace or Temple of Darius (Wood-cut No. 9), which more closely resembles the Jewish Temple than any other building we are acquainted with. It has a porch, a central hall, an adytum — the plan of which cannot now be made out — and a range of small chambers on either side. The principal difference is that it has four pillars in its porch instead of two, and consequently four rows in its interior hall instead of half that number, as suggested above. All the buildings at Persepolis have their floors equally crowded with pillars, and, as there is no doubt but that they borrowed this peculiarity from Nineveh, there seems no *à priori* reason why Solomon should not have adopted this expedient to get over what otherwise would seem an insuperable constructive difficulty.

The question, in fact, is very much the same that met us in discussing the construction of the Tabernacle. No internal supports to the roofs of either of these buildings are mentioned anywhere. But the difficulties of construction without them would have been so enormous, and their introduction so usual and so entirely unobjectionable, that we can hardly understand their not being employed. Either building was possible without them, but certainly neither in the least degree probable.



It may perhaps add something to the probability of their arrangement to mention that the ten bases for the lavers which Solomon made would stand one within each inter-column on either hand, where they would be beautiful and appropriate ornaments. Without some such accentuation of the space, it seems difficult to understand what they were, and why ten.

*Chambers.* — The only other feature which remains to be noticed is the application of three tiers of small chambers to the walls of the Temple externally on all sides, except that of the entrance. Though not expressly so stated, these were a sort of monastery, appropriated to the residence of the priests who were either permanently or in turn devoted to the service of the Temple. The lowest story was only 5 cubits in width, the next 6, and

Digitized by Google

the upper 7, allowing an offset of 1 cubit on the side of the Temple, or of 9 inches on each side, on which the flooring joists rested, so as not to cut into the walls of the Temple. Assuming the wall of the Temple at the level of the upper chambers to have been 2 cubits thick, and the outer wall one, — it could not well have been less, — this would exactly make up the duplication of the dimension found as before mentioned for the verandah of the Tabernacle.

It is, again, only at Persepolis that we find anything at all analogous to this; but in the plan last quoted as that of the Palace of Darius, we find a similar range on either hand. The palace of Xerxes possesses this feature also; but in the great hall there, and its counterpart at Susa, the place of these chambers is supplanted by lateral porticoes outside the walls that surrounded the central phalanx of pillars. Unfortunately our knowledge of Assyrian temple architecture is too limited to enable us to say whether this feature was common elsewhere, and though something very like it occurs

No. 9. — Palace of Darius at Persepolis. Scale of 50 feet to 1 inch.

in Buddhist Viharas in India, these latter are comparatively so modern that their disposition hardly bears on the inquiry.

*Outer Court.* — The inclosure of the Temple consisted, according to the Bible (1 K. vi. 36), of a low wall of three courses of stones and a row of cedar beams, both probably highly ornamented. As it is more than probable that the same duplication of dimensions took place in this as in all the other features of the Tabernacle, we may safely assume that it was 10 cubits, or 15 feet, in height, and almost certainly 100 cubits north and south, and 200 east and west.

There is no mention in the Bible of any portioes or gateways or any architectural ornaments of his inclosure, for though names which were afterwards transferred to the gates of the Temple do occur in 1 Chr. ix., xxiv., and xxvi., this was before the Temple itself was built; and although Josephus does mention such, it must be recollected that he was writing five centuries after its total destruction, and he was too apt to confound the past and the present in his descriptions of buildings which did not then exist. There was an eastern porch to Herod's Temple, which was called Solomon's Porch, and Josephus tells us that it was built by that monarch: but of this there is absolutely no proof, and as neither in the account of Solomon's building nor in any subsequent repairs or incidents is any mention made of such buildings, we may safely conclude that they did not exist before the time of the great rebuilding immediately preceding the Christian era.

### Temple of Zerubbabel.

We have very few particulars regarding the Temple which the Jews erected after their return from the Captivity (cir. 520 B. C.), and no description that would enable us to realize its appearance. But there are some dimensions given in the Bible and elsewhere which are extremely interesting as affording points of comparison between it and the temples which preceded it, or were erected after it.

The first and most authentic are those given in the book of Ezra (vi. 3), when quoting the decree of Cyrus, wherein it is said, "Let the house be builded, the place where they offered sacrifices, and let the foundations thereof be strongly laid; the height thereof threescore cubits, and the breadth thereof threescore cubits, with three rows of great stones and a row of new timber." Josephus quotes this passage almost literally (xi. 4, § 6), but in doing so enables us with certainty to translate the word here called *row* as "story" (δόμος) — as indeed the sense would lead us to infer — for it could only apply to the three stories of chambers that surrounded Solomon's, and afterwards Herod's Temple, and with this again we come to the wooden Talar which surmounted the Temple and formed a fourth story. It may be remarked in passing, that this dimension of 60 cubits in height accords perfectly with the words which Josephus puts into the mouth of Herod (xv. 11, § 1) when he makes him say that the Temple built after the Captivity wanted 60 cubits of the height of that of Solomon. For as he had adopted, as we have seen above, the height of 120 cubits, as written in the Chronicles, for that Temple, this one remained only 60.

The other dimension of 60 cubits in breadth is 20 cubits in excess of that of Solomon's Temple, but there is no reason to doubt its correctness, for we find both from Josephus and the Talmud that it was the dimension adopted for the Temple when rebuilt, or rather repaired, by Herod. At the same time we have no authority for assuming that any increase was made in the dimensions of either the Holy Place or the Holy of Holies, since we find that these were retained in Ezekiel's description of an ideal Temple — and were afterwards those of Herod's. And as this Temple of Zerubbabel was still standing in Herod's time, and was more strictly speaking repaired than rebuilt by him, we cannot conceive that any of its dimensions were then diminished. We are left therefore with the alternative of assuming that the porch and the chambers all round were 20 cubits in width, including the thickness of the walls, instead of 10 cubits, as in the earlier building. This may perhaps to some extent be accounted for by the introduction of a passage between the Temple and the rooms of the priest's lodgings instead of each being a thorough-

Digitized by Google

fare, as must certainly have been the case in Solomon's Temple.

This alteration in the width of the Pteromata made the Temple 100 cubits in length by 60 in breadth, with a height, it is said, of 60 cubits, including the upper room or Talar, though we cannot help suspecting that this last dimension is somewhat in excess of the truth.[a]

The only other description of this Temple is found in Hecatæus the Abderite, who wrote shortly after the death of Alexander the Great. As quoted by Josephus (*cont. Ap.* i. 22), he says, that "In Jerusalem towards the middle of the city is a stone walled inclosure about 500 feet in length (ὡς πενταπλέθρος), and 100 cubits in width, with double gates," in which he describes the Temple as being situated.

The last dimension is exactly what we obtained above by doubling the width of the Tabernacle inclosure as applied to Solomon's Temple, and may therefore be accepted as tolerably certain, but the 500 feet in length exceeds anything we have yet reached by 200 feet. It may be that at this age it was found necessary to add a court for the women or the Gentiles, a sort of Narthex or Galilee for those who could not enter the Temple. If this or these together were 100 cubits square, it would make up the "nearly 5 plethra" of our author. Hecatæus also mentions that the altar was 20 cubits square and 10 high. And although he mentions the Temple itself, he unfortunately does not supply us with any dimensions.

From these dimensions we gather, that if "the Priests and Levites and Elders of families were disconsolate at seeing how much more sumptuous the old Temple was than the one which on account of their poverty they had just been able to erect" (Ezr. iii. 12; Joseph. *Ant.* xi. 4, § 2), it certainly was not because it was smaller, as almost every dimension had been increased one third; but it may have been that the carving and the gold, and other ornaments of Solomon's Temple far surpassed this, and the pillars of the portico and the veils may all have been far more splendid, so also probably were the vessels; and all this is what a Jew would mourn over far more than mere architectural splendor. In speaking of these temples we must always bear in mind that their dimensions were practically very far inferior to those of the heathen. Even that of Ezra a not larger than an average parish church of the ast century — Solomon's was smaller. It was the lavish display of the precious metals, the elaboration of carved ornament, and the beauty of the textile fabrics, which made up their splendor and rendered them so precious in the eyes of the people, and there can consequently be no greater mistake than to judge of them by the number of cubits they measured. They were temples of a Shemitic, not of a Celtic people.

### Temple of Ezekiel.

The vision of a Temple which the prophet Ezekiel saw while residing on the banks of the Chebar in Babylonia in the 25th year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a Temple that ever was built or ever could be erected at Jerusalem, and can consequently only be considered as the *beau ideal* of what a Shemitic temple ought to be. As such it would certainly be interesting if it could be correctly restored, but unfortunately the difficulties of making out a complicated plan from a mere verbal description are very great indeed, and are enhanced in this instance by our imperfect knowledge of the exact meaning of the Hebrew architectural terms, and it may also be from the prophet describing not what he actually knew, but only what he saw in a vision.

Be this as it may, we find that the Temple itself was of the exact dimensions of that built by Solomon, namely, an adytum (Ez. xl. 1–4), 20 cubits square, a naos, 20×40, and surrounded by cells of 10 cubits' width including the thickness of the walls, the whole, with the porch, making up 40 cubits by 80, or very little more than one four-thousandth part of the whole area of the Temple: the height unfortunately is not given. Beyond this were various courts and residences for the priests, and places for sacrifice and other ceremonies of the Temple, till he comes to the outer court, which measured 500 reeds on each of its sides; each reed (Ez. xl. 5) was 6 Babylonian cubits long, namely, of cubits each of one ordinary cubit and a handbreadth, or 21 inches. The reed was therefore 10 feet 6 inches, and the side consequently 5,250 Greek feet, or within a few feet of an English mile, considerably more than the whole area of the city of Jerusalem, Temple included!

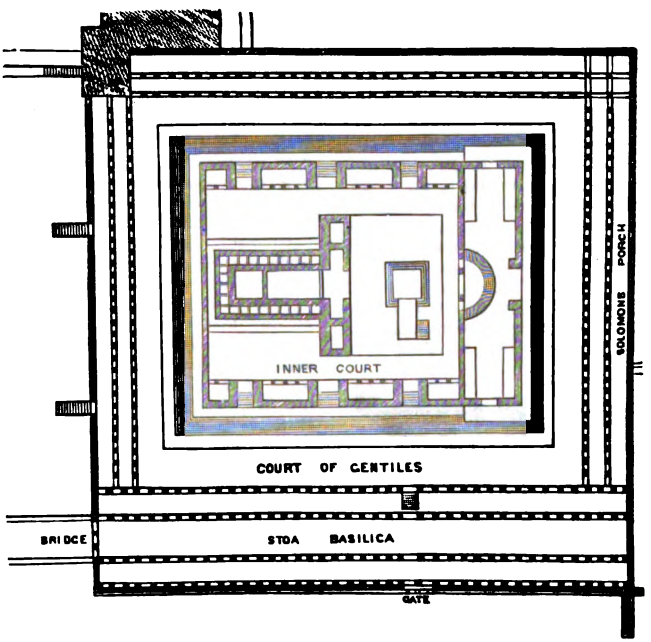
It has been attempted to get over this difficulty by saying that the prophet meant cubits, not reeds; but this is quite untenable. Nothing can be more clear than the specification of the length of the reed, and nothing more careful than the mode in which reeds are distinguished from cubits throughout; as for instance in the two next verses (6 and 7) where a chamber and a gateway are mentioned, each of one reed. If cubit were substituted, it would be nonsense.

Notwithstanding its ideal character, the whole is extremely curious, as showing what were the aspirations of the Jews in this direction, and how different they were from those of other nations; and it is interesting here, inasmuch as there can be little doubt but that the arrangements of Herod's Temple were in a great measure influenced by the description here given. The outer court, for instance, with its porticoes measuring 400 cubits each way, is an exact counterpart on a smaller scale of the outer court of Ezekiel's Temple, and is not found in either Solomon's or Zerubbabel's; and so too, evidently, are several of the internal arrangements.

### Temple of Herod.

For our knowledge of the last and greatest of the Jewish Temples we are indebted almost wholly to the works of Josephus, with an occasional hint from the Talmud.

The Bible unfortunately contains nothing to assist the researches of the antiquary in this respect. With true Shemitish indifference to such objects, the writers of the New Testament do not furnish



---

[a] In recounting the events narrated by Ezra (x. 9), Josephus says (*Ant.* xi. 5, § 4) that the assembly there referred to took place in the upper room, ἐν τῷ ὑπερῴῳ τοῦ ἱεροῦ, which would be a very curious illustration of the use of that apartment if it could be depended upon, but both the Hebrew and LXX. are so clear that it was in the "street," or "place" of the Temple, that we cannot base any argument upon it, though it is curious as indicating what was passing in the mind of Josephus.

Digitized by Google

a single hint which would enable us to ascertain either what the situation or the dimensions of the Temple were, nor any characteristic feature of its architecture. But Josephus knew the spot personally, and his horizontal dimensions are so minutely accurate that we almost suspect he had before his eyes, when writing, some ground-plan of the building prepared in the quartermaster-general's department of Titus's army. They form a strange contrast with his dimensions in height, which, with scarcely an exception, can be shown to be exaggerated, generally doubled. As the buildings were all thrown down during the siege, it was impossible to convict him of error in respect to elevations, but as regards plan he seems always to have had a wholesome dread of the knowledge of those among whom he was living and writing.

The Temple or naos itself was in dimensions and arrangement very similar to that of Solomon, or rather that of Zerubbabel — more like the latter; but this was surrounded by an inner inclosure of great strength and magnificence, measuring as nearly as can be made out 180 cubits by 240, and adorned by porches and ten gateways of great magnificence; and beyond this again was an outer inclosure measuring externally 400 cubits each way, which was adorned with porticoes of greater splendor than any we know of attached to any temple of the ancient world: all showing how strongly Roman influence was at work in enveloping with heathen magnificence the simple templar arrangements of a Shemitic people, which, however, remained nearly unchanged amidst all this external incrustation.

No. 10. — Temple of Herod restored Scale of 200 feet to 1 inch.

It has already been pointed out [JERUSALEM, vol. ii. pp. 1313–14] that the Temple was certainly situated in the S. W. angle of the area now known as the Haram area at Jerusalem, and it is hardly necessary to repeat here the arguments there adduced to prove that its dimensions were what Josephus states them to be, 400 cubits, or one stadium, each way.

At the time when Herod rebuilt it he inclosed a space "twice as large" as that before occupied by the Temple and its courts (*B. J.* i. 21, § 1), an expression that probably must not be taken too literally, at least if we are to depend on the measurements of Hecataeus. According to them the whole area of Herod's Temple was between four and five times greater than that which preceded it. What Herod did apparently was to take in the whole space between the Temple and the city wall on its eastern side, and to add a considerable space on the north and south to support the porticoes which he added there.* [See PALESTINE, vol. iii p. 2303, note, Amer. ed.]

* Since the writer's note at the commencement of this article was sent to press, the report of Lieut. Warren's latest excavations about the south wall of the Haram area has come to hand, containing, he thinks, "as much information with regard to this portion of the Haram Wall, as we are likely to be able to obtain." His conclusions are adverse to the theory given above. Of this massive wall, he thinks that the 600 feet east of the Double Gate is of a different construction from the 300 feet west of it, and more ancient. It is built up with beveled stones from the rock, and on some of the stones at the S. E. angle were found signs and characters (supposed to be Phœnician) which had been cut before the stones were laid (*Pal. Expl. Fund*, Warren's Letters, XLV.). Rejecting Mr. Fergusson's theory, that the S. W. angle of the area was the site of the Temple, Lieut. Warren is undecided between three points, which present. he

Digitized by Google

As the Temple terrace thus became the principal defense of the city on the east side, there were no gates or openings in that direction,[a] and being situated on a sort of rocky brow — as evidenced from its appearance in the vaults that bound it on this side — it was at all future times considered unattackable from the eastward. The north side, too, where not covered by the fortress Antonia, became part of the defenses of the city, and was likewise without external gates. But it may also have been that, as the tombs of the kings, and indeed the general cemetery of Jerusalem, were situated immediately to the northward of the Temple, there was some religious feeling in preventing too ready access from the Temple to the burying-places (Ez. xliii. 7–9).

On the south side, which was inclosed by the wall of Ophel, there were double gates nearly in the centre (*Ant.* xv. 11, § 5). These gates still exist at a distance of about 365 feet from the southwestern angle, and are perhaps the only architectural features of the Temple of Herod which remain *in situ*. This entrance consists of a double archway of Cyclopean architecture on the level of the ground, opening into a square vestibule measuring 40 feet each way. In the centre of this is a pillar crowned by a capital of the Greek — rather than Roman — Corinthian order (Wood-cut No. 11); the acanthus alternating with the water-leaf, as in the Tower of the Winds at Athens, and other Greek examples, but which was an arrangement abandoned by the Romans as early as the time of Augustus, and never afterwards employed.[b] From this pillar spring four flat segmental arches, and the space between these is roofed by flat

No 11 — Capital of Pillar in Vestibule of southern entrance.

domes, constructed apparently on the horizontal principle. The walls of this vestibule are of the same beveled masonry as the exterior; but either at the time of erection or subsequently, the projections seem to have been chiseled off in some parts so as to form pilasters. From this a double tunnel, nearly 200 feet in length, leads to a flight of steps which rise to the surface in the court of the Temple, exactly at that gateway of the inner Temple which led to the altar, and is the one of the four gateways on this side by which any one arriving from Ophel would naturally wish to enter the inner inclosure. It seems to have been this necessity that led to the external gateway being placed a little more to the eastward than the exact centre of the inclosure, where naturally we should otherwise have looked for it.

We learn from the Talmud (*Mid.* ii. 6), that the gate of the inner Temple to which this passage led was called the "Water Gate;" and it is interesting to be able to identify a spot so prominent in the description of Nehemiah (xii. 37). The Water Gate is more often mentioned in the mediæval references to the Temple than any other, especially by Mohammedan authors, though by them frequently confounded with the outer gate at the other end of this passage.

Towards the westward there were four gateways to the external inclosure of the Temple (*Ant.* xv 11, § 5), and the positions of three of these can still be traced with certainty. The first or most southern led over the bridge the remains of which were identified by Dr. Robinson (of which a view is given in art. JERUSALEM, vol. ii. p. 1313), and joined the Stoa Basilica of the Temple with the royal palace (*Ant. ibid.*). The second was that discovered by Dr. Barclay, 270 feet from the S. W. angle, at a level of 17 feet below that of the southern gates just described. The site of the third is so completely covered by the buildings of the Meckmé that it has not yet been seen, but it will be found between 200 and 250 feet from the N. W. angle of the Temple area; for, owing to the greater width of the southern portico beyond that on the northern, the Temple itself was not in the centre of its inclosure, but situated more towards the north. The fourth was that which led over the causeway which still exists at a distance of 600 feet from the southwestern angle.

In the time of Solomon, and until the area was enlarged by Herod, the ascent from the western valley to the Temple seems to have been by an external flight of stairs (Neh. xii. 37; 1 K. x. 5, &c.), similar to those at Persepolis, and like them probably placed laterally so as to form a part of the architectural design. When, however, the Temple came to be fortified "modo arcis" (Tacit. *H.* v. 12), the causeway and the bridge were established to afford communication with the upper city, and the two intermediate lower entrances to lead to the lower city, or, as it was originally called, "the city of David."

*Cloisters.* — The most magnificent part of the Temple, in an architectural point of view, seems certainly to have been the cloisters which were added to the outer court when it was enlarged by Herod. It is not quite clear if there was not an eastern porch before this time, and if so, it may

---

thinks, about equal claims — namely, the present Dome of the Rock platform, a space east of it reaching to the east wall, and the S. E. angle of the area. Further examination and evidence will be necessary, to shake the traditional belief in the first-named site. S. W.

[a] The Talmud, it is true, does mention a gate as existing in the eastern wall, but its testimony on this point is so unsatisfactory and in such direct opposition to Josephus and the probabilities of the case, that it may safely be disregarded.

[b] Owing to the darkness of the place, blocked up as it now is, and the ruined state of the capital, it is not easy to get a correct delineation of it. This is to be regretted, as a considerable controversy has arisen as to its exact character. It may therefore be interesting to mention that the drawing made by the architectural draughtsman who accompanied M. Renan in his late scientific expedition to Syria confirms to the fullest extent the character of the architecture, as shown in the view given above from Mr. Arundale's drawing.

Digitized by Google

have been nearly on the site of that subsequently erected; but on the three other sides the Temple area was so extended at the last rebuilding that there can be no doubt but that from the very foundations the terrace walls and cloisters belonged wholly to the last period.

The cloisters in the west, north, and east side were composed of double rows of Corinthian columns, 25 cubits or 37 feet 6 inches in height (*B. J.* v. 5, § 2), with flat roofs, and resting against the outer wall of the Temple. These, however, were immeasurably surpassed in magnificence by the royal porch or Stoa Basilica which overhung the southern wall. This is so minutely described by Josephus (*Ant.* xv. 11, § 5) that there is no difficulty in understanding its arrangement or ascertaining its dimensions. It consisted (in the language of Gothic architecture) of a nave and two aisles, that towards the Temple being open, that towards the country closed by a wall. The breadth of the centre aisle was 45 feet; of the side aisles 30 from centre to centre of the pillars; their height 50 feet, and that of the centre aisle 100 feet. Its section was thus something in excess of that of York Cathedral, while its total length was one stadium or 600 Greek feet, or 100 feet in excess of York, or our largest Gothic cathedrals. This magnificent structure was supported by 162 Corinthian columns, arranged in four rows, forty in each row — the two odd pillars forming apparently a screen at the end of the bridge leading to the palace, whose axis was coincident with that of the Stoa, which thus formed the principal entrance from the city and palace to the Temple.

At a short distance from the front of these cloisters was a marble screen or inclosure, 3 cubits in height, beautifully ornamented with carving, but bearing inscriptions in Greek and Roman characters forbidding any Gentile to pass within its boundaries. Again, at a short distance within this was a flight of steps supporting the terrace or platform on which the Temple itself stood. According to Josephus (*B. J.* v. 5, § 2) this terrace was 15 cubits or 22½ feet high, and was approached first by fourteen steps, each we may assume about one foot in height, at the top of which was a berm or platform, 10 cubits wide, called the Chel; and there were again in the depth of the gateways five or six steps more leading to the inner court of the Temple, thus making 20 or 21 steps in the whole height of 22½ feet. To the eastward, where the court of the women was situated, this arrangement was reversed; five steps led to the Chel, and fifteen from that to the court of the Temple.

The court of the Temple, as mentioned above, was very nearly a square. It may have been exactly so, for we have not all the details to enable us to feel quite certain about it. The *Middoth* says it was 187 cubits E. and W., and 137 N. and S. (ii. 6). But on the two last sides there were the gateways with their exhedræ and chambers, which may have made up 25 cubits each way, though, with such measurements as we have, it appears they were something less.

To the eastward of this was the court of the women, the dimensions of which are not given by Josephus, but are in the *Middoth*, as 137 cubits square — a dimension we may safely reject, first, from the extreme improbability of the Jews allotting to the women a space more than ten times greater than that allotted to the men of Israel or to the Levites, whose courts, according to the same authority, were respectively 137 by 11 cubits; but, more than this, from the impossibility of finding room for such a court while adhering to the other dimensions given.[a] If we assume that the inclosure of the court of the Gentiles, or the Chel, was nearly equidistant on all four sides from the cloisters, its dimension must have been about 37 or 40 cubits east and west, most probably the former.

The great ornament of these inner courts seems to have been their gateways, the three especially on the north and south leading to the Temple court. These, according to Josephus, were of great height, strongly fortified and ornamented with great elaboration. But the wonder of all was the great eastern gate leading from the court of the women to the upper court. This seems to have been the pride of the Temple area — covered with carving, richly gilt, having apartments over it (*Ant.* xv. 11, § 7), more like the Gopura[b] of an Indian temple than anything else we are acquainted with in architecture. It was also in all probability the one called the "Beautiful Gate" in the New Testament.

Immediately within this gateway stood the altar of burnt-offerings, according to Josephus (*B. J.* v. 5, § 6), 50 cubits square and 15 cubits high, with an ascent to it by an inclined plane. The Talmud reduces this dimension to 32 cubits (*Middoth*, iii. 1), and adds a number of particulars, which make it appear that it must have been like a model of the Babylonian or other Assyrian temples. On the north side were the rings and stakes to which the victims were attached which were brought in to be sacrificed; and to the south an inclined plane led down, as before mentioned, to the Water Gate — so called because immediately in front of it was the great cistern excavated in the rock, first explored and described by Dr. Barclay (*City of the Great King*, p. 526), from which water was supplied to the Altar and the Temple. And a little beyond this, at the S. W. angle of the Altar was an opening (*Middoth*, iii. 3), through which the blood of the victims flowed[c] westward and southward to the king's garden at Siloam.

Both the Altar and the Temple were inclosed by a low parapet one cubit in height, placed so as to keep the people separate from the priests while the latter were performing their functions.

Within this last inclosure towards the westward

---

[a] It does not appear difficult to account for this extraordinary excess. The Rabbis adopted the sacred number of Ezekiel of 500 for their external dimensions of the Temple, without caring much whether it meant reeds or cubits, and though the commentators say that they only meant the smaller cubit of 15 inches, or 625 feet in all, this explanation will not hold good, as all their other measurements agree so closely with those of Josephus that they evidently were using the same cubit of 18 inches. The fact seems to be, that having erroneously adopted 500 cubits instead of 400 for the external dimensions, they had 100 cubits to spare, and introduced them where no authority existed to show they were wrong.

[b] *Handbook of Architecture*, p. 98 ff.

[c] A channel exactly corresponding to that described in the Talmud has been discovered by Signor Pierotti, running towards the *southwest*. In his published accounts he mistakes it for one flowing *northeast*, in direct contradiction to the Talmud, which is our only authority on the subject.

stood the Temple itself. As before mentioned, its internal dimensions were the same as those of the Temple of Solomon, or of that seen by the prophet in a vision, namely, 20 cubits or 30 feet, by 60 cubits or 90 feet, divided into a cubical Holy of Holies, and a holy place of 2 cubes; and there is no reason whatever for doubting but that the Sanctuary always stood on the identically same spot in which it had been placed by Solomon a thousand years before it was rebuilt by Herod.

Although the internal dimensions remained the same, there seems no reason to doubt but that the whole plan was augmented by the Pteromata or surrounding parts being increased from 10 to 20 cubits, so that the third Temple like the second, measured 60 cubits across, and 100 cubits east and west. The width of the façade was also augmented by wings or shoulders (*B. J.* v. 5, § 4) projecting 20 cubits each way, making the whole breadth 100 cubits, or equal to the length. So far all seems certain, but when we come to the height, every measurement seems doubtful. Both Josephus and the Talmud seem delighted with the truly Jewish idea of a building which, without being a cube, was 100 cubits long, 100 broad, and 100 high — and everything seems to be made to bend to this simple ratio of proportion. It may also be partly owing to the difficulty of ascertaining heights as compared with horizontal dimensions, and the tendency that always exists to exaggerate these latter, that may have led to some confusion, but from whatever cause it arose, it is almost impossible to believe that the dimensions of the Temple as regards height, were what they were asserted to be by Josephus, and specified with such minute detail in the *Middoth* (iv. 6). This authority makes the height of the floor 6, of the hall 40 cubits; the roofing 5 cubits in thickness: then the cœnaculum or upper room 40, and the roof, parapet, etc., 9! — all the parts being named with the most detailed particularity.

As the adytum was certainly not more than 20 cubits high, the first 40 looks very like a duplication, and so does the second; for a room 20 cubits wide and 40 high is so absurd a proportion that it is impossible to accept it. In fact, we cannot help suspecting that in this instance Josephus was guilty of systematically doubling the altitude of the building he was describing, as it can be proved he did in some other instances.[a]

From the above it would appear, that in so far as the horizontal dimensions of the various parts of this celebrated building, or their arrangement in plan is concerned, we can restore every part with very tolerable certainty; and there does not appear either to be very much doubt as to their real height. But when we turn from actual measurement and try to realize its appearance or the details of its architecture, we launch into a sea of conjecture with very little indeed to guide us, at least in regard to the appearance of the Temple itself.

We know, however, that the cloisters of the outer court were of the Corinthian order, and from the appearance of nearly contemporary cloisters at Palmyra and Baalbec we can judge of their effect. There are also in the Haram area at Jerusalem a number of pillars which once belonged to these colonnades, and so soon as any one will take the trouble to measure and draw them, we may restore the cloisters at all events with almost absolute certainty.

We may also realize very nearly the general appearance of the inner fortified inclosure with its gates and their accompaniments, and we can also restore the Altar, but when we turn to the Temple itself, all is guess work. Still the speculation is so interesting, that it may not be out of place to say a few words regarding it.

In the first place we are told (*Ant.* xv. 11, § 5) that the priests built the Temple itself in eighteen months, while it took Herod eight years to complete his part, and as only priests apparently were employed, we may fairly assume that it was not a rebuilding, but only a repair — it may be with additions — which they undertook. We know also from Maccabees, and from the unwillingness of the priests to allow Herod to undertake the rebuilding at all, that the Temple, though at one time desecrated, was never destroyed; so we may fairly assume that a great part of the Temple of Zerubbabel was still standing, and was incorporated in the new.

Whatever may have been the case with the Temple of Solomon, it is nearly certain that the style of the second Temple must have been identical with that of the buildings we are so familiar with at Persepolis and Susa. In fact the Woodcut No. 6 correctly represents the second Temple in so far as its details are concerned; for we must not be led away with the modern idea that different people built in different styles, which they kept distinct and practiced only within their own narrow limits. The Jews were too closely connected with the Persians and Babylonians at this period to know of any other style, and in fact their Temple was built under the superintendence of the very parties who were erecting the contemporary edifices at Persepolis and Susa.

The question still remains how much of this building or of its details were retained, or how much of Roman feeling added. We may at once dismiss the idea that anything was borrowed from Egypt. That country had no influence at this period beyond the limits of her own narrow valley, and we cannot trace one vestige of her taste or feeling in anything found in Syria at or about this epoch.

Turning to the building itself, we find that the only things that were added at this period were the wings to the façade, and it may consequently be surmised that the façade was entirely remodeled at this time, especially as we find in the centre a great arch, which was a very Roman feature, and very unlike anything we know of as existing before.

---

[a] As it is not easy always to realise figured dimensions, it may assist those who are not in the habit of doing so to state that the western façade and nave of Lincoln Cathedral are nearly the same as those of Herod's Temple. Thus, the façade with its shoulders is about 100 cubits wide. The nave is 60 cubits wide and 60 high, and if you divide the aisle into three stories you can have a correct idea of the chambers; and if the nave with its clerestory were divided by a floor, they would correctly represent the dimensions of the Temple and its upper rooms. The nave, however, to the transept, is considerably more than 100 cubits long, while the façade is only between 50 and 60 cubits high. Those, therefore, who adhere to the written text, must double its height in imagination to realise its appearance, but my own conviction is that the Temple was not higher in reality than the façade of the cathedral.

Digitized by Google

This, Josephus says, was 25 cubits wide and 70 high, which is so monstrous in proportion, and, being wider than the Temple itself, so unlikely, that it may safely be rejected, and we may adopt in its stead the more moderate dimensions of the *Middoth* (iii. 7), which makes it 20 cubits wide by 40 high, which is not only more in accordance with the dimensions of the building, but also with the proportions of Roman architecture. This arch occupied the centre, and may easily be restored; but what is to be done with the 37 cubits on either hand? Were they plain like an unfinished Egyptian propylon, or covered with ornament like an Indian Gopura? My own impression is that the façade on either hand was covered with a series of small arches and panels four stories in height, and more like the Tâk Kesra at Ctesiphon[a] than any other building now existing. It is true that nearly five centuries elapsed between the destruction of the one building and the erection of the other. But Herod's Temple was not the last of its race, nor was Nushirvan's the first of its class, and its pointed arches and clumsy details show just such a degradation of style as we should expect from the interval which had elapsed between them. We know so little of the architecture of this part of Asia that it is impossible to speak with certainty on such a subject, but we may yet recover many of the lost links which connect the one with the other, and so restore the earlier examples with at least proximate certainty.

Whatever the exact appearance of its details may have been, it may safely be asserted that the triple Temple of Jerusalem — the lower court, standing on its magnificent terraces — the inner court, raised on its platform in the centre of this — and the Temple itself, rising out of this group and crowning the whole — must have formed, when combined with the beauty of its situation, one of the most splendid architectural combinations of the ancient world. J. F.

* **TEMPLE, CAPTAIN OF THE.** [CAPTAIN.]

* **TEMPT** (Lat. *temptare*, *tentare*) is very often used in the A. V. in the sense of "to try," "put to the test." Thus God is said to have "tempted" Abraham when he tried his faith by commanding the sacrifice of Isaac (Gen. xxii. 1). The Israelites "tempted God" in the wilderness when they put his patience and forbearance to the proof by murmuring, distrust, and disobedience (Exod. xvii. 2, 7; Num. xiv. 22; Deut. vi. 16; Ps. lxxviii. 18, 41, 56, xcv. 9, cvi. 14). The lawyer is said to have "tempted" Christ when he asked him a question to see how he would answer it (Matt. xxii. 35; Luke x. 25). So the word is used in reference to the ensnaring questions of the Pharisees (Matt. xvi. 1, xix. 3; Mark xii. 15; Luke xx. 23). [TEMPTATION.] A.

* **TEMPTATION** is often used in the A. V. in its original sense of "trial" (*e. g.* Luke xxii. 28; Acts xx. 19; James i. 2, 12; 1 Pet. i. 6; Rev. iii. 10). The plagues of Egypt are called "temptations" (Deut. iv. 34, vii. 19, xxix. 3), because they tested the extent to which Pharaoh would carry his obstinacy. [TEMPT.] A.

**TEN COMMANDMENTS.** (1.) The popular name in this, as in so many instances, is not that of Scripture. There we have the "ten words" (עֲשֶׂרֶת הַדְּבָרִים: *τὰ δέκα ῥήματα*: *verba decem*), not the Ten Commandments (Ex. xxxiv. 28; Deut. iv. 13, x. 4, Heb.). The difference is not altogether an unmeaning one. The *word* of God, the "word of the Lord," the constantly recurring term for the fullest revelation, was higher than any phrase expressing merely a command, and carried with it more the idea of a self-fulfilling power. If on the one side there was the special contrast to which our Lord refers between the commandments of God and the traditions of men (Matt. xv. 3), the arrogance of the Rabbis showed itself, on the other, in placing the *words* of the Scribes on the same level as the *words* of God. [Comp. SCRIBES.] Nowhere in the later books of the O. T. is any direct reference made to their number. The treatise of Philo, however, *περὶ τῶν δέκα λογίων*, shows that it had fixed itself on the Jewish mind, and later still, it gave occasion to the formation of a new word ("The Decalogue" *ἡ δεκάλογος*, first in Clem. Al. *Pæd.* iii. 12), which has perpetuated itself in modern languages. Other names are even more significant. These, and these alone, are "the words of the covenant," the unchanging ground of the union between Jehovah and his people, all else being as a superstructure, accessory and subordinate (Ex. xxxiv. 28). They are also the Tables of Testimony, sometimes simply "*the* testimony," the witness to men of the Divine will, righteous itself, demanding righteousness in man (Ex. xxv. 16, xxxi. 18, &c.). It is by virtue of their presence in it that the Ark becomes, in its turn, the Ark of the Covenant (Num. x. 33, &c.), that the sacred tent became the Tabernacle of Witness, of Testimony (Ex. xxxviii. 21, &c.). [TABERNACLE.] They remain there, throughout the glory of the kingdom, the primeval relics of a hoar antiquity (1 K. viii. 9), their material, the writing on them, the sharp incisive character of the laws themselves presenting a striking contrast to the more expanded teaching of a later time. Not less did the commandments themselves speak of the earlier age when not the silver and the gold, but the ox and the ass were the great representatives of wealth[b] (comp. 1 Sam. xii. 3).

(2.) The circumstances in which the Ten great

[a] *Handbook of Architecture*, p. 375.

[b] Ewald is disposed to think that even in the form in which we have the Commandments there are some additions made at a later period, and that the second and the fourth commandments were originally as briefly imperative as the sixth or seventh (*Gesch. Isr.* ii. 206). The difference between the reason given in Ex. xx. 11 for the fourth commandment, and that stated to have been given in Deut. v. 15, makes, perhaps, such a conjecture possible. *Scholia* which modern annotators put into the margin are in the existing state of the O. T. incorporated into the text. Obviously both forms could not have appeared written on the two Tables of Stone, yet Deut. v. 15, 22 not only states a different reason, but affirms that "all these words were thus written. Keil (*Comm. on Ex.* xx.) seems on this point disposed to agree with Ewald.

Digitized by Google

*Words* were first given to the people surrounded them with an awe which attached to no other precept. In the midst of the cloud, and the darkness, and the flashing lightning, and the fiery smoke, and the thunder, like the voice of a trumpet, Moses was called to receive the Law without which the people would cease to be a holy nation. Here, as elsewhere, Scripture unites two facts which men separate. God, and not man, was speaking to the Israelites in those terrors, and yet in the language of later inspired teachers, other instrumentality was not excluded.[a] The law was "ordained by angels" (Gal. iii. 19), "spoken by angels" (Heb. ii. 2), received as the ordinance of angels (Acts vii. 53). The agency of those whom the thoughts of the Psalmist connected with the winds and the flaming fire (Ps. civ. 4; Heb. i. 7) was present also on Sinai. And the part of Moses himself was, as the language of St. Paul (Gal. iii. 19) affirms, that of "a mediator." He stood "between" the people and the Lord, "to show them the word of the Lord" (Deut. v. 5), while they stood afar off, to give form and distinctness to what would else have been terrible and overwhelming. The "voice of the Lord" which they heard in the thunderings and the sound of the trumpet, "full of majesty," "dividing the flames of fire" (Ps. xxix. 3–9), was for him a Divine *word*, the testimony of an Eternal will, just as in the parallel instance of John xii. 29, a like testimony led some to say, "it thundered," while others received the witness. No other words were proclaimed in like manner. The people shrank even from this nearness to the awful presence, even from the very echoes of the Divine voice. And the record was as exceptional as the original revelation. Of no other words could it be said that they were written as these were written, engraved on the Tables of Stone, not as originating in man's contrivance or sagacity, but by the power of the Eternal Spirit, by the "finger of God" (Ex. xxxi. 18, xxxii. 16; comp. note on TABERNACLE).

(3.) The number Ten was, we can hardly doubt, itself significant to Moses and the Israelites. The received symbol. then and at all times, of completeness (Bähr, *Symbolik*, i. 175–183), it taught the people that the Law of Jehovah was perfect (Ps. xix. 7). The fact that they were written not on one, but on two tables, probably in two groups of five each (*infra*), taught men (though with some variations, from the classification of later ethics) the great division of duties toward God, and duties toward our neighbor, which we recognize as the groundwork of every true moral system. It taught them also, five being the symbol of imperfection (Bähr, i. 183–187), how incomplete each set of duties would be when divorced from its companion. The recurrence of these numbers in the Pentateuch is at once frequent and striking. Ewald (*Gesch. Isr.* ii. 212–217) has shown by a large induction how continually laws and precepts meet us in groups of five or ten. The numbers, it will be remembered, meet us again as the basis of all the proportions of the Tabernacle. [TEMPLE.] It would show an ignorance of all modes of Hebrew thought to exclude this symbolic aspect. We need not, however, shut out altogether that which some writers (*e. g.* Grotius, *De Decal.* p. 36) have substituted for it, the connection of the Ten Words with a decimal system of numeration, with the ten fingers on which a man counts. Words which were to be the rule of life for the poor as well as the learned, the groundwork of education for all children, might well be connected with the simplest facts and processes in man's mental growth, and thus stamped more indelibly on the memory.[b]

(4.) In what way the Ten Commandments were to be divided has, however, been a matter of much controversy. At least four distinct arrangements present themselves.

(*a.*) In the received teaching of the Latin Church, resting on that of St. Augustine (*Qu. in Ex.* 71, *Ep. ad Januar.* c. xi., *De Decal.* etc., etc.), the first Table contained three commandments, the second the other seven. Partly on mystical grounds, because the Tables thus symbolized the Trinity of Divine Persons, and the Eternal Sabbath, partly as seeing in it a true ethical division, he adopted this classification. It involved, however, and in part proceeded from an alteration in the received arrangement. What we know as the first and second were united, and consequently the Sabbath law appeared at the close of the First Table as the third, not as the fourth commandment. The completeness of the number was restored in the Second Table by making a separate (the ninth) command of the precept, "Thou shalt not covet thy neighbor's wife," which with us forms part of the tenth. It is an almost fatal objection to this order that in the First Table it confounds, where it ought to distinguish, the two sins of polytheism and idolatry; and that in the Second it introduces an arbitrary and meaningless distinction. The later theology of the Church of Rome apparently adopted it as seeming to prohibit image-worship only so far as it accompanied the acknowledgment of another God (*Catech. Trident.* iii. 2, 20).

(*b.*) The familiar division, referring the first four to our duty toward God, and the six remaining to our duty toward man, is, on ethical grounds, simple and natural enough. If it is not altogether satisfying, it is because it fails to recognize the symmetry which gives to the number five so great a prominence, and, perhaps also, because it looks on the duty of the fifth commandment from the point of view of modern ethics rather than from that of the ancient Israelites, and the first disciples of Christ (*infra*).

(*c.*) A modification of (*a*) has been adopted by later Jewish writers (Jonathan ben Uzziel, Aben Ezra, Moses ben Nachman, in Suicer, *Thes.* s. v. δεκάλογος). Retaining the combination of the first and second commandments of the common order, they have made a new "word" of the opening declaration, "I am the Lord thy God which brought thee out of the land of Egypt, out of the house of bondage," and so have avoided the necessity of the subdivision of the tenth. The objection to this division is, (1) that it rests on no adequate

[a] Buxtorf, it is true, asserts that Jewish interpreters, with hardly an exception, maintain that "Deum verba Decalogi per se immediate locutum esse" (*Diss. de Decal.*). The language of Josephus, however (*Ant.* xv. 5, § 3), not less than that of the N. T., shows that at one time the traditions of the Jewish schools pointed to the opposite conclusion.

[b] Bähr, absorbed in symbolism, has nothing for this natural suggestion but two notes of admiration (!!). The analogy of Ten Great Commandments in the moral law of Buddhism might have shown him how naturally men crave for a number that thus helps them. A true system was as little likely to ignore the natural craving as a false. (Comp note in Ewald, *Gesch. Isr.* ii. 207

Digitized by Google

authority, and (2) that it turns into a single precept what is evidently given as the groundwork of the whole body of laws.

(*d.*) Rejecting these three, there remains that recognized by the older Jewish writers, Josephus (iii. 6, § 6) and Philo (*De Decal.* i.), and supported ably and thoughtfully by Ewald (*Gesch. Isr.* ii. 208), which places five commandments in each Table; and thus preserves the *pentad* and *decad* grouping which pervades the whole code. A modern jurist would perhaps object that this places the fifth commandment in a wrong position, that a duty to parents is a duty toward our neighbor. From the Jewish point of view, it is believed, the place thus given to that commandment was essentially the right one. Instead of duties toward God, and duties toward our neighbors, we must think of the First Table as containing all that belonged to the Εὐσέβεια of the Greeks, to the *Pietas* of the Romans, duties *i. e.* with no corresponding rights, while the second deals with duties which involve rights, and come therefore under the head of *Justitia*. The duty of honoring, *i. e.* supporting, parents came under the former head. As soon as the son was capable of it, and the parents required it, it was an absolute, unconditional duty. His right to any maintenance from them had ceased. He owed them reverence, as he owed it to his Father in heaven (Heb. xii. 9). He was to show piety (εὐσεβεῖν) to them (1 Tim. v. 4). What made the "Corban" casuistry of the scribes so specially evil was, that it was, in this way, a sin against the piety of the First Table, not merely against the lower obligations of the second (Mark vii. 11; comp. PIETY). It at least harmonizes with this division that the second, third, fourth, and fifth commandments, all stand on the same footing as having special sanctions attaching to them, while the others that follow are left in their simplicity by themselves, as though the reciprocity of rights were in itself a sufficient ground for obedience.[a]

(5.) To these Ten Commandments we find in the Samaritan Pentateuch an eleventh added:—"But when the Lord thy God shall have brought thee into the land of Canaan, whither thou goest to possess it, thou shalt set thee up two great stones, and shalt plaister them with plaister, and shalt write upon these stones all the words of this Law. Moreover, after thou shalt have passed over Jordan, thou shalt set up those stones which I command thee this day, on Mount Gerizim, and thou shalt build there an altar to the Lord thy God, an altar of stones: thou shalt not lift up any iron thereon. Of unhewn stones shalt thou build that altar to the Lord thy God, and thou shalt offer on it burnt-offerings to the Lord thy God, and thou shalt sacrifice peace-offerings, and shalt eat them there, and thou shalt rejoice before the Lord thy God in that mountain beyond Jordan, by the way where the sun goeth down, in the land of the Canaanite that dwelleth in the plain country over against Gilgal, by the oak of Moreh, towards Sichem" (Walton, *Bibl. Polyglott.*). In the absence of any direct evidence we can only guess as to the history of this remarkable addition. (1.) It will be seen that the whole passage is made up of two which are found in the Hebrew text of Deut. xxvii. 2–7, and xi. 30, with the *substitution*, in the former, of Gerizim for Ebal. (2.) In the absence of confirmation from any other version, Ebal must, as far as textual criticism is concerned, be looked upon as the true reading, Gerizim as a falsification, casual or deliberate, of the text. (3.) Probably the choice of Gerizim as the site of the Samaritan temple was determined by the fact that it had been the Mount of Blessings, Ebal that of Curses. Possibly, as Walton suggests (*Prolegom.* c. xi.), the difficulty of understanding how the latter should have been chosen instead of the former, as a place for sacrifice and offering, may have led them to look on the reading Ebal as erroneous. They were unwilling to expose themselves to the taunts of their Judæan enemies by building a temple on the Hill of Curses. They would claim the inheritance of the blessings. They would set the authority of their text against that of the scribes of the Great Synagogue. One was as likely to be accepted as the other. The "Hebrew verity" was not then acknowledged as it has been since. (4.) In other repetitions or transfers in the Samaritan Pentateuch we may perhaps admit the plea which Walton makes in its behalf (*l. c.*), that in the first formation of the Pentateuch as a Codex, the transcribers had a large number of separate documents to copy, and that consequently much was left to the discretion of the individual scribe. Here, however, that excuse is hardly admissible. The interpolation has every mark of being a bold attempt to claim for the schismatic worship on Gerizim the solemn sanction of the voice on Sinai, to place it on the same footing as the Ten great Words of God. The guilt of the interpolation belonged of course only to the first contrivers of it. The later Samaritans might easily come to look on their text as the true one, on that of the Jews as corrupted by a fraudulent omission. It is to the credit of the Jewish scribes that they were not tempted to retaliate, and that their reverence for the sacred records prevented them from suppressing the history which connected the rival sanctuary with the blessings of Gerizim.

(6.) The treatment of the Ten Commandments in the Targum of Jonathan ben Uzziel is not without interest. There, as noticed above, the first and second commandments are united, to make up the second, and the words "I am the Lord thy God," etc., are given as the first. More remarkable is the addition of a distinct reason for the last five commandments no less than for the first five: "Thou shalt commit no murder, for because of the sins of murderers the sword goeth forth upon the world." So in like manner, and with the same formula, "death goeth forth upon the world" as the punishment of adultery, famine as that of theft, drought as that of false witness, invasion, plunder, captivity as that of covetousness (Walton, *Bibl. Polyglott.*).

(7.) The absence of any distinct reference to the Ten Commandments as such in the *Pirke Aboth* (= Maxims of the Fathers) is both strange and significant. One chapter (ch. v.) is expressly given to an enumeration of all the Scriptural facts which may be grouped in decades, the ten words of Creation, the ten generations from Adam to Noah, and from Noah to Abraham, the ten trials of Abraham, the ten plagues of Egypt, and the like, but the ten Divine words find no place in the list. With all their ostentation of profound reverence for the Law,

[a] A further confirmation of the truth of this division is found in Rom. xiii. 9. St. Paul, summing up the duties "briefly comprehended" in the one great Law "Thou shalt love thy neighbor as thyself," enumerates the last five commandments, but makes no mention of the fifth.

Digitized by Google

the teaching of the Rabbis turned on other points than the great laws of duty. In this way, as in others, they made void the commandments of God that they might keep their own traditions. — Compare Stanley, *Jewish Church*, Lect. vii., in illustration of many of the points here noticed. E. H. P.

• **TENDER**, as a verb, is used in 2 Macc. iv. 2 (A. V.) in the sense of "to care for." For similar examples, see Richardson's *Dictionary*. A.

**TENT.**[a] Among the leading characteristics of the nomad races, those two have always been numbered, whose origin has been ascribed to Jabal the son of Lameeh (Gen. iv. 20), namely, to be tent-dwellers and keepers of cattle. The same may be said of the forefathers of the Hebrew race; nor was it until the return into Canaan from Egypt that the Hebrews became inhabitants of cities, and it may be remarked that the tradition of tent-usage survived for many years later in the Tabernacle of Shiloh, which consisted, as many Arab tents still consist, of a walled inclosure covered with curtains (Mishna, *Zebachim*, xiv 6; Stanley, *S. & P.* p. 233). Among tent-dwellers of the present day must be reckoned (1) the great Mongol and Tartar hordes of central Asia, whose tent-dwellings are sometimes of gigantic dimensions, and who exhibit more contrivance both in the dwellings themselves and in their method of transporting them from place to place than is the case with the Arab races (Marco Polo, *Trav.* pp. 128, 135, 211, ed. Bohn; Hor. 3 *Od.* xxiv. 10; Gibbon, c. xxvi., vol. iii. 298, ed. Smith). (2.) The Bedouin Arab tribes, who inhabit tents which are probably constructed on the same plan as those which were the dwelling-places of Abraham and of Jacob (Heb. xi. 9). A tent or pavilion on a magnificent scale, constructed for Ptolemy Philadelphus at Alexandria, is described by Athenæus, v. 196, foll.

An Arab tent is minutely described by Burck-

Arab Tent (Layard).

hardt. It is called *beit*, "house;" its covering consists of stuff, about three quarters of a yard broad, made of black goats'-hair (Cant. i. 5; Shaw, *Trav.* p. 220), laid parallel with the tent's length. This is sufficient to resist the heaviest rain. The tent-poles, called *amúd*, or columns, are usually nine in number, placed in three groups, but many tents have only one pole, others two or three. The ropes which hold the tent in its place are fastened, not to the tent-cover itself, but to loops consisting of a leathern thong tied to the ends of a stick, round which is twisted a piece of old cloth, which is itself sewed to the tent-cover. The ends of the tent-ropes are fastened to short sticks or pins, called *wed* or *aoutad*, which are driven into the ground with a mallet (Judg. iv. 21). [PIN.] Round the back and sides of the tents runs a piece of stuff removable at pleasure to admit air. The tent is divided into two apartments, separated by a carpet partition drawn across the middle of the tent and fastened to the three middle posts. The men's apartment is usually on the right side on entering, and the women's on the left; but this usage varies in different tribes, and in the Mesopotamian tribes the contrary is the rule. Of the three side posts on the men's side, the first and third are called *yed* (hand); and the one in the middle is rather higher than the other two. Hooks are attached to these posts for hanging various articles (Gen. xviii. 10; Jud. xiii. 6; Niebuhr, *Voy.* i. 187; Layard, *Nin. and Bab.* p. 261). [PILLAR.] Few Arabs have more than one tent, unless the family be augmented

---

[a] 1. אֹהֶל: σκῆνος, σκηνή: *tabernaculum, tentorium*: often in A. V. "tabernacle."

2. מִשְׁכָּן: σκηνή: *tentorium*: opposed to בַּיִת, "house."

3. סֻכָּה (*sucah*), only once "tent" (2 Sam. xi. 11).

4. קֻבָּה: κάμινος: *fornax*: Arab قُبَّة whence, with art. prefixed, comes *alcoba* (Span.) an "alcove" (Russell, *Aleppo*, i. 80): only once used (Num. xxv. 8).

Digitized by Google

by the families of a son or a deceased brother, or in case the wives disagree, when the master pitches a tent for one of them adjoining his own. The separate tents of Sarah, Leah, Rachel, Zilpah, and Bilhah, may thus have been either separate tents or apartments in the principal tent in each case (Gen. xxiv. 67, xxxi. 33). When the pasture near an encampment is exhausted, the tents are taken down, packed on camels and removed (Is. xxxviii. 12; Gen. xxvi. 17, 22, 25). The beauty of an Arab encampment is noticed by Shaw (*Trav.* p. 221; see Num. xxiv. 5). Those who cannot afford more complete tents, are content to hang a cloth from a tree by way of shelter. In choosing places for encampment, Arabs prefer the neighborhood of trees, for the sake of the shade and coolness which they afford (Gen. xviii. 4, 8; Niebuhr, *l. c.*). In observing the directions of the Law respecting the feast of Tabernacles, the Rabbinical writers laid down as a distinction between the ordinary tent and the booth, *succah*, that the latter must in no case be covered by a cloth, but be restricted to boughs of trees as its shelter (*Succah*, i. 3). In hot weather the Arabs of Mesopotamia often strike their tents and betake themselves to sheds of reeds and grass on the bank of the river (Layard, *Nineveh*, i. 123; Burckhardt, *Notes on Bed.* i. 37, 46; Volney, *Trav.* i. 398; Layard, *Nin. and Bab.* pp. 171, 175; Niebuhr, *Voy.* i. *l. c.*). H. W. P.

* As we might expect, the use of tents by the Hebrews, and their familiarity with nomadic life, became a fruitful source of illustration to the sacred writers. The pitching of the tent at night, the stretching out of the goat-skin roof, the driving of the pins or stakes, and fastening the cords, furnish the imagery of numerous passages. Isaiah, referring to God as the Creator, says: "He stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in" (Is. xl. 22). The prophet, as he looks forward to a happier day for the people of God, says: "Thine eyes shall see Jerusalem a quiet habitation, a tabernacle that shall not be taken down; not one of the stakes thereof shall ever be removed, neither shall any of the cords thereof be broken" (Is. xxxiii. 20). Again, in anticipation of accessions to their number, he exclaims: "Enlarge the place of thy tent, and stretch forth the curtains of thy habitations; spare not, lengthen thy cords and strengthen thy stakes; for thou shalt break forth on the right hand and on the left" (Is. liv. 2). The taking down as well as putting up of the tent suggested instructive analogies to the Hebrew pilgrim. The traveller in the East erects his temporary abode for the night, takes it down in the morning, and journeys onward. The shepherds of the country are constantly moving from one place to another. The brook fails on which they had relied for water, or the grass required for the support of their flocks is consumed, and they wander to a new station. "There is something very melancholy," writes Lord Lindsay, in our morning flittings. The tent-pins are plucked up, and in a few minutes a dozen holes, a heap or two of ashes, and the marks of the camels' knees in the sand, soon to be obliterated, are the only traces left of what has been, for a while, our home" (*Letters from the Holy Land*, p. 165). Hence, this rapid change of situation, this removal from one spot to another, without being able to foresee to-day where the wanderer will rest to-morrow, affords a striking image of man's life — so brief, fleeting, uncertain. Thus Hezekiah felt in the near prospect of death: "Mine age is departed, and is removed from me as a shepherd's tent" (Is. xxxviii. 12). Jacob calls his life a pilgrimage (Gen. xlvii. 9), with reference to the same expressive idea. The body, as the temporary home of the soul, is called a "tent" or "tabernacle," because it is so frail and perishable. Thus Paul says, in 2 Cor. v. 1: "For we know that if our earthly house of this tabernacle (*οἰκία τοῦ σκήνους, tent-house*) were dissolved" ("taken down" is more correct), "we have a building of God, an house not made with hands, eternal in the heavens." The Apostle Peter employs the same figure: "Yea, I think it meet, as long as I am in this tabernacle (*σκήνωμα*), to stir you up, by putting you in remembrance; knowing that shortly I must put off this my tabernacle, even as our Lord Jesus Christ hath showed me" (2 Pet. i. 13).

The A. V. obscures many of the references to the tent-life of the patriarchs. Thus in Gen. xii. 9, where it is said, "Abraham journeyed, going on still," a stricter translation would be, "He pulled up," namely, his tent-pins, "going and pulling up," as he advanced from one station to another. So, in Gen. xxxiii. 12, instead of "Let us take our journey and go," it is literally, "Let us pull up the pins of our tents and let us go." See, also, Gen. xxxv. 21, xlvi. 1; Ex. xiii. 20. For the "tents of Kedar," see KEDAR. H.

* **TENT-MAKERS** (*σκηνοποιοί*). According to the custom of his age and nation, that every male child should be taught some trade, the Apostle Paul had learned that of a tent-maker (Acts xviii. 3). It was not the weaving of the fabric of goats'-hair, which, for the most part, was probably done by women in his native Cilicia, but the construction of the tents themselves from the cloth. Yet we need not suppose that Paul confined himself to the use of this particular fabric; for, in that case, he would not have found ready occupation in all places (see Hemsen's *Der Apostel Paulus*, p. 5 f.). [PAUL.] This was the occupation also of Aquila, with whom Paul worked at Corinth, as a means of support (Acts xviii. 3). R. D. C. R.

**TE'RAH** (תֶּרַח: Θάρρα, Θάρα in Josh.; Alex. Θαρα, exc. Gen. xi. 28: *Thare*). The father of Abram, Nahor, and Haran, and through them the ancestor of the great families of the Israelites, Ishmaelites, Midianites, Moabites, and Ammonites (Gen. xi. 24–32). The account given of him in the O. T. narrative is very brief. We learn from it simply that he was an idolater (Josh. xxiv. 2), that he dwelt beyond the Euphrates in Ur of the Chaldees (Gen. xi. 28), and that in the southwesterly migration, which from some unexplained cause he undertook in his old age, he went with his son Abram, his daughter-in-law Sarai, and his grandson Lot, "to go into the land of Canaan, and they came unto Haran, and dwelt there" (Gen. xi. 31). And finally, "the days of Terah were two hundred and five years: and Terah died in Haran" (Gen. xi. 32). In connection with this last-mentioned event a chronological difficulty has arisen which may be noticed here. In the speech of Stephen (Acts vii. 4) it is said that the further migration of Abram from Haran to the land of Canaan did not take place till after his father's death. Now as Terah was 205 years [a] old when he died, and Abram

[a] The Sam. text and version make him 145, and so avoid this difficulty.

Digitized by Google

was 75 when he left Haran (Gen. xii. 4), it follows that, if the speech of Stephen be correct, at Abram's birth Terah must have been 130 years old; and therefore that the order of his sons — Abram, Nahor, Haran — given in Gen. xi. 26, 27, is not their order in point of age. [See LOT, ii. 1685, note *a*.] Lord Arthur Hervey says (*Genesl.* pp. 82, 83), "The difficulty is easily got over by supposing that Abram, though named first on account of his dignity, was not the eldest son, but probably the youngest of the three, born when his father was 130 years old — a supposition with which the marriage of Nahor with his elder brother Haran's daughter, Milcah, and the apparent nearness of age between Abram and Lot, and the three generations from Nahor to Rebecca corresponding to only two from Abraham to Isaac, are in perfect harmony." From the simple facts of Terah's life recorded in the O. T. has been constructed the entire legend of Abram which is current in Jewish and Arabian traditions. Terah the idolater is turned into a maker of images, and "Ur of the Chaldees" is the original of the "furnace" into which Abram was cast (comp. Ex. v. 2). Rashi's note on Gen. xi. 28 is as follows: "'In the presence of Terah his father;' in the lifetime of his father. And the Midrash Hagada says that he died beside his father, for Terah had complained of Abram his son, before Nimrod, that he had broken his images, and he cast him into a furnace of fire. And Haran was sitting and saying in his heart, If Abram overcome I am on his side, and if Nimrod overcome I am on his side. And when Abram was saved they said to Haran, On whose side art thou? He said to them, I am on Abram's side. So they cast him into the furnace of fire and he was burned; and this is [what is meant by] *Ur Casdim* (Ur of the Chaldees)." In *Bereshith Rabba* (Par. 17) the story is told of Abram being left to sell idols in his father's stead, which is repeated in Weil's *Biblical Legends*, p. 49. The whole legend depends upon the ambiguity of the word עָבַד, which signifies "to make" and "to serve or worship," so that Terah, who in the Biblical narrative is only a worshipper of idols, is in the Jewish tradition an image-maker; and about this single point the whole story has grown. It certainly was unknown to Josephus, who tells nothing of Terah, except that it was grief for the death of his son Haran that induced him to quit Ur of the Chaldees (*Ant.* i. 6, § 6).

In the Jewish traditions Terah is a prince and a great man in the palace of Nimrod (Jellinek, *Bet ham-Midrash*, p. 27), the captain of his army (*Sepher Hayyashar*), his son-in-law according to the Arabs (Beer, *Leben Abrahams*, p. 97). His wife is called in the Talmud (*Baba Bathra*, fol. 91 *a*) Amtelai, or Emtelai, the daughter of Carnebo. In the book of the Jubilees she is called Edna, the daughter of Arem, or Aram; and by the Arabs Adna (D'Herbelot, art. *Abraham;* Beer, p. 97). According to D'Herbelot, the name of Abraham's father was Azar in the Arabic traditions, and Terah was his grandfather. Elmakin, quoted by Hottinger (*Smegma Orientale*, p. 281), says that, after the death of Yuna, Abraham's mother, Terah took another wife, who bare him Sarah. He adds that in the days of Terah the king of Babylon made war upon the country in which he dwelt, and that Haaran, the brother of Terah, went out against him and slew him; and the kingdom of Babylon was transferred to Nineveh and Mosul. For all these traditions, see the book of *Jashar*, and the works of Hottinger, D'Herbelot, Weil, and Beer above quoted. Philo (*De Somniis*) indulges in some strange speculations with regard to Terah's name and his migration. W. A. W.

**TER'APHIM** (תְּרָפִים: θεραφίν, τὰ θεραφείν, τὰ θεραφίν, κενοτάφια, ἄβυλα, γλυπτά, δῆλοι, ἀνοφθεγγόμενοι: *theraphim, statua, idola, simulacra, figurae idolorum, idololatria*), only in plural, images connected with magical rites. The subject of teraphim has been fully discussed in art. MAGIC (iii. 1743 ff.), and it is therefore unnecessary here to do more than repeat the results there stated. The derivation of the name is obscure. In one case a single statue seems to be intended by the plural (1 Sam. xix. 13, 16). The teraphim carried away from Laban by Rachel do not seem to have been very small; and the image (if one be intended), hidden in David's bed by Michal to deceive Saul's messengers, was probably of the size of a man, and perhaps in the head and shoulders, if not lower, of human or like form; but David's sleeping-room may have been a mere cell without a window, opening from a large apartment, which would render it necessary to do no more than fill the bed. Laban regarded his teraphim as gods; and, as he was not ignorant of the true God, it would therefore appear that they were used by those who added corrupt practices to the patriarchal religion. Teraphim again are included among Micah's images, which were idolatrous objects connected with heretical corruptions rather than with heathen worship (Judg. xvii. 3–5, xviii. 17, 18, 20). Teraphim were consulted for oracular answers by the Israelites (Zech. x. 2; comp. Judg. xviii. 5, 6; 1 Sam. xv. 22, 23, xix. 13, 16, LXX.; and 2 K. xxiii. 24), and by the Babylonians, in the case of Nebuchadnezzar (Ez. xxi. 19–22). There is no evidence that they were ever worshipped. Though not frequently mentioned, we find they were used by the Israelites in the time of the Judges and of Saul, and until the reign of Josiah, who put them away (2 K. xxiii. 24), and apparently again after the Captivity (Zech. x. 2). R. S. P.

**TE'RESH** (תֶּרֶשׁ [Pers. *severe, austere*, Ges.]: om. in Vat. and Alex.; FA. third hand has Θάρας, Θάρρας: *Thares*). One of the two eunuchs who kept the door of the palace of Ahasuerus, and whose plot to assassinate the king was discovered by Mordecai (Esth. ii. 21, vi. 2). He was hanged. Josephus calls him Theodestes (*Ant.* xi. 6, § 4), and says that the conspiracy was detected by Barnabazus, a servant of one of the eunuchs, who was a Jew by birth, and who revealed it to Mordecai. According to Josephus, the conspirators were crucified.

**TERTIUS** (Τέρτιος: *Tertius*) was the amanuensis of Paul in writing the Epistle to the Romans (Rom. xvi. 22). He was at Corinth, therefore, and Cenchreæ, the port of Corinth, at the time when the Apostle wrote to the Church at Rome. It is noticeable that Tertius interrupts the message which Paul sends to the Roman Christians, and inserts a greeting of his own in the first person singular (ἀσπάζομαι ἐγὼ Τέρτιος). Both that circumstance and the frequency of the name among the Romans may indicate that Tertius was a Roman, and was known to those whom Paul salutes at the close of the letter. Secundus (Acts xx. 4) is another instance of the familiar usage of the Latin ordinals

Digitized by Google

employed as proper names. The idle pedantry which would make him and Silas the same person because *tertius* and שְׁלִישִׁי mean the same in Latin and Hebrew, hardly deserves to be mentioned (see Wolf, *Curæ Philologicæ*, tom. iii. p. 295). In regard to the ancient practice of writing letters from dictation, see Becker's *Gallus*, p. 180. [EPISTLE.] Nothing certain is known of Tertius apart from this passage in the Romans. No credit is due to the writers who speak of him as bishop of Iconium (see Fabricius, *Lux Evangelica*, p. 117).

H. B. H.

**TERTULLUS** (Τέρτυλλος, a diminutive form from the Roman name *Tertius*, analogous to *Lucullus* from *Lucius*, *Fabullus* from *Fabius*, etc.), "a certain orator" (Acts xxiv. 1) who was retained by the high-priest and Sanhedrim to accuse the Apostle Paul at Cæsarea before the Roman Procurator Antonius Felix. [PAUL.] He evidently belonged to the class of professional orators, multitudes of whom were to be found not only in Rome, but in other parts of the empire, to which they had betaken themselves in the hope of finding occupation at the tribunals of the provincial magistrates. Both from his name, and from the great probability that the proceedings were conducted in Latin (see especially Milman, *Bampton Lectures* for 1827, p. 185, note), we may infer that Tertullus was of Roman, or at all events of Italian origin. The Sanhedrim would naturally desire to secure his services on account of their own ignorance both of the Latin language and of the ordinary procedure of a Roman law-court.

The exordium of his speech is designed to conciliate the good will of the Procurator, and is accordingly overcharged with flattery. There is a strange contrast between the opening clause — πολλῆς εἰρήνης τυγχάνοντες διὰ σοῦ — and the brief summary of the Procurator's administration given by Tacitus (*Hist.* v. 9): "Antonius Felix per omnem sævitiam ac libidinem, jus regium servili ingenio exercuit" (comp. Tac. *Ann* xii. 54). But the commendations of Tertullus were not altogether unfounded, as Felix had really succeeded in putting down several seditious movements. [FELIX.] It is not very easy to determine whether St. Luke has preserved the oration of Tertullus entire. On the one hand we have the elaborate and artificial opening, which can hardly be other than an accurate report of that part of the speech; and on the other hand we have a narrative which is so very dry and concise, that if there were nothing more, it is not easy to see why the orator should have been called in at all. The difficulty is increased if, in accordance with the greatly preponderating weight of external authority, we omit the words in vv. 6–8, καὶ κατὰ τὸν ἡμέτερον . . . , ἔρχεσθαι ἐπὶ σέ. On the whole it seems most natural to conclude that the historian, who was almost certainly an ear-witness, merely gives an abstract of the speech, giving however in full the most salient points, and those which had the most forcibly impressed themselves upon him, such as the exordium, and the character ascribed to St. Paul (ver. 5).

The doubtful reading in vv. 6–8, to which reference has already been made, seems likely to remain an unsolved difficulty. Against the external evidence there would be nothing to urge in favor of the disputed passage, were it not that the statement which remains after its removal is not merely extremely brief (its brevity may be accounted for in the manner already suggested), but abrupt and awkward in point of construction. It may be added that it is easier to refer παρ' οὗ (ver. 8) to the Tribune Lysias than to Paul. For arguments founded on the words καὶ κατὰ . . . . κωλύειν (ver. 6) — arguments which are dependent on the genuineness of the disputed words — see Lardner, *Credibility of the Gospel History*, b. i. ch. 2; Biscoe, *On the Acts*, ch. vi. § 16.

We ought not to pass over without notice a strange etymology for the name Tertullus proposed by Calmet, in the place of which another has been suggested by his English editor (ed. 1830), who takes credit for having rejected "fanciful and improbable" etymologies, and substituted improvements of his own. Whether the suggestion is an improvement in this case the reader will judge. "Tertullus, Τέρτυλλος, *liar, impostor*, from τερατολόγος, *a teller of stories, a cheat*. [Qy. was his true appellation *Ter-Tullius*, 'thrice Tully,' that is, extremely eloquent, varied by Jewish wit into Tertullus?]"

W. B. J.

• **TESTAMENT.** As בְּרִית denotes not only a *covenant* between two parties, but also the *promise* made by the one (Gen. ix. 9), or the *precept* to be observed by the other (Deut. iv. 13), and, in a wider sense, a religious *dispensation, economy* (Jer. xxxi. 33); so, in the LXX. and the N. T., its equivalent διαθήκη. In the Vulgate, although in the O. T. *pactum* or *fœdus* is more often used for בְּרִית, yet *testamentum* is not unfrequently employed, especially in the Psalms, where the word has the looser signification of *promise* or *dispensation* (cf. Ps. lxxiv. (lxxiii.) 20, Mal. iii. 1); while in the N. T. it uniformly stands for διαθήκη. This use of *testamentum* for an authoritative, solemn decree or document is found also in the later Latin (cf. Du Cange, *Glossarium med. et inf. Latinitatis*). In the classical sense of *will*, it may be understood in Heb. ix. 16, 17, as διαθήκη has there apparently the same meaning (as often in classical Greek, though not elsewhere in the Bible). Compare, on this passage, Hofmann, *Schriftbeweis*, ii. 1, p. 426 f.; Stuart, Lünemann, Ebrard.

The use of *testament* for the *books* containing the records of the two dispensations, arose by an easy metonymy, suggested by 2 Cor. iii. 14, and had become common as early as the time of Tertullian [BIBLE]. See Guericke, *Neutestamentliche Isagogik*, p. 4; Bertholdt, *Einleitung in die Schriften des Alten u. Neuen Testaments*, § 19; and especially J. G. Rosenmüller, *Dissertatio de vocabulo* διαθήκη, in *Commentationes Theologicæ*, vol. ii.

C. M. M.

**TESTAMENT, NEW.** [NEW TESTAMENT.]

**TESTAMENT, OLD.** [OLD TESTAMENT.]

**TETA** (Vat. omits; [Rom.] Alex. Ατητα; [Ald. Τητά:] *Topa*). The form under which the name HATITA, one of the doorkeepers of the Temple, appears in the lists of 1 Esdr. v. 28.

**TETRARCH** (τετράρχης). Properly the sovereign or governor of the fourth part of a country. On the use of the title in Thessaly, Galatia, and Syria, consult the *Dictionary of Greek and Roman Antiquities*, "Tetrarcha," and the authorities there referred to. "In the later period of the

Digitized by Google

republic and under the empire, the Romans seem to have used the title (as also those of *ethnarch* and *phylarch*) to designate those tributary princes who were not of sufficient importance to be called kings." In the New Testament we meet with the designation, either actually or in the form of its derivative τετραρχεῖν, applied to three persons: —

1. Herod Antipas (Matt. xiv. 1; Luke iii. 1, 19, ix. 7; Acts xiii. 1), who is commonly distinguished as "Herod the tetrarch," although the title of "king" is also assigned to him both by St. Matthew (xiv. 9) and by St. Mark (vi. 14, 22 ff.). St. Luke, as might be expected, invariably adheres to the formal title, which would be recognized by Gentile readers. Herod is described by the last-named Evangelist (ch. iii. 1) as "tetrarch of Galilee;" but his dominions, which were bequeathed to him by his father Herod the Great, embraced the district of Perœa beyond the Jordan (Joseph. *Ant.* xvii. 8, § 1): this bequest was confirmed by Augustus (Joseph. *B. J.* ii. 6, § 3). After the disgrace and banishment of Antipas, his tetrarchy was added by Caligula to the kingdom of Herod Agrippa I. (*Ant.* xviii. 7, § 2). [HEROD ANTIPAS.]

2. Herod Philip (the son of Herod the Great and Cleopatra, *not* the husband of Herodias), who is said by St. Luke (iii. 1) to have been "tetrarch of Iturœa, and of the region of Trachonitis." Josephus tells us that his father bequeathed to him Gaulonitis, Trachonitis, and Paneas (*Ant.* xvii. 8, § 1), and that his father's bequest was confirmed by Augustus, who assigned to him Batanœa, Trachonitis, and Auranitis, with certain parts about Jamnia belonging to the "house of Zenodorus" (*B. J.* ii. 6, § 3). Accordingly the territories of Philip extended eastward from the Jordan to the wilderness, and from the borders of Perœa northwards to Lebanon and the neighborhood of Damascus. After the death of Philip his tetrarchy was added to the province of Syria by Tiberius (*Ant.* xviii. 4, § 6), and subsequently conferred by Caligula on Herod Agrippa I., with the title of king (*Ant.* xviii. 6, § 10). [HEROD PHILIP I.; HEROD AGRIPPA I.]

3. Lysanias, who is said (Luke iii. 1) to have been "tetrarch of Abilene," a small district surrounding the town of Abila, in the fertile valley of the Barada or Chrysorrhoas, between Damascus and the mountain-range of Anti-Libanus. [ABILENE.] There is some difficulty in fixing the limits of this tetrarchy, and in identifying the person of the tetrarch. [LYSANIAS.] We learn, however, from Josephus (*Ant.* xviii. 6, § 10, xix. 5, § 1) that a Lysanias had been tetrarch of Abila before the time of Caligula, who added this tetrarchy to the dominions of Herod Agrippa I. — an addition which was confirmed by the emperor Claudius.

It remains to inquire whether the title of tetrarch, as applied to these princes, had any reference to its etymological signification. We have seen that it was at this time probably applied to petty princes without any such determinate meaning. But it appears from Josephus (*Ant.* xvii. 11, § 4; *B. J.* ii. 6, § 3) that the tetrarchies of Antipas and Philip were regarded as constituting each a fourth part of their father's kingdom. For we are told that Augustus gave one half of Herod's kingdom to his son Archelaus, with the appellation of ethnarch, and with a promise of the regal title, and that he divided the remainder into the two tetrarchies. Moreover, the revenues of Archelaus, drawn from his territory, which included Judœa, Samaria, and Idumœa, amounted to 400 talents, the tetrarchies of Philip and Antipas producing 200 talents each. We conclude that in these two cases, at least, the title was used in its strict and literal sense. W. B. J.

THADDÆ'US (Θαδδαῖος: *Thaddæus*), a name in St. Mark's catalogue of the twelve Apostles (Mark iii. 18) in the great majority of MSS. In St. Matthew's catalogue (Matt. x. 3) the corresponding place is assigned to Θαδδαῖος by the Vatican MS. (B), and to Λεββαῖος by the Codex Bezæ (D). The Received Text, following the first correction of the Codex Ephraemi (C) — where the original reading is doubtful — as well as several cursive MSS., reads Λεββαῖος ὁ ἐπικληθεὶς Θαδδαῖος. We are probably to infer that Λεββαῖος, alone, is the original reading of Matt. x. 3, and Θαδδαῖος of Mark iii. 18.[a] By these two Evangelists the tenth place among the Apostles is given to Lebbæus or Thaddæus, the eleventh place being given to Simon the Canaanite. St. Luke, in both his catalogues (Luke vi. 15; Acts i. 13), places Simon Zelotes tenth among the Apostles, and assigns the eleventh place to Ἰούδας Ἰακώβου. As the other names recorded by St. Luke are identical with those which appear (though in a different order) in the first two Gospels, it seems scarcely possible to doubt that the three names of Judas, Lebbæus, and Thaddæus were borne by one and the same person. [JUDE; LEBBÆUS.] W. B. J

THA'HASH (תַּחַשׁ [*badger* or *seal*]: Τοχός: *Thahas*). Son of Nahor by his concubine Reumah (Gen. xxii. 24). He is called Ταώς by Josephus (*Ant.* i. 6, § 5).

THA'MAH (תָּמַח [Samar. *laughter*]: Θεμά: *Thema*). "The children of Thamah" were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 53). The name elsewhere appears in the A. V. as TAMAH.

THA'MAR (Θάμαρ: *Thamar*). TAMAR 1 (Matt. i. 3).

THAM'NATHA (ἡ Θαμνάθ: *Thamnata*). One of the cities of Judœa fortified by Bacchides after he had driven the Maccabees over the Jordan (1 Macc. ix. 50). Thamnatha no doubt represents an ancient TIMNATH, possibly the present *Tibneh*, half-way between Jerusalem and the Mediterranean. Whether the name should be joined to Pharathoni, which follows it, or whether they should be independent, is matter of doubt. [PHARATHONI.]

THANK-OFFERING, or PEACE-OFFERING (זֶבַח שְׁלָמִים, or simply שְׁלָמִים and in Amos v. 22, שֶׁלֶם: θυσία σωτηρίου, σωτήριον, occasionally εἰρηνική: *hostia pacificorum*

---

[a] In Mark iii. 18 the reading of D is Λεββαῖος, and in Matt. x. 3, ℵ concurs with B in reading Θαδδαῖος. The conclusions given above as to the true reading in both places are sustained by Tischendorf in his eighth edition of the Greek New Testament. F. C.

Digitized by Google

*sacifica*), the properly eucharistic offering among the Jews, in its theory resembling the MEAT-OFFERING, and therefore indicating that the offerer was already reconciled to, and in covenant with, God. Its ceremonial is described in Lev. iii. The nature of the victim was left to the sacrificer; it might be male or female, of the flock or of the herd, provided that it was unblemished; the hand of the sacrificer was laid on its head, the fat burnt, and the blood sprinkled, as in the burnt-offering; of the flesh, the breast and right shoulder were given to the priest; the rest belonged to the sacrificer, to be eaten, either on the day of sacrifice, or on the next day (Lev. vii. 11–18, 29–34), except in the case of the firstlings, which belonged to the priest alone (xxiii. 20). The eating of the flesh of the meat-offering was considered a partaking of the "table of the Lord;" and on solemn occasions, as at the dedication of the Temple of Solomon, it was conducted on an enormous scale, and became a great national feast.

The peace-offerings, unlike other sacrifices, were not ordained to be offered in fixed and regular course. The meat-offering was regularly ordained as the eucharistic sacrifice; and the only constantly recurring peace-offering appears to have been that of the two firstling lambs at Pentecost (Lev. xxiii. 19). The general principle of the peace-offering seems to have been, that it should be entirely spontaneous, offered as occasion should arise, from the feeling of the sacrificer himself. "If ye offer a sacrifice of peace-offerings to the Lord, ye shall offer it *at your own will*" (Lev. xix. 5). On the first institution (Lev. vii. 11–17), peace-offerings are divided into "offerings of thanksgiving," and "vows or free-will offerings;" of which latter class the offering by a Nazarite, on the completion of his vow, is the most remarkable (Num. vi. 14). The very names of both divisions imply complete freedom, and show that this sacrifice differed from others, in being considered not a duty, but a privilege.

We find accordingly peace-offerings offered for the people on a great scale at periods of unusual solemnity or rejoicing; as at the first inauguration of the covenant (Ex. xxiv. 5), at the first consecration of Aaron and of the Tabernacle (Lev. ix. 18), at the solemn reading of the Law in Canaan by Joshua (Josh. viii. 31), at the accession of Saul (1 Sam. xi. 15), at the bringing of the ark to Mount Zion by David (2 Sam. vi. 17), at the consecration of the Temple, and thrice every year afterwards, by Solomon (1 K. viii. 63, ix. 25), and at the great passover of Hezekiah (2 Chr. xxx. 22). In two cases only (Judg. xx. 26; 2 Sam. xxiv. 25) peace-offerings are mentioned as offered with burnt-offerings at a time of national sorrow and fasting. Here their force seems to have been precatory rather than eucharistic. [See SACRIFICE.]

A. B.

**THA'RA** (Θάρα: *Thara*). TERAH the father of Abraham (Luke iii. 34).

**THAR'RA** (*Tharra*), Esth. xii. 1. A corrupt form of the name TERESH.

**THAR'SHISH** (תַּרְשִׁישׁ [prob. *fortress*, Dietr.]: [Rom. Θαρσίς: Vat. Alex.] Θαρσεις: *Tharsis*). 1. In this more accurate form the translators of the A. V. have given in two passages (1 K. x. 22, xxii 48) the name elsewhere presented as TARSHISH. In the second passage the name is omitted in both MSS. of the LXX., while the Vulgate has *in mari*.

2. ([Rom. Θαρσί; Vat.] Ραμεσσαι; Alex. Θαρσεις: *Tharsis*.) A Benjamite, one of the family of Bilhan and the house of Jediael (1 Chr. vii. 10 only). The variation in the Vatican LXX. (Mai) is very remarkable. G.

**THAS'SI** (Θασσί; [Sin. Θασσει: Alex.] Θασσις: *Thasi, Hassii*: Syr. ܚܫܝ). The surname of Simon the son of Mattathias (1 Macc. ii. 3). [MACCABEES, vol. ii. p. 1711.] The derivation of the word is uncertain. Michaelis suggests חָשִׁישׁ, Chald. "the fresh grass springs up," i. e. "the spring is come," in reference to the tranquillity first secured during the supremacy of Simon (Grimm, *ad* 1 Macc. ii. 3). This seems very far-fetched. Winer (*Realwb.* "Simon") suggests a connection with חָסַם, *fervere*, as Grotius (*ad loc.*) seems to have done before him. In Josephus (*Ant.* xii. 6, § 1) the surname is written Ματθῆς, with various readings Θαθῆς, Θαθῆς.

B. F. W.

**THEATRE** (θέατρον: *theatron*). For the general subject, see *Dict. of Ant.* pp. 995–998. For the explanation of the Biblical allusions, two or three points only require notice. The Greek term, like the corresponding English term, denotes the *place* where dramatic performances are exhibited, and also the *scene* itself or *spectacle* which is witnessed there. It occurs in the first or local sense in Acts xix. 29, where it is said that the multitude at Ephesus rushed to the theatre, on the occasion of the excitement stirred up against Paul and his associates by Demetrius, in order to consider what should be done in reference to the charges against them. It may be remarked also (although the word does not occur in the original text or in our English version) that it was in the theatre at Cæsarea that Herod Agrippa I. gave audience to the Tyrian deputies, and was himself struck with death, because he heard so gladly the impious acclamations of the people (Acts xii. 21–23). See the remarkably confirmatory account of this event in Josephus (*Ant.* xix. 8, § 2). Such a use of the theatre for public assemblies and the transaction of public business, though it was hardly known among the Greeks. Thus Valer. Max. ii. 2: "Legati in theatrum, ut est consuetudo Græciæ, introducti." Justin xxii. 2: "Veluti reipublicæ statum formaturus in theatrum ad contionem vocari jussit." Corn. Nep. *Timol.* 4, § 2: "Veniebat in theatrum, cum ibi concilium plebis haberetur."

The other sense of the term "theatre" occurs in 1 Cor. iv. 9, where the Common Version renders: "God hath set forth us the Apostles last, as it were appointed to death; for we are made (rather, *were made*, θέατρον ἐγενήθημεν) a *spectacle* unto the world, and to angels, and to men." Instead of "spectacle" (so also Wickliffe and the Rhemish translators after the Vulgate), some might prefer the more energetic Saxon, "gazing-stock," as in Tyndale, Cranmer, and the Geneva version. But the latter would be now inappropriate, if it includes the idea of scorn or exultation, since the angels look down upon the sufferings of the martyrs with a very different interest. Whether "theatre" denotes more here than to be an object of earnest attention (θέαμα), or refers at the same

Digitized by Google

time to the theatre as the place where criminals were sometimes brought forward for punishment, is not agreed among interpreters. Paul's τὸ σχῆμα τοῦ κόσμου in 1 Cor. vii. 31, where some find an allusion to the stage, is too doubtful to be reckoned here. In Heb. x. 33 the A. V. renders θεατριζόμενοι, not inaptly, "men made a gazing-stock," since Christians in that passage are held up to view as objects of the world's scorn and derision. In Heb. xii. 1, where the writer speaks of our having around us "so great a cloud of witnesses" (τοσοῦτον ἔχοντες περικείμενον ἡμῖν νέφος μαρτύρων), he has in mind no doubt the agonistic scene, in which Christians are viewed as running a race, and not the theatre or stage where the eyes of the spectators are fixed on them.

H. B. H.

• The taste for theatrical amusements was never strongly developed among the Jews, though some of their later rulers, especially the Herods, favored them, and established theatres in Palestine. Herod the Great introduced Greek actors at his court in Jerusalem, greatly to the scandal of the Jews, and built a theatre and amphitheatre at Cæsarea (see 2 Macc. iv. 14; Jos. *J. B.* xv. 8, §§ 1, 2; xx. 9, § 4). H.

**THEBES** (נֹא אָמוֹן: Θῆβαι, Διόσπολις, περὶ τὴν Ἄμμών; in Jer. τὸν Ἄμμὼν τὸν υἱὸν αὐτῆς: *Alexandria, Al. populorum, tumultus Alexandriæ, No-Amon:* A. V., *No, the multitude of No, populous No*). A chief city of ancient Egypt, long the capital of the upper country, and the seat of the Diospolitan dynasties, that ruled over all Egypt at the era of its highest splendor. Upon the monuments this city bears three distinct names — that of the Nome, a sacred name, and the name by which it is commonly known in profane history. Of the twenty Nomes or districts into which Upper Egypt was divided, the fourth in order, proceeding northward from Nubia, was designated in the hieroglyphics as *Za'm* — the Phathyrite of the Greeks — and Thebes appears as the "*Za'm*-city," the principal city or metropolis of the *Za'm* Nome. In later times the name *Za'm* was applied in common speech to a particular locality on the western side of Thebes.

The sacred name of Thebes was *P-amen*, "the abode of Amon," which the Greeks reproduced in their *Diospolis* (Διὸς πόλις), especially with the addition *the Great* (ἡ μεγάλη), denoting that this was the chief seat of Jupiter-Ammon, and distinguishing it from *Diospolis the Less* (ἡ μικρά). No-Amon is the name of Thebes in the Hebrew Scriptures (Jer. xlvi. 25; Nah. iii. 8). Ezekiel uses *No* simply to designate the Egyptian seat of Ammon, which the Septuagint translates by Diospolis (Ez. xxx. 14, 16). Gesenius defines this name by the phrase "portion of Ammon," *i. e.* the possession of the god Ammon, as the chief seat of his worship.

The name of Thebes in the hieroglyphics is explained under NO-AMON.

The origin of the city is lost in antiquity. Niebuhr is of opinion that Thebes was much older than Memphis, and that "after the centre of Egyptian life was transferred to Lower Egypt, Memphis acquired its greatness through the ruin of Thebes" (*Lectures on Ancient History*, Lect. vii.). Other authorities assign priority to Memphis. But both cities date from our earliest authentic knowledge of Egyptian history. The first allusion to Thebes in classical literature is the familiar passage of the Iliad (ix. 381–385): "Egyptian Thebes, where are vast treasures laid up in the houses; where are a hundred gates, and from each two hundred men go forth with horses and chariots." Homer — speaking with a poet's license, and not with the accuracy of a statistician — no doubt incorporated into his verse the glowing accounts of the Egyptian capital current in his time. Wilkinson thinks it conclusive against a literal understanding of Homer, that no traces of an ancient city-wall can be found at Thebes, and accepts as probable the suggestion of Diodorus Siculus that the "gates" of Homer may have been the propylæa of the temples: "Non centum portas habuisse urbem, sed multa et ingentia templorum vestibula" (i. 45, 7). In the time of Diodorus, the city-wall, if any there was, had already disappeared, and the question of its existence in Homer's time was in dispute. But, on the other hand, to regard the "gates" of Homer as temple porches is to make these the barracks of the army, since from these gates the horsemen and chariots issue forth to war. The almost universal custom of walling the cities of antiquity, and the poet's reference to the gates as pouring forth troops, point strongly to the supposition that the vast area of Thebes was surrounded with a wall having many gates.

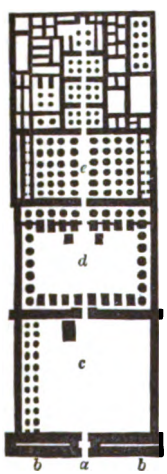
Homer's allusion to the treasures of the city, and to the size of its standing army, numbering 20,000 chariots, shows the early repute of Thebes for wealth and power. Its fame as a great capital had crossed the sea when Greece was yet in its infancy as a nation. It has been questioned whether Herodotus visited Upper Egypt (see *Dict. of Greek and Rom. Geog.* art. "Thebes"), but he says, "I went to Heliopolis *and to Thebes*, expressly to try whether the priests of those places would agree in their accounts with the priests at Memphis" (Herod. ii. 3). Afterwards he describes the features of the Nile valley, and the chief points and distances upon the river, as only an eye-witness would be likely to record them. He informs us that "from Heliopolis to Thebes is nine days' sail up the river, the distance 4,800 stadia . . . . and the distance from the sea inland to Thebes 6,120 stadia" (Herod. ii. 8, 9). In chap. 29 of the same book he states that he ascended the Nile as high as Elephantiné. Herodotus, however, gives no particular account of the city, which in his time had lost much of its ancient grandeur. He alludes to the temple of Jupiter there, with its ram-headed image, and to the fact that goats, never sheep, were offered in sacrifice. In the 1st century before Christ, Diodorus visited Thebes, and he devotes several sections of his general work to its history and appearance. Though he saw the city when it had sunk to quite secondary importance, he preserves the tradition of its early grandeur — its circuit of 140 stadia, the size of its public edifices, the magnificence of its temples, the number of its monuments, the dimensions of its private houses, some of them four or five stories high — all giving it an air of grandeur and beauty surpassing not only all other cities of Egypt, but of the world. Diodorus deplores the spoiling of its buildings and monuments by Cambyses (Diod. i. 45, 46). Strabo, who visited Egypt a little later — at about the beginning of the Christian era — thus describes (xvii. 816) the city under the name Diospolis: "Vestiges of its magnitude still exist which extend 80 stadia

Digitized by Google

in length. There are a great number of temples, many of which Cambyses mutilated. The spot is at present occupied by villages. One part of it, in which is the city, lies in Arabia; another is in the country on the other side of the river, where is the Memnonium." Strabo here makes the Nile the dividing line between Libya and Arabia. The temples of Karnak and Luxor are on the eastern side of the river, where was probably the main part of the city. Strabo gives the following description of the twin colossi still standing upon the western plain: "Here are two colossal figures near one another, each consisting of a single stone. One is entire; the upper parts of the other, from the chair, are fallen down — the effect, it is said, of an earthquake. It is believed that once a day a noise, as of a slight blow, issues from the part of the statue which remains in the seat, and on its base. When I was at those places, with Ælius Gallus, and numerous friends and soldiers about him, I heard a noise at the first hour of the day, but whether proceeding from the base, or from the colossus, or produced on purpose by some of those standing around the base, I cannot confidently assert. For, from the uncertainty of the cause, I am inclined to believe anything rather than that stones disposed in that manner could send forth sound" (xvii. § 46). Simple, honest, skeptical Strabo! Eighteen centuries later, the present writer interrogated these same stones as to the ancient mystery of sound; and not at sunrise, but in the glaring noon, the statue emitted a sharp, clear sound like the ringing of a disc of brass under a sudden concussion. This was produced by a ragged urchin, who, for a few piastres, clambered up the knees of the "vocal Memnon," and there effectually concealing himself from observation, struck with a hammer a sonorous stone in the lap of the statue. Wilkinson, who was one of the first to describe this sounding stone, conjectures that the priests had a secret chamber in the body of the statue, from which they could strike it unobserved at the instant of sunrise: thus producing in the credulous multitude the notion of a supernatural phenomenon. It is difficult to conceive, however, that such a trick, performed in open day, could have escaped detection, and we are therefore left to share the mingled wonder and skepticism of Strabo (see Wilkinson; also Thompson's *Photographic Views of Egypt, Past and Present*, p. 156).

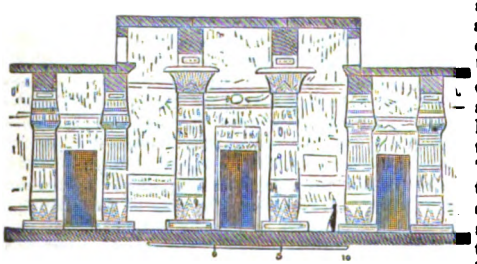
Pliny speaks of Thebes in Egypt as known to fame as "a hanging city," *i. e.* built upon arches, so that an army could be led forth from beneath the city while the inhabitants above were wholly unconscious of it. He mentions also that the river flows through the middle of the city. But he questions the story of the arches, because, "if this had really been the case, there is no doubt that Homer would have mentioned it, seeing that he has celebrated the hundred gates of Thebes." Do not the two stories possibly explain each other? May there not have been near the river-line arched buildings used as barracks, from whose gateways issued forth 20,000 chariots of war?

But, in the uncertainty of these historical allusions, the *monuments* of Thebes are the most reliable witnesses for the ancient grandeur of the city. These are found in almost equal proportions upon both sides of the river. The parallel ridges which skirt the narrow Nile valley upon the east and west from the northern limit of Upper Egypt, here sweep outward upon either side, forming a circular plain whose diameter is nearly ten miles. Through the centre of this plain flows the river, usually at this point about half a mile in width, but at the inundation overflowing the plain, especially upon the western bank, for a breadth of two or more miles. Thus the two colossal statues, which are several hundred yards from the bed of the low Nile, have accumulated about their bases alluvial deposit to the depth of seven feet.



The plan of the city, as indicated by the principal monuments, was nearly quadrangular, measuring two miles from north to south, and four from east to west. Its four great landmarks were, Karnak and Luxor upon the eastern or Arabian side, and Qoornah and Medeenet Haboo upon the western or Libyan side. There are indications that each of these temples may have been connected with those facing it upon two sides by grand *dromoi*, lined with sphinxes and other colossal figures. Upon the western bank there was almost a continuous line of temples and public edifices for a distance of two miles, from Qoornah to Medeenet Haboo; and Wilkinson conjectures that from a point near the latter, perhaps in the line of the colossi, the "Royal Street" ran down to the river, which was crossed by a ferry terminating at Luxor on the eastern side. The recent excavations and discoveries of M. Mariette, now in course of publication (1863), may enable us to restore the ground-plan of the city and its principal edifices with at least proximate accuracy.

It does not enter into the design, nor would it fall within the limits of this article, to give a minute description of these stupendous monuments. Not only are verbal descriptions everywhere accessible through the pages of Wilkinson, Kenrick, and other standard writers upon Egypt, but the magnificently illustrated work of Lepsius, already completed, the companion work of M. Mariette, just referred to, and multiplied photographs of the principal ruins, are within easy reach of the scholar through the munificence of public libraries. A mere outline of the groups of ruins must here suffice. Beginning at the northern extremity on the western bank, the first conspicuous ruins are those of a palace temple of the nineteenth dynasty, and therefore belonging to the middle style of Egyptian architecture. It bears the name *Menephtheion*, suggested by Champollion because it appears to have been founded by Menephthah (the Osirei of Wilkinson), though built principally by his son, the great Rameses. The plan of the building is much obscured by mounds of rubbish, but some of the bas-reliefs are in a fine state of preservation. There are traces of a dromos, 128 feet in length, with sphinxes, whose fragments here and there remain. This building stands upon a slight elevation, nearly a mile from the river, in the now deserted village of old Qoornah.



Nearly a mile southward from the Menephtheion are the remains of the combined palace and temple known since the days of Strabo as the Memnonium. An examination of its sculptures shows that this name was inaccurately applied, since the building was clearly erected by Rameses II. Wilkinson suggests that the title Miamun attached to the name of this king misled Strabo in his designation of the building. The general form of the Memnonium is that of a parallelogram in three main sections, the interior areas being successively narrower than the first court, and the whole ter

Digitized by Google

minating in a series of sacred chambers beautifully sculptured and ornamented. The proportions of this building are remarkably fine, and its remains are in a sufficient state of preservation to enable one to reconstruct its plan. From the first court or area, nearly 180 feet square, there is an ascent by steps to the second court, 140 feet by 170. Upon three sides of this area is a double colonnade, and on the south side a single row of Osiride pillars, facing a row of like pillars on the north, the other columns being circular. Another ascent leads to the hall, 100 + 133, which originally had 48 huge columns to support its solid roof. Beyond the hall are the sacred chambers. The historical sculptures upon the walls and columns of the Memnonium are among the most finished and legible of the Egyptian monuments. But the most remarkable feature of these ruins is the gigantic statue of Rameses II., once a single block of syenite carved to represent the king upon his throne, but now scattered in fragments upon the floor of the first hall. The weight of this statue has been computed at 887 tons, and its height at 75 feet. By measurement of the fragments, the writer found the body 51 feet around the shoulders, the arm 11 feet 6 inches from shoulder to elbow, and the foot 10 feet 10 inches in length, by 4 feet 8 inches in breadth. This stupendous monolith must have been transported at least a hundred miles from the quarries of Assouan. About a third of a mile further to the south are the two colossal statues already referred to, one of which is familiarly known as "the vocal Memnon." The height of each figure is about 53 feet above the plain.

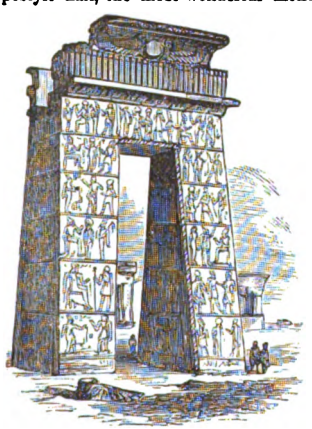
Plan of Memnonium.

Hall of Columns in the Memnonium.

Proceeding again toward the south for about the same distance, we find at *Medeenet Haboo* ruins upon a more stupendous scale than at any other point upon the western bank of Thebes. These consist of a temple founded by Thothmes I., but which also exhibits traces of the Ptolemaic architecture in the shape of pyramidal towers, gateways, colonnades, and vestibules, inscribed with the memorials of the Roman era in Egypt. This temple, even with all its additions, is comparatively small; but adjacent to it is the magnificent ruin known as the southern Rameseum the palace-temple of Rameses III. The general plan of this building corresponds with those above described; a series of grand courts or halls adorned with columns, conducting to the inner pavilion of the king or sanctuary of the god. The second court is one of the most remarkable in Egypt for the massiveness of its columns, which measure 24 feet in height by a circumference of nearly 23. Within this area are the fallen columns of a Christian church, which once established the worship of the true God in the very sanctuary of idols and amid their sculptured images and symbols. This temple presents some of the grandest effects of the old Egyptian architecture, and its battle-scenes are a valuable contribution to the history of Rameses III.

Behind this long range of temples and palaces are the Libyan hills, which, for a distance of five miles, are excavated to the depth of several hundred feet for sepulchral chambers. Some of these are of vast extent — one tomb, for instance, having a total area of 22,217 square feet. A retired valley in the mountains, now known as *Beeban-el-Melook*, seems to have been appropriated to the sepulchres of kings. Some of these, in the number and variety of their chambers, the finish of their sculptures, and the beauty and freshness of their frescoes, are among the most remarkable monuments of Egyptian grandeur and skill. It is from the tombs especially that we learn the manners and customs of domestic life, as from the temples we gather the record of dynasties and the history of battles. The preservation of these sculptured and pictorial records is due mainly to the dryness of the climate. The sacredness with which the Egyptians regarded their dead preserved these mountain catacombs from molestation during the long succession of native dynasties, and the sealing up of the entrance to the tomb for the concealment of the sarcophagus from human observation until its mummied occupant should resume his long-suspended life, has largely secured the city of the dead from the violence of invaders and the ravages of time. It is from the adornments of these subterranean tombs, often distinct and fresh as when prepared by the hand of the artist, that we derive our principal knowledge of the manners and customs of the Egyptians. Herodotus himself is not more minute and graphic than these silent but most descriptive walls. The illustration and confirmation which they bring to the sacred narrative, so well discussed by Hengstenberg, Osborn, Poole, and others, is capable of much ampler treatment than it has yet received. Every incident in the pastoral and agricultural life of the Israelites in Egypt and in the exactions of their servitude, every art employed in the fabrication of the tabernacle in the wilderness, every allusion to Egyptian rites, customs, laws, finds some counterpart or illustration in this picture-history of Egypt; and whenever the Theban cemetery shall be thoroughly explored, and its symbols and hieroglyphics fully interpreted by science, we shall have a commentary of unrivaled interest and value upon the books of Exodus and Leviticus, as well as the later historical books of the Hebrew Scriptures. The art of photography is already contributing to this result by furnishing scholars with materials for the leisurely study of the pictorial and monumental records of Egypt.

The eastern side of the river is distinguished b-



Digitized by Google

he remains of Luxor and Karnak, the latter being of itself a city of temples. The main colonnade of Luxor faces the river, but its principal entrance ooks northward towards Karnak, with which it was originally connected by a dromos 6,000 feet in length, lined on either side with sphinxes. At this entrance are two gigantic statues of Rameses II., one upon each side of the grand gateway; and in front of these formerly stood a pair of beautifully wrought obelisks of red granite, one of which now graces the Place de la Concorde at Paris.

The approach to Karnak from the south is marked by a series of majestic gateways and towers, which were the appendages of later times to the original structure. The temple properly faces the river, *i. e.* toward the northwest. The courts and propylæa connected with this structure occupy a space nearly 1,800 feet square, and the buildings represent almost every dynasty of Egypt, from Sesortasen I. to Ptolemy Euergetes I. Courts, pylons, obelisks, statues, pillars, everything pertaining to Karnak, are on the grandest scale. Nearest the river is an area measuring 275 feet by 329, which once had a covered corridor on either side, and a double row of columns through the centre, leading to the entrance of the hypostyle hall, the most wonderful monument

Figure of Rameses II.

Sculptured Gateway at Karnak.

of Egyptian architecture. This grand hall is a forest of sculptured columns; in the central avenue are twelve, measuring each 66 feet in height by 12 in diameter, which formerly supported the most elevated portion of the roof, answering to the clerestory in Gothic architecture; on either side of these are seven rows, each column nearly 42 feet high by 9 in diameter, making a total of 134 pillars in an area measuring 170 feet by 330. Most of the pillars are yet standing in their original site, though in many places the roof has fallen in. A moonlight view of this hall is the most weird and impressive scene to be witnessed among all the ruins of antiquity — the Coliseum of Rome not excepted. With our imperfect knowledge of mechanic arts among the Egyptians, it is impossible to conceive how the outer wall of Karnak — forty feet in thickness at the base, and nearly a hundred feet high — was built; how single blocks weighing several hundred tons were lifted into their place in the wall, or hewn into obelisks and statues to adorn its gates; how the majestic columns of the Grand Hall were quarried, sculptured, and set up in mathematical order; and how the whole stupendous structure was reared as a fortress in which the most ancient civilization of the world, as it were petrified or fossilized in the very flower of its strength and beauty, might defy the desolations of war, and the decay of centuries. The grandeur of Egypt is here in its architecture, and almost every pillar, obelisk, and stone tells its historic legend of her greatest monarchs.

We have alluded, in the opening of this article, to the debated question of the priority of Thebes to Memphis. As yet the data are not sufficient for its satisfactory solution, and Egyptologists are not agreed. Upon the whole we may conclude that before the time of Menes there was a local sovereignty in the Thebaid, but the historical nationality of Egypt dates from the founding of Memphis. "It is probable that the priests of Memphis and Thebes differed in their representations of early history, and that each sought to extol the glory of their own city. The history of Herodotus turns about Memphis as a centre; he mentions Thebes only incidentally, and does not describe or allude to one of its monuments. Diodorus, on the contrary, is full in his description of Thebes, and says little of Memphis. But the distinction of Upper and Lower Egypt exists in geological structure, in language, in religion, and in historical tradition" (Kenrick). A careful digest of the Egyptian and Greek authorities, the Turin papyrus, and the monumental tablets of Abydos and Karnak, gives this general outline of the early history of Egypt: That before Memphis was built, the nation was mainly confined to the valley of the Nile, and subdivided politically into several sovereignties, of which Thebes was one; that Menes, who was a native of *This* in the Thebaid, centralized the government at Memphis, and united the upper and lower countries; that Memphis retained its preëminence, even in the hereditary succession of sovereigns, until the twelfth and thirteenth dynasties of Manetho, when Diospolitan kings appear in his lists, who brought Thebes into prominence as a royal city; that when the Shepherds or Hyksos, a nomadic race from the east, invaded Egypt and fixed their capital at Memphis, a native Egyptian dynasty was maintained at Thebes, at times tributary to the Hyksos, and at times in military alliance with Ethiopia against the invaders; until at length, by a general uprising of the Thebaid, the Hyksos were expelled, and Thebes became the capital of all Egypt under the resplendent eighteenth dynasty. This was the golden era of the city as we have already described it from its monuments. The names and deeds of the Thothmes and the Rameses then figure upon its temples and palaces, representing its wealth and grandeur in architecture, and its prowess in arms. Then it was that Thebes extended her sceptre over Libya and Ethiopia on the one hand, and on the other over Syria, Media, and Persia; so that the walls of her palaces and temples are crowded with battle-scene

Digitized by Google

in which all contiguous nations appear as captives or as suppliants. This supremacy continued until the close of the nineteenth dynasty, or for a period of more than five hundred years; but under the twentieth dynasty—the Diospolitan house of Rameses numbering ten kings of that name — the glory of Thebes began to decline, and after the close of that dynasty her name no more appears in the lists of kings. Still the city was retained as the capital, in whole or in part, and the achievements of Shishonk the Bubastite, of Tirhakah the Ethiopian, and other monarchs of celebrity, are recorded upon its walls. The invasion of Palestine by Shishonk is graphically depicted upon the outer wall of the grand hall of Karnak, and the names of several towns in Palestine, as well as the general name of "the land of the king of Judah," have been deciphered from the hieroglyphics. At the later invasion of Judæa by Sennacherib, we find Tirhakah, the Ethiopian monarch of the Thebaid, a powerful ally of the Jewish king. But a century later, Ezekiel proclaims the destruction of Thebes by the arm of Babylon: "I will execute judgments in No:" "I will cut off the multitude of No;" "No shall be rent asunder, and Noph [Memphis] shall have distresses daily" (Ez. xxx. 14–16); and Jeremiah, predicting the same overthrow, says, "The Lord of Hosts, the God of Israel saith, Behold, I will punish the multitude of No, and Pharaoh, and Egypt, with their gods and their kings." The Persian invader completed the destruction that the Babylonian had begun; the hammer of Cambyses leveled the proud statue of Rameses, and his torch consumed the temples and palaces of the city of the hundred gates. No-Ammon, the shrine of the Egyptian Jupiter, "that was situate among the rivers, and whose rampart was the sea," sank from its metropolitan splendor to the position of a mere provincial town; and, notwithstanding the spasmodic efforts of the Ptolemies to revive its ancient glory, became at last only the desolate and ruined sepulchre of the empire it had once embodied. It lies to-day a nest of Arab hovels amid crumbling columns and drifting sands.

* Three names of Thebes are made prominent in the hieroglyphic monuments of the city. The first is the sacerdotal name *Pi-amun* — the abode of Ammon. The expression *No-amun*, which corresponds even more exactly with the Greek Διοσπολις, is found in the Sallier Papyrus, No. III., showing that the Hebrew prophets used a well-known designation of the city. At Thebes Ammon was worshipped preëminently under the type of the sun.

A second designation of Thebes was the city of *Apetu* or *Apet*. Some have attempted to derive the name Thebes from this title, thus: *Ta-Apetu*, or more simply *Ta-ape*, by contraction *Tape*, which the Greeks softened into Θήβη. But this derivation is hypothetical, and at best it seems plain from the hieroglyphics that the name *Apetu* was given to but a single quarter of ancient Thebes, — a section of the eastern bank embracing the great temple of Karnak. The name *Apetu* has not been found upon any monument of the old empire.

There is a third designation, or perhaps more properly a representation, of the city in the hieroglyphics, from which it is conjectured that the Greeks derived its name. This capital is pictured as a martial city, thoroughly equipped, and armed with divine power for dominion over all nations. These symbols give the name *Obè*, which with the feminine article becomes *Tobè* or *Tebè*, which appears in the Greek form Θήβη. *Tebè* and not *Apetu* was the city of Ammon, who there dwelt in *Apetu*, which was probably the great temple of Karnak.

The foregoing is the substance of a monograph by Mons. F. Chabas, entitled *Recherches sur le nom égyptien de Thèbes*, and is the latest contribution to the literature of the subject.

The explorations of M. Mariette-Bey, M. Dümichen, and others, have brought to light some curious memorials of Thebes that serve to illustrate its ancient history and renown, and to verify the surviving fragments of its literature. The Abbott papyrus relates to the conviction and punishment of a band of robbers that in the reign of Rameses IX. spoiled the necropolis of Thebes of treasures deposited in tombs of the priestesses of Ammon and in the royal sepulchres. In the vicinity of Gournah, M. Mariette has identified three of ten royal tombs named in the papyrus. This fixes definitely the quarter of the city referred to in the papyrus.

M. Mariette's excavations within the temple of Karnak have restored to the eye of scholars valuable inscriptions that had long been hidden under the sand. In particular he has restored as far as possible the famous Annals of Thothmes III., from the sanctuary which that monarch built in the centre of the great temple as a memorial of his victories. Under the date of each year of this inscription follows a narrative of the warlike expeditions of the year, which is followed by an enumeration of the spoils. The minute accuracy of these returns may be judged by an example of the tribute paid by Cush: gold, 154 pounds 2 ounces; slaves, male and female, 134; beef-cattle, young, 114; bulls, 305; total 419, &c. These annals shed light upon ancient geography, and upon the Biblical and other accounts of the wars of Egypt in the East. From one hundred and fifteen names we instance Arabia, Cush, Eglon, Gaza, Mageddo, Mesopotamia, Nineveh, Taanak, in the list of battles or conquest. In one inscription it is stated that the king set up a monument in Mesopotamia to mark the eastern boundary of Egypt.

The commerce of antiquity is also illustrated by these inscriptions. Cush returns a tribute of gold, silver, and cattle; the Rotennou, ivory, cattle, horses, goats, metals, armor, precious woods; the Syrians, silver, iron, lapis-lazuli, and leather; an unknown people, precious vases, dates, honey, wine, farina, perfumes, asses, and instruments of iron. Mention is made also of chariots ornamented with silver, and of shiploads of ivory, ebony, leopard-skins, etc. All this confirms the story of Herodotus touching the immense wealth and the vast military power of Thebes. Fifteen successive campaigns are here recorded in which the monarch himself carried his triumphant arms to the very heart of Asia. In some of these campaigns he marched through Cœle-Syria, and subdued the region of Lebanon. The entire inscription of Thothmes III. is translated in the *Revue Archéologique*, Nouvelle Série, vol. ii.

The inscription of Shishak upon the outer wall of Karnak in the same way illustrates the power and grandeur of Thebes, even when bordering upon its decline. J. P. T.

**THE'BEZ** (תֵּבֵץ [*brightness*]: Θήβης Θαμασί; Alex. Θαιβαις, Θαμασει: *Thebes*). A place memorable for the death of the brave Abime-

Digitized by Google

ech (Judg. ix. 50 [a]). After suffocating a thousand of the Shechemites in the hold of Baal-berith by the smoke of green wood — an exploit which recalls the notorious feat of a modern French general in Algeria (Eccl. i. 9, 10) — he went off with his band to Thebez. The town was soon taken, all but one tower, into which the people of the place crowded, and which was strong enough to hold out. To this he forced his way, and was about to repeat the barbarous stratagem which had succeeded so well at Shechem, when the fragment of millstone descended and put an end to his turbulent career. The story was well known in Israel, and gave the point to a familiar maxim in the camp (2 Sam. xi. 21).

Thebez is not mentioned again in the Bible. But it was known to Eusebius and Jerome. In their day the village still bore its old name, and was situated "in the district of Neapolis," 13 Roman miles therefrom, on the road to Scythopolis (*Onom.* Θήβης). There it still is; its name — *Tubâs* — hardly changed; the village on a rising ground to the left of the road, a thriving, compact, and strong-looking place, surrounded by immense woods of olives, and by perhaps the best cultivated land in all Palestine. It was known to hap-Parchi in the 13th century (Zunz's *Benjamin*, ii. 426), and is mentioned occasionally by later travellers. But Dr. Robinson appears to have been the first to recognize its identity with Thebez (*Bibl. Res.* iii. 305).

G.

**THECO'E, THE WILDERNESS OF** (τὴν ἔρημον Θεκωέ: *desertum Thecua*). The wild, uncultivated pastoral tract lying around the town of Tekoa, more especially to the east of it (1 Macc. ix. 33). In the Old Test. (2 Chr. xx. 20) it is mentioned by the term *Midbar*, which answers to the Greek ἔρημος.

Thecoe is merely the Greek form of the name TEKOA. G.

**THELA'SAR** (תִּלְאַשּׁוּר [*hill of Assyria*, Ges., Fürst]: Θαεσθέν; Alex. Θαλασσαρ: *Thelassar*). Another form of the name examined under TEL-ASSAR. It occurs 2 K. xix. 12. The A. V. is unfortunate in respect of this name, for it has contrived to give the contracted Hebrew form in the longest English shape, and *vice versâ*. G.

**THELER'SAS** (Θελερσάς; [Alex. Θελασας:] *Thelharsa*), 1 Esdr. v. 36. The Greek equivalent of the name TEL-HARSAS.

**THE'MAN** (Θαιμάν: *Theman*), Bar. iii. 22, 23. [TEMAN.]

**THEOCA'NUS** (Θεωκανός; [Vat. Θοκανος:] Alex. Θωκανος: *Thecam*). TIKVAH the father of Jahaziah (1 Esdr. ix. 14).

**THEOD'OTUS** (Θεόδοτος [*given by God*]: *Theodotius, Theodorus*). An envoy sent by Nicanor to Judas Macc. c. B. C. 162 (2 Macc. xiv. 19).

B. F. W.

**THEOPH'ILUS** (Θεόφιλος [*friend of God*]). 1. The person to whom St. Luke inscribes his Gospel and the Acts of the Apostles (Luke i. 3; Acts i. 1). The important part played by Theophilus, as having immediately occasioned the composition of these two books, together with the silence of Scripture concerning him, has at once stimulated conjecture, and left the field clear for it Accordingly we meet with a considerable number and variety of theories concerning him.

(1.) Several commentators, especially among the Fathers, have been disposed to doubt the personality of Theophilus, regarding the name either as that of a fictitious person, or as applicable to every Christian reader. Thus Origen (*Hom.* i. *in Luc.*) raises the question, but does not discuss it, his object being merely practical. He says that all who are beloved of God are Theophili, and may therefore appropriate to themselves the Gospel which was addressed to Theophilus. Epiphanius (*Hæres.* li. p. 429) speaks doubtfully: εἴτ' οὖν τινι Θεοφίλῳ τότε γράφων ἔλεγεν, ἢ παντὶ ἀνθρώπῳ Θεὸν ἀγαπῶντι. Salvianus (*Epist.* ix. *ad Salonium*) apparently assumes that Theophilus had no historical existence. He justifies the composition of a work addressed "Ad Ecclesiam Catholicam," under the name of Timotheus, by the example of the Evangelist St. Luke, who addressed his Gospel nominally to a particular man, but really to "the love of God:" "nam sicut Theophili vocabulo amor, sic Timothei honor divinitatis exprimitur." Even Theophylact, who believes in the existence of Theophilus, takes the opportunity of moralizing upon his name: καὶ πᾶς δὲ ἄνθρωπος θεοφιλὴς, καὶ κράτος κατὰ τῶν παθῶν ἀναδειξάμενος, θεόφιλός ἐστι κράτιστος, ὃς καὶ ἄξιος τῷ ὄντι ἐστὶν ἀκούειν τοῦ Εὐαγγελίου (*Argum. in Luc.*). Among modern commentators Hammond and Leclerc accept the allegorical view: Erasmus is doubtful, but on the whole believes Theophilus to have had a real existence.

(2.) From the honorable epithet κράτιστε, applied to Theophilus in Luke i. 3, compared with the use of the same epithet as applied by Claudius Lysias and Tertullus severally to Felix, and by St. Paul to Festus (Acts xxiii. 26, xxiv. 3, xxvi. 25), it has been argued with much probability, but not quite conclusively, that he was a person in high official position. Thus Theophylact (*Argum. in Luc.*) conjectures that he was a Roman governor, or a person of senatorial rank, grounding his conjecture expressly on the use of κράτιστε. Œcumenius (*ad Act. Apost.* i. 1) tells us that he was a governor, but gives no authority for the assertion. The traditional connection of St. Luke with Antioch has disposed some to look upon Antioch as the abode of Theophilus, and possibly as the seat of his government. Bengel believes him to have been an inhabitant of Antioch, "ut veteres testantur." The belief may partly have grown out of a story in the so-called *Recognitions of St. Clement* (lib. x.), which represents a certain nobleman of Antioch of that name to have been converted by the preaching of St. Peter, and to have dedicated his own house as a church, in which, as we are told, the Apostle fixed his episcopal seat. Bengel thinks that the omission of κράτιστε in Acts i. 1 proves that St. Luke was on more familiar terms with Theophilus than when he composed his Gospel.

(3.) In the Syriac Lexicon extracted from the *Lexicon Heptaglotton* of Castell, and edited by Michaelis (p. 948), the following description of Theophilus is quoted from Bar Bahlul, a Syrian lexicographer of the 10th century: "Theophilus, primus credentium et celeberrimus apud Alexan-

[a] In the Hebrew text Thebez occurs twice in the verse, but in the LXX it stands thus, "And Abimelech went out of Bethelberith (Vulg. *inde*) and fell upon Thebez," etc.

Digitized by Google

friensea, qui cum aliis Ægyptiis Lucam rogabat, ut eis Evangelium scriberet." In the inscription of the Gospel according to St. Luke in the Syriac version we are told that it was published at Alexandria. Hence it is inferred by Jacob Hase (*Bibl. Bremensis Class.* iv. Fasc. iii. Diss. 4, quoted by Michaelis, *Introd. to the N. T.*, vol. iii. ch. vi. § 4, ed. Marsh) and by Bengel (*Ordo Temporum*, p. 196, ed. 2), that Theophilus was, as asserted by Bar Bahlul, a convert of Alexandria. This writer ventures to advance the startling opinion that Theophilus, if an Alexandrian, was no other than the celebrated Philo, who is said to have borne the Hebrew name of Jedidiah (יְדִידְיָה, *i. e.* Θεόφιλος). It hardly seems necessary to refute this theory, as Michaelis has refuted it, by chronological arguments.

(4.) Alexander Morus (*Ad quædam loca Nov. Fœd. Notæ: ad Luc.* i. 1) makes the rather hazardous conjecture that the Theophilus of St. Luke is identical with the person who is recorded by Tacitus (*Ann.* ii. 55) to have been condemned for fraud at Athens by the court of the Areopagus. Grotius also conjectures that he was a magistrate of Achaia baptized by St. Luke. The conjecture of Grotius must rest upon the assertion of Jerome (an assertion which, if it is received, renders that of Alex. Morus possible, though certainly most improbable), namely, that Luke published his Gospel in the parts of Achaia and Bœotia (Jerome, *Comm. in Matt.* Prœm.).

(5.) It is obvious to suppose that Theophilus was a Christian. But a different view has been entertained. In a series of Dissertations in the *Bibliotheca Bremensis*, of which Michaelis gives a *résumé* in the section already referred to, the notion that he was not a Christian is maintained by different writers, and on different grounds. Heumann, one of the contributors, assuming that he was a Roman governor, argues that he could not be a Christian, because no Christian would be likely to have such a charge entrusted to him. Another writer, Theodore Hase, believes that the Theophilus of Luke was no other than the deposed high-priest Theophilus the son of Ananus, of whom more will be said presently. Michaelis himself is inclined to adopt this theory. He thinks that the use of the word κατηχήθης in Luke i. 4, proves that Theophilus had an imperfect acquaintance with the facts of the Gospel (an argument of which Bishop Marsh very properly disposes in his note upon the passage of Michaelis), and further contends, from the ἐν ἡμῖν of Luke i. 1, that he was not a member of the Christian community. He thinks it probable that the Evangelist wrote his Gospel during the imprisonment of St. Paul at Cæsarea, and addressed it to Theophilus as one of the heads of the Jewish nation. According to this view, it would be regarded as a sort of historical apology for the Christian faith.

In surveying this series of conjectures, and of traditions which are nothing more than conjectures, we find it easier to determine what is to be rejected than what we are to accept. In the first place, we may safely reject the Patristic notion that Theophilus was either a fictitious person, or a mere personification of Christian love. Such a personification is alien from the spirit of the New Testament writers, and the epithet κράτιστε is a sufficient evidence of the historical existence of Theophilus. It does not, indeed, prove that he was a governor, but it makes it most probable that he was a person of high rank. His supposed connection with Antioch, Alexandria, or Achaia, rests on too slender evidence either to claim acceptance or to need refutation; and the view of Theodore Hase, although endorsed by Michaelis, appears to be incontestably negatived by the Gentile complexion of the Third Gospel. The grounds alleged by Heumann for his hypothesis that Theophilus was not a Christian are not at all trustworthy, as consisting of two very disputable premises. For, in the first place, it is not at all evident that Theophilus was a Roman governor; and in the second place, even if we assume that at that time no Christian would be appointed to such an office (an assumption which we can scarcely venture to make), it does not at all follow that no person in that position would become a Christian. In fact, we have an example of such a conversion in the case of Sergius Paulus (Acts xiii. 12). In the article on the GOSPEL OF LUKE [vol. ii. p. 1697 *a*], reasons are given for believing that Theophilus was "not a native of Palestine. . . . not a Macedonian, nor an Athenian, nor a Cretan. But that he was a native of Italy, and perhaps an inhabitant of Rome, is probable from similar data." All that can be conjectured with any degree of safety concerning him, comes to this, that he was a Gentile of rank and consideration, who came under the influence of St. Luke, or (not improbably) under that of St. Paul, at Rome, and was converted to the Christian faith. It has been observed that the Greek of St. Luke, which elsewhere approaches more nearly to the classical type than that of the other Evangelists, is purer and more elegant in the dedication to Theophilus than in any other part of his Gospel.

2. A Jewish high-priest, the son of Annas or Ananus, brother-in-law to Caiaphas [ANNAS; CAIAPHAS], and brother and immediate successor of Jonathan. The Roman Prefect Vitellius came to Jerusalem at the Passover (A. D. 37), and deposed Caiaphas, appointing Jonathan in his place. In the same year, at the feast of Pentecost, he came to Jerusalem, and deprived Jonathan of the high-priesthood, which he gave to Theophilus (Joseph. *Ant.* xviii. 4, § 3, xviii. 5, § 3). Theophilus was removed from his post by Herod Agrippa I., after the accession of that prince to the government of Judæa in A. D. 41, so that he must have continued in office about five years (Joseph. *Ant.* xix. 6, § 2). Theophilus is not mentioned by name in the New Testament; but it is most probable that he was the high-priest who granted a commission to Saul to proceed to Damascus, and to take into custody any believers whom he might find there. W. B. J.

**THE'RAS** (Θέρα; [in ver. 41, Vat. omits:] *Thia*; Syr. *Tharan*). The equivalent in 1 Esdr. viii. 41, 61, for the AHAVA of the parallel passage in Ezra. Nothing whatever appears to be known of it.

**THER'MELETH** (Θερμελέθ: *Thelmela*), 1 Esdr. v. 36. The Greek equivalent of the name TEL-MELAH.

**THESSALO'NIANS, FIRST EPISTLE TO THE.** 1. The *date* of the epistle is made out approximately in the following way. During the course of his second missionary journey, probably in the year 52, St. Paul founded the Church of Thessalonica. Leaving Thessalonica he passed on to Berœa. From Berœa he went to Athens and from Athens to Corinth (Acts xvii. 1–xviii. 18). With this visit to Corinth, which extends over

Digitized by Google

period of two years or thereabouts, his second missionary journey closed, for from Corinth he returned to Jerusalem, paying only a brief visit to Ephesus on the way (xviii. 20, 21). Now it appears that, when this epistle was written, Silvanus and Timotheus were in the Apostle's company (1 Thess. i. 1; comp. 2 Thess. i. 1) — a circumstance which confines the date to the second missionary journey, for though Timotheus was with him on several occasions afterwards, the name of Silvanus appears for the last time in connection with St. Paul during this visit to Corinth (Acts xviii. 5; 2 Cor. i. 19). The epistle then must have been written in the interval between St. Paul's leaving Thessalonica and the close of his residence at Corinth, *i. e.* according to the received chronology within the years 52–54. The following considerations however narrow the limits of the possible date still more closely. (1.) When St. Paul wrote, he had already visited, and probably left Athens (1 Thess. iii. 1). (2.) Having made two unsuccessful attempts to revisit Thessalonica, he had dispatched Timothy to obtain tidings of his converts there. Timothy had returned before the Apostle wrote (iii. 2, 6). (3.) St. Paul speaks of the Thessalonians as "ensamples to all that believe in Macedonia and Achaia," adding that "in every place their faith to Godward was spread abroad" (i. 7, 8) — language prompted indeed by the overflowing of a grateful heart, and therefore not to be rigorously pressed, but still implying some lapse of time at least. (4.) There are several traces of a growth and progress in the condition and circumstances of the Thessalonian Church. Perhaps the mention of "rulers" in the church (v. 12) ought not to be adduced as proving this, since some organization would be necessary from the very beginning. But there is other evidence besides. Questions had arisen relating to the state of those who had fallen asleep in Christ, so that one or more of the Thessalonian converts must have died in the interval (iv. 13–18). The storm of persecution which the Apostle had discerned gathering on the horizon had already burst upon the Christians of Thessalonica (iii. 4, 7). Irregularities had crept in and sullied the infant purity of the church (iv. 4, v. 14). The lapse of a few months however would account for these changes, and a much longer time cannot well be allowed. For (5) the letter was evidently written by St. Paul immediately on the return of Timothy, in the fullness of his gratitude for the joyful tidings (iii. 6). Moreover, (6) the second epistle also was written before he left Corinth, and there must have been a sufficient interval between the two to allow of the growth of fresh difficulties, and of such communication between the Apostle and his converts as the case supposes. We shall not be far wrong therefore in placing the writing of this epistle early in St. Paul's residence at Corinth, a few months after he had founded the church at Thessalonica, at the close of the year 52 or the beginning of 53. The statement in the subscription appearing in several MSS. and versions, that it was written "from Athens," is a superficial inference from 1 Thess. iii. 1, to which no weight should be attached. The views of critics who have assigned to this epistle a later date than the second missionary journey are stated and refuted in the Introductions of Koen (p. 33, etc.), and Lünemann (§ 3).

2. The epistles to the Thessalonians then (for the second followed the first after no long interval) are the earliest of St. Paul's writings — perhaps the earliest written records of Christianity. They belong to that period which St. Paul elsewhere styles "the beginning of the Gospel" (Phil. iv. 15). They present the disciples in the first flush of love and devotion, yearning for the day of deliverance, and straining their eyes to catch the first glimpse of their Lord descending amidst the clouds of heaven, till in their feverish anxiety they forget the sober business of life, absorbed in this one engrossing thought. It will be remembered that a period of about five years intervenes before the second group of epistles — those to the Corinthians, Galatians, and Romans — were written, and about twice that period to the date of the epistles of the Roman captivity. It is interesting therefore to compare the Thessalonian Epistles with the later letters, and to note the points of difference. These differences are mainly threefold. (1.) In the general *style* of these earlier letters there is greater simplicity and less exuberance of language. The brevity of the opening salutation is an instance of this. "Paul . . . . to the Church of the Thessalonians in God the Father and the Lord Jesus Christ, grace and peace to you" (1 Thess. i. 1; comp. 2 Thess. i. 1). The closing benediction is correspondingly brief: — "The grace of our Lord Jesus Christ be with you" (1 Thess. v. 28; comp. 2 Thess. iii. 18). And throughout the epistles there is much more evenness of style, words are not accumulated in the same way, the syntax is less involved, parentheses are not so frequent, the turns of thought and feeling are less sudden and abrupt, and altogether there is less intensity and variety than we find in St. Paul's later epistles. (2.) The *antagonism to St. Paul* is not the same. The direction of the attack has changed in the interval between the writing of these epistles and those of the next group. Here the opposition comes from *Jews*. The admission of the Gentiles to the hopes and privileges of Messiah's kingdom on any condition is repulsive to them. They "forbad the Apostle to speak to the Gentiles that they might be saved" (ii. 16). A period of five years changes the aspect of the controversy. The opponents of St. Paul are now no longer *Jews*, so much as *Judaizing Christians* (Ewald, *Jahrb.* iii. 249; *Sendschr.*, p. 14). The question of the admission of the Gentiles has been solved by time, for they have "taken the kingdom of heaven by storm." But the antagonism to the Apostle of the Gentiles, having been driven from its first position, entrenched itself behind a second barrier. It was now urged that though the Gentiles may be admitted to the Church of Christ, the only door of admission is the Mosaic covenant-rite of circumcision. The language of St. Paul, speaking of the Jewish Christians in this epistle, shows that the opposition to his teaching had not at this time assumed this second phase. He does not yet regard them as the disturbers of the peace of the church, the false teachers who by imposing a bondage of ceremonial observances frustrate the free grace of God. He can still point to them as examples to his converts at Thessalonica (ii. 14). The change indeed was imminent, the signs of the gathering storm had already appeared (Gal. ii. 11), but hitherto they were faint and indistinct, and had scarcely darkened the horizon of the Gentile churches. (3.) It will be no surprise that the doctrinal teaching of the Apostle does not bear quite the same aspect in these as in the later epistles. Many of the distinctive doctrines of Christianity which are inseparably connected with

Digitized by Google

St. Paul's name, though implicitly contained in the teaching of these earlier letters — as indeed they follow directly from the true conception of the Person of Christ — were yet not evolved and distinctly enunciated till the needs of the church drew them out into prominence at a later date. It has often been observed, for instance, that there is in the Epistles to the Thessalonians no mention of the characteristic contrast of "faith and works;" that the word "justification" does not once occur; that the idea of dying with Christ and living with Christ, so frequent in St. Paul's later writings, is absent in these. It was in fact the opposition of Judaizing Christians, insisting on a strict ritualism, which led the Apostle somewhat later to dwell at greater length on the true doctrine of a saving faith, and the true conception of a godly life. But the time had not yet come, and in the epistles to the Thessalonians, as has been truly observed, the Gospel preached is that of the coming of Christ, rather than of the cross of Christ. There are many reasons why the subject of the second advent should occupy a larger space in the earliest stage of the Apostolical teaching than afterwards. It was closely bound up with the fundamental fact of the Gospel, the resurrection of Christ, and thus it formed a natural starting-point of Christian doctrine. It afforded the true satisfaction to those Messianic hopes which had drawn the Jewish converts to the fold of Christ. It was the best consolation and support of the infant church under persecution, which must have been most keenly felt in the first abandonment of worldly pleasures and interests. More especially, as telling of a righteous Judge who would not overlook iniquity, it was essential to that call to repentance which must everywhere precede the direct and positive teaching of the Gospel. "Now He commandeth all men everywhere to repent, for He hath appointed a day in the which He will judge the world in righteousness by that man whom He hath ordained, whereof He hath given assurance unto all men in that He raised him from the dead" (Acts xvii. 30, 31).

3. The *occasion* of this epistle was as follows: St. Paul had twice attempted to revisit Thessalonica, and both times had been disappointed. Thus prevented from seeing them in person, he had sent Timothy to inquire and report to him as to their condition (iii. 1–5). Timothy returned with most favorable tidings, reporting not only their progress in Christian faith and practice, but also their strong attachment to their old teacher (iii. 6–10). The First Epistle to the Thessalonians is the outpouring of the Apostle's gratitude on receiving this welcome news. At the same time the report of Timothy was not unmixed with alloy. There were certain features in the condition of the Thessalonian Church which called for St. Paul's interference, and to which he addresses himself in his letter. (1.) The very intensity of their Christian faith, dwelling too exclusively on the day of the Lord's coming, had been attended with evil consequences. On the one hand a practical inconvenience had arisen. In their feverish expectation of this great crisis, some had been led to neglect their ordinary business, as though the daily concerns of life were of no account in the immediate presence of so vast a change (iv. 11; comp. 2 Thess. ii. 1, iii. 6, 11, 12). On the other hand a theoretical difficulty had been felt. Certain members of the church had died, and there was great anxiety lest they should be excluded from any share in the glories of the Lord's advent (iv. 13–18). St. Paul rebukes the irregularities of the former, and dissipates the fears of the latter (2.) The flame of persecution had broken out, and the Thessalonians needed consolation and encouragement under their sore trial (ii. 14, iii. 2–4). (3.) An unhealthy state of feeling with regard to spiritual gifts was manifesting itself. Like the Corinthians at a later day, they needed to be reminded of the superior value of "prophesying," compared with other gifts of the Spirit which they exalted at its expense (vv. 19, 20). (4.) There was the danger, which they shared in common with most Gentile churches, of relapsing into their old heathen profligacy. Against this the Apostle offers a word in season (iv. 4–8). We need not suppose however that Thessalonica was worse in this respect than other Greek cities.

4. Yet notwithstanding all these drawbacks, the condition of the Thessalonian Church was highly satisfactory, and the most cordial relations existed between St. Paul and his converts there. This honorable distinction it shares with the other great church of Macedonia, that of Philippi. At all times, and amidst every change of circumstance, it is to his Macedonian churches that the Apostle turns for sympathy and support. A period of about ten years is interposed between the First Epistle to the Thessalonians and the Epistle to the Philippians, and yet no two of his letters more closely resemble each other in this respect. In both he drops his official title of Apostle in the opening salutation, thus appealing rather to their affection than to his own authority; in both he commences the body of his letter with hearty and unqualified commendation of his converts; and in both the same spirit of confidence and warm affection breathes throughout.

5. A comparison of the narrative in the Acts with the allusions in this and the Second Epistle to the Thessalonians is instructive. With some striking coincidences, there is just that degree of divergence which might be expected between a writer who had borne the principal part in the scenes referred to, and a narrator who derives his information from others, between the casual half-expressed allusions of a familiar letter and the direct account of the professed historian.

Passing over patent coincidences, we may single out one of a more subtle and delicate kind. It arises out of the form which the accusation brought against St. Paul and his companions at Thessalonica takes in the Acts: "All these do contrary to the decrees of Cæsar, saying that there is another king, one Jesus" (xvii. 7). The allusions in the Epistles to the Thessalonians enable us to understand the ground of this accusation. It appears that the *kingdom* of Christ had entered largely into his oral teaching in this city, as it does into that of the Epistles themselves. He had charged his new converts to await the coming of the Son of God from heaven, as their deliverer (i. 10). He had dwelt long and earnestly (προείπαμεν καὶ διεμαρτυράμεθα) on the terrors of the judgment which would overtake the wicked (iv. 6). He had even explained at length the signs which would usher in the last day (2 Thess. ii. 5). Either from malice or in ignorance such language had been misrepresented, and he was accused of setting up a rival sovereign to the Roman emperor.

On the other hand, the language of these epistles diverges from the narrative of St. Luke on two or three points in such a way as to establish the inde-

Digitized by Google

pendence of the two accounts, and even to require some explanation. (1.) The first of these relates to the composition of the Church of Thessalonica. In the first epistle St. Paul addresses his readers distinctly as Gentiles, who had been converted from idolatry to the Gospel (i 9, 10). In the Acts we are told that "some (of the Jews) believed . . . . and of the devout Greeks (*i. e.* proselytes) a great multitude, and of the chief women not a few" (xvii. 4). If for σεβομένων Ἑλλήνων we read σεβομένων καὶ Ἑλλήνων, "proselytes and Greeks," the difficulty vanishes; but though internal probabilities are somewhat in favor of this reading, the array of direct evidence (now reinforced by the Cod. Sinaiticus) is against it. But even if we retain the common reading, the account of St. Luke does not exclude a number of believers converted directly from heathendom — indeed, if we may argue from the parallel case at Berœa (xvii. 12), the "women" were chiefly of this class: and, if any divergence remains, it is not greater than might be expected in two independent writers, one of whom, not being an eye-witness, possessed only a partial and indirect knowledge.[a] Both accounts alike convey the impression that the Gospel made but little progress with the Jews themselves. (2.) In the epistle the persecutors of the Thessalonian Christians are represented as their fellow-countrymen, *i. e.* as heathens (ὑπὸ τῶν ἰδίων συμφυλετῶν, ii. 14), whereas in the Acts the Jews are regarded as the bitterest opponents of the faith (xvii. 5). This is fairly met by Paley (*Horæ Paul.* ix. No. 5), who points out that the Jews were the instigators of the persecution, which however they were powerless of themselves to carry out without aid from the heathen, as may be gathered even from the narrative of St. Luke. We may add also, that the expression ἴδιοι συμφυλέται need not be restricted to the heathen population, but might include many Hellenist Jews who must have been citizens of the free town of Thessalonica. (3.) The narrative of St. Luke appears to state that St. Paul remained only three weeks at Thessalonica (xvii. 2), whereas in the epistle, though there is no direct mention of the length of his residence among them, the whole language (i. 4, ii. 4–11) points to a much longer period. The latter part of the assertion seems quite correct; the former needs to be modified. In the Acts it is stated simply that for three Sabbath days (three weeks) St. Paul taught in the synagogue. The silence of the writer does not exclude subsequent labor among the Gentile population, and indeed as much seems to be implied in the success of his preaching, which exasperated the Jews against him. (4.) The notices of the movements of Silas and Timotheus in the two documents do not accord at first sight. In the Acts St. Paul is conveyed away secretly from Berœa to escape the Jews. Arrived at Athens, he sends to Silas and Timothy, whom he had left behind at Berœa, urging them to join him as soon as possible (xvii. 14–16). It is evident from the language of St. Luke that the Apostle expects them to join him at Athens. Yet we hear nothing more of them for some time, when at length, after St. Paul had passed on to Corinth, and several incidents had occurred since his arrival there, we are told that Silas and Timotheus came from Macedonia (xvii. 5). From the first epistle, on the other hand we gather the following facts. St. Paul there tells us that they (ἡμεῖς, *i. e.* himself, and probably Silas), no longer able to endure the suspense, "consented to be left alone at Athens, and sent Timothy their brother" to Thessalonica (iii. 1, 2). Timothy returned with good news (iii. 6) (whether to Athens or Corinth does not appear), and when the two epistles to the Thessalonians were written, both Timothy and Silas were with St. Paul (1 Thess. i. 1; 2 Thess. i. 1; comp. 2 Cor. i. 19). Now, though we may not be prepared with Paley to construct an undesigned coincidence out of these materials, yet on the other hand there is no insoluble difficulty; for the events may be arranged in two different ways, either of which will bring the narrative of the Acts into accordance with the allusions of the epistle. (i.) Timotheus was despatched to Thessalonica, not from Athens, but from Berœa, a supposition quite consistent with the Apostle's expression of "consenting to be left alone at Athens." In this case Timotheus would take up Silas somewhere in Macedonia on his return, and the two would join St. Paul in company; not however at Athens, where he was expecting them, but later on at Corinth, some delay having arisen. This explanation however supposes that the plurals "*we* consented, *we* sent" (εὐδοκήσαμεν, ἐπέμψαμεν), can refer to St. Paul alone. The alternative mode of reconciling the accounts is as follows: (ii.) Timotheus and Silas did join the Apostle at Athens, where we learn from the Acts that he was expecting them. From Athens he despatched Timotheus to Thessalonica, so that he and Silas (ἡμεῖς) had to forego the services of their fellow-laborer for a time. This mission is mentioned in the epistle, but not in the Acts. Subsequently he sends Silas on some other mission, not recorded either in the history or the epistle; probably to another Macedonian church, Philippi for instance, from which he is known to have received contributions about this time, and with which therefore he was in communication (2 Cor. xi. 9; comp. Phil. iv. 14–16; see Koch, p. 15). Silas and Timotheus returned together from Macedonia and joined the Apostle at Corinth. This latter solution, if it assumes more than the former, has the advantage that it preserves the proper sense of the plural "*we* consented, *we* sent," for it is at least doubtful whether St. Paul ever uses the plural of himself alone. The silence of St. Luke may in this case be explained either by his possessing only a partial knowledge of the circumstances, or by his passing over incidents of which he was aware, as unimportant.

6. This epistle is rather practical than doctrinal. It was suggested rather by personal feeling, than by any urgent need, which might have formed a

[a] "The difficulty may be further urged, that if the church at Thessalonica contained both "a great multitude" of proselytes and still such an overpowering majority of Gentiles, that the address of the epistle could take its tone from the latter, a much larger total number of believers would be implied than is consistent with the other circumstances of the case. It is obvious, however, that the Apostle in addressing proselytes converted to the Christian faith, would naturally regard them as having been originally heathen, rather than Jews. Their Judaism had been but a temporary and transitional stage; and thus the address in the epistle is altogether consistent with the fact that they had been prepared for Christianity by a previous reception of Judaism. P. G.

Digitized by Google

centre of unity, and impressed a distinct character on the whole. Under these circumstances we need not expect to trace unity of purpose, or a continuous argument, and any analysis must be more or less artificial. The body of the epistle, however, may conveniently be divided into two parts, the former of which, extending over the first three chapters, is chiefly taken up with a retrospect of the Apostle's relation to his Thessalonian converts, and an explanation of his present circumstances and feelings, while the latter, comprising the 4th and 5th chapters, contains some seasonable exhortations. At the close of each of these divisions is a prayer, commencing with the same words, "May God himself," etc., and expressed in somewhat similar language.

The following is a table of contents:—

Salutation (i. 1).

1. Narrative portion (i. 2–iii. 13).
   - (1.) i. 2–10. The Apostle gratefully records their conversion to the Gospel and progress in the faith.
   - (2.) ii. 1–12. He reminds them how pure and blameless his life and ministry among them had been.
   - (3.) ii. 13–16. He repeats his thanksgiving for their conversion, dwelling especially on the persecutions which they had endured.
   - (4.) ii. 17–iii. 10. He describes his own suspense and anxiety, the consequent mission of Timothy to Thessalonica, and the encouraging report which he brought back.
   - (5.) iii. 11–13. The Apostle's *prayer* for the Thessalonians.

2. Hortatory portion (iv. 1–v. 24).
   - (1.) iv. 1–8. Warning against impurity.
   - (2.) iv. 9–12. Exhortation to brotherly love and sobriety of conduct.
   - (3.) iv. 13–v. 11. Touching the advent of the Lord.
     - (*a.*) The dead shall have their place in the resurrection, iv. 13–18.
     - (*b.*) The time however is uncertain, v. 1–3.
     - (*c.*) Therefore all must be watchful, v. 4–11.
   - (4.) v. 12–15. Exhortation to orderly living and the due performance of social duties.
   - (5.) v. 16–22. Injunctions relating to prayer and spiritual matters generally.
   - (6.) v. 23, 24. The Apostle's *prayer* for the Thessalonians.

The epistle closes with personal injunctions and a benediction (v. 25–28).

7. The external evidence in favor of the *genuineness* of the First Epistle to the Thessalonians is chiefly negative, but this is important enough. There is no trace that it was ever disputed at any age or in any section of the Church, or even by any individual, till the present century. On the other hand, the allusions to it in writers before the close of the 2d century are confessedly faint and uncertain — a circumstance easily explained, when we remember the character of the epistle itself, its comparatively simple diction, its silence on the most important doctrinal questions, and, generally speaking, the absence of any salient points to arrest the attention and provoke reference. In Clement of Rome there are some slight coincidences of language, perhaps not purely accidental (c. 38, κατὰ πάντα εὐχαριστεῖν αὐτῷ, comp. 1 Thess. v. 18 *ibid.* σωζέσθω οὖν ἡμῖν ὅλον τὸ σῶμα ἐν X. I., comp. 1 Thess. v. 23). Ignatius in two passages (*Polyc.* c. 1, and *Ephes.* c. 10) seems to be reminded of St. Paul's expression ἀδιαλείπτως προσεύχεσθε (1 Thess. v. 17), but in both passages of Ignatius the word ἀδιαλείπτως, in which the similarity mainly consists, is absent in the Syriac, and is therefore probably spurious. The supposed references in Polycarp (c. iv. to 1 Thess. v. 17, and c. ii. to 1 Thess. v. 22) are also unsatisfactory. It is more important to observe that the epistle was included in the Old Latin and Syriac Versions, that it is found in the Canon of the Muratorian fragment, and that it was also contained in that of Marcion. Towards the close of the 2d century from Irenæus downwards, we find this epistle directly quoted and ascribed to St. Paul.

The evidence derived from the character of the epistle itself is so strong that it may fairly be called irresistible. It would be impossible to enter into the question of *style* here, but the reader may be referred to the Introduction of Jowett, who has handled this subject very fully and satisfactorily. An equally strong argument may be drawn also from the *matter* contained in the epistle. Two instances of this must suffice. In the first place, the fineness and delicacy of touch with which the Apostle's relations towards his Thessalonian converts are drawn — his yearning to see them, his anxiety in the absence of Timothy, and his heartfelt rejoicing at the good news — are quite beyond the reach of the clumsy forgeries of the early Church. In the second place, the writer uses language which, however it may be explained, is certainly colored by the anticipation of the speedy advent of the Lord — language natural enough on the Apostle's own lips, but quite inconceivable in a forgery written after his death, when time had disappointed these anticipations, and when the revival or mention of them would serve no purpose, and might seem to discredit the Apostle. Such a position would be an anachronism in a writer of the 2d century.

The genuineness of this epistle was first questioned by Schrader (*Apostel Paulus*), who was followed by Baur (*Paulus*, p. 480). The latter writer has elaborated and systematized the attack. The arguments which he alleges in favor of his view have already been anticipated to a great extent. They are briefly controverted by Lünemann, and more at length and with great fairness by Jowett. The following is a summary of Baur's arguments: (i.) He attributes great weight to the general character of the epistle, the difference of style, and especially the absence of distinctive Pauline doctrines — a peculiarity which has already been remarked upon and explained, § 2. (ii.) In the mention of the "wrath" overtaking the Jewish people (ii. 16), Baur sees an allusion to the destruction of Jerusalem, and therefore a proof of the later date of the epistle. The real significance of these words will be considered below in discussing the apocalyptic passage in the second epistle. (iii.) He urges the contradictions to the account in the Acts — a strange argument surely to be brought forward by Baur, who postdates and discredits the authority of that narrative. The real extent and bearing of these divergences has been already considered. (iv.) He discovers references to the Acts, which show that the epistle was written later. It has been seen however that the coincidences are subtle and

Digitized by Google

incidental, and the points of divergence and *primâ facie* contradictions, which Baur himself allows, and indeed insists upon, are so numerous as to preclude the supposition of copying. Schleiermacher (*Einl. ins N. T.* p. 150) rightly infers the independence of the epistle on these grounds. (v.) He supposes passages in this epistle to have been borrowed from the acknowledged letters of St. Paul. The resemblances however which he points out are not greater than, or indeed so great as, those in other epistles, and bear no traces of imitation.

8. A list of the Patristic commentaries comprising the whole of St. Paul's epistles, will be found in the article on the EPISTLE TO THE ROMANS. To this list should be added the work of Theodore of Mopsuestia, a portion of which containing the shorter epistles from Galatians onward is preserved in a Latin translation. The part relating to the Thessalonians is at present only accessible in the compilation of Rabanus Maurus (where it is quoted under the name of Ambrose), which ought to be read with the corrections and additions given by Dom Pitra (*Spicil. Solesm.* i. p. 133). This commentary is attributed by Pitra to Hilary of Poitiers, but its true authorship was pointed out by Hort (*Journal of Class. and Sacr. Phil.* iv. p. 302). The portion of Cramer's *Catena* relating to this epistle seems to be made up of extracts from Chrysostom, Severianus, and Theodore of Mopsuestia.

For the more important recent works on the whole of St. Paul's epistles the reader may again be referred to the article on the Epistle to the Romans. The notes on the Thessalonians in Meyer's Commentary are executed by Lünemann [3d ed., 1867]. Of special annotators on the Thessalonian epistles, the chief are, in Germany, Flatt (1829), Pelt (1830), Schott (1834), and Koch (2d ed. 1855, the First Epistle alone), and in England, Jowett (2d ed. 1859) and Ellicott (2d ed. 1862).

J. B. L.

* On the critical questions relating to this epistle the following writers deserve mention: W. Grimm, *Die Echtheit d. Briefs an d. Thess.* (against Baur), in the *Theol. Stud. u. Krit.*, 1850, pp. 753–816; R. A. Lipsius, *Ueber Zweck u. Veranlassung des ersten Thessalonicherbriefs*, ibid. 1854, pp. 905–934 (comp. Lünemann's criticisms, in Meyer's *Komm.*, Abth. x. p. 5 ff., 3e Aufl.); F. C. Baur, *Die beiden Briefe an d. Thess., ihre Aechtheit u. Bedeutung f. d. Lehre von d. Parusie Christi*, in Baur and Zeller's *Theol. Jahrb.* 1855, xiv. 141–169, reprinted in the 2d ed. of his *Paulus* (1867), ii. 341 ff.; Hilgenfeld, *Die beiden Briefe an d. Thess., nach Inhalt u. Ursprung*, in his *Zeitschrift f. wiss. Theol.*, 1862, v. 225–264; J. C. Laurent, *Neutest. Studien*, Gotha, 1866 (several short articles); Holtzmann in Bunsen's *Bibelwerk*, viii. 429–434 (1866); and Reuss, Bleek, and Davidson, in their respective *Introductions*. The so-called "Second Epistle to the Thessalonians" is regarded by Baur, Hilgenfeld, Ewald, Laurent and Davidson as the first written. Among the recent Commentaries we may name J. C. K. Hofmann, *Die heil. Schrift N. T. zusammenhangend untersucht*, Theil i. (1862); and C. A. Auberlen and C. J. Riggenbach, *Die beiden Briefe an die Thess.*, Theil x. of Lange's *Bibelwerk* (1864), translated with large additions by Dr. John Lillie, in vol. viii. of the Amer. ed. of Lange's *Commentary* (N. Y. 1868), to which the reader is referred for a fuller view of the literature pertaining to this epistle.

A.

**THESSALONIANS, SECOND EPISTLE TO THE.** (1.) This epistle appears to have been written from Corinth not very long after the first, for Silvanus and Timotheus were still with St. Paul (i. 1). In the former letter we saw chiefly the outpouring of strong personal affection, occasioned by the renewal of the Apostle's intercourse with the Thessalonians, and the doctrinal and hortatory portions are there subordinate. In the second epistle, on the other hand, his leading motive seems to have been the desire of correcting errors in the Church of Thessalonica. We notice two points especially which call forth his rebuke. *First*, it seems that the anxious expectation of the Lord's advent, instead of subsiding, had gained ground since the writing of the first epistle. They now looked upon this great crisis as imminent, and their daily avocations were neglected in consequence. There were expressions in the first epistle which, taken by themselves, might seem to favor this view; and at all events such was falsely represented to be the Apostle's doctrine. He now writes to soothe this restless spirit and quell their apprehensions by showing that many things must happen first, and that the end was not yet, referring to his oral teaching at Thessalonica in confirmation of this statement (ii. 1–12, iii. 6–12). *Secondly*, the Apostle had also a *personal* ground of complaint. His authority was not denied by any, but it was tampered with, and an unauthorized use was made of his name. It is difficult to ascertain the exact circumstances of the case from casual and indirect allusions, and indeed we may perhaps infer from the vagueness of the Apostle's own language that he himself was not in possession of definite information; but at all events his suspicions were aroused. Designing men might misrepresent his teaching in two ways, either by suppressing what he actually had written or said, or by forging letters and in other ways representing him as teaching what he had not taught. St. Paul's language hints in different places at both these modes of false dealing. He seems to have entertained suspicions of this dishonesty even when he wrote the first epistle. At the close of that epistle he binds the Thessalonians by a solemn oath, "in the name of the Lord," to see that the epistle is read "to all the holy brethren" (v. 27) — a charge unintelligible in itself, and only to be explained by supposing some misgivings in the Apostle's mind. Before the second epistle is written, his suspicions seem to have been confirmed, for there are two passages which allude to these misrepresentations of his teaching. In the first of these he tells them in vague language, which may refer equally well to a false interpretation put upon his own words in the first epistle, or to a supplemental letter forged in his name, "not to be troubled either by spirit or by word or by letter, as coming from us, as if the day of the Lord were at hand." They are not to be deceived, he adds, by any one whatever means he employs (κατὰ μηδένα τρόπον, ii. 2, 3). In the second passage at the close of the epistle he says, "the salutation of Paul with mine own hand, which is a token in every epistle: so I write" (iii. 17) — evidently a precaution against forgery. With these two passages should be combined the expression in iii. 14, from which we infer that he now entertained a fear of direct opposition: "If

Digitized by Google

any man obey not our word conveyed by our epistle, note that man."

It will be seen then that the teaching of the second epistle is corrective of, or rather supplemental to, that of the first, and therefore presupposes it. Moreover, the first epistle bears on its face evidence that it is the first outpouring of his affectionate yearnings towards his converts after his departure from Thessalonica; while on the other hand the second epistle contains a direct allusion to a previous letter, which may suitably be referred to the first: "Hold fast the tradition which ye were taught either by word *or* by letter from us" (ii. 15). We can scarcely be wrong therefore in maintaining the received order of the two epistles. It is due however to the great names of Grotius and of Ewald (*Jahrb.* iii. p. 250; *Sendschr.* p. 16) to mention that they reverse the order, placing the second epistle before the first in point of time — on different grounds indeed, but both equally insufficient to disturb the traditional order, supported as it is by the considerations already alleged.

(2.) This epistle, in the range of subject as well as in style and general character, closely resembles the first; and the remarks made on that epistle apply for the most part equally well to this. The structure also is somewhat similar, the main body of the epistle being divided into two parts in the same way, and each part closing with a prayer (ii. 16, 17, iii. 16; both commencing with *αὐτὸς δὲ ὁ κύριος*). The following is a table of contents: —

The opening salutation (i. 1, 2).

1. A general expression of thankfulness and interest, leading up to the difficulty about the Lord's advent (i. 3–ii. 17).

   (1.) The Apostle pours forth his thanksgiving for their progress in the faith; he encourages them to be patient under persecution, reminding them of the judgment to come, and prays that they may be prepared to meet it (i. 3–12).

   (2.) He is thus led to correct the erroneous idea that the judgment is imminent, pointing out that much must happen first (ii. 1–12).

   (3.) He repeats his thanksgiving and exhortation, and concludes this portion with a *prayer* (ii. 13–17).

2. Direct exhortation (iii. 1–16).

   (1.) He urges them to pray for him, and confidently anticipates their progress in the faith (iii. 1–5).

   (2.) He reproves the idle, disorderly, and disobedient, and charges the faithful to withdraw from such (iii. 6–15).

   This portion again closes with a prayer (iii. 16).

The epistle ends with a special direction and benediction (iii. 17, 18).

(3.) The external evidence in favor of the second epistle is somewhat more definite than that which can be brought in favor of the first. It seems to be referred to in one or two passages of Polycarp (iii. 15, in Polyc. c. 11, and possibly i. 4 in the same chapter; cf. Polyc. c. 3, and see Lardner, pt. ii. c. 6); and the language in which Justin Martyr (*Dial.* p. 336 D) speaks of the Man of Sin is so similar that it can scarcely be independent of this epistle. The second epistle, like the first, is found in the canons of the Syriac and Old Latin Versions, and in those of the Muratorian fragment and of the heretic Marcion; is quoted expressly and by name by Irenæus and others at the close of the second century, and was universally received by the Church. The internal character of the epistle too, as in the former case, bears the strongest testimony to its Pauline origin. (See Jowett, i. 143.)

Its genuineness in fact was never questioned until the beginning of the present century. Objections were first started by Christ. Schmidt (*Einl. ins N. T.* 1804). He has been followed by Schrader (*Apostel Paulus*), Kern (*Tübing. Zeitschr. f. Theol.* 1839, ii. p. 145), and Baur (*Paulus der Apostel*). De Wette at first condemned this epistle, but afterward withdrew his condemnation and frankly accepted it as genuine.

It will thus be seen that this epistle has been rejected by some modern critics who acknowledge the first to be genuine. Such critics of course attribute no weight to arguments brought against the first, such as we have considered already. The apocalyptic passage (ii. 1–12) is the great stumbling-block to them. It has been objected to, either as alluding to events subsequent to St. Paul's death, the Neronian persecution, for instance; or as betraying religious views derived from the Montanism of the second century; or lastly, as contradicting St. Paul's anticipations expressed elsewhere, especially in the first epistle, of the near approach of the Lord's advent. That there is no reference to Nero, we shall endeavor to show presently. That the doctrine of an Antichrist did not start into being with Montanism, is shown from the allusions of Jewish writers even before the Christian era (see Bertholdt, *Christ.* p 69; Gfrörer, *Jahrb. des Heils*, pt. ii. p. 257); and appears still more clearly from the passage of Justin Martyr referred to in a former paragraph. That the language used of the Lord's coming in the second epistle does not contradict, but rather supplement the teaching of the first — postponing the day indeed, but still anticipating its approach as probable within the Apostle's lifetime — may be gathered both from expressions in the passage itself (*e. g.* ver. 7, "is already working"), and from other parts of the epistle (i. 7, 8). Other special objections to the epistle will scarcely command a hearing, and must necessarily be passed over here.

(4.) The most striking feature in the epistle is this apocalyptic passage, announcing the revelation of the "Man of Sin" (ii. 1–12); and it will not be irrelevant to investigate its meaning, bearing as it does on the circumstances under which the epistle was written, and illustrating this aspect of the Apostle's teaching. He had dwelt much on the subject; for he appeals to the Thessalonians as knowing this truth, and reminds them that he had told them these things when he was yet with them.

(I.) The passage speaks of a great apostasy which is to usher in the advent of Christ, the great judgment. There are three prominent figures in the picture, Christ, Antichrist, and the Restrainer. Antichrist is described as the Man of Sin, the Son of Perdition, as the Adversary who exalteth himself above all that is called God, as making himself out to be God. Later on (for apparently the reference is the same) he is styled the "mystery of lawlessness," "the lawless one." The Restrainer is in one place spoken of in the masculine as a person

Digitized by Google

(ὁ κατέχων), in another in the neuter as a power, an influence (τὸ κατέχον). The "mystery of lawlessness" is already at work. At present it is checked by the Restrainer; but the check will be removed, and then it will break out in all its violence. Then Christ will appear, and the enemy shall be consumed by the breath of his mouth, shall be brought to naught by the splendor of his presence.

(II.) Many different explanations have been offered of this passage. By one class of interpreters it has been referred to circumstances which passed within the circle of the Apostle's own experience, the events of his own lifetime, or the period immediately following. Others again have seen in it the prediction of a crisis yet to be realized, the end of all things. The former of these, the Præterists, have identified the "Man of Sin" with divers historical characters — with Caligula, Nero, Titus, Simon Magus, Simon son of Giora, the high-priest Ananias, etc., and have sought for a historical counterpart to the Restrainer in like manner. The latter, the Futurists, have also given various accounts of the Antichrist, the mysterious power of evil which is already working. To Protestants, for instance, it is the Papacy; to the Greek Church, Mohammedanism. And in the same way each generation and each section in the Church has regarded it as a prophecy of that particular power which seemed to them and in their own time to be most fraught with evil to the true faith. A good account of these manifold interpretations will be found in Lünemann's Commentary on the Epistle, p. 204; *Schlussbem.* zu ii. 1–12. See also Alford, *Proleg.*

(III.) Now in arbitrating between the Præterists and the Futurists, we are led by the analogy of other prophetic announcements, as well as by the language of the passage itself, to take a middle course. Neither is wholly right, and yet both are to a certain extent right. It is the special characteristic of prophecy to speak of the distant future through the present and immediate. The persons and events falling within the horizon of the prophet's own view, are the types and representatives of greater figures and crises far off, and as yet but dimly discerned. Thus the older prophets, while speaking of a delivery from the temporary oppression of Egypt or Babylon, spoke also of Messiah's kingdom. Thus our Lord himself, foretelling the doom which was even then hanging over the holy city, glances at the future judgment of the world as typified and portrayed in this; and the two are so interwoven that it is impossible to disentangle them. Following this analogy, we may agree with the Præterists that St. Paul is referring to events which fell under his own cognizance; for indeed the Restrainer is said to be restraining now, and the mystery of iniquity to be already working: while at the same time we may accept the Futurist view, that the Apostle is describing the end of all things, and that therefore the prophecy has not yet received its most striking and complete fulfillment. This commingling of the immediate and partial with the final and universal manifestation of God's judgments, characteristic of all prophecy, is rendered more easy in St. Paul's case, because he seems to have contemplated the end of all things as possibly, or even probably, near at hand; and therefore the particular manifestation of Antichrist, which he witnessed with his own eyes, would naturally be merged in and identified with the final Antichrist, in which the opposition to the Gospel will culminate.

(IV.) If this view be correct, it remains to inquire what particular adversary of the Gospel, and what particular restraining influence, St. Paul may have had in view. But, before attempting to approximate to an explanation, we may clear the way by laying down two rules. *First.* The imagery of the passage must be interpreted mainly by itself, and by the circumstances of the time. The symbols may be borrowed in some cases from the Old Testament; they may reappear in other parts of the New. But we cannot be sure that the same image denotes exactly the same thing in both cases. The language describing the Man of Sin is borrowed to some extent from the representation of Antiochus Epiphanes in the book of Daniel, but Antiochus cannot be meant there. The great adversary in the Revelation seems to be the Roman power; but it may be widely different here. There were even in the Apostolic age "many Antichrists;" and we cannot be sure that the Antichrist present to the mind of St. Paul was the same with the Antichrist contemplated by St. John. *Secondly.* In all figurative passages it is arbitrary to assume that a person is denoted where we find a personification. Thus the "Man of Sin" here need not be an individual man; it may be a body of men, or a power, a spiritual influence. In the case of the Restrainer we seem to have positive ground for so interpreting it, since in one passage the neuter gender is used, "the thing which restraineth" (τὸ κατέχον), as if synonymous. (See Jowett's *Essay on the Man of Sin*, i. 178, rather for suggestions as to the mode of interpretation, than for the conclusion he arrives at.)

(V.) When we inquire then, what St. Paul had in view when he spoke of the "Man of Sin" and the Restrainer, we can only hope to get even an approximate answer by investigating the circumstances of the Apostle's life at this epoch. Now we find that the chief opposition to the Gospel, and especially to St. Paul's preaching at this time, arose from the Jews. The Jews had conspired against the Apostle and his companions at Thessalonica, and he only saved himself by secret flight. Thence they followed him to Berœa, which he hurriedly left in the same way. At Corinth, whence the letters to the Thessalonians were written, they persecuted him still further, raising a cry of treason against him, and bringing him before the Roman proconsul. These incidents explain the strong expressions he uses of them in these epistles: "They slew the Lord Jesus and the prophets, and persecuted the Apostles; they are hateful to God; they are the common enemies of mankind, whom the Divine wrath (ἡ ὀργή) at length overtakes" (1 Thess. ii. 15, 16). With these facts in view, it seems on the whole probable that the Antichrist is represented especially by Judaism. With a prophetic insight the Apostle foresaw, as he contemplated the moral and political condition of the race, the approach of a great and overwhelming catastrophe. And it is not improbable that our Lord's predictions of the vengeance which threatened Jerusalem blended with the Apostle's vision, and gave a color to this passage. If it seem strange that "lawlessness" should be mentioned as the distinguishing feature of those whose very zeal for "the Law" stimulated their opposition to the Gospel, we may appeal to our Lord's own words (Matt. xxiii. 28), describing the Jewish teachers: "within they are full of hypocrisy and lawlessness (ἀνομίας)." Corresponding to this view of the Antichrist, we

Digitized by Google

small probably be correct in regarding the Roman Empire as the restraining power, for so it was taken by many of the Fathers, though without altogether understanding its bearing. It was to Roman justice and Roman magistrates that the Apostle had recourse at this time to shield him from the enmity of the Jews, and to check their violence. At Philippi, his Roman citizenship extorted an ample apology for ill-treatment. At Thessalonica, Roman law secured him fair play. At Corinth, a Roman proconsul acquitted him of frivolous charges brought by the Jews. It was only at a later date under Nero, that Rome became the antagonist of Christendom, and then she also in turn was fitly portrayed by St. John as the type of Antichrist. Whether the Jewish opposition to the Gospel entirely exhausted St. Paul's conception of the "mystery of lawlessness" as he saw it "already working" in his own day, or whether other elements did not also combine with this to complete the idea, it is impossible to say. Moreover at this distance of time and with our imperfect information, we cannot hope to explain the exact bearing of all the details in the picture. But following the guidance of history, we seem justified in adopting this as a probable, though only a partial, explanation of a very difficult passage. [ANTICHRIST.]

5. A list of commentaries has been given in the article on the First Epistle. J. B. L.

**THESSALONI'CA** (Θεσσαλονίκη). The original name of this city was Therma; and that part of the Macedonian shore on which it was situated ("Medio flexu litoris sinus Thermaici," Plin. *H. N.* iv. 10) retained through the Roman period the designation of the Thermaic Gulf. The history of the city under its earlier name was of no great note (see Herod. vii. 128 ff.; Thucyd. i. 61, ii. 29; Æsch. *De fals. Leg.* p. 31). It rose into importance with the decay of Greek nationality. Cassander the son of Antipater rebuilt and enlarged it, and named it after his wife Thessalonica, the sister of Alexander the Great. The first author in which the new appellation occurs is Polybius (xxiii. 4). The name ever since, under various slight modifications, has been continuous, and the city itself has never ceased to be eminent. *Salonîki* (though Adrianople may possibly be larger) is still the most important town of European Turkey, next after Constantinople.

Under the Romans, when MACEDONIA was divided into four governments, Thessalonica was made the capital of the second (Liv. xlv. 29); afterwards, when the whole was consolidated into one province, this city became practically the metropolis. Notices of the place now become frequent. Cicero was here in his exile (*pro Planc.* 41), and some of his letters were written from hence during his journeys to and from his own province of Cilicia. During the first Civil War it was the headquarters of the Pompeian party and the Senate (Dion Cass. xli. 20). During the second it took the side of Octavius (Plut. *Brut.* 46; Appian, *B. C.* iv. 118), whence apparently it reaped the honor and advantage of being made a "free city" (libera civitas, Plin. *l. c.*), a privilege which is commemorated on some of its coins. Strabo in the first century speaks of Thessalonica as the most populous city in Macedonia (μάλιστα τῶν ἄλλων εὐανδρεῖ), similar language to which is used by Lucian in the second century (*Asin.* 46).

Thus we are brought to St. Paul's visit (with Silas and Timothy)[a] during his second missionary journey, and to the introduction of Christianity into Thessalonica. Three circumstances must here be mentioned, which illustrate in an important manner this visit and this journey, as well as the two Epistles to the Thessalonians, which the Apostle wrote from Corinth very soon after his departure from his new Macedonian converts. (1.) This was the chief station on the great Roman Road, called the *Via Egnatia*, which connected Rome with the whole region to the north of the Ægean Sea. St. Paul was on this road at NEAPOLIS (Acts xvi. 11) and PHILIPPI (xvi. 12–40), and his route from the latter place (xvii. 1) had brought him through two of the well-known minor stations mentioned in the Itineraries. [AMPHIPOLIS; APOLLONIA.] (2.) Placed as it was on this great road, and in connection with other important Roman ways ("posita in gremio imperii Romani," to use Cicero's words), Thessalonica was an invaluable centre for the spread of the Gospel. And it must be remembered that, besides its inland communication with the rich plains of Macedonia and with far more remote regions, its maritime position made it a great emporium of trade by sea. In fact it was nearly, if not quite, on a level with Corinth and Ephesus in its share of the commerce of the Levant. Thus we see the force of what St. Paul says in his first epistle, shortly after leaving Thessalonica — ἀφ' ὑμῶν ἐξήχηται ὁ λόγος τοῦ Κυρίου οὐ μόνον ἐν τῇ Μακεδονίᾳ καὶ ἐν τῇ Ἀχαΐᾳ, ἀλλ' ἐν παντὶ τόπῳ (i. 8). (3.) The circumstance noted in Acts xvii. 1, that here was the synagogue of the Jews in this part of Macedonia, had evidently much to do with the Apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica: and it is remarkable that, ever since, they have had a prominent place in the annals of the city. They are mentioned in the seventh century during the Sclavonic wars; and again in the twelfth by Eustathius and Benjamin of Tudela. In the fifteenth century there was a great influx of Spanish Jews. At the present day the numbers of residents in the Jewish quarter (in the south east part of the town) are estimated at 10,000 or 20,000, out of an aggregate population of 60,000 or 70,000.

The first scene of the Apostle's work at Thessalonica was the Synagogue. According to his custom he began there, arguing from the Ancient Scriptures (Acts xvii. 2, 3): and the same general results followed, as in other places. Some believed, both Jews and proselytes, and it is particularly added that among these were many influential women (ver. 4); on which the general body of the Jews stirred up with jealousy, excited the Gentile population to persecute Paul and Silas (vv. 5–10). It is stated that the ministrations among the Jews continued for three weeks (ver. 2). Not that we are obliged to limit to this time the whole stay of the Apostles at Thessalonica. A flourishing church

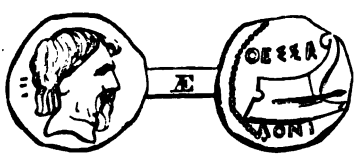
[a] Timothy is not mentioned in any part of the direct narrative of what happened at Thessalonica, though he appears as St. Paul's companion before at Philippi (Acts xvi. 1–13), and afterwards at Berœa xvii. 14, 15); but from his subsequent mission to Thessalonica (1 Thess. iii. 1–7; see Acts xviii. 5), and the mention of his name in the opening salutation of both epistles to the Thessalonians, we can hardly doubt that he had been with the Apostle throughout.

Digitized by Google

was certainly formed there: and the epistles show that its elements were much more Gentile than Jewish. St. Paul speaks of the Thessalonians as having turned "from idols;" and he does not here, as in other epistles, quote the Jewish Scriptures. In all respects it is important to compare these two letters with the narrative in the Acts; and such references have the greater freshness from the short interval which elapsed between visiting the Thessalonians and writing to them. Such expressions as *ἐν θλίψει πολλῇ* (1 Thess. i. 6), and *ἐν πολλῷ ἀγῶνι* (ii. 2), sum up the suffering and conflict which Paul and Silas and their converts went through at Thessalonica. (See also 1 Thess. ii. 14, 15, iii. 3, 4; 2 Thess. i. 4–7.) The persecution took place through the instrumentality of worthless idlers (*τῶν ἀγοραίων ἄνδρας τινὰς πονηρούς*, Acts xvii. 5), who, instigated by the Jews, raised a tumult. The house of Jason, with whom the Apostles seem to have been residing, was attacked; they themselves were not found, but Jason was brought before the authorities on the accusation that the Christians were trying to set up a new King in opposition to the Emperor; a guarantee (*τὸ ἱκανόν*) was taken from Jason and others for the maintenance of the peace, and Paul and Silas were sent away by night southwards to BERŒA (Acts xvii. 5–10). The particular charge brought against the Apostles receives an illustration from the epistles, where the *kingdom* of Christ is prominently mentioned (1 Thess. ii. 12; 2 Thess. i. 5). So again, the doctrine of the Resurrection is conspicuous both in St. Luke's narrative (xvii. 3), and in the first letter (i. 10, iv. 14, 16). If we pass from these points to such as are personal, we are enabled from the epistles to complete the picture of St. Paul's conduct and attitude at Thessalonica, as regards his love, tenderness, and zeal, his care of individual souls, and his disinterest-

Thessalonica.

edness (see 1 Thess. i. 5, ii. 1–10). As to this last point, St. Paul was partly supported here by contributions from Philippi (Phil. iv. 15, 16), partly by the labor of his own hands, which he diligently practiced for the sake of the better success of the Gospel, and that he might set an example to the idle and selfish. (He refers very expressly to what he had said and done at Thessalonica in regard to this point. See 1 Thess. ii. 9, iv. 11; comparing 2 Thess. iii. 8–12.) [THESSALONIANS, EPISTLES TO.] To complete the account of St. Paul's connection with Thessalonica, it must be noticed that he was certainly there again, though the name of the city is not specified, on his third missionary journey, both in going and returning (Acts xx. 1–3). Possibly he was also there again, after his liberation from his first imprisonment. See Phil. i. 25, 26, ii. 24, for the hope of revisiting Macedonia, entertained by the Apostle at Rome, and 1 Tim. i. 3; 2 Tim. iv. 13; Tit. iii. 12, for subsequent journeys in the neighborhood of Thessalonica.



Of the first Christians of Thessalonica, we are able to specify by name the above-mentioned Jason (who may be the same as the Apostle's own kinsman mentioned in Rom. xvi 21), Domas (at least conjecturally; see 2 Tim. iv. 10), Gaius, who shared some of St. Paul's perils at Ephesus (Acts xix. 29), Secundus (who accompanied him from Macedonia to Asia on the eastward route of his third missionary journey, and was probably concerned in the business of the collection; see Acts xx. 4), and especially Aristarchus (who, besides being mentioned here with Secundus, accompanied St. Paul on his voyage to Rome, and had therefore probably been with him during the whole interval, and is also specially referred to in two of the epistles written during the first Roman imprisonment. See Acts xxvii. 2; Col. iv. 10; Philem. 24; also Acts xix. 29, for his association with the Apostle at Ephesus in the earlier part of the third journey).

We must recur, however, to the narrative in the Acts, for the purpose of noticing a singularly accu-

Digitized by Google

rate illustration which it affords of the political constitution of Thessalonica. Not only is the *demus* mentioned (τὸν δῆμον, Acts xvii. 5) in harmony with what has been above said of its being a "free city," but the peculiar title, *politarchs* (πολιτάρχας, *ib.* 6), of the chief magistrates. This term occurs in no other writing; but it may be read to this day conspicuously on an arch of the early imperial times, which spans the main street of the city. From this inscription it would appear that the number of politarchs was seven. The whole may be seen in Boeckh, *Corp. Insc.* No. 1967.

This seems the right place for noticing the other remains at Thessalonica. The arch first mentioned (called the *Vardâr* gate) is at the western extremity of the town. At its eastern extremity is another Roman arch of later date, and probably commemorating some victory of Constantine. The main street, which both these arches cross, and which intersects the city from east to west, is undoubtedly the line of the *Via Egnatia*. Near the course of this street, and between the two arches, are four Corinthian columns supporting an architrave, and believed by some to have belonged to the Hippodrome, which is so famous in connection with the history of Theodosius. Two of the mosques have been anciently heathen temples. The city walls are of late Greek construction, but resting on a much older foundation, with hewn stones of immense

Coin of Thessalonica.

thickness. The castle contains the fragments of a shattered triumphal arch, erected in the reign of Marcus Aurelius.

A word must be said, in conclusion, on the later ecclesiastical history of Thessalonica. For during several centuries this city was the bulwark, not simply of the later Greek Empire, but of oriental Christendom, and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it received the designation of "the Orthodox City;" and its struggles are very prominent in the writings of the Byzantine historians. Three conspicuous passages are, its capture by the Saracens, A. D. 904 (Jo. Cameniata, *De Excidio Thessalonicensi*, with Theophanes Continuatus, 1838); by the Crusaders in 1185 (Nicetas Choniates, *De Andron. Comneno*, 1835; also Eustath. *De Thessalonicâ a Latinis captâ*, in the same vol. with Leo Grammaticus, 1842); and finally by the Turks under Amurath II. in 1430 (Jo. Anagnostes, *De Thessalonicensi Excidio Narratio*, with Phrantzes and Cananus, 838). The references are to the Bonn editions. A very large part of the population at the present day is Greek; and Thessalonica may still be destined to take a prominent part in struggles connected with nationality and religion.

The travellers to whom it is most important to refer, as having given full accounts of this place, are Clarke (*Travels in Europe*, etc., 1810–1823), Sir H. Holland (*Travels in the Ionian Isles*, etc., 1815), Cousinéry (*Voyage dans la Macédoine*, 1831), and Leake (*Northern Greece*, 1835). An antiquarian essay on the subject by the Abbé Belley will be found in the *Mémoires de l'Académie des Inscriptions*, tom. xxxviii. *Sect. Hist.* pp. 121–146. But the most elaborate work is that of Tafel, the first part of which was published at Tübingen in 1835. This was afterwards reprinted as "Prolegomena" to the *Dissertatio de Thessalonicâ ejusque Agro geographico*, Berlin, 1839. With this should be compared his work on the *Via Egnatia*.[a] The Commentaries on the Epistles to the Thessalonians of course contain useful compilations on the subject. Among these, two of the most copious are those of Koch (Berlin, 1849) and Lünemann (Göttingen, 1850). J. S. H.

**THEUDAS** (Θευδᾶς: *Theodas*: and probably = תֵּיאוּדָס), the name of an insurgent mentioned in Gamaliel's speech before the Jewish council (Acts v. 35–39) at the time of the arraignment of the Apostles. He appeared, according to Luke's account, at the head of about four hundred men; he sought not merely to lead the people astray by false doctrine, but to accomplish his designs by violence he entertained a high conceit of himself (λέγων εἶναί τινα ἑαυτόν); was slain at last (ἀνῃρέθη), and his party was dispersed and brought to nothing (διελύθησαν καὶ ἐγένοντο εἰς οὐδέν). Josephus (*Ant.* xx. 5, § 1) speaks of a Theudas who played a similar part in the time of Claudius, about A. D. 44, *i. e.* some ten or twelve years at least later than the delivery of Gamaliel's speech; and since Luke places his Theudas, in the order of time, before Judas the Galilean, who made his appearance soon after the dethronement of Archelaus, *i. e.* A. D. 6 or 7 (Jos. *B. J.* ii. 8, § 1; *Ant.* xviii. 1, § 6, xx. 5, § 2), it has been charged that the writer of the Acts either fabricated the speech put into the mouth of Gamaliel, or has wrought into it a transaction which took place thirty years or more after the time when it is said to have occurred (see Zeller, *Die Apostelgeschichte*, pp. 182 ff.). Here we may protest at the outset against the injustice of hastily imputing to Luke so gross an error; for having established his character in so many decisive instances in which he has alluded, in the course of the Acts, to persons, places, customs, and events in sacred and profane history, he has a right to the presumption that he was well informed also as to the facts in this particular passage.[b] Every principle of just criticism demands that, instead of distrusting him as soon as he goes beyond our means of verification, we should avail ourselves of any supposition for the purpose of upholding his credibility which the conditions of the case will allow.

Various solutions of the difficulty have been offered. The two following have been suggested as especially commending themselves by their fulfillment of every reasonable requisition, and as ap

[a] The *Notes upon the Geography of Macedonia*, by Rev. E. M. Dodd, *Bibl. Sacra*, xi. 830 ff., include Thessalonica. They describe step by step Paul's route from that city to Berœa (Acts xvii. 10). The Jews are said to constitute one half of the entire population. H.

[b] It may not be amiss to remind the reader of some fine remarks, in illustration of Luke's historical accuracy, in Tholuck's *Glaubwürdigkeit der Evang. Geschichte*, pp. 161–177, 375–389. See also Ebrard, *Evangelische Kritik*, pp. 678 ff.; and Lechler, *Das Apostolische Zeitalter*, pp. 9 ff.

Digitized by Google

proved by learned and judicious men: (1.) Since Luke represents Theudas as having preceded Judas the Galilean [see vol. ii. p. 1495], it is certain that he could not have appeared later, at all events, than the latter part of the reign of Herod the Great. The very year, now, of that monarch's death was remarkably turbulent; the land was overrun with belligerent parties, under the direction of insurrectionary chiefs or fanatics. Josephus mentions but three of these disturbers *by name;* he passes over the others with a general allusion. Among those whom the Jewish historian has omitted to name, may have been the Theudas whom Gamaliel cites as an example of unsuccessful innovation and insubordination. The name was not an uncommon one (Winer, *Realwb.* ii. 609); and it can excite no surprise that one Theudas, who was an insurgent, should have appeared in the time of Augustus, and another, fifty years later, in the time of Claudius. As analogous to this supposition is the fact that Josephus gives an account of four men named *Simon*, who followed each other within forty years, and of three named *Judas*, within ten years, who were all instigators of rebellion. This mode of reconciling Luke with Josephus is affirmed by Lardner (*Credibility*, vol. i. p. 429), Bengel, Kuinoel, Olshausen, Anger (*de Temp. in Act. Apost. Ratione*, p. 185), Winer, and others.

(2.) Another explanation (essentially different only as proposing to identify the person) is, that Luke's Theudas may have been one of the three insurgents whose names are mentioned by Josephus in connection with the disturbances which took place about the time of Herod's death. Sonntag (*Theol. Stud. u. Kritik.* 1837, p. 622, &c.) has advanced this view, and supported it with much learning and ability. He argues that the Theudas referred to by Gamaliel is the individual who occurs in Josephus under the name of Simon (*B. J.* ii. 4, § 2; *Ant.* xvii. 10, § 6), a slave of Herod, who attempted to make himself king, amid the confusion which attended the vacancy of the throne when that monarch died. He urges the following reasons for that opinion: first, this Simon, as he was the most noted among those who disturbed the public peace at that time, would be apt to occur to Gamaliel as an illustration of his point; secondly, he is described as a man of the same lofty pretensions (*εἶναί τέ τις ἄξιος ἐλπίσας παρ' ὑπνοῦν = λέγων εἶναί τινα ἑαυτόν*); thirdly, he died a violent death, which Josephus does not mention as true of the other two insurgents: fourthly, he appears to have had comparatively few adherents, in conformity with Luke's *ἐσχεῖ τετρακοσίων*; and, lastly, his having been originally a slave accounts for the twofold appellation, since it was very common among the Jews to assume a different name on changing their occupation or mode of life. It is very possible, therefore, that Gamaliel speaks of him as Theudas, because, having borne that name so long at Jerusalem, he was best known by it to the members of the Sanhedrim; and that Josephus, on the contrary, who wrote for Romans and Greeks, speaks of him as Simon, because it was under that name that he set himself up as king, and in that way acquired his foreign notoriety (see Tacit. *Hist.* v. 9).

There can be no valid objection to either of the foregoing suppositions: both are reasonable, and both must be disproved before Luke can be justly charged with having committed an anachronism in the passage under consideration. So impartial a witness as Jost, the historian of the Jews (*Geschichte der Israeliten*, ii. Anh. p. 76), admits the reasonableness of such combinations, and holds in this case to the credibility of Luke, as well as that of Josephus. The considerate Lardner (*Credibility*, vol. i. p. 433), therefore, could well say here, "Indeed, I am surprised that any learned man should find it hard to believe that there were two impostors of the name of Theudas in the compass of forty years." It is hardly necessary to advert to other modes of explanation. Josephus was by no means infallible, as Strauss and critics of his school may almost be said to take for granted; and it is possible, certainly (this is the position of some), that Josephus himself may have misplaced the time of Theudas, instead of Luke, who is charged with that oversight. Calvin's view that Judas the Galilean appeared not *after* but *before* Theudas (*μετὰ τοῦτον = insuper* vel *præterea*), and that the examination of the Apostles before the Sanhedrim occurred in the time of Claudius (contrary to the manifest chronological order of the Acts), deserves mention only as a waymark of the progress which has been made in Biblical exegesis since his time. Among other writers, in addition to those already mentioned, who have discussed this question or touched upon it, are the following: Wieseler, *Chronologie der Apost. Zeitalters*, p. 138: Neander, *Geschichte der Pflanzung*, i. 75, 76; Guerike, *Beiträge zur Einleit. ins N. Test.* p. 90; A. Köhler, Herzog's *Real-Encyk.* xvi. 39–41; Baumgarten, *Apostelgeschichte*, i. 114; Lightfoot, *Hor. Hebr.* ii. 704; Biscoe, *History of the Acts*, p. 428; and Wordsworth's *Commentary*, ii. 26.

H. B. H.

**THIEVES, THE TWO.** The men who under this name appear in the history of the Crucifixion were robbers (*λῃσταί*) rather than thieves (*κλέπται*), belonging to the lawless bands by which Palestine was at that time and afterwards infested (Jos. *Ant.* xvii. 10, § 8, xx. 8, § 10). Against these brigands every Roman procurator had to wage continual war (Jos. *B. J.* ii. 13, § 2). The parable of the Good Samaritan shows how common it was for them to attack and plunder travellers even on the high-road from Jerusalem to Jericho (Luke x. 30). It was necessary to use an armed police to encounter them (Luke xxii. 52). Often, as in the case of Barabbas, the wild robber life was connected with a fanatic zeal for freedom, which turned the marauding attack into a popular insurrection (Mark xv. 7). For crimes such as these the Romans had but one sentence. Crucifixion was the penalty at once of the robber and the rebel (Jos. *B. J.* ii. 13, § 2).

Of the previous history of the two who suffered on Golgotha we know nothing. They had been tried and condemned, and were waiting their execution before our Lord was accused. It is probable enough, as the death of Barabbas was clearly expected at the same time, that they were among the *συστασιασταί* who had been imprisoned with him, and had taken part in the insurrection in which zeal, and hate, and patriotism, and lust of plunder were mingled in wild confusion.

They had expected to die with Jesus Barabbas. [Comp. BARABBAS.] They find themselves with one who bore the same name, but who was described in the superscription on his cross as Jesus of Nazareth. They could hardly fail to have heard something of his fame as a prophet, of his triumphal entry as a king. They now find Him sharing the

Digitized by Google

same fate as themselves, condemned on much the same charge (Luke xxiii. 5). They too would bear their crosses to the appointed place, while He fainted by the way. Their garments would be parted among the soldiers. For them also there would be the drugged wine, which He refused, to dull the sharp pain of the first hours on the cross. They catch at first the prevailing tone of scorn. A king of the Jews who could neither save himself nor help them, whose followers had not even fought for him (John xviii. 36), was strangely unlike the many chieftains whom they had probably known claiming the same title (Jos. *Ant.* xvii. 10, § 8), strangely unlike the "notable prisoner" for whom they had not hesitated, it would seem, to incur the risk of bloodshed. But over one of them there came a change. The darkness which, at noon, was beginning to steal over the sky awed him, and the Divine patience and silence and meekness of the sufferer touched him. He looked back upon his past life, and saw an infinite evil. He looked to the man dying on the cross beside him, and saw an infinite compassion. There indeed was one, unlike all other "kings of the Jews" whom the robber had ever known. Such a one must be all that He had claimed to be. To be forgotten by that king seems to him now the most terrible of all punishments; to take part in the triumph of his return, the most blessed of all hopes. The yearning prayer was answered, not in the letter, but in the spirit. To him alone, of all the myriads who had listened to Him, did the Lord speak of Paradise [comp. PARADISE], waking with that word the thoughts of a purer past and the hopes of an immediate rest. But its joy was to be more than that of fair groves and pleasant streams. "Thou shalt be *with me*." He should be *remembered* there.

We cannot wonder that a history of such wonderful interest should at all times have fixed itself on men's minds, and led them to speculate and ask questions which we have no data to answer. The simplest and truest way of looking at it has been that of those who, from the great Alexandrian thinker (Origen, *in Rom.* iii.) to the writer of the most popular hymn of our own times, have seen in the "dying thief" the first great typical instance that "a man is justified by faith without the deeds of the law." Even those whose thoughts were less deep and wide acknowledged that in this and other like cases the baptism of blood supplied the place of the outward sign of regeneration (Hilar. *De Trinit.* c. x.; Jerome, *Ep.* xiii.). The logical speculations of the Pelagian controversy overclouded, in this as in other instances, the clear judgment of Augustine. Maintaining the absolute necessity of baptism to salvation, he had to discuss the question whether the penitent thief had been baptized or not, and he oscillates, with melancholy indecision, between the two answers. At times he is disposed to rest contented with the solution which had satisfied others. Then again he ventures on the conjecture that the water which sprang forth from the pierced side had sprinkled him, and so had been a sufficient baptism. Finally, yielding to the inexorable logic of a sacramental theory, he rests in the assumption that he probably had been baptized before, either in his prison or before he entered on his robber-life (comp. *De Anim.* i. 11, iii. 12; *Serm. de Temp.* 130; *Retract.* i. 26, iii. 18, 55).

Other conjectures turn more on the circumstances of the history. Bengel, usually acute, here overshoots the mark, and finds in the Lord's words to him, dropping all mention of the Messianic kingdom, an indication that the penitent thief was a Gentile, the impenitent a Jew, and that thus the scene on Calvary was typical of the position of the two Churches (*Gnomon N. T.* in Luke xxiii.). Stier (*Words of the Lord Jesus*, in loc.) reads in the words of reproof (*οὐδὲ φοβῇ σὺ τὸν θεόν*) the language of one who had all along listened with grief and horror to the revilings of the multitude, the burst of an indignation previously suppressed. The Apocryphal Gospels, as usual, do their best to lower the Divine history to the level of a legend. They follow the repentant robber into the unseen world. He is the first to enter Paradise of all mankind. Adam and Seth and the patriarchs find him already there bearing his cross. Michael the archangel had led him to the gate, and the fiery sword had turned aside to let him pass (*Evang. Nicod.* ii. 10). Names were given to the two robbers. Demas or Dismas was the penitent thief, hanging on the right, Gestas the impenitent on the left (*Evang. Nicod.* i. 10; *Narrat. Joseph.* c. 3). The cry of entreaty is expanded into a long wordy prayer (*Narr. Jos.* l. c.), and the promise suffers the same treatment. The history of the Infancy is made prophetic of that of the Crucifixion. The holy family, on their flight to Egypt, come upon a band of robbers. One of them, Titus (the names are different here), has compassion, purchases the silence of his companion, Dumachus, and the infant Christ prophesies that after thirty years Titus shall be crucified with him, and shall go before him into Paradise (*Evang. Infant.* c. 23). As in other instances [comp. MAGI], so in this, the fancy of inventors seems to have been fertile in names. Bede (*Collectan.*) gives Matha and Joca as those which prevailed in his time. The name given in the Gospel of Nicodemus has, however, kept its ground, and St. Dismas takes his place in the hagiology of the Syrian, the Greek, and the Latin Churches.

All this is, of course, puerile enough. The captious objections to the narrative of St. Luke as inconsistent with that of St. Matthew and St. Mark, and the inference drawn from them that both are more or less legendary, are hardly less puerile (Strauss, *Leben Jesu*, ii. 519; Ewald, *Christus, Gesch.* v. 438). The obvious answer to this is that which has been given by Origen (*Hom.* 35 *in Matt.*), Chrysostom (*Hom.* 88 *in Matt.*), and others (comp. Suicer, *s. v.* λῃστής). Both began by reviling. One was subsequently touched with sympathy and awe. The other explanation, given by Cyprian (*De Passione Domini*), Augustine (*De Cons. Evang.* iii. 16), and others, which forces the statement of St. Matthew and St. Mark into agreement with that of St. Luke by assuming a *synecdoche*, or *syllepsis*, or *enallage*, is, it is believed, far less satisfactory. The technical word does but thinly veil the contradiction which this hypothesis admits but does not explain. E. H. P.

**THIMNA'THAH** (תִּמְנָתָה: Θαμνάθ; Alex. Θαμνα: *Themnatha*). A town in the allotment of Dan (Josh. xix. 43 only). It is named between Elon and Ekron. The name is the same as that of the residence of Samson's wife (inaccurately given in A. V. TIMNAH); but the position of that place, which seems to agree with the modern *Tibneh* below *Zareah*, is not so suitable, being fully ten miles from *Akir*, the representative of Ekron. Timnah appears to have been almost as

Digitized by Google

common a name as Gibeah, and it is possible that there may have been another in the allotment of Dan besides that represented by *Tibneh*. G.

**THIS'BE** (Θίσβη; [Alex.] Θιβη). A name found only in Tob. i. 2, as that of a city of Naphtali from which Tobit's ancestor had been carried captive by the Assyrians. The real interest of the name resides in the fact that it is maintained by some interpreters (Hiller, *Onom.* pp. 236, 947; Reland, *Pal.* p. 1035) to be the place which had the glory of giving birth to ELIJAH THE TISHBITE. This, however, is, at the best, very questionable, and derives its main support from the fact that the word employed in 1 K. xvii. 1 to denote the relation of Elijah to Gilead, if pointed as it now stands in the Received Hebrew Text, signifies that he was not a native of Gilead but merely a resident there, and came originally from a different and foreign district But it is also possible to point the word so that the sentence shall mean "from Tishbi of Gilead," in which case all relation between the great Prophet and Thisbe of Naphtali at once falls to the ground. [See TISHBITE.]

There is, however, a truly singular variation in the texts of the passage in Tobit, a glance at which will show how hazardous it is to base any definite topographical conclusions upon it: —

| A. V. | VULGATE. | LXX. | REVISED GREEK TEXT. | VETUS LATINA. |
|---|---|---|---|---|
| Out of Thisbe which is at the right hand of that city which is called properly Nephthali in Galilee above Aser.* [*Marg.* or Kedesh of Nephthali in Galilee, Judg. iv. 6.] | Out of the tribe and city of Nephthali which is in the upper parts of Galilee above Naasson, behind the road which leads to the west, having on the left hand the city of Sephet. | Out of Thisbe which is at the right hand of Kudiôs of Nephthaleim in Galilee above Aser. | Out of Thibe which is at the right hand of Kudiôn of Nephthaleim in Upper Galilee above Asser, behind the setting sun on the right of Phogor (Peor). | Out of the city of Bihil which is on the right hand of Edisse, a city of Nephthalim in Upper Galilee over against Naason, behind the road which leads to the west of the left of Raphain. [Another MS. reads Gebriel, Cydiscus, and Raphaim, for Bihil, Edisse, and Raphain.] |

* *I. e.* probably, Hasor.

Assuming that Thisbe, and not Thibe, is the correct reading of the name, it has been conjectured (apparently for the first time by Keil, *Comm. über die Könige*, p. 247) that it originated in an erroneous rendering of the Hebrew word מִתִּשְׁבִי, which word in fact occurs in the Hebrew version of the passage, and may be pointed in two ways, so as to mean either "from the inhabitants of," or "from Tishbi," *i. e.* Thisbe. The reverse suggestion, in respect of the same word in 1 K. xvii. 1, has been already alluded to. [TISHBITE.] But this, though very ingenious, and quite within the bounds of possibility, is at present a mere conjecture, since none of the texts support it, and there is no other evidence in its favor.

No name resembling Thisbe or Thibe has been yet encountered in the neighborhood of *Kedes* or *Safed*, but it seems impossible to suppose that the minute definition of the Latin and Revised Greek Texts — equaled in the sacred books only by the well-known description of the position of Shiloh in Judg. xxi. 19 — can be mere invention. G.

**THISTLE.** [THORNS AND THISTLES.]

**THOM'AS** (Θωμᾶς: *Thomas*), one of the Apostles. According to Eusebius (*H. E.* i. 13) his real name was Judas. This may have been a mere confusion with Thaddæus, who is mentioned in the extract. But it may also be that Thomas was a surname. The word תְּאוֹמָא, *Thoma*,[a] means "a twin;" and so it is translated in John. xi. 16, xxi. 2, ὁ δίδυμος. Out of this name has grown the tradition that he had a twin-sister, Lydia (*Patres Apost.* p. 272), or that he was a twin-brother of our Lord (Thilo, *Acta Thomæ*, p. 94); which last, again, would confirm his identification with Judas (comp. Matt. xiii. 55).

He is said to have been born at Antioch (*Patres Apost.* pp. 272, 512).

In the catalogue of the Apostles he is coupled with Matthew in Matt. x. 3, Mark iii. 18, Luke vi. 15, and with Philip in Acts i. 13.

All that we know of him is derived from the Gospel of St. John; and this amounts to three traits, which, however, so exactly agree together, that, slight as they are, they place his character before us with a precision which belongs to no other of the twelve Apostles, except Peter, John, and Judas Iscariot. This character is that of a man slow to believe, seeing all the difficulties of a case, subject to despondency, viewing things on the darker side, and yet full of ardent love for his Master.

The first trait is his speech when our Lord determined to face the dangers that awaited Him in Judæa on his journey to Bethany. Thomas said to his fellow-disciples, "Let us also go (καὶ ἡμεῖς) that we may die with Him" (John xi. 16). He entertained no hope of His escape — he looked on the journey as leading to total ruin; but he determined to share the peril. "Though He slay me, yet will I trust in Him."

The second was his speech during the Last Supper. "Thomas saith unto Him, Lord, we know not whither thou goest, and how can we know the way" (xiv. 5)? It was the prosaic, incredulous doubt as to moving a step in the unseen future, and yet an eager inquiry to know how this step was to be taken.

The third was after the Resurrection. He was absent — possibly by accident, perhaps characteris-

[a] In Cant. vii. 4 [A. V. 3], it is simply רְאוֹם, exactly our "Tour." The frequency of the name in England is derived not from the Apostle, but from St Thomas of Canterbury.

Digitized by Google

tically — from the first assembly when Jesus had appeared. The others told him what they had seen. He broke forth into an exclamation, the terms of which convey to us at once the vehemence of his doubt, and at the same time the vivid picture that his mind retained of his Master's form as he had last seen Him lifeless on the cross. "Except I see in his hands the print of the nails, and put my finger into the print of the nails, and thrust my hand into his side, I will not, I cannot believe" (οὐ μὴ πιστεύσω), John xx. 25.

On the eighth day he was with them at their gathering, perhaps in expectation of a recurrence of the visit of the previous week; and Jesus stood amongst them. He uttered the same salutation, "Peace be unto you;" and then turning to Thomas, as if this had been the special object of his appearance, uttered the words which convey as strongly the sense of condemnation and tender reproof, as those of Thomas had shown the sense of hesitation and doubt. "Bring thy finger hither [ὧδε — as if Himself pointing to his wounds] and see my hands; and bring thy hand and thrust it in my side; and do not become (μὴ γίνου) unbelieving (ἄπιστος), but believing (πιστός)." "He answers to the words that Thomas had spoken to the ears of his fellow-disciples only; but it is to the thought of his heart rather than to the words of his lips that the Searcher of hearts answers. . . . . Eye, ear, and touch, at once appealed to, and at once satisfied — the form, the look, the voice, the solid and actual body: and not the senses only, but the mind satisfied too; the knowledge that searches the very reins and the hearts; the love that loveth to the end, infinite and eternal" (Arnold's *Serm.* vi. 238).

The effect [a] on Thomas is immediate. The conviction produced by the removal of his doubt became deeper and stronger than that of any of the other Apostles. The words in which he expressed his belief contain a far higher assertion of his Master's Divine nature than is contained in any other expression used by Apostolic lips, "My Lord, and my God." Some have supposed that κύριος refers to the human, θεός to the Divine nature. This is too artificial. It is more to the point to observe the exact terms of the sentence, uttered (as it were) in astonished awe. "It is then my Lord and my God!" [b] And the word "my" gives it a personal application to himself. Additional emphasis is given to this declaration from its being the last incident narrated in the direct narrative of the Gospel (before the supplement of ch. xxi.), thus corresponding to the opening words of the prologue. "Thus Christ was acknowledged on earth to be what St. John had in the beginning of his Gospel declared him to be from all eternity; and the words of Thomas at the end of the 20th chapter do but repeat the truth which St. John had stated before in his own words at the beginning of the first" (Arnold's *Serm.* vi. 401).

The answer of our Lord sums up the moral of the whole narrative: "Because [c] thou hast seen me, thou hast believed: blessed are they that have not seen me, and yet have believed" (xx. 29). By this incident, therefore, Thomas, "the Doubting Apostle," is raised at once to the Theologian in the original sense of the word. "Ab eo dubitatum est," says Augustine, "ne a nobis dubitaretur." It is this feature of his character which has been caught in later ages, when for the first time its peculiar lesson became apparent. In the famous statue of him by Thorwaldsen in the church at Copenhagen, he stands, the thoughtful, meditative skeptic, with the rule in his hand for the due measuring of evidence and argument. This scene was one of the favorite passages of the English theologian who in this century gave so great an impulse to the progress of free inquiry combined with fervent belief, of which Thomas is so remarkable an example. Two discourses on this subject occur in Dr. Arnold's published volumes of Sermons (v. 312, vi. 233). Amongst the last words which he repeated before his own sudden death (*Life and Correspondence*, 7th ed. p. 617) was the blessing of Christ on the faith of Thomas.

In the N. T. we hear of Thomas only twice again, once on the Sea of Galilee with the seven disciples, where he is ranked next after Peter (John xxi. 2), and again in the assemblage of the Apostles after the Ascension (Acts i. 13).

The close of his life is filled with traditions or legends; which, as not resting on Biblical grounds, may be briefly dispatched.

The earlier traditions, as believed in the 4th century (Eus. *H. E.* i. 13, iii. 1; Socrat. *H. E.* i. 19), represent him as preaching in Parthia or Persia, and as finally buried at Edessa (Socr. *H. E.* iv. 18). Chrysostom mentions his grave at Edessa, as being one of the four genuine tombs of Apostles; the other three being Peter, Paul, and John (*Hom. in Heb.* 26). With his burial at Edessa agrees the story of his sending Thaddæus to Abgarus with our Lord's letter (Eus. *H. E.* i. 13).

The later traditions carry him further East, and ascribe to him the foundation of the Christian church in Malabar, which still goes by the name of "the Christians of St. Thomas;" and his tomb is shown in the neighborhood. This, however, is now usually regarded as arising from a confusion with a later Thomas, a missionary from the Nestorians.

His martyrdom (whether in Persia or India) is said to have been occasioned by a lance; and is commemorated by the Latin Church on December 21, by the Greek Church on October 6, and by the Indians on July 1.

For these traditions and their authorities, see Butler's *Lives of the Saints*, December 21. An apocryphal "Gospel of Thomas" (chiefly relating to the Infancy) published in Tischendorf's *Evangelia Apocrypha*. The Apocryphal "Acts of Thomas" by Thilo (*Codex Apocryphus*).[d]

A. P. S.

THOM'OI (Θομοί; [Vat. Θομθει:] *Codex*). THAMAH OR TAMAH (1 Esdr. v. 32).

---

[a] It is useless to speculate whether he obeyed our Lord's invitation to examine the wounds. The impression is that he did not.

[b] It is obviously of no dogmatic importance whether the words are an address or a description. That they are the latter, appears from the use of the nominative ὁ κύριος. The form ὁ θεός proves nothing, as this is used for the vocative. At the same time it should be observed that the passage is *said to Christ*, εἶπεν αὐτῷ.

[c] "Thomas" (Θωμα) is omitted in the best MSS.

[d] The apocryphal "Acts of Thomas" have been separately published by Thilo (*Acta S. Thomæ Apostoli*, etc. Lips. 1823), but they are *not* contained in his *Codex Apocryphus* (1832), which is confined to the Apocryphal Gospels. The text is best given in Tischendorf's *Acta Apostolorum Apocrypha*, Lips. 1851.

• **THORN IN THE FLESH.** [PAUL, III. 2383.]

**THORNS AND THISTLES.** There appear to be eighteen or twenty Hebrew words which point to different kinds of prickly or thorny shrubs, but the context of the passages where the several terms occur affords, for the most part, scarcely a single clew whereby it is possible to come to anything like a satisfactory conclusion with regard to their respective identifications. These words are variously rendered in the A. V. by "thorns," "briers," "thistles," etc. It were a hopeless task to enter into a discussion of these numerous Hebrew terms; we shall not therefore attempt it, but confine our remarks to some of the most important names, and those which seem to afford some slight indications as to the plants they denote.

1. *Atâd* (אָטָד: ἡ ῥάμνος: *rhamnus*) occurs as the name of some spinous plant in Judg. ix. 14, 15, where the A. V. renders it by "bramble" (Marg. "thistle"), and in Ps. lviii. 9 (A. V. "thorns"). The plant in question is supposed to be *Lycium Europæum*, or *L. afrum* (box-thorn), both of which species occur in Palestine (see Strand, *Flor. Palæst.* Nos. 124. 125). Dioscorides (i. 119) thus speaks of the Ῥάμνος: "The rhamnus, which some call *persephonion*, others *leucacantha*, the Romans white-thorn, or *Cerbalis*, and the Carthaginians *atudin*, is a shrub which grows around hedges; it has erect branches with sharp spines, like the *oxyacantha* (hawthorn?), but with small, oblong, thick soft leaves." Dioscorides mentions three kinds of rhamnus, two of which are identified by Sprengel, in his Commentary, with the two species of *Lycium* mentioned above.[a] See Belon, *Observations de Plus. Sing* etc., ii. ch. 78; Rauwolff, *Trav.* bk. iii. ch. 8. Prosper Alpinus, *De Plant. Ægypt.* p. 21; Celsius, *Hierob.* i. 199. The Arabic name of this plant (أَطْد, *âtâd*) is identical with the Hebrew; but it was also known by the name of *'Ausej* (عَوسج).

*Lycium Europæum* is a native of the south of Europe and the north of Africa; in the Grecian islands it is common in hedges (*English Cyclop.* "Lycium"). See also the passages in Belon and Rauwolff cited above.

2. *Chêdek* (חֲדֶק: ἄκανθα, σὴς ἐκτράγων: *spina, paliurus*) occurs in Prov. xv. 19, "The way of the slothful is as an hedge of *Chêdek*" (A. V. "thorns"), and in Mic. vii. 4, where the A. V. has "brier." The Alexand. LXX., in the former passage, interprets the meaning thus, "The ways of the slothful are strewed with thorns." Celsius (*Hierob.* ii. 85), referring the Heb. term to the Arabic *Chadak* (حدق), is of opinion that some spinous species of the *Solanum* is intended. The Arabic term clearly denotes some kind of *Solanum*; either the *S. melongela*, var. *esculentum*, or the *S. Sodomeum* ("apple of Sodom"). Both these kinds are beset with prickles; it is hardly probable, however, that they are intended by the Heb. word. Several varieties of the egg-plant are found in Palestine, and some have supposed that the famed Dead Sea apples are the fruit of the *S. Sodomeum* when suffering from the attacks of some insect; but see on this subject VINE OF SODOM. The Heb. term may be generic, and intended to denote any thorny plant suitable for hedges.

3. *Chôach* (חוֹחַ: ἄκαν, ἄκανθα, ἀκχοΐχ, κνίδη: *paliurus, lappa, spina, tribulus*), a word of very uncertain meaning which occurs in the sense of some thorny plant in Is. xxxiv. 13; Hos. ix. 6; Prov. xxvi. 9; Cant. ii. 2; 2 K. xiv. 9, "the *chôach* of Lebanon sent to the cedar of Lebanon," etc. See also Job xxxi. 40: "Let *chôach* (A. V. 'thistles')

*Lycium Europæum.*

grow instead of wheat." Celsius (*Hierob.* i. 477) believes the black-thorn (*Prunus sylvestris*) is denoted, but this would not suit the passage in Job just quoted, from which it is probable that some thorny weed of a quick growth is intended. Perhaps the term is used in a wide sense to signify any thorny plant; this opinion may, perhaps, receive some slight confirmation from the various renderings of the Hebrew word as given by the LXX. and Vulgate.

4. *Dardar* (דַּרְדַּר: τρίβολος: *tribulus*) is mentioned twice in connection with the Heb. *kôts* (קוֹץ), namely, in Gen. iii. 18, "thorns and *thistles*" (A. V.), and in Hos. x. 8, "the thorn and the *thistle* shall come up on their altars." The Greek τρίβολος occurs in Matt. vii. 16, "Do men gather figs of thistles?" See also Heb. vi. 8, where it is rendered "briers" by the A. V. There is some difference of opinion as to the plant or

[a] In his *Hist. Rei Herb.*, however, he refers the ἄκανθος to the *Zizyphus vulgaris*.

Digitized by Google

plants indicated by the Greek τρίβολος and the Latin *tribulus*. Of the two kinds of land *tribuli* mentioned by the Greeks (Dioscorides, iv. 15; Theophrastus, *Hist. Plant.* vi. 7, § 5), one is supposed by Sprengel, Stackhouse, Royle, and others, to refer to the *Tribulus terrestris*, Linn., the other to the *Fagonia Cretica*; but see Schneider's Comment. on Theophrastus *l. c.*, and Du Molin (*Flore Poetique Ancienne*, p. 305), who identifies the *tribulus* of Virgil with the *Centaurea calcitrapa*, Linn. ("star-thistle"). Celsius (*Hierob.* ii. 128) argues in favor of the *Fagonia Arabica*, of which a figure is given in Shaw's *Travels* (Catal. Plant. No. 229); see also Forskål, *Flor. Arab.* p. 88. It is probable that either the *Tribulus terrestris*, which, however, is not a spiny or thorny plant, but has spines on the fruit, or else the *C. calcitrapa*, is the plant which is more particularly intended by the word *dardar*.

5. *Shâmîr* (שָׁמִיר), almost always found in connection with the word *shâith* (שַׁיִת), occurs in several places of the Hebrew text; it is variously rendered by the LXX., χέρσος, χόρτος, βέβρις, ἄγρωστις, ξηρά. According to Abu'lfadl, cited by Celsius (*Hierob.* ii. 188), "the Samur (سمر) of the Arabs is a thorny tree; it is a species of *Sidra* which does not produce fruit." No thorny plants are more conspicuous in Palestine and the Bible lands than different kinds of *Rhamnaceæ* such as *Paliurus aculeatus* (Christ's Thorn), and *Zizyphus Spina Christi*; this latter plant is the *nebk* of the Arabs, which grows abundantly in Syria and Palestine, both in wet and dry places; Dr. Hooker noticed a specimen nearly 40 feet high, spreading as widely as a good *Quercus ilex* in England. The

*Tribulus Terrestris.*

*nebk* fringes the banks of the Jordan, and flourishes on the marshy banks of the Lake of Tiberias; it forms either a shrub or a tree, and, indeed, is quite common all over the country. The Arabs have the terms *Salam*, *Sidra*, *Dhâl*, *Nabca*, which appear to denote either varieties or different species of *Paliurus* and *Zizyphus*, or different states perhaps of the same tree; but it is a difficult matter to assign to each its particular signification. The *Nâtsôts* (נַעֲצוּץ) of Is. vii. 19, lv. 13, probably denotes some species of *Zizyphus*. The "crown of thorns" which was put in derision upon our Lord's head just before his crucifixion, was probably composed of the thorny twigs of the *nebk* (*Zizyphus Spina Christi*) mentioned above; being common everywhere, they could readily be procured. "This plant," says Hasselquist (*Trav.* p. 288), was very suitable for the purpose, as it has many sharp thorns, and its flexible, pliant, and round branches might easily be plaited in the form of a crown: and what, in my opinion, seems to be the greatest proof of it, that the leaves much resemble those of ivy, as they are a very deep green.[a] Perhaps the enemies of Christ would have a plant somewhat resembling that with which emperors and generals were used to be crowned, that there might be calumny even in the punishment." Still, as Rosenmüller (*Bib. Bot.* p. 201) remarks, "there being so many kinds of thorny plants in Palestine, all conjectures must remain uncertain, and can never lead to any satisfactory result." Although it is not possible to fix upon any one definite Hebrew word as the representative of any kind of "thistle," yet there can be no doubt this plant must be occasionally alluded to Hasselquist (*Trav.* p. 280), noticed six species of *Cardui* and *Cnici* on the road between Jerusalem and Rama; and Miss Beaufort speaks of giant thistles of the height of a man on horseback, which she saw near the ruins of Fellhâm (*Egyptian Sep. and Syrian Shrines*, ii. 45, 50). We must also notice another thorny plant and very troublesome weed, the rest-harrow (*Ononis spinosa*), which covers entire fields and plains both in Egypt and Palestine, and which, as Hasselquist says (p. 280), is no doubt referred to in some parts of the Holy Scripture.

Dr. Thomson (*Land and Book*, p. 59) illustrates Is. xxxiii. 12, "the people shall be as the burning of lime, as thorns cut up shall they be burned in the fire," by the following observation, "Those people yonder are cutting up thorns with their mattocks and pruning-hooks, and gathering them into bundles to be burned in these burnings of lime. It is a curious fidelity to real life that when the thorns are merely to be destroyed, they

[a] Hasselquist must have intended to restrict the similarity here spoken of entirely to the *color* of the leaves, for the plants do not in the slightest degree resemble each other in the *form* of the leaves.

Digitized by Google

are never cut up, but set on fire where they grow. They are *cut up* only for the lime-kiln." See also p. 342 for other Scriptural allusions.[a] W. H.

* **THOROW**, Ex. xiv. 16 (A. V.), in the ed. of 1611, the old form for "through." H.

* **THOROWOUT**, originally in Num. xxviii. 29, but superseded by "throughout." H.

* **THOUGHT.** The phrase "to take *thought*" is used in the A. V. (1 Sam. ix. 5; Matt. vi. 25, 27, 28, 31, 34, x. 19, and the parallel passages) in the sense of "to be anxious" (Gr. *μεριμνᾶω*). So often in the older English writers. A.

**THRA'CIA** (*Θρᾴκια, ἡ*). A Thracian horseman is incidentally mentioned in 2 Macc. xii. 35, apparently one of the body-guard of Gorgias, governor of Idumæa under Antiochus Epiphanes. Thrace at this period included the whole of the country within the boundary of the Strymon, the Danube, and the coasts of the Ægean, Propontis, and Euxine — all the region, in fact, now comprehended in Bulgaria and Roumelia. In the early times it was inhabited by a number of tribes, each under its own chief, having a name of its own and preserving its own customs, although the same general character of ferocity and addiction to plunder prevailed throughout. Thucydides describes the limits of the country at the period of the Peloponnesian war, when Sitalces king of the Odryse, who inhabited the valley of the Hebrus (*Maritsa*), had acquired a predominant power in the country, and derived what was for those days a large revenue from it. This revenue, however, seems to have arisen mainly out of his relations with the Greek trading communities established on different points of his seaboard. Some of the clans, even within the limits of his dominion, still retained their independence; but after the establishment of a Macedonian dynasty under Lysimachus, the central authority became more powerful; and the wars on a large scale which followed the death of Alexander furnished employment for the martial tendencies of the Thracians, who found a demand for their services as mercenaries everywhere. Cavalry was the arm which they chiefly furnished, the rich pastures of Roumelia abounding in horses. From that region came the greater part of Sitalces' cavalry, amounting to nearly 50,000.

The only other passage, if any, containing an allusion to Thrace, to be found in the Bible, is Gen. x. 2, where — on the hypothesis that the sons of Japhet, who are enumerated, may be regarded as the eponymous representatives of different branches of the Japhetian family of nations — *Tiras* has by some been supposed to mean Thrace; but the only ground for this identification is a fancied similarity between the two names. A stronger likeness, however, might be urged between the name Tiras and that of the Tyrsi or Tyreni, the ancestors of the Italian Etruscans, whom, on the strength of a local tradition, Herodotus places in Lydia in the ante-historical times. Strabo brings forward several facts to show that, in the early ages, Thracians existed on the Asiatic as well as the European shore; but this circumstance furnishes very little help towards the identification referred to. (Herodotus, i. 94, v. 3 ff.; Thucydides, ii. 97· Tacitus, *Annal.* iv. 35; Horat. *Sat.* i. 6.)

**THRASE'AS** (*Θρασέας*: *Thraseas*). Father of Apollonius (1). 2 Macc. iii. 5. [APOLLONIUS.]

* **THREAD.** [HANDICRAFT, 6; LACE.]

**THREE TAVERNS** (*Τρεῖς Ταβέρναι*: *Tres Tabernæ*), a station on the Appian Road, along which St. Paul travelled from Puteoli to Rome (Acts xxviii. 15). The distances, reckoning southward from Rome, are given as follows in the *Antonine Itinerary*, "to Aricia, 16 miles; to Three Taverns, 17 miles; to Appii Forum, 10 miles;" and, comparing this with what is observed still along the line of road, we have no difficulty in coming to the conclusion that "Three Taverns" was near the modern *Cisterna*. For details see the *Dict. of Greek and Rom. Geog.* ii. 1226 *b* 1291 *b*.

Just at this point a road came in from Antium on the coast. This we learn from what Cicero says of a journey from that place to his villa at Formiæ (*Att.* ii. 12). There is no doubt that "Three Taverns" was a frequent meeting-place of travellers. The point of interest as regards St. Paul is that he met here a group of Christians who (like a previous group whom he had met at APPII FORUM) came from Rome to meet him in consequence of having heard of his arrival at PUTEOLI. A good illustration of this kind of intercourse along the Appian Way is supplied by Josephus (*Ant.* xvii. 12, § 1) in his account of the journey of the pretender Herod-Alexander. He landed at Puteoli (Dicæarchia) to gain over the Jews that were there; and "when the report went about him that he was coming to Rome, the whole multitude of the Jews that were there went out to meet him, ascribing it to Divine Providence that he had so unexpectedly escaped."

**THRESHING.** [AGRICULTURE, i. 43 f.]

* **THRESHING-FLOOR.** [AGRICULTURE; RUTH, BOOK OF.]

**THRESHOLD.** 1. (See GATE.) 2. Of the two words so rendered in A. V., one, *miphtân*,[a] seems to mean sometimes, as the Targum explains it, a projecting beam or corbel, at a higher point than the threshold properly so called (Ez. ix. 3, x. 4, 18).

**THRESHOLDS, THE** (הָאַסִּפִּי: *ἐν τοῖς συναγωγεῖν*: *vestibula*). This word, *ha-Asuppi*, appears to be inaccurately rendered in Neh. xii. 25, though its real force has perhaps not yet been discovered. The "house of the Asuppim" (בֵּית הָאַסִּפִּים), or simply "the Asuppim," is mentioned in 1 Chr. xxvi. 15, 17, as a part, probably a gate, of the inclosure of the "House of Jehovah," *i. e.* the Tabernacle, as established by David — apparently at its S. W. corner. The allusion in Neh. xii. 25 is undoubtedly to the same place, as is shown not only by the identity of the name, but by the reference to David (ver. 24; compare 1 Chr. xxv. 1). *Asuppim* is derived from a root signifying

---

[a] * On the Biblical names of thorn and thistle, see Dietrich's *Abhandlungen für Semitische Wortforschung*, pp. 85–96 (Leips. 1844). H.

[a] מִפְתָּן: *οἰκόπιον*: *limen* (see Gen. p. 1141)

Digitized by Google

"to gather" (Gesenius, *Thes.* p. 131), and in the absence of any indication of what the "house of the Asuppim" was, it is variously explained by the lexicographers as a store-chamber (Gesenius), or a place of assembly (Fürst, Bertheau). The LXX. in 1 Chr. xxvi. have *οἶκος Ἐσεφείν*: Vulg. *domus seniorum concilium*. On the other hand the Targum renders the word by שְׁקוּפָא, "a lintel," as if deriving it from סָף. G.

**THRONE** (כִּסֵּא). The Hebrew term *cissé* applies to any elevated seat occupied by a person in authority, whether a high-priest (1 Sam. i. 9), a judge (Ps. cxxii. 5), or a military chief (Jer. i. 15). The use of a chair in a country where the usual postures were squatting and reclining, was at all times regarded as a symbol of dignity (2 K. iv. 10; Prov. ix. 14). In order to specify a throne in our sense of the term, it was necessary to add to *cissé* the notion of royalty: hence the frequent occurrence of such expressions as "the throne of the kingdom"

Assyrian throne or chair of state (Layard, *Nineveh*, ii. 301).

(Deut. xvii. 18; 1 K. i. 46; 2 Chr. vii. 18). The characteristic feature in the royal throne was its elevation: Solomon's throne was approached by six steps (1 K. x. 19; 2 Chr. ix. 18); and Jehovah's throne is described as "high and lifted up" (Is. vi. 1). The materials and workmanship were costly: that of Solomon is described as a "throne of ivory" (*i. e.* inlaid with ivory), and overlaid with pure gold in all parts except where the ivory was apparent. It was furnished with arms or "stays," after the manner of the Assyrian chair of state depicted above. The steps were also lined with pairs of lions, the number of them being perhaps designed to correspond with that of the tribes of Israel. As to the form of the chair, we are only informed in 1 K. x. 19, that "the top was round behind" (apparently meaning either that the back was rounded off at the top, or that there was a circular canopy over it): in lieu of this particular we are told in 2 Chr. ix. 18 that "there was a footstool of gold, fastened to the throne," but the verbal agreement of the descriptions in other respects leads to the presumption that this variation arises out of a corrupted text (Thenius, *Comm.* in 1 K. *l. c.*), a presumption which is favored by the fact that the terms פֶּדֶשׁ and the Hophal form מְאֻשָּׁרִים occur nowhere else. The king sat on his throne on state occasions, as when granting audiences (1 K. ii. 19, xxii. 10; Esth. v. 1), receiving homage (2 K. xi. 19), or administering justice (Prov. xx. 8). At such times he appeared in his royal robes (1 K. xxii. 10; Jon. iii. 6; Acts xii. 21). The throne was the symbol of supreme power and dignity (Gen. xli. 40), and hence was attributed to Jehovah both in respect to his heavenly abode (Ps. xi. 4, ciii. 19; Is. lxvi. 1; Acts vii. 49; Rev. iv. 2), or to his earthly abode at Jerusalem (Jer. iii. 17), and more particularly in the Temple (Jer. xvii. 12; Ez. xliii. 7). Similarly "*to* sit upon the throne" implied the exercise of regal power (Deut. xvii. 18; 1 K. xvi. 11; 2 K. x. 30; Esth. i. 2), and "to sit upon the throne of another person," succession to the royal dignity (1 K. i 13). In Neh. iii. 7, the term *cissé* is applied to the official residence of the governor, which appears to have been either on or near to the city wall. W. L. B.

**THUMMIM.** [URIM AND THUMMIM.]

**THUNDER** (רַעַם). In a physical point of view, the most noticeable feature in connection with thunder is the extreme rarity of its occurrence during the summer months in Palestine and the adjacent countries. From the middle of April to the middle of September it is hardly ever heard. Robinson, indeed, mentions an instance of thunder in the early part of May (*Researches*, i. 480), and Russell in July (*Aleppo*, ii. 289), but in each case it is stated to be a most unusual event. Hence it was selected by Samuel as a striking expression of the Divine displeasure towards the Israelites: "Is it not wheat harvest to-day? I will call upon the Lord, and he shall send thunder and rain" (1 Sam. xii. 17). Rain in harvest was deemed as extraordinary as snow in summer (Prov. xxvi. 1), and Jerome asserts that he had never witnessed it in the latter part of June or in July (*Comm.* on Am. iv. 7): the same observations apply equally to thunder which is rarely unaccompanied with rain (Russell, i. 72, ii. 285). In the imaginative philosophy of the Hebrews, thunder was regarded as the voice of Jehovah (Job xxxvii. 2, 4, 5, xl. 9; Ps. xviii. 13, xxix. 3–9; Is. xxx. 30, 31), who dwelt behind the thunder-cloud (Ps. lxxxi. 7). Hence thunder is occasionally described in the Hebrew by the term "voices" (Ex. ix. 23, 28; 1 Sam. xii. 17). Hence the people in the Gospel supposed that the voice of the Lord was the sound of thunder (John xii. 29). Thunder was, to the mind of the Jew, the symbol of Divine power (Ps. xxix. 3, &c.), and vengeance (1 Sam. ii. 10; 2 Sam. xxii. 14; Ps. lxxvii. 18; Is. xxix. 6; Rev. viii. 5). It was either the sign or the instrument of his wrath on numerous occasions, as during the plague of hail in Egypt (Ex. ix. 23, 28), at the promulgation of the Law (Ex. xix. 16), at the discomfiture of the Philistines (1 Sam. vii. 10), and when the Israelites demanded a king (1 Sam. xii. 17). The term thunder was transferred to the war-shout of a military leader (Job xxxix. 25), and hence Jehovah is described as "causing his voice to be heard" in the battle (Is. xxx. 30) It is also used as a superlative expression in Job xxvi. 14, where the "thunder of his power" is contrasted with the "little portion," or rather the *gentle whisper* that can be heard. In Job xxxix. 19 "thunder" is a mistranslation for "a flowing mane."

**THYATIRA** (Θυάτειρα, τά: *civitas Thyatirenorum*). A city on the Lycus, founded by Seleucus Nicator. It was one of the many Macedonian colonies established in Asia Minor, in the sequel of the destruction of the Persian empire by Alexander. It lay to the left of the road from Pergamus to Sardis, on the southern incline of the water-shed which separates the valley of the Caicus (*Bakyr-chai*) from that of the Hermus, on the very confines of Mysia and Ionia, so as to be sometimes reckoned within the one, and sometimes within the other. In earlier times it had borne the names of Pelopia, Semiramis, and Euhippia. At the commencement of the Christian era, the Macedonian element so preponderated as to give a distinctive character to the population; and Strabo simply calls it a Macedonian colony. The original inhabitants had probably been distributed in hamlets round about, when Thyatira was founded. Two of these, the inhabitants of which are termed *Areni* and *Nagdeni*, are noticed in an inscription of the Roman times. The resources of the neighboring region may be inferred, both from the name Euhippia and from the magnitude of the booty which was carried off in a foray conducted jointly by Eumenes of Pergamus and a force detached by the Roman admiral from Canæ, during the war against Antiochus. During the campaign of B. C. 190, Thyatira formed the base of the king's operations; and after his defeat, which took place only a few miles to the south of the city, it submitted, at the same time with its neighbor Magnesia-on-Sipylus, to the Romans, and was included in the territory made over by them to their ally the Pergamene sovereign.

During the continuance of the Attalic dynasty

Thyatira

Thyatira scarcely appears in history; and of the various inscriptions which have been found on the site, now called *Ak Hissar*, not one unequivocally belongs to earlier times than those of the Roman empire. The prosperity of the city seems to have received a new impulse under Vespasian, whose acquaintance with the East, previously to mounting the imperial throne, may have directed his attention to the development of the resources of the Asiatic cities. A bilingual inscription, in Greek and Latin, belonging to the latter part of his reign, shows him to have restored the roads in the domain of Thyatira. From others, between this time and that of Caracalla, there is evidence of the existence of many corporate guilds in the city. Bakers, potters, tanners, weavers, robemakers, and dyers (οἱ βαφεῖς) are specially mentioned. Of these last there is a notice in no less than three inscriptions, so that dyeing apparently formed an important part of the industrial activity of Thyatira, as it did of that of Colossæ and Laodicea. With this guild there can be no doubt that Lydia, the seller of purple stuffs (πορφυρόπωλις), from whom St. Paul met with so favorable a reception at Philippi (Acts xvi. 14), was connected.

The principal deity of the city was Apollo, worshipped as the sun-god under the surname Tyrimnas. He was no doubt introduced by the Macedonian colonists, for the name is Macedonian. One of the three mythical kings of Macedonia, whom the genealogists placed before Perdiccas — the first of the Temenidæ that Herodotus and Thucydides recognize — is so called; the other two being *Caranus* and *Cœnus*, manifestly impersonations of the *chief* and the *tribe*. The inscriptions of Thyatira give Tyrimnas the titles of πρόπολις and πρωτάτωρ θεός; and a special priesthood was attached to his service. A priestess of Artemis is also mentioned, probably the administratrix of a cult derived from the earlier times of the city, and similar in its nature to that of the Ephesian Artemis. Another superstition, of an extremely curious nature, which existed at Thyatira, seems to have been brought thither by some of the corrupted Jews of the dis-

Digitized by Google

persed tribes. A fane stood outside the walls, dedicated to *Sambatha* — the name of the sibyl who is sometimes called Chaldæan, sometimes Jewish, sometimes Persian — in the midst of an inclosure designated "the Chaldæan's court" (*τοῦ Χαλδαίου περίβολος*). This seems to lend an illustration to the obscure passage in Rev. ii. 20, 21, which Grotius interprets of the wife of the bishop. The drawback against the commendation bestowed upon the angel of the Thyatiran church is that he tolerates "that woman, that Jezebel, who, professing herself to be a prophetess, teaches and deludes my servants into committing fornication and eating things offered to idols." Time, however, is given her to repent; and this seems to imply a form of religion which had become condemnable from the admixture of foreign alloy, rather than one idolatrous *ab initio*. Now there is evidence to show that in Thyatira there was a great amalgamation of races. Latin inscriptions are frequent, indicating a considerable influx of Italian immigrants; and in some Greek inscriptions many Latin words are introduced. Latin and Greek names, too, are found accumulated on the same individuals, — such as Titus Antonius Alfenus Arignotus, and Julia Severina Stratonicis. But amalgamation of different races, in pagan nations, always went together with a syncretism of different religions, every relation of life having its religious sanction. If the sibyl Sambatha was really a Jewess, lending her aid to this proceeding, and not discountenanced by the authorities of the Judæo-Christian church at Thyatira, both the censure and its qualification become easy of explanation.

It seems also not improbable that the imagery of the description in Rev. ii. 18, *ὁ ἔχων τοὺς ὀφθαλμοὺς αὐτοῦ ὡς φλόγα πυρός, καὶ οἱ πόδες αὐτοῦ ὅμοιοι χαλκολιβάνῳ*, may have been suggested by the current pagan representations of the tutelary deity of the city. See a parallel case at Smyrna. [Smyrna.]

Besides the cults which have been mentioned, there is evidence of a deification of Rome, of Hadrian, and of the imperial family. Games were celebrated in honor of Tyrimnas, of Hercules, and of the reigning emperor. On the coins before the imperial times, the heads of Bacchus, of Athenè, and of Cybele, are also found: but the inscriptions only indicate a cult of the last of these.

(Strabo, xiii. c. 4; Pliny, *H. N.* v. 31; Liv. xxxvii. 8, 21, 44; Polybius, xvi. 1, xxxii. 25; Stephanus Byzant. *sub v.* *Θυάτειρα*; Boeckh, *Inscript. Græc. Thyatir.*, especially Nos. 3484–3499; Suidas, *s.* *Σαμβήθη*: Ælian, *Var. Hist.* xii. 35; Clinton, *F. H.* ii. 221; Hoffmann, *Griechenland*, ii. 1714.)

J. W. B.

**THYINE WOOD** (*ξύλον θύϊνον*: *lignum thyinum*) occurs once only, namely, in Rev. xviii. 12, where the margin has "sweet" (wood). It is mentioned as one of the valuable articles of commerce that should be found no more in Babylon (Rome), whose fall is here predicted by St. John. There can be little doubt that the wood here spoken of is that of the *Thuya articulata*, Desfont., the *Callitris quadrivalvis* of present botanists. This tree was much prized by the ancient Greeks and Romans, on account of the beauty of its wood for various ornamental purposes. It is the *θυεία* of Theophrastus (*Hist. Plant.* iii. 4, §§ 2, 6); the *θύϊνον ξύλον* of Dioscorides (i. 21). By the Romans the tree was called *citrus*, the wood *citrum*. It is a native of Barbary, and grows to the height of 15 to 25 feet. Pliny (*H. N.* xiii. 15) says that the *citrus* is found abundantly in Mauritania. He speaks of a mania amongst his countrymen for tables made of its wood; and tells us that when the Roman ladies were upbraided by their husbands for their extravagance in pearls, they retorted upon them their excessive fondness for tables made of this wood. Fabulous prices were given for tables and other ornamental furniture made of citrus wood (see Pliny, *l. c.*). The Greek and Roman writers frequently allude to this wood. See a number of references in Celsius, *Hierob.* ii. 25. The roof of

*Thuya articulata.*

the mosque at Cordova, built in the 9th cent., is of "thyine wood" (Loudon's *Arboretum*, iv. 2463). Lady Callcott says the wood is dark nut-brown, close grained, and very fragrant.[a] The resin known by the name of Sandarach is the produce of this tree, which belongs to the cypress tribe (*Cupressineæ*), of the nat. order *Coniferæ*.

W. H.

**TIBERIAS** (*Τιβεριάς*: *Tiberias*), a city in the time of Christ, on the Sea of Galilee; first mentioned in the New Testament (John vi. 1, 23, xxi. 1), and then by Josephus (*Ant.* xviii., *Bel. Jud.* ii. 9, § 1), who states that it was built by Herod Antipas, and was named by him in honor of the emperor Tiberius. It was probably a new town, and not a restored or enlarged one merely; for "Rakkath" (Josh. xix. 35), which is said in the Talmud to have occupied the same position, lay in the tribe of Naphtali (if we insist on the boundaries as indicated by the clearest passages) whereas Tiberias appears to have been within the limits of Zebulun (Matt. iv. 13). See Winer *Realw.* ii. 619. The same remark may be made respecting Jerome's statement, that Tiberias succeeded to the place of the earlier Chinnereth (*Onomasticon*, sub voce); for this latter town, as may

[a] "It is highly balsamic and odoriferous, the resin no doubt, preventing the ravages of insects as well as the influence of the air" (Loudon's *Arb.* *l. c.*).

Digitized by Google

be argued from the name itself, must have been further north than the site of Tiberias. The tenacity with which its Roman name has adhered to the spot (see *infra*) indicates the same fact: for, generally speaking, foreign names in the East applied to towns previously known under names derived from the native dialect, as *e. g.* Epiphania for Hammath (Josh. xix. 35), Palmyra for Tadmor (2 Chr. viii. 4), Ptolemais for Akko (Acts xxi. 7), lost their foothold as soon as the foreign power passed away which had imposed them, and gave place again to the original appellations. Tiberias was the capital of Galilee from the time of its origin until the reign of Herod Agrippa II., who changed the seat of power back again to Sepphoris, where it had been before the founding of the new city. Many of the inhabitants were Greeks and Romans, and foreign customs prevailed there to such an extent as to give offense to the stricter Jews. [HERODIANS.] Herod, the founder of Tiberias, had passed most of his early life in Italy, and had brought with him thence a taste for the amusements and magnificent buildings, with which he had been familiar in that country. He built a stadium there, like that in which the Roman youth trained themselves for feats of rivalry and war. He erected a palace, which he adorned with figures of animals, "contrary," as Josephus says (*Vit.* §§ 12, 13, 64), "to the law of our countrymen." The place was so much the less attractive to the Jews, because, as the same authority states (*Ant.* xviii. 2, § 3), it stood on the site of an ancient burial-ground, and was viewed, therefore, by the more scrupulous among them almost as a polluted and forbidden locality. Coins of the city of Tiberias are still extant, which are referred to the times of Tiberius, Trajan, and Hadrian.

The ancient name has survived in that of the modern *Tübarieh*, which occupies unquestionably the original site, except that it is confined to nar

Town and Lake of Tiberias from the Southwest.

rower limits than those of the original city. Near *Tübarieh*, about a mile further south along the shore are the celebrated warm baths, which the Roman naturalists (Plin. *Hist. Nat.* v. 15) reckoned among the greatest known curiosities of the world. [HAMMATH.] The intermediate space between these baths and the town abounds with the traces of ruins, such as the foundations of walls, heaps of stone, blocks of granite, and the like; and it cannot be doubted, therefore, that the ancient Tiberias occupied also this ground, and was much more extensive than its modern successor. From such indications, and from the explicit testimony of Josephus, who says (*Ant.* xviii. 2, § 3) that Tiberias was near Ammaus (Ἀμμαούς), or the Warm Baths, there can be no uncertainty respecting the identification of the site of this important city. It stood anciently as now, on the western shore, about two thirds of the way between the northern and southern end of the Sea of Galilee. There is a margin or strip of land there between the water and the steep hills (which elsewhere in that quarter come down so boldly to the edge of the lake), about two miles long and a quarter of a mile broad. The tract in question is somewhat undulating, but approximates to the character of a plain. *Tübarieh*, the modern town, occupies the northern end of this parallelogram, and the Warm Baths the southern extremity; so that the more extended city of the Roman age must have covered all, or nearly all of the peculiar ground whose limits are thus clearly defined. (See Robinson's *Bibl. Res.* ii. 380; and Porter's *Handbook*, ii. 421.) The present *Tübarieh* has a rectangular form, is guarded by a strong wall on the land side, but is left entirely open towards the sea.[a] A few palm-trees still remain as witnesses of the luxuriant vegetation which once adorned this garden of the

[a] Mr. MacGregor, who was ten days in his boat on the lake of Galilee, reports an interesting discovery on the sea-side of the town of Tiberias. He observed a long wall of stones, just above the surface of the water, 300 or 400 yards in extent, three courses of them out of the water at one end, and only two of them at the other. It was evident that it had "all bodily sunk; the whole town of Tiberias had lowered towards the south." He ascribes this sinking to the great earthquake which took place in 1837 (see the art. above). See *Report of the Palestine Exploration Fund*, ch. iii. p. 101 f.

Digitized by Google

Promised Land, but they are greatly inferior in size and beauty to those seen in Egypt. The oleander grows here profusely, almost rivaling that flower so much admired as found on the neighboring plain of Gennesaret. The people, as of old, draw their subsistence in part from the adjacent lake. The spectator from his position here commands a view of almost the entire expanse of the sea, except the southern part, which is cut off by a slight projection of the coast. The precipices on the opposite side appear almost to overhang the water, but on being approached are found to stand back at some distance, so as to allow travellers to pass between them and the water. The lofty Hermon, the modern *Jebel esh-Sheikh*, with its glistening snow-heaps, forms a conspicuous object of the landscape in the northeast. Many rock-tombs exist in the sides of the hills, behind the town, some of them no doubt of great antiquity, and constructed in the best style of such monuments. The climate here in the warm season is very hot and unhealthy; but most of the tropical fruits, as in other parts of the valley of the Jordan, become ripe very early, and, with industry, might be cultivated in great abundance and perfection. The article on GENNESARET [vol. i. p. 895] should be read in this connection, since it is the relation of Tiberias to the surrounding region and the lake, which gave to it its chief importance in the first Christian age. The place is four and a half hours from Nazareth, one hour from Mejdel, probably the ancient Magdala, and thirteen hours, by the shortest route, from *Bânîds* or Cæsarea Philippi.

It is remarkable that the Gospels give us no information that the Saviour, who spent so much of his public life in Galilee, ever visited Tiberias. The surer meaning of the expression, "He went away beyond the sea of Galilee of Tiberias" in John vi. 1 (*πέραν τῆς θαλάσσης τῆς Γαλιλαίας τῆς Τιβεριάδος*), is not that Jesus embarked from Tiberias, but, as Meyer remarks, that He crossed from the west side of the *Galilean sea of Tiberias* to the opposite side. A reason has been assigned for this singular fact, which may or may not account for it. As Herod, the murderer of John the Baptist, resided most of the time in this city, the Saviour may have kept purposely away from it, on account of the sanguinary and artful (Luke xiii. 32) character of that ruler. It is certain, from Luke xxiii. 8, that though Herod had heard of the fame of Christ, he never saw Him in person until they met at Jerusalem, and never witnessed any of his miracles. It is possible that the character of the place, so much like that of a Roman colony, may have been a reason why He who was sent to the lost sheep of the house of Israel, performed so little labor in its vicinity. The head of the lake, and especially the plain of Gennesaret, where the population was more dense and so thoroughly Jewish, formed the central point of his Galilean ministry. The feast of Herod and his courtiers, before whom the daughter of Herodias danced, and in fulfillment of the tetrarch's rash oath demanded the head of the dauntless reformer, was held in all probability at Tiberias, the capital of the province. If, as Josephus mentions (*Ant.* xviii. 5, § 2), the Baptist was imprisoned at the time in the castle of Machærus beyond the Jordan, the order for his execution could have been sent thither, and the bloody trophy forwarded to the implacable Herodias at the palace where she usually resided. Adams (*Johannes der Taufer im Gefängniss*, p. 47, &c.) suggests that John, instead of being kept all the time in the same castle, may have been confined in different places, at different times. [MACHÆRUS, Amer. ed.] The three passages already referred to are the only ones in the New Testament which mention Tiberias by name, namely, John vi. 1, and xxi. 1 (in both instances designating the lake on which the town was situated), and John vi. 23, where boats are said to have come from Tiberias near to the place at which Jesus had supplied miraculously the wants of the multitude. Thus the lake in the time of Christ, among its other appellations, bore also that of the principal city in the neighborhood; and in like manner, at the present day, *Bahr Tibarieh*, "Sea of Tiberieh," is almost the only name under which it is known among the inhabitants of the country.

Tiberias has an interesting history, apart from its strictly Biblical associations. It bore a conspicuous part in the wars between the Jews and the Romans. The Sanhedrim, subsequently to the fall of Jerusalem, after a temporary sojourn at Jamnia and Sepphoris, became fixed there about the middle of the 2d century. Celebrated schools of Jewish learning flourished there through a succession of several centuries. The Mishna was compiled at this place by the great Rabbi Judah Hakkodesh (A. D. 190). The Masorah, or body of traditions, which transmitted the readings of the Hebrew text of the Old Testament, and preserved by means of the vowel system the pronunciation of the Hebrew, originated in a great measure at Tiberias. The place passed, under Constantine, into the power of the Christians; and during the period of the Crusades was lost and won repeatedly by the different combatants. Since that time it has been possessed successively by Persians, Arabs, and Turks; and contains now, under the Turkish rule, a mixed population of Mohammedans, Jews, and Christians, variously estimated at from two to four thousand. The Jews constitute, perhaps, one fourth of the entire number. They regard Tiberias as one of the four holy places (Jerusalem, Hebron, Safed, are the others), in which, as they say, prayer must be offered without ceasing, or the world would fall back instantly into chaos. One of their singular opinions is that the Messiah when He appears will emerge from the waters of the lake, and, landing at Tiberias, proceed to Safed, and there establish his throne on the highest summit in Galilee. In addition to the language of the particular country, as Poland, Germany, Spain, from which they or their families emigrated, most of the Jews here speak also the Rabbinic Hebrew, and modern Arabic.[a] They occupy a quarter in the middle of the town, adjacent to the lake; just north of which, near the shore, is a Latin convent and church, occupied by a solitary Italian monk. Tiberias suffered terribly from the great earthquake in 1837, and has not yet recovered by any means from the effects of that disaster. In 1852, the writer of this article (later travellers report but little improvement) rode into the city over the dilapidated walls; in other parts of them not overthrown, rents were visible from top to bottom, and some of the towers looked as if they had been shattered by battering-rams. It is sup-

[a] Probably in no place in the world is the Hebrew spoken as a vernacular language to such an extent as at Tiberias. (See Tobler, *Denkblätter aus Jerusalem*, p. 284.) H.

Digitized by Google

posed that at least seven hundred of the inhabitants were destroyed at that time. This earthquake was severe and destructive in other parts of Galilee. It was a similar calamity no doubt, such as had left a strong impression on the minds of the people, to which Amos refers, at the beginning of his prophecy, as forming a well-known epoch from which other events were reckoned. There is a place of interment near Tiberias, in which a distinguished Rabbi is said to be buried with 14,000 of his disciples around him. The grave of the Arabian philosopher Lokman, as Burckhardt states, was pointed out here in the 14th century. Raumer's *Palästina* (p. 125) mentions some of the foregoing facts, and others of a kindred nature. The later fortunes of the place are sketched somewhat at length in Dr. Robinson's *Biblical Researches*, iii. 267–274 (ed. 1841). It is unnecessary to specify other works, as Tiberias lies in the ordinary route of travellers in the East, and will be found noticed more or less fully in most of the books of any completeness in this department of authorship.

Professor Stanley, in his *Notices of some Localities*, etc. (p. 193), has added a few charming touches to the admirable description already given in his *Sin. and Pal.* (368–82). H. B. H.

**TIBE'RIAS, THE SEA OF** (ἡ θάλασσα τῆς Τιβεριάδος: *mare Tiberiadis*). This term is found only in John xxi. 1, the other passage in which it occurs in the A. V. (*ibid.* vi. 1) being, if the original is accurately rendered, "the sea of Galilee, of Tiberias." St. John probably uses the name as more familiar to non-residents in Palestine than the indigenous name of the "sea of Galilee," or "sea of Gennesaret," actuated no doubt by the same motive which has induced him so constantly to translate the Hebrew names and terms which he uses (such as Rabbi, Rabboni, Messias, Cephas, Siloam, etc.) into the language of the Gentiles. [GENNESARET, SEA OF.] G.

**TIBE'RIUS** (Τιβέριος: in full, Tiberius Claudius Nero), the second Roman emperor, successor of Augustus, who began to reign A. D. 14, and reigned until A. D. 37. He was the son of Tiberius Claudius Nero and Livia, and hence a stepson of Augustus. He was born at Rome on the 16th of November, B. C. 45. He became emperor in his fifty-fifth year, after having distinguished himself as a commander in various wars, and having evinced talents of a high order as an orator, and an administrator of civil affairs. His military exploits and those of Drusus, his brother, were sung by Horace (*Carm.* iv. 4, 14). He even gained the reputation of possessing the sterner virtues of the Roman character, and was regarded as entirely worthy of the imperial honors to which his birth and supposed personal merits at length opened the way. Yet on being raised to the supreme power, he suddenly became, or showed himself to be, a very different man. His subsequent life was one of inactivity, sloth, and self-indulgence. He was despotic in his government, cruel and vindictive in his disposition. He gave up the affairs of the state to the vilest favorites, while he himself wallowed in the very tennel of all that was low and debasing. The only palliation of his monstrous crimes and vices which can be offered is, that his disgust of life, occasioned by his early domestic troubles, may have driven him at last to despair and insanity. Tiberius died at the age of seventy-eight, after a reign of twenty-three years. The ancient writers who supply most of our knowledge respecting him are Suetonius Tacitus (who describes his character as one o studied dissimulation and hypocrisy from the beginning), *Annal.* i.–vi.; Vell. Paterc. l. ii. 94, &c.; and Dion Cass. xlvi.–xlviii. The article in the *Dict. of Gr. and Rom. Biog.* (vol. iii. pp. 1117–1127) furnishes a copious outline of the principal events in his life, and holds him up in his true light as deserving the scorn and abhorrence of men. For an extended sketch of the character and administration of Tiberius, the reader is referred to Merivale's *History of the Romans*, iv. 170 ff., and v. 1 ff. (N. Y., 1865). It is claimed for Tiberius that the Jews in Palestine suffered much less during his reign from the violence and rapacity of the Roman governors, than during the reign of other emperors. He changed the rulers there only twice, alleging that "the governor who anticipates but a short harvest, makes the most of his term, and extorts as much as he is able in the shortest possible period" (Milman's *Hist. of the Jews*, ii. 126).

Coin of Tiberius.

The city of TIBERIAS took its name from this emperor. It will be seen that the Saviour's public life, and some of the introductory events of the apostolic age, must have fallen within the limits of his administration. The memorable passage in Tacitus (*Annal.* xv. 44) respecting the origin of the Christian sect, places the crucifixion of the Redeemer under Tiberius: "Ergo abolendo rumori (that of his having set fire to Rome) Nero subdidit reos, et quæsitissimis pœnis affecit, quos per flagitia invisos vulgus Christianos appellabat. Auctor nominis ejus Christus Tiberio imperitante per procuratorem Pontium Pilatum supplicio affectus erat." The martyrdom of Stephen belongs in all probability to the last year, or last but one of this reign. In Luke iii. 1, he is termed Tiberius Cæsar; John the Baptist, it is there said, began his ministry in the *fifteenth year* of his reign (ἡγεμονία). This chronological notation is an important one in determining the year of Christ's birth and entrance on his public work [JESUS CHRIST, vol. ii. p. 1383]. Augustus admitted Tiberius to a share in the empire two or three years before his own death; and it is a question, therefore, whether the *fifteenth year* of which Luke speaks, should be reckoned from the time of the copartnership, or from that when Tiberius began to reign alone. The former is the computation more generally adopted; but the data which relate to this point in the chronology of the Saviour's life, may be reconciled easily with the one view or the other. Some discussion, more or less extended, in reference to this inquiry will be found in Krafft's *Chronologie*, p. 66; Sepp's *Leben Christi*, i. 1, &c.; Friedlieb's *Leben Jesu Christi*, p. 47, &c.; Ebrard's *Kritik*, p. 184; Tischendorf's *Synopsis*, xvi.; Greswell's *Dissertations*, i. 334; Robinson's *Harmony of the Gospels*, p. 181; Ellicott's *Life of Christ*, p. 106, note, Amer. ed.; Andrews's *Life of our Lord*, p. 24 ff.; and Wieseler's *Beiträge zur richtigen Würdigung der Evangelien* (1869), p. 177 ff. H. B. H.

**TIBHATH** (טִבְחַת [*extensive, level*, Fürst]: Ματαβέθ; Vat. FA Μεταβηχας, Alex. Ματαβεθ: *Thebath*), a city of Hadadezer, king of Zobah (1 Chr. xviii. 8), which in 2 Sam. viii. 8 is called Betah, probably by an accidental transposi-

Digitized by Google

tion of the first two letters. Its exact position is unknown, but if Aram-Zobah is the country between the Euphrates and Coelesyria [see SYRIA], we must look for Tibhath on the eastern skirts of the Anti-Libanus, or of its continuation, the *Jebel Shahshabu* and the *Jebel Rieha*. G. R.

**TIBNI** (תִּבְנִי [*intelligent*, Fürst]: Θαμνί [Vat. -νει] : *Thebni*). After Zimri had burnt himself in his palace, there was a division in the northern kingdom, half of the people following Tibni the son of Ginath, and half following Omri (1 K. xvi. 21, 22). Omri was the choice of the army. Tibni was probably put forward by the people of Tirzah, which was then besieged by Omri and his host. The struggle between the contending factions lasted four years (comp. 1 K. xvi. 15, 23); but the only record of it is given in the few words of the historian: "The people that followed Omri prevailed against the people that followed Tibni the son of Ginath; so Tibni died, and Omri reigned." The LXX. add that Tibni was bravely seconded by his brother Joram, for they tell us, in a clause which Ewald pronounces to be undoubtedly genuine, "and Thamni and Joram his brother died at that time; and Ambri reigned after Thamni." W. A. W.

**TI'DAL** (תִּדְעָל [*splendor, renown*, Fürst]: Θαργάλ: [Alex. Θαλγα, Θαλγαλ:] *Thadal*) is mentioned only in Gen. xiv. 1, 9. He there appears among the kings confederated with, and subordinate to, Chedorlaomer, the sovereign of Elam, who leads two expeditions from the country about the mouth of the Tigris into Syria. The name, Tidal, is certainly an incorrect representation of the original. If the present Hebrew text is accepted, the king was called *Thid'al;* while, if the Septuagint more nearly represents the original,[a] his name was *Thargal*, or perhaps *Thurgal*. This last rendering is probably to be preferred, as the name is then a significant one in the early Hamitic dialect of the lower Tigris and Euphrates country — *Thurgal* being "the great chief" — βασιλεὺς ὁ μέγας (*naqa wazarka*) of the Persians. Thargal is called "king of nations" (מֶלֶךְ גּוֹיִם), by which it is reasonable to understand that he was a chief over various nomadic tribes to whom no special tract of country could be assigned, since at different times of the year they inhabited different portions of Lower Mesopotamia. This is the case with the Arabs of these parts at the present day. Thargal, however, should from his name have been a Turanian. G. R.

**TIG'LATH-PILE'SER** (תִּגְלַת־פִּלְאֶסֶר [see below]: Θαλγαθφελλασάρ; [Vat. also Αλγαθφελλασαρ, Θαλγαλφελλασαρ; Alex. Αγλαθ Φαλλασαρ:] *Theglath-Phalnasar*). In 1 Chr. v. 26, and again in 2 Chr. xxviii. 20, the name of this king is written תִּלְגַת־פִּלְנֶסֶר, "Tilgath-pilneser;" but in this form there is a double corruption. The native word reads as *Tiglati-pal-isira*, for which the Tiglath-pil-eser of 2 Kings is a fair equivalent. The signification of the name is somewhat doubtful. M. Oppert renders it, "Adoratrix [sit] filio Zodiaci," and explains "the son of the Zodiac" as *Nin*, or Hercules (*Expédition Scientifique en Mésopotamie*, ii. 352).

Tiglath-Pileser is the second Assyrian king mentioned in Scripture as having come into contact with the Israelites. He attacked Samaria in the reign of Pekah, on what ground we are not told, but probably because Pekah withheld his tribute, and, having entered his territories, "took Ijon, and Abel-beth-maachah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, and all the land of Naphtali, and carried them captive to Assyria" (2 K. xv. 29): thus "lightly afflicting the land of Zebulun and the land of Naphtali" (Is. ix. 1),[b] the most northern, and so the most exposed portion of the country. The date of this invasion cannot at present be fixed; but it was, apparently, many years afterwards that Tiglath-Pileser made a second expedition into these parts, which had more important results than his former one. It appears that, after the date of his first expedition, a close league was formed between Rezin, king of Syria, and Pekah, having for its special object the humiliation of Judæa, and intended to further generally the interests of the two allies. At first great successes were gained by Pekah and his confederate (2 K. xv. 37; 2 Chr. xxviii. 6–8); but, on their proceeding to attack Jerusalem itself, and to threaten Ahaz, who was then king, with deposition from his throne, which they were about to give to a pretender, "the son of Tabeal" (Is. vii. 6), the Jewish monarch applied to Assyria for assistance, and Tiglath-Pileser, consenting to aid him, again appeared at the head of an army in these regions. He first marched, naturally, against Damascus, which he took (2 K. xvi. 9), razing it (according to his own statement) to the ground, and killing Rezin, the Damascene monarch. After this, probably, he proceeded to chastise Pekah, whose country he entered on the northeast, where it bordered upon "Syria of Damascus." Here he overran the whole district to the east of Jordan, no longer "lightly afflicting" Samaria, but injuring her far "*more grievously*, by the way of the sea, in Galilee of the Gentiles" (Is. ix. 1), carrying into captivity "the Reubenites, the Gadites, and the half tribe of Manasseh" (1 Chr. v. 26), who had previously held this country, and placing them in Upper Mesopotamia from Harran to about Nisibis (*ibid.*) Thus the result of this expedition was the absorption of the kingdom of Damascus, and of an important portion of Samaria, into the Assyrian empire; and it further brought the kingdom of Judah into the condition of a mere tributary and vassal of the Assyrian monarch.

Before returning into his own land, Tiglath-Pileser had an interview with Ahaz at Damascus (2 K. xvi. 10). Here doubtless was settled the amount of tribute which Judæa was to pay annually; and it may be suspected that here too it was explained to Ahaz by his suzerain that a cer-

---

[a] The LXX. evidently read תִּרְעָל for תִּדְעָל, and therefore wrote Θαργάλ, representing the ע by a γ. The Alex. Codex, however, has ΘΑΛΓΑ, which originally was doubtless ΘΑΔΓΑ, agreeing so far with the present Hebrew text.

[b] "A more accurate translation of Is. ix. 1, and more in harmony with the context is: "He lightly esteemed the land of Zebulon and the land of Naphtali, but afterward will signally honor," etc. In this form it is especially appropriate as understood of the residence and public ministry of Christ in that despised region. Interpreters generally (see Michaelis, Vitringa, Hengstenberg, and Alexander on Is. viii 23) recognize this as the primary reference. F. G.

Digitized by Google

...ds deference to the Assyrian gods was due on the part of all tributaries, who were usually required to set up in their capital "the Laws of Asshur," or "altars to the Great Gods" [see vol. i. p. 190 *a*]. The "altar" which Ahaz "saw at Damascus," and of which he sent the pattern to Urijah the priest (2 K. xvi. 10, 11), was probably such a badge of subjection.

This is all that Scripture tells us of Tiglath-Pileser. He appears to have succeeded Pul, and to have been succeeded by Shalmaneser; to have been contemporary with Rezin, Pekah, and Ahaz; and therefore to have ruled Assyria during the latter half of the eighth century before our era. From his own inscriptions we learn that his reign lasted *at least* seventeen years; that, besides warring in Syria and Samaria, he attacked Babylonia, Media, Armenia, and the independent tribes in the upper regions of Mesopotamia, thus, like the other great Assyrian monarchs, warring along the whole frontier of the empire; and finally, that he was (probably) not a legitimate prince, but an usurper and the founder of a dynasty. This last fact is gathered from the circumstance that, whereas the Assyrian kings generally glory in their ancestry, Tiglath-Pileser omits all mention of his, not even recording his father's name upon his monuments. It accords remarkably with the statements of Berosus (in Euseb. *Chron. Can.* i. 4) and Herodotus (i. 95), that about this time, *i. e.* in the latter half of the eighth century B. C., there was a change of dynasty in Assyria, the old family, which had ruled for 520 (526) years, being superseded by another not long before the accession of Sennacherib. The authority of these two writers, combined with the monumental indications, justifies us in concluding that the founder of the Lower Dynasty or Empire, the first monarch of the New Kingdom, was the Tiglath-Pileser of Scripture, whose date must certainly be *about* this time, and whose monuments show him to have been a self-raised sovereign. The exact date of the change cannot be positively fixed; but it is *probably* marked by the era of Nabonassar in Babylon, which synchronizes with B. C. 747. According to this view, Tiglath-Pileser reigned certainly from B. C. 747 to B. C. 730, and possibly a few years longer, being succeeded by Shalmaneser at least as early as B. C. 725.[a] [SHALMANESER.]

The circumstances under which Tiglath-Pileser obtained the crown have not come down to us from any good authority; but there is a tradition on the subject which seems to deserve mention. Alexander Polyhistor, the friend of Sylla, who had access to the writings of Berosus, related that the first Assyrian dynasty continued from Ninus, its founder, to a certain Beleûs (Pul), and that he was succeeded by Belêtaras, a man of low rank, a mere vine-dresser (*φυτουργός*), who had the charge of the gardens attached to the royal palace. Belêtaras, he said, having acquired the sovereignty in an extraordinary way, fixed it in his own family, in which it continued to the time of the destruction of Nineveh (*Fr. Hist. Gr.* iii. 210). It can scarcely be doubted that Belêtaras here is intended to represent Tiglath-Pileser, Belêtar being in fact another mode of expressing the native *Pal-tsira* or *Pelli-tsir* 'Oppert), which the Hebrews represented by Pileser. Whether there is any truth in the tradition may perhaps be doubted. It bears too near a resemblance to the oriental stories of Cyrus, Gyges Amasis, and others, to have in itself much claim to our acceptance. On the other hand, it harmonises with the remarkable fact — unparalleled in the rest of the Assyrian records — that Tiglath-Pileser is absolutely silent on the subject of his ancestry, neither mentioning his father's name, nor making any allusion whatever to his birth, descent, or parentage.

Tiglath-Pileser's wars do not, generally, appear to have been of much importance. In Babylonia he took Sippara (Sepharvaim), and several places of less note in the northern portion of the country; but he does not seem to have penetrated far, or to have come into contact with Nabonassar, who reigned from B. C. 747 to B. C. 733 at Babylon. In Media, Armenia, and Upper Mesopotamia, he obtained certain successes, but made no permanent conquests. It was on his western frontier only that his victories advanced the limits of the empire. The destruction of Damascus, the absorption of Syria, and the extension of Assyrian influence over Judæa, are the chief events of Tiglath-Pileser's reign, which seems to have had fewer external triumphs than those of most Assyrian monarchs. Probably his usurpation was not endured quite patiently, and domestic troubles or dangers acted as a check upon his expeditions against foreign countries.

No palace or great building can be ascribed to this king. His slabs, which are tolerably numerous, show that he must have built or adorned a residence at Calah (*Nimrud*), where they were found; but, as they were not discovered *in situ*, we cannot say anything of the edifice to which they originally belonged. They bear marks of wanton defacement; and it is plain that the later kings purposely injured them; for not only is the writing often erased, but the slabs have been torn down, broken, and used as building materials by Esar-haddon in the great palace which he erected at Calah, the southern capital [see vol. i. p. 761 *a*]. The dynasty of Sargon was hostile to the first two princes of the Lower Kingdom, and the result of their hostility is that we have far less monumental knowledge of Shalmaneser and Tiglath-Pileser than of various kings of the Upper Empire. G. R.

TI'GRIS (Τίγρις [see below]: *Tygris, Tigris*) is used by the LXX. as the Greek equivalent of the Hebrew *Hiddekel* (חִדֶּקֶל); and occurs also in several of the apocryphal books, as in Tobit (vi. 1), Judith (i. 6), and Ecclesiasticus (xxiv. 25). The meaning, and various forms, of the word have been considered under HIDDEKEL. It only remains, therefore, in the present article, to describe the course and character of the stream.

The Tigris, like the Euphrates, rises from two principal sources. The most distant, and therefore the true, source is the western one, which is in lat. 38° 10′, long. 39° 20′ nearly, a little to the south of the high mountain lake called *Göljik* or *Gölenjik*, in the peninsula formed by the Euphrates where it sweeps round between *Palou* and *Telek*. The Tigris' source is near the southwestern angle of the lake, and cannot be more than two or three miles from the channel of the Euphrates. The course of

[a] In the Assyrian Chronological Canon, of which there are four copies in the British Museum, of more or less fragmentary, the reign of Tiglath-Pileser seems to be reckoned at either 16 or 17 years. (See *Athenæum*, No. 1812, p. 84.)

Digitized by Google

the Tigris is at first somewhat north of east, but after pursuing this direction for about 25 miles it makes a sweep round to the south, and descends by *Arghani Maden* upon Diarbekr. Here it is already a river of considerable size, and is crossed by a bridge of ten arches a little below that city (Niebuhr, *Voyage en Arabie*, p. 326). It then turns suddenly to the east, and flows in this direction, past *Osman Kiesi* to *Til*, where it once more alters its course and takes that southeasterly direction, which it pursues, with certain slight variations, to its final junction with the Euphrates. At *Osman Kiesi* it receives the second or Eastern Tigris, which descends from Niphates (the modern *Ala-Tagh*) with a course almost due south, and, collecting on its way the waters of a large number of streams, unites with the Tigris half-way between *Diarbekr* and *Til*, in long. 41° nearly. The courses of the two streams to the point of junction are respectively 150 and 100 miles. A little below the junction, and before any other tributary of importance is received, the Tigris is 150 yards wide and from three to four feet deep. Near *Til* a large stream flows into it from the northeast, bringing almost as much water as the main channel ordinarily holds (Layard, *Nineveh and Babylon*, p. 49). This branch rises near *Billi*, in northern Kurdistan, and runs at first to the northeast, but presently sweeps round to the north, and proceeds through the districts of *Shattak* and *Boktan* with a general westerly course, crossing and recrossing the line of the 38th parallel, nearly to *Sert*, whence it flows southwest and south to *Til*. From *Til* the Tigris runs southward for 20 miles through a long, narrow, and deep gorge, at the end of which it emerges upon the comparatively low but still hilly country of Mesopotamia, near *Jezireh*. Through this it flows with a course which is south-southeast to *Mosul*, thence nearly south to *Kileh-Sherghat*, and again south-southeast to *Samara*, where the hills end and the river enters on the great alluvium. The course is now more irregular. Between *Samara* and Baghdad a considerable bend is made to the east; and, after the *Shat-el-Hie* is thrown off in lat. 32° 30′, a second bend is made to the north, the regular southeasterly course being only resumed a little above the 32d parallel, from which point the Tigris runs in a tolerably direct line to its junction with the Euphrates at *Kurnah*. The length of the whole stream, exclusive of meanders, is reckoned at 1146 miles. It can be descended on rafts during the flood season from *Diarbekr*, which is only 150 miles from its source; and it has been navigated by steamers of small draught nearly up to Mosul. From Diarbekr to Samara the navigation is much impeded by rapids, rocks, and shallows, as well as by artificial *bunds* or dams, which in ancient times were thrown across the stream, probably for purposes of irrigation. Below *Samara* there are no obstructions; the river is deep, with a bottom of soft mud; the stream moderate; and the course very meandering. The average width of the Tigris in this part of its course is 200 yards, while its depth is very considerable.

Besides the three head-streams of the Tigris, which have been already described, the river receives, along its middle and lower course, no fewer than five important tributaries. These are the river of *Zakko* or Eastern Khabour, the Great Zab (*Zab Ala*), the Lesser Zab (*Zab Asfal*), the Adhem, and the Diyaleh or ancient Gyndes. All these rivers flow from the high range of Zagros, which shuts in the Mesopotamian valley on the east, and is able to sustain so large a number of great streams from its inexhaustible springs and abundant snows. From the west the Tigris obtains no tributary of the slightest importance, for the *Tharthar*, which is said to have once reached it, now ends in a salt lake, a little below *Tekrit*. Its volume, however, is continually increasing as it descends, in consequence of the great bulk of water brought into it from the east, particularly by the Great Zab and the Diyaleh; and in its lower course it is said to be a larger stream and to carry a greater body than the Euphrates (Chesney, *Euphrates Expedition*, i. 62).

The Tigris, like the Euphrates, has a flood season. Early in the month of March, in consequence of the melting of the snows on the southern flank of Niphates, the river rises rapidly. Its breadth gradually increases at Diarbekr from 100 or 120 to 250 yards. The stream is swift and turbid. The rise continues through March and April, reaching its full height generally in the first or second week of May. At this time the country about Baghdad is often extensively flooded, not, however, so much from the Tigris as from the overflow of the Euphrates, which is here poured into the eastern stream through a canal. Further down the river, in the territory of the *Beni-Lam* Arabs, between the 32d and 31st parallels, there is a great annual inundation on both banks. About the middle of May the Tigris begins to fall, and by midsummer it has reached its natural level. In October and November there is another rise and fall in consequence of the autumnal rains; but compared with the spring flood that of autumn is insignificant.

The Tigris is at present better fitted for purposes of traffic than the Euphrates (Layard, *Nineveh and Babylon*, p. 475); but in ancient times it does not seem to have been much used as a line of trade. The Assyrians probably floated down it the timber which they were in the habit of cutting in Amanus and Lebanon, to be used for building purposes in their capital; but the general line of communication between the Mediterranean and the Persian Gulf was by the Euphrates. [See vol. i. p. 784.] According to the historians of Alexander (Arrian, *Exp. Al.* vii. 7; comp. Strab. xv. 3, § 4), the Persians purposely obstructed the navigation of the lower Tigris by a series of dams which they threw across from bank to bank between the embouchure and the city of Opis, and such trade as there was along its course proceeded by land (Strab. *ibid.*). It is probable that the dams were in reality made for another purpose, namely, to raise the level of the waters for the sake of irrigation; but they would undoubtedly have also the effect ascribed to them, unless in the spring flood time, when they might have been shot by boats descending the river. Thus there may always have been a certain amount of traffic down the stream; but up it trade would scarcely have been practicable at any time further than Samara or Tekrit, on account of the natural obstructions, and of the great force of the stream. The lower part of the course was opened by Alexander (Arrian, vii. 7); and Opis, near the mouth of the Diyaleh, became thenceforth known as a mart (ἐμπόριον), from which the neighboring districts drew the merchandise of India and Arabia (Strab. xvi. 1, § 9). Seleucia, too, which grew up soon after Alexander, derived no doubt a portion of its prosperity from the facilities for trade offered by this great stream.

We find but little mention of the Tigris in Scripture. It appears indeed under the name of Hiddekel, among the rivers of Eden (Gen. ii. 14), and is there correctly described as "running eastward to Assyria." But after this we hear no more of it, if we except one doubtful allusion in Nahum (ii. 6), until the Captivity, when it becomes well known to the prophet Daniel, who had to cross it in his journeys to and from Susa (Shushan). With Daniel it is "the Great River" — הַנָּהָר הַגָּדוֹל — an expression commonly applied to the Euphrates; and by its side he sees some of his most important visions (Dan. x. 4; xii.). No other mention of the Tigris seems to occur except in the apocryphal books; and there it is unconnected with any real history.

The Tigris, in its upper course, anciently ran through Armenia and Assyria. Lower down, from about the point where it enters on the alluvial plain, it separated Babylonia from Susiana. In the wars between the Romans and the Parthians, we find it constituting, for a short time (from A. D. 114 to A. D. 117), the boundary line between these two empires. Otherwise it has scarcely been of any political importance. The great chain of Zagros is the main natural boundary between Western and Central Asia; and beyond this, the next defensible line is the Euphrates. Historically it is found that either the central power pushes itself westward to that river; or the power ruling the west advances eastward to the mountain barrier.

The water of the Tigris, in its lower course, is yellowish, and is regarded as unwholesome. The stream abounds with fish of many kinds, which are often of a large size (see Tobit vi. 2, and compare Strab. xi. 14, § 8). Abundant water-fowl float on the waters. The banks are fringed with palm-trees and pomegranates, or clothed with jungle and reeds, the haunt of the wild boar and the lion.

(The most important notices of the Tigris to be found in the classical writers are the following: Strabo, xi. 14, § 8, and xvi. 1, §§ 9–13; Arrian, *Exped. Alex.* vii. 7; and Plin. *H. N.* vi. 27. The best modern accounts are those of Col. Chesney, *Euphrates Expedition*, i. 16, etc., and Winer, *Realwörterbuch*, ii. 622, 623; with which may be compared Layard, *Nineveh and Babylon*, 49–51, and 464–476; Loftus, *Chaldæa and Susiana*, 3–8; Jones in *Transactions of the Geographical Society of Bombay*, vol. ix.; Lynch in *Journal of Geographical Society*, vol. ix.; and Rawlinson's *Herodotus*, i. 552, 553.) G. R.

**TIK'VAH** (תִּקְוָה [*cord, expectation*]: Θεκκουέ; [Vat. Θεκκουαν; Alex. Θεκκουε: *Thecua*). 1. The father of Shallum the husband of the prophetess Huldah (2 K. xxii. 14). He is called TIKVATH in the A. V. of 2 Chr. xxxiv. 22.

2. (Θεκωέ; [Vat. FA. Ελκεια;] Alex. Θεκουε: *Thecue*.) The father of Jahaziah (Ezr. x. 15). In 1 Esdr. ix. 14 he is called THECOANUS.

**TIK'VATH** (תִּקְוַת [*obedience*]; Keri, תִּקְוָתַי; properly *Tôkhath* or *Tokhath*: Θεκωέ; Vat. καβουλ:] Alex. Θακουαθ: *Thecuath*). TIKVAH the father of Shallum (2 Chr. xxxiv. 22).

**TILE.** For general information on the subject, see the articles BRICK, POTTERY, SEAL. The expression in the A. V. rendering of Luke v. 19 "through [a] the tiling," has given much trouble to expositors, from the fact that Syrian houses are in general covered, not with tiles, but with plaster terraces. Some suggestions toward the solution of this difficulty have been already given. [HOUSE, vol. ii. p. 1104.] An additional one may here be offered. 1. Terrace-roofs, if constructed improperly, or at the wrong season of the year, are apt to crack and to become so saturated with rain as to be easily penetrable. May not the roof of the house in which our Lord performed his miracle, have been in this condition, and been pierced, or, to use St. Mark's [b] word, "broken up," by the bearers of the paralytic? (Arundell, *Trav. in Asia Minor*, i. 171; Russell, *Aleppo*, i. 35.)

2. Or may the phrase "through the tiling" be accounted for thus? Greek houses were often, if not always, roofed with tiles (Pollux, vii. 161; Vitruvius, iii. 3). Did not St. Luke, a native, probably, of Greek Antioch, use the expression "tiles," as the form of roof which was most familiar to himself and to his Greek readers without reference to the particular material of the roof in question? (Euseb. *H. E.* iii. 4; Jerome, *Prol. to Comm. on St. Matth.* vol. vii. 4; Conybeare and Howson, *St. Paul*, i. 367.) It may perhaps be worth remarking that houses in modern Antioch, at least many of them, have tiled roofs (Fisher, *Views in Syria*, i. 19, vi. 56). [See HOUSE, note *b*, i. 1104, Amer. ed.] H. W. P.

**TIL'GATH-PILNE'SER** (תִּלְגַת פִּלְנֶסֶר; תִּלְגַת פִּ'; פִּלְנֶאסֶר: [Rom. Θαγλαφαλλασάρ, Θαλγαφελλασάρ; Vat.] Θαλγαβαναζαρ, Θαγναφαμασαρ, Θαλγαφελλαβαρ; Alex. Θαγλαθ φαλναζαρ: *Thelgathphalnasar*). A variation, and probably a corruption, of the name TIGLATH-PILESER. It is peculiar to the books of Chronicles, being found in 1 Chr. v. 6, 26; 2 Chr. xxviii. 20. G.

* **TILLAGE.** [AGRICULTURE.]

**TI'LON** (תִּלוֹן; Keri, תִּילוֹן [perh. *gift*]: Ἰλών; Alex. Θιλων: *Thilon*). One of the four sons of Shimon, whose family is reckoned in the genealogies of Judah (1 Chr. iv. 20).

**TIMÆ'US** (Τιμαῖος: *Timæus*). The father of the blind man, Bar-timæus, who was restored to sight by Jesus as he left Jericho (Mark x. 46).[c]

**TIMBREL, TABRET.** By these words the A. V. translates the Heb. תֹּף, *tôph*, which is derived from an imitative root occurring in many languages not immediately connected with each other. It is the same as the Arabic and Persian دُفّ, *duff*, which in Spanish becomes *adufe*, a tambourine. The root, which signifies to beat or strike, is found in the Greek τύπανον or τύμπανον, Lat. *tympanum*, It. *tamburo*, Sp. *tambor*, Fr. *tambour*, Prov. *tabor*, Eng. *tabor*, *tabouret*, *timbrel*, *tambourine*, A.-S. *dubbrn*, to strike, Eng. *tap*, and many others.[d] In Old English *tabor* was used for

---

[a] Διὰ τῶν κεράμων.

[b] Ἐξορύξαντες (Mark ii. 4).

[c] The *bar* is Aramean, = *son*, and Mark's υἱὸς Τι-μαῖον is the Greek translation. On the circumstances of the miracle, see BARTIMÆUS [Amer. ed.]. H.

[d] It is usual for etymologists to quote the Arab

any drum. Thus Rob. of Gloucester, p. 396 (ed. Hearne, 1810): —

"Vor of trompes and of *tabors* the Sarasens made there
So gret noise, that Cristenmen al distourbed were."

In Shakespeare's time it seems to have become an instrument of peace, and is thus contrasted with the drum: "I have known when there was no music with him but the drum and fife; and now had he rather hear the *tabor* and the pipe" (*Much Ado*, ii. 3). *Tabouret* and *tabourine* are diminutives of *tabor*, and denote the instrument now known as the *tambourine*: —

"Or Mimos's whistling to his *tabouret*,
Selling a laughter for a cold meal's meat."
HALL, *Sat.* iv. 1, 78.

*Tabret* is a contraction of *tabouret*. The word is retained in the A. V. from Coverdale's translation in all passages except Is. xxx. 32, where it is omitted in Coverdale, and Ex. xxviii. 13, where it is rendered "beauty."

The Heb. *tôph* is undoubtedly the instrument described by travellers as the *duff* or *diff* of the Arabs. It was used in very early times by the Syrians of Padan-aram at their merry-makings (Gen. xxxi. 27). It was played principally by women (Ex. xv. 20; Judg. xi. 34; 1 Sam. xviii. 6; Ps. lxviii. 25 [26]) as an accompaniment to the song and dance (comp. Jud. iii. 7), and appears to have been worn by them as an ornament (Jer. xxxi. 4). The *tôph* was one of the instruments played by the young prophets whom Saul met on his return from Samuel (1 Sam. x. 5), and by the Levites in the Temple-band (2 Sam. vi. 5; 1 Chr. xiii. 8). It accompanied the merriment of feasts (Is. v. 12, xxiv. 8), and the joy of triumphal processions (Judg. xi. 34; 1 Sam. xviii. 6), when the women came out to meet the warriors returning from victory, and is everywhere a sign of happiness and peace (Job xxi. 12; Is. xxx. 32; Jer. xxxi. 4). So in the grand triumphal entry of God into his Temple described in strong figures in Ps. lxviii., the procession is made up by the singers who marched in front, and the players on stringed instruments who brought up the rear, while round them all danced the young maidens with their timbrels (Ps. lxviii. 25 [26]).

The *diff* of the Arabs is described by Russell (*Aleppo*, p. 94, 1st ed.) as "a hoop (sometimes with pieces of brass fixed in it to make a jingling) over which a piece of parchment is distended. It is beat with the fingers, and is the true tympanum of the ancients, as appears from its figure in several reliefs, representing the orgies of Bacchus and rites of Cybele." The same instrument was used by the Egyptian dancing-women whom Hasselquist saw (*Trav.* p. 59, ed. 1766). In Barbary it is called *tar*, and "is made like a sieve, consisting (as Isidore[a] describes the tympanum) of a rim or thin hoop of wood with a skin of parchment stretched over the top of it. This serves for the *bass* in all their concerts, which they accordingly touch very artfully with their fingers, or with the knuckles or palms of their hands, as the time and measure require, or as force and softness are to be communicated to the several parts of the performance" Shaw, *Trav.* p. 202).

The tympanum was used in the feasts of Cybele (Her. iv. 76), and is said to have been the invention of Dionysus and Rhea (Eur. *Bacch.* 59). It

*Tar.* (Lane's *Modern Egyptians*, 366, 5th ed.)

was played by women, who beat it with the palms of their hands (Ovid, *Met.* iv. 29), and Juvenal (*Sat.* iii. 64) attributes to it a Syrian origin: —

"Jam pridem Syrus in Tiberim defluxit Orontes
Et linguam, et mores et cum tibicine chordas
Obliquas, nescion *gentilia tympana* secum
Vexit."

In the same way the *tabor* is said to have been introduced into Europe by the Crusaders, who adopted it from the Saracens, to whom it was peculiar (see Du Cange's note on De Joinville's *Hist. du Roy Saint Louis*, p. 61).

The author of *Shilte Haggibborim* (c. 2) gives the Greek κύμβαλον as the equivalent of *tôph*, and says it was a hollow basin of metal, beaten with a stick of brass or iron.

The passage of Ezekiel (xxviii. 13) is obscure, and appears to have been early corrupted. Instead of תֻּפֵּיךְ, "thy tabrets," the Vulg. and Targum read יָפְיֵךְ, "thy beauty," which is the rendering adopted in Coverdale's and Cranmer's Bibles. The LXX. seem to have read תּוֹלַכְתֵּךְ, as in ver. 16. If the ordinary text be adopted, there is no reason for taking *tôph*, as Jerome suggests, in the sense of the setting of a gem, "pala qua gemma continetur." W. A. W.

**TIMNA, TIMNAH** (תִּמְנָע [perh. *restrained* or *inaccessible*]: Θαμνά; [in 1 Chr. i. 39, Vat. corrupt:] *Thamna*). 1. A concubine of Eliphaz son of Esau, and mother of Amalek (Gen. xxxvi. 12; in 1 Chr. i. 36 named as a son of Eliphaz): it may be presumed that she was the same as Timna, sister of Lotan, and daughter of Seir the Horite ([Gen. xxxvi.] ver. 22, and 1 Chr. i. 39).

2. [In 1 Chr., Vat. Θαμαν; Alex. Θαμανα.] A duke, or phylarch, of Edom in the last list in Gen. xxxvi. 40–45 (1 Chr. i. 51–54), where the dukes are named "according to their families, after their places, by their names . . . . according to their habitations:" whence we may conclude, as in the case of TEMAN, that Timnah was also the name of a place or a district. E. S. P.

**TIMNAH** (תִּמְנָה [*lot, portion*]). A name which occurs, simple and compounded, and with slight variations of form, several times, in the topography of the Holy Land. The name is derived by the lexicographers (Gesenius, Simonis, Fürst) from

---

*tunbûr* as the original of *tambour* and *tabor*; but unfortunately the *tunbûr* is a guitar, and not a drum Russell's *Aleppo*, i. 252, 2d ed.). The parallel Arabic word is *tabl*, which denotes a kind of drum, and is the same with the Rabb. Heb. *tabbâ*, and Span. *atabal*, kettle-drum The instrument and the word may have come to us through the Saracens.

[a] *Orig.* iii. 21.

Digitized by Google

a root signifying to "portion out, or divide[a]:" but its frequent occurrence, and the analogy of the topographical names of other countries, would rather imply that it referred to some natural feature of the country.

1. (Αἰβα, Θαμνά; [In 2 Chr. Vat. omits;] Alex. τοτορ, Θαμνα; Joseph. Θαμνά: *Thamna, Thamnan.*) A place which formed one of the landmarks on the north boundary of the allotment of Judah (Josh. xv. 10). It was obviously near the western end of the boundary, being between Beth-shemesh and the "shoulder of Ekron." It is probably identical with the THIMNATHAH of Josh. xix. 43, one of the towns of Dan, also named in connection with Ekron, and that again with the Timnath, or more accurately Timnathah, of Samson, and the Thamnatha of the Maccabees. Its belonging at that time to Dan would explain its absence from the list of the towns of Judah (Josh. xv.), though mentioned in describing the course of the boundary. The modern representative of all these various forms of the same name is probably *Tibneh*, a village about two miles west *of Ain Shems* (Beth-shemesh), among the broken undulating country by which the central mountains of this part of Palestine descend to the maritime plain. It has been shown in several other cases [KEILAH, etc.] that this district contained towns which in the lists are enumerated as belonging to the plain. Timnah is probably another instance of the same thing, for in 2 Chr. xxviii. 18 a place of the same name is mentioned as among the cities of the *Shefelah*, which from its occurrence with Beth-shemesh, Gideroth, Gimzo, all more or less in the neighborhood of Ekron, is probably the same as that just described as in the hills. After the Danites had deserted their original allotment for the north, their towns would naturally fall into the hands of Judah, or of the Philistines, as the continual struggle between them might happen to fluctuate.

In the later history of the Jews Timnah must have been a conspicuous place. It was fortified by Bacchides as one of the most important military posts of Judæa (1 Macc. ix. 50), and it became the head of a district or toparchy, which was called after its name, and was reckoned the fourth in order of importance among the fourteen into which the whole country was divided at the time of Vespasian's invasion (Joseph. *B. J.* iii. 3, § 5; and see Pliny, v. 14).

*Tibneh* is now spoken of as "a deserted site" (Rob. ii. 16), and not a single western traveller appears to have visited it, or even to have seen it, though its position is indicated with tolerable certainty. [TIMNATH.]

2. (Θαμνάθ; Alex. Θαμνα: *Thamna.*) A town in the mountain district of Judah (Josh. xv. 57). It is named in the same group with Maon, Ziph, and Carmel, which are known to have been south of Hebron. It is, therefore, undoubtedly a distinct place from that just examined. G.

**TIM'NATH.** The form in which the translators of the A. V. inaccurately present two names which are certainly distinct, though it is possible that they refer to the same place.

1. TIMNAH (תִּמְנָה, *i. e.* Timnah [*lot, portion*]: Θαμνά: *Thamnatha*). The scene of the adventure of Judah with his daughter-in-law Tamar (Gen. xxxviii 12, 13, 14). There is nothing here to indicate its position. The expression "went up to Timnah" (ver. 12) indicates that it was on higher ground than the spot from which Judah started. But as we are ignorant where that was, the indication is of no service. It seems to have been the place where Judah's flocks were kept. There was a road to it (A. V. "way"). It may be identified either with the Timnah in the mountains of Judah, which was in the neighborhood of Carmel where Nabal kept his huge flocks of sheep; or with the Timnathah so familiar in the story of Samson's conflicts. In favor of the latter is the doubtful suggestion named under ENAM and TAPPUAH, that in the words translated "an open place" there is a reference to those two towns. In favor of the former is the possibility of the name in Gen. xxxviii. being not Timnah but Timnathah (as in the Vulgate), which is certainly the name of the Philistine place connected with Samson. More than this cannot be said.

The place is named in the specification of the allotment of the tribe of Dan, where the A. V. exhibits it accurately as THIMNATHAH, and its name doubtless survives in the modern *Tibneh* which is said to lie below *Zorcah*, about three miles to the S. W. of it, where the great Wady *es-Sürâr* issues upon the plain.

2. TIMNATHAH (תִּמְנָתָה: Θαμναθά; Joseph. Θαμνά: *Thamnatha*). The residence of Samson's wife (Judg. xiv. 1, 2, 5). It was then in the occupation of the Philistines. It contained vineyards, haunted however by such savage animals as indicate that the population was but sparse. It was on higher ground than Ashkelon (xiv. 19), but lower than Zorah, which we may presume was Samson's starting-point (xiii. 25). G.

**TIM'NATH-HE'RES** (תִּמְנַת חֶרֶס [*portion of the sun*, Gen.]: Θαμναθαρές; Alex. Θαμναθαρ ωος: *Thamnatsare*). The name under which the city and burial-place of Joshua, previously called TIMNATH-SERAH, is mentioned in Judg. ii. 9. The constituent consonants of the word are the same, but their order is reversed. The authorities differ considerably in their explanations. The Jews adopt Heres as the real name; interpret it to mean the sun; and see in it a reference to the act of making the sun stand still, which is to them the greatest exploit of Joshua's life. Others (as Fürst, i. 442), while accepting Heres as the original form, interpret that word as "clay," and as originating in the character of the soil. Others again, like Ewald (*Gesch.* ii. 347, 348), and Bertheau (*On Judges*), take Serah to be the original form, and Heres an ancient but unintentional error. G.

**TIM'NATH-SE'RAH** (תִּמְנַת סֶרַח [*portion of abundance*]: [Rom. Θαμνασαράχ; Vat.] Θαμαρχαρης, Θαμναθασαχαρα; Alex. Θαμναθ σαρα, Θαμνασαχαρ; Joseph. Θαμνά: *Thamnath Saraa, Thamnath Sare*). The name of the city which at his request was presented to Joshua after the partition of the country was completed (Josh. xix. 50); and in "the border" of which he was buried (xxiv. 30). It is specified as "in Mount Ephraim on the north side of Mount Gaash." In Judg. ii. 9, the name is altered to TIMNATH-HERES. The latter form is that adopted by the Jewish writers, who interpret Heres as meaning the sun, and account for the name by stating that the figure of the sun (*temunath ha cheres*) was carved upon the sepul

[a] The LXX., as above, derived it from *temaa*, the South.

Digitized by Google

shre, to indicate that it was the tomb of the man who had caused the sun to stand still (Rashi, *Comment.* on both passages). Accordingly, they identify the place with *Kefar cheres*, which is said by Rabbi Jacob (Carmoly, *Itinéraires*, etc., p. 186), hap-Parchi (Asher's *Benj.* p. 434), and other Jewish travellers down to Schwarz in our own day (p. 151), to be about 5 miles S. of Shechem (*Nâblus*). No place with that name appears on the maps, the closest approach to it being *Kefr-Haris*, which is more nearly double that distance S. S. W. of *Nâblus*. Wherever it be, the place is said by the Jews still to contain the tombs of Joshua, of Nun, and of Caleb (Schwarz, p. 151).

Another and more promising identification has, however, been suggested in our own day by Dr. Eli Smith (*Bibl. Sacra*, 1843). In his journey from *Jifna* to *Mejdel-Yaba*, about six miles from the former, he discovered the ruins of a considerable town on a gentle hill on the left (south) of the road. Opposite the town (apparently to the south) was a much higher hill, in the north side of which are several excavated sepulchres, which in size and in the richness and character of their decorations resemble the so-called "Tombs of the Kings" at Jerusalem. The whole bears the name of *Tibneh*, and although without further examination it can hardly be affirmed to be the Timnah of Joshua, yet the identification appears probable. [GAASH, Amer. ed.]

Timnath-Serah and the tomb of its illustrious owner were shown in the time of Jerome, who mentions them in the *Epitaphium Paulæ* (§ 13). Beyond its being south of Shechem, he gives no indication of its position, but he dismisses it with the following characteristic remark, a fitting tribute to the simple self-denial of the great soldier of Israel: "Satisque mirata est, quod distributor possessionum sibi montana et aspera delegisset." G.

**TIM'NITE, THE** (הַתִּמְנִי) [patr.]: τοῦ Θαμνί [Vat. -νει]; Alex. ὁ Θαμναθαιος: *Thamnathæus*), that is, the Timnathite (as in the Alex. LXX., and Vulg.). Samson's father-in-law (Judg. xv. 6).

**TI'MON** (Τίμων: *Timon*). One of the seven, commonly called "deacons" [DEACON], who were appointed to act as almoners on the occasion of complaints of partiality being raised by the Hellenistic Jews at Jerusalem (Acts vi. 1–6). Like his colleagues, Timon bears a Greek name, from which, taken together with the occasion of their appointment, it has been inferred with much probability that the seven were themselves Hellenists. The name of Timon stands fifth in the catalogue. Nothing further is known of him with certainty; but in the "Synopsis de Vita et Morte Prophetarum Apostolorum et Discipulorum Domini," ascribed to Dorotheus of Tyre (*Bibl. Patrum*, iii. 149), we are informed that he was one of the "seventy-two" disciples (the catalogue of whom is a mere congeries of New Testament names), and that he afterwards became bishop of Bostra (? "Bostra Arabum"), where he suffered martyrdom by fire.

W. B. J.

**TIMO'THEUS** (Τιμόθεος [*honoring God*]).

1. A "captain of the Ammonites" (1 Macc. v 6) who was defeated on several occasions by Judas Maccabæus, B. C. 164 (1 Macc. v. 6, 11, 34–44). He was probably a Greek adventurer (comp. Jos. *Ant.* xii. 8, § 1), who had gained the leadership of the tribe. Thus Josephus (*Ant.* xiii. 8, § 1, quoted by Grimm, on 1 Macc. v. 6) mentions one "Zeno surnamed Cotylas, who was despot of Rabbah" in the time of Johannes Hyrcanus.

2. In 2 Macc. a leader named Timotheus is mentioned as having taken part in the invasion of Nicanor (B. C. 166: 2 Macc. viii. 30, ix. 3). At a later time he made great preparations for a second attack on Judas, but was driven to a stronghold, Gazara, which was stormed by Judas, and there Timotheus was taken and slain (2 Macc. x 24–37). It has been supposed that the events recorded in this latter narrative are identical with those in 1 Macc. v. 6–8, an idea rendered more plausible by the similarity of the names Jazer and Gazara (in Lat. Gazer, Jazare, Gazara). But the name Timotheus was very common, and it is evident that Timotheus the Ammonite leader was not slain at Jazer (1 Macc. v. 34); and Jazer was on the east side of Jordan, while Gazara was almost certainly the same as Gezer. [JAAZER; GAZARA.] It may be urged further, in support of the substantial accuracy of 2 Macc., that the second campaign of Judas against Timotheus (1) (1 Macc. v. 27–44) is given in 2 Macc. xii. 2–24, after the account of the capture of Gazara and the death of Timotheus (2) there. Wernsdorf assumes that all the differences in the narratives are blunders in 2 Macc. (*De fide Libr. Macc.* § lxx.), and in this he is followed by Grimm (on 2 Macc. x. 24, 32). But, if any reliance is to be placed on 2 Macc., the differences of place and circumstances are rightly taken by Patritius to mark different events (*De Libr. Macc.* § xxxii. p. 259).

3. The Greek name of TIMOTHY (Acts xvi. 1, xvii. 14, &c.). He is called by this name in the A. V. in every case except 2 Cor. i. 1, Philem. 1, Heb. xiii. 23, and the epistles addressed to him.

B. F. W.

**TIM'OTHY** (Τιμόθεος [*honoring God*]: *Timotheus*). The disciple thus named was the son of one of those mixed marriages which, though condemned by stricter Jewish opinion, and placing their offspring on all but the lowest step in the Jewish scale of precedence,[a] were yet not uncommon in the later periods of Jewish history. The father's name is unknown: he was a Greek, *i. e.* a Gentile by descent (Acts xvi. 1, 3). If in any sense a proselyte, the fact that the issue of the marriage did not receive the sign of the covenant would render it probable that he belonged to the class of half-converts, the so-called Proselytes of the Gate, not those of Righteousness [comp. PROSELYTES]. The absence of any personal allusion to the father in the Acts or Epistles suggests the inference that he must have died or disappeared during his son's infancy. The care of the boy thus devolved upon his mother Eunice and her mother Lois (2 Tim. i. 5). Under their training his education was emphatically Jewish. "From a child" he learnt (probably in the LXX. version) to "know

[a] The children of these marriages were known as Mamzerim (bastards), and stood just above the Nethinim. This was, however, *cæteris paribus*. A bastard who was a wise student of the Law was, in theory, above an ignorant high-priest (Gem. Hieros. *Horajoth*, fol. 84, in Lightfoot, *Hor. Heb.* in Matt. xxiii. 14); and the education of Timotheus (2 Tim. iii. 15) may therefore have helped to overcome the prejudice which the Jews would naturally have against him on this ground.

Digitized by Google

the Holy Scriptures" daily. The language of the Acts leaves it uncertain whether Lystra or Derbe were the residence of the devout family. The latter has been inferred, but without much likelihood, from a possible construction of Acts xx. 4, the former from Acts xvi. 1, 2 (comp. Neander, *Pfl. und Leit.* i. 288; Alford and Huther, *in loc.*). In either case the absence of any indication of the existence of a synagogue makes this devout consistency more noticeable. We may think here, as at Philippi, of the few devout women going forth to their daily worship at some river-side oratory (Conybeare and Howson, i. 211). The reading παρὰ τίνων, in 2 Tim. iii. 14, adopted by Lachmann and Tischendorf, indicates that it was from them as well as from the Apostle that the young disciple received his first impression of Christian truth. It would be natural that a character thus fashioned should retain throughout something of a feminine piety. A constitution far from robust (1 Tim. v. 23), a morbid shrinking from opposition and responsibility (1 Tim. iv. 12–16, v. 20, 21, vi. 11–14; 2 Tim. ii. 1–7), a sensitiveness even to tears (2 Tim. i. 4), a tendency to an ascetic rigor which he had not strength to bear (1 Tim. v. 23), united, as it often is, with a temperament exposed to some risk from "youthful lusts"[a] (2 Tim. ii. 22) and the softer emotions (1 Tim. v. 2) — these we may well think of as characterizing the youth as they afterwards characterized the man.

The arrival of Paul and Barnabas in Lycaonia (Acts xiv. 6) brought the message of glad-tidings to Timotheus and his mother, and they received it with "unfeigned faith" (2 Tim. i. 5). If at Lystra, as seems probable from 2 Tim. iii. 11, he may have witnessed the half-completed sacrifice, the half finished martyrdom, of Acts xiv. 19. The preaching of the Apostle on his return from his short circuit prepared him for a life of suffering (Acts xiv. 22). From that time his life and education must have been under the direct superintendence of the body of elders (*ibid.* 23). During the interval of seven years between the Apostle's first and second journeys, the boy grew up to manhood. His zeal, probably his asceticism, became known both at Lystra and Iconium. The mention of the two churches as united in testifying to his character (Acts xvi. 2), leads us to believe that the early work was prophetic of the later, that he had been already employed in what was afterwards to be the great labor of his life, as "the messenger of the churches," and that it was his tried fitness for that office which determined St. Paul's choice. Those who had the deepest insight into character, and spoke with a prophetic utterance, pointed to him (1 Tim. i. 18, iv. 14), as others had pointed before to Paul and Barnabas (Acts xiii. 2), as specially fit for the missionary work in which the Apostle was engaged. Personal feeling led St. Paul to the same conclusion (Acts xvi. 3), and he was solemnly set apart (the whole assembly of the elders laying their hands on him, as did the Apostle himself) to do the work and possibly to bear the title of Evangelist (1 Tim. iv. 14; 2 Tim. i. 6, iv. 5).[b] A great obstacle, however, presented itself. Timotheus, though inheriting, as it were, from the nobler side (Wetstein, *in loc.*) and therefore reckoned as one of the seed of Abraham, had been allowed to grow up to the age of manhood without the sign of circumcision, and in this point he might seem to be disclaiming the Jewish blood that was in him, and choosing to take up his position as a heathen. Had that been his real position, it would have been utterly inconsistent with St. Paul's principle of action to urge on him the necessity of circumcision (1 Cor. vii. 18; Gal. ii. 3, v. 2). As it was his condition was that of a negligent, almost of an apostate Israelite; and, though circumcision was nothing, and uncircumcision was nothing, it was a serious question whether the scandal of such a position should be allowed to frustrate all his efforts as an Evangelist. The fact that no offense seems to have been felt hitherto is explained by the predominance of the Gentile element in the churches of Lycaonia (Acts xiv. 27). But his wider work would bring him into contact with the Jews, who had already shown themselves so ready to attack, and then the scandal would come out. They might tolerate a heathen, as such, in the synagogue or the church, but an uncircumcised Israelite would be to them a horror and a portent. With a special view to their feelings, making no sacrifice of principle, the Apostle, who had refused to permit the circumcision of Titus, "took and circumcised" Timotheus (Acts xvi. 3); and then, as conscious of no inconsistency, went on his way distributing the decrees of the council of Jerusalem, the great charter of the freedom of the Gentiles (*ibid.* 4). Henceforth Timotheus was one of his most constant companions. Not since he parted from Barnabas had he found one whose heart so answered to his own. If Barnabas had been as the brother and friend of early days, he had now found one whom he could claim as his own true son by a spiritual parentage (1 Cor. iv. 17; 1 Tim. i. 2; 2 Tim. i. 2). They and Silvanus, and probably Luke also, journeyed to Philippi (Acts xvi. 12), and there already the young Evangelist was conspicuous at once for his filial devotion and his zeal (Phil. ii. 22). His name does not appear in the account of St. Paul's work at Thessalonica, and it is possible that he remained some time at Philippi, and then acted as the messenger by whom the members of that church sent what they were able to give for the Apostle's wants (Phil. iv. 15). He appears, however, at Berœa, and remains there when Paul and Silas are obliged to leave (Acts xvii. 14), going on afterwards to join his master at Athens (1 Thess. iii. 2). From Athens he is sent back to Thessalonica (*ibid.*), as having special gifts for comforting and teaching. He returns from Thessalonica, not to Athens but to Corinth,[c] and his name appears united with St. Paul's in the opening words of both the letters written from that city to the Thessalonians (1 Thess. i. 1; 2 Thess. i. 1). Here also he was apparently active as an Evangelist (2 Cor. i. 19), and on him, probably, with some exceptions, devolved the duty of baptizing the new converts (1 Cor. i. 14). Of the next five years of his life we

have no record, and can infer nothing beyond a continuance of his active service as St. Paul's companion. When we next meet with him it is as being sent on in advance when the Apostle was contemplating the long journey which was to include Macedonia, Achaia, Jerusalem, and Rome (Acts xix. 22). He was sent to "bring" the churches "into remembrance of the ways" of the Apostle (1 Cor. iv. 17). We trace in the words of the "father" an anxious desire to guard the son from the perils which, to his eager but sensitive temperament, would be most trying (1 Cor. xvi. 10). His route would take him through the churches which he had been instrumental in founding, and this would give him scope for exercising the gifts which were afterwards to be displayed in a still more responsible office. It is probable, from the passages already referred to, that, after accomplishing the special work assigned to him, he returned by the same route, and met St. Paul according to a previous arrangement (1 Cor. xvi. 11), and was thus with him when the second epistle was written to the Church of Corinth (2 Cor. i. 1). He returns with the Apostle to that city, and joins in messages of greeting to the disciples whom he had known personally at Corinth, and who had since found their way to Rome (Rom. xvi. 21). He forms one of the company of friends who go with St. Paul to Philippi and then sail by themselves, waiting for his arrival by a different ship (Acts xx. 3–6). Whether he continued his journey to Jerusalem, and what became of him during St. Paul's two years' imprisonment, are points on which we must remain uncertain. The language of St. Paul's address to the elders of Ephesus (Acts xx. 17–35) renders it unlikely that he was then left there with authority. The absence of his name from Acts xxvii. in like manner leads to the conclusion that he did not share in the perilous voyage to Italy. He must have joined him, however, apparently soon after his arrival in Rome, and was with him when the epistles to the Philippians, to the Colossians, and to Philemon were written (Phil. i. 1, ii. 19; Col. i. 1; Philem. 1). All the indications of this period point to incessant missionary activity. As before, so now, he is to precede the personal coming of the Apostle, inspecting, advising, reporting (Phil. ii. 19–23), caring especially for the Macedonian churches as no one else could care. The special messages of greeting sent to him at a later date (2 Tim. iv. 21), show that at Rome also, as elsewhere, he had gained the warm affection of those among whom he ministered. Among those most eager to be thus remembered to him, we find, according to a fairly supported hypothesis, the names of a Roman noble [PUDENS], of a future bishop of Rome [LINUS], and of the daughter of a British king [CLAUDIA] (Williams, *Claudia and Pudens;* Conybeare and Howson, ii. 501; Alford, *Excursus in Greek Test* iii. 104). It is interesting to think of the young Evangelist as having been the instrument by which one who was surrounded by the fathomless impurity of the Roman world was called to a higher life, and the names which would otherwise have appeared only in the foul epigrams of Martial (i. 32, iv. 13, v. 48, xi. 53) raised to a perpetual honor in the salutations of an apostolic epistle.[a] To this period of his life (the exact time and place being uncertain) we may probably refer the imprisonment of Heb. xiii. 23, and the trial at which he "witnessed the good confession" not unworthy to be likened to that of the Great Confessor before Pilate (1 Tim. vi. 13).

Assuming the genuineness and the later date of the two epistles addressed to him [comp. the following article], we are able to put together a few notices as to his later life. It follows from 1 Tim. i. 3 that he and his master, after the release of the latter from his imprisonment, revisited the proconsular Asia, that the Apostle then continued his journey to Macedonia,[b] while the disciple remained, half-reluctantly, even weeping at the separation (2 Tim. i. 4), at Ephesus, to check, if possible, the outgrowth of heresy and licentiousness which had sprung up there. The time during which he was thus to exercise authority as the delegate of an Apostle — a vicar apostolic rather than a bishop — was of uncertain duration (1 Tim. iii. 14). The position in which he found himself might well make him anxious. He had to rule presbyters, most of whom were older than himself (1 Tim. iv. 12), to assign to each a stipend in proportion to his work (*ibid.* v. 17), to receive and decide on charges that might be brought against them (*ibid.* v. 1, 19, 20), to regulate the almsgiving and the sisterhoods of the Church (*ibid.* v. 3–10), to ordain presbyters and deacons (*ibid.* iii. 1–13). There was the risk of being entangled in the disputes, prejudices, covetousness, sensuality of a great city. There was the risk of injuring health and strength by an overstrained asceticism (*ibid.* iv. 4, v. 23). Leaders of rival sects were there — Hymenæus, Philetus, Alexander — to oppose and thwart him (1 Tim. i. 20; 2 Tim. ii. 17, iv. 14, 15). The name of his beloved teacher was no longer honored as it had been; the strong affection of former days had vanished, and "Paul the aged" had become unpopular, the object of suspicion and dislike (comp. Acts xx. 37 and 2 Tim. i. 15). Only in the narrowed circle of the faithful few, Aquila, Priscilla, Mark, and others, who were still with him, was he likely to find sympathy or support (2 Tim. iv. 19). We cannot wonder that the Apostle, knowing these trials, and, with his marvelous power of bearing another's burdens, making them his own, should be full of anxiety and fear for his disciple's steadfastness; that admonitions, appeals,

[a] The writer has to thank Prof. Lightfoot for calling his attention to an article ("They of Cæsar's Household") in *Journ. of Class. and Sacred Philology*, No. X., in which the hypothesis is questioned, on the ground that the Epigrams are later than the Epistles, and that they connect the name of Pudens with heathen customs and vices. On the other hand it may be urged that the bantering tone of the Epigrams forbids us to take them as evidences of character. Pudens tells Martial that he does not "like his poems." "Oh, that is because you read too many at a time" (iv. 29). He begs him to correct their blemishes. "You want an autograph copy then, do you?" (vii. 11). The slave Eu- or Eucolpos (the name is possibly a willful distortion of Eubulus) does what *might* be the fulfillment of a Christian vow (Acts xviii 18), and this is the occasion of the suggestion which seems most damnatory (v. 48). With this there mingles however, as in iv. 13, vi. 58, the language of a more real esteem than is common in Martial (comp some good remarks in Rev. W. B. Galloway, *A Clergyman's Holidays*, pp. 35–49).

[b] Dr. Wordsworth, in an interesting note on 2 Tim i. 15, supposes the parting to have been in consequence of St. Paul's second arrest, and sees in this the explanation of the tears of Timotheus

Digitized by Google

warnings, should follow each other in rapid and vehement succession (1 Tim. i. 18, iii. 15, iv. 14, v. 21, vi. 11). In the second epistle to him this deep personal feeling utters itself yet more fully. The friendship of fifteen years was drawing to a close, and all memories connected with it throng upon the mind of the old man, now ready to be offered, the blameless youth (2 Tim. iii. 15), the holy household (*ibid.* i. 5), the solemn ordination (*ibid.* i. 6), the tears at parting (*ibid.* i. 4). The last recorded words of the Apostle express the earnest hope, repeated yet more earnestly, that he might see him once again (*ibid.* iv. 9, 21). Timotheus is to come before winter, to bring with him the cloak for which in that winter there would be need (2 Tim. iv. 13). We may hazard the conjecture that he reached him in time, and that the last hours of the teacher were soothed by the presence of the disciple whom he loved so truly. Some writers have even seen in Heb. xiii. 23 an indication that he shared St. Paul's imprisonment and was released from it by the death of Nero (Conybeare and Howson, ii. 502; Neander, *Pfl. und Leit.* i. 552). Beyond this all is apocryphal and uncertain. He continues, according to the old traditions, to act as bishop of Ephesus (Euseb. *H. E.* iii. 14), and dies a martyr's death under Domitian or Nerva (Niceph. *H. E.* iii. 11). The great festival of Artemis (the καταγώγιον of that goddess) led him to protest against the license and frenzy which accompanied it. The mob were roused to fury, and put him to death with clubs (comp. Polycrates and Simeon Metaphr. in Henschen's *Acta Sanctorum*, Jan. 24). Some later critics — Schleiermacher, Mayerhoff — have seen in him the author of the whole or part of the Acts (Olshausen, *Commentar.* ii. 612).

A somewhat startling theory as to the intervening period of his life has found favor with Calmet (s. v. *Timothée*), Tillemont (ii. 147), and others. If he continued, according to the received tradition, to be bishop of Ephesus, then he, and no other, must have been the "angel" of that church to whom the message of Rev. ii. 1–7 was addressed. It may be urged, as in some degree confirming this view, that both the praise and the blame of that message are such as harmonize with the impressions as to the character of Timotheus derived from the Acts and the Epistles. The refusal to acknowledge the self-styled apostles, the abhorrence of the deeds of the Nicolaitans, the unwearied labor, all this belongs to "the man of God" of the Pastoral Epistles. And the fault is no less characteristic. The strong language of St. Paul's entreaty would lead us to expect that the temptation of such a man would be to fall away from the glow of his "first love," the zeal of his first faith. The promise of the Lord of the Churches is in substance the same as that implied in the language of the Apostle (2 Tim. ii. 4–6).

The conjecture, it should be added, has been passed over unnoticed by most of the recent commentators on the Apocalypse (comp. Alford and Wordsworth, *in loc.*). Trench (*Seven Churches of Asia*, p. 64), contrasts the "angel" of Rev. ii. with Timotheus as an "earlier angel" who, with the generation to which he belonged, had passed away when the Apocalypse was written. It must be remembered, however, that at the time of St. Paul's death, Timotheus was still "young," probably not more than thirty-five, that he might, therefore, well be living, even on the assumption of the later date of the Apocalypse, and that the traditions (*valeant quantum*) place his death after that date. Bengel admits this, but urges the objection that he was not the bishop of any single diocese, but the superintendent of many churches. This however may, in its turn, be traversed, by the answer that the death of St. Paul may have made a great difference in the work of one who had hitherto been employed in travelling as his representative. The special charge committed to him in the Pastoral Epistles might not unnaturally give fixity to a life which had previously been wandering.

An additional fact connected with the name of Timothy is that two of the treatises of the Pseudo-Dionysius the Areopagite are addressed to him (*De Hierarch. Cel.* i. 1; comp. Le Nourry, *Dissert.* c. ix., and Halloix, *Quæst.* iv. in Migne's edition).

E. H. P.

**TIMOTHY, EPISTLES TO.** *Authorship.* — The question whether these epistles were written by St. Paul was one to which, till within the last half-century, hardly any answer but an affirmative one was thought possible. They are reckoned among the Pauline Epistles in the Muratorian Canon and the Peshito version. Eusebius (*H. E.* iii. 25, places them among the ὁμολογούμενα of the N. T., and, while recording the doubts which affected the Second Epistle of St. Peter and the other ἀντιλεγόμενα, knows of none which affect these. They are cited as authoritative by Tertullian (*De Præscr.* c. 25; *ad Uxorem*, i. 7), Clement of Alexandria (*Strom.* ii. 11), Irenæus (*Adv. Hær.* iv. 16, § 3, ii. 14, § 8). Parallelisms, implying quotation, in some cases with close verbal agreement, are found in Clem. Rom. 1 *Cor.* c. 29 (comp. 1 Tim. ii. 8); Ignat. *ad Magn.* c. 8 (1 Tim. i. 4); Polycarp, c. 4 (comp. 1 Tim. vi. 7, 8); Theophilus of Antioch *ad Autol.* iii. 126 (comp. 1 Tim. ii. 1, 2). There were indeed some notable exceptions to this *consensus*. The three Pastoral Epistles were all rejected by Marcion (Tertull. *adv. Marc.* v. 21; Iren. i. 29), Basilides, and other Gnostic teachers (Hieron. *Præf. in Titum*). Tatian, while strongly maintaining the genuineness of the Epistle to Titus, denied that of the other two (Hieron. *ib.*). In these instances we are able to discern a dogmatic reason for the rejection. The sects which these leaders represented could not but feel that they were condemned by the teaching of the Pastoral Epistles. Origen mentions some who excluded 2 Tim. from the Canon for a very different reason. The names of Jannes and Jambres belonged to an apocryphal history, and from such a history St. Paul never would have quoted (Origen, *Comm. in Matt.* 117).

The Pastoral Epistles have, however, been subjected to a more elaborate scrutiny by the criticism of Germany. The first doubts were uttered by J. C. Schmidt. These were followed by the *Sendschreiben* of Schleiermacher, who, assuming the genuineness of 2 Tim. and Titus, undertook, on that hypothesis, to prove the spuriousness of 1 Tim. Bolder critics saw that the position thus taken was untenable, that the three epistles must stand or fall together. Eichhorn (*Einl.* iii.) and De Wette (*Einleit.*) denied the Pauline authorship of all three. There was still, however, an attempt to maintain their authority as embodying the substance of the Apostle's teaching, or of letters written by him, on the hypothesis that they had been sent forth after his death by some over-zealous disciple, who

Digitized by Google

wished, under the shadow of his name, to attack the prevailing errors of the time (Eichhorn, *ib.*). One writer (Schott, *Isagoge Hist. Crit.* p. 324) ventures on the hypothesis that Luke was the writer. Baur (*Die sogenannten Pastoral-Briefe*), here as elsewhere more daring than others, assigns them to no earlier period than the latter half of the second century, after the death of Polycarp in A. D. 167 (p. 138). On this hypothesis 2 Tim. was the earliest, 1 Tim. the latest of the three, each probably by a different writer (pp. 72–76). They grew out of the state of parties in the Church of Rome, and, like the Gospel of St. Luke and the Acts, were intended to mediate between the extreme Pauline and the extreme Petrine sections of the Church (p. 58). Starting from the data supplied by the Epistle to the Philippians, the writers, first of 2 Tim., then of Titus, and lastly of 1 Tim., aimed, by the insertion of personal incidents, messages, and the like, at giving to their compilations an air of verisimilitude (p. 70).

It will be seen from the above statement that the question of authorship is here more than usually important. There can be no solution as regards these epistles like that of an obviously dramatic and therefore legitimate personation of character, such as is possible in relation to the authorship of Ecclesiastes. If the Pastoral Epistles are not Pauline, the writer clearly meant them to pass as such, and the *animus decipiendi* would be there in its most flagrant form. They would have to take their place with the Pseudo-Clementine Homilies, or the Pseudo-Ignatian Epistles. Where we now see the traces, full of life and interest, of the character of "Paul the aged," firm, tender, zealous, loving, we should have to recognize only the tricks, sometimes skillful, sometimes clumsy, of some unknown and dishonest controversialist.

Consequences such as these ought not, it is true, to lead us to suppress or distort one iota of evidence. They may well make us cautious, in examining the evidence, not to admit conclusions that are wider than the premises, nor to take the premises themselves for granted. The task of examining is rendered in some measure easier by the fact that, in the judgment of most critics, hostile as well as friendly, the three Pastoral Epistles stand on the same ground. The intermediate hypotheses of Schleiermacher (*supra*) and Credner (*Einl. ins N. T.*), who looks on Titus as genuine, 2 Tim. as made up out of two genuine letters, and 1 Tim. as altogether spurious, may be dismissed as individual eccentricities, hardly requiring a separate notice. In dealing with objections which take a wider range, we are meeting those also which are confined to one or two out of the three epistles.

The chief elements of the alleged evidence of spuriousness may be arranged as follows: —

I. *Language.* — The style, it is urged, is different from that of the acknowledged Pauline Epistles. There is less logical continuity, a want of order and plan, subjects brought up, one after the other, abruptly (Schleiermacher). Not less than fifty words, most of them striking and characteristic, are found in these epistles which are not found in St. Paul's writings (see the list in Conybeare and Howson, App. I., and Huther's *Einleit.*). The formula of salutation (χάρις, ἔλεος, εἰρήνη), half-technical words and phrases, like εὐσέβεια and its cognates (1 Tim. 2, iii. 16, vi. 6, *et al.*), παραθήκη (1 Tim. i. 18, vi. 20; 2 Tim. i. 12, 14, ii 2), the frequently recurring πιστὸς ὁ λόγος (1 Tim. i. 15, iii. 1, iv. 9; 2 Tim. ii. 11), the use of ὑγιαίνουσα as the distinctive epithet of a true teaching, these and others like them appear here for the first time (Schleierm. and Baur). Some of these words, it is urged, φανεροῦν, ἐπιφάνεια, σωτήρ, φῶς ἀπρόσιτον, belong to the Gnostic terminology of the 2d century.

On the other side it may be said, (1) that there is no test so uncertain as that of language and style thus applied; how uncertain we may judge from the fact that Schleiermacher and Neander find no stumbling-blocks in 2 Tim. and Titus, while they detect an un-Pauline character in 1 Tim. A difference like that which marks the speech of men divided from each other by a century may be conclusive against the identity of authorship, but short of that there is hardly any conceivable divergency which may not coexist with it. The style of one man is stereotyped, formed early, and enduring long. The sentences move after an unvarying rhythm; the same words recur. That of another changes, more or less, from year to year. As his thoughts expand they call for a new vocabulary. The last works of such a writer, as those of Bacon and of Burke, may be florid, redundant, figurative, while the earlier were almost meagre in their simplicity. In proportion as the man is a solitary thinker, or a strong asserter of his own will, will he tend to the former state. In proportion to his power of receiving impressions from without, of sympathizing with others, will be his tendency to the latter. Apart from all knowledge of St. Paul's character, the alleged peculiarities are but of little weight in the adverse scale. With that knowledge we may see in them the natural result of the intercourse with men in many lands, of that readiness to become all things to all men, which could hardly fail to show itself in speech as well as in action. Each group of his epistles has, in like manner, its characteristic words and phrases. (2.) If this is true generally, it is so yet more emphatically when the circumstances of authorship are different. The language of a bishop's charge is not that of his letters to his private friends. The epistles which St. Paul wrote to the churches as societies, might well differ from those which he wrote, in the full freedom of open speech, to a familiar friend, to his own "true son." It is not strange that we should find in the latter a Luther-like vehemence of expression (*e. g.* κεκαυστηριασμένων, 1 Tim. iv. 2, διαπαρατριβαὶ διεφθαρμένων ἀνθρώπων τὸν νοῦν, 1 Tim. vi. 5, σεσωρευμένα ἁμαρτίαις, 2 Tim. iii. 6), mixed sometimes with words that imply that which few great men have been without, a keen sense of humor, and the capacity, at least, for satire (*e. g.* γραώδεις μύθους, 1 Tim. iv. 7; φλύαροι καὶ περίεργοι, 1 Tim. v. 13; τετύφωται, 1 Tim. vi. 4; γαστέρες ἀργαί, Tit. i. 12). (3.) Other letters, again, were dictated to an amanuensis. These have every appearance of having been written with his own hand, and this can hardly have been without its influence on their style, rendering it less diffuse, the transitions more abrupt, the treatment of each subject more concise. In this respect it may be compared with the other two autograph epistles, those to the Galatians and Philemon. A list of words given by Alford (iii. *Prolog.* c. vii.) shows a considerable resemblance between the former of the two and the Pastoral Epistles. (4.) It may be added, that to whatever extent a forger of spurious epistles would be likely to form his style after the pattern of the recognized ones, so that

Digitized by Google

men might not be able to distinguish the counterfeit from the true, to that extent the diversity which has been dwelt on is, within the limits that have been above stated, not against, but for the genuineness of these epistles. (5.) Lastly, there is the positive argument that there is a large common element, both of thoughts and words, shared by these epistles and the others. The grounds of faith, the law of life, the tendency to digress and go off at a word, the personal, individualizing affection, the free reference to his own sufferings for the truth, all these are in both, and by them we recognise the identity of the writer. The evidence can hardly be given within the limits of this article, but its weight will be felt by any careful student. The coincidences are precisely those, in most instances, which the forger of a document would have been unlikely to think of, and give but scanty support to the perverse ingenuity which sees in these resemblances a proof of compilation, and therefore of spuriousness.

II. It has been urged (chiefly by Eichhorn, *Einl.* p. 315) against the reception of the Pastoral Epistles that they cannot be fitted in to the records of St. Paul's life in the Acts. To this there is a threefold answer. (1.) The difficulty has been enormously exaggerated. If the dates assigned to them must, to some extent, be conjectural, there are at least two hypotheses in each case (*infra*) which rest on reasonably good grounds. (2.) If the difficulty were as great as it is said to be, the mere fact that we cannot fix the precise date of three letters in the life of one of whose ceaseless labors and journeyings we have, after all, but fragmentary records, ought not to be a stumbling-block. The hypothesis of a release from the imprisonment with which the history of the Acts ends removes all difficulties; and if this be rejected (Baur, p. 67), as itself not resting on sufficient evidence, there is, in any case, a wide gap of which we know nothing. It may at least claim to be a theory which explains phenomena. (3.) Here, as before, the reply is obvious, that a man composing counterfeit epistles would have been likely to make them square with the acknowledged records of the life.

III. The three epistles present, it is said, a more developed state of church organization and doctrine than that belonging to the lifetime of St. Paul. (1.) The rule that the bishop is to be "the husband of one wife" (1 Tim. iii. 2; Tit. i. 6) indicates the strong opposition to second marriages which characterized the 2d century (Baur, pp. 113–120). (2.) The "younger widows" of 1 Tim. v. 11 cannot possibly be literally widows. If they were, St. Paul, in advising them to marry, would be excluding them, according to the rule of 1 Tim. v. 9, from all chance of sharing in the church's bounty. It follows therefore that the word χῆραι is used, as it was in the 2d century, in a wider sense, as denoting a consecrated life (Baur, pp. 42–49). (3.) The rules affecting the relation of the bishops and elders indicate a hierarchic development characteristic of the Petrine element, which became dominant in the Church of Rome in the post-Apostolic period, but foreign altogether to the genuine epistles of St. Paul (Baur, pp. 80–89). (4.) The term αἱρετικός is used in its later sense, and a formal procedure against the heretic is recognized, which belongs to the 2d century rather than the 1st. (5.) The upward progress from the office of deacon to that of presbyter, implied in 1 Tim. iii. 13, belongs to a later period (Baur, *l. c.*).

It is not difficult to meet objections which contain so large an element of mere arbitrary assumption. (1.) Admitting Baur's interpretation of 1 Tim. iii. 2 to be the right one, the rule which makes monogamy a condition of the episcopal office is very far removed from the harsh, sweeping censures of all second marriages which we find in Athenagoras and Tertullian. (2.) There is not a shadow of proof that the "younger widows" were not literally such. The χῆραι of the Pastoral Epistles are, like those of Acts vi. 1, ix. 39, women dependent on the alms of the church, not necessarily deaconesses, or engaged in active labors. The rule fixing the age of sixty for admission is all but conclusive against Baur's hypothesis. (3.) The use of ἐπίσκοποι and πρεσβύτεροι in the Pastoral Epistles as equivalent (Tit. i. 5, 7), and the absence of any intermediate order between the bishops and deacons (1 Tim. iii. 1–8), are quite unlike what we find in the Ignatian Epistles and other writings of the 2d century. They are in entire agreement with the language of St. Paul (Acts xx. 17, 28; Phil. i. 1). Few features of these epistles are more striking than the absence of any high hierarchic system. (4.) The word αἱρετικός has its counterpart in the αἱρέσεις of 1 Cor. xi. 19. The sentence upon Hymenæus and Alexander (1 Tim. i. 20) has a precedent in that of 1 Cor. v. 5. (5.) The best interpreters do not see in 1 Tim. iii. 13 the transition from one office to another (comp. Ellicott, *in loc.*, and DEACON). If it is there, the assumption that such a change is foreign to the Apostolic age is entirely an arbitrary one.

IV. Still greater stress is laid on the indications of a later date in the descriptions of the false teachers noticed in the Pastoral Epistles. These point, it is said, unmistakably to Marcion and his followers. In the ἀντιθέσεις τῆς ψευδωνύμου γνώσεως (1 Tim. vi. 20) there is a direct reference to the treatise which he wrote under the title of Ἀντιθέσεις, setting forth the contradiction between the Old and New Testament (Baur, p. 26). The "genealogies" of 1 Tim. i. 4, Tit. iii. 9, in like manner, point to the Æons of the Valentinians and Ophites (*ibid.* p. 12). The "forbidding to marry, and commanding to abstain from meats," fits in to Marcion's system, not to that of the Judaising teachers of St. Paul's time (*ibid.* p. 24). The assertion that "the law is good" (1 Tim. i. 8) implies a denial, like that of Marcion, of its Divine authority. The doctrine that the "Resurrection was past already" (2 Tim. ii. 18) was thoroughly Gnostic in its character. In his eagerness to find tokens of a later date everywhere, Baur sees in the writer of these epistles not merely an opponent of Gnosticism, but one in part infected with their teaching, and appeals to the doxologies of 1 Tim. i. 17, vi. 15, and their Christology throughout, as having a Gnostic stamp on them (pp. 28–33).

Carefully elaborated as this part of Baur's attack has been, it is perhaps the weakest and most capricious of all. The false teachers of the Pastoral Epistles are predominantly Jewish, νομοδιδάσκαλοι (1 Tim. i. 7), belonging altogether to a different school from that of Marcion, giving heed to "Jewish fables" (Tit. i. 14) and "disputes connected with the Law" (Tit. iii. 9). Of all monstrosities of exegesis few are more willful and fantastic than that which finds in νομοδιδάσκαλοι Antinomian teachers and in μαχαὶ νομικαί Antinomian doctrine (Baur, p. 17). The natural suggestion that in Acts xx. 30, 31, St. Paul contemplates the rise and

Digitized by Google

progress of a like perverse teaching, that in Col. ii. 8–23 we have the same combination of Judaism and a self-styled γνῶσις (1 Tim. vi. 20) or φιλοσοφία (Col. ii. 8), leading to a like false asceticism, is set aside summarily by the rejection both of the speech and the epistle as spurious. Even the denial of the Resurrection, we may remark, belongs as naturally to the mingling of a Sadducean element with an eastern mysticism as to the teaching of Marcion. The self-contradictory hypothesis that the writer of 1 Tim. is at once the strongest opponent of the Gnostics, and that he adopts their language, need hardly be refuted. The whole line of argument, indeed, first misrepresents the language of St. Paul in these epistles and elsewhere, and then assumes the entire absence from the first century of even the germs of the teaching which characterized the second (comp. Neander, *Pfl. und Leit.* i. p. 401; Heydenreich, p. 64).

*Date.* — Assuming the two epistles to Timothy to have been written by St. Paul, to what period of his life are they to be referred? The question as it affects each epistle may be discussed separately.

*First Epistle to Timothy.* — The direct *data* in this instance are very few. (1.) i. 3, implies a journey of St. Paul from Ephesus to Macedonia, Timothy remaining behind. (2.) The age of Timothy is described as νεότης (iv. 12). (3.) The general resemblance between the two epistles indicates that they were written at or about the same time. Three hypotheses have been maintained as fulfilling these conditions.

(A.) The journey in question has been looked on as an unrecorded episode in the two years' work at Ephesus of Acts xix. 10.

(B.) It has been identified with the journey of Acts xx. 1, after the tumult at Ephesus.

On either of these suppositions the date of the epistle has been fixed at various periods after St. Paul's arrival at Ephesus, before the conclusion of his first imprisonment at Rome.

(C.) It has been placed in the interval between St. Paul's first and second imprisonments at Rome.

Of these conjectures, A and B have the merit of bringing the epistle within the limit of the authentic records of St. Paul's life, but they have scarcely any other. Against A, it may be urged that a journey to Macedonia would hardly have been passed over in silence either by St. Luke in the Acts, or by St. Paul himself in writing to the Corinthians. Against B, that Timothy, instead of remaining at Ephesus when the Apostle left, had gone on into Macedonia before him (Acts xix. 22). The hypothesis of a possible return is traversed by the fact that he is with St. Paul in Macedonia at the time when 2 Cor. was written and sent off. In favor of C as compared with A or B, is the internal evidence of the contents of the epistle. The errors against which Timothy is warned are present, dangerous, portentous. At the time of St. Paul's visit to Miletus in Acts xx., *i. e.*, according to those hypotheses, subsequent to the epistle, they are still only looming in the distance (ver. 30). All the circumstances referred to, moreover, imply the prolonged absence of the Apostle. Discipline had become lax, heresies rife, the economy of the church disordered. It was necessary to check the chief offenders by the sharp sentence of excommunication (1 Tim. i. 20). Other churches called for his counsel and directions, or a sharp necessity took him away, and he hastens on, leaving behind him, with full delegated authority, the disciple in whom he most confided. The language of the epistle also has a bearing on the date. According to the hypotheses A and B, it belongs to the same periods as 1 and 2 Cor. and the Ep. to the Romans, or, at the latest, to the same group as Philippians and Ephesians; and, in this case, the differences of style and language are somewhat difficult to explain. Assume a later date, and then there is room for the changes in thought and expression which, in a character like St. Paul's, were to be expected as the years went by. The only objections to the position thus assigned are — (1) the doubtfulness of the second imprisonment altogether, which has been discussed in another place [PAUL]; and (2), the "youth" of Timothy at the time when the letter was written (iv. 12). In regard to the latter, it is sufficient to say that, on the assumption of the later date, the disciple was probably not more than 34 or 35, and that this was young enough for one who was to exercise authority over a whole body of Bishop-presbyters, many of them older than himself (v. 1).

*Second Epistle to Timothy.* — The number of special names and incidents in the 2d epistle make the chronological data more numerous. It will be best to bring them, as far as possible, together, noticing briefly with what other facts each connects itself, and to what conclusion it leads. Here also there are the conflicting theories of an earlier and later date, (A) during the imprisonment of Acts xxviii. 30, and (B) during the second imprisonment already spoken of.

(1.) A parting apparently recent, under circumstances of special sorrow (i. 4). Not decisive. The scene at Miletus (Acts xx. 37) suggests itself, if we assume A. The parting referred to in 1 Tim. i. 3 might meet B.

(2.) A general desertion of the Apostle even by the disciples of Asia (i. 15). Nothing in the Acts indicates anything like this before the imprisonment of Acts xxviii. 30. Everything in Acts xix. and xx., and not less the language of the Epistle to the Ephesians, speaks of general and strong affection. This, therefore, so far as it goes, must be placed on the side of B.

(3.) The position of St. Paul as suffering (i. 12), in bonds (ii. 9), expecting "the time of his departure" (iv. 6), forsaken by almost all (iv. 16). Not quite decisive, but tending to B rather than A. The language of the epistles belonging to the first imprisonment imply, it is true, bonds (Phil. i. 13, 16; Eph. iii. 1, vi. 20), but in all of them the Apostle is surrounded by many friends, and is hopeful, and confident of release (Phil. i. 25; Philem. 22).

(4.) The mention of Onesiphorus, and of services rendered by him both at Rome and Ephesus (i. 16–18). Not decisive again, but the tone is rather that of a man looking back on a past period of his life, and the order of the names suggests the thought of the ministrations at Ephesus being subsequent to those at Rome. Possibly too the mention of "the household," instead of Onesiphorus himself, may imply his death in the interval. This therefore tends to B rather than A.

(5.) The abandonment of St. Paul by Demas (iv 10). Strongly in favor of B. Demas was with the Apostle when the Epistles to the Colossians (iv. 14) and Philemon (24) were written. 2 Tim. must therefore, in all probability, have been written after

Digitized by Google

them; but, if we place it anywhere in the first imprisonment, we are all but compelled [a] by the mention of Mark, for whose coming the Apostle asks in 2 Tim. iv. 11, and who is with him in Col. iv. 10, to place it at an earlier age.

(6.) The presence of Luke (iv. 11). Agrees well enough with A (Col. iv. 14), but is perfectly compatible with B.

(7.) The request that Timothy would bring Mark (iv. 11). Seems at first, compared as above, with Col. iv. 14, to support A, but, in connection with the mention of Demas, tends decidedly to B.

(8.) Mention of Tychicus as sent to Ephesus (iv. 12). Appears, as connected with Eph. vi. 21, 22, Col. iv. 7, in favor of A, yet, as Tychicus was continually employed on special missions of this kind, may just as well fit in with B.

(9.) The request that Timothy would bring the cloak and books left at Troas (iv. 13). On the assumption of A, the last visit of St. Paul to Troas would have been at least four or five years before, during which there would probably have been opportunities enough for his regaining what he had left. In that case, too, the circumstances of the journey present no trace of the haste and suddenness which the request more than half implies. On the whole, then, this must be reckoned as in favor of B.

(10.) "Alexander the coppersmith did me much evil," "greatly withstood our words" (iv. 14, 15). The part taken by a Jew of this name in the uproar of Acts xix., and the natural connection of the χαλκεύς with the artisans represented by Demetrius, suggest a reference to that event as something recent and so far support A. On the other hand, the name Alexander was too common to make us certain as to the identity, and if it were the same, the hypothesis of a later date only requires us to assume what was probable enough, a renewed hostility.

(11.) The abandonment of the Apostle in his first defense (ἀπολογία), and his deliverance "from the mouth of the lion" (iv. 16, 17). Fits in as a possible contingency with either hypothesis, but, like the mention of Demas in (5), must belong, at any rate, to a time much later than any of the other epistles written from Rome.

(12.) "Erastus abode at Corinth, but Trophimus I left at Miletus sick" (iv. 20). Language, as in (9), implying a comparatively recent visit to both places. If, however, the latter were written during the first imprisonment, then Trophimus had not been left at Miletus but had gone on with St. Paul to Jerusalem (Acts xxi. 29),[b] and the mention of Erastus as remaining at Corinth would have been superfluous to one who had left that city at the same time as the Apostle (Acts xx. 4).

(13.) "Haste to come before winter." Assuming A, the presence of Timothy in Phil. i. 1; Col. i. 1; Philem. 1, might be regarded as the consequence of this; but then, as shown in (5) and (7), there are almost insuperable difficulties in supposing this epistle to have been written before those three.

(14.) The salutations from Eubulus. Pudens, Linus, and Claudia. Without laying much stress on this, it may be said that the absence of these names from all the epistles, which, according to A belong to the same period, would be difficult to explain. B leaves it open to conjecture that they were converts of more recent date. They are mentioned too as knowing Timothy, and this implies, as at least probable, that he had already been at Rome, and that this letter to him was consequently later than those to the Philippians and Colossians.

On the whole, it is believed that the evidence preponderates strongly in favor of the later date, and that the epistle, if we admit its genuineness, is therefore a strong argument for believing that the imprisonment of Acts xxviii. was followed by a period first of renewed activity and then of suffering.

*Places.* — In this respect as in regard to time, 1 Tim. leaves much to conjecture. The absence of any local reference but that in i. 3, suggests Macedonia or some neighboring district. In A and other MSS. in the Peshito, Ethiopic, and other versions, Laodicea is named in the inscription as the place whence it was sent, but this appears to have grown out of a traditional belief resting on very insufficient grounds, and incompatible with the conclusion which has been above adopted, that this is the epistle referred to in Col. iv. 16 as that from Laodicea (Theophyl. *in loc.*). The Coptic version with as little likelihood states that it was written from Athens (Huther, *Einleit.*).

The second epistle is free from this conflict of conjectures. With the solitary exception of Böttger, who suggests Cæsarea, there is a *consensus* in favor of Rome, and everything in the circumstances and names of the epistle leads to the same conclusion (*ibid.*).

*Structure and Characteristics.* — The peculiarities of language, so far as they affect the question of authorship, have been already noticed. Assuming the genuineness of the epistles, some characteristic features remain to be noticed.

(1.) The ever-deepening sense in St. Paul's heart of the Divine Mercy, of which he was the object, as shown in the insertion of ἔλεος in the salutations of both epistles, and in the ἠλεήθην of 1 Tim. i. 13.

(2.) The greater abruptness of the second epistle. From first to last there is no plan, no treatment of subjects carefully thought out. All speaks of strong overflowing emotion, memories of the past, anxieties about the future.

(3.) The absence, as compared with St. Paul's other epistles, of Old Testament references. This may connect itself with the fact just noticed, that these epistles are not argumentative, possibly also with the request for the "books and parchments" which had been left behind (2 Tim. iv. 13). He may have been separated for a time from the ἱερὰ γράμματα, which were commonly his companions.

(4.) The conspicuous position of the "faithful sayings" as taking the place occupied in other epistles by the O. T. Scriptures. The way in which these are cited as authoritative, the variety of subjects which they cover, suggest the thought that in them we have specimens of the prophecies of the Apostolic Church which had most impressed themselves on the mind of the Apostle, and of the disciples generally. 1 Cor. xiv. shows how deep a reverence he was likely to feel for such spiritual

[a] The qualifying words might have been omitted, but for the fact that it has been suggested that Demas, having forsaken St. Paul, repented and returned (Lardner, vi. 336).

[b] The conjecture that the "leaving" referred to took place during the voyage of Acts xxvii. is purely arbitrary, and at variance with vers. 5 and 6 of that chapter.

Digitized by Google

utterances. In 1 Tim. iv. 1, we have a distinct reference to them.

(5.) The tendency of the Apostle's mind to dwell more on the universality of the redemptive work of Christ (1 Tim. ii. 3–6, iv. 10), his strong desire that all the teaching of his disciples should be "sound" (ὑγιαίνουσα), commending itself to minds in a healthy state, his fear of the corruption of that teaching by morbid subtleties.

(6.) The importance attached by him to the practical details of administration. The gathered experience of a long life had taught him that the life and well-being of the Church required these for its safeguards.

(7.) The recurrence of doxologies (1 Tim. i. 17, vi. 15, 16; 2 Tim. iv. 18) as from one living perpetually in the presence of God, to whom the language of adoration was as his natural speech.

It has been thought desirable, in the above discussion of conflicting theories, to state them simply as they stand, with the evidence on which they rest, without encumbering the page with constant reference to authorities. The names of writers on the N. T. in such a case, where the grounds of reasoning are open to all, add little or nothing to the weight of the conclusions drawn from them. Full particulars will, however, be found in the introductions of Alford, Wordsworth, Huther, Davidson, Wiesinger, Hug. Conybeare and Howson (*App.* i.) give a good tabular summary both of the objections to the genuineness of the epistles and of the answers to them, and a clear statement in favor of the later date. The most elaborate argument in favor of the earlier is to be found in N. Lardner, *History of Apost. and Evang.* (*Works*, vi. pp. 315–375). E. H. P.

* For the literature relating to these epistles, see under TITUS, EPISTLE TO. A.

**TIN** (בְּדִיל: κασσίτερος: *stannum*). Among the various metals found among the spoils of the Midianites, tin is enumerated (Num. xxxi. 22). It was known to the Hebrew metal-workers as an alloy of other metals (Is. i. 25; Ez. xxii. 18, 20). The markets of Tyre were supplied with it by the ships of Tarshish (Ez. xxvii. 12). It was used for plummets (Zech. iv. 10), and was so plentiful as to furnish the writer of Ecclesiasticus (xlvii. 18) with a figure by which to express the wealth of Solomon, whom he apostrophizes thus: "Thou didst gather gold as *tin*, and didst multiply silver as lead." In the Homeric times the Greeks were familiar with it. Twenty layers of tin were in Agamemnon's cuirass given him by Kinyras (*Il.* xi. 25), and twenty bosses of tin were upon his shield (*Il.* xi. 34). Copper, tin, and gold were used by Hephæstus in welding the famous shield of Achilles (*Il.* xviii. 474). The fence round the vineyard in the device upon it was of tin (*Il.* xviii. 564), and the oxen were wrought of tin and gold (*ibid.* 574). The greaves of Achilles, made by Hephæstus, were of tin beaten fine, close fitting to the limb (*Il.* xviii. 612, xxi. 592). His shield had two folds or layers of tin between two outer layers of bronze and an inner layer of gold (*Il.* xx. 271). Tin was used in ornamenting chariots (*Il.* xxiii. 503), and a cuirass of bronze overlaid with tin is mentioned in *Il.* xxiii. 561. No allusion to it is found in the *Odyssey*. The melting of tin in a smelting-pot is mentioned by Hesiod (*Theog.* 862).

Tin is not found in Palestine. Whence, then, did the ancient Hebrews obtain their supply? "Only three countries are known to contain any considerable quantity of it: Spain and Portugal, Cornwal, and the adjacent parts of Devonshire, and the islands of Junk, Ceylon, and Banca, in the Straits of Malacca" (Kenrick, *Phœnicia*, p. 212). According to Diodorus Siculus (v. 46) there were tin-mines in the island of Panchaia, off the east coast of Arabia, but the metal was not exported. There can be little doubt that the mines of Britain were the chief source of supply to the ancient world. Mr. Cooley, indeed, writes very positively (*Maritime and Inland Discovery*, i. 131): "There can be no difficulty in determining the country from which tin first arrived in Egypt. That metal has been in all ages a principal export of India: it is enumerated as such by Arrian, who found it abundant in the ports of Arabia, at a time when the supplies of Rome flowed chiefly through that channel. The tin-mines of Banca are probably the richest in the world; but tin was unquestionably brought from the West at a later period." But it has been shown conclusively by Dr. George Smith (*The Cassiterides*, Lond. 1863) that, so far from such a statement being justified by the authority of Arrian, the facts are all the other way After examining the commerce of the ports of Abyssinia, Arabia, and India, it is abundantly evident that, "instead of its coming from the East to Egypt, it has been invariably exported from Egypt to the East" (p. 23). With regard to the tin obtained from Spain, although the metal was found there, it does not appear to have been produced in sufficient quantities to supply the Phœnician markets. Posidonius (in Strab. iii. 147) relates that in the country of the Artabri, in the extreme N. W. of the peninsula, the ground was bright with silver, tin, and white gold (mixed with silver), which were brought down by the rivers; but the quantity thus obtained could not have been adequate to the demand. At the present day the whole surface bored for mining in Spain is little more than a square mile (Smith, *Cassiterides*, p. 46). We are therefore driven to conclude that it was from the Cassiterides, or tin districts of Britain, than the Phœnicians obtained the great bulk of this commodity (Sir G. C. Lewis, *Hist. Survey of the Astr. of the Anc.* p. 451), and that this was done by the direct voyage from Gades. It is true that at a later period (Strabo, iii. 147) tin was conveyed overland to Marseilles by a thirty days' journey (Diod. Sic. v. 2); but Strabo (iii. 175) tells us that the Phœnicians alone carried on this traffic in former times from Gades, concealing the passage from every one; and that on one occasion, when the Romans followed one of their vessels in order to discover the source of supply, the master of the ship ran upon a shoal, leading those who followed him to destruction. In course of time, however, the Romans discovered the passage. In Ezekiel, "the trade in tin is attributed to Tarshish, as 'the merchant' for the commodity, without any mention of the place whence it was procured" (*Cassiterides*, p. 74); and it is after the time of Julius Cæsar that we first hear of the overland traffic by Marseilles.

Pliny (vi. 36) identifies the *cassiteros* of the Greeks with the *plumbum album* or *candidum* of the Romans, which is our *tin*. *Stannum*, he says, is obtained from an ore containing lead and silver and is the first to become melted in the furnace. It is the same which the Germans call *Werk*, and is apparently the meaning of the Hebr. *bedîl* in Is i. 25. The etymology of *cassiterus* is uncertain

Digitized by Google

From the fact that in Sanskrit *kastira* signifies 'tin," an argument has been derived in favor of India being the source of the ancient supply of this metal, but too much stress must not be laid upon it. [LEAD.] W. A. W.

**TIPH'SAH** (תִּפְסַח [*ford*]: [in 1 K., Rom. Vat. omit; in 2 K.] Θερσά; [Alex. Θαψα, Θαιρα:] *Thapsa*, *Thapsa*) is mentioned in 1 K. iv. 24 as the limit of Solomon's empire towards the Euphrates, and in 2 K. xv. 16 it is said to have been attacked by Menahem, king of Israel, who "smote Tiphsah and all that were therein, and all the coasts thereof." It is generally admitted that the town intended, at any rate in the former passage, is that which the Greeks and Romans knew under the name of Thapsacus (Θάψακος), situated in Northern Syria, at the point where it was usual to cross the Euphrates (Strab. xvi. 1, § 21). The name is therefore, reasonably enough, connected with פָּסַח, "to pass over" (Winer, *Realwörterbuch*, ii. 613), and is believed to correspond in meaning to the Greek πόρος, the German *furt*, and our "ford."

Thapsacus was a town of considerable importance in the ancient world. Xenophon, who saw it in the time of Cyrus the younger, calls it "great and prosperous" (μεγάλη καὶ εὐδαίμων, *Anab.* i. 4, § 11). It must have been a place of considerable trade, the land-traffic between East and West passing through it, first on account of its fordway (which was the lowest upon the Euphrates), and then on account of its bridge (Strab. xvi. 1, § 23), while it was likewise the point where goods were both embarked for transport down the stream (Q. Curt. x. 1), and also disembarked from boats which had come up to it, to be conveyed on to their final destination by land (Strab. xvi. 3, § 4). It is a fair conjecture that Solomon's occupation of the place was connected with his efforts to establish a line of trade with Central Asia directly across the continent, and that Tadmor was intended as a resting-place on the journey to Thapsacus.

Thapsacus was the place at which armies marching east or west usually crossed the "Great River." It was there that the Ten Thousand first learned the real intentions of Cyrus, and, consenting to aid him in his enterprise, passed the stream (Xen. *Anab.* i. 4, § 11). There too Darius Codomannus crossed on his flight from Issus (Arr. *Exp. Al.* ii. 13); and Alexander, following at his leisure, made his passage at the same point (*ibid.* iii. 7). A bridge of boats was usually maintained at the place by the Persian kings, which was of course broken up when danger threatened. Even then, however, the stream could in general be forded, unless in the flood-season.[a]

It has been generally supposed that the site of Thapsacus was the modern *Deïr* (D'Anville, Rennell, Vaux, etc.). But the Euphrates expedition proved that there is no ford at *Deïr*, and indeed showed that the only ford in this part of the course of the Euphrates is at *Suriyeh*, 45 miles below Balis, and 165 above *Deïr* (Ainsworth, *Travels in the Track of the Ten Thousand*, p. 70). This then must have been the position of Thapsacus. Here the river is exactly of the width mentioned by Xenophon (4 stades or 800 yards), and here for four months in the winter of 1841–1842 the river had but 20 inches of water (*ibid.* p. 72).

"The Euphrates is at this spot full of beauty and majesty. Its stream is wide, and its waters generally clear and blue. Its banks are ow and level to the left, but undulate gently to the right. Previous to arriving at this point the course of the river is southerly, but here it turns to the east, expanding more like an inland lake than a river, and quitting (as Pliny has described it) the Palmyrean solitudes for the fertile Mygdonia" (*ibid.*). A paved causeway is visible on either side of the Euphrates at *Suriyeh*, and a long line of mounds may be traced, disposed, something like those of Nineveh, in the form of an irregular parallelogram These mounds probably mark the site of the ancient city. G. R.

**TIRAS** (תִּירָס [perh. *longing, desire*]: Θεῖρας; [Rom. in 1 Chr. Θίρας:] *Thiras*). The youngest son of Japheth (Gen. x. 2). As the name occurs only in the ethnological table, we have no clew, as far as the Bible is concerned, to guide us as to the identification of it with any particular people. Ancient authorities generally fixed on the Thracians, as presenting the closest verbal approximation to the name (Joseph. *Ant.* i. 6, § 1; Jerome, *in Gen.* x. 2; Targums Pseudoj. and Jerus. *on Gen.* l. c.; Targ. on 1 Chr. i. 5): the occasional rendering *Persia* probably originated in a corruption of the original text. The correspondence between Thrace and Tiras is not so complete as to be convincing; the gentle form Θρᾷξ brings them nearer together, but the total absence of the *i* in the Greek name is observable. Granted, however, the verbal identity, no objection would arise on ethnological grounds to placing the Thracians among the Japhetic races. Their precise ethnic position is indeed involved in great uncertainty; but all authorities agree in their general Indo-European character. The evidence of this is circumstantial rather than direct. The language has disappeared, with the exception of the ancient names and the single word *bria*, which forms the termination of Mesembria, Selymbria, etc., and is said to signify "town" (Strab. vii. p. 319). The Thracian stock was represented in later times by the Getæ, and these again, still later, by the Daci, each of whom inherited the old Thracian tongue (Strab. vii. p. 303). But this circumstance throws little light on the subject; for the Dacian language has also disappeared, though fragments of its vocabulary may possibly exist either in Wallachian dialects or perhaps in the Albanian language (Diefenbach, *Or. Eur.* p. 68). If Grimm's identification of the Getæ with the Goths were established, the Teutonic affinities of the Thracians would be placed beyond question (*Gesch. Deuts. Spr.* i. 178); but this view does not meet with general acceptance. The Thracians are associated in ancient history with the Pelasgians (Strab. ix. 401), and the Trojans, with whom they had many names in common (Strab. xiii. 590); in Asia Minor they were represented by the Bithynians (Herod. i. 28, vii. 75). These circumstances lead to the conclusion that they belonged to the Indo-European family, but do not warrant us in assigning them to any

[a] This is clear from the very name of the place, and is confirmed by modern researches. When the natives told Cyrus that the stream had acknowledged him as its king, having never been forded until his army waded through it, they calculated on his ignorance, or thought he would not examine too strictly into the groundwork of a compliment. (See Xen. *Anab.* i. 4, § 11).

Digitized by Google

particular branch of it. Other explanations have been offered of the name Tiras, of which we may notice the Agathyrsi, the first part of the name (*Aga*) being treated as a prefix (Knobel, *Völkert.* p. 129); Taurus and the various tribes occupying that range (Kalisch, *Comm.* p. 246); the river Tyras, *Dniester*, with its cognominous inhabitants, the Tyritæ (Hävernick, *Einleit.* ii. 231; Schultheus, *Parad.* p. 194); and, lastly, the maritime Tyrrheni (Tuch, *in Gen. l. c.*). W. L. B.

**TI'RATHITES, THE** (הַתִּרְעָתִי) [*from a place* = "*gate*," Ges.]: [Rom. Θαργαθίμ; Vat.] Γαθιειμ; Alex. Αργαθιειμ: *Canentes*). One of the three families of Scribes residing at Jabez (1 Chr. ii. 55), the others being the Shimeathites and Suchathites. The passage is hopelessly obscure, and it is perhaps impossible to discover whence these three families derived their names. The Jewish commentators, playing with the names in true Shemitic fashion, interpret them thus; "They called them Tirathim, because their voices when they sung resounded loud (תָּרַע); and Shimeathites because they made themselves heard (שָׁמַע) in reading the Law."

The SHIMEATHITES having been inadvertently omitted in their proper place, it may be as well to give here the equivalents of the name (שִׁמְעָתִי): Σαμαθιείμ: *Resonantes*). G.

**TIRE** (פְּאֵר). An ornamental head-dress worn on festive occasions (Ez. xxiv. 17, 23). The term *pe'r* is elsewhere rendered "goodly" (Ex. xxxix. 28); "bonnet" (Is. iii. 20; Ez. xliv. 18); and "ornament" (Is. lxi. 10). For the character of the article, see HEAD-DRESS. W. L. B.

**TIR'HAKAH** (תִּרְהָקָה) [perh. *brought forth, exalted*, Sim.]: Θαρακά; [Vat. in 2 K., Θαρα; Sin. Alex. in Is., Θαραθα:] *Tharaca*). King of Ethiopia, Cush (βασιλεὺς Αἰθιόπων, LXX.), the opponent of Sennacherib (2 K. xix. 9; Is. xxxvii. 9). While the king of Assyria was "warring against Libnah," in the south of Palestine, he heard of Tirhakah's advance to fight him, and sent a second time to demand the surrender of Jerusalem. This was B. C. cir. 713, unless we suppose that the expedition took place in the 24th instead of the 14th year of Hezekiah, which would bring it to B. C. cir. 703. If it were an expedition later than that of which the date is mentioned, it must have been before B. C. cir. 696, Hezekiah's last year. But if the reign of Manasseh is reduced to 35 years, these dates would be respectively B. C. cir. 693, 683, and 678, and these numbers might have to be slightly modified, the fixed date of the capture of Samaria, B. C. 721, being abandoned.

According to Manetho's epitomists, Tarkos or Tarakos was the third and last king of the XXVth dynasty, which was of Ethiopians, and reigned 18 (Afr.) or 20 (Eus.) years. [So.] From one of the Apis-tablets we learn that a bull Apis was born in his 26th year, and died at the end of the 20th of Psammetichus I. of the XXVIth dynasty. Its life exceeded 20 years, and no Apis is stated to have lived longer than 26. Taking that sum as the most probable, we should date Tirhakah's accession B. C. cir. 695, and assign him a reign of 26 years. In this case we should be obliged to take the later reckoning of the Biblical events, were it not for the possibility that Tirhakah ruled over Ethiopia before becoming king of Egypt. In connection with this theory it must be observed, that an earlier Ethiopian of the same dynasty is called in the Bible "So, king of Egypt," while this ruler is called "Tirhakah, king of Ethiopia," and that a Pharaoh is spoken of in Scripture at the period of the latter, and also that Herodotus represents the Egyptian opponent of Sennacherib as Sethos, a native king, who may however have been a vassal under the Ethiopian.

The name of Tirhakah is written in hieroglyphics TEHARKA. Sculptures at Thebes commemorate his rule, and at Gebel-Berkel, or Napata, he constructed one temple and part of another. Of the events of his reign little else is known, and the account of Megasthenes (*ap.* Strabo, xv. p. 686), that he rivaled Sesostris as a warrior and reached the Pillars of Hercules, is not supported by other evidence. It is probable that at the close of his reign he found the Assyrians too powerful, and retired to his Ethiopian dominions. R. S. P.

**TIR'HANAH** (תִּרְחָנָה) [*inclination* or *favor*, Ges., Fürst]: Θαρέμ; Alex. Θαρχνα: *Tharcana*). Son of Caleb ben-Hezron by his concubine Maachah (1 Chr. ii. 48).

**TIR'IA** (תִּרְיָא) [*fear*, Ges.]: Θιρίδ; [Vat. Ζαιρα;] Alex. Θηρια: *Thiria*). Son of Jehaleleel of the tribe of Judah (1 Chr. iv. 16).

**TIRSHATHA** (always written with the article, הַתִּרְשָׁתָא [see below]: hence the LXX. give the word Ἀθερσαθά [Alex. FA. Αθερσαθα, Vat. other forms] (Ezr. ii. 63; Neh. vii. 65), and Ἀρτασασθά [Vat. Alex. FA. omit] (Neh. x. 1): Vulg. *Athersatha*). The title of the governor of Judæa under the Persians, derived by Gesenius from a Persian root signifying "stern," "severe." He compares the title Gestrenger Herr, formerly given to the magistrates of the free and imperial cities of Germany. Compare also our expression, "most *dread* sovereign." It is added as a title after the name of Nehemiah (Neh. viii. 9, x. 1 [Heb. 2]); and occurs also in three other places, Ezr. ii. (ver. 63), and the repetition of that account in Neh. vii. (vv. 65–70), where probably it is intended to denote Zerubbabel, who had held the office before Nehemiah. In the margin of the A. V. (Ezr. ii. 63; Neh. vii. 65, x. 1) it is rendered "governor;" an explanation justified by Neh. xii. 26, where "Nehemiah the governor," הַפֶּחָה (*Pecha*, possibly from the same root as the word we write Pacha, or Pasha), occurs instead of the more usual expression, "Nehemiah the Tirshatha." This word, פֶּחָה, is one of very common occurrence. It is twice applied by Nehemiah to himself (vv. 14, 18), and by the prophet Haggai (i. 1, ii. 2, 21) to Zerubbabel. According to Gesenius, it denotes the prefect or governor of a province of less extent than a satrapy. The word is used of officers and governors under the Assyrian (2 K. xviii. 24; Is. xxxvi. 9), Babylonian (Jer. li. 57; Ez. xxiii. 6, 23; see also Ezr. v. 3, 14, vi. 7; Dan. iii. 2, 3, 27, vi. 7 [Heb. 3]), Median (Jer. li. 28), and Persian (Esth. viii. 9, ix. 3) monarchies. And under this last we find it applied to the rulers of the provinces bordered by the Euphrates (Ezr. viii. 36; Neh. ii. 7, 9, iii. 7), and to the governors of Judæa, Zerubbabel and Nehemiah (compare Mal. i. 8). It is found also at an earlier period in the times of Solo

mon (1 K. x. 15, 2 Chr. ix. 14) and Benhadad king of Syria (1 K. xx. 24): from which last place, compared with others (2 K. xviii. 24, Is. xxxvi. 9), we find that military commands were often held by these governors; the word indeed is often rendered by the A. V., either in the text or the margin, "captain."

By thus briefly examining the sense of Pecha, which (though of course a much more general and less distinctive word) is given as an equivalent to Tirshatha, we have no difficulty in forming an opinion as to the general notion implied in it. We have, however, no sufficient information to enable us to explain in detail in what consisted the special peculiarities in honor or functions which distinguished the Tirshatha from others of the same class, governors, captains, princes, rulers of provinces.

E. P. E.

**TIR'ZAH** (תִּרְצָה, *i. e.* Thirza [*delight*]: Θερσά: *Thersa*). The youngest of the five daughters of Zelophehad, whose case originated the law that in the event of a man dying without male issue his property should pass to his daughters (Num. xxvi. 33, xxvii. 1, xxxvi.[a] 11; Josh. xvii. 3). [ZELOPHEHAD.] G.

**TIR'ZAH** (תִּרְצָה [*delight*]: [Rom. Θερσά, Θερσιλά; Vat.] Θαρσα, Θερσα, Θαρσειλα; Alex. Θερμα, Θερσα, Θερσιλα: *Thersa*). An ancient Canaanite city, whose king is enumerated amongst the twenty-one overthrown in the conquest of the country (Josh. xii. 24). From that time nothing is heard of it till after the disruption of Israel and Judah. It then reappears as a royal city — the residence of Jeroboam (1 K. xiv. [b] 17) and of his successors, Baasha (xv. 21, 33), Elah (xvi. 8, 9), and Zimri (*ibid.* 15). It contained the royal sepulchres of one (xvi. 6), and probably all the first four kings of the northern kingdom. Zimri was besieged there by Omri, and perished in the flames of his palace (*ibid.* 18). The new king continued to reside there at first, but after six years he removed to a new city which he built and named Shomrôn (Samaria), and which continued to be the capital of the northern kingdom till its fall. Once, and only once, does Tirzah reappear, as the seat of the conspiracy of Menahem ben-Gaddi against the wretched Shallum (2 K. xv. 14, 16); but as soon as his revolt had proved successful, Menahem removed the seat of his government to Samaria, and Tirzah was again left in obscurity.

Its reputation for beauty throughout the country must have been wide-spread. It is in this sense that it is mentioned in the [c] Song of Solomon, where the juxtaposition of Jerusalem is sufficient proof of the estimation in which it was held — "Beautiful as Tirzah, comely as Jerusalem" (Cant. i. 4). The LXX. (εὐδοκία) and Vulg. (*suavis*) do not, however, take *tirtsah* as a proper name in this passage.

Eusebius (*Onomast.* Θαρσιλά[d]) mentions it in connection with Menahem, and identifies it with a "village of Samaritans in Batanea." There is, however, nothing in the Bible to lead to the inference that the Tirzah of the Israelite monarchs was on the east of Jordan. It does not appear to be mentioned by the Jewish topographers, or any of the Christian travellers of the Middle Ages, except Brocardus, who places "Thersa on a high mountain, three leagues (*leucas*) from Samaria to the east" (*Descriptio*, cap. vii.). This is exactly the direction, and very nearly the distance, of *Tellûzah*, a place in the mountains north of *Nâblus*, which was visited by Dr. Robinson and Mr. Van de Velde in 1852 (*Bibl. Res.* iii. 302; *Syr. and Pal.* iii. 334). The town is on an eminence, which towards the east is exceedingly lofty, though, being at the edge of the central highlands, it is more approachable from the west. The place is large and thriving, but without any obvious marks of antiquity. The name may very probably be a corruption of Tirzah; but beyond that similarity, and the general agreement of the site with the requirements of the narrative, there is nothing at present to establish the identification with certainty.

G.

**TISH'BITE, THE** (הַתִּשְׁבִּי [patr.]: [Vat.] ὁ θεσβειτης; [Rom.] Alex. [f] θεσβίτης: *Thesbites*). The well-known designation of Elijah (1 K. xvii. 1, xxi. 17, 28; 2 K. i. 3, 8, ix. 36).

(1.) The name naturally points to a place called Tishbeh (Fürst), Tishbi, or rather perhaps Teshsb, as the residence of the prophet. And indeed the word מִתִּשְׁבִי, which follows it in 1 K. xvii. 1, and which in the received Hebrew text is so pointed as to mean "from the residents," may, without violence or grammatical impropriety, be pointed to read "from Tishbi." This latter reading appears to have been followed by the LXX. (ὁ Θεσβείτης ὁ ἐκ Θεσβών), Josephus (*Ant.* viii. 13, § 2, πόλεως Θεσβάνης), and the Targum (דְּמִתִּישְׁבֵי, "from out of Toshab"); and it has the support of Ewald (*Gesch.* iii. 468, *note*). It is also supported by the fact, which seems to have escaped notice, that the word does not in this passage contain the ו which is present in each one of the places where תִּשְׁבִּי is used as a mere appellative noun. Had the ו been present in 1 K. xvii. 1, the interpretation "from Tishbi" could never have been proposed.

Assuming, however, that a town is alluded to, as Elijah's native place, it is not necessary to infer that it was itself in Gilead, as Epiphanius, Adricho-

---

[a] In this passage the order of the names is altered in the Hebrew text from that preserved in the other passages — and still more so in the LXX.

[b] The LXX. version of the narrative of which this verse forms part, amongst other remarkable variations from the Hebrew text, substitutes Sarira [Σαρισα, that is, Zereda, for Tirzah. In this they are supported by no other version.

[c] Its occurrence here on a level with Jerusalem has been held to indicate that the Song of Songs was the work of a writer belonging to the northern kingdom. But surely a poet, and so ardent a poet as the author of the Song of Songs, may have been sufficiently independent of political considerations to go out of his own country — if Tirzah can be said to be out of the country of a native of Judah — for a metaphor.

[d] It will be observed that the name stood in the LXX. of 2 K. xv. 14 in Eusebius' time virtually in the same strange un-Hebrew form that it now does.

[e] Schwarz (150) seems merely to repeat this passage.

[f] The Alex. MS. omits the word in 1 K. xvii. 1, and both MSS. omit it in xxi. 28, which they cast, with the whole passage, in a different form from the Hebrew text.

nius,[a] Castell, and others have imagined; for the word תִּשְׁבִּי, which in the A. V. is rendered by the general term 'inhabitant,' has really the special force of "resident" or even[b] "stranger." This, and the fact that a place with a similar name is not elsewhere mentioned, has induced the commentators[c] and lexicographers, with few exceptions, to adopt the name "Tishbite" as referring to the place THISBE in Naphtali, which is found in the LXX. text of Tobit i. 2. The difficulty in the way of this is the great uncertainty in which the text of that passage is involved, as has already been shown under the head of THISBE; an uncertainty quite sufficient to destroy any dependence on it as a topographical record, although it bears the traces of having originally been extremely minute. Bunsen (*Bibelwerk*, note to 1 K. xvii. 1) suggests in support of the reading "the Tishbite from Tishbi of Gilead" (which however he does not adopt in his text), that the place may have been purposely so described, in order to distinguish it from the town of the same name in Galilee.

(2.) But הַתִּשְׁבִּי has not always been read as a proper name, referring to a place. Like מֹתִשְׁבִּי, though exactly in reverse, it has been pointed so as to make it mean "the stranger." This is done by Michaelis in the text of his interesting *Bibel für Ungelehrten* — "der Fremdling Elia, einer von den Fremden, die in Gilead wohnhaft waren;" and it throws a new and impressive air round the prophet, who was so emphatically the champion of the God of Israel. But this suggestion does not appear to have been adopted by any other interpreter, ancient or modern.

The numerical value of the letters תשבי is 712, on which account, and also doubtless with a view to its correspondence with his own name, Elias Levita entitled his work, in which 712 words are explained, *Sepher Tishbi* (Bartolocci, i. 140 *b*).

G.

**TITANS** (Τιτᾶνες, of uncertain derivation). These children of Uranus (Heaven) and Gaia (Earth) were, according to the earliest Greek legends, the vanquished predecessors of the Olympian gods, condemned by Zeus to dwell in Tartarus, yet not without retaining many relics of their ancient dignity (Æsch. *Prom. Vinct.* passim). By later (Latin) poets they were confounded with the kindred *Gigantes* (Hor. *Od.* iii. 4, 42, &c.), as the traditions of the primitive Greek faith died away; and both terms were transferred by the Seventy to the Rephaim of ancient Palestine. [GIANT.] The usual Greek rendering of *Rephaim* is indeed Γίγαντες (Gen. xiv. 5; Josh. xii. 4, &c.), or, with a yet clearer reference to Greek mythology, γηγενεῖς (Prov. ii. 18, ix. 18), and θεομάχοι (Symmach. Prov. ix. 18, xxi. 16; Joh xxvi. 5). But in 2 Sam v. 18, 22, "the valley of Rephaim" is represented by ἡ κοιλὰς τῶν τιτάνων instead of ἡ κοιλὰς τῶν γιγάντων, 1 Chr. xi. 15, xiv. 9, 13: and the same rendering occurs in a Hexapl. text in 2 Sam. xxiii. 13. Thus Ambrose defends his use of a classical allusion by a reference to the Old Latin version of 2 Sam. v., which preserved the LXX. rendering (*De fide*, iii. 1, 4, Nam et *gigantes* et *vallem Titanum* prophetici sermonis series non refugit. Et Esaias *Sirenas* . . . dixit). It can therefore occasion no surprise that in the Greek version of the triumphal hymn of Judith, "the sons of the Titans" (*υἱοὶ Τιτάνων*: Vulg. *filii Titan:* Old Latin, *filii Dathan; f. Tela; f. bellatorum*) stands parallel with "high giants," ὑψηλοὶ Γίγαντες, where the original text probably had רְפָאִים and גִּבּוֹרִים. The word has yet another interesting point of connection with the Bible; for it may have been from some vague sense of the struggle of the infernal and celestial powers, dimly shadowed forth in the classical myth of the Titans, that several Christian fathers inclined to the belief that Τειτὰν was the mystic name of "the beast" indicated in Rev. xiii. 18 (Iren. v. 30, 3 . . . "divinum putatur apud multos esse hoc nomen . . . et ostentationem quandam continet ultionis . . . et alias autem et antiquum, et fide dignum, et regale, magis autem et tyrannicum nomen . . . ut ex multis colligamus ne forte *Titan* vocetur qui veniet").

B. F. W.

**TITHE.**[d] Without inquiring into the reason for which the number ten[e] has been so frequently preferred as a number of selection in the cases of tribute-offerings, both sacred and secular, voluntary and compulsory, we may remark that numerous instances of its use are found both in profane and also in Biblical history, prior to or independently of the appointment of the Levitical tithes under the Law. In Biblical history the two prominent instances are — 1. Abram presenting the tenth of all his property, according to the Syriac and Arabic versions of Heb. vii. and S. Jarchi in his Com., but as the passages themselves appear to show, of the spoils of his victory, to Melchizedek (Gen. xiv. 20; Heb. vii. 2, 6; Joseph. *Ant.* i. 10, § 2; Selden *On Tithes*, c. 1). 2. Jacob, after his vision at Luz, devoting a tenth of all his property to God in case he should return home in safety (Gen. xxviii. 22). These instances bear witness to the antiquity of tithes, in some shape or other, previous to the Mosaic tithe-system. But numerous instances are to be found of the practice of heathen nations, Greeks, Romans, Carthaginians, Arabians, of applying tenths derived from property in general, from spoil, from confiscated goods, or from commercial profits, to sacred, and quasi-sacred, and also to fiscal purposes, namely, as consecrated to a deity, pre-

[a] This lexicographer pretends to have been in possession of some special information as to the situation of the place. He says (*Lex. Hebr.* ed. Michaelis), "Urbe in tribu Gad, Jebaa inter et Saron." Jebaa should be Jezbaa (*i. e.* Jogbehah) and this strange bit of confident topography is probably taken from the map of Adrichomius, made on the principle of inserting every name mentioned in the Bible, known or unknown.

[b] There is no doubt that this is the meaning of תּוֹשָׁב. See Gen. xxiii. 4 ("sojourner"), Ex. xii. 45 ("foreigner"), Lev. xxv. 6 ("stranger"), Ps. xxxix. 12 ("sojourner"). It often occurs in connection with גֵּר, "an alien," as in Lev. xxv. 23, 35, 40, 47 *b*, 1 Chr xxix. 15. Besides the above passages, תּוֹשָׁב is found in Lev. xxii. 10, xxv. 45, 47 *a*.

[c] Reland, *Pal.* p. 1095; Gesenius, *Thes.* p. 1262 *b*, &c., &c.

[d] מַעֲשֵׂר: δεκάτη: *decima:* and pl. מַעֲשְׂרוֹת al δέκατα: *decimæ;* from עֶשֶׂר, "ten."

[e] Philo desires δέκα from δέχεσθαι (*De X Orac* ii 184).

sented as a reward to a successful general, set apart as a tribute to a sovereign, or as a permanent source of revenue. Among other passages, the following may be cited: 1 Macc. xi. 35; Herod. i. 89, iv. 152, v. 77, vii. 132, ix. 81; Diod. Sic. v. 42, xi. 33, xx. 14; Paus. v. 10, § 2, x. 10, § 1; Dionys. Hal. i. 19, 23; Justin, xviii. 7, xx. 3; Arist. *Œcon.* ii. 2; Liv. v. 21; Polyb. ix. 39; Cic. *Verr.* ii. 3, 6, and 7 (where tithes of wine, oil, and "minutæ fruges," are mentioned), *Pro Leg. Manil.* 6; Plut. *Ages.* c. 19, p. 389; Pliny, *N. H.* xii. 14; Macrob. *Sat.* iii. 6; Xen. *Hell.* i. 7, 10, iv. 3, 21; Rose, *Inscr. Gr.* p. 215; Gibbon, vol. iii. p. 301, ed. Smith; and a remarkable instance of fruits tithed and offered to a deity, and a feast made, of which the people of the district partook, in Xen. *Exp. Cyr.* v. 3, 9, answering thus to the Hebrew poor man's tithe-feast to be mentioned below.

The first enactment of the Law in respect of tithe is the declaration that the tenth of all produce, as well as of flocks and cattle, belongs to Jehovah, and must be offered to Him. 2. That the tithe was to be paid in kind, or, if redeemed, with an addition of one fifth to its value (Lev. xxvii. 30–33). This tenth, called *Terumoth*, is ordered to be assigned to the Levites, as the reward of their service, and it is ordered further, that they are themselves to dedicate to the Lord a tenth of these receipts, which is to be devoted to the maintenance of the high-priest (Num. xviii. 21–28).

This legislation is modified or extended in the book of Deuteronomy, *i. e.* from thirty-eight to forty years later. Commands are given to the people, — 1, to bring their tithes, together with their votive and other offerings and first-fruits, to the chosen centre of worship, the metropolis, there to be eaten in festive celebration in company with their children, their servants, and the Levites (Deut. xii. 5–18). 2. After warnings against idolatrous or virtually idolatrous practices, and the definition of clean as distinguished from unclean animals, among which latter class the swine is of obvious importance in reference to the subject of tithes, the legislator proceeds to direct that all the produce of the soil shall be tithed every year (ver. 17 seems to show that corn, wine, and oil alone are intended), and that these tithes with the firstlings of the flock and herd are to be eaten in the metropolis. 3. But in case of distance, permission is given to convert the produce into money, which is to be taken to the appointed place, and there laid out in the purchase of food for a festal celebration, in which the Levite by special command, to be included (Deut. xiv. 22–27). 4. Then follows the direction, that at the end of three years, *i. e.* in the course of the third and sixth years of the Sabbatical period, all the tithe of that year is to be gathered and laid up "within the gates," *i. e.* probably in some central place in each district, not at the metropolis; and that a festival is to be held, in which the stranger, the fatherless, and the widow, together with the Levite, are to partake (*ibid.* vv. 28, 29). 5. Lastly, it is ordered that after taking the tithe in each third year, "which is the year of tithing," [a] an exculpatory declaration is to be made by every Israelite, that he has done his best to fulfill the Divine command (Deut. xxvi. 12–14).[b]

From all this we gather, 1. That one tenth of the whole produce of the soil was to be assigned for the maintenance of the Levites. 2. That out of this the Levites were to dedicate a tenth to God, for the use of the high-priest. 3. That a tithe, in all probability a *second* tithe, was to be applied to festival purposes. 4. That in every third year, either this festival tithe or a *third* tenth was to be eaten in company with the poor and the Levites. The question arises, were there *three* tithes taken in this third year; or is the third tithe only the second under a different description? That there were two yearly tithes seems clear, both from the general tenor of the directions and from the LXX. rendering of Deut. xxvi. 12. But it must be allowed that the *third* tithe is not without support. 1. Josephus distinctly says that one tenth was to be given to the priests and Levites, one tenth was to be applied to feasts in the metropolis, and that a tenth besides these (τρίτην πρὸς αὐταῖς) was every third year to be given to the poor (*Ant.* iv. 8, § 8, and 22). 2. Tobit says, he gave one tenth to the priests, one tenth he sold and spent at Jerusalem, *i. e.* commuted according to Deut. xiv. 24, 25, and another tenth he gave away (Tob. i. 7, 8). 3. St. Jerome says one tenth was given to the Levites, out of which they gave one tenth to the priests (δευτεροδεκάτη); a second tithe was applied to festival purposes, and a third was given to the poor (τριτοδεκάτη) (*Com. on Ezek.* xlv. vol. i. p. 565). Spencer thinks there were three tithes. Jennings, with Mede, thinks there were only two complete tithes, but that in the third year an addition of some sort was made (Spencer, *De Leg. Hebr.* p. 727; Jennings, *Jew. Ant.* p. 183).

On the other hand, Maimonides says the third and sixth years' *second* tithe was shared between the poor and the Levites, *i. e.* that there was no third tithe (*De Jur. Paup.* vi. 4). Selden and Michaelis remark that the burden of three tithes, besides the first-fruits, would be excessive. Selden thinks that the third year's tithe denotes only a different application of the second or festival tithe, and Michaelis, that it meant a surplus after the consumption of the festival tithe (Selden, *On Tithes*, c. 2, p. 13; Michaelis, *Laws of Moses*, § 192, vol. iii. p. 143, ed. Smith). Against a third tithe may be added Reland, *Ant. Hebr.* p. 359; Jahn, *Ant.* § 389; Godwyn, *Moses and Aaron*, p. 136, and Carpzov, pp. 621, 622; Keil, *Bibl. Arch.* § 71, i. 337; Saalschütz, *Hebr. Arch.* i. 70; Winer, *Realwb.* s. v *Zehnte*. Knobel thinks the tithe was never taken in full, and that the third year's tithe only meant the portion contributed in that year (*Com. on Deut.* xiv. 29, in *Kurzgef. Exeg. Handbuch*). Ewald thinks that for two years the tithe was left in great measure to free-will, and that the third year's tithe only was compulsory (*Alterthüm.* p. 346).

Of these opinions, that which maintains three separate and complete tithings seems improbable, as imposing an excessive burden on the land, and not easily reconcilable with the other directions; yet there seems no reason for rejecting the notion of two yearly tithes, when we recollect the especial promise of fertility to the soil, conditional on observance of the commands of the Law (Deut. xxviii). There would thus be, 1, a yearly tithe for the Levites; 2, a second tithe for the festivals, which last would every third year be shared by the Levites

[b] The LXX. has here ἐὰν συντελέσῃς ἀποδεκατοῦσθαι πᾶν τὸ ἐπιδέκατον τῶν γεννημάτων τῆς γῆς σου ἐν τῷ ἔτει τῷ τρίτῳ τὸ δεύτερον ἐπιδέκατον δώσεις τῷ Λευίτῃ, κ. τ. λ.

Digitized by Google

with the poor. It is this poor man's tithe which Michaelis thinks is spoken of as likely to be converted to the king's use under the regal dynasty (1 Sam. viii. 15, 17; Mich. *Laws of Moses*, vol. i. p. 299). Ewald thinks that under the kings the ecclesiastical tithe-system reverted to what he supposes to have been its original free-will character. It is plain that during that period the tithe-system partook of the general neglect into which the observance of the Law declined, and that Hezekiah, among his other reforms, took effectual means to revive its use (2 Chr. xxxi. 5, 12, 19). Similar measures were taken after the Captivity by Nehemiah (Neh. xii. 44), and in both these cases special officers were appointed to take charge of the stores and storehouses for the purpose. The practice of tithing especially for relief of the poor appears to have subsisted even in Israel, for the prophet Amos speaks of it, though in an ironical tone, as existing in his day (Am. iv. 4). But as any degeneracy in the national faith would be likely to have an effect on the tithe-system, we find complaint of neglect in this respect made by the prophet Malachi (iii. 8, 10). Yet, notwithstanding partial evasion or omission, the system itself was continued to a late period in Jewish history, and was even carried to excess by those who, like the Pharisees, affected peculiar exactness in observance of the Law (Heb. vii. 5–8; Matt. xxiii. 23; Luke xviii. 12; Josephus, *Ant.* xx. 9, § 2; *Vit.* c. 15).

Among details relating to the tithe payments mentioned by Rabbinical writers may be noticed: (1.) That in reference to the permission given in case of distance (Deut. xiv. 24), Jews dwelling in Babylonia, Ammon, Moab, and Egypt, were considered as subject to the law of tithe in kind (Reland, iii. 9, 2, p. 355). (2.) In tithing sheep the custom was to inclose them in a pen, and as the sheep went out at the opening, every tenth animal was marked with a rod dipped in vermilion. This was the "passing under the rod." The Law ordered that no inquiry should be made whether the animal were good or bad, and that if the owner changed it, both the original and the changeling were to be regarded as devoted (Lev. xxvii. 32, 33; Jer. xxxiii. 13; *Becoroth*, ix. 7; Godwyn, *M. and A.* p. 136, ri. 7). (3.) Cattle were tithed in and after August, corn in and after September, fruits of trees in and after January (Godwyn, p. 137, § 9); Buxtorf, *Syn. Jud.* c. xii. pp. 282, 283. (4.) 'Corners" were exempt from tithe (*Peah*, i. 6). (5.) The general rule was that all edible articles not purchased, were tithable, but that products not specified in Deut. xiv. 23, were regarded as doubtful. Tithe of them was not forbidden, but was not required (*Maaseroth*, i. 1; *Demai*, i. 1; Carpzov, *App. Bibl.* pp. 619, 620). H. W. P.

* TITTLE is the diminutive of *tit*, hence = *minimum*, the very least of a thing. It stands for the Greek κεραία (Matt. v. 18; Luke xvi. 17), a *little horn*, denoting the slightly curved hooks attached to some of the Hebrew letters, especially *Lamed*, more noticeable in Hebrew manuscripts than in the ordinary printed Hebrew. It vitiated a letter or an entire copy to omit this appendage where it belonged. The *jot* in the same connection was the Greek *iota* or Hebrew *yodh*, the smallest letter of the Greek and Hebrew alphabets. It will be seen how strong, therefore, was the Saviour's asseveration: "one jot or one tittle shall in no wise pass from the law till all be fulfilled" (Matt. v. 18).

H.

## TITUS MANLIUS. [MANLIUS.]

TITUS (Τίτος: *Titus*). Our materials for the biography of this companion of St. Paul must be drawn entirely from the notices of him in the Second Epistle to the Corinthians, the Galatians, and to Titus himself, combined with the Second Epistle to Timothy. He is not mentioned in the Acts at all. The reading Τίτου Ἰούστου in Acts xviii. 7 is too precarious for any inference to be drawn from it. Wieseler indeed lays some slight stress upon it (*Chronol. des Apost. Zeit.* Gött. 1848, p. 204), but this is in connection with a theory which needs every help. As to a recent hypothesis, that Titus and Timothy were the same person (R. King, *Who was St. Titus?* Dublin, 1853), it is certainly ingenious, but quite untenable.

Taking the passages in the epistles in the chronological order of the events referred to, we turn first to Gal. ii. 1, 3. We conceive the journey mentioned here to be identical with that (recorded in Acts xv.) in which Paul and Barnabas went from Antioch to Jerusalem to the conference which was to decide the question of the necessity of circumcision to the Gentiles. Here we see Titus in close association with Paul and Barnabas at Antioch.[a] He goes with them to Jerusalem. He is in fact one of the τινες ἄλλοι of Acts xv. 2, who were deputed to accompany them from Antioch. His circumcision was either not insisted on at Jerusalem, or, if demanded, was firmly resisted (οὐκ ἠναγκάσθη περιτμηθῆναι). He is very emphatically spoken of as a Gentile (Ἕλλην), by which is most probably meant that both his parents were Gentiles. Here is a double contrast from Timothy, who was circumcised by St. Paul's own directions, and one of whose parents was Jewish (Acts xvi. 1, 3; 2 Tim. i. 5, iii. 15). Titus would seem, on the occasion of the council, to have been specially a representative of the church of the uncircumcision.

It is to our purpose to remark that, in the passage cited above, Titus is so mentioned as apparently to imply that he had become personally known to the Galatian Christians. This, again, we combine with two other circumstances, namely, that the Epistle to the Galatians and the Second Epistle to the Corinthians were probably written within a few months of each other [GALATIANS, EPISTLE TO], and both during the same journey. From the latter of these two epistles we obtain fuller notices of Titus in connection with St. Paul.

After leaving Galatia (Acts xviii. 23), and spending a long time at Ephesus (Acts xix. 1–xx. 1), the Apostle proceeded to Macedonia by way of Troas. Here he expected to meet Titus (2 Cor. ii. 13), who had been sent on a mission to Corinth. In this hope he was disappointed [TROAS], but in Macedonia Titus joined him (2 Cor. vii. 6, 7, 13–15). Here we begin to see not only the above-mentioned fact of the mission of this disciple to Corinth, and the strong personal affection which subsisted between him and St. Paul (ἐν τῇ παρουσίᾳ αὐτοῦ, vii. 7), but also some part of the purport of the mission itself. It had reference to the immoralities at Corinth rebuked in the first epistle, and to the effect of that first epistle on the offending church. We learn further that the mission was so far one

[a] His birthplace may have been here; but this is quite uncertain. The name, which is Roman, proves nothing

zealful and satisfactory: ἀναγγέλλων τὴν ὑμῶν ἐπιπόθησιν (vii. 7), ἐλυπήθητε εἰς μετάνοιαν (vii. 9), τ�ην πάντων ὑμῶν ὑπακοήν (vii. 15); and we are enabled also to draw from the chapter a strong conclusion regarding the warm zeal and sympathy of Titus, his grief for what was evil, his rejoicing over what was good: τῇ παρακλήσει ᾗ παρεκλήθη ἐφ' ὑμῖν (vii. 7); ἀναπέπαυται τὸ πνεῦμα αὐτοῦ ἀπὸ πάντων ὑμῶν (vii. 13); τὰ σπλάγχνα αὐτοῦ περισσοτέρως εἰς ὑμᾶς ἐστιν (vii. 15). But if we proceed further, we discern another part of the mission with which he was entrusted. This had reference to the collection, at that time in progress, for the poor Christians of Judæa (καθὼς προενήρξατο, viii. 6), a phrase which shows that he had been active and zealous in the matter, while the Corinthians themselves seem to have been rather remiss. This connection of his mission with the gathering of these charitable funds is also proved by another passage, which contains moreover an implied assertion of his integrity in the business (μή τι ἐπλεονέκτησεν ὑμᾶς Τίτος; xii. 18), and a statement that St. Paul himself had sent him on the errand (παρεκάλεσα Τίτον, *ibid.*). Thus we are prepared for what the Apostle now proceeds to do after his encouraging conversations with Titus regarding the Corinthian Church. He sends him back from Macedonia to Corinth, in company with two other trustworthy Christians [TROPHIMUS, TYCHICUS], bearing the second epistle, and with an earnest request (παρακαλέσαι, viii. 6, τὴν παράκλησιν, viii. 17) that he would see to the completion of the collection, which he had zealously promoted on his late visit (ἵνα καθὼς προενήρξατο, οὕτως καὶ ἐπιτελέσῃ, viii. 6), Titus himself being in nowise backward in undertaking the commission. On a review of all these passages, elucidating as they do the characteristics of the man, the duties he discharged, and his close and faithful coöperation with St. Paul, we see how much meaning there is in the Apostle's short and forcible description of him (εἴτε ὑπὲρ Τίτου, κοινωνὸς ἐμὸς καὶ εἰς ὑμᾶς συνεργός, viii. 23).

All that has preceded is drawn from direct statements in the epistles; but by indirect though fair inference we can arrive at something further, which gives coherence to the rest, with additional elucidations of the close connection of Titus with St. Paul and the Corinthian Church. It has generally been considered doubtful who the ἀδελφοί were (1 Cor. xvi. 11, 12) that took the first epistle to Corinth. Timothy, who had been recently sent thither from Ephesus (Acts xix. 22), could not have been one of them (ἐὰν ἔλθῃ Τιμ. 1 Cor. xvi. 10), and Apollos declined the commission (1 Cor. xvi. 12). There can be little doubt that the messengers who took that first letter were Titus and his companion, whoever that might be, who is mentioned with him in the second letter (παρεκάλεσα Τίτον, καὶ συναπέστειλα τὸν ἀδελφόν, 2 Cor. xii. 18). This view was held by Macknight, and very clearly set forth by him (*Transl. of the Apostolical Epistles, with Comm.* Edinb. 1829, vol. i. pp. 451, 674, vol. ii. pp. 2, 7, 124). It has been more recently given by Professor Stanley (*Corinthians*, 2d ed. pp. 348, 392),[a] but it has been worked out by no one so elaborately as by Professor Lightfoot (*Camb. Journal of Classical and Sacred Philology*, ii. 201, 202). As to the connection between the two contemporaneous missions of Titus and Timotheus, this observation may be made here, that the difference of the two errands may have had some connection with a difference in the characters of the two agents. If Titus was the firmer and more energetic of the two men, it was natural to give him the task of enforcing the Apostle's rebukes, and urging on the flagging business of the collection.

A considerable interval now elapses before we come upon the next notices of this disciple. St. Paul's first imprisonment is concluded, and his last trial is impending. In the interval between the two, he and Titus were together in Crete (ἀπέλιπόν σε ἐν Κρήτῃ, Tit. i. 5). We see Titus remaining in the island when St. Paul left it, and receiving there a letter written to him by the Apostle. From this letter we gather the following biographical details: In the first place we learn that he was originally converted through St. Paul's instrumentality: this must be the meaning of the phrase γνήσιον τέκνον, which occurs so emphatically in the opening of the epistle (i. 4). Next we learn the various particulars of the responsible duties which he had to discharge in Crete. He is to complete what St. Paul had been obliged to leave unfinished (ἵνα τὰ λείποντα ἐπιδιορθώσῃ, i. 5), and he is to organize the church throughout the island by appointing presbyters in every city [GORTYNA; LASEA]. Instructions are given as to the suitable character of such presbyters (vv. 6–9); and we learn further that we have here the repetition of instructions previously furnished by word of mouth (ὡς ἐγώ σοι διεταξάμην, ver. 5). Next he is to control and bridle (ἐπιστομίζειν, ver. 11) the restless and mischievous Judaizers, and he is to be peremptory in so doing (ἔλεγχε αὐτοὺς ἀποτόμως, ver. 13). Injunctions in the same spirit are reiterated (ii. 1, 15, iii. 8). He is to urge the duties of a decorous and Christian life upon the women (ii. 3–5), some of whom (πρεσβύτιδας, ii. 3) possibly had something of an official character (καλοδιδασκάλους, ἵνα σωφρονίζωσι τὰς νέας, vv. 3, 4). He is to be watchful over his own conduct (ver. 7); he is to impress upon the slaves the peculiar duties of their position (ii. 9, 10); he is to check all social and political turbulence (iii. 1), and also all wild theological speculations (iii. 9); and to exercise discipline on the heretical (iii. 10). When we consider all these particulars of his duties, we see not only the confidence reposed in him by the Apostle, but the need there was of determination and strength of purpose, and therefore the probability that this was his character; and all this is enhanced if we bear in mind his isolated and unsupported position in Crete, and the lawless and immoral character of the Cretans themselves, as testified by their own writers (i 12, 13). [CRETE.]

The notices which remain are more strictly personal. Titus is to look for the arrival in Crete of Artemas and Tychicus (iii. 12), and then he is to hasten (σπούδασον) to join St. Paul at Nicopolis, where the Apostle is proposing to pass the winter (*ibid.*). Zenas and Apollos are in Crete, or expected there; for Titus is to send them on their journey, and supply them with whatever they need for it (iii. 13). It is observable that Titus and Apollos are brought into juxtaposition here, as they were

[a] There is some danger of confusing *Titus and the brother* (2 Cor. xii. 18), i. e. *the brethren* of 1 Cor. xvi. 11, 12, who (according to this view) took the first letter, with *Titus and the brethren* (2 Cor. viii. 16–24) who took the second letter.

Digitized by Google

before in the discussion of the mission from Ephesus to Corinth.

The movements of St. Paul, with which these later instructions to Titus are connected, are considered elsewhere. [PAUL; TIMOTHY.] We need only observe here that there would be great difficulty in inserting the visits to Crete and Nicopolis in any of the journeys recorded in the Acts, to say nothing of the other objections to giving the epistle any date anterior to the voyage to Rome. [TITUS, EPISTLE TO.] On the other hand, there is no difficulty in arranging these circumstances, if we suppose St. Paul to have travelled and written after being liberated from Rome, while thus we gain the further advantage of an explanation of what Paley has well called the affinity of this epistle and the first to Timothy. Whether Titus did join the Apostle at Nicopolis we cannot tell. But we naturally connect the mention of this place with what St. Paul wrote at no great interval of time afterwards, in the last of the pastoral epistles (Τίτος εἰς Δαλματίαν, 2 Tim. iv. 10); for Dalmatia lay to the north of Nicopolis, at no great distance from it. [NICOPOLIS.] From the form of the whole sentence, it seems probable that this disciple had been with St. Paul in Rome during his final imprisonment; but this cannot be asserted confidently. The touching words of the Apostle in this passage might seem to imply some reproach, and we might draw from them the conclusion that Titus became a second Demas: but on the whole this seems a harsh and unnecessary judgment.

Whatever else remains is legendary, though it may contain elements of truth. Titus is connected by tradition with Dalmatia, and he is said to have been an object of much reverence in that region. This, however, may simply be a result of the passage quoted immediately above: and it is observable that of all the churches in modern Dalmatia (Neale's *Ecclesiological Notes on Dalm.* p. 175) not one is dedicated to him. The traditional connection of Titus with Crete is much more specific and constant, though here again we cannot be certain of the facts. He is said to have been permanent bishop in the island, and to have died there at an advanced age. The modern capital, *Candia*, appears to claim the honor of being his burial-place (Cave's *Apostolici*, 1716, p. 42). In the fragment, *De Vitâ et Actis Titi*, by the lawyer Zenas (Fabric. *Cod. Apoc. N. T.* ii. 831, 832), Titus is called Bishop of Gortyna: and on the old site of Gortyna is a ruined church, of ancient and solid masonry, which bears the name of St. Titus, and where service is occasionally celebrated by priests from the neighboring hamlet of *Metropolis* (E. Falkener, *Remains in Crete, from a MS. History of Candia by Onorio Belli*, p. 23). The cathedral of *Megalo-Castron*, in the north of the island, is also dedicated to this saint. Lastly, the name of Titus was the watchword of the Cretans when they were invaded by the Venetians: and the Venetians themselves, after their conquest of the island, adopted him to some of the honors of a patron saint; for, as the response after the prayer for the Doge of Venice was "Sancte Marce, tu nos adjuva," so the response after that for the Duke of Candia was "Sancte Tite, tu nos adjuva" (Pashley's *Travels in Crete*, i. 6, 175).[a]

[a] The day on which Titus is commemorated is January 4 in the Latin Calendar, and August 25 in the Greek.

We must not leave unnoticed the striking, though extravagant, panegyric of Titus by his successor in the see of Crete, Andreas Cretensis (published, with Amphilochius and Methodius, by Combefis, Paris, 1644). This panegyric has many excellent points: *e. g.* it incorporates well the more important passages from the Second Epistle to the Corinthians. The following are stated as facts. Titus is related to the Proconsul of the island: among his ancestors are Minos and Rhadamanthus (*οἱ ἐκ Διός*). Early in life he obtains a copy of the Jewish Scriptures, and learns Hebrew in a short time. He goes to Judæa, and is present on the occasion mentioned in Acts i. 15. His conversion takes place before that of St. Paul himself, but afterwards he attaches himself closely to the Apostle. Whatever the value of these statements may be, the following description of Titus (p. 156) is worthy of quotation: *ὁ πρῶτος τῆς Κρήτων ἐκκλησίας θεμέλιος· τῆς ἀληθείας ὁ στῦλος· τὸ τῆς πίστεως ἔρεισμα· τῶν εὐαγγελικῶν κηρυγμάτων ἡ ἀσίγητος σάλπιγξ· τὸ ὄφηλον τῆς Παύλου γλώττης ἀκήχεμα.*

J. S. H.

TITUS, EPISTLE TO. There are no specialties in this epistle which require any very elaborate treatment distinct from the other Pastoral Letters of St. Paul. [TIMOTHY, EPISTLES TO.] If those two were not genuine, it would be difficult confidently to maintain the genuineness of this. On the other hand, if the epistles to Timothy are received as St. Paul's, there is not the slightest reason for doubting the authorship of that to Titus. Amidst the various combinations which are found among those who have been skeptical on the subject of the pastoral epistles, there is no instance of the rejection of that before us on the part of those who have accepted the other two. So far indeed as these doubts are worth considering at all, the argument is more in favor of this than of either of those. Tatian accepted the Epistle to Titus, and rejected the other two. Origen mentions some who excluded 2 Tim., but kept 1 Tim. with Titus. Schleiermacher and Neander invert this process of doubt in regard to the letters addressed to Timothy, but believe that St. Paul wrote the present letter to Titus. Credner too believes it to be genuine, though he pronounces 1 Tim. to be a forgery, and 2 Tim. a compound of two epistles.

To turn now from opinions to direct external evidence, this epistle stands on quite as firm a ground as the others of the pastoral group, if not a firmer ground. Nothing can well be more explicit than the quotations in Irenæus, *C. Hæres.* i. 16, 3 (see Tit. iii. 10), Clem. Alex. *Strom.* i. 350 (see i. 12), Tertull. *De Præscr. Hær.* c. 6 (see iii. 10, 11), and the reference, also *Adv. Marc.* v. 21; to say nothing of earlier allusions in Justin Martyr, *Dial. c. Tryph.* 47 (see iii. 4), which can hardly be doubted, Theoph. *Ad Autol.* ii. p. 95 (see iii. 5), iii. 126 (see iii. 1), which are probable, and Clem. Rom. 1 *Cor.* 2 (see iii. 1), which is possible.

As to internal features, we may notice, in the first place, that the Epistle to Titus has all the characteristics of the other pastoral epistles. See, for instance, *πιστὸς ὁ λόγος* (iii. 8), *ὑγιαίνουσα διδασκαλία* (i. 9, ii. 1, comparing i. 13, ii. 8), *σωφρονεῖν, σώφρων, σωφρόνως* (i. 8, ii. 5, 6, 12), *σωτήριος, σωτήρ, σώζω* (i. 3, 4, ii. 10, 11, 13, iii. 4, 5, 6), *Ἰουδαϊκοὶ μῦθοι* (i. 14, comparing iii. 9), *ἀσεβὴς φάνεια* (ii. 13), *εὐσέβεια* (i. 1), *ἔλεος* (iii. 5; in i. 4 the word is doubtful). All this tends to show

Digitized by Google

that this letter was written about the same time and under similar circumstances with the other two But, on the other hand, this epistle has marks in its phraseology and style which assimilate it to the general body of the epistles of St. Paul. Such may fairly be reckoned the following: κηρύγματι ὃ ἐπιστεύθην ἐγώ (i. 3); the quotation from a heathen poet (i. 12); the use of ἀδόκιμος (i. 16); the "going off at a word" (σωτῆρος . . . . ἐπεφάνη γὰρ . . . . σωτήριος . . . . ii. 10, 11); and the modes in which the doctrines of the Atonement (ii. 13) and of Free Justification (iii. 5–7) come to the surface. As to any difficulty arising from supposed indications of advanced hierarchical arrangements, it is to be observed that in this epistle πρεσβύτερος and ἐπίσκοπος are used as synonymous (ἵνα καταστήσῃς πρεσβυτέρους . . . . δεῖ γὰρ τὸν ἐπίσκοπον. . . . i. 5, 7), just as they are in the address at Miletus about the year 58 A. D. (Acts xx. 17, 28). At the same time this epistle has features of its own, especially a certain tone of abruptness and severity, which probably arises partly out of the circumstances of the Cretan population [CRETE], partly out of the character of Titus himself. If all these things are put together, the phenomena are seen to be very unlike what would be presented by a forgery, to say nothing of the general overwhelming difficulty of imagining who could have been the writer of the pastoral epistles, if it were not St. Paul himself.

Concerning the contents of this epistle, something has already been said in the article on TITUS. No very exact subdivision is either necessary or possible. After the introductory salutation, which has marked peculiarities (i. 1–4), Titus is enjoined to appoint suitable presbyters in the Cretan Church, and specially such as shall be sound in doctrine and able to refute error (5–9). The Apostle then passes to a description of the coarse character of the Cretans, as testified by their own writers, and the mischief caused by Judaizing error among the Christians of the island (10–16). In opposition to this, Titus is to urge sound and practical Christianity on all classes (ii. 1–10), on the older men (ii. 2), on the older women, and especially in regard to their influence over the younger women (3–5), on the younger men (6–8), on slaves (9, 10), taking heed meanwhile that he himself is a pattern of good works (ver. 7). The grounds of all this are given in the free grace which trains the Christian to self-denying and active piety (11, 12), in the glorious hope of Christ's second advent (ver. 13), and in the atonement by which He has purchased us to be his people (ver. 14). All which lessons Titus is to urge with fearless decision (ver. 15). Next, obedience to rulers is enjoined, with gentleness and forbearance towards all men (iii. 1, 2), these duties being again rested on our sense of past sin (ver. 3), and on the gift of new spiritual life and free justification (4–7). With these practical duties are contrasted those idle speculations which are to be carefully avoided (8, 9); and with regard to those men who are positively heretical, a peremptory charge is given (10, 11). Some personal allusions then follow: Artemas or Tychicus may be expected at Crete, and on the arrival of either of them Titus is to hasten to join the Apostle at Nicopolis, where he intends to winter; Zenas the lawyer also, and Apollos, are to be provided with all that is necessary for a journey in prospect (12, 13). Finally, before the concluding messages of salutation, an admonition is given to the Cretan Christians, that they give heed to the duties of practical, useful piety (14, 15).

As to the time and place and other circumstances of the writing of this epistle, the following scheme of filling up St. Paul's movements after his first imprisonment will satisfy all the conditions of the case: We may suppose him (possibly after accomplishing his long-projected visit to Spain) to have gone to Ephesus, and taken voyages from thence, first to Macedonia and then to Crete, during the former to have written the First Epistle to Timothy, and after returning from the latter to have written the Epistle to Titus, being at the time of despatching it on the point of starting for Nicopolis, in which place he went, taking Miletus and Corinth on the way. At Nicopolis we may conceive him to have been finally apprehended and taken to Rome, whence he wrote the Second Epistle to Timothy. Other possible combinations may be seen in Birks (*Horæ Apostolicæ*, at the end of his edition of the *Horæ Paulinæ*, pp. 299–301), and in Wordsworth (*Greek Testament*, Pt. iii. pp. 418, 421). It is an undoubted mistake to endeavor to insert this epistle in any period of that part of St. Paul's life which is recorded in the Acts of the Apostles. There is in this writing that unmistakable difference of style (as compared with the earlier epistles) which associates the Pastoral Letters with one another, and with the latest period of St. Paul's life; and it seems strange that this should have been so slightly observed by good scholars and exact chronologists, *e. g.* Archdn. Evans (*Script. Biog.* iii. 327–333), and Wieseler (*Chronol. des Apost. Zeitalt.* pp. 329–355), who, approaching the subject in very different ways, agree in thinking that this letter was written at Ephesus (between 1 and 2 Cor.), when the Apostle was in the early part of his third missionary journey (Acts xix.).

The following list of commentaries on the Pastoral Epistles may be useful for 1 and 2 Tim., as well as for Titus. Besides the general Patristic commentaries on all St. Paul's epistles (Chrysostom, Theodoret, Theophylact, Jerome, Bede, Alcuin), the Mediæval (Œcumenius, Euthymius, Aquinas), those of the Reformation period (Luther, Melancthon, Calvin), the earlier Roman Catholic (Justiniani, Cornelius à Lapide, Estius), the Protestant commentaries of the 17th century (Coccius, Grotius, etc.), and the recent annotations on the whole Greek Testament (Rosenmüller, De Wette, Alford, Wordsworth, etc.), the following on the Pastoral Epistles may be specified: Daillé, *Exposition* (1 *Tim.* Genev. 1661, 2 *Tim.* Genev. 1659, *Tit.* Par. 1655); Heydenreich, *Die Pastoralbriefe Pauli erläutert* (Hadam. 1826, 1828); Flatt, *Vorlesungen über die Br. P. an Tim. u. Tit.* (Tüb. 1831); Mack (Roman Catholic), *Comm. über die Pastoralbriefe* (Tüb. 1836); Matthies, *Erklärung der Pastoralbriefe* (Greifsw. 1840); Huther (part [xi.] of Meyer's Commentary, Gött. 1850 [3e Aufl. 1866]); Wiesinger (in continuation of Olshausen, Koenigsb. 1850), translated (with the exception of 2 Tim.) in Clark's *Foreign Theolog. Lib.* (Edinb. 1851 [the whole is translated in vol. vi. of the Amer. ed. of Olshausen, N. Y. 1858]), and especially Ellicott (*Pastoral Epistles*, 2d ed., London, 1861), who mentions in his preface a Danish commentary by Bp. Möller, and one in modern Greek, Συνέκδημος Ἱεραρικός, by Coray (Par. 1831) Besides these, there are commentaries on 1 Tim. and 2 Tim. by Mosheim (Hamb. 1755), and Lor

Digitized by Google

(Lips. 1837, 1850), on 1 Tim. by Fleischmann (Tüb. 1791), and Wegscheider (Gött. 1810), on 2 Tim. by J. Barlow and T. Hall (Lond. 1632 and 1658), and by Brüchner (Hafn. 1829), on Tit. by T. Taylor (London, 1668), Van Haven (Hal. 1742), and Kuinoel (*Comment. Theol.* ed. Velthusen, Ruperti et Kuinoel [i. p. 292 ff.]). To these must be added what is found in the *Critici Sacri*, *Supp.* ii., v., vii., and a still fuller list is given in Darling's *Cyclopædia Bibliographica*; Pt. ii. Subjects, pp. 1535, 1555, 1574. J. S. H.

* The earlier literature of the controversy on the genuineness of the Pastoral Epistles is referred to in the art. TIMOTHY, EPISTLES TO. Among the more recent essays on the subject we may name the following: C. E. Scharling, *Die neuesten Untersuchungen üb. die sogenannten Pastoralbriefe, aus dem Dänischen*, Jena, 1846 (undecided). Th. Rudow, *De Argumentis historicis, quibus recenter Epistolarum Past. Origo Paulina impugnata est*, a prize essay, Gotting. 1852 (rejects 1 Tim., with Lücke and Bleek, but defends 2 Tim. and Titus). W. Mangold, *Die Irrlehrer der Pastoralbriefe*, Marb. 1856. C. W. Otto, *Die geschichtlichen Verhältnisse der Pastoralbriefe aufs Neue untersucht*, Leips. 1860, pp. xvi., 408 (defends the genuineness of the epistles, but weakens the argument by denying the Apostle's release from his first imprisonment); comp. the review by Weiss, *Theol. Stud. u. Krit.*, 1861, pp. 575–597, and Huther's criticisms in the 3d ed. of his *Krit. exeg. Handbuch* (1866). L. Ruffet, *Saint Paul, sa double captivité à Rome*, Paris, 1860. Reuss, *Gesch. d. heil. Schriften N. T.* (4e Ausg. 1864), pp. 76 ff., 112 ff. (defends the genuineness). Wieseler, art. *Timotheus u. Titus, die Briefe Pauli an*, in Herzog's *Real-Encykl.* xxi. 276–342 (1866). Holtzmann, in Bunsen's *Bibelwerk*, viii. 486–512 (1866), reviewing the recent literature. Laurent, *Neutest. Studien* (1866), p. 104 ff., chiefly on the point of Paul's release from his first imprisonment, which he maintains; so Ewald, *Geschichte*, vi. 620 f., 3e Ausg. It may be noted here that recent examinations of the Alexandrine MS. show that the reading ἐπὶ τὸ τέρμα τῆς δύσεως in the Epist. of Clement of Rome to the Corinthians (c. 5) is unquestionable. See on the passage Lightfoot's note, in his excellent edition of the epistle (1869). L. Möller, in the 3d ed. of the part of De Wette's *Kurzgef. exeg. Handbuch* (Bd. ii. Theil v.) which contains the Pastoral Epistles, observes that, though formerly holding a pretty firm conviction of their spuriousness, renewed study has satisfied him of the untenableness or altogether too subjective character of many of the objections to them, though he cannot yet feel that confidence in their genuineness which the recent commentators (Wiesinger, Huther, Oosterzee) express (*Pref.*, p. x.). Guericke, *Neutest. Isagogik*, 3e Aufl. (1868), pp. 350–390, defends the genuineness of these epistles, as in his earlier works. Davidson, *Introd. to the Study of the N. T.* (Lond. 1868), ii. 144–195, repeats the arguments of the Tübingen school against them.

To the list of commentaries on the Pastoral Epistles given above, we may add that of J. J. van Oosterzee, Theil xi. of Lange's *Bibelwerk* (2e Aufl. 1864), translated with additions by Dr. E. A. Washburn and Dr. E. Harwood, in vol. viii. of the Amer. ed. of Lange (N. Y. 1868). A.

**TI'ZITE, THE** (הַתִּרְעִי) [patr.]: Vat. and FA. ὁ Ιεασει; [Rom. Θεσσαι;] Alex. Θωσαι: *Thocaites*). The designation of Joha, the brother of Jediael and son of Shimri, one of the heroes of David's army named in the supplementary list of 1 Chr. xi. 45. It occurs nowhere else, and nothing is known of the place or family which it denotes. G.

**TO'AH** (תֹּחַ) [*inclined, lowly*, Ges.]: Θοού [Vat. Θεις;] Alex. Θοουε: *Thohu*). A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 34 [19]). The name as it now stands may be a fragment of "Nahath" (comp. vv. 26, 34).

**TOB-ADONI'JAH** (טוֹב אֲדֹנִיָּהוּ [*good is A.*]: Τωβαδονίας; [Vat. Τωβαδωβεια: Alex.[1] Τωβαδωνιαν, 2. m. -ια:] *Thobadonias*). One of the Levites sent by Jehoshaphat through the cities of Judah to teach the Law to the people (2 Chr xvii. 8).

**TOB, THE LAND OF** (אֶרֶץ טוֹב [*land of goodness, fruitful*]: γῆ Τώβ: *terra Tob*). The place in which Jephthah took refuge when expelled from home by his half-brother (Judg. xi. 3); and where he remained, at the head of a band of freebooters, till he was brought back by the sheikhs[a] of Gilead (ver. 5).

The narrative implies that the land of Tob was not far distant from Gilead: at the same time, from the nature of the case, it must have lain out towards the eastern deserts. It is undoubtedly mentioned again in 2 Sam. x. 6, 8, as one of the petty Aramite kingdoms or states which supported the Ammonites in their great conflict with David. In the Authorized Version the name is presented *literatim* as Ishtob, *i. e.* Man of Tob, meaning, according to a common Hebrew idiom, the "men of Tob." After an immense interval it appears again in the Maccabæan history (1 Macc. v. 13). Tob or Tobie was then the abode of a considerable colony of Jews, numbering at least a thousand males. In 2 Macc. xii. 17 its position is defined very exactly as at or near Charax, 750 stadia from the strong town Caspis, though, as the position of neither of these places is known, we are not thereby assisted in the recovery of Tob. [TOBIE; TUBIENI.]

Ptolemy (*Geogr.* v. 19) mentions a place called Θαῦβα as lying to the S. W. of Zobah, and therefore possibly to the E. or N. E. of the country of Ammon proper. In Stephanus of Byzantium and in Eckhel (*Doctr. Numm.* iii. 352), the names Tubai and Tabeni occur.

No identification of this ancient district with any modern one has yet been attempted. The name *Tell Dobbe* (Burckhardt, *Syria*, April 25), or, as it is given by the latest explorer of those regions, *Tell Dibbe* (Wetzstein, *Map*), attached to a ruined site at the south end of the *Lejà*, a few miles N. W. of *Kenòwat*, and also that of *ed-Dub*, some twelve hours east of the mountain *el-Kulcib*, are both suggestive of Tob. But nothing can be said, at present, as to their connection with it. G.

**TOBI'AH** (טוֹבִיָּה [*goodness of Jehovah*]. Τωβίας [Vat. Τωβεια], Τωβία: *Tobia*). 1. "The children of Tobiah" were a family who returned with Zerubbabel, but were unable to prove their connection with Israel (Ezr. ii. 60; Neh. vii. 62).

---

[a] The word is זְקֵנֵי, which exactly answers to *sheikhs*.

2. ([Neh. ii 19, FA. Τωβεια; iv. 3, FA.[1] Τωβις:] *Tobias.*) "Tobiah the slave, the Ammonite," played a conspicuous part in the rancorous opposition made by Sanballat the Moabite and his adherents to the rebuilding of Jerusalem. The two races of Moab and Ammon found in these men fit representatives of that hereditary hatred to the Israelites which began before the entrance into Canaan, and was not extinct when the Hebrews had ceased to exist as a nation. The horrible story of the origin of the Moabites and Ammonites, as it was told by the Hebrews, is an index of the feeling of repulsion which must have existed between these hostile families of men. In the dignified rebuke of Nehemiah it received its highest expression: "ye have no portion, nor right, nor memorial in Jerusalem" (Neh. ii. 20). But Tobiah, though a slave (Neh. ii. 10, 19), unless this is a title of opprobrium, and an Ammonite, found means to ally himself with a priestly family, and his son Johanan married the daughter of Meshullam the son of Berechiah (Neh. vi. 18). He himself was the son-in-law of Shechaniah the son of Arah (Neh. vi. 17), and these family relations created for him a strong faction among the Jews, and may have had something to do with the stern measures which Ezra found it necessary to take to repress the intermarriages with foreigners. Even a grandson of the high-priest Eliashib had married a daughter of Sanballat (Neh. xiii. 28). In xiii. 4 Eliashib is said to have been allied to Tobiah, which would imply a relationship of some kind between Tobiah and Sanballat, though its nature is not mentioned. The evil had spread so far that the leaders of the people were compelled to rouse their religious antipathies by reading from the Law of Moses the strong prohibition that the Ammonite and the Moabite should not come into the congregation of God for ever (Neh. xiii. 1). Ewald (*Gesch.* iv. 173) conjectures that Tobiah had been a page ("slave") at the Persian court, and, being in favor there, had been promoted to be satrap of the Ammonites. But it almost seems that against Tobiah there was a stronger feeling of animosity than against Sanballat, and that this animosity found expression in the epithet "the slave," which is attached to his name. It was Tobiah who gave venom to the pitying scorn of Sanballat (Neh. iv. 3), and provoked the bitter cry of Nehemiah (Neh. iv. 4, 5); it was Tobiah who kept up communications with the factious Jews, and who sent letters to put their leader in fear (Neh. vi. 17, 19): but his crowning act of insult was to take up his residence in the Temple in the chamber which Eliashib had prepared for him in defiance of the Mosaic statute. Nehemiah's patience could no longer contain itself, "therefore," he says, "I cast forth all the household stuff of Tobiah out of the chamber," and with this summary act Tobiah disappears from history (Neh. xiii. 7, 8). W. A. W.

TOBI'AS. The Greek form of the name TOBIAH or TOBIJAH. 1. (Τωβιας: *Thobias, Tobias.*) The son of Tobit, and central character in the book of that name. [TOBIT, BOOK OF.]

2. The father of Hyrcanus, apparently a man of great wealth and reputation at Jerusalem in the time of Seleucus Philopator (cir. B. C. 187). In the high-priestly schism which happened afterwards [MENELAUS], "the sons of Tobias" took a conspicuous part (Joseph. *Ant.* xii. 5, § 1). One of these, Joseph, who raised himself by intrigue to high favor with the Egyptian court, had a son named Hyrcanus (Joseph. *Ant.* xii. 4, § 2). It has been supposed that this is the Hyrcanus referred to in 2 Macc. iii. 11; and it is not impossible that, for some unknown reason (as in the case of the Maccabees), the whole family were called after their grandfather, to the exclusion of the father's name. On the other hand, the natural recurrence of names in successive generations makes it more probable that the Hyrcanus mentioned in Josephus was a nephew of the Hyrcanus in 2 Macc (Comp. Ewald, *Gesch. d. V. I.* iv. 309; Grimm, *ad Macc.* l. c.). B. F. W.

TOBIE, THE PLACES OF (*ἐν τοῖς Τουβίου* [Rom. Τωβιου]: *in locis Tubin:* Syr. *Tubin*). A district which in the time of the Maccabees was the seat of an extensive colony of Jews (1 Macc. v. 13). It is in all probability identical with the Land of Tob mentioned in the history of Jephthah. [See also TUBIENI.] G.

TOBIEL (טוֹבִיאֵל, *the goodness of God:* Τωβιήλ: *Thobiel, Tobiel*), the father of Tobit and grandfather of Tobias (1), Tob. i. 1. The name may be compared with Tabeel (Ταβεήλ). [TABEEL.] B. F. W.

TOBI'JAH (טוֹבִיָּהוּ [*goodness of Jehovah*]: Τωβιας; [Vat. Alex. omit:] *Thobias*). 1. One of the Levites sent by Jehoshaphat to teach the Law in the cities of Judah (2 Chr. xvii. 8).

2. (*οἱ χρήσ.μοι αὐτῆς: Tubias.*) One of the Captivity in the time of Zechariah, in whose presence the prophet was commanded to take crowns of silver and gold and put them on the head of Joshua the high-priest (Zech. vi. 10). In ver. 14 his name appears in the shortened form טוֹבִיָּה. Rosenmüller conjectures that he was one of a deputation who came up to Jerusalem, from the Jews who still remained in Babylon, with contributions of gold and silver for the Temple. But Maurer considers that the offerings were presented by Tobijah and his companions, because the crowns were commanded to be placed in the Temple as a memorial of their visit and generosity. W. A. W.

TOBIT (Τωβελθ, Τωβελτ, Τωβιτ: Vulg. *Tobias*; Vat. Lat. *Tvbi, Thvbi, Tobis*), the son of Tobiel (Τωβιήλ: *Thobiel, Tobiel*) and father of Tobias (Tob. i. 1, etc.). [TOBIT, BOOK OF.] The name appears to answer to טוֹבִי, which occurs frequently in later times (Fritzsche, *ad Tob.* i. 1), and not (as Welte, *Einl.* 65) to טוֹבִיָּה; yet in that case Τωβις, according to the analogy of Λευις (לֵוִי), would have been the more natural form. The etymology of the word is obscure. Ilgen translates it simply "my goodness;" Fritzsche, with greater probability, regards it as an abbreviation of טוֹבִיָּהוּ comparing Μελχι (Luke iii. 24, 28), חִזְקִי, etc. (*ad Tob.* l. c.). The form in the Vulgate is of no weight against the Old Latin, except so far as it shows the reading of the Chaldaic text which Jerome used, in which the identity of the names of the father and son is directly affirmed (i. 9, Vulg.). B. F. W.

TOBIT, BOOK OF. The book is called simply Tobit (Τωβιτ, Τωβειτ) in the old MSS. At a later time the opening words of the book, Βιβλος λογων Τωβιτ, were taken as a title. In

Digitized by Google

Latin MSS. it is styled *Tobia*, *Liber Thobiæ*, *Liber Tobiæ* (Sabatier, p. 706), *Tobit et Tobias*, *Liber utriusque Tobiæ* (Fritzsche, *Einl.* § 1).

1. *Text.* — The book exists at present in Greek, Latin, Syriac, and Hebrew texts, which differ more or less from one another in detail, but yet on the whole are so far alike that it is reasonable to suppose that all were derived from one written original, which was modified in the course of translation or transcription. The *Greek* text is found in two distinct recensions. The one is followed by the mass of the MSS. of the LXX., and gives the oldest text which remains. The other is only fragmentary, and manifestly a revision of the former. Of this, one piece (i. 1–ii. 2) is contained in the Cod. Sinaiticus (= Cod. Frid. Augustanus), and another in three later MSS. (44, 106, 107, Holmes and Parsons; vi. 9–xiii.; Fritzsche, *Exeg. Handb.* 71-110). The *Latin* texts are also of two kinds. The common (Vulgate) text is due to Jerome, who formed it by a very hasty revision of the old Latin version with the help of a Chaldee copy, which was translated into Hebrew for him by an assistant who was master of both languages. The treatment of the text in this recension is very arbitrary, as might be expected from the description which Jerome gives of the mode in which it was made (comp. *Præf. in Tob.* § 4); and it is of very little critical value, for it is impossible to distinguish accurately the different elements which are incorporated in it. The ante-Hieronymian (Vetus Latina) texts are far more valuable, though these present considerable variations among themselves, as generally happens, and represent the revised and not the original Greek text. Sabatier has given one text from these MSS. of the eighth century and also added various readings from another MS., formerly in the possession of Christina of Sweden, which contains a distinct version of a considerable part of the book, i.–vi. 12 (*Bibl. Lat.* ii. 706). A third text is found in the quotations of the *Speculum*, published by Mai, *Spicileg. Rom.* ix. 21–23. The *Hebrew* versions are of no great weight. One, which was published by P. Fagius (1542), after a Constantinopolitan edition of 1517, is closely moulded on the common Greek text without being a servile translation (Fritzsche, § 4). Another, published by S. Münster (1542, etc.), is based upon the revised text, but is extremely free, and is rather an adaptation than a version. Both these versions, with the Syriac, are reprinted in Walton's Polyglot, and are late Jewish works of uncertain date (Fritzsche, *l. c.* Ilgen, ch. xvii. ff.). The *Syriac* version is of a composite character. As far as ch. vii. 9 it is a close rendering of the common Greek text of the LXX., but from this point to the end it follows the revised text, a fact which is noticed in the margin of one of the MSS.

2. *Contents.* — The outline of the book is as follows. Tobit, a Jew of the tribe of Naphtali, who strictly observed the Law and remained faithful to the Temple-service at Jerusalem (i. 4–8), was carried captive to Assyria by Shalmaneser. While in captivity he exerted himself to relieve his countrymen, which his favorable position at court (ἀγοραστής, i. 13, "purveyor") enabled him to do, and at this time he was rich enough to lend ten talents of silver to a countryman, Gabael of Rages in Media. But when Sennacherib succeeded his father Salmaneser, the fortune of Tobit was changed. He was accused of burying the Jews whom the king had put to death, and was only able to save himself, his wife Anna, and his son Tobias, by flight. On the accession of Esarhaddon he was allowed to return to Nineveh, at the intercession of his nephew, Achiacharus, who occupied a high place in the king's household (i. 22); but his zeal for his countrymen brought him into a strange misfortune. As he lay one night in the court of his house, being unclean from having buried a Jew whom his son had found strangled in the market-place, sparrows "mated warm dung into his eyes," and he became blind. Being thus disabled, he was for a time supported by Achiacharus, and after his departure (read ἐτροφεύθη, ii. 10), by the labor of his wife. On one occasion he falsely accused her of stealing a kid which had been added to her wages, and in return she reproached him with the miserable issue of all his righteous deeds. Grieved by her taunts he prayed to God for help; and it happened that on the same day Sara, his kinswoman (vi. 10, 11), the only daughter of Raguel, also sought help from God against the reproaches of her father's household. For seven young men wedded to her had perished on their marriage night by the power of the evil spirit Asmodeus [ASMODEUS]; and she thought that she should "bring her father's old age with sorrow unto the grave" (iii. 10). So Raphael was sent to deliver both from their sorrow. In the mean time Tobit called to mind the money which he had lent to Gabael, and despatched Tobias, with many wise counsels, to reclaim it (iv.). On this Raphael (under the form of a kinsman, Azarias) offered himself as a guide to Tobias on his journey to Media, and they "went forth both, and *the young man's dog with them*," and Anna was comforted for the absence of her son (v.). When they reached the Tigris, Tobias was commanded by Raphael to take "the heart, and liver, and gall" of "a fish which leaped out of the river and would have devoured him," and instructed how to use the first two against Asmodeus, for Sara, Raphael said, was appointed to be his wife (vi.). So when they reached Ecbatana they were entertained by Raguel, and in accordance with the words of the angel, Sara was given to Tobias in marriage that night, and Asmodeus was "driven to the utmost parts of Egypt," where "the angel bound him" (vii., viii.). After this Raphael recovered the loan from Gabael (ix.), and Tobias then returned with Sara and half her father's goods to Nineve (x.). Tobit, informed by Anna of their son's approach, hastened to meet him. Tobias by the command of the angel applied the fish's gall to his father's eyes and restored his sight (x.). After this Raphael, addressing to both words of good counsel, revealed himself, and "they saw him no more" (xii.). On this Tobit expressed his gratitude in a fine psalm (xiii.); and he lived to see the long prosperity of his son (xiv. 1, 2). After his death Tobias, according to his instruction, returned to Ecbatana, and "before he died he heard of the destruction of Nineve," of which "Jonas the prophet spake" (xiv. 15, 4).

3. *Historical Character.* — The narrative which has been just sketched, seems to have been received without inquiry or dispute as historically true till the rise of free criticism at the Reformation. Lutner, while warmly praising the general teaching of the book (comp. § 6), yet expressed doubts as to its literal truth, and these doubts gradually gained a wide currency among Protestant writers. Bertholdt (*Einl.* § 579) has given a summary of alleged errors in detail (e. *g.* i. 1, 2, of *Naphthali*, compared with 2 K. xv. 29; vi. 9, Rages, said to have been founded by Sel. Nicator), but the question turns rather upon

Digitized by Google

the general complexion of the history than upon minute objections, which are often captious and rarely satisfactory (comp. Welte, *Einl.* pp. 84–94). This, however, is fatal to the supposition that the book could have been completed shortly after the fall of Nineveh (B. C. 606; Tob. xiv. 15), and written in the main some time before (Tob. xii. 20). The whole tone of the narrative bespeaks a later age; and above all, the doctrine of good and evil spirits is elaborated in a form which belongs to a period considerably posterior to the Babylonian Captivity (Asmodeus, iii. 8, vi. 14, viii. 3; Raphael, xii. 15). The incidents, again, are completely isolated, and there is no reference to them in any part of Scripture (the supposed parallels, Tob. iv. 15 (16) ‖ Matt. vii. 12; Tob. xiii. 16–18 ‖ Rev. xxi. 18, are mere general ideas), nor in Josephus or Philo. And though the extraordinary character of the details, as such, is no objection against the reality of the occurrences, yet it may be fairly urged that the character of the alleged miraculous events, when taken together, is alien from the general character of such events in the historical books of Scripture, while there is nothing exceptional in the circumstances of the persons as in the case of Daniel [DANIEL, vol. i. 543], which might serve to explain this difference. On all these grounds it may certainly be concluded that the narrative is not simply history, and it is superfluous to inquire how far it is based upon facts. It is quite possible that some real occurrences, preserved by tradition, furnished the basis of the narrative, but it does not follow by any means that the elimination of the extraordinary details will leave behind pure history (so Ilgen). As the book stands it is a distinctly didactic narrative. Its point lies in the moral lesson which it conveys, and not in the incidents. The incidents furnish lively pictures of the truth which the author wished to inculcate, but the lessons themselves are independent of them. Nor can any weight be laid on the minute exactness with which apparently unimportant details are described (*e. g.* the genealogy and dwelling-place of Tobit, i. 1, 2; the marriage festival, viii. 20, xi. 18, 19, quoted by Ilgen and Welte), as proving the reality of the events, for such particularity is characteristic of Eastern romance, and appears again in the book of Judith. The writer in composing his story necessarily observed the ordinary form of a historical narrative.

4. *Original Language and Revisions.* — In the absence of all direct evidence, considerable doubt has been felt as to the original language of the book. The superior clearness, simplicity, and accuracy of the LXX. text prove conclusively that this is nearer the original than any other text which is known, if it be not, as some have supposed (Jahn and Fritzsche doubtfully), the original itself. Indeed, the arguments which have been brought forward to show that it is a translation are far from conclusive. The supposed contradictions between different parts of the book, especially the change from the first (i.–iii. 6) to the third person (iii. 7–xiv.), from which Ilgen endeavored to prove that the narrative was made up of distinct Hebrew documents, carelessly put together, and afterwards rendered by one Greek translator, are easily explicable on other grounds; and the alleged mistranslations (iii. 6; iv. 19, etc.) depend rather on errors in interpreting the Greek text, than on errors in the text itself. The style, again, though harsh in parts, and far from the classical standard, is not more so than some books which were undoubtedly written in Greek (*e. g.* the Apocalypse); and there is little, if anything, in it which points certainly to the immediate influence of an Aramaic text. (i. 4, εἰς πάσας τὰς γενέας τοῦ αἰῶνος, comp. Eph. iii. 21; i. 22, ἐκ δευτέρας; iii. 15, ἵνα τί μοι ζῇν; v. 15, τίνα σοι ἔσομαι μισθὸν διδόναι; xiv. 3, προσέθετο φοβεῖσθαι, etc.) To this it may be added that Origen was not acquainted with any Hebrew original (*Ep. ad Afric.* 13); and the Chaldee copy which Jerome used, as far as its character can be ascertained, was evidently a later version of the story. On the other hand, there is no internal evidence against the supposition that the Greek text is a translation. Some difficulties appear to be removed by this supposition (*e. g.* ix. 6); and if the consideration of the date and place of the composition of the book favor this view, it may rightly be admitted. The Greek offers some peculiarities in vocabulary: i. 6, πρωτοκουρία, *i. e.* ἡ ἀπαρχὴ τῶν κουρῶν, Deut. xviii. 4; i. 7, ἀποπρατίζομαι; i. 21, ἐκλογιστία; ii. 3, στραγγαλόω, etc.: and in construction, xiii. 7, ἀγαλλιᾶσθαι τὴν μεγαλωσύνην; xii. 4, δικαιοῦσθαί τινι; vi. 19, προσάγειν τινί (intrans.); vi. 6, ἐγγίζειν ἐν, etc. But these furnish no argument on either side.

The various texts which remain have already been enumerated. Of these, three varieties may be distinguished: (1) the LXX.; (2) the revised Greek text, followed by the Old Latin in the main, and by the Syriac in part; and (3) the Vulgate Latin. The Hebrew versions have no critical value. (1.) The LXX. is followed by A. V., and has been already characterized as the standard to which the others are to be referred. (2.) The revised text, first brought distinctly into notice by Fritzsche (*Einl.* § 5), is based on the LXX. Greek, which is at one time extended, and then compressed, with a view to greater fullness and clearness. A few of the variations in the first chapter will indicate its character: Ver. 2, Θίσβης, add. ὀπίσω δυσμῶν ἡλίου ἐξ ἀριστερῶν Φογώρ; ver. 8, οἷς κατῴκει, given at length τοῖς ὀρφανοῖς καὶ ταῖς χήραις, κ. τ. λ.; ver. 18, ἐκ τῆς Ἰουδαίας, add. ἐν ἡμέραις τῆς κρίσεως ἧς ἐποίησεν ἐξ αὐτοῦ ὁ βασιλεὺς τοῦ οὐρανοῦ περὶ τῶν βλασφημιῶν ὧν ἐβλασφήμησεν; ver. 22, οἰνοχόος, ἀρχιοινοχόος. (3.) The Vulgate text was derived in part from a Chaldee copy which was translated by word of mouth into Hebrew for Jerome, who in turn dictated a Latin rendering to a secretary. (*Præf. in Tob.*: . . . . Exigitis ut librum Chaldæo sermone conscriptum ad Latinum stylum traham . . . . Fesi satis desiderio vestro, non tamen meo studio . . . . Et quia vicina est Chaldæorum lingua sermoni Hebraico, utriusque linguæ peritissimum loquacem reperiens *unius diei laborem arripui*, et quidquid ille mihi Hebraïcis verbis expressit, hoc ego, accito notario, sermonibus Latinis exposui.) It is evident that in this process Jerome made some use of the Old Latin version, which he follows almost verbally in a few places: iii. 3–6; iv. 6, 7, 11, 23, etc.; but the greater part of the version seems to be an independent work. On the whole, it is more concise than the Old Latin; but it contains interpolations and changes, many of which mark the asceticism of a late age: ii. 12–14 (parallel with Job); iii. 17–23 (expansion of iii. 14); vi. 17 ff. (expansion of vi. 18); ix. 11, 12; xii. 13 (et quia acceptus eras Deo, necesse fuit ut tentatio probaret te).

5. *Date and Place of Composition.* — The data for determining the age of the book and the place where it was compiled are scanty and consequently

Digitized by Google

very different opinions have been entertained on these points. Eichhorn (*Einl.* pp. 408 ff.) places the author after the time of Darius Hystaspis without fixing any further limit of age or country. Bertholdt, insisting (wrongly) on the supposed date of the foundation of Rages [RAGES], brings the book considerably later than Seleucus Nicator (cir. B. C. 250–200), and supposes that it was written by a Galilæan or Babylonian Jew, from the prominence given to those districts in the narrative (*Einl.* pp. 2499, 2500). De Wette leaves the date undetermined, but argues that the author was a native of Palestine (*Einl.* § 311). Ewald (*Geschichte*, iv. 233–238) fixes the composition in the far East, towards the close of the Persian period (cir. 350 B. C.). This last opinion is almost certainly correct. The superior and inferior limits of the date of the book seem to be defined with fair distinctness. On the one hand the detailed doctrine of evil spirits points clearly to some time after the Babylonian Captivity; and this date is definitely marked by the reference to a new Temple at Jerusalem, "not like the first" (Tob. xiv. 5; comp. Ezr. iii. 12). On the other hand, there is nothing to show that the Jews were threatened with any special danger when the narrative was written (as in Judith), and the manner in which Media is mentioned (xiv. 4) implies that the Persian monarchy was still strong. Thus its date will fall somewhere within the period between the close of the work of Nehemiah and the invasion of Alexander (cir. B. C. 430–334). The contents of the book furnish also some clew to the place where it was written. Not only is there an accurate knowledge of the scenes described (Ewald, p. 233), but the incidents have a local coloring. The continual reference to almsgiving and the burial of the dead, and the stress which is laid upon the right performance of worship at Jerusalem by those who are afar off (i. 4), can scarcely be due to an effort of imagination, but must rather have been occasioned by the immediate experience of the writer. This would suggest that he was living out of Palestine, in some Persian city, perhaps Babylon, where his countrymen were exposed to the capricious cruelty of heathen governors, and in danger of neglecting the Temple-service. Glimpses are also given of the presence of the Jews at court, not only in the history (Tob. i. 22), but also in direct counsel (xii. 7, *μυστήριον βασιλέως καλὸν κρύψαι*), which better suit such a position than any other (comp. xiii. 3). If these conjectures as to the date and place of writing be correct, it follows that we must assume the existence of a Hebrew or Chaldee original. And even if the date of the book be brought much lower, to the beginning of the second century B. C., which seems to be the latest possible limit, it is equally certain that it must have been written in some Aramaic dialect, as the Greek literature of Palestine belongs to a much later time; and the references to Jerusalem seem to show that the book could not have been composed in Egypt (i. 4, xiv. 5), an inference, indeed, which may be deduced from its general contents. As long as the book was held to be strict history it was supposed that it was written by the immediate actors, in accordance with the direction of the angel (xii. 20). The passages where Tobit speaks in the first person (i.–iii. 6, xiii.) were assigned to his authorship. The intervening chapters to Tobit or Tobias. The description of the close of the life of Tobit to Tobias (xiv. 1–11); and the concluding verses (xiv. 12–15) to one of his friends who survived him. If, however, the historical character of the narrative is set aside, there is no trace of the person of the author.

6. *History.* — The history of the book is in the main that of the LXX. version. While the contents of the LXX., as a whole, were received as canonical, the book of Tobit was necessarily included without further inquiry among the books of Holy Scripture. [CANON.] The peculiar merits of the book contributed also in no small degree to gain for it a wide and hearty reception. There appears to be a clear reference to it in the Latin version of the Epistle of Polycarp (c. 10, *elecmosyna de morte liberat*, Tob. iv. 10, xii. 9). In a scheme of the Ophites, if there be no corruption in the text, Tobias appears among the prophets (Iren. i. 30, 11). Clement of Alexandria (*Strom.* ii. 23, § 139, *τοῦτο βραχέως ἡ γραφὴ δεδήλωκεν εἰρηνεύσας*, Tob. iv. 16) and Origen practically use the book as canonical; but Origen distinctly notices that neither Tobit nor Judith were received by the Jews, and rests the authority of Tobit on the usage of the churches (*Ep. ad Afric.* 13, *Ἑβραῖοι τῷ Τωβίᾳ οὐ χρῶνται . . . . ἀλλ', ἐπεὶ χρῶνται τῷ Τωβίᾳ αἱ ἐκκλησίαι . . . . De Orat.* 1, § 14, *τῇ τοῦ Τωβὶτ βίβλῳ ἀντιλέγουσιν οἱ ἐκ περιτομῆς ὡς μὴ ἐν διαθήκῃ . . . .*). Even Athanasius when writing without any critical regard to the Canon quotes Tobit as Scripture (*Apol. c. Arian.* § 11, *ὡς γέγραπται*, Tob. xii. 7); but when he gives a formal list of the sacred books, he definitely excludes it from the Canon, and places it with other apocryphal books among the writings which were "to be read by those who were but just entering on Christian teaching, and desirous to be instructed in the rules of piety" (*Ep. Fest.* p. 1177, ed. Migne). In the Latin Church Tobit found a much more decided acceptance. Cyprian, Hilary, and Lucifer quote it as authoritative (Cypr. *De Orat. Dom.* 32; Hil Pict. *In Psalm.* cxxix. 7; yet comp. *Prol. in Ps* xv.; Lucif. *Pro Athan.* i. p. 871). Augustine includes it with the other apocrypha of the LXX. among "the books which the Christian Church received" (*De Doctr. Christ.* ii. 8),[a] and in this he was followed by the mass of the later Latin fathers [comp. CANON, vol. i. p. 364, &c.]. Ambrose in especial wrote an essay on Tobias, treating of the evils of usury, in which he speaks of the book as "prophetic" in the strongest terms (*De Tobiâ*, i. 1; comp. *Hexaëm.* vi. 4). Jerome however, followed by Ruffinus, maintained the purity of the Hebrew Canon of the O. T., and, as has been seen, treated it very summarily (for later authorities see CANON). In modern times the moral excellence of the book has been rated highly, except in the heat of controversy. Luther pronounced it, if only a fiction, yet "a truly beautiful, wholesome, and profitable fiction, the work of a gifted poet. . . . A book useful for Christian reading" (ap. Fritzsche, *Einl.* § 11). The same view is held also in the English Church. A passage from Tobit is quoted in the Second Book of Homilies as the teaching

[a] This is expressed still more distinctly in the *Speculum* (p. 1127, C., ed. Par. 1836): "Non sunt omittendi et hi [libri] quos quidem ante Salvatoris adventum constat esse conscriptos, sed eos non receptos a Judæis recipit tamen ejusdem Salvatoris ecclesia." The preface from which these words are taken is followed by quotations from Wisdom, Ecclesiasticus, and Tobit.

Digitized by Google

'of the Holy Ghost in Scripture" (Of Almsdeeds, i. p. 391, ed. Corrie); and the Prayer-book offers several indications of the same feeling of respect for the book. Three verses are retained among the sentences used at the Offertory (Tob. iv. 7–9); and the Preface to the Marriage Service contains a plain adaptation of Jerome's version of Tob. vi. 17 (Hi namque qui conjugium ita suscipiunt ut Deum a se et a sua mente excludant, et suæ libidini ita vacent, sicut equus et mulus quibus non est intellectus, habet potestatem dæmonium super eos). In the First Book of Edward VI. a reference to the blessing of Tobias and Sara by Raphael was retained in the same service from the old office in place of the present reference to Abraham and Sarah, and one of the opening clauses of the Litany, introduced from the Sarum Breviary, is a reproduction of the Vulgate version of Tob. iii. 3 (Ne vindictam sumas de peccatis meis, neque reminiscaris delicta mea vel parentum meorum).

7. *Religious Character.* — Few probably can read the book in the LXX. text without assenting heartily to the favorable judgment of Luther on its merits. Nowhere else is there preserved so complete and beautiful a picture of the domestic life of the Jews after the Return. There may be symptoms of a tendency to formal righteousness of works, but as yet the works are painted as springing from a living faith. The devotion due to Jerusalem is united with definite acts of charity (i. 6–8) and with the prospect of wider blessings (xiii. 11). The giving of alms is not a mere scattering of wealth, but a real service of love (i. 16, 17, ii. 1–7, iv. 7–11, 16), though at times the emphasis which is laid upon the duty is exaggerated (as it seems) from the special circumstances in which the writer was placed (xii. 9, xiv. 10). Of the special precepts one (iv. 15, ὃ *μισεῖς μηδενὶ ποιήσῃς*) contains the negative side of the golden rule of conduct (Matt. vii. 12), which in this partial form is found among the maxims of Confucius. But it is chiefly in the exquisite tenderness of the portraiture of domestic life that the book excels. The parting of Tobias and his mother, the consolation of Tobit (v. 17–22), the affection of Raguel (vii. 4–8), the anxious waiting of the parents (x. 1–7), the son's return (ix. 4, xi.), and even the unjust suspiciousness of the sorrow of Tobit and Anna (ii. 11–14) are painted with a simplicity worthy of the best times of the patriarchs.[a] Almost every family relation is touched upon with natural grace and affection: husband and wife, parent and child, kinsmen, near or distant, master and servant, are presented in the most varied action, and always with life-like power (ii. 13, 14, v. 17–22, vii. 16, viii. 4–8, x. 1–7, xi. 1–13, i. 22, ii. 10, vii. 3–8, v. 14, 15, xii. 1–5, &c.). Prayer hallows the whole conduct of life (iv. 19, vi. 17, viii. 5–8, &c.); and even in distress there is confidence that in the end all will be well (iv. 6, 14, 19), though there is no clear anticipation of a future personal existence (iii. 6). The most remarkable doctrinal feature in the book is the prominence given to the action of spirits, who, while they are conceived to be subject to the passions of men and material influences (Asmodeus), are yet not affected by bodily wants, and manifested only by their own will (Raphael, xii. 19). Powers of evil (*δαιμόνιον, πνεῦμα πονηρόν*, iii. 8, 17, vi. 7, 14, 17) are represented as gaining the means of injuring men by sin [ASMODEUS], while they are driven away and bound by the exercise of faith and prayer (viii. 2, 3). On the other hand Raphael comes among men as "the healer" (comp. Dillmann, *Das Buch Henoch*, c. 20), and by the mission of God (iii. 17, xii. 18), restores those whose good actions he has secretly watched (xii. 12, 13), and "the remembrance of whose prayers he has brought before the Holy One" (xii. 12). This ministry of intercession is elsewhere expressly recognised. Seven holy angels, of whom Raphael is one, are specially described as those "which present the prayers of the saints, and which go in and out before the glory of God" (xii. 15). It is characteristic of the same sense of the need of some being to interpose between God and man that singular prominence is given to the idea of "the glory of God," before which these archangels appear as priests in the holiest place (viii. 15, xii. 15); and in one passage "the angel of God" (v. 16, 21) occupies a position closely resembling that of the Word in the Targums and Philo (*De mut. nom.* § 13, &c.). Elsewhere blessing is rendered to "all the holy angels" (xi. 14, *εὐλογημένοι* as contrasted with *εὐλογητός*: comp. Luke i. 42), who are themselves united with "the elect" in the duty of praising God forever (viii. 15). This mention of "the elect" points to a second doctrinal feature of the book, which it shares with Baruch alone of the apocryphal writings, the firm belief in a glorious restoration of the Jewish people (xiv. 5, xiii. 9–18). But the restoration contemplated is national, and not the work of a universal Saviour. The Temple is described as "consecrated and built for all ages" (i. 4), the feasts are "an everlasting decree" (i. 6), and when it is restored "the streets of Jerusalem shall say . . . Blessed be God which hath extolled it for ever" (xiii. 18). In all there is not the slightest trace of the belief in a personal Messiah.

8. Comparisons have often been made between the book of Tobit and Job, but from the outline which has been given it is obvious that the resemblance is only superficial, though Tob. ii. 14 was probably suggested by Job ii. 9, 10, while the differences are such as to mark distinct periods. In Tobit the sorrows of those who are afflicted are laid at once in prayer before God, in perfect reliance on his final judgment, and then immediately relieved by Divine interposition. In Job the real conflict is in the soul of the sufferer, and his relief comes at length with humiliation and repentance (xlii. 6). The one book teaches by great thoughts; the other by clear maxims translated into touching incidents. The contrast of Tobit and Judith is still more instructive. These books present two pictures of Jewish life and feeling, broadly distinguished in all their details, and yet mutually illustrative. The one represents the exile prosperous and even powerful in a strange land, exposed to sudden dangers, cherishing his national ties, and looking with unshaken love to the Holy City, but still mainly occupied by the common duties of social life; the other portrays a time of reproach and peril, when national independence was threatened, and a righteous cause seemed to justify un-

[a] In this connection may be noticed the incident, which is without a parallel in Scripture, and seems more natural to the West than to the East, the companionship of the dog with Tobias (v. 16, xi. 4: comp. Ambr. *Hexaëm.* vi. 4, 17: "Mutæ species bestiæ sanctus Raphael, angelus Tobiæ juvenis . . . . ad relationem gratiæ erudiebat affectum").

Digitized by Google

scrupulous valor. The one gives the popular ideal of holiness of living, the other of courage in daring. The one reflects the current feeling at the close of the Persian rule, the other during the struggles for freedom.

9. The first complete edition of the book was by K. D. Ilgen (*Die Gesch. Tobi's . . . . mit . . . . einer Einleitung versehen*, Jen. 1800), which, in spite of serious defects due to the period at which it was published, contains the most full discussion of the contents. The edition of Fritzsche (*Exeget. Handb.* ii., Leipzig, 1853) is concise and scholar-like, but leaves some points without illustration. In England the book, like the rest of the Apocrypha, seems to have fallen into most undeserved neglect. B. F. W.

* *Additional Literature.* — Among the more recent works we may mention F. H. Reusch, *Das Buch Tobias übers. u. erklärt*, Freib. im Br., 1857; H. Sengelmann, *Das Buch Tobit erklärt*, Hamb. 1857; Hitzig, *Zur Krit. d. apokr. Bücher des A. Test.*, in Hilgenfeld's *Zeitschrift f. wiss. Theol.*, 1860, pp. 250–261; Hilgenfeld, in his *Zeitschrift*, 1862, pp. 181–198; Vaihinger, art. *Tobias, Buch des*, in Herzog's *Real-Encykl.* xvi. 180 ff. (1862); Ewald, *Gesch. d. Volkes Israel* (4e Ausg. 1864), iv. 269–274; Nöldeke, *Alttest. Lit.* (1868), pp. 101–109; and the *Introductions* to the O. T. by Keil (1859), p. 708 ff., De Wette (8e Ausg., bearb. von Schrader, 1869), p. 580 ff., and Davidson (Lond. 1863), iii. 366 ff. A.

**TO'CHEN** (הַכֹּן [*task, measure*]: Θοκκά; Alex. Θοχχαν: *Thochen*). A place mentioned (1 Chr. iv. 32 only) amongst the towns of Simeon. In the parallel list of Josh. (xix. 7) there is nothing corresponding to Tochen. The LXX., however, adds the name Thalcha between Remmon and Ether in the latter passage; and it is not impossible that this may be the remnant of a Tochen anciently existing in the Hebrew text, though it has been considered as an indication of Telem. G.

**TOGAR'MAH** (תּוֹגַרְמָה: Θοργαμά; [Alex. Θεργαμα; in 1 Chr. i. 6, Θορραμ; Vat. in Ez., Θαιργαμα, Θεργαμα:] *Thogorma*). A son of Gomer, and brother of Ashkenaz and Riphath (Gen. x. 3). It has been already shown that Togarmah, as a geographical term, is connected with Armenia,[a] and that the subsequent notices of the name (Ez. xxvii. 14, xxxviii. 6) accord with this view. [ARMENIA.] It remains for us to examine into the ethnology of the Armenians with a view to the position assigned to them in the Mosaic table. The most decisive statement respecting them in ancient literature is furnished by Herodotus, who says that they were Phrygian colonists, that they were armed in the Phrygian fashion, and were associated with the Phrygians under the same commander (Herod. vii. 73). The remark of Eudoxus (Steph. Byz. *s. v.* 'Αρμενία) that the Armenians resemble the Phrygians in many respects in language (*τῇ φωνῇ πολλὰ φρυγίζουσι*) tends in the same direction. It is hardly necessary to understand the statement of Herodotus as implying more than a common origin of the two peoples; for, looking at the general westward progress of the Japhetic races, and on the central position which Armenia held in regard to their movements, we should rather infer that Phrygia was colonized from Armenia, than *vice versâ*. The Phrygians were indeed reputed to have had their first settlements in Europe, and thence to have crossed into Asia (Herod. vii. 73), but this must be regarded as simply a retrograde movement of a section of the great Phrygian race in the direction of their original home. The period of this movement is fixed subsequently to the Trojan war (Strab. xiv. p. 680), whereas the Phrygians appear as an important race in Asia Minor at a far earlier period (Strab. vii. p. 321; Herod. vii. 8, 11). There can be little doubt but that they were once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the Ægæan. The Phrygian language is undoubtedly to be classed with the Indo-European family. The resemblance between words in the Phrygian and Greek tongues was noticed by the Greeks themselves (Plat. *Cratyl.* p. 410), and the inscriptions still existing in the former are decidedly Indo-European (Rawlinson's *Herod.* i. 666). The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but these may be accounted for partly by the physical character of the country, and partly by the large amount of foreign admixture that it has experienced. In spite of this, however, no hesitation is felt by philologists in placing Armenian among the Indo-European languages (Pott, *Etym. Forsch.* Introd. p. 32; Diefenbach, *Orig. Europ.* p. 43). With regard to the ancient inscriptions at Wan, some doubt exists; some of them, but apparently not the most ancient, are thought to bear a Turanian character (Layard's *Nin. and Bab.* p. 402; Rawlinson's *Herod.* i. 652); but, even were this fully established, it fails to prove the Turanian character of the population, inasmuch as they may have been set up by foreign conquerors. The Armenians themselves have associated the name of Togarmah with their early history in that they represent the founder of their race, Haik, as a son of Thorgom (Moses Choren. i. 4, §§ 9–11). W. L. B.

**TO'HU** (תֹּחוּ [perh. *inclined, lowly*]: Θοκέ; Alex. Θοου: *Thohu*). An ancestor of Samuel the prophet, perhaps the same as TOAH (1 Sam. i. 1; comp. 1 Chr. vi. 34).

**TO'I** (תֹּעִי [*error*]: Θοού; [Vat. once Θουου;] Alex. Θαει: *Thoü*). King of Hamath on the Orontes, who, after the defeat of his powerful enemy the Syrian king Hadadezer by the army of David, sent his son Joram, or Hadoram, to congratulate the victor and do him homage with presents of gold and silver and brass (2 Sam. viii. 9, 10). "For Hadadezer had wars with Toi," and Ewald (*Gesch.* iii. 199) conjectures that he may have even reduced him to a state of vassalage There was probably some policy in the conduct of Toi, and his object may have been, as Josephus says it was (*Ant.* vii. 5, § 4), to buy off the conqueror with the "vessels of ancient workmanship" (*σκεύη τῆς ἀρχαίας κατασκευῆς*) which he presented.

**TO'LA** (תּוֹלָע [*a worm*]: Θωλά; [Vat. Θω

---

[a] The name itself may possibly have reference to Armenia, for, according to Grimm (*Gesch. Deutsch. Spr.* ii. 836), Togarmah comes from the Sanskrit *tokas*, "tribe," and *Arma* = Armenia, which he further connects with Hermine the son of Manneus.

Θωλαεί, Θωλαεί:] *Thola*). 1. The first-born of Issachar, and ancestor of the Tolaites (Gen. xlvi. 13; Num. xxvi. 23; 1 Chr. vii. 1, 2), who in the time of David numbered 22,600 men of valor.

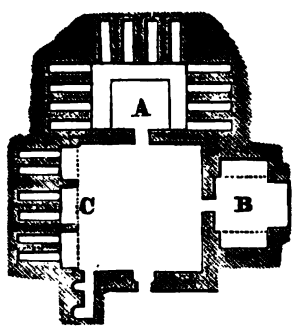
2. Judge of Israel after Abimelech (Judg. x. 1, 2). He is described as "the son of Puah, the son of Dodo, a man of Issachar." In the LXX. and Vulg. he is made the son of Abimelech's uncle, Dodo (דּוֹדוֹ) being considered an appellative. But Gideon, Abimelech's father, was a Manassite. Tola judged Israel for twenty-three years at Shamir in Mount Ephraim, where he died and was buried.

**TOLAD** (תּוֹלָד) [*birth, generation*]: [Vat.] Θωλαεμ; [Rom.] Alex. Θωλαδ: *Tholad*). One of the towns of Simeon (1 Chr. iv. 29), which was in the possession of the tribe up to David's reign, probably to the time of the census taken by Joab. In the lists of Joshua the name is given in the fuller form of EL-TOLAD. G.

**TOLAITES, THE** (הַתּוֹלָעִי [from TOLA]: ὁ Θωλαΐ [Vat. -εἰ]: *Tholaïta*). The descendants of Tola the son of Issachar (Num. xxvi. 23).

**TOLBANES** (Τολβάνης: *Tolbanes*). TELEM, one of the porters in the days of Ezra (1 Esdr. ix. 25).

* **TOLL.** [TAXES; TRIBUTE.]



**TOMB.** Although the sepulchral arrangements of the Jews have necessarily many points of contact with those of the surrounding nations, they are still on the whole — like everything else that people did — so essentially different, that it is most unsafe to attempt to elucidate them by appealing to the practice of other races.

It has been hitherto too much the fashion to look to Egypt for the prototype of every form of Jewish art; but if there is one thing in the Old Testament more clear than another, it is the absolute antagonism between the two peoples, and the abhorrence of everything Egyptian that prevailed from first to last among the Jewish people. From the burial of Sarah in the cave of Machpelah (Gen. xxiii. 19) to the funeral rites prepared for Dorcas (Acts ix. 37), there is no mention of any sarcophagus, or even coffin, in any Jewish burial. No pyramid was raised — no separate hypogeum of any individual king, and what is most to be regretted by modern investigators, no inscription or painting which either recorded the name of the deceased, or symbolized the religious feeling of the Jews towards the dead. It is true of course that Jacob, dying in Egypt, was embalmed (Gen. l. 2), but it was only in order that he might be brought to be entombed in the cave at Hebron, and Joseph, as a naturalized Egyptian and a ruler in the land, was embalmed; and it is also mentioned as something exceptional that he was put into a coffin, and was so brought by the Israelites out of the land, and laid with his forefathers. But these, like the burning of the body of Saul [see BURIAL], were clearly exceptional cases.

Still less were the rites of the Jews like those of the Pelasgi or Etruscans. With that people the graves of the dead were, or were intended to be, in every respect similar to the homes of the living. The lucumo lay in his robes, the warrior in his armor, on the bed on which he had reposed in life, surrounded by the furniture, the vessels, and the ornaments which had adorned his dwelling when alive, as if he were to live again in a new world with the same wants and feelings as before. Besides this, no tall stelé, and no sepulchral mound, has yet been found in the hills or plains of Judæa, nor have we any hint either in the Bible or Josephus of any such having existed which could be traced to a strictly Jewish origin.

In very distinct contrast to all this, the sepulchral rites of the Jews were marked with the same simplicity that characterized all their religious observances. The body was washed and anointed (Mark xiv. 8, xvi. 1; John xix. 39, &c.), wrapped in a clean linen cloth, and borne without any funeral pomp to the grave, where it was laid without any ceremonial or form of prayer. In addition to this, with kings and great persons, there seems to have been a "great burning" (2 Chr. xvi. 14, xxi. 19; Jer. xxxiv. 5): all these being measures more suggested by sanitary exigencies than by any hankering after ceremonial pomp.

This simplicity of rite led to what may be called the distinguishing characteristic of Jewish sepulchres — the *deep loculus* — which, so far as is now known, is universal in all purely Jewish rock-cut tombs, but hardly known elsewhere. Its form will be understood by referring to the annexed diagram, representing the forms of Jewish sepulture.

No. 1. — Diagram of Jewish Sepulchre.

In the apartment marked A, there are twelve such loculi, about 2 feet in width by 3 feet high. On the ground-floor these generally open on the level of the floor; when in the upper story, as at C, on a ledge or platform, on which the body might be laid to be anointed, and on which the stones might rest which closed the outer end of each loculus.

The shallow loculus is shown in chamber B, but was apparently only used when sarcophagi were employed, and therefore, so far as we know, only during the Græco-Roman period, when foreign customs came to be adopted. The shallow loculus would have been singularly inappropriate and inconvenient, where an unembalmed body was laid out to decay — as there would evidently be no means of shutting it off from the rest of the catacomb. The deep loculus on the other hand was as strictly conformable with Jewish customs, and could easily be closed by a stone fitted to the end and luted into the groove which usually exists there.

This fact is especially interesting as it affords a key to much that is otherwise hard to be understood in certain passages in the New Testament. Thus in John xi. 39, Jesus says, "Take away the

Digitized by Google

stone," and (ver. 41) "they took away the stone" without difficulty, apparently; which could hardly have been the case had it been such a rock as would be required to close the entrance of a cave. And ch. xx. 1, the same expression is used, "the stone is taken away;" and though the Greek word in the other three Evangelists certainly implies that it was *rolled* away, this would equally apply to the stone at the mouth of the loculus, into which the Maries must have then stooped down to look in. In fact the whole narrative is infinitely more clear and intelligible if we assume that it was a stone closing the end of a rock-cut grave, than if we suppose it to have been a stone closing the entrance or door of a hypogeum. In the latter case the stone to close a door — say 6 feet by 3 feet, could hardly have weighed less than 3 or 4 tons, and could not have been moved without machinery.

There is one catacomb — that known as the "Tombs of the Kings" — which is closed by a stone rolling across its entrance; but it is the only one, and the immense amount of contrivance and fitting which it has required is sufficient proof that such an arrangement was not applied to any other of the numerous rock-tombs around Jerusalem, nor could the traces of it have been obliterated had it anywhere existed. From the nature of the openings where they are natural caverns, and the ornamental form of their doorways where they are architecturally adorned, it is evident, except in this one instance, that they could not have been closed by stones rolled across their entrances; and consequently it seems only to be to the closing of the loculi that these expressions can refer. But until a more careful and more scientific exploration of these tombs is made than has hitherto been given to the public, it is difficult to feel quite certain on this point.

Although, therefore, the Jews were singularly free from the pomps and vanities of funereal magnificence, they were at all stages of their independent existence an eminently burying people.

From the time of their entrance into the Holy Land till their expulsion by the Romans, they seem to have attached the greatest importance to the possession of an undisturbed resting-place for the bodies of their dead, and in all ages seem to have shown the greatest respect, if not veneration, for the sepulchres of their ancestors. Few, however, could enjoy the luxury of a rock-cut tomb. Taking all that are known, and all that are likely to be discovered, there are not probably 500, certainly not 1000, rock-cut loculi in or about Jerusalem, and as that city must in the days of its prosperity have possessed a population of from 30,000 to 40,000 souls, it is evident that the bulk of the people must then, as now, have been content with graves dug in the earth; but situated as near the Holy Places as their means would allow their obtaining a place. The bodies of the kings were buried close to the Temple walls (Ez. xliii. 7–9), and however little they may have done in their life, the place of their burial is carefully recorded in the Chronicles of the Kings, and the cause why that place was chosen is generally pointed out, as if that record was not only the most important event, but the final judgment on the life of the king.

*Tombs of the Patriarchs.* — Turning from these considerations to the more strictly historical part of the subject, we find that one of the most striking events in the life of Abraham is the purchase of the field of Ephron the Hittite at Hebron, in which was the cave of Machpelah, in order that he might therein bury Sarah his wife, and that it might be a sepulchre for himself and his children. His refusing to accept the privilege of burying there as a gift when offered to him, shows the importance Abraham attached to the transaction, and his insisting on purchasing and paying for it (Gen. xxiii. 20), in order that it might be "made sure unto him for the possession of a burying-place." There he and his immediate descendants were laid 3,700 years ago, and there they are believed to rest now; but no one in modern times has seen their remains, or been allowed to enter into the cave where they rest.

A few years ago, Signor Pierotti says, he was allowed, in company with the Pasha of Jerusalem, to descend the steps to the iron grating that closes the entrance, and to look into the cave. What he seems to have seen was — that it was a natural cavern, untouched by the chisel and unaltered by art in any way. Those who accompanied the Prince of Wales in his visit to the Mosque were not permitted to see even this entrance. All they saw was the round hole in the floor of the Mosque which admits light and air to the cave below. The same round opening exists at *Neby Samwil* in the roof of the reputed sepulchre of the Prophet Samuel, and at Jerusalem there is a similar opening into the tomb under the Dome of the rock. In the former it is used by the pious votaries to drop petitions and prayers into the tombs of patriarchs and prophets. The latter having lost the tradition of its having been a burying-place, the opening only now serves to admit light into the cave below.

Unfortunately none of those who have visited Hebron have had sufficient architectural knowledge to be able to say when the church or mosque which now stands above the cave was erected; but there seems no great reason for doubting that it is a Byzantine church erected there between the age of Constantine and that of Justinian. From such indications as can be gathered, it seems of the later period. On its floor are sarcophagi purporting to be those of the patriarchs; but, as is usual in eastern tombs, they are only cenotaphs representing those that stand below, and which are esteemed too sacred for the vulgar to approach.

Though it is much more easy of access, it is almost as difficult to ascertain the age of the wall that incloses the sacred precincts of these tombs. From the account of Josephus (*B. J.* iv. 7), it does not seem to have existed in his day, or he surely would have mentioned it; and such a citadel could hardly fail to have been of warlike importance in those troublous times. Besides this, we do not know of any such inclosure encircling any tombs or sacred place in Jewish times, nor can we conceive any motive for so secluding these graves.

There are not any architectural mouldings about this wall which would enable an archæologist to approximate its date; and if the beveling is assumed to be a Jewish arrangement (which is very far from being exclusively the case), on the other hand it may be contended that no buttressed wall of Jewish masonry exists anywhere. There is in fact nothing known with sufficient exactness to decide the question, but the probabilities certainly tend towards a Christian or Saracenic origin for the whole structure both internally and externally.

Aaron died on the summit of Mount Hor (Num. xx. 28, xxxiii. 39), and we are led to infer he was

Digitized by Google

buried there, though it is not so stated; and we have no details of his tomb which would lead us to suppose that anything existed there earlier than the Mohammedan Kubr that now crowns the hill overlooking Petra, and it is at the same time extremely doubtful whether *that* is the Mount Hor where the high-priest died.

Moses died in the plains of Moab (Deut. xxxiv. 6), and was buried there, "but no man knoweth his sepulchre to this day," which is a singular utterance, as being the only instance in the Old Testament of a sepulchre being concealed, or of one being admitted to be unknown.

Joshua was buried in his own inheritance in Timnath-Serah (Josh. xxiv. 30), and Samuel in his own house at Ramah (1 Sam. xxv. 1), an expression which we may probably interpret as meaning in the garden attached to his house, as it is scarcely probable it would be the dwelling itself. We know, however, so little of the feelings of the Jews of that age on the subject that it is by no means improbable but that it may have been in a chamber or loculus attached to the dwelling, and which, if closed by a stone carefully cemented into its place, would have prevented any annoyance from the circumstance. Joab (1 K. ii. 34) was also buried "in his own house in the wilderness." In fact it appears that from the time when Abraham established the burying-place of his family at Hebron till the time when David fixed that of his family in the city which bore his name, the Jewish rulers had no fixed or favorite place of sepulture. Each was buried on his own property, or where he died, without much caring either for the sanctity or convenience of the place chosen.

*Tomb of the Kings.* — Of the twenty-two kings of Judah who reigned at Jerusalem from 1048 to 590 B. C., eleven, or exactly one half, were buried in one hypogeum in the "city of David." The names of the kings so lying together were David, Solomon, Rehoboam, Abijah, Asa, Jehoshaphat, Ahaziah, Amaziah, Jotham, Hezekiah, and Josiah, together with the good priest Jehoiada. Of all these it is merely said that they were buried in "the sepulchres of their fathers" or "of the kings" in the city of David, except of two — Asa and Hezekiah. Of the first it is said (2 Chr. xvi. 14), "they buried him in his own sepulchres which he had made for himself in the city of David, and laid him in the bed [loculus?], which was filled with sweet odors and divers spices prepared by the apothecaries' art, and they made a very great burning for him." It is not quite clear, however, from this, whether this applies to a new chamber attached to the older sepulchre, or to one entirely distinct, though in the same neighborhood. Of Hezekiah it is said (2 Chr. xxxii. 33), they buried him in "the chiefest [or highest] of the sepulchres of the sons of David," as if there were several apartments in the hypogeum, though it may merely be that they excavated for him a chamber above the others, as we find frequently done in Jewish sepulchres.

Two more of these kings (Jehoram and Joash) were buried also in the city of David, "but not in the sepulchres of the kings." The first because of the sore diseases of which he died (2 Chr. xxi. 20); the second apparently in consequence of his disastrous end (2 Chr. xxiv. 25); and one king, Uzziah (2 Chr. xxvi. 23), was buried with his fathers in the "field of the burial of the kings," because he was a leper. All this evinces the extreme care the Jews took in the selection of the burying-places of their kings, and the importance they attached to the record. It should also be borne in mind that the highest honor which could be bestowed on the good priest Jehoiada (2 Chr. xxiv. 16) was that "they buried him in the city of David among the kings, because he had done good in Israel, both toward God and toward his House."

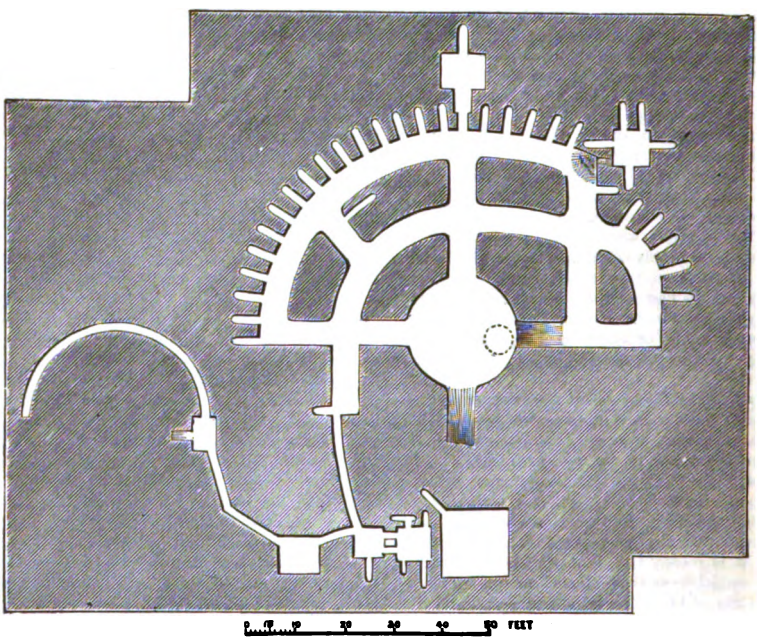
The passage in Neh. iii. 16, and in Ez. xliii. 7, 9, together with the reiterated assertion of the books of Kings and Chronicles that these sepulchres were situated in the city of David, leave no doubt but that they were on Zion [see JERUSALEM], or the Eastern Hill, and in the immediate proximity of the Temple. They were in fact certainly within that inclosure now known as the "Haram Area"; but if it is asked on what exact spot, we must pause for further information before a reply can be given.[a]

This area has been so altered by Roman, Christian, and Moslem, during the last eighteen centuries, that, till we can explore freely below the surface, much that is interesting must be hidden from us. It is quite clear, however, that the spot was well known during the whole of the Jewish period, inasmuch as the sepulchres were again and again opened as each king died; and from the tradition that Hyrcanus and Herod opened these sepulchres (*Ant.* xiii. 8, § 4; xvi. 7, § 1). The accounts of these last openings are, it must be confessed, somewhat apocryphal, resting only on the authority of Josephus; but they prove at least that he considered there could be no difficulty in finding the place. It is very improbable, however, from what we know of the extreme simplicity of the Jewish sepulchral rites, that any large sum should have been buried in David's tomb, and have escaped not only the Persian invaders, but their own necessitous rulers in the time of their extremest need. It is much more probable that Hyrcanus borrowed the treasure of the Temple, and invented this excuse; whereas the story of Herod's descent is so like that told more than 1,000 years afterward, by Benjamin of Tudela, that both may be classed in the same category. It was a secret transaction, if it took place, regarding which rumor might fashion what wondrous tales it pleased, and no one could contradict them; but his having built a marble stele (*Ant.* xvi. 7, § 1) in front of the tomb may have been a fact within the cognizance of Josephus, and would at all events serve to indicate that the sepulchre was rock-cut, and its site well known.

So far as we can judge from this and other indications, it seems probable there was originally a natural cavern in the rock in this locality, which may afterward have been improved by art, and in the sides of which loculi were sunk, in which the bodies of the eleven kings and of the good high-priest were laid, without sarcophagi or coffin, but "wound in linen clothes with the spices, as the manner of the Jews is to bury" (John xix. 40).

Besides the kings above enumerated, Manasseh was, according to the book of Chronicles (2 Chr. xxxiii. 20) buried in his own house, which the book of Kings (2 K. xxi. 18) explains as the "garden of his own house, the garden of Uzza," where his son Amon was buried, also, it is said, in his own sepulchre (ver. 26), but we have nothing that would enable us to indicate where this was; and Ahaz, the

---



a * See note at the end of this article, Amer. ed. S. W

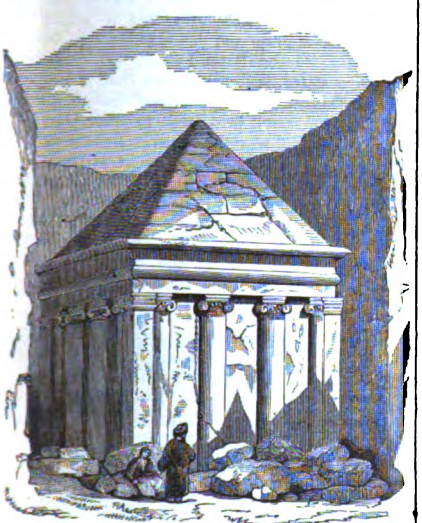
Digitized by Google

wicked king, was, according to the book of Chronicles (2 Chr. xxviii. 27) "buried in the city, even in Jerusalem, and they brought him not into the sepulchres of the kings of Israel." The fact of these three last kings having been idolaters, though one reformed, and their having all three been buried apparently in the city, proves what importance the Jews attached to the locality of the sepulchre, but also tends to show that burial within the city, or the inclosure of a dwelling, was not so repulsive to their feelings as is generally supposed. It is just possible that the rock-cut sepulchre under the western wall of the present Church of the Holy Sepulchre may be the remains of such a cemetery as that ... which the wicked kings were buried.

This, with many other cognate questions, must be relegated for further information; for up to the present time we have not been able to identify one single sepulchral excavation about Jerusalem which can be said with certainty to belong to a period anterior to that of the Maccabees, or, more correctly, to have been used for burial before the time of the Romans.

The only important hypogeum which is wholly Jewish in its arrangements, and may consequently belong to an earlier or to any epoch, is that known as the Tombs of the Prophets in the western flank of the Mount of Olives. It has every appearance of having originally been a natural cavern improved by art, and with an external gallery some 140 feet in

No. 2. — Plan of the "Tombs of the Prophets." From De Saulcy.



extent, into which twenty-seven deep or Jewish loculi open. Other chambers and loculi have been commenced in other parts, and in the passages there are places where many other graves could have been excavated, all which would tend to show that it had been disused before completed, and consequently was very modern; but be this as it may, it has no architectural mouldings — no sarcophagi or shallow loculi, nothing to indicate a foreign origin, and may therefore be considered, if not an early, at least as the most essentially Jewish of the sepulchral excavations in this locality — every other important sepulchral excavation being adorned with architectural features and details betraying most unmistakably their Greek or Roman origin, and fixing their date consequently as subsequent to that of the Maccabees; or in other words, like every other detail of pre-Christian architecture in Jerusalem, they belong to the 140 years that elapsed from the advent of Pompey till the destruction of the city by Titus.

*Græco-Roman Tombs.* — Besides the tombs above enumerated, there are around Jerusalem, in the valleys of Hinnom and Jehoshaphat, and on the plateau to the north, a number of remarkable rock-cut sepulchres, with more or less architectural decoration, sufficient to enable us to ascertain that they are all of nearly the same age, and to assert with very tolerable confidence that the epoch to which they belong must be between the introduction of Roman influence and the destruction of the city by Titus. The proof of this would be easy if it were not that, like everything Jewish, there is a remarkable absence of inscriptions which can be assumed to be integral. The excavations in the Valley of Hinnom with Greek inscriptions are comparatively modern, the inscriptions being all of Christian import and of such a nature as to render it extremely doubtful whether the chambers were sepulchral at all, and not rather the dwellings of ascetics, and originally intended to be used for this purpose. These, however, are neither the most important nor the most architectural — indeed none of those in that valley are so remarkable as those in the other localities just enumerated. The most important of those in the Valley of Hinnom is that known as the

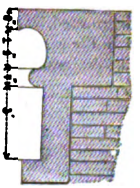
Digitized by Google

Retreat-place of the Apostles." It is an unfinished excavation of extremely late date, and many of the others look much more like the dwellings for the living than the resting-places of the dead.

In the village of Siloam there is a monolithic cell of singularly Egyptian aspect, which De Saulcy (*Voyage autour de la Mer Morte*, ii. 306) assumes to be a chapel of Solomon's Egyptian wife. It is probably of very much more modern date, and is more Assyrian than Egyptian in character; but as he is probably quite correct in stating that it is not sepulchral, it is only necessary to mention it here in order that it may not be confounded with those that are so. It is the more worthy of remark as one of the great difficulties of the subject arises from travellers too readily assuming that every cutting in the rock must be sepulchral. It may be so in Egypt, but it certainly was not so at Cyrene or Petra, where many of the excavations

No. 3. — So-called "Tomb of Zechariah."

were either temples or monastic establishments, and it certainly was not universally the case at Jerusalem, though our information is frequently too scanty to enable us always to discriminate exactly to which class the cutting in the rock may belong.



The principal remaining architectural sepulchres may be divided into three groups.

First, those existing in the Valley of Jehoshaphat, and known popularly as the Tombs of Zechariah, of St. James, and of Absalom.

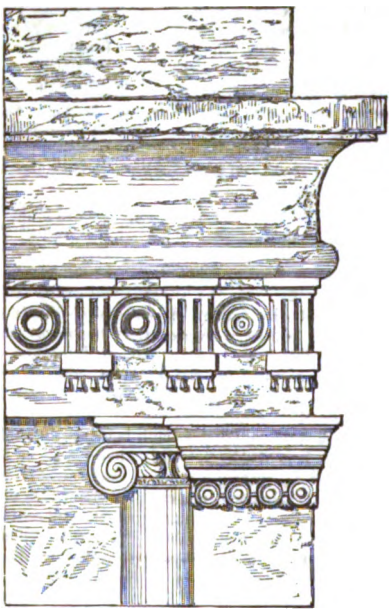
Second, those known as the Tombs of the Judges, and the so-called Jewish tomb, about a mile north of the city.

Third, that known as the Tombs of the Kings, about half a mile north of the Damascus Gate.

Of the three first-named tombs the most southern is known as that of Zechariah, a popular name which there is not even a shadow of tradition to justify. It consists of a square solid basement, measuring 18 feet 6 inches each way, and 20 feet high to the top of the cornice. On each face are four engaged Ionic columns between antæ, and these are surmounted, not by an Egyptian cornice, as is usually asserted, but by one of purely Assyrian type, such as is found at Khorsabad (woodcut No. 4). As the Ionic or voluted order came also from Assyria, this example is in fact a more pure specimen of the Ionic order than any found in Europe, where it was always used by the Greeks with a quasi-Doric cornice. Notwithstanding this, in the form of the volutes — the egg-and-dart moulding beneath, and every detail — it is so distinctly Roman that it is impossible to assume that it belongs to an earlier age than that of their influence.

No. 4.— Section of Stylobate at Khorsabad.

Above the cornice is a pyramid rising at rather a sharp angle, and hewn like all the rest out of the solid rock. It may further be remarked that only the outward face, or that fronting Jerusalem, is completely finished, the other three being only blocked out (De Saulcy, ii. 303), a circumstance that would lead us to suspect that the works may have been interrupted by the fall of Jerusalem, or some such catastrophe, and this may possibly also account for there being no sepulchre on its rear, if such be really the case.



To call this building a tomb is evidently a misnomer, as it is absolutely solid — hewn out of the living rock by cutting a passage round it. It has no internal chambers, nor even the semblance of a doorway. From what is known of the explorations carried on by M. Renan about Byblus, we should expect that the tomb, properly so called, would be an excavation in the passage behind the monolith — but none such has been found, probably it was never looked for — and that this monolith is the stelé or indicator of that fact. If it is so, it is very singular, though very Jewish, that any one should take the trouble to carve out such a monument without putting an inscription or symbol on it to mark its destination or to tell in whose honor it was erected.

The other, or so-called Tomb of Absalom, figured in vol. i. p. 17, is somewhat larger, the base being about 21 feet square in plan, and probably 23 or 24 to the top of the cornice. Like the other, it is of the Roman Ionic order, surmounted by a cornice of Ionic type; but between the pillars and the cornice a frieze, unmistakably of the Roman Doric order, is introduced, so Roman as to be in itself quite sufficient to fix its epoch. It is by no means clear whether it had originally a pyramidical top like its neighbor. The existence of a square blocking above the cornice would lead us to suspect it had not; at all events, either at the time of its excavation or subsequently, this was removed, and the present very peculiar termination erected, raising its height to over 60 feet. At the time this was done a chamber was excavated in the base, we must assume for sepulchral purposes, though how a body could be introduced through the narrow hole above the cornice is by no means clear, nor, if inserted, how disposed of in the two very narrow loculi that exist.

The great interest of this excavation is that immediately in rear of the monolith we do find just such a sepulchral cavern as we should expect. It is called the Tomb of Jehoshaphat, with about the same amount of discrimination as governed the nomenclature of the others, but is now closed ev

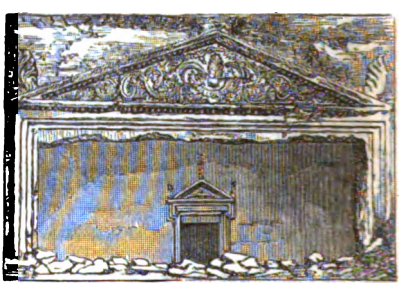
the rubbish and stones thrown by the pious at the Tomb of the undutiful Son, and consequently its internal arrangements are unknown; but externally it is crowned by a pediment of considerable beauty, and in the same identical style as that of the Tombs of the Judges, mentioned further on — showing that

No. 5. — Angle of Tomb of Absalom. From De Saulcy.



these two at least are of the same age, and this one at least must have been subsequent to the excavation of the monolith; so that we may feel perfectly certain that the two groups are of one age, even if it should not be thought quite clear what that age may be.

No. 6. — Plan of Tomb of St. James.

The third tomb of this group, called that of St. James, is situated between the other two, and is of a very different character. It consists (see Plan) of a verandah with two Doric pillars in antis, which may be characterized as belonging to a very late Greek order rather than a Roman example. Behind this screen are several apartments, which in another locality we might be justified in calling a rock-cut monastery appropriated to sepulchral purposes, but in Jerusalem we know so little that it is necessary to pause before applying any such designation. In the rear of all is an apartment, apparently unfinished, with three shallow loculi meant for the reception of sarcophagi, and so indicating a post-Jewish date for the whole or at least for that part of the excavation.

The hypogeum known as the Tombs of the Judges is one of the most remarkable of the catacombs around Jerusalem, containing about sixty deep loculi, arranged in three stories; the upper stories with ledges in front to give convenient access, and to support the stones that closed them; the lower flush with the ground: [a] the whole, consequently, so essentially Jewish that it might be of any age if it were not for its distance from the town, and its architectural character. The latter, as before stated, is identical with that of the Tomb of Jehoshaphat, and has nothing Jewish about it. It might of course be difficult to prove this, as we know so little of what Jewish architecture really is: but we do know that the pediment is more essentially a Greek invention than any other part of their architecture, and was introduced at least not previously to the age of the Cypselidæ, and this peculiar form not till long afterwards, and this particular example not till after an age when the debased Roman of the Tomb of Absalom had become possible.

No. 7. — Façade of the Tombs of the Judges.

The same remarks apply to the tomb without name, and merely called "a Jewish Tomb," in the neighborhood, with beveled facets over its façade but with late Roman Doric details at its angles sufficient to indicate its epoch; but there is nothing else about these tombs requiring especial mention.

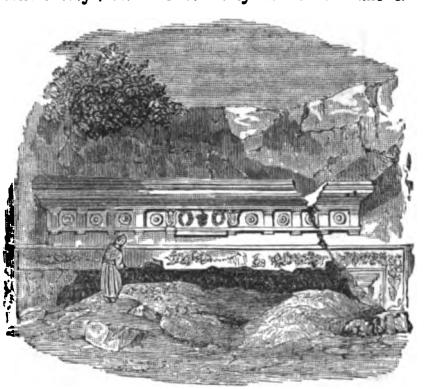
*Tombs of Herod.* — The last of the great groups enumerated above is that known as the Tombs of the Kings — *Kebûr es-Sultân* — or the Royal Caverns, so called because of their magnificence and also because that name is applied to them by Josephus, who in describing the third wall mentions them (*B. J.* v. 4, § 2). He states that "the wall reached as far as the Tower Psephinus, and then extended till it came opposite the Monuments (*μνημεῖον*) of Helena. It then extended further to a great length till it passed by the Sepulchral

[a] Pierotti, in his published Plan of Jerusalem, adds sarcophagus chamber with shallow loculi, but as both Series and De Saulcy omit this, it is probable the Italian is mistaken. Wood-cut No. 1 is taken from his plan, but used as a diagram rather than as representing the exact facts of the case

Digitized by Google

Caverns of the Kings," etc. We have thus first the Tower Psephinus, the site of which is very tolerably ascertained on the ridge above the Pool *Birket Mamilla*; then the Monument of Helena, and then at some distance eastward these Royal Caverns.

They are twice again mentioned under the title of Ἡρώδου μνημεῖον. First, when Titus, approaching from the north, ordered the ground to be cleared from Scopus — which is tolerably well known — up to those Monuments of Herod (*B. J.* v. 3, § 2); and lastly in the description of the circumvallation (*B. J.* v. 12, § 2), where they are mentioned after passing the Monument of Ananus and Pompey's Camp, evidently on the ridge where Psephinus afterwards stood, and on the north of the city.



These three passages refer so evidently to one and the same place, that no one would probably ever have doubted — especially when taken in conjunction with the architecture — but that these caverns were the tombs of Herod and his family, were it not for a curious contradiction of himself in the works of Josephus, which has led to considerable confusion. Herod died at Jericho, and the most probable account (*Ant.* xvii. 8, § 3) would lead us to suppose (it is not so stated) that his body was brought to Jerusalem, where the funeral procession was formed on a scale and with a magnificence which would have been impossible at such a place as Jericho without long previous preparation; and it then goes on to say, "and so they went *eight stadia* to [the] Herodium, for there, by his own command, he was to be buried" — eight stadia, or one mile, being the exact distance between the royal palace and these tombs.

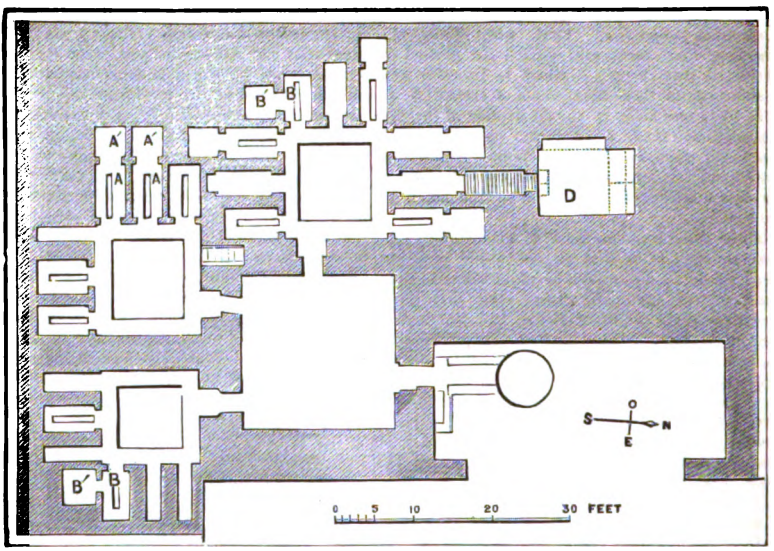
The other account (*B. J.* i. 33, § 9) repeats the details of the procession, and nearly in the same words, but substitutes 200 for 8, which has led to the belief that he was buried at *Jebel Fureidis*, where he had erected a palace 60 stadia south of Jerusalem, and 170 from Jericho. Even then the procession must have passed through Jerusalem, and this hardly would have been the case without its being mentioned; but the great difficulty is that there is no hint anywhere else of Herod's intention to be buried there, and the most extreme improbability that he should wish to be interred so far from the city where all his predecessors were laid. Though it would be unpardonable to alter the text in order to meet any particular view, still when an author makes two statements in direct contradiction the one to the other, it is allowable to choose the most conformable with probability; and this, added to his assertion that Herod's Tombs were in this neighborhood, seems to settle the question.

The architecture (wood-cut No. 8) exhibits the same ill-understood Roman Doric arrangements as are found in all these tombs, mixed with bunches of grapes, which first appear on Maccabean coins, and foliage which is local and peculiar, and, so far as anything is known elsewhere, might be of any age. Its connection, however, with that of the Tombs of Jehoshaphat and the Judges fixes it to the same epoch.

The entrance doorway of this tomb is below the level of the ground, and concealed, as far as anything can be said to be so which is so architecturally adorned; and it is remarkable as the only instance of this quasi-concealment at Jerusalem. It is closed by a very curious and elaborate contrivance of a rolling stone, often described, but very clumsily answering its purpose. This also is characteristic of its age, as we know from Pausanias that the structural marble monument of Queen Helena of Adiabene was remarkable for a similar piece of misplaced ingenuity. Within, the tomb consists of a vestibule or entrance-hall about 20 feet square, from which three other square apartments open, each surrounded by deep loculi. These again possess a peculiarity not known in any other tomb about Jerusalem, of having a square apartment either beyond the head of the loculus or on one side: as, for instance (wood-cut No 9), A A have their inner chambers A′ A′ within, but B and B, at B′ B′, on one side. What the purpose of these was it is difficult to guess, but at all events it was not Jewish.

But perhaps the most remarkable peculiarity of the hypogeum is the sarcophagus chamber D, in which two sarcophagi were found, one of which was brought home by De Saulcy, and is now in the Louvre. It is of course quite natural that a Roman king who was buried with such Roman pomp should have adopted the Roman mode of sepulture; and if this and that of St. James are the only sarcophagi chambers at Jerusalem, this alone should settle the controversy; and all certainly tends to make it

No. 8. — Façade of Herod's Tombs, from a Photograph.



more and more probable that this was really the sepulchre of Herod.

If the sarcophagus now in the Louvre, which came from this chamber, is that of Herod, it is the most practical illustration that has yet come to light of a theory which has recently been forcing itself on the attention of antiquarians. According to this new view, it is not necessary that furniture, or articles which can be considered as such, *must always* follow the style of the architecture of the day. They must have done so always in Egypt, in Greece, or in the Middle Ages; but might have deviated from it at Rome, and may probably have done so at Jerusalem, among a people who had no art of their own, as was the case with the Jews. The discord in fact may not have been more offensive to them than the Louis Quatorze furniture is to us, with which we adorn our Classical and Gothic buildings with such cosmopolite impartiality. If this is so, the sarcophagus may have been made for Herod. If this hypothesis is not tenable, it may belong to any age from the time of the Maccabees to that of Justinian, most probably the latter, for it certainly is not Roman, and has no connection with the architecture of these tombs.

Be this as it may, there seems no reason for

Digitized by Google

doubting but that all the architectural tombs of Jerusalem belong to the age of the Romans, like everything that has yet been found either at Petra, Baalbec, Palmyra, or Damascus, or even among the stone cities of the Hauran. Throughout Syria, in fact, there is no important architectural example which is anterior to their day; and all the specimens which can be called Classical are strongly marked with the impress of the peculiar forms of Roman art.

No. 9. — Plan of Tombs of Herod. From De Saulcy.

*Tomb of Helena of Adiabene.* — There was one other very famous tomb at Jerusalem, which cannot be passed over in silence, though not one vestige of it exists — for the simple reason that though Queen Helena of Adiabene was converted to the Jewish faith, she had not so fully adopted Jewish feelings as to think it necessary she should be buried under ground. On the contrary, we are told that "she with her brother were buried in the pyramids which she had ordered to be constructed at a distance of three stadia from Jerusalem" (*Ant.* xx. 4, § 3). This is confirmed by Pausanias (viii. 16), who, besides mentioning the marble door of very apocryphal mechanism which closed its entrance, speaks of it as a Τάφος in the same sense in which he understands the mausoleum at Halicarnassus to have been a structured tomb, which he could not have done if this were a cave, as some have supposed.

The specification of the locality by Josephus is so minute that we have no difficulty in ascertaining whereabouts the monument stood. It was situated outside the third wall, near a gate between the Tower Psephinus and the Royal Caverns (*B. J.* v. 22, and v. 4, § 2). These last are perfectly known, and the tower with very tolerable approximate certainty, for it was placed on the highest point of the ridge between the hollow in which the Birket Mamilla is situated and the upper valley of the Kedron; they were consequently either exactly where marked on the plan in vol. ii. p. 1312, or it may be a little more to the eastward.

They remained sufficiently entire in the 4th century to form a conspicuous object in the landscape, to be mentioned by Eusebius, and to be remarked by those who accompanied Sta. Paula (Euseb. ii. 12; Hieron. *Epitaph. Paulæ*) on her journey to Jerusalem.

There is no difficulty in forming a tolerably distinct idea of what the appearance of this remarkable monument must have been, if we compare the words descriptive of it in the various authors who have mentioned it with the contemporary monuments in the Valley of Jehoshaphat. If we place together in a row three such monuments as the Tomb of Zechariah, or rather two such, with the monument of Absalom between them, we have such an edifice as will answer to the Pyramid of Josephus, the Taphos of Pausanias, the Stelés of Eusebius, or the Mausoleum of Jerome. But it need hardly be added, that not one of these expressions applies to an underground excavation. According to this view of the matter, the entrance would be under the Central Cippus, which would thus form the ante-room to the two lateral pyramids, in one of which Helena herself reposed, and in the other the remains of her brother.

Since the destruction of the city by Titus, none of the native inhabitants of Jerusalem have been in a position to indulge in much sepulchral magnificence, or perhaps had any taste for this class of display; and we in consequence find no rock-cut hypogea, and no structural monuments that arrest attention in modern times. The people, however, still cling to their ancient cemeteries in the Valley of Jehoshaphat with a tenacity singularly characteristic of the East. The only difference being, that the erection of the Wall of Agrippa, which now forms the eastern boundary of the Haram Area, has pushed the cemetery further toward the Kedron, or at least cut off the upper and nobler part of it. And the contraction of the city on the north has enabled the tombs to approach nearer the limits of the modern town than was the case in the days when Herod the Great and

Digitized by Google

Helena of Adiabene were buried "on the side of the north."

The only remarkable exception to this assertion is that splendid Mausoleum which Constantine erected over what he believed to be the tomb of Christ, and which still exists at Jerusalem, known to Moslems as the Dome of the Rock; to Christians as the Mosque of Omar.

The arguments for its authenticity have already been sufficiently insisted upon in the article JERUSALEM, in the second volume, and its general form and position shown in the wood-cut, p. 1316. It will not, therefore, be necessary to go over this ground again. Externally its appearance was very much altered by the repairs of Suleiman the Magnificent, when the city had returned to the possession of the Moslems after the retreat of the Crusaders, and it has consequently lost much of its original Byzantine character; but internally it remains much as it was left by its founder; and is now — with the exception of a few Indian tombs — the most magnificent sepulchral monument in Asia, and is, as it ought to be, the most splendid Christian sepulchre in the world.[a] J. F.

George Williams, *Holy City*, more especially in regard to tombs in and around Jerusalem, iii. 129 ff.; and in this *Dictionary*, JERUSALEM, ancient and modern. H.

**TONGUES, CONFUSION OF.** The unity of the human race is most clearly implied, if not positively asserted, in the Mosaic writings. The general declaration, "So God created man in his own image, . . . . male and female created He them" (Gen. i. 27), is limited as to the mode in which the act was carried out, by the subsequent narrative of the creation of the protoplast Adam, who stood alone on the earth amidst the beasts of the field, until it pleased Jehovah to create "an help-meet for him" out of the very substance of his body (Gen. ii. 22). From this original pair sprang the whole antediluvian population of the world, and hence the author of the book of Genesis conceived the unity of the human race to be of the most rigid nature — not simply a generic unity, nor again simply a specific unity (for unity of species may not be inconsistent with a plurality of original centres), but a specific based upon a numerical unity, the species being nothing else than the enlargement of the individual. Such appears to be the natural meaning of the first chapters of Genesis, when taken by themselves — much more so when read under the reflected light of the New Testament; for not only do we meet with references to the historical fact of such an origin of the human race — *e. g.* in St. Paul's declaration that God "hath made of one blood every nation of men to dwell on all the face of the earth"[b] (Acts xvii. 26) — but the same is evidently implied in the numerous passages which represent Jesus Christ as the counterpart of Adam in regard to the universality of his connection with the human race. Attempts have indeed been made to show that the idea of a plurality of original pairs is not inconsistent with the Mosaic writings; but there is a wide distinction between a view not inconsistent with, and a view drawn from, the words of the author: the latter is founded upon the facts he relates, as well as his mode of relating them; the former takes advantage of the weaknesses arising out of a concise or unmethodical style of composition. Even if such a view could be sustained in reference to the narrative of the original creation of man, it must inevitably fail in reference to the history of the repopulation of the world in the postdiluvian age; for whatever objections may be made to the historical accuracy of the history of the Flood, it is at all events clear that the historian believed in the universal destruction of the human race with the exception of Noah and his family, and consequently that the unity of the human race was once more reduced to one of a numerical character. To Noah the historian traces up the whole postdiluvian population of the world: "These are the three sons of Noah: and of them was the whole earth overspread" (Gen. ix. 19).

Unity of language is assumed by the sacred historian apparently as a corollary of the unity of race. No explanation is given of the origin of speech, but its exercise is evidently regarded as coeval with the creation of man. No support can be obtained in behalf of any theory on this subject from the first recorded instance of its exercise ("Adam gave names to all cattle") for the simple reason that this notice is introductory to what follows: "but for Adam there was not found an help-meet for him" (Gen. ii. 20). It was not so much the intention of the writer to state the fact of man's power of speech, as the fact of the inferiority of all other animals to him, and the consequent necessity for the creation of woman. The proof of that inferiority is indeed most appropriately made to consist in the authoritative assignment of names, implying an act of reflection on their several natures and capacities, and a recognition of the offices which they were designed to fill in the economy of the world. The exercise of speech is thus most happily connected

[a] * The author of this article has introduced into it two points of a favorite theory which is original with him, namely, that the Dome of the Rock, or the Mosque of Omar, and Constantine's Church of the Holy Sepulchre are identical; and that Mount Moriah, or the Eastern Hill, and Mount Zion, are identical: and, consequently, that the royal sepulchres of Judah were somewhere within the present Haram Area. The grounds of utter dissent from these views have been given by the writer of this in the article JERUSALEM, * IV. p. 1330 ff., Amer. ed. The assertion above, which has no historical support, that "the Wall of Agrippa now forms the eastern boundary of the Haram Area," contracting the ancient cemetery, is disproved by Capt. Warren's explorations, who finds no substructions in Jerusalem more ancient and massive than portions of the Eastern Wall, layers of which remain *in situ*.

The *Quarterly Statement* No. V. of the Pal. Expl. Fund (pp. 245–251) contains an account, by Dr. Ch. Sandreczki, of the rock-tombs of *el-Medyeh*, a village near Lydda, and his reasons for identifying this site with Modin, and these tombs, known as *Kubûr el-Ya'âd*, with the Maccabean mausoleum. The suggestion appears quite plausible. [MODIN, iii. 1989.] S. W.

[b] The force of the Apostle's statement is inadequately given in the A. V., which gives "for to dwell" as the result, instead of the direct object of the principal verb.

Digitized by Google

with the exercise of reflection, and the relationship between the inner act of the mind (λόγος ἐνδιάθετος) and the outward expression (λόγος προφορικός) is fully recognized. Speech being thus inherent in man as a reflecting being, was regarded as handed down from father to son by the same process of imitation by which it is still perpetuated. Whatever divergences may have arisen in the antediluvian period, no notice is taken of them, inasmuch as their effects were obliterated by the universal catastrophe of the Flood. The original unity of speech was restored in Noah, and would naturally be retained by his descendants as long as they were held together by social and local bonds. Accordingly we are informed that for some time "the whole earth was of one lip and the same words" (Gen. xi. 1), *i. e.* both the vocal sounds and the vocables were identical — an exhaustive, but not, as in the A. V., a tautologous description of complete unity. Disturbing causes were, however, early at work to dissolve this twofold union of community and speech. The human family[a] endeavored to check the tendency to separation by the establishment of a great central edifice, and a city which should serve as the metropolis of the whole world. They attempted to carry out this project in the wide plain of Babylonia, a locality admirably suited to such an object from the physical and geographical peculiarities of the country. The project was defeated by the interposition of Jehovah, who determined to "confound their language, so that they might not understand one another's speech." Contemporaneously with, and perhaps as the result of, this confusion of tongues, the people were scattered abroad from thence upon the face of all the earth, and the memory of the great event was preserved in the name Babel (= confusion). The ruins of the tower are identified by M. Oppert, the highest authority on Babylonian antiquities, with the basement of the great mound of *Birs-Nimrûd*, the ancient Borsippa.[b]

Two points demand our attention in reference to this narrative, namely, the degree to which the confusion of tongues may be supposed to have extended, and the connection between the confusion of tongues and the dispersion of nations. (1.) It is unnecessary to assume that the judgment inflicted on the builders of Babel amounted to a loss, or even a suspension, of articulate speech. The desired object would be equally attained by a miraculous foretalment of those dialectical differences of language which are constantly in process of production, but which, under ordinary circumstances, require time and variations of place and habits to reach such a point of maturity that people are unable to understand one another's speech. The elements of the one original language may have remained, but so disguised by variations of pronunciation, and by the introduction of new combinations, as to be practically obliterated. Each section of the human family may have spoken a tongue unintelligible to the remainder, and yet containing a substratum which was common to all. Our own experience suffices to show how completely even dialectical differences render strangers unintelligible to one another; and if we further take into consideration the differences of habits and associations, of which dialectical differences are the exponents, we shall have no difficulty in accounting for the result described by the sacred historian. (2.) The confusion of tongues and the dispersion of nations are spoken of in the Bible as contemporaneous events. "So the Lord scattered them abroad" is stated as the execution of the Divine counsel, "Let us confound their language." The divergence of the various families into distinct tribes and nations ran parallel with the divergence of speech into dialects and languages, and thus the 10th chapter of Genesis is posterior in historical sequence to the events recorded in the 11th chapter. Both passages must be taken into consideration in any disquisition on the early fortunes of the human race. We propose therefore to inquire, in the first place, how far modern researches into the phenomena of language favor the idea that there was once a time when "the whole earth was of one speech and language;" and, in the second place, whether the ethnological views exhibited in the Mosaic table accord with the evidence furnished by history and language, both in regard to the special facts recorded in it, and in the general Scriptural view of a historical or more properly a gentilic unity of the human race. These questions, though independent, yet exercise a reflexive influence on each other's results. Unity of speech does not necessarily involve unity of race, nor yet *vice versâ*; but each enhances the probability of the other, and therefore the arguments derived from language, physiology, and history, may ultimately furnish a cumulative amount of probability which will fall but little below demonstration.

(A.) The advocate of the historical unity of language has to encounter two classes of opposing arguments; one arising out of the differences, the other out of the resemblances of existing languages. On the one hand, it is urged that the differences are of so decisive and specific a character as to place the possibility of a common origin wholly out of the question; on the other hand that the resemblances do not necessitate the theory of a historical unity, but may be satisfactorily accounted for on psychological principles. It will be our object to discuss the amount, the value, and the probable origin of the varieties exhibited by languages, with a view to meet the first class of objections. But before proceeding to this, we will make a few remarks on the second class, inasmuch as these, if established, would nullify any conclusion that might be drawn from the other.

A psychological unity is not necessarily opposed to a gentilic unity. It is perfectly open to any theorist to combine the two by assuming that the language of the one protoplast was founded on strictly psychological principles. But, on the other hand, a psychological unity does not necessitate a gentilic unity. It permits of the theory of a plurality of protoplasts, who under the influence of the same psychological laws arrived at similar independent results. Whether the phenomena of language are consistent with such a theory, we think extremely doubtful; certainly they cannot furnish the basis of it. The whole question of the origin

[a] The project has been restricted by certain critics to the Hamites, or, at all events, to a mere section of the human race. This and various other questions arising out of the narrative are discussed by Vitringa in his *Observ. Sacr.* i. 1, §§ 2–8; 6, §§ 1–4. Although the restriction above noticed is not irreconcilable with the text, it interferes with the ulterior object for which the narrative was probably inserted, namely, to reconcile the manifest diversity of language with the idea of an original unity.

[b] See the Appendix to this article.

of language lies beyond the pale of historical proof, and any theory connected with it admits neither of being proved nor disproved. We know, as a matter of fact, that language is communicated from one generation to another solely by force of imitation, and that there is no play whatever for the inventive faculty in reference to it. But in what manner the substance of language was originally produced, we do not know. No argument can be derived against the common origin from analogies drawn from the animal world, and when Professor Agassiz compares similarities of language with those of the cries of animals (v. Bohlen's *Introd. to Gen.* ii. 278), he leaves out of consideration the important fact that language is not identical with sound, and that the words of a rational being, however originally produced, are perpetuated in a manner wholly distinct from that whereby animals learn to utter their cries. Nor does the internal evidence of language itself reveal the mystery of its origin; for though a very large number of words may be referred either directly or mediately to the principle of onomatopœia, there are others, as, for instance, the first and second personal pronouns, which do not admit of such an explanation. In short, this and other similar theories cannot be reconciled with the intimate connection evidently existing between reason and speech, and which is so well expressed in the Greek language by the application of the term λόγος to each, reason being nothing else than inward speech, and speech nothing else than outward reason, neither of them possessing an independent existence without the other. As we conceive that the psychological, as opposed to the gentilic, unity involves questions connected with the origin of language, we can only say that in this respect it falls outside the range of our inquiry.

Reverting to the other class of objections, we proceed to review the extent of the differences observable in the languages of the world, in order to ascertain whether they are such as to preclude the possibility of a common origin. Such a review must necessarily be imperfect, both from the magnitude of the subject, and also from the position of the linguistic science itself, which as yet has hardly advanced beyond the stage of infancy. On the latter point we would observe that the most important links between the various language families may yet be discovered in languages that are either unexplored, or, at all events, unplaced. Meanwhile, no one can doubt that the tendency of all linguistic research is in the direction of unity. Already it has brought within the bonds of a well-established relationship languages so remote from each other in external guise, in age, and in geographical position as Sanskrit and English, Celtic and Greek. It has done the same for other groups of languages equally widely extended, but presenting less opportunities of investigation. It has recognized affinities between languages which the ancient Greek ethnologist would have classed under the head of "barbarian" in reference to each other, and even in many instances where the modern philologist has anticipated no relationship. The lines of discovery therefore point in one direction, and favor the expectation that the various families may be combined by the discovery of connecting links into a single family, comprehending in its capacious bosom all the languages of the world. But should such a result never be attained, the probability of a common origin would still remain unshaken; for the failure would probably be due to the absence, in many classes and families, of that chain of historical evidence, which in the case of the Indo-European and Shemitic families enables us to trace their progress for above 3,000 years. In many languages no literature at all, in many others no ancient literature exists, to supply the philologist with materials for comparative study: in these cases it can only be by laborious research into existing dialects that the original forms of words can be detected, amidst the incrustations and transmutations with which time has obscured them.

In dealing with the phenomena of language, we should duly consider the plastic nature of the material out of which it is formed, and the numerous influences to which it is subject. Variety in unity is a general law of nature, to which even the most stubborn physical substances yield a ready obedience. In the case of language it would be difficult to lay any bounds to the variety which we might *à priori* expect it to assume. For in the first place it is brought into close contact with the spirit of man, and reflects with amazing fidelity its endless variations, adapting itself to the expression of each feeling, the designation of each object, the working of each cast of thought or stage of reasoning power. Secondly, its sounds are subject to external influences, such as peculiarities of the organ of speech, the result either of natural conformation, of geographical position, or of habits of life and associations of an accidental character. In the third place, it is generally affected by the state of intellectual and social culture of a people, as manifested more especially in the presence or absence of a standard literary dialect, and in the processes of verbal and syntactical structure, which again react on the very core of the word, and produce a variety of sound-mutations. Lastly, it is subjected to the wear and tear of time and use, obliterating, as in an old coin, the original impress of the word, reducing it in bulk, producing new combinations, and occasionally leading to singular interchanges of sound and idea. The varieties, resulting from the modifying influences above enumerated, may be reduced to two classes, according as they affect the formal or the radical elements of language. On each of these subjects we propose to make a few remarks.

I. Widely as languages now differ from each other in external form, the raw material (if we may use the expression) out of which they have sprung appears to have been in all cases the same. A substratum of significant monosyllabic roots underlies the whole structure, supplying the materials necessary not only for ordinary predication, but also for what is usually termed the "growth" of language out of its primary into its more complicated forms. It is necessary to point this out clearly in order that we may not be led to suppose that the elements of one language are in themselves endued with any greater vitality than those of another. Such a distinction, if it existed, would go far to prove a specific difference between languages, which could hardly be reconciled with the idea of their common origin. The appearance of vitality arises out of the manipulation of the roots by the human mind, and is not inherent in the roots themselves.

The proofs of this original equality are furnished by the languages themselves. Adopting for the present the threefold morphological classification into isolating, agglutinative, and inflecting languages, we shall find that no original element exists

Digitized by Google

in the one which does not also exist in the other. With regard to the isolating class, the terms "monosyllabic" and "radical," by which it is otherwise described, are decisive as to its character. Languages of this class are wholly unsusceptible of grammatical mutations: there is no formal distinction between verb and noun, substantive and adjective, preposition and conjunction: there are no inflections, no case or person terminations of any kind: the bare root forms the sole and whole substance of the language. In regard to the other two classes, it is necessary to establish the two distinct points, (1) that the formal elements represent roots, and (2) that the roots both of the formal and the radical elements of the word are monosyllabic. Now, it may be satisfactorily proved by analysis that all the component parts of both inflecting and agglutinative languages are reducible to two kinds of roots, predicable and pronominal; the former supplying the material element of verbs, substantives, and adjectives, the latter that of conjunctions, prepositions, and particles; while each kind, but more particularly the pronominal, supply the formal element, or, in other words, the terminations of verbs, substantives, and adjectives. The full proofs of these assertions would involve nothing less than a treatise on comparative grammar: we can do no more than adduce in the accompanying note a few illustrations of the various points to which we have adverted.[a] Whether the two classes of roots, predicable and pronominal, are further reducible to one class, is a point that has been discussed, but has not as yet been established (Bopp's *Compar. Gram.* § 105; Max Müller's *Lectures*, p. 269). We have further to show that the roots of agglutinative and inflecting languages are monosyllabic. This is an acknowledged characteristic of the Indo-European family; monosyllabism is indeed the only feature which its roots have in common; in other respects they exhibit every kind of variation from a uniliteral root, such as *i* (*ire*), up to combinations of five letters, such as *scand* (*scandere*), the total number of admissible forms of root amounting to no less than eight (Schleicher, § 206). In the Shemitic family monosyllabism is not a *primâ facie* characteristic of the root; on the contrary, the verbal[b] stems exhibit bisyllabism with such remarkable uniformity, that it would lead to the impression that the roots also must have been bisyllabic. The bisyllabism, however, of the Shemitic stem is in reality triconsonantalism, the vowels not forming any part of the essence of the root, but being wholly subordinate to the consonants. It is at once apparent that a triconsonantal and even a quadriconsonantal root may be in certain combinations unisyllabic. But further, it is more than probable that the triconsonantal has been evolved out of a biconsonantal root, which must necessarily be unisyllabic if the consonants stand, as they invariably do in[c] Shemitic roots, at the beginning and end of the word. With regard to the agglutinative class, it may be assumed that the same law which we have seen to prevail in the isolating and inflecting classes, prevails also in this, holding as it does an intermediate place between those opposite poles in the world of language.

From the consideration of the crude materials of language, we pass on to the varieties exhibited in its structure, with a view to ascertain whether in these there exists any bar to the idea of an original unity. (1.) Reverting to the classification already noticed, we have to observe, in the first place, that the principle on which it is based is the nature of the connection existing between the predicable and the relational or inflectional elements of a word. In the isolating class these two are kept wholly dis-

---

[a] 1. That prepositions are reducible to pronominal roots may be illustrated by the following instances. The Greek ἀπό, with its cognates the German *ab* and our *of*, is derived from the demonstrative base *a*, whence also the Sanskrit *ápa* (Bopp, § 1000); πρό and παρά are akin to the Sansk. *prá* and *párâ*, secondary formations of the above-mentioned *ápa* (Bopp, § 1009). The only preposition which appears to spring from a predicable base is *trans*, with its cognates *durch* and *through*, which are referred to the verbal root *tar* (Bopp. 1018).

2. That conjunctions are similarly reducible may be illustrated by the familiar instances of ὅτι, *quod*, and "that," indifferently used as pronouns or conjunctions. The Latin *si* is connected with the pronoun *si-bi*; and εἰ, together with the Sansk. *yádi*, with the relative base *ya* (Bopp, § 994).

3. That the suffixes forming the inflections of verbs and nouns are nothing else than the relics of either predicable or pronominal roots, will appear from the following instances, drawn (1) from the Indo-European languages, and (2) from the Ural-Altaian languages. (1.) The -μι in δίδωμι is connected with the root whence spring the oblique cases of the personal pronoun ἐγώ; the -σ in δίδως is the remains of σύ; and the τ in δοτέ for which an σ is substituted in δίδωσι) represents the Sanskrit *ta*, which reappears in κεῖνός and in the oblique cases of the article (Bopp, §§ 434, 443, 456). So again, the -ς in the nominative λόγος represents the Sanskrit pronominal root *sa*, and the -d of the neuter *quid* the Sanskrit *ta* (Schleicher's *Compend.* § 246); the genitive terminations -ος, -ου (originally -σσιο), and hence -ου = the Sanskrit *sya*, another form of *sa* (Schleicher, § 252); the dative (or more properly the locative) -ῳ or -οι is referable to the demonstrative root *i* (Schleicher, § 254); and the accusative -ν (originally -μ) to a pronominal base, probably *am*, which no longer appears in its simple form (Schleicher, § 249). (2.) In the Ural-Altaian languages, we find that the terminations of the verbs, gerunds, and participles are referable to significant roots; as in Turkish the active affix *t* or *d* to a root signifying "to do" (Ewald, *Sprachw. Abh.* ii. 27), and in Hungarian the factitive affix *t* to *te*, "to do," the passive affix *l* to *le*, "to become;" the affix of possibility *hat* to *hat*, "to work," etc. (Pulszky, in *Philol. Trans.* 1859, p. 115).

[b] Monosyllabic substantives are not unusual in Hebrew, as instanced in יַיִן, דָּג, etc. It is unnecessary to regard these as truncated forms from bisyllabic roots.

[c] That the Shemitic languages ever actually existed in a state of monosyllabism is questioned by Renan, partly because the surviving monosyllabic languages have never emerged from their primitive condition, and partly because he conceives synthesis and complexity to be anterior in the history of language to analysis and simplicity (*Hist. Gén.* i. 98–100). The first of these objections is based upon the assumption that languages are developed only in the direction of syntheticism; but this, as we shall hereafter show, is not the only possible form of development, and it is just because the monosyllabic languages have adopted another method of perfecting themselves, that they have remained in their original stage. The second objection seems to involve a violation of the natural order of things, and to be inconsistent with the evidence afforded by language itself; for, though there is undoubtedly a tendency in language to pass from the synthetical to the analytical state, it is no less clear from the elements of synthetic forms that they must have originally existed in an analytical state.

Digitized by Google

tinct: relational ideas are expressed by juxtaposition or by syntactical arrangement, and not by any combination of the roots. In the agglutinative class the relational elements are attached to the principal or predicable theme by a mechanical kind of junction, the individuality of each being preserved even in the combined state. In the inflecting class the junction is of a more perfect character, and may be compared to a chemical combination, the predicable and relational elements being so fused together as to present the appearance of a single and indivisible word. It is clear that there exists no insuperable barrier to original unity in these differences, from the simple fact that every inflecting language must once have been agglutinative, and every agglutinative language once isolating. If the predicable and relational elements of an isolating language be linked together, either to the eye or the ear, it is rendered agglutinative; if the material and formal parts are pronounced as one word, eliminating, if necessary, the sounds that resist incorporation, the language becomes inflecting. (2.) In the second place, it should be noted that these three classes are not separated from each other by any sharp line of demarcation. Not only does each possess in a measure the quality predominant in each other, but moreover each graduates into its neighbor through its bordering members. The isolating languages are not wholly isolating; they avail themselves of certain words as relational particles, though these still retain elsewhere their independent character: they also use composite, though not strictly compound words. The agglutinative are not wholly agglutinative: the Finnish and Turkish classes of the Ural-Altaian family are in certain instances inflectional, the relational adjunct being fully incorporated with the predicable stem, and having undergone a large amount of attrition for that purpose. Nor again are the inflectional languages wholly inflectional: Hebrew, for instance, abounds with agglutinative forms, and also avails itself largely of separate particles for the expression of relational ideas: our own language, though classed as inflectional, retains nothing more than the vestiges of inflection, and is in many respects as isolating and juxtapositional as any language of that class. While, therefore, the classification holds good with regard to the predominant characters of the classes, it does not imply differences of a specific nature. (3.) But further, the morphological varieties of language are not confined to the exhibition of the single principle hitherto described. A comparison between the westerly branches of the Ural-Altaian on the one hand, and the Indo-European on the other, belonging respectively to the agglutinative and inflectional classes, will show that the quantitative amount of synthesis is fully as prominent a point of contrast as the qualitative. The combination of primary and subordinate terms may be more perfect in the Indo-European, but it is more extensively employed in the Ural-Altaian family. The former, for instance, appends to its verbal stems the notions of time, number, person, and occasionally of interrogation; the latter further adds suffixes indicative of negation, hypothesis, causativeness, reflexiveness, and other similar ideas, whereby the word is built up tier on tier to a marvelous extent. The former appends to its substantival stems suffixes of case and number; the latter adds governing particles, rendering them post-positional instead of pre positional, and combining them synthetically with the predicable stem. If, again, we compare the Shemitic with the Indo-European languages, we shall find a morphological distinction of an equally diverse character. In the former the grammatical category is expressed by internal vowel-changes, in the latter by external suffixes. So marked a distinction has not unnaturally been constituted the basis of a classification, wherein the languages that adopt this system of internal flection stand by themselves as a separate class, in contradistinction to those which either use terminational additions for the same purpose, or which dispense wholly with inflectional forms (Bopp's *Comp. Gr.* i. 102). The singular use of preformatives in the Coptic language is, again, a morphological peculiarity of a very decided character. And even within the same family, say the Indo-European, each language exhibits an idiosyncrasy in its morphological character, whereby it stands out apart from the other members with a decided impress of individuality. The inference to be drawn from the number and character of the differences we have noticed is favorable, rather than otherwise, to the theory of an original unity. Starting from the same common ground of monosyllabic roots, each language-family has carried out its own special line of development, following an original impulse, the causes and nature of which must remain probably forever a matter of conjecture. We can perceive, indeed, in a general way, the adaptation of certain forms of speech to certain states of society. The agglutinative languages, for instance, seem to be specially adapted to the nomadic state by the prominence and distinctness with which they enunciate the leading idea in each word, an arrangement whereby communication would be facilitated between tribes or families that associate only at intervals. We might almost imagine that these languages derived their impress of uniformity and solidity from the monotonous steppes of Central Asia, which have in all ages formed their proper habitat. So, again, the inflectional class reflects cultivated thought and social organization, and its languages have hence been termed "state" or "political." Monosyllabism, on the other hand, is pronounced to be suited to the most primitive stage of thought and society, wherein the family or the individual is the standard by which things are regulated (Max Müller, in *Philos. of Hist.* i. 285). We should hesitate, however, to press this theory as furnishing an adequate explanation of the differences observable in language-families. The Indo-European languages attained their high organization amid the same scenes and in the same nomad state as those wherein the agglutinative languages were nurtured, and we should be rather disposed to regard both the language and the higher social status of the former as the concurrent results of a higher mental organization.

If from words we pass on to the varieties of syntactical arrangement, the same degree of analogy will be found to exist between class and class, or between family and family in the same class; in other words, no peculiarity exists in one which does not admit of explanation by a comparison with others. The absence of all grammatical forms in an isolating language necessitates a rigid collocation of the words in a sentence according to logical principles. The same law prevails to a very great extent in our own language, wherein the subject, verb, and object, or the subject, copula, and predicate, generally hold their relative positions in the order exhibited, the exceptions to such an arrangement being easily brought into harmony with that general law.

Digitized by Google

In the agglutinative languages the law of arrangement is that the principal word should come last in the sentence, every qualifying clause or word preceding it, and being as it were sustained by it. The syntactical is thus the reverse of the verbal structure, the principal notion taking the precedence in the latter (Ewald, *Sprachw. Abh.* ii. 29). There is in this nothing peculiar to this class of languages, beyond the greater uniformity with which the arrangement is adhered to: it is the general rule in the classical, and the occasional rule in certain of the Teutonic languages. In the Shemitic family the reverse arrangement prevails: the qualifying adjectives follow the noun to which they belong, and the verb generally stands first: short sentences are necessitated by such a collocation, and hence more room is allowed for the influence of emphasis in deciding the order of the sentence. In illustration of grammatical peculiarities, we may notice that in the agglutinative class adjectives qualifying substantives, or substantives placed in apposition with substantives, remain undeclined: in this case the process may be compared with the formation of compound words in the Indo-European languages, where the final member alone is inflected. So again the omission of a plural termination in nouns following a numeral may be paralleled with a similar usage in our own language, where the terms "pound" or "head" are used collectively after a numeral. We may again cite the peculiar manner of expressing the genitive in Hebrew. This is effected by one of the two following methods — placing the governing noun in the *status constructus*, or using the relative pronoun [a] with a preposition before the governed case. The first of these processes appears a strange inversion of the laws of language; but an examination into the origin of the adjuncts, whether prefixes or affixes, used in other languages for the indication of the genitive, will show that they have a more intimate connection with the governing than with the governed word, and that they are generally resolvable into either relative or personal pronouns, which serve the simple purpose of connecting the two words together (Garnett's *Essays*, pp. 214–227). The same end may be gained by connecting the *w* · *n* in pronunciation, which would lead to a rapid utterance of the first, and consequently to the changes which are witnessed in the *status constructus*. The second or periphrastic process is in accordance with the general method of expressing the genitive; for the expression "the Song which is to Solomon" strictly answers to "Solomon's Song," the *s* representing (according to Bopp's explanation) a combination of the demonstrative *sa* and the relative *ya*. It is thus that the varieties of construction may be shown to be consistent with unity of law, and that they therefore furnish no argument against a common origin.

Lastly, it may be shown that the varieties of language do not arise from any constitutional inequality of vital energy. Nothing is more remarkable than the compensating power apparently inherent in all language, whereby it finds the means of reaching the level of the human spirit through a faithful adherence to its own guiding principle. The isolating languages, being shut out from the manifold advantages of verbal composition, attain their object by multiplied combinations of radical sounds, assisted by an elaborate system of accentuation and intonation. In this manner the Chinese language has framed a vocabulary fully equal to the demands made upon it; and though this mode of development may not commend itself to our notions as the most effective that can be devised, yet it plainly evinces a high susceptibility on the part of the linguistic faculty, and a keen perception of the correspondence between sound and sense. Nor does the absence of inflection interfere with the expression even of the most delicate shades of meaning in a sentence: a compensating resource is found partly in a multiplicity of subsidiary terms expressive of plurality, motion, action, etc., and partly in strict attention to syntactical arrangement. The agglutinative languages, again, are deficient in compound words, and in this respect lack the elasticity and expansiveness of the Indo-European family; but they are eminently synthetic, and no one can fail to admire the regularity and solidity with which its words are built up, suffix on suffix, and, when built up, are suffused with an uniformity of tint by the law of vowel-harmony.[b] The Shemitic languages have worked out a different principle of growth, evolved, not improbably, in the midst of a conflict between the systems of prefix and suffix, whereby the stem, being as it were inclosed at both extremities, was precluded from all external increment, and was forced back into such changes as could be effected by a modification of its vowel sounds. But whatever may be the origin of the system of internal inflection, it must be conceded that the results are very effective, as regards both economy of material, and simplicity and dignity of style.

The result of the foregoing observations is to show that the formal varieties of language present no obstacle to the theory of a common origin. Amid these varieties there may be discerned manifest tokens of unity in the original material out of which language was formed, in the stages of formation through which it has passed, in the general principle of grammatical expression, and, lastly, in the spirit and power displayed in the development of these various formations. Such a result, though it does not prove the unity of language in respect to its radical elements, nevertheless tends to establish the *à priori* probability of this unity; for if all connected with the forms of language may be referred to certain general laws, if nothing in that department owes its origin to chance or arbitrary appointment, it surely favors the presumption that the same principle would extend to the formation of the roots, which are the very core and kernel of language. Here too we might expect to find the

[a] אֲשֶׁר ?

[b] The action of this law is as follows: The vowels are divided into three classes, which we may term sharp, medial, and flat: the first and the last cannot be combined in any fully formed word, but all the vowels must be either of the two first, or of the two last classes. The suffixes must always accord with the root in regard to the quality of its vowel-sounds, and hence the necessity of having double forms for all the suffixes to meet the sharp or the flat character of the root. The practice is probably referable to the same principle which assigned so remarkable a prominence to the root. As the root sustains the series of suffixes, its vowel-sound becomes not unnaturally the key-note of the whole strain, facilitating the processes of utterance to the speaker, and of perception to the hearer, and communicating to the word the uniformity which is so characteristic of the whole structure of these languages.

Digitized by Google

operation of fixed laws of some kind or other, producing results of an uniform character: here too actual variety may not be inconsistent with original unity.

II. Before entering on the subject of the radical identity of languages, we must express our conviction that the time has not yet arrived for a decisive opinion as to the possibility of establishing it by proof. Let us briefly review the difficulties that beset the question. Every word as it appears in an organic language, whether written or spoken, is resolvable into two distinct elements, which we have termed predicable and formal, the first being what is commonly called the root, the second the grammatical termination. In point of fact both of these elements consist of independent roots; and in order to prove the radical identity of two languages, it must be shown that they agree in both respects, that is, in regard both to the predicable and the formal roots. As a matter of experience it is found that the formal elements, consisting for the most part of pronominal bases, exhibit a greater tenacity of life than the others; and hence agreement of inflectional forms is justly regarded as furnishing a strong presumption of general radical identity. Even foreign elements are forced into the formal mould of the language into which they are adopted, and thus bear testimony to the original character of that language. But though such a formal agreement supplies the philologist with a most valuable instrument of investigation, it cannot be accepted as a substitute for complete radical agreement: this would still remain to be proved by an independent examination of the predicable elements. The difficulties connected with these latter are many and varied. Assuming that two languages or language-families are under comparison, the phonological laws of each must be investigated in order to arrive, in the first place, at the primary forms of words in the language in which they occur, and, in the second place, at the corresponding forms in the language which constitutes the [a] other member of comparison, as done by Grimm for the Teutonic as compared with the Sanskrit and the classical languages. The genealogy of sound, as we may term it, must be followed up by a genealogy of signification, a mere outward accordance of sound and sense in two terms being of no value whatever, unless a radical affinity be proved by an independent examination of the cognate words in each case. It still remains to be inquired how far the ultimate accordance of sense and sound may be the result of onomatopœia,[b] of mere borrowing, or of a possible mixture of languages on equal terms. The final stage in etymological inquiry is to decide the limit to which comparison may be carried in the primitive strata of language — in other words, how far roots, as ascertained from groups of words, may be compared with roots, and reduced to yet simpler elementary forms. Any flaw in the processes above described will of course invalidate the whole result. Even where the philologist is provided with ample materials for inquiry in stores of literature ranging over long periods of time, much difficulty is experienced in making good each link in the chain of agreement; and yet in such cases the dialectic varieties have been kept within some degree of restraint by the existence of a literary language, which, by impressing its authoritative stamp on certain terms, has secured both their general use and their external integrity. Where no literature exists, as is the case with the general mass of languages in the world, the difficulties are infinitely increased by the combined effects of a prolific growth of dialectic forms, and an absence of all means of tracing out their progress. Whether under these circumstances we may reasonably expect to establish a radical unity of language, is a question which each person must decide for himself. Much may yet be done by a larger induction and a scientific analysis of languages that are yet comparatively unknown. The tendency hitherto has been to enlarge the limits of a "family" according as the elements of affinity have been recognized in outlying members. These limits may perchance be still more enlarged by the discovery of connecting links between the language-families, whereby the criteria of relationship will be modified, and new elements of internal unity be discovered amid the manifold appearances of external diversity.

Meanwhile we must content ourselves with stating the present position of the linguistic science in reference to this important topic. In the first place the Indo-European languages have been reduced to an acknowledged and well-defined relationship: they form one of the two families included under the head of "inflectional" in the morphological classification. The other family in this class is the (so-

[a] Grimm was the first to discover a regular system of displacement of sounds (*lautverschiebung*) pervading the Gothic and Low German languages as compared with Greek and Latin. According to this system, the Gothic substitutes aspirates for tenues (*h* for Gr. *k* or Lat. *c*, *th* for *t*, and *f* for *p*); tenues for medials (*t* for *d*, *p* for *b*, and *k* for *g*): and medials for aspirates (*g* for Gr. *ch* or Lat. *h*, *d* for Gr. *th*, and *b* for Lat. *f* or Gr. *ph*) (*Gesch. Deuts. Spr.* i. 893). We may illustrate the changes by comparing *heart* with *cor* or *καρδία*; thus with *tu*; *five* with *πέμπε* (*πένε*), or *father* with *pater*; *two* with *duo*; *knee* with *γόνυ*; *goose* with *χήν*: *dare* with *θαρσέω*; *bear* with *fero* or *φέρω*. What has thus been done for the Teutonic languages, has been carried out by Schleicher in his *Compendium* for each class of the Indo-European family.

[b] It is a delicate question to decide whether in any given language the onomatopoetic words that may occur are original or derived. Numerous coincidences of sound and sense occur in different languages to which little or no value is attached by etymologists on the ground that they are onomatopoetic. But evidently these may have been handed down from generation to generation, and from language to language, and may have as true a genealogy as any other terms not bearing that character. For instance, the Hebrew *lâ'a* (לָעַע) expresses in its very sound the notion of *swallowing* or *gulping*, the word consisting, as Renan has remarked (*H. G.* i. 460), of a lingual and a guttural, representing respectively the tongue and the throat, which are chiefly engaged in the operation of swallowing. In the Indo-European languages we meet with a large class of words containing the same elements and conveying, more or less, the same meaning, such as *λείχω*, *λιχμάω*, *ligurio*, *lingua*, *gula*, "lick," and others. These words may have had a common source, but, because they are onomatopoetic in their character, they are excluded as evidence of radical affinity. This exclusion may be carried too far, though it is difficult to point out where it should stop. But even onomatopoetic words bear a specific character, and the names given in imitation of the notes of birds differ materially in different languages, apparently from the perception of some subtle analogy with previously existing sounds or ideas. The subject is one of great interest, and may yet play an important part in the history of language.

called) Shemitic, the limits of which are not equally well defined, inasmuch as it may be extended over what are termed the sub-Shemitic languages, including the Egyptian or Coptic. The criteria of the proper Shemitic family (*i. e.* the Aramæan, Hebrew, Arabic, and Ethiopic languages) are distinctive enough; but the connection between the Shemitic and the Egyptian is not definitely established. Some philologists are inclined to claim for the latter an independent position, intermediate between the Indo-European and Shemitic families (Bunsen's *Phil. of Hist.* i. 185 ff.). The agglutinative languages of Europe and Asia are combined by Prof. M. Müller, in one family named "Turanian." It is conceded that the family bond in this case is a loose one, and that the agreement in roots is very partial (*Lectures*, pp. 290–292). Many philologists of high standing, and more particularly Pott (*Ungleich. Mensch. Rassen*, p. 232), deny the family relationship altogether, and break up the agglutinative languages into a great number of families. Certain it is that within the Turanian circle there are languages, such, for instance, as the Ural-Altaian, which show so close an affinity to each other as to be entitled to form a separate division, either as a family or a subdivision of a family: and this being the case, we should hesitate to put them on a parity of footing with the remainder of the Turanian languages. The Caucasian group again differs so widely from the other members of the family as to make the relationship very dubious. The monosyllabic languages of southeastern Asia are not included in the Turanian family by Prof. M. Müller (*Lect.* pp. 290, 326), apparently on the ground that they are not agglutinative; but as the Chinese appears to be connected radically with the Burmese (Humboldt's *Verschied.* p. 368), with the Tibetan (*Ph. of Hist.* i. 393–395), and with the Ural-Altaian languages (Schott in *Abh. Ak. Berl.* 1861, p. 172), it seems to have a good title to be placed in the Turanian family. With regard to the American and the bulk of the African languages, we are unable to say whether they can be brought under any of the heads already mentioned, or whether they stand by themselves as distinct families. The former are referred by writers of high eminence to an Asiatic or Turanian origin (Bunsen, *Phil. of Hist.* ii. 111; Latham's *Man and his Migrat.* p. 186); the latter to the Shemitic family (Latham, p. 148).

The problem that awaits solution is, whether the several families above specified can be reduced to a single family by demonstrating their radical identity. It would be unreasonable to expect that this identity should be coextensive with the vocabularies of the various languages: it would naturally be confined to such ideas and objects as are common to mankind generally. Even within this circle the difficulty of proving the identity may be infinitely enhanced by the absence of materials. There are indeed but two families in which these materials are found in anything like sufficiency, namely, the Indo-European and the Shemitic, and even these furnish us with no historical evidence as to the earlier stages of their growth. We find each, at the most remote literary period, already exhibiting its distinctive character of stem- and word-formation, leaving us to infer, as we best may, from these phenomena the processes by which they had reached that point. Hence there arises abundance of room for difference of opinion, and the extent of the radical identity will depend very much on the view adopted as to these earlier processes. If we could accept in its entirety the system of etymology propounded by the analytical school of Hebrew scholars, it would not be difficult to establish a very large amount of radical identity; but we cannot regard as established the prepositional force of the initial letters, as stated by Delitzsch in his *Jeshurun* (pp. 166, 173, note), still less the correspondence between these and the initial letters of Greek and Latin words[a] (pp. 170–172). The striking uniformity of bisyllabism in the verbal stems is explicable only on the assumption that a single principle underlies the whole; and the existence of groups[b] of words differing slightly in form, and having the same radical sense, leads to the presumption that this principle was one not of composition, but of euphonism and practical convenience. This presumption is still further favored by an analysis of the letters forming the stems, showing that the third letter is in many instances a reduplication, and in others a liquid, a nasal, or a sibilant, introduced either as the initial, the medial, or the final letter. The Hebrew alphabet admits of a classification[c] based on the radical character of the letter according to its position in the stem. The effect of composition would have been to produce, in the first place, a greater inequality in the length of the words,

[a] Several of the terms compared by him are onomatopoetic, as *pârak* (*frac*-ture), *pâtash* (πατάσσειν), and *kâlap*, and in each of these cases the initial letter forms part of the onomatopœia. In others the initial letter in the Greek is radical, as in βασιλεύειν (Pott's *Et. Forsch.* ii. 272), δρύπτειν (i. 229), and στελλάζειν (i. 197). In others again it is euphonic, as in βδέλλειν. Lastly, we are unable to see how *târap* and *threp* admit of close comparison with δρύφειν and τρέφειν. It shows the uncertainty of such analogies that Gesenius compares *thrap* with δρύπτειν, and *kâlap* (קָלַף) with γλύφειν, which Delitzsch compares with *kâlâp* חָלַף). An attempt to establish a large amount of radical identity by means of a resolution of the Hebrew word into its component and significant elements may be seen in the *Philolog. Trans.* for 1858, where, for instance, the *ba* in the Hebrew *babash*, is compared with the Teutonic prefix *be*; the *dar* in *darbash* with the Welsh *dar* in *dar-paru*; and the *chaph* in *chaptash* with the Welsh *cyf* in *cyfarfod*.

[b] These groups are sufficiently common in Hebrew. We will take as an instance the following one: מָשַׁשׁ, נָשַׁשׁ, לָשַׁשׁ, נָשַׁשׁ, and פָּשַׁשׁ, all conveying the idea of "dash" or "strike." Or, again, the following group, with the radical sense of slipperiness סָלַח, חָלַח, חָלַב, לָבַב, לָבַח, לָבָה, לָבַב, לָבַשׁ, לָשַׁח, etc. A classificatory lexicon of such groups would assist the etymological inquiry.

[c] Such a classification is attempted by Boetticher in Bunsen, *Philos. of Hist.* ii. 357. After stating what letters may be inserted either at the beginning, middle, or end of the root, he enumerates those which are always radical in the several positions; ב, for instance, in the beginning and middle, but not at the end; ל and מ in the beginning only; ס and שׁ in the middle and at the end, but not in the beginning. We are not prepared to accept this classification as wholly correct, but we adduce it in illustration of the point above noticed.

and, in the second place, a greater equality in the use of the various organic sounds.

After deducting largely from the amount of etymological correspondence based on the analytical tenets, there still remains a considerable amount of radical identity which appears to be above suspicion. It is impossible to produce in this place a complete list of the terms in which that identity is manifested. In the subjoined note[a] we cite some instances of agreement, which cannot possibly be explained on the principle of direct onomatopœia, and which would therefore seem to be the common inheritance of the Indo-European and Shemitic families. Whether this agreement is, as Renan suggests, the result of a keen susceptibility of the onomatopœtic faculty in the original framers of the words (*Hist. Gén.* i. 465), is a point that can neither be proved nor disproved. But even if it were so, it does not follow that the words were not framed before the separation of the families. Our list of comparative words might be much enlarged, if we were to include comparisons based on the reduction of Shemitic roots to a bisyllabic form. A list of such words may be found in Delitzsch's *Jeshurun*, pp. 177–180. In regard to pronouns and numerals, the identity is but partial. We may detect the *t* sound, which forms the distinctive sound of the second personal pronoun in the Indo-European languages, in the Hebrew *attâh*, and in the personal terminations of the perfect tense; but the *m*, which is the prevailing sound of the first personal pronoun in the former, is supplanted by an *n* in the latter. The numerals *shesh* and *sheba*, for "six" and "seven," accord with the Indo-European forms: those representing the numbers from "one" to "five" are possibly, though not evidently, identical.[b] With regard to the other language-families, it will not be expected, after the observations already made, that we should attempt the proof of their radical identity. The Ural-Altaian languages have been extensively studied, but are hardly ripe for comparison. Occasional resemblances have been detected in grammatical forms[c] and in the vocabularies;[d] but the value of these remains to be proved, and we must await the results of a more extended research into this and other regions of the world of language.

(B.) We pass on to the second point proposed for consideration, namely, the ethnological views expressed in the Bible, and more particularly in the 10th chapter of Genesis, which records the dispersion of nations consequent on the Confusion of Tongues.

I. The Mosaic table does not profess to describe the process of the dispersion; but assuming that dispersion as a *fait accompli*, it records the ethnic relations existing between the various nations affected by it. These relations are expressed under the guise of a genealogy; the ethnological character of the document is, however, clear both from the names, some of which are gentilic in form, as Ludim, Jebusite, etc., others geographical or local, as Misraim, Sidon, etc.; and again from the formulary, which concludes each section of the subject "after their families, after their tongues, in their countries, and in their nations" (vv. 5, 20, 31) Incidentally, the table is geographical as well as ethnological; but this arises out of the practice of designating nations by the countries they occupy. It has indeed been frequently surmised that the arrangement of the table is purely geographical, and this idea is to a certain extent favored by the possibility of explaining the names Shem, Ham, and Japheth on this principle; the first signifying the "high" lands, the second the "hot" or "low" lands, and the third the "broad," undefined regions of the north. The three families may have been so located, and such a circumstance could not have been unknown to the writer of the table. But neither internal nor external evidence satisfactorily prove such to have been the leading idea or principle embodied in it; for the Japhetites are mainly assigned to the "isles" or maritime districts of the west and northwest, while the Shemites press down into the plain of Mesopotamia, and the Hamites, on the other hand, occupy the high lands of Canaan and Lebanon. We hold, therefore, the geographical as subordinate to the ethnographical element, and avail ourselves of the former only as an instrument for the discovery of the latter.

The general arrangement of the table is as follows: The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth. The Shemites are described last, apparently that the continuity of the narrative may not be further disturbed; and the Hamites stand next to the Shemites, in order to show that these were more closely related to each other than to the Japhetites. The comparative degrees of affinity are expressed,

---

[a] קֶרֶן, *cornu*, horn.
מָסַךְ, *μίσγω*, *misceo*, mix.
כָּבַךְ, *circa*, circle.
אֶרֶץ, Germ. *erde*, earth.
חָלַק, *glaber*, *glisco*, Germ. *glatt*, glide
עִם, עַם, עָם, *cum*, *σύν*, *κοινός*.
מָלֵא, *πλέος*, *plenus*, Germ. *voll*, full
בַּר, *purus*, pure.
בָּרָא, בָּרַח, *vorare*, *βορά*.
בָּרַח, *φέρω*, *βαρύς*, *fero*, bear.
אָפָה, *ὀπω*, *opulo*.
כֹּה, *omarus*
קֶרֶת, *cortus*.
זָרַע, *serere*.
מוֹת, Sanak. *mâth*, *mêth*, *mi:h* (Fürst, *Lex.* s v.), whence by the introduction of *r* the Latin *mors*.

[b] See Rödiger's note in Gesen. *Gramm.* p. 166. The identity even of *shesh* and "six" has been questioned, on the ground that the original form of the Hebrew word was *shet* and of the Aryan *kvaks* (*Philol Trans.* 1860, p. 181).

[c] Several such resemblances are pointed out by Ewald in his *Sprachw. Abhand.*, ii. 18, 34, note.

[d] The following verbal resemblances in Hungarian and Sanskrit have been noticed: *egy* and *eka*, "one;" *hat* and *shash*, "six;" *hét* and *saptan*, "seven;" *tiz* and *dasan*, "ten;" *ezer* and *sahasra*, "thousand;" *béka* and *bheka*, "frog;" *arany* and *hiranja*, "gold;" (*Philol. Trans.* for 1856, p. 25). Proofs of a more intimate relationship between the Finnish and Indo European languages are adduced in a paper on the subject in the *Philol. Trans.* for 1860, p. 281 ff.

Digitized by Google

partly by coupling the names together, as in the cases of Elishah and Tarshish, Kittim and Dodanim (ver. 4), and partly by representing a genealogical descent, as, when the nations just mentioned are said to be "sons of Javan." An inequality may be observed in the length of the genealogical lines, which in the case of Japheth extends only to one, in Ham to two, in Shem to three, and even four degrees. This inequality clearly arises out of the varying interest taken in the several lines by the author of the table, and by those for whose use it was designed. We may lastly observe, that the occurrence of the same name in two of the lists, as in the case of Lud (vv. 13, 22), and Sheba (vv. 7, 28), possibly indicates a fusion of the races.

The identification of the Biblical with the historical or classical names of nations, is by no means an easy task, particularly where the names are not subsequently noticed in the Bible. In these cases comparisons with ancient or modern designations are the only resource, and where the designation is one of a purely geographical character, as in the case of Riphath compared with *Ripæi montes*, or Mash compared with *Masius mons*, great doubt must exist as to the ethnic force of the title, inasmuch as several nations may have successively occupied the same district. Equal doubt arises where names admit of being treated as appellatives, and so of being transferred from one district to another. Recent research into Assyrian and Egyptian records has in many instances thrown light on the Biblical titles. In the former we find Meshech and Tubal noticed under the forms *Muskai* and *Tuplai*, while Javan appears as the appellation of Cyprus, where the Assyrians first met with Greek civilization. In the latter the name Phut appears under the form of *Pount*, Hittite as *Khita*, Cush as *Keesh*, Canaan as *Kanana*, etc.

1. The Japhetite list contains fourteen names, of which seven represent independent, and the remainder affiliated nations, as follows: (i.) Gomer, connected ethnically with the *Cimmerii*, *Cimbri* (?), and *Cymry*; and geographically with *Crimea*. Associated with Gomer are the three following: (*a.*) Ashkenaz, generally compared with lake *Ascanius* in Bithynia, but by Knobel with the tribe *Aasi*, *As*, or *Ossetes* in the Caucasian district. On the whole we prefer Hasse's suggestion of a connection between this name and that of the *Axenus*, later the *Euxinus* Pontus. (*b.*) Riphath, the *Ripæi* Montes, which Knobel connects etymologically and geographically with *Carpates* Mons. (*c.*) Togarmah, undoubtedly *Armenia*, or a portion of it. (ii.) Magog, the *Scythians*. (iii.) Madai, *Media*. (iv.) Javan, the *Ionians*, as a general appellation for the Hellenic race, with whom are associated the four following: (*a.*) Elishah, the *Æolians*, less probably identified with the district *Elis*. (*b.*) Tarshish, at a later period of Biblical history certainly identical with *Tartessus* in Spain, to which, however, there are objections as regards the table, partly from the too extended area thus given to the Mosaic world, and partly because Tartessus was a Phœnician, and consequently not a Japhetic settlement. Knobel compares the *Tyrseni*, *Tyrrheni*, and *Tusci* of Italy; but this is precarious. (*c.*) Kittim, the town *Citium* in Cyprus. (*d.*) Dodanim, the *Dardani* of Illyria and Mysia: *Dodona* is sometimes compared. (v.) Tubal, the *Tibareni* in Pontus. (vi.) Meshech, the *Moschi* in the northwestern part of Armenia. (vii.) Tiras, perhaps *Thracia*.

2. The Hamitic list contains thirty names, of which four represent independent, and the remainder affiliated nations, as follows: (i.) Cush, in two branches, the western or African representing *Æthiopia*, the *Keesh* of the old Egyptian, and the eastern or Asiatic being connected with the names of the tribe *Cossæi*, the district *Cissia*, and the province *Susiana* or *Khusistan*. With Cush are associated: (*a.*) Seba, the *Sabæi* of *Yemen* in south Arabia. (*b.*) Havilah, the district *Khâvelân* in the same part of the peninsula. (*c.*) Sabtah, the town *Sabatha* in *Hadramaut*. (*d.*) Raamah, the town *Rhegma* on the southeastern coast of Arabia, with whom are associated: ($a^2$.) Sheba, a tribe probably connected ethnically or commercially with the one of the same name already mentioned, but located on the west coast of the Persian Gulf. ($b^2$.) Dedan, also on the west coast of the Persian Gulf, where the name perhaps still survives in the island *Dadun*. (*c.*) Sabtechah, perhaps the town *Samydace* on the coast of the Indian Ocean eastward of the Persian Gulf. (*f.*) Nimrod, a personal and not a geographical name, the representative of the eastern Cushites. (ii.) Mizraim, the two *Misre*, i. e. Upper and Lower Egypt, with whom the following seven are connected: (*a.*) Ludim, according to Knobel a tribe allied to the Shemitic Lud, but settled in Egypt; others compare the river *Laud* (Plin. v. 2), and the *Leuâtah*, a Berber tribe on the Syrtes. (*b.*) Anamim, according to Knobel the inhabitants of the *Delta*, which would be described in Egyptian by the term *anemehit* or *tamemhit*, "northern district," converted by the Hebrews into Anamim. (*c.*) Naphtuhim, variously explained as the people of *Nephthys*, i. e. the northern coast district (Bochart), and as the worshippers of Phthah, meaning the inhabitants of Memphis. (*d.*) Pathrusim, Upper Egypt, the name being explained as meaning in the Egyptian "the south" (Knobel). (*e.*) Casluhim, *Casius mons*, *Cassiotis*, and *Cassium*, eastward of the Delta (Knobel): the Colchians, according to Bochart, but this is unlikely. (*f.*) Caphtorim, most probably the district about *Coptos* in Upper Egypt [CAPHTOR]; the island of Crete according to many modern critics, Cappadocia according to the older interpreters. (*g.*) Phut, the *Pûnt* of the Egyptian inscriptions, meaning the Libyans. (iii.) Canaan the geographical position of which calls for no remark in this place. The name has been variously explained as meaning the "low" land of the coast district, or the "subjection" threatened to Canaan personally (Gen. ix. 25). To Canaan belong the following eleven: (*a.*) Sidon, the well-known town of that name in Phœnicia. (*b.*) Heth, or the Hittites of Biblical history. (*c.*) The Jebusite, of *Jebus* or Jerusalem. (*d.*) The Amorite frequently mentioned in Biblical history. (*e.*) The Girgasite, the same as the Girgashites. (*f.*) The Hivite, variously explained to mean the occupants of the "interior" (Ewald), or the dwellers in "villages" (Gesen.). (*g.*) The Arkite, of *Arca*, north of Tripolis, at the foot of Lebanon. (*h.*) The Sinite, of *Sin* or *Sinna*, places in the Lebanon district. (*i.*) The Arvadite of *Aradus* on the coast of Phœnicia. (*j.*) The Zemarite, of *Simyra* on the Eleutherus. (*k.*) The Hamathite, of *Hamath*, the classical *Epiphania*, on the Orontes.

3. The Shemitic list contains twenty-five names of which five refer to independent, and the remain-

Digitized by Google

ler to affiliated tribes, as follows: (i.) Elam, the tribe *Elymæi* and the district *Elymais* in Susiana. (ii.) Asshur, *Assyria* between the Tigris and the range of Zagrus. (iii.) Arphaxad, *Arrapachitis* in northern Assyria, with whom are associated: (*a.*) Salah, a personal and not a geographical title, indicating a migration of the people represented by him; Salah's son ($a^2$) Eber, representing geographically the district *across* (i. e. eastward of) the Euphrates; and Eber's two sons ($a^3$) Peleg, a personal name indicating a "division" of this branch of the Shemitic family, and ($b^3$) Joktan, representing generally the inhabitants of *Arabia*, with the following thirteen sons of Joktan, namely: ($a^4$.) Almodad, probably representing the tribe of *Jurhum* near Mecca, whose leader was named *Mudad*. ($b^4$.) Sheleph, the *Salapeni* in *Yemen*. ($c^4$.) Hazarmaveth, *Hadramaut*, in southern Arabia. ($d^4$.) Jerah. ($e^4$.) Hadoram, the *Adramitæ* on the southern coast, in a district of *Hadramaut*. ($f^4$.) Uzal, supposed to represent the town *Szanaa* in south Arabia, as having been founded by *Azal*. ($g^4$.) Diklah. ($h^4$.) Obal, or, as in 1 Chr. i. 22, Ebal, which latter is identified by Knobel with the *Gebanitæ* in the southwest. ($i^4$.) Abimael, doubtfully connected with the district *Mahra*, eastward of *Hadramaut*, and with the towns *Mara* and *Mali*. ($j^4$.) Sheba, the *Sabæi* of southwestern Arabia, about Mariaba. ($k^4$.) Ophir, probably *Adime* on the southern coast, but see article. ($l^4$.) Havilah, the district *Khâwlân* in the northwest of *Yemen* ($m^4$.) Jobab, possibly the *Jobaritæ* of Ptolemy (vi. 7, § 24), for which Jobabitæ may originally have stood. (iv.) Lud generally compared with *Lydia*, but explained by Knobel as referring to the various aboriginal tribes in and about Palestine, such as the Amalekites, Rephaites, Emim, etc. We cannot consider either of these views as well established. Lydia itself lay beyond the horizon of the Mosaic table: as to the Shemitic origin of its population, conflicting opinions are entertained, to which we shall have occasion to advert hereafter. Knobel's view has in its favor the probability that the tribes referred to would be represented in the table; it is, however, wholly devoid of historical confirmation, with the exception of an Arabian tradition that *Amlik* was one of the sons of *Laud* or *Lawad*, the son of Shem.[a] (v.) Aram, the general name for *Syria* and northern *Mesopotamia*, with whom the following are associated: (*a.*) Uz, probably the *Æsitæ* of Ptolemy. (*b.*) Hul, doubtful, but best connected with the name *Huleh*, attaching to a district north of Lake Merom. (*c.*) Gether, not identified. (*d.*) Mash, *Masius Mons*, in the north of Mesopotamia.

There is yet one name noticed in the table, namely, Philistim, which occurs in the Hamitic division, but without any direct assertion of Hamitic descent. The terms used in the A. V. "out of whom (Casluhim) came Philistim" (ver. 14), would naturally imply descent; but the Hebrew text only warrants the conclusion that the Philistines sojourned in the land of the Casluhim. Notwithstanding this, we believe the intention of the author of the table to have been to affirm the Hamitic origin of the Philistines, leaving undecided the particular branch, whether Casluhim or Caphtorim, with which it was more immediately connected.

The total number of names noticed in the table including Philistim, would thus amount to 70, which was raised by patristic writers to 72. These totals afforded scope for numerical comparisons, and also for an estimate of the number of nations and languages to be found on the earth's surface. It is needless to say that the Bible itself furnishes no ground for such calculations, inasmuch as it does not in any case specify the numbers.

Before proceeding further, it would be well to discuss a question materially affecting the historical value of the Mosaic table, namely, the period to which it refers. On this point very various opinions are entertained. Knobel, conceiving it to represent the commercial geography of the Phœnicians, assigns it to about 1300 B. C. (*Völkert.* pp. 4–9), and Renan supports this view (*Hist. Gén.* i. 40), while others allow it no higher an antiquity than the period of the Babylonish Captivity (v. Bohlen's *Gen.* ii. 207; Winer, *Rwb.* ii. 665). Internal evidence leads us to refer it back to the age of Abraham on the following grounds: (1.) The Canaanites were as yet in undisputed possession of Palestine. (2.) The Philistines had not concluded their migration. (3.) Tyre is wholly unnoticed, an omission which cannot be satisfactorily accounted for on the ground that it is included under the name either of Heth (Knobel, p. 323), or of Sidon (v. Bohlen, ii. 241). (4.) Various places such as Simyra, Sinna, and Arca, are noticed, which had fallen into insignificance in later times. (5.) Kittim, which in the age of Solomon was under Phœnician dominion, is assigned to Japheth, and the same may be said of Tarshish, which in that age undoubtedly referred to the Phœnician emporium of *Tartessus*, whatever may have been its earlier significance. The chief objection to so early a date as we have ventured to propose, is the notice of the Medes under the name Madai. The Aryan nation, which bears this name in history, appears not to have reached its final settlement until about 900 B. C. (Rawlinson's *Herod.* i. 404). But on the other hand, the name Media may well have belonged to the district before the arrival of the Aryan Medes, whether it were occupied by a tribe of kindred origin to them or by Turanians; and this probability is to a certain extent confirmed by the notice of a Median dynasty in Babylon, as reported by Berosus, so early as the 25th century B. C. (Rawlinson, i. 434). Little difficulty would be found in assigning so early a date to the Medes, if the Aryan origin of the allied kings mentioned in Gen. xiv. 1 were thoroughly established, in accordance with Renan's view (*H. G.* i. 61): on this point, however, we have our doubts.

The Mosaic table is supplemented by ethnological notices relating to the various divisions of the Terachite family. These belonged to the Shemitic division, being descended from Arphaxad through Peleg, with whom the line terminates in the table. Reu, Serug, and Nahor form the intermediate links between Peleg and Terah (Gen. xi. 18–25), with whom began the movement that terminated in the occupation of Canaan and the adjacent districts by certain branches of the family. The original seat

[a] This tradition probably originated in the desire to form a connecting link between the Mosaic table and the various elements of the Arabian population. The only conclusion to be drawn from it is that, in the opinion of its originator, there was an element which was neither Ishmaelite nor Joktanid (Ewald, *Gesch.* i. 369, note).

Digitized by Google

of Terah[a] was Ur of the Chaldees (Gen. xi. 28): thence he migrated to Haran (Gen. xi. 31), where a section of his descendants, the representatives of Nahor, remained (Gen. xxiv. 10, xxvii. 43, xxix. 4 ff.), while the two branches, represented by Abraham and Lot, the son of Haran, crossed the Euphrates and settled in Canaan and the adjacent districts (Gen. xii. 5). From Lot sprang the Moabites and Ammonites (Gen. xix. 30–38): from Abraham the Ishmaelites through his son Ishmael (Gen. xxv. 12), the Israelites through Isaac and Jacob, the Edomites through Isaac and Esau (Gen. xxxvi.), and certain Arab tribes, of whom the Midianites are the most conspicuous, through the sons of his concubine Keturah (Gen. xxv. 1–4).

The most important geographical question in connection with the Terachites concerns their original settlement. The presence of the Chaldees in Babylonia at a subsequent period of Scriptural history has led to a supposition that they were a Hamitic people, originally belonging to Babylonia, and thence transplanted in the 7th and 8th centuries to northern Assyria (Rawlinson's *Herod.* i. 319). We do not think this view supported by Biblical notices. It is more consistent with the general direction of the Terachite movement to look for Ur in northern Mesopotamia, to the east of Haran. That the Chaldees, or, according to the Hebrew nomenclature, the Kasdim, were found in that neighborhood, is indicated by the name Chesed as one of the sons of Nahor (Gen. xxii. 22), and possibly by the name Arphaxad itself, which, according to Ewald (*Gesch.* i. 378), means "fortress of the Chaldees." In classical times we find the Kasdim still occupying the mountains adjacent to *Arrapachitis*, the Biblical Arpachsad, under the names *Chaldæi* (Xen. *Anab.* iv. 3, §§ 1–4) and *Gordyæi* or *Carduchi* (Strab. xvi. p. 747), and here the name still has a vital existence under the form of *Kurd*. The name Kasdim is explained by Oppert as meaning "two rivers," and thus as equivalent to the Hebrew *Naharaim* and the classical *Mesopotamia* (*Zeit. Morg. Ges.* xi. 137). We receive this explanation with reserve; but, as far as it goes, it favors the northern locality. The evidence for the antiquity of the southern settlement appears to be but small, if the term *Kaldai* does not occur in the Assyrian inscriptions until the 9th century B. C. (Rawlinson, i. 449). We therefore conceive the original seat of the Chaldees to have been in the north, whence they moved southward along the course of the Tigris until they reached Babylon, where we find them dominant in the 7th century B. C. Whether they first entered this country as mercenaries, and then conquered their employers, as suggested by Renan (*H. G.* i. 68), must remain uncertain; but we think the suggestion supported by the circumstance that the name was afterwards transferred to the whole Babylonian population. The sacerdotal character of the Chaldees is certainly difficult to reconcile with this or any other hypothesis on the subject.

Returning to the Terachites, we find it impossible to define the geographical limits of their settlements with precision. They intermingled with the previously existing inhabitants of the countries intervening between the Red Sea and the Euphrates, and hence we find an Aram, an Uz, and a Chesed among the descendants of Nahor (Gen. xxii. 21, 22), a Dedan and a Sheba among those of Abraham by Keturah (Gen. xxv. 3), and an Amalek among the descendants of Esau (Gen. xxxvi. 12). Few of the numerous tribes which sprang from this stock attained historical celebrity. The Israelites must of course be excepted from this description; so also the Nabateans, if they are to be regarded as represented by the Nebaioth of the Bible, as to which there is some doubt (Quatremère, *Mélanges*, p. 59). Of the rest, the Moabites, Ammonites, Midianites, and Edomites are chiefly known for their hostilities with the Israelites, to whom they were close neighbors. The memory of the westerly migration of the Israelites was perpetuated in the name Hebrew, as referring to their residence beyond the river Euphrates (Josh. xxiv. 3).

Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the course of the history without any notice of their ethnology. In this category we may place the Horims, who occupied Edom before the descendants of Esau (Deut. ii. 12, 22); the Amalekites of the Sinaitic peninsula; the Zuzims and Zamzummims of Persea (Gen. xiv. 5; Deut. ii. 20); the Rephaims of Bashan and of the valley near Jerusalem named after them (Gen. xiv. 5; 2 Sam. v. 18); the Emims eastward of the Dead Sea (Gen. xiv. 5); the Avims of the southern Philistine plain (Deut. ii. 23); and the Anakims of southern Palestine (Josh. xi. 21). The question arises whether these tribes were Hamites, or whether they represented an earlier population which preceded the entrance of the Hamites. The latter view is supported by Knobel, who regards the majority of these tribes as Shemites, who preceded the Canaanites, and communicated to them the Shemitic tongue (*Völkert.* pp. 204, 315). No evidence can be adduced in support of this theory, which was probably suggested by the double difficulty of accounting for the name of Lud, and of explaining the apparent anomaly of the Hamites and Terachites speaking the same language. Still less evidence is there in favor of the Turanian origin, which would, we presume, be assigned to these tribes in common with the Canaanites proper, in accordance with a current theory that the first wave of population which overspread western Asia belonged to that branch of the human race (Rawlinson's *Herod.* i. 645, note). To this theory we shall presently advert: meanwhile we can only observe, in reference to these fragmentary populations, that, as they intermingled with the Canaanites, they probably belonged to the same stock (comp. Num. xiii. 22; Judg. i. 10). They may perchance have belonged to an earlier migration than the Canaanitish, and may have been subdued by the later comers; but this would not necessitate a different origin. The names of these tribes and of their abodes, as instanced in Gen. xiv. 5; Deut. ii. 23; Num. xiii. 22, bear a Shemitic character (Ewald, *Gesch.* i. 311), and the only objection to their Canaanitish origin arising out of these names would be in connection with Zamzummim, which, according to Renan (*H. G.* p. 35, note), is formed on the same principle as the Greek *βάρβαρος*, and in this case implies at all events a dialectical difference.

Having thus surveyed the ethnological statements contained in the Bible, it remains for us to inquire how far they are based on, or accord with, physiological or linguistic principles. Knobel maintains

[a] A connection between the names Terah and Trachtaida, Haran and *Anauran*, is suggested by Renan (*Hist. Gén.* i. 29). This, however, is inconsistent with the position generally assigned to Haran.

Digitized by Google

that the threefold division of the Mosaic table is founded on the physiological principle of color, Shem, Ham, and Japheth representing respectively the red, black, and white complexions prevalent in the different regions of the then known world (*Völkert.* pp. 11–13). He claims etymological support for this view in respect to Ham (= "dark") and Japheth (= "fair"), but not in respect to Shem, and he adduces testimony to the fact that such differences of color were noted in ancient times. The etymological argument weakens rather than sustains his view: for it is difficult to conceive that the principle of classification would be embodied in two of the names and not also in the third: the force of such evidence is wholly dependent upon its uniformity. With regard to the actual prevalence of the hues, it is quite consistent with the physical character of the districts that the Hamites of the south should be dark, and the Japhetites of the north fair, and further that the Shemites should hold an intermediate place in color as in geographical position. But we have no evidence that this distinction was strongly marked. The "redness" expressed in the name Edom probably referred to the soil (Stanley, *S. & P.* p. 87): the *Erythræum Mare* was so called from a peculiarity in its own tint, arising from the presence of some vegetable substance, and not because the red Shemites bordered on it, the black Cushites being equally numerous on its shores: the name *Adam*, as applied to the Shemitic man, is ambiguous, from its reference to soil as well as color. On the other hand, the Phœnicians (assuming them to have reached the Mediterranean seaboard before the table was compiled) were so called from their red hue, and yet are placed in the table among the Hamites. The argument drawn from the red hue of the Egyptian deity Typhon is of little value until it can be decisively proved that the deity in question represented the Shemites. This is asserted by Renan (*H. G.* i. 38), who endorses Knobel's view as far as the Shemites are concerned, though he does not accept his general theory.

The linguistic difficulties connected with the Mosaic table are very considerable, and we cannot pretend to unravel the tangled skein of conflicting opinions on the subject. The primary difficulty arises out of the Biblical narrative itself, and is consequently of old standing — the difficulty, namely, of accounting for the evident identity of language spoken by the Shemitic Terachites and the Hamitic Canaanites. Modern linguistic research has rather enhanced than removed this difficulty. The alternatives hitherto offered as satisfactory solutions, namely, that the Terachites adopted the language of the Canaanites, or the Canaanites that of the Terachites, are both inconsistent with the enlarged area which the language is found to cover on each side. Setting aside the question of the high improbability that a wandering nomadic tribe, such as the Terachites, would be able to impose its language on a settled and powerful nation like the Canaanites, it would still remain to be explained how the Cushites and other Hamitic tribes, who did not come into contact with the Terachites, acquired the same general type of language. And on the other hand, assuming that what are called Shemitic languages were really Hamitic, we have to explain the extension of the Hamitic area over Mesopotamia and Assyria, which, according to the table and the general opinion of ethnologists, belonged wholly to a non-Hamitic population. A further question, moreover, arises out of this explanation, namely, what was the language of the Terachites before they assumed this Hamitic tongue? This question is answered by J. G Müller, in Herzog's *R. E.* xiv. 238, to the effect that the Shemites originally spoke an Indo-European language, — a view which we do not expect to see generally adopted.

Restricting ourselves, for the present, to the linguistic question, we must draw attention to the fact that there is a well-defined Hamitic as well as a Shemitic class of languages, and that any theory which obliterates this distinction must fall to the ground. The Hamitic type is most highly developed, as we might expect, in the country which was, *par excellence*, the land of Ham, namely, Egypt; and whatever elements of original unity with the Shemitic type may be detected by philologists, practically the two were as distinct from each other in historical times, as any two languages could possibly be. We are not therefore prepared at once to throw overboard the linguistic element of the Mosaic table. At the same time we recognize the extreme difficulty of explaining the anomaly of Hamitic tribes speaking a Shemitic tongue. It will not suffice to say, in answer to this, that these tribes were Shemites; for again the correctness of the Mosaic table is vindicated by the differences of social and artistic culture which distinguish the Shemites proper from the Phœnicians and Cushites using a Shemitic tongue. The former are characterized by habits of simplicity, isolation, and adherence to patriarchal ways of living and thinking; the Phœnicians, on the other hand, were eminently a commercial people; and the Cushites are identified with the massive architectural erections of Babylonia and South Arabia, and with equally extended ideas of empire and social progress.

The real question at issue concerns the language, not of the whole Hamitic family, but of the Canaanites and Cushites. With regard to the former, various explanations have been offered — such as Knobel's, that they acquired a Shemitic language from a prior population, represented by the Rephaites, Zuzim, Zamzummim, etc. (*Völkert.* p. 315); or Bunsen's, that they were a Shemitic race who had long sojourned in Egypt (*Phil. of Hist.* i. 191) — neither of which are satisfactory. With regard to the latter, the only explanation to be offered is that a Joktanid immigration supervened on the original Hamitic population, the result being a combination of Cushitic civilization with a Shemitic language (Renan, i. 322). Nor is it unimportant to mention that peculiarities have been discovered in the Cushite Shemitic of Southern Arabia which suggest a close affinity with the Phœnician forms (Renan, i. 318). We are not, however, without expectation that time and research will clear up much of the mystery that now enwraps the subject. There are two directions to which we may hopefully turn for light, namely, Egypt and Babylonia, with regard to each of which we make a few remarks.

That the Egyptian language exhibits many striking points of resemblance to the Shemitic type is acknowledged on all sides. It is also allowed that the resemblances are of a valuable character, being observable in the pronouns, numerals, in agglutinative forms, in the treatment of vowels, and other such points (Renan, i. 84, 85). There is not, however, an equal degree of agreement among scholars as to the deductions to be drawn from these resemblances. While many recognize in

Digitized by Google

them the proofs of a substantial identity, and hence regard Hamitism as an early stage of Shemitism, others deny, either on general or on special grounds, the probability of such a connection. When we find such high authorities as Bunsen on the former side (*Phil. of Hist.* i. 186–189, ii. 3) and Renan (i. 86) on the other, not to mention a long array of scholars who have adopted each view, it would be presumption dogmatically to assert the correctness or incorrectness of either. We can only point to the possibility of the identity being established, and to the further possibility that connecting links may be discovered between the two extremes, which may serve to bridge over the gulf, and to render the use of a Shemitic language by a Hamitic race less of an anomaly than it at present appears to be.

Turning eastward to the banks of the Tigris and Euphrates, and the adjacent countries, we find ample materials for research in the inscriptions recently discovered, the examination of which has not yet yielded undisputed results. The Mosaic table places a Shemitic population in Assyria and Elam, and a Cushitic one in Babylon. The probability of this being ethnically (as opposed to geographically) true depends partly on the age assigned to the table. There can be no question that at a late period Assyria and Elam were held by non-Shemitic, probably Aryan conquerors. But if we carry the table back to the age of Abraham, the case may have been different; for though Elam is regarded as etymologically identical with Iran (Renan, i. 41), this is not conclusive as to the Iranian character of the language in early times. Sufficient evidence is afforded by language that the basis of the population in Assyria was Shemitic (Renan, i. 70; Knobel, pp. 154–156); and it is by no means improbable that the inscriptions belonging more especially to the neighborhood of Susa may ultimately establish the fact of a Shemitic population in Elam. The presence of a Cushitic population in Babylon is an opinion very generally held on linguistic grounds; and a close identity is said to exist between the old Babylonian and the *Mahri* language, a Shemitic tongue of an ancient type still living in a district of *Hadramaut*, in Southern Arabia (Renan, *H. G.* i. 60). In addition to the Cushitic and Shemitic elements in the population of Babylonia and the adjacent districts, the presence of a Turanian element has been inferred from the linguistic character of the early inscriptions. We must here express our conviction that the ethnology of the countries in question is considerably clouded by the undefined use of the terms Turanian, Scythic, and the like. It is frequently difficult to decide whether these terms are used in a linguistic sense, as equivalent to *agglutinative*, or in an ethnic sense. The presence of a certain amount of Turanianism in the former does not involve its presence in the latter sense. The old Babylonian and Susianian inscriptions may be more agglutinative than the later ones, but this is only a proof of their belonging to an earlier stage of the language, and does not of itself indicate a foreign population; and if these early Babylonian inscriptions graduate into the Shemitic, as is asserted even by the advocates of the Turanian theory (Rawlinson's *Herod.* i. 442, 445), the presence of an ethnic Turanianism cannot possibly be inferred. Added to this, it is inexplicable how the presence of a large Scythic population in the Achæmenian period, to which many of the Susianian inscriptions belong, could escape the notice of historians. The only Scythic tribes noticed by Herodotus in his review of the Persian empire are the Parthians and the Sacæ, the former of whom are known to have lived in the north, while the latter probably lived in the extreme east, where a memorial of them is still supposed to exist in the name *Seistan*, representing the ancient Sacastene. Even with regard to these, Scythic may not mean Turanian; for they may have belonged to the Scythians of history (the Skolots), for whom an Indo-European origin is claimed (Rawlinson's *Herod* iii. 197). The impression conveyed by the supposed detection of so many heterogeneous elements in the old Babylonian tongue (Rawlinson, i. 442, 444, 646, notes) is not favorable to the general results of the researches.

With regard to Arabia, it may safely be asserted that the Mosaic table is confirmed by modern research. The Cushitic element has left memorials of its presence in the south in the vast ruins of *Mareb* and *Sana* (Renan, i. 318), as well as in the influence it has exercised on the *Himyaritic* and *Mahri* languages, as compared with the Hebrew. The Joktanid element forms the basis of the Arabian population, the Shemitic character of whose language needs no proof. With regard to the Ishmaelite element in the north, we are not aware of any linguistic proof of its existence, but it is confirmed by the traditions of the Arabians themselves.

It remains to be inquired how far the Japhetic stock represents the linguistic characteristics of the Indo-European and Turanian families. Adopting the twofold division of the former, suggested by the name itself, into the eastern and western; and subdividing the eastern into the Indian and Iranian, and the western into the Celtic, Hellenic, Illyrian, Italian, Teutonic, Slavonian, and Lithuanian classes, we are able to assign Madai (*Media*) and Togarmah (*Armenia*) to the Iranian class; Javan (*Ionian*) and Elishah (*Æolian*) to the Hellenic; Gomer conjecturally to the Celtic; and Dodanim, also conjecturally, to the Illyrian. According to the old interpreters, Ashkenaz represents the Teutonic class, while, according to Knobel, the Italian would be represented by Tarshish, whom he identifies with the Etruscans; the Slavonian by Magog; and the Lithuanian possibly by Tiras (pp. 90, 68, 130). The same writer also identifies Riphath with the Gauls, as distinct from the Cymry or Gomer (p. 45); while Kittim is referred by him not improbably to the Carians, who at one period were predominant on the islands adjacent to Asia Minor (p. 98). The evidence for these identifications varies in strength, but in no instance approaches to demonstration. Beyond the general probability that the main branches of the human family would be represented in the Mosaic table, we regard much that has been advanced on this subject as highly precarious. At the same time it must be conceded that the subject is an open one, and that as there is no possibility of proving, so also none of disproving, the correctness of these conjectures. Whether the Turanian family is fairly represented in the Mosaic table may be doubted. Those who advocate the Mongolian origin of the Scythians would naturally regard Magog as the representative of this family; and even those who dissent from the Mongolian theory may still not unreasonably conceive that the title Magog applied broadly to all the nomad tribes of Northern Asia, whether Indo-European or Turanian. Tubal and Meschech remain to be considered: Knobel identifies these respectively with the Iberians and the Ligurians (pp. 111, 119); and it

Digitized by Google

the Finnish character of the Basque language were established, he would regard the Iberians as certainly, and the Ligurians as probably Turanians, the relics of the first wave of population which is supposed to have once overspread the whole of the European continent, and of which the Finns in the north, and the Basques in the south, are the sole surviving representatives. The Turanian character of the two Biblical races above mentioned has been otherwise maintained on the ground of the identity of the names Meschech and Muscovite (Rawlinson's *Herod.* i. 652).

II. Having thus reviewed the ethnic relations of the nations who fell within the circle of the Mosaic table, we propose to cast a glance beyond its limits, and inquire how far the present results of ethnological science support the general idea of the unity of the human race, which underlies the Mosaic system. The chief and in many instances the only instrument at our command for ascertaining the relationship of nations is language. In its general results this instrument is thoroughly trustworthy, and in each individual case to which it is applied it furnishes a strong *primâ facie* evidence; but its evidence, if unsupported by collateral proofs, is not unimpeachable, in consequence of the numerous instances of adopted languages which have occurred within historical times. This drawback to the value of the evidence of language will not materially affect our present inquiry, inasmuch as we shall confine ourselves as much as possible to the general results.

The nomenclature of modern ethnology is not identical with that of the Bible, partly from the enlargement of the area, and partly from the general adoption of language as the basis of classification. The term Shemitic is indeed retained, not, however, to indicate a descent from Shem, but the use of languages allied to that which was current among the Israelites in historical times. Hamitic also finds a place in modern ethnology, but as subordinate to, or coördinate with, Shemitic. Japhetic is superseded mainly by Indo-European or Aryan. The various nations, or families of nations, which find no place under the Biblical titles are classed by certain ethnologists under the broad title of Turanian, while by others they are broken up into divisions more or less numerous.

The first branch of our subject will be to trace the extension of the Shemitic family beyond the limits assigned to it in the Bible. The most marked characteristic of this family, as compared with the Indo-European or Turanian, is its inelasticity. Hemmed in both by natural barriers and by the superior energy and expansiveness of the Aryan and Turanian races, it retains to the present day the *status quo* of early times.[a] The only[b] direction in which it has exhibited any tendency to expand has been about the shores of the Mediterranean, and even here its activity was of a sporadic character, limited to a single branch of the family, namely, the Phœnicians, and to a single phase of expansion, namely, commercial colonies. In Asia Minor we find tokens of Shemitic presence in Cilicia, which was connected with Phœnicia both by tradition (Herod. vii. 91), and by language, as attested by existing coins (Gesen. *Mon. Phœn.* iii. 2): in Pamphylia, Pisidia, and Lycia, parts of which were occupied by the Solymi (Plin. v. 24; Herod. i. 173), whose name bears a Shemitic character, and who are reported to have spoken a Shemitic tongue (Euseb. *Prap. Ev.* ix. 9), a statement confirmed by the occurrence of other Shemitic names, such as Phœnix and Cabalia, though the subsequent predominance of an Aryan population in these same districts is attested by the existing Lycian inscriptions: again in Caria, though the evidence arising out of the supposed identity of the names of the gods Osogo and Chrysaoreus with the Ὀβασος and Χρυσάωρ of Sanchuniathon is called in question (Renan, *H. G.* i. 49): and, lastly, in Lydia, where the descendants of Lud are located by many authorities, and where the prevalence of a Shemitic language is asserted by scholars of the highest standing, among whom we may specify Bunsen and Lassen, in spite of tokens of the contemporaneous presence of the Aryan element, as instanced in the name Sardis, and in spite also of the historical notices of an ethnical connection with Mysia (Herod. i. 171). Whether the Shemites ever occupied any portion of the plateau of Asia Minor may be doubted. In the opinion of the ancients the later occupants of Cappadocia were Syrians, distinguished from the mass of their race by a lighter hue, and hence termed *Leucosyri* (Strab. xii. p. 542); but this statement is traversed by the evidences of Aryanism afforded by the names of the kings and deities, as well as by the Persian character of the religion (Strab. xv. p. 733). If therefore the Shemites ever occupied this district, they must soon have been brought under the dominion of Aryan conquerors (Diefenbach, *Oriy. Europ.* p. 44). The Phœnicians were ubiquitous on the islands and shores of the Mediterranean: in Cyprus, where they have left tokens of their presence at Citium and other places; in Crete; in Malta, where they were the original settlers (Diod. Sic. v. 12); on the mainland of Greece, where their presence is betokened by the name Cadmus; in Samos, Same, and Samothrace, which bear Shemitic names: in Ios and Tenedos, once known by the name of Phœnice; in Sicily, where Panormus, Motya, and Soloeis were Shemitic settlements; in Sardinia (Diod. Sic. v 35); on the eastern and southern coasts of Spain; and on the north coast of Africa, which was lined with Phœnician colonies from the Syrtis Major to the Pillars of Hercules. They must also have penetrated deeply into the interior, to judge from Strabo's statement of the destruction of three hundred towns by the Pharusians and Nigritians (Strab. xvii. p. 826). Still in none of the countries we have mentioned did they supplant the original population: they were conquerors and settlers, but no more than this.

The bulk of the North African languages, both in ancient and modern times, though not Shemitic in the proper sense of the term, so far resemble

[a] The total amount of the Shemitic population at present is computed to be only 30 millions, while the Indo-European is computed at 400 millions (Renan, i. 18, note).

[b] Eastward of the Tigris a Shemitic population has been supposed to exist in Afghanistan, where the *Pushtu* language has been regarded as bearing a Shemitic character. A theory consequently has been started that the people speaking it represent the ten tribes of Israel (Forster's *Prim. Lang.* iii. 241). We believe the supposed Shemitic resemblances to be unfounded, and that the *Pushtu* language holds an intermediate place between the Iranian and Indian classes, with the latter of which it possesses in common the lingual or cerebral sounds (Diefenbach, *Or. Eur.* p 87).

Digitized by Google

that type as to have obtained the title of sub-Shemitic. In the north the old Numidian language appears, from the prevalence of the syllable *Mas* in the name *Massylii*, etc., to be allied to the modern *Berber*; and the same conclusion has been drawn with regard to the Libyan tongue. The *Berber*, in turn, together with the *Tourick* and the great body of the North African dialects, is closely allied to the Coptic of Egypt, and therefore falls under the title of Hamitic, or, according to the more usual nomenclature, sub-Shemitic (Renan, *H. G.* i. 201, 202). Southwards of Egypt the Shemitic type is reproduced in the majority of the Abyssinian languages, particularly in the *Gheez*, and in a less marked degree in the *Amharic*, the *Saho*, and the *Galla*; and Shemitic influence may be traced along the whole east coast of Africa as far as *Mozambique* (Renan, i. 336–340). As to the languages of the interior and of the south there appears to be a conflict of opinions, the writer from whom we have just quoted denying any trace of resemblance to the Shemitic type, while Dr. Latham asserts very confidently that connecting links exist between the sub-Shemitic languages of the north, the Negro languages in the centre, and the Caffre languages of the south; and that even the Hottentot language is not so isolated as has been generally supposed (*Man and his Migr.* pp. 134–148). Bunsen supports this view as far as the languages north of the equator are concerned, but regards the southern as rather approximating to the Turanian type (*Phil. of Hist.* i. 178, ii. 20). It is impossible as yet to form a decided opinion on this large subject.

A question of considerable interest remains yet to be noticed, namely, whether we can trace the Shemitic family back to its original cradle. In the case of the Indo-European family this can be done with a high degree of probability; and if an original unity existed between these stocks, the domicile of the one would necessarily be that of the other. A certain community of ideas and traditions favors this assumption, and possibly the frequent allusions to the east in the early chapters of Genesis may contain a reminiscence of the direction in which the primeval abode lay (Renan, *H. G.* i. 476). The position of this abode we shall describe presently.

The Indo-European family of languages, as at present[a] constituted, consists of the following nine classes: Indian,[b] Iranian, Celtic, Italian, Albanian, Greek, Teutonic, Lithuanian, and Slavonian. Geographically, these classes may be grouped together in two divisions — Eastern and Western — the former comprising the two first, the latter the seven remaining classes. Schleicher divides what we have termed the Western into two — the southwest European, and the north European — in the former of which he places the Greek, Albanian, Italian, and Celtic, in the latter the Slavonian, Lithuanian, and Teutonic (*Compend.* i. 5). Prof. M. Müller combines the Slavonian and Lithuanian classes in the Windic, thus reducing the number to eight. These classes exhibit various degrees of affinity to each other, which are described by Schleicher in the following manner: The earliest deviation from the common language of the family was effected by the Slavono-Teutonic branch. After another interval a second bifurcation occurred, which separated what we may term the Græco-Italo-Celtic branch from the Aryan. The former held together for a while, and then threw off the Greek (including probably the Albanian), leaving the Celtic and Italian still connected: the final division of the two latter took place after another considerable interval. The first-mentioned branch — the Slavono-Teutonic — remained intact for a period somewhat longer than that which witnessed the second bifurcation of the original stock, and then divided into the Teutonic and Slavono-Lithuanian, which latter finally broke up into its two component elements. The Aryan branch similarly held together for a lengthened period, and then bifurcated into the Indian and Iranian. The conclusion Schleicher draws from these linguistic affinities is that the more easterly of the European nations, the Slavonians and Teutons, were the first to leave the common home of the Indo-European race; that they were followed by the Celts, Italians, and Greeks; and that the Indian and Iranian branches were the last to commence their migrations. We feel unable to accept this conclusion, which appears to us to be based on the assumption that the antiquity of a language is to be measured by its approximation to Sanskrit. Looking at the geographical position of the representatives of the different language-classes, we should infer that the most westerly were the earliest immigrants into Europe, and therefore probably the earliest emigrants from the primeval seat of the race; and we believe this to be confirmed by linguistic proofs of the high antiquity of the Celtic as compared with the other branches of the Indo-European family (Bunsen, *Phil. of Hist.* i. 168).

The original seat of the Indo-European race was on the plateau of Central Asia, probably to the westward of the *Bolor* and *Mustagh*, ranges. The Indian branch can be traced back to the slopes of Himalaya by the geographical allusions in the Vedic hymns (M. Müller's *Lect.* p. 201); in confirmation of which we may adduce the circumstance that the only tree for which the Indians have an appellation in common with the western nations, is one which in India is found only on the southern slope of that range (Pott, *Etym. Forsch.* i. 110). The westward progress of the Iranian tribes is a matter of history, and though we cannot trace this progress back to its fountain-head, the locality above mentioned best accords with the traditional belief of the Asiatic Aryans, and with the physical and geographical requirements of the case (Renan, *H. G.* i. 481).

The routes by which the various western branches reached their respective localities, can only be conjectured. We may suppose them to have successively crossed the plateau of Iran until they reached Armenia, whence they might follow either a northerly course across Caucasus, and by the shore of the Black Sea, or a direct westerly one along the plateau of Asia Minor, which seems destined by nature to be the bridge between the two continents of Europe

[a] We use the qualifying expression "at present," partly because it is not improbable that new classes may be hereafter added, as, for instance, an Anatolian, to describe the languages of Asia Minor, and partly because there may have been other classes once in existence, which have entirely disappeared from the face of the earth.

[b] Professor M. Müller adopts the termination *-ic*, in order to show that classes are intended. This appears unnecessary, when it is specified that the arrangement is one of classes, and not of single languages. Moreover, in common usage, the termination does not necessarily carry the idea of a class.

and Asia. A third route has been surmised for a portion of the Celtic stock, namely, along the north coast of Africa, and across the Straits of Gibraltar into Spain (Bunsen, *Ph. of H.* i. 148), but we see little confirmation of this opinion beyond the fact of the early presence of the Celtæ in that peninsula, which is certainly difficult to account for.

The eras of the several migrations are again very much a matter of conjecture. The original movements belong for the most part to the ante historical age, and we can do no more than note the period at which we first encounter the several nations. That the Indian Aryans had reached the mouth of the Indus at all events before 1000 B. C., appears from the Sanskrit names of the articles which Solomon imported from that country [INDIA]. The presence of Aryans on the Shemitic frontier is as old as the composition of the Mosaic table; and, according to some authorities, is proved by the names of the confederate kings in the age of Abraham (Gen. xiv. 1; Renan, *H. G.* i. 61). The Aryan Medes are mentioned in the Assyrian annals about 900 B. C. The Greeks were settled on the peninsula named after them, as well as on the islands of the Ægæan, long before the dawn of history, and the Italians had reached their quarters at a yet earlier period. The Celtæ had reached the west of Europe at all events before, probably very long before, the age of Hecatæus (500 B. C.); the latest branch of this stock arrived there about that period according to Bunsen's conjecture (*Ph. of H.* i. 152). The Teutonic migration followed at a long interval after the Celtic: Pytheas found them already seated on the shores of the Baltic in the age of Alexander the Great (Plin. xxxvii. 11), and the term *glesum* itself, by which amber was described in that district, belongs to them (Diefenbach, *Or. Eur.* p. 359). The earliest historical notice of them depends on the view taken of the nationality of the Teutones, who accompanied the Cimbri on their southern expedition in 113–102 B. C. If these were Celtic, as is not uncommonly thought, then we must look to Cæsar and Tacitus for the earliest definite notices of the Teutonic tribes. The Slavonian immigration was nearly contemporaneous with the Teutonic (Bunsen, *Ph. of H.* i. 72): this stock can be traced back to the *Veneti* or *Venedæ* of Northern Germany, first mentioned by Tacitus (*Germ.* 46), from whom the name *Wend* is probably descended. The designation of *Sluvi* or *Sclavi* is of comparatively late date, and applied specially to the western branch of the Slavonian stock. The Lithuanians are probably represented by the *Galindæ* and *Sudeni* of Ptolemy (iii. 5, § 21), the names of which tribes have been preserved in all ages in the Lithuanian district (Diefenbach, p. 202). They are frequently identified with the *Æstui*, and it is not impossible that they may have adopted the title, which was a geographical one (= the *east* men); the Æstui of Tacitus, however, were Germans. In the above statements we have omitted the problematical identifications of the northern stocks with the earlier nations of history: we may here mention that the Slavonians are not unfrequently regarded as the representatives of the Scythians (Skolots) and the Sarmatians (Knobel, *Völkert.* p. 69). The writer whom we have just cited, also endeavors to connect the Lithuanians with the Agathyrsi (p. 130). So again Grimm traced the Teutonic stock to the Getæ, whom he identified with the Goths (*Gesch. Deut. Spr.* i. 178).

It may be asked whether the Aryan race were the first comers in the lands which they occupied in historical times, or whether they superseded an earlier population. With regard to the Indian branch this question can be answered decisively. the vestiges of an aboriginal population, which once covered the plains of Hindostan, still exist in the southern extremity of the peninsula, as well as in isolated localities elsewhere, as instanced in the case of the Brahus of the north. Not only this, but the Indian class of languages possesses a peculiarity of sound (the lingual or cerebral consonants) which is supposed to have been derived from this population, and to betoken a fusion of the conquerors and the conquered (Schleicher, *Compend.* i. 141). The languages of this early population are classed as Turanian (M. Müller, *Lect.* p. 399). We are unable to find decided traces of Turanians on the plateau of Iran. The Sacæ, of whom we have already spoken, were Scythians, and so were the Parthians, both by reputed descent (Justin, xli. 1) and by habits of life (Strab. xi. 515); but we cannot positively assert that they were Turanians, inasmuch as the term Scythian was also applied, as in the case of the Skolots, to Indo-Europeans. In the Caucasian district the Iberians and others may have been Turanian in early as in later times; but it is difficult to unravel the entanglement of races and languages in that district. In Europe there exists in the present day an undoubted Turanian population eastward of the Baltic, namely, the Finns, who have been located there certainly since the time of Tacitus (*Germ.* 46), and who probably at an earlier period had spread more to the southwards, but had been gradually thrust back by the advance of the Teutonic and Slavonian nations (Diefenbach, *O. E.* p. 209). There exists again in the south a population whose language (the *Basque*, or, as it is entitled in its own land, the *Euskara* presents numerous points of affinity to the Finnish in grammar, though its vocabulary is wholly distinct. We cannot consider the Turanian character of this language as fully established, and we are therefore unable to divine the ethnic affinities of the early Iberians, who are generally regarded as the progenitors of the Basques. We have already adverted to the theory that the Finns in the north and the Basques in the south are the surviving monuments of a Turanian population which overspread the whole of Europe before the arrival of the Indo-Europeans. This is a mere theory which can neither be proved nor disproved.[a]

It would be difficult, if not impossible, to assign to the various subdivisions of the Indo-European stock their respective areas, or, where admixture has taken place, their relative proportions. Language and race are, as already observed, by no means coextensive. The Celtic race, for instance, which occupied Gaul, Northern Italy, large portions of Spain and Germany, and even penetrated across the Hellespont into Asia Minor, where it gave name to the province of Galatia, is now represented linguistically by the insignificant populations among whom the Welsh and the Gaelic or Erse languages retain a lingering existence. The Italian race, on the other hand, which must have been well-nigh annihilated by or absorbed in the

[a] We must be understood as speaking of linguistic and ethnological proofs furnished by populations existing within historical times, without reference to the geological questions relating to the antiquity of man

Digitized by Google

overwhelming masses of the northern hordes, has imposed its language outside the bounds of Italy over the peninsula of Spain, France, and Wallachia. But, while the races have so intermingled as in many instances to lose all trace of their original individuality, the broad fact of their descent from one or other of the branches of the Indo-European family remains unaffected. It is, indeed, impossible to affiliate all the nations whose names appear on the roll of history, to the existing divisions of that family, in consequence of the absence or the obscurity of ethnological criteria. Where, for instance, shall we place the languages of Asia Minor and the adjacent districts? The Phrygian approximates perhaps to the Greek, and yet it differs from it materially both in form and vocabulary (Rawlinson's *Herod.* i. 666) still more is this the case with the Lycian, which appears to possess a vocabulary wholly distinct from its kindred languages (*ibid.* i. 669, 677–679). The Armenian is ranged under the Iranian division: yet this, as well as the language of the Caucasian Ossets, whose indigenous name of *Ir* or *Iron* seems to vindicate for them the same relationship, are so distinctive in their features as to render the connection dubious. The languages prevalent in the mountainous district, answering to the ancient Pontus, are equally peculiar (Diefenbach, *O. E.* p. 51). Passing to the westward we encounter the Thracians, reputed by Herodotus (v. 3) the most powerful nation in the world, the Indians excepted; yet but one word of their language (*bria* = "town") has survived, and all historical traces of the people have been obliterated. It is true that they are represented in later times by the Getæ, and these in turn by the Daci, but neither of these can be tracked either by history or language, unless we accept Grimm's more than doubtful identification which would connect them with the Teutonic branch. The remains of the Scythian language are sufficient to establish the Indo-European affinities of that nation (Rawlinson's *Herod.* iii. 196–203), but insufficient to assign to it a definite place in the family. The Scythians, as well as most of the nomad tribes associated with them, are lost to the eye of the ethnologist, having been either absorbed into other nationalities or swept away by the ravages of war. The Sarmatæ can be traced down to the Iazyges of *Hungary* and *Podlachia*, in which latter district they survived until the 10th century of our era (*Dict. of Geog.* ii. 8), and then they also vanish. The Albanian language presents a problem of a different kind: materials for research are not wanting in this case, but no definite conclusions have as yet been drawn from them: the people who use this tongue, the *Skipetares* as they call themselves, are generally regarded as the representatives of the old Illyrians, who in turn appear to have been closely connected with the Thracians (Strab. vii. 315; Justin, xl. 1), the name Dardani being found both in Illyria and on the shores of the Hellespont: it is not, therefore, improbable that the Albanian may contain whatever vestiges of the old Thracian tongue still survive (Diefenbach, *O. E.* p. 68). In the Italic peninsula the Etruscan tongue remains as great an enigma as ever: its Indo-European character is supposed to be established, together with the probability of its being a mixed language (Bunsen's *Ph. of H.* i. 85–88). The result of researches into the Umbrian language, as represented in the Eugubine tablets, the earliest of which date from about 400 B. C.; into the Sabellian, as represented in the tablets of *Velletri* and *Astino*; and into the Oscan, of which the remains are numerous, have decided their position as members of the Italic class (*ibid.* i. 90–94). The same cannot be asserted of the Messapian or Iapygian language, which stands apart from all neighboring dialects. Its Indo-European character is affirmed, but no ethnological conclusion can as yet be drawn from the scanty information afforded us (*ib.* i. 94). Lastly, within the Celtic area there are ethnological problems which we cannot pretend to solve. The Ligurians, for instance, present one of these problems: were they Celts, but belonging to an earlier migration than the Celts of history? Their name has been referred to a Welsh original, but on this no great reliance can be placed, as it would be in this case a local (= *coastmen*) and not an ethnical title, and might have been imposed on them by the Celts. They evidently hold a posterior place to the Iberians, inasmuch as they are said to have driven a section of this people across the Alps into Italy. That they were distinct from the Celts is asserted by Strabo (ii. 128), but the distinction may have been no greater than exists between the British and the Gaelic branches of that race. The admixture of the Celts and Iberians in the Spanish peninsula is again a somewhat intricate question, which Dr. Latham attempts to explain on the ground that the term Celt (Κέλται) really meant Iberian (*Ethn. of Eur.* p. 35). That such questions as these should arise on a subject which carries us back to times of hoar antiquity, forms no ground for doubting the general conclusion that we can account ethnologically for the population of the European continent.

The Shemitic and Indo-European families cover after all but an insignificant portion of the earth's surface: the large areas of northern and eastern Asia, the numerous groups of islands that line its coast and stud the Pacific in the direction of South America, and again the immense continent of America itself, stretching well-nigh from pole to pole, remain to be accounted for. Historical aid is almost wholly denied to the ethnologist in his researches in these quarters; physiology and language are his only guides. It can hardly, therefore, be matter of surprise, if we are unable to obtain certainty, or even a reasonable degree of probability, on this part of our subject. Much has been done; but far more remains to be done before the data for forming a conclusive opinion can be obtained. In Asia, the languages fall into two large classes — the monosyllabic, and the agglutinative. The former are represented ethnologically by the Chinese, the latter by the various nations classed together by Prof. M. Müller under the common head of Turanian. It is unnecessary for us to discuss the correctness of his view in regarding all these nations as members of one and the same family. Whether we accept or reject his theory, the fact of a gradation of linguistic types and of connecting links between the various branches remains unaffected, and for our present purpose the question is of comparatively little moment. The monosyllabic type apparently betokens the earliest movement from the common home of the human race, and we should therefore assign a chronological priority to the settlement of the Chinese in the east and southeast of the continent. The agglutinative languages fall geographically into two divisions, a northern and southern. The northern consists of a well-defined group, or family, designated by German ethnologists the Ural-Altaian

Digitized by Google

it consists of the following five branches: (1.) The Tungusian, covering a large area, east of the river Yenisei, between lake Baikal, and the Tunguska. (2.) The Mongolian, which prevails over the Great Desert of Gobi, and among the Kalmucks, wherever their nomad habits lead them on the steppes either of Asia or Europe, in the latter of which they are found about the lower course of the Volga. (3.) The Turkish, covering an immense area from the Mediterranean in the southwest to the river Lena in the northeast; in Europe spoken by the Osmanli, who form the governing class in Turkey; by the Nogai, between the Caspian and the Sea of Azov; and by various Caucasian tribes. (4.) The Samoiedic, on the coast of the Arctic Ocean, between the White Sea in the west and the river Anabara in the east. (5.) The Finnish, which is spoken by the Finns and Lapps; by the inhabitants of Esthonia and Livonia to the south of the Gulf of Finland; by various tribes about the Volga (the Tcheremissians and Mordvinians), and the Kama (the Votiakes and Permians); and, lastly, by the Magyars of Hungary. The southern branch is subdivided into the following four classes: (1.) The Tamulian, of the south of Hindostan. (2.) The Bhotiya, of Tibet, the sub-Himalayan district (Nepaul and Bhotan), and the Lohitic languages east of the Brahmapootra. (3.) The Tai, in Siam, Laos, Anam, and Pegu. (4.) The Malay, of the Malay peninsula, and the adjacent islands; the latter being the original settlement of the Malay race, whence they spread in comparatively modern times to the mainland.

The early movements of the races representing these several divisions can only be divined by linguistic tokens. Prof. M. Müller assigns to the northern tribes the following chronological order: Tungusian, Mongolian, Turkish, and Finnish; and to the southern division the following: Tai, Malay, Bhotiya, and Tamulian (*Ph. of H.* i. 481). Geographically it appears more likely that the Malay preceded the Tai, inasmuch as they occupied a more southerly district. The later movements of the European branches of the northern division can be traced historically. The Turkish race commenced their westerly migration from the neighborhood of the Altai range in the 1st century of our era; in the 6th they had reached the Caspian and the Volga; in the 11th and 12th the Turcomans took possession of their present quarters south of Caucasus: in the 13th the Osmanli made their first appearance in Western Asia; about the middle of the 14th they crossed from Asia Minor into Europe; and in the middle of the 15th they had established themselves at Constantinople. The Finnish race is supposed to have been originally settled about the Ural range, and thence to have migrated westward to the shores of the Baltic, which they had reached at a period anterior to the Christian era; in the 7th century a branch pressed southwards to the Danube, and founded the kingdom of Bulgaria, where, however, they have long ceased to have any national existence. The Ugrian tribes, who are the early representatives of the Hungarian Magyars, approached Europe from Asia in the 5th and settled in Hungary in the 9th century of our era. The central point from which the various branches of the Turanian family radiated would appear to be about lake Baikal. With regard to the ethnology of Oceania and America we can say but little. The languages of the former are generally supposed to be connected with the Malay class (Bunsen, *Ph. of H.* ii. 114), but the relations, both linguistic and ethnological, existing between the Malay and the black, or Negrito population, which is found on many of the groups of islands, are not well defined. The approximation in language is far greater than in physiology (Latham's *Essays*, pp. 213, 218; Garnett's *Essays*, p. 310), and in certain cases amounts to identity (Kennedy's *Essays*, p. 35); but the whole subject is at present involved in obscurity. The polysynthetic languages of North America are regarded as emanating from the Mongolian stock (Bunsen, *Ph. of H.* ii. 111), and a close affinity is said to exist between the North American and the Kamskadale and Korean languages on the opposite coast of Asia (Latham, *Man and his Migr.* p. 185). The conclusion drawn from this would be that the population of America entered by way of Behring's Straits. Other theories have, however, been broached on this subject. It has been conjectured that the chain of islands which stretches across the Pacific may have conducted a Malay population to South America; and, again, an African origin has been claimed for the Caribs of Central America (Kennedy's *Essays*, pp. 100–123).

In conclusion, we may safely assert that the tendency of all ethnological and linguistic research is to discover the elements of unity amidst the most striking external varieties. Already the myriads of the human race are massed together into a few large groups. Whether it will ever be possible to go beyond this, and to show the historical unity of these groups, is more than we can undertake to say. But we entertain the firm persuasion that in their broad results these sciences will yield an increasing testimony to the truth of the Bible.

### Appendix. — Tower of Babel.

The Tower of Bábel forms the subject of a previous article [Babel, Tower of]; but in consequence of the discovery of a cuneiform inscription, in which the tower is mentioned in connection with the Confusion of Tongues, the eminent cuneiform scholar Dr. Oppert has kindly sent the following addition to the present article.

The history of the confusion of languages was preserved at Babylon, as we learn by the testimonies of classical and Babylonian authorities (Abydenus, *Fragm. Hist. Græc.*, ed. Didot. vol. iv.). Only the Chaldeans themselves did not admit the

Digitized by Google

Hebrew etymology of the name of their metropolis; they derived it from *Bab-el*, the door of *El* (Kronos or Saturnus), whom Diodorus Siculus states to have been the planet most adored by the Babylonians.

The Talmudists say that the true site of the Tower of Babel was at Borsif, the Greek Borsippa, the *Birs Nimrud*, seven miles and a half from *Hillah*, S. W., and nearly eleven miles from the northern ruins of Babylon. Several passages state that the air of Borsippa makes forgetful (אויר משכחת, *avir mashkakh*); and one Rabbi says that *Borsif* is *Bulsif*, the Confusion of Tongues (*Bereshit Rabba*, f. 42, 1). The Babylonian name of this locality is *Barsip* or *Barzipa*, which we explain by *Tower of Tongues*. The French expedition to Mesopotamia found at the *Birs Nimrud* a clay cake, dated from *Barsip* the 30th day of the 6th month of the 16th year of Nabonid, and the discovery confirmed the hypothesis of several travellers, who had supposed the *Birs Nimrud* to contain the remains of Borsippa.

Borsippa (the Tongue Tower) was formerly a suburb of Babylon, when the old Babel was merely restricted to the northern ruins, before the great extension of the city, which, according to ancient writers, was the greatest that the sun ever warmed with its beams. Nebuchadnezzar included it in the great circumvallation of 480 stades, but left it out of the second wall of 360 stades; and when the exterior wall was destroyed by Darius, Borsippa became independent of Babylon. The historical writers respecting Alexander state that Borsippa had a great sanctuary dedicated to Apollo and Artemis (Strab. xvi. 739; Stephanus Byz. *s. v.* Βόρσιππα), and the former is the building elevated in modern times on the very basement of the old Tower of Babel.

This building, erected by Nebuchadnezzar, is the same that Herodotus describes as the Tower of Jupiter Belus. In our *Expedition to Mesopotamia*[a] we have given a description of this ruin, and proved our assertion of the identity. This tower of Herodotus has nothing to do with the pyramid described by Strabo, and which is certainly to be seen in the remains called now *Babil* (the *Mujellibeh* of Rich). The temple of Borsippa is written with an ideogram,[b] composed of the signs for *house* and *spirit* (anima), the real pronunciation of which was probably *Sarakh*, tower.

The temple consisted of a large substructure, a stade (600 Babylonian feet) in breadth, and 75 feet in height, over which were built seven other stages of 25 feet each. Nebuchadnezzar gives notice of this building in the Borsippa inscription. He named it the temple of the *Seven Lights of the Earth*, i. e. the planets. The top was the temple of Nebo, and in the substructure (*igar*) was a temple consecrated to the god Sin, god of the month. This building, mentioned in the East India House inscription (col. iv. l. 61), is spoken of by Herodotus (i. 181, &c.).

Here follows the Borsippa inscription: "Nabuchodonosor, king of Babylon, shepherd of peoples, who attests the immutable affection of Merodach, the mighty ruler-exalting Nebo; the saviour, the wise man who lends his ears to the orders of the highest god; the lieutenant without reproach, the repairer of the Pyramid and the Tower, eldest son of Nabopallasar, king of Babylon.

"We say: Merodach, the great master, has created me: he has imposed on me to reconstruct his building. Nebo, the guardian over the legions of the heaven and the earth, has charged my hands with the sceptre of justice.

"The Pyramid is the temple of the heaven and the earth, the seat of Merodach, the chief of the gods; the place of the oracles, the spot of his rest, I have adorned in the form of a cupola, with shining gold.

"The Tower, the eternal house, which I founded and built, I have completed its magnificence with silver, gold, other metals, stone, enameled bricks, fir, and pine.

"The first, which is the house of the earth's base, the most ancient monument of Babylon, I built and finished it; I have highly exalted its head with bricks covered with copper.[c]

"We say for the other, that is, this edifice, the house of the Seven Lights of the Earth, the most ancient monument of Borsippa: A former king built it (they reckon 42 ages), but he did not complete its head. *Since a remote time people had abandoned it, without order expressing their words.* Since that time, the earthquake and the thunder had dispersed its sun-dried clay; the bricks of the casing had been split, and the earth of the interior had been scattered in heaps. Merodach, the great lord, excited my mind to repair this building. I did not change the site, nor did I take away the foundation-stone. In a fortunate month, an auspicious day, I undertook to build porticoes around the crude brick masses, and the casing of burnt bricks. I adapted the circuits. I put the inscription of my name in the *Kitir* of the porticoes.

"I set my hand to finish it, and to exalt its head. As it had been in former times, so I founded, I made it; as it had been in ancient days, so I exalted its summit.

"Nebo, son of himself, ruler who exaltest Merodach, be propitious to my works to maintain my authority. Grant me a life until the remotest time, a sevenfold progeny, the stability of my throne, the victory of my sword, the pacification of foes, the triumph over the lands! In the columns of thy eternal table, that fixes the destinies of the heaven and of the earth, bless the course of my days, inscribe the fecundity of my race.

"Imitate, O Merodach, king of heaven and earth, the father who begot thee; bless my buildings, strengthen my authority. May Nebuchadnezzar, the king-repairer, remain before thy face!"

This allusion to the Tower of the Tongues is the only one that has as yet been discovered in the cuneiform inscriptions.[d] The story is a Shemitic and not only a Hebrew one, and we have no reason whatever to doubt of the existence of the same story at Babylon.

The ruins of the building elevated on the spot where the story placed the tower of the dispersion of tongues, have therefore a more modern origin, but interest nevertheless by their stupendous appearance. OPPERT

**TONGUES, GIFT OF.** — I. The history of a word which has been used to express some special, wonderful fact in the spiritual life of man is itself full of interest. It may be a necessary preparation for the study of the fact which that word represents.

Γλῶττα, or γλῶσσα, the word employed throughout the N. T. for the gift now under consideration, is used — (1.) for the bodily organ of speech; (2.) for a foreign word, imported and half naturalized in Greek (Arist. *Rhet.* iii. 2, § 14), a meaning which the words "gloss" and "glossary" preserve for us; (3.) in Hellenistic Greek, after the pattern of the corresponding Hebrew word (לָשׁוֹן), for "speech" or "language" (Gen. x. 5; Dan. i. 4, &c., &c.).

Each of these meanings might be the starting-point for the application of the word to the gift of tongues, and each accordingly has found those who have maintained that it is so. (A.) Eichhorn and Bardili (cited by Bleek, *Stud. u. Krit.* 1829, p. 8 f.), and to some extent Bunsen (*Hippolytus*, i. 9), starting from the first, see in the so-called gift an inarticulate utterance, the cry as of a brute creature, in which the tongue moves while the lips refuse their office in making the sounds definite and distinct. (B.) Bleek himself (*ut supr.* p. 33) adopts the second meaning, and gives an interesting collection of passages to prove that it was, in the time of the N. T., the received sense. He infers from this that to speak in tongues was to use unusual, poetic language — that the speakers were in a high-wrought excitement which showed itself in mystic, figurative terms. In this view he had been preceded by Ernesti (*Opusc. Theolog.*; see *Morning Watch*, iv. 101) and Herder (*Die Gabe der Sprache*, pp. 47, 70), the latter of whom extends the meaning to special mystical interpretations of the O. T. (C.) The received traditional view starts from the third meaning, and sees in the gift of tongues a distinctly linguistic power.

We have to see which of these views has most to commend it. (A.), it is believed, does not meet the condition of answering any of the facts of the N. T., and errs in ignoring the more prominent meaning of the word in later Greek. (B.), though true in some of its conclusions, and able, as far as they are concerned, to support itself by the authority of Augustine (comp. *De Gen. ad lit.* xii. 8, "linguam esse cum quis loquatur obscuras et mysticas significationes"), appears faulty, as failing (1) to recognize the fact that the sense of the word in the N. T. was more likely to be determined by that which it bore in the LXX. than by its meaning in Greek historians or rhetoricians, and (2) to meet the phenomena of Acts ii. (C.) therefore commends itself, as in this respect starting at least from the right point, and likely to lead us to the truth (comp. Olshausen, *Stud. u. Krit.* 1829, p. 533).[a]

II. The chief passages from which we have to draw our conclusion as to the nature and purpose of the gift in question, are — (1.) Mark xvi. 17; (2.) Acts ii. 1–13, x. 46, xix. 6; (3.) 1 Cor. xii., xiv. It deserves notice that the chronological sequence of these passages, as determined by the date of their composition, is probably just the opposite of that of the periods to which they severally refer. The first group is later than the second, the second than the third. It will be expedient, however, whatever modifications this fact may suggest afterward, to deal with the passages in their commonly received order.

III. The promise of a new power coming from the Divine Spirit, giving not only comfort and insight into truth, but fresh powers of utterance of some kind, appears once and again in our Lord's teaching. The disciples are to take no thought what they shall speak, for the Spirit of their Father shall speak in them (Matt. x. 19, 20; Mark xiii. 11). The lips of Galilean peasants are to speak freely and boldly before kings. The only condition is that they are "not to premeditate" — to yield themselves altogether to the power that works on them. Thus they shall have given to them "a mouth and wisdom" which no adversary shall be able "to gainsay or resist." In Mark xvi. 17 we have a more definite term employed: "They shall speak with new tongues (καιναῖς γλώσσαις)." Starting, as above, from (C.), it can hardly be questioned that the obvious meaning of the promise is that the disciples should speak in new languages which they had not learned as other men learn them. It must be remembered, however, that the critical questions connected with Mark xvi. 9–20 (comp. Meyer Tischendorf, Alford, *in loc.*) make it doubtful whether we have here the language of the Evangelist — doubtful therefore whether we have the *ipsissima verba* of the Lord himself, or the nearest approximation of some early transcriber to the contents of the section, no longer extant, with which the Gospel had originally ended. In this case it becomes possible that the later phenomena, or later thoughts respecting them, may have determined the language in which the promise is recorded. On either hypothesis, the promise determines nothing as to the nature of the gift, or the purpose for which it was to be employed. It was to be "a sign." It was not to belong to a chosen few only — to Apostles and Evangelists. It was to "follow them that believed" — to be among the fruits of the living intense faith which raised men above the common level of their lives, and brought them within the kingdom of God.

IV. The wonder of the day of Pentecost is, in its broad features, familiar enough to us. The days since the Ascension had been spent as in a ceaseless ecstasy of worship (Luke xxiv. 53). The 120 disciples were gathered together, waiting with eager expectation for the coming of power from on high — of the Spirit that was to give them new gifts of utterance. The day of Pentecost was come, which they, like all other Israelites, looked on as the witness of the revelation of the Divine Will given on Sinai. Suddenly there swept over them "the sound as of a rushing mighty wind," such as Ezekiel had heard in the visions of God by Chebar (i. 24, xliii. 2) at all times the recognised symbol of a spiritual creative power (comp. Ex. xxxvii. 1–14; Gen. i. 2; 1 K. xix. 11; 2 Chr. v. 14; Ps. civ. 3, 4). With this there was another sign associated even more closely with their thoughts of the day of Pentecost. There appeared unto them "tongues like as of fire." Of old the brightness had been seen gleaming through the "thick cloud" (Ex. xix. 16), or "enfolding" the Divine glory (Ez. i. 4). Now the tongues were distributed (διαμεριζόμεναι), lighting upon each of

[a] Several scholars, we know, do not agree with us. We gave our reasons five years ago, and our antagonists have not yet refuted them

Digitized by Google

them.[a] The outward symbol was accompanied by an inward change. They were "filled with the Holy Spirit," as the Baptist and their Lord had been (Luke i. 15, iv. 1), though they themselves had as yet no experience of a like kind. "They began to speak with other tongues as the Spirit gave them utterance." The narrative that follows leaves hardly any room for doubt that the writer meant to convey the impression that the disciples were heard to speak in languages of which they had no colloquial knowledge previously. The direct statement, "They heard them speaking, each man in his own dialect," the long list of nations, the words put into the lips of the hearers — these can scarcely be reconciled with the theories of Bleek, Herder, and Bunsen, without a willful distortion of the evidence.[b] What view are we to take of a phenomenon so marvelous and exceptional? What views have men actually taken? (1.) The prevalent belief of the Church has been, that in the Pentecostal gift the disciples received a supernatural knowledge of all such languages as they needed for their work as Evangelists. The knowledge was permanent, and could be used at their own will, as though it had been acquired in the common order of things. With this they went forth to preach to the nations. Differences of opinion are found as to special points. Augustine thought that each disciple spoke in all languages (*De Verb. Apost.* clxxv. 3); Chrysostom that each had a special language assigned to him, and that this was the indication of the country which he was called to evangelize (*Hom. in Act.* ii.). Some thought that the number of languages spoken was 70 or 75, after the number of the sons of Noah (Gen. x.) or the sons of Jacob (Gen. xlvi.), or 120, after that of the disciples (comp. Baronius, *Annal.* i. 197). Most were agreed in seeing in the Pentecostal gift the antithesis to the confusion of tongues at Babel, the witness of a restored unity. "Pœna linguarum dispersit homines, donum linguarum dispersos in unum populum collegit" (Grotius, *in loc.*).

Widely diffused as this belief has been, it must be remembered that it goes beyond the data with which the N. T. supplies us. Each instance of the gift recorded in the Acts connects it, not with the work of teaching, but with that of praise and adoration; not with the normal order of men's lives, but with exceptional epochs in them. It came and went as the Spirit gave men the power of utterance — in this respect analogous to the other gift of prophecy with which it was so often associated (Acts ii. 16, 17, xix. 6) — and was not possessed by them as a thing to be used this way or that, according as they chose.[c] The speech of St Peter which follows, like most other speeches addressed to a Jerusalem audience, was spoken apparently in Aramaic.[d] When St. Paul, who "speaks with tongues more than all," was at Lystra, there is no mention made of his using the language of Lycaonia. It is almost implied that he did not understand it (Acts xiv. 11). Not one word in the discussion of spiritual gifts in 1 Cor. xii.–xiv. implies that the gift was of this nature, or given for this purpose. If it had been, the Apostle would surely have told those who possessed it to go and preach to the outlying nations of the heathen world, instead of disturbing the church by what, on this hypothesis, would have been a needless and offensive ostentation (comp. Stanley, *Corinthians*, p. 261, 2d ed.). Without laying much stress on the tradition that St. Peter was followed in his work by Mark as an interpreter (ἑρμηνευτής) (Papias, in Euseb. *H. E.* iii. 30), that even St. Paul was accompanied by Titus in the same character — "quis non potuit divinorum sensuum majestatem digne Græci eloquii sermone explicare" (Hieron. quoted by Estius in 2 Cor. ii.) — they must at least be received as testimonies that the age which was nearest to the phenomena did not take the same view of them as those have done who lived at a greater distance. The testimony of Irenæus (*Adv. Hær.* vi. 6), sometimes urged in support of the common view, in reality decides nothing, and, as far as it goes, tends against it (*infra*). Nor, it may be added, within the limits assigned by the providence of God to the working of the Apostolic Church, was such a gift necessary. Aramaic, Greek, Latin, the three languages of the inscription on the cross, were media of intercourse throughout the empire. Greek alone sufficed, as the N. T. shows us, for the Churches of the West, for Macedonia and Achaia, for Pontus, Asia, Phrygia. The conquests of Alexander and of Rome had made men *diglottic* to an extent which has no parallel in history. (2.) Some interpreters, influenced in part by these facts, have seen their way to another solution of the difficulty by changing the character of the miracle. It lay not in any new power bestowed on the speakers, but in the impression produced on the hearers. Words which the Galilean disciples uttered in their own tongue were heard by those who listened as in their native speech. This view we find adopted by Gregory of Nyssa (*De Spir. Sanct.*), discussed, but not accepted, by Gregory of

---

[a] The sign in this case had its starting-point in the traditional belief of Israelites. There had been, it was said, tongues of fire on the original Pentecost (Schneckenburger, *Beiträge*, p. 6, referring to Buxtorf, *De Synag.*, and Philo, *De Decal.*). The later Rabbis were not without their legends of a like "baptism of fire." Nicodemus ben Gorion and Jochanan ben Zaccai, men of great holiness and wisdom, went into an upper chamber to expound the Law, and the house began to be full of fire (Lightfoot, *Harm.* iii. 14; Schoettgen, *Hor. Heb.* in Acts ii.).

[b] It deserves notice that here also there are analogies in Jewish belief. Every word that went forth from the mouth of God on Sinai was said to have been divided into the seventy languages of the sons of men (Wetstein, on Acts ii.); and the *bath-kol*, the echo of the voice of God, was heard by every man in his own tongue (Schneckenburger, *Beiträge*). So, as regards the power of speaking, there was a tradition that the great Rabbis of the Sanhedrim could speak all the seventy languages of the world.

[c] The first discussion whether the gift of tongues was bestowed "per modum habitus" with which I am acquainted is found in Salmasius, *De Ling. Hebr.* (quoted by Thilo, *De Ling. Ignit.* in Menthen's *Thesaurus*, ii. 497), whose conclusion is in the negative. Even Calmet admits that it was not permanent (*Comm.* in loc.). Compare also Wetstein, *in loc.*; and Olshausen, *Stud. u. Krit.* 1829, p. 546.

[d] Dr. Stanley suggests Greek, as addressed to the Hellenistic Jews who were present in such large numbers (Excurs. on Gift of Tongues, *Corinthians*, p. 269 2d ed.). That St. Peter and the Apostles could speak a provincial Greek is probable enough; but in this instance the speech is addressed chiefly to the permanent dwellers at Jerusalem (Acts ii. 22, 36), and was likely, like that of St. Paul (Acts xxi. 40), to be spoken in their tongue. To most of the Hellenistic hearers this would be intelligible enough.

Nazianzus (*Orat.* xliv.), and reproduced by Erasmus (*in loc.*). A modification of the same theory is presented by Schneckenburger (*Beiträge*), and in part adopted by Olshausen (*l. c.*) and Neander (*Pflanz. u. Leit.* i. 15). The phenomena of somnambulism, of the so-called mesmeric state, are referred to as analogous. The speaker was *en rapport* with his hearers; the latter shared the thoughts of the former, and so heard them, or seemed to hear them, in their own tongues.

There are, it is believed, weighty reasons against both the earlier and later forms of this hypothesis. (1.) It is at variance with the distinct statement of Acts ii. 4, "They began to speak with other tongues." (2.) It at once multiplies the miracle, and degrades its character. Not the 120 disciples, but the whole multitude of many thousands, are in this case the subjects of it. The gift no longer connects itself with the work of the Divine Spirit, following on intense faith and earnest prayer, but is a mere physical prodigy wrought upon men who are altogether wanting in the conditions of capacity for such a supernatural power (Mark xvi. 17). (3.) It involves an element of falsehood. The miracle, on this view, was wrought to make men believe what was not actually the fact. (4.) It is altogether inapplicable to the phenomena of 1 Cor. xiv.

(3.) Critics of a negative school have, as might be expected, adopted the easier course of rejecting the narrative either altogether or in part. The statements do not come from an eye-witness, and may be an exaggerated report of what actually took place — a legend with or without a historical foundation. Those who recognize such a groundwork see in "the rushing mighty wind," the hurricane of a thunderstorm, the fresh breeze of morning; in the "tongues like as of fire," the flashings of the electric fluid; in the "speaking with tongues," the loud screams of men, not all Galileans, but coming from many lands, overpowered by strong excitement, speaking in mystical, figurative, abrupt exclamations. They see in this "the cry of the new-born Christendom." (Bunsen, *Hippolytus*, ii. 12; Ewald, *Gesch. Isr.* vi. 110; Bleek, *l. c.*; Herder, *l. c.*) From the position occupied by these writers, such a view was perhaps natural enough. It does not fall within the scope of this article to discuss in detail a theory which postulates the incredibility of any fact beyond the phenomenal laws of nature, and the falsehood of St. Luke as a narrator.

V. What, then, are the facts actually brought before us? What inferences may be legitimately drawn from them?

(1.) The utterance of words by the disciples, in other languages than their own Galilean Aramaic, is, as has been said, distinctly asserted.

(2.) The words spoken appear to have been determined, not by the will of the speakers, but by the spirit which "gave them utterance." The outward tongue of flame was the symbol of the "burning fire" within, which, as in the case of the older prophets, could not be repressed (Jer. xx. 9).

(3.) The word used, ἀποφθέγγεσθαι, not merely λαλεῖν, has in the LXX. a special though not an exclusive association with the oracular speech of true or false prophets, and appears to imply some peculiar, perhaps musical, solemn intonation (comp. 1 Chr. xxv. 1; Ez. xiii. 9; Trommii *Concordant.* s. v.; Grotius and Wetstein, *in loc.*; Andrewes, *Whitsunday Sermons*, i.).

(4.) The "tongues" were used as an instrument, not of teaching but of praise. At first, indeed, there were none present to be taught. The disciples were by themselves, all sharing equally in the Spirit's gifts. When they were heard by others, it was as proclaiming the praise, the mighty and great works, of God (μεγαλεῖα). What they uttered was not a warning, or reproof, or exhortation, but a doxology (Stanley, *l. c.*; Baumgarten, *Apostelgesch.* § 3). When the work of teaching began, it was in the language of the Jews, and the utterance of tongues ceased.

(5.) Those who spoke them seemed to others to be under the influence of some strong excitement, "full of new wine." They were not as other men, or as they themselves had been before. Some recognized, indeed, that they were in a higher state, but it was one which, in some of its outward features, had a counterfeit likeness in the lower. When St. Paul uses — in Eph. v. 18, 19 (πληροῦσθε πνεύματος) — the all but self-same word which St. Luke uses here to describe the state of the disciples (ἐπλήσθησαν πνεύματος ἁγίου), it is to contrast it with "being drunk with wine," to associate it with "psalms and hymns, and spiritual songs."

(6.) Questions as to the mode of operation of a power above the common laws of bodily or mental life lead us to a region where our words should be "wary and few." There is the risk of seeming to reduce to the known order of nature that which is by confession above and beyond it. In this and in other cases, however, it may be possible, without irreverence or doubt — following the guidance which Scripture itself gives us — to trace in what way the new power did its work, and brought about such wonderful results. It must be remembered, then, that in all likelihood such words as they then uttered had been heard by the disciples before. At every feast which they had ever attended from their youth up, they must have been brought into contact with a crowd as varied as that which was present on the day of Pentecost, the pilgrims of each nation uttering their praises and doxologies. The difference was, that, before, the Galilean peasants had stood in that crowd, neither heeding, nor understanding, nor remembering what they heard, still less able to reproduce it; now they had the power of speaking it clearly and freely. The Divine work would in this case take the form of a supernatural exaltation of the memory, not of imparting a miraculous knowledge of words never heard before. We have the authority of John xiv. 26 for seeing in such an exaltation one of the special works of the Divine Comforter.

(7.) The gift of tongues, the ecstatic burst of praise, is definitely asserted to be a fulfillment of the prediction of Joel ii. 28. The twice-repeated burden of that prediction is, "I will pour out my Spirit," and the effect on those who receive it is that "they shall prophesy." We may see therefore in this special gift that which is analogous to one element at least of the προφητεία of the O. T.; but the element of teaching is, as we have seen, excluded. In 1 Cor. xiv. the gift of tongues and προφητεία (in this, the N. T. sense of the word) are placed in direct contrast. We are led, therefore, to look for that which answers to the Gift of Tongues in the other element of prophecy which is included in the O. T. use of the word; and this is found in the ecstatic praise, the burst of song, which appears under that name in the two histories of Saul (1 Sam. x. 5–13, xix. 20–24), and in the services of the Temple (1 Chr. xxv. 3).

(8.) The other instances in the Acts offer easier

Digitized by Google

tially the same phenomena. By implication in xiv. 15–19, by express statement in x. 47, xi. 15, 17, xix. 6, it belongs to special critical epochs, at which faith is at its highest, and the imposition of the Apostles' hands brought men into the same state, imparted to them the same gift, as they had themselves experienced. In this case, too, the exercise of the gift is at once connected with and distinguished from "prophecy" in its N. T. sense.

VI. The First Epistle to the Corinthians supplies fuller data. The spiritual gifts are classified and compared, arranged, apparently, according to their worth, placed under regulation. This fact is in itself significant. Though recognized as coming from the one Divine Spirit, they are not therefore exempted from the control of man's reason and conscience. The Spirit acts through the calm judgment of the Apostle or the Church, not less but more authoritatively than in the most rapturous and wonderful utterances. The facts which may be gathered are briefly these: —

(1.) The phenomena of the gift of tongues were not confined to one church or section of a church. If we find them at Jerusalem, Ephesus, Corinth, by implication at Thessalonica also (1 Thess. v. 19), we may well believe that they were frequently recurring wherever the spirits of men were passing through the same stages of experience.
